For the most up-to-date information, please visit the School of Nursing website at http://nurseweb.ucsf.edu.

The official catalog of all UCSF courses is available at http://student.ucsf.edu/gencat/ucsfcat.html.

For scheduling (meeting days/times), consult the class schedules published each quarter/term by the Office of Admissions and Registrar (OAR) and by the School of Nursing (see the "current students" information page at http://nurseweb.ucsf.edu/www/ix-cs.shtml).

The following extract from the catalog lists courses of primary interest to School of Nursing students.

The symbol § following the units designates a course approved for credit toward a graduate academic degree. Sessions: Su = summer term, SS = summer session, F = fall quarter, W = winter quarter, Sp = spring quarter. Some courses may not be offered each year; for more information, please contact the affiliated department.

NURSING

141. Pharmacology and Nursing Care. (3) Su. Lecture 3 hours. L. Day
This introductory course examines the principles of pharmacokinetics and pharmacodynamics for major drug classes. Assessment and management of the therapeutic and toxic effects of pharmacologic interventions are emphasized. PHYSIOL NURSG

142. Introduction to Nursing. (11) Su. Lecture 3 hours. Patient contact 24 hours. M. Scott
Course explores the concepts of health and illness and role of the professional nurse. Focuses on using the nursing process in care of persons across the adaptation and developmental continua. Concurrent laboratory designed to develop skills and knowledge common to the nursing care of adults. FAM HLTH

143. Effective Communication. (3) F, W. Lecture 3 hours. K. Shook, Judy Greenwald
Course reviews selected theories of human interaction and presents principles and techniques of effective communication as they relate to establishing and maintaining a helping relationship. Students use laboratory experience to develop skills in communication and interaction. COMM HLTH SYST

144. Adult Medical-Surgical/Geriatric Nursing. (13.5) F, W. Prerequisites: Enrollment in the Master’s Entry Program in Nursing (MEPN) and successful completion of N140, N141, N142, N145. Lecture 4 hours. Clinic 26×11 weeks. M. Scott, L. Day
Course surveys selected medical-surgical conditions, problems of aging and nurse's role in promoting optimal functioning. Planning, implementing and evaluating interventions based on data analysis are emphasized. Clinical experience provides opportunities for role development and application of knowledge and skills. PHYSIOL NURSG 145. Pathophysiology. (5) Su. Prerequisites: Admission to the Master's Entry Program in Nursing (MEPN). Lecture 5 hours. L. Day Course provides understanding of disease and its treatment, and an understanding of basic principles of microbiology as the basis for nursing assessment and intervention. Major diseases will be explored, in part by using a conceptual approach. PHYSIOL NURSG

146. Parent-Child Nursing. (7.5) W, Sp. Prerequisites: N140, N141, N142, N144, N145. Lecture 4 hours. Patient contact 10.5 hours. M. O'Rourke This clinical course in the nursing care of children and families integrates theoretical concepts related to the management of pediatric patients in acute and ambulatory settings. Application of concepts of growth and development of the child and family is included.

147. Childbearing Families. (7.5) F, Sp. Prerequisites: N140, N141, N142, N145. Lecture 4 hours. Patient contact 10.5 hours. L. Chiarello Course focuses on biopsychosocial concepts of normal reproductive and childbearing events. Emphasis is on nursing assessment and management of the childbearing family, the woman, fetus and newborn during the antepartum, intrapartum and postpartum periods.

148. Sociocultural Issues in Health/Illness. (2) F, W. Prerequisites: Enrollment in Master's Entry Program in Nursing (MEPN), N142. Lecture 2 hours. L. Chiarello Course provides an introduction to significant sociocultural concepts in health and illness to increase the student's understanding of variations and their ability to provide culturally competent nursing care.

149. Psych/Mental Health Nursing. (6) W, Sp. Prerequisites: N140, N141, N142, N143, N144, N145, N146. Lecture 3 hours. Patient contact 9 hours. S. Ziehm, K. Shook Course presents biopsychosocial theories of human behavior as they relate to function, alteration and/or disruption of mental processes; reviews current knowledge related to nursing care, psychiatric treatment and psychosocial rehabilitation of the identified mentally ill adults and children and their families.

150. Community Health Nursing. (8.5) F, Sp. Prerequisites: Enrollment in Master's Entry Program in Nursing (MEPN), N140, N141, N142, N145. Lecture 3 hours. Clinic 16.5 hours. J. Greenwald Course focuses on applying the nursing process to community health nursing practice in community settings. Concepts and research from nursing, family and community health will be explored. Nursing care of vulnerable groups in the community will be emphasized.

151. Issues in Nursing. (3) Sp. Prerequisites: Enrollment in Master's Entry Program in Nursing (MEPN), N142, N144. Lecture 3 hours. K. Dracup Course explores major issues and trends in contemporary nursing.
and health care delivery as they relate to nursing practice, education and research. Course identifies strategies nurses can use to influence issues affecting nursing practice and health care delivery. FAM HLTH

Course reviews bibliographic search methodology, the style of scientific writing, American Psychological Association (APA) editorial format and composition of the introductory paragraph. PHYSIOL NURSG

Lab 3-15 hours. Staff
Students collaborate in clinical investigation and study special problems related to nursing and health sciences under the direction of faculty. Students may select topics for study related to their area of interest.

198. Supervised Study in Nursing. (1-5) SS1, SS2, F, W, Sp.
Prerequisites: Consent of instructor. Lab 3-15 hours. Staff
Student conducts library research and does directed reading under supervision of a faculty member with approval of the chairperson of the department.

199. Laboratory Project in Nursing. (1-5) SS1, SS2, F, W, Sp.
Prerequisites: Consent of instructor. Lab 3-15 hours. Staff
Student conducts a laboratory research project under direction of a faculty member with the approval of the chairperson of the department.

201A. Curriculum Development. (2) § Sp. Prerequisites: None. Lecture 2 hours. N. Stotts
Course provides the theoretical basis for curriculum development. The role of the philosophy and conceptual framework in driving program and course design will be analyzed. The fit of program and course evaluation strategies will be critically evaluated. PHYSIOL NURSG

201B. Teaching-Learning Process. (2) § F. Prerequisites: Enrollment in graduate nursing program. Lecture 2 hours. Z. Mirsky
Course critically evaluates principles and theories of teaching-learning practices in nursing education, staff development and client teaching programs. Theoretical and practical applications, including presentation skills, for student-centered and distance (distributed) education will be explored. PHYSIOL NURSG

201C. Methods of Clinical Instruction. (2) § W. Prerequisites: None. Seminar 2 hours. N. Stotts
Course explores the theoretical foundations for clinical supervision, teaching and evaluation in nursing education. The focus will be on clinical activities commonly utilized to enhance the learning process in the clinical setting. PHYSIOL NURSG

202A. Theory Development in Nursing. (3) § F. Prerequisites: Doctoral standing or consent of instructor. Lecture 1 hour. Seminar 2 hours. J. Faucett
Critical analyses of contemporary strategies for the development of nursing theory building, particularly as they relate to selected nursing phenomena and an in-depth analysis of selected theoretical schools of thought. COMM HLTH SYST
202B. Behavior Theories for Nursing Research. (2) § Sp.
Prerequisites: N202A or N264 or consent of instructor. Seminar 2 hours. J. Faucett, C. Waters
Seminar will examine theories that have been used to study health-related human behavior and behavior change from a historical as well as conceptual perspective. The course will include a critical review of each theory and its applicability for nursing research. COMM HLTH SYST

203. End-of-Life Care Across Practice Settings. (2) § Sp.
Prerequisites: None. Seminar 2 hours. K. Puntillo
Course examines the theory and practice of providing end-of-life care to patients and their families within and across multiple practice settings, including acute care. A multidisciplinary approach to palliative care will address symptom management as well as age-related, cultural, spiritual, ethical and communication issues. PHYSIOL NURSG

204. Pathophysiology in Family Primary Care. (3) § W. Prerequisites: None. Restrictions: Enrollment in Family Nurse Practitioner (FNP) program or consent of instructor. Seminar 1 hour. Online web-based 3 hours per week. E. Scarr, M. Scott
Course is designed to promote the understanding and application of knowledge of fundamental disease processes in the clinical setting of a family nurse practitioner. Concepts of anatomy, physiology and pathophysiology are included. FAM HLTH

205. Concepts in Chronic Illness. (2) § W. Prerequisites: N221 or N279 or permission of instructor. Lecture 2 hours. C. Chesla
Course reviews, analyzes and critiques selected conceptions of chronic illness. Empiric support for and applicability of chronic illness concepts are reviewed across settings, populations and the life span. Applicability to diverse US populations is emphasized. FAM HLTH

206A. Research on Management of Psychiatric Conditions. (3) § F. Prerequisites: N227 and N219 or consent of instructor. Lecture 2 hours. Seminar 1 hour. B. Phoenix
Course analyzes research on current practice approaches to adults with mental illness and children with severe emotional disturbance. The emphasis is on psychotherapeutic and psychoeducational interventions and long-term management of psychiatric symptomatology. This course fulfills the School of Nursing requirement for coursework in research utilization. COMM HLTH SYST

207A. Communicating with the Latino Patient I. (1) § W.
Prerequisites: Students must demonstrate to instructor intermediate level of Spanish to enroll in course. Restrictions: Enrollment by consent of instructor will be given to first-year master’s students. Second-year students and MEPN students will be included if space is available. Seminar 1 hour. P. Bernal de Pheils
Course provides advanced content and practice in Spanish. Emphasis will be in taking a health history, giving physical exam instructions and addressing patient concerns using proper terminology and correct verb tense and within the sociocultural background of selected Latin American groups. FAM HLTH
207B. Communicating with the Latino Patient II. (1) § Sp. Prerequisites: Consent of instructor and successful completion of N207A. Restrictions: Enrollment by consent of instructor will be given to first-year master's students. Second-year students and MEPN students will be included if space is available. Seminar 1 hour. P. Bernal de Pheils Course provides advanced content and practice in Spanish. Emphasis will be in building confidence in communicating appropriately using complex verb tenses, commands and sentence structure. Course will include cultural content to increase understanding of conduct and behavior, so treatment is culturally sensitive and linguistically appropriate for patients/families of Latino American background. FAM HLTH

208A. Human Pathophysiology and Aging. (3) § F. Prerequisites: None. Lecture 3 hours. M. Engler Course integrates and applies knowledge of aging and pathophysiological concepts/alterations in selected organs and systems as a basis for advanced practice. Content areas to be addressed include: altered cellular, neurological and hormonal regulation. PHYSIOL NURSG

208B. Human Pathophysiology and Aging. (3) § W. Prerequisites: None. Lecture 3 hours. M. Engler Course integrates and applies knowledge of aging and pathophysiological concepts/alterations in selected organs and systems as a basis for advanced practice. Content areas to be addressed include: altered cardiovascular, pulmonary and renal function. PHYSIOL NURSG

209A. Comparative Qualitative Research Design. (2) § F. Prerequisites: None. Restrictions: Enrollment in the doctoral program. Lecture 2 hours. H. Kennedy Course provides an introduction to the principles and methods of qualitative research, critically analyzing the elements of qualitative research design set within the context of the research questions to be asked and the existing knowledge in the area. FAM HLTH

209B. Comparative Research Design. (2) § F. Prerequisites: Enrollment in doctoral program in nursing or consent of instructor. Restrictions: Restricted to doctoral students. Lecture 2 hours. G. Padilla Course provides a critical analysis of techniques to conduct systematic reviews of bodies of knowledge, and provides strategies to critique the scientific rigor (validity) of quantitative research designs. Students link theory with operations; causality in problem conceptualization; various quantitative research designs; critique designs; sampling, power analysis, measurement and data analyses; conduct, synthesize, critique systematic reviews of bodies of knowledge. PHYSIOL NURSG

210A. Introduction to Health Care Informatics. (3) § F. Lecture 3 hours. C. Portillo Introduction and overview of health care informatics, focused on the building blocks for computer-based systems with specific application examples (e.g., clinical information systems, educational technologies, telemedicine, digital libraries, simulation and modeling). COMM HLTH SYST

210B. Decision Support Systems. (3) § W, Sp. Prerequisites: N210A Introduction to Health Care Informatics. Lecture 3 hours. C. Mead Introduction and overview of decisionmaking and decision support
systems in health care, including theoretical approaches, model-based
decision support (decision analysis and multiple criteria models), and
knowledge-based support systems. COMM HLTH SYST

211A. Basic Topics in Leadership in Health Care Systems. (1-6) §
F, W, Sp, Su. Prerequisites: None. Restrictions: Consent of instructor. Lecture 1-6 hours. E. O’Neil
Course examines basic topics in leadership in health care systems
including management, human resources, financing and budgeting,
and feedback and coaching. SOC BEH SCI

211B. Managing Change in Health Care Systems. (1-6) § F, W, Sp,
Su. Prerequisites: None. Restrictions: Consent of instructor. Lecture 1-6 hours. E. O’Neil
Course examines the principles of organization change in health care
systems. These include strategy, decision making and conflict manage-
ment, communications, and quality improvement and management.
SOC BEH SCI

Prerequisites: None. Restrictions: Consent of instructor. Lecture 1-6
hours. E. O’Neil, J. Hirsch
Course examines the principles of leadership and self-renewal includ-
ing negotiating, motivating others, problem solving, managing diver-
sity, improving care management, and developing skills and knowledge.
SOC BEH SCI

212A. Qualitative Data Collection and Ethics. (2) § Sp. Prerequisites:
N209A. Lecture 2 hours. J. Humphreys, T. Juarbe
Course examines the construction of qualitative research and ethics in
research. Students formulate research questions and design a qualita-
tive study. FAM HLTH

212B. Quantitative Measurement and Theory. (3) § Sp. Prerequisites:
N209B. Lecture 3 hours. R. Slaughter
Course critically evaluates concepts underlying measurement reliability
and validity. Construction of measurement tools and their use in quan-
titative research will be explored. INTERDEPART

213A. Common Problems of Cancer Care. (3) § F. Prerequisites:
None. Seminar 3 hours. M. Dodd
Course addresses the theoretical and scientifically based clinical
perspectives essential to managing common problems of the person
with cancer and HIV/AIDS-related malignancies. This includes nursing
interventions, self-care and ambulatory/home measures across the
illness continuum of these disease states. PHYSIOL NURSG

213B. Oncologic Emergencies. (3) § F. Prerequisites: None. Lecture 3
hours. C. Miaskowski
Course addresses the theoretical and scientific basis for management
of complex clinical conditions experienced by patients with cancer
and HIV/AIDS. Emphasis is on nursing management of conditions
such as: spinal cord compression, sepsis, superior vena cava syn-
drome and pneumocystis carinii pneumonia. PHYSIOL NURSG
214A. Community-Based Long-Term Care. (1-2) § W. Prerequisites: S222 taken prior to or concurrent with course. Seminar 1 hour. Optional field work 3 hours. L. Reif
Course analyzes empirical research and theory dealing with noninstitutional approaches to long-term care. Examination of patient characteristics and needs, models of service delivery, factors affecting service utilization, and nurses’ roles in provision and management of community-based long-term care. PHYSIOL NURSG

214B. Institutional Care of the Aged. (2-3) § W. Prerequisites: None. Seminar 2 hours. Optional field work 3 hours. J. Kayser-Jones
Course uses a theoretical, historical and cross-cultural approach to focus on issues, problems and trends in institutional care of the elderly. Research studies will be discussed and analyzed, and the health professionals’ role in providing care will be explored. PHYSIOL NURSG

215. Advanced Practice in Community Health. (3) § W. Prerequisites: None. Lecture 3 hours. C. Waters
Course includes a comprehensive analysis of methods, theory and research to assess, plan, intervene and evaluate health risks and resources for diverse populations and their interface with public and community health systems. COMM HLTH SYST

216A. Cardiovascular Disease I. (3) § F. Prerequisites: None. Seminar 3 hours. E. Froelicher
Course correlates pathophysiology, clinical diagnosis and current management of cardiovascular disorders across the illness continuum and across settings. Content areas include: cardiac diagnostics, hypertension, hyperlipidemia, atherosclerosis and myocardial ischemia. PHYSIOL NURSG

216B. Cardiovascular Disease II. (3) § W. Prerequisites: N216A or consent of instructor. Seminar 3 hours. M. Engler
Course correlates pathophysiology, clinical diagnosis and current management of cardiovascular disorders across the illness continuum and across settings. Content areas include: revascularization procedures, valvular heart disease, cardiomyopathy and heart failure. PHYSIOL NURSG

217A. Care of High-Risk Populations I. (2) § Sp. Prerequisites: Enrollment in Family Nurse Practitioner (FNP) program or consent of instructor. Lecture 2 hours. E. Monasterio, M. White
Course introduces concepts of health care disparities, epidemiology of health conditions and public health implications of caring for high-risk populations, with an emphasis on the incarcerated, homeless and mentally ill. Social, cultural and ethical concerns related to providing services to high-risk populations are discussed. Content covered in this introductory course will prepare students for N217B. FAM HLTH

217B. Care of High-Risk Populations II. (2) § W. Prerequisites: Enrollment in FNP program and completion of N217A or consent of instructor. Restrictions: none. Lecture 2 hours. E. Scarr
Course presents selected topics encountered in primary care, focusing on conditions common in high-risk populations. Emphasis is on clinical presentation, the rational use of diagnostic testing, and
implementation of management plans formulated for high-risk clients. Correlation with clinical practice is an integral aspect of the course. Course incorporates theoretical and psychosocial content presented in N217A. FAM HLTH

219. Psychiatric Assessment. (2-3) § W. Lecture 2 hours. Lab 3 hours (optional). L. Chafetz
Course uses clinical material in the critical examination of standard psychiatric diagnoses. Emphasis will be on the utility of assessment tools such as the mental status examination and the psychiatric history across diverse clinical specialties and the life span. COMM HLTH SYST

220. Academic Role Development. (1) § W. Prerequisites: None. Seminar 1 hour. K. Dracup
Seminar focuses on development of a career as a university faculty member. Emphasis will be on understanding how to develop a program of research and develop a reputation in the field. Foci will include teaching, mentoring students, university/public service. PHYSIOL NURSG

Seminar is designed to enhance students’ knowledge of faculty roles and responsibilities. It will explore how the roles vary, dependent on the level of teaching (associate degree, baccalaureate) and type of institution (public, private). Performance expectations and evaluative criteria for merit and promotion will be discussed. PHYSIOL NURSG

220.02. Academic Role Preparation II. (1) § F, W, Sp. Prerequisites: Admission to doctoral program. Seminar 1 hour. N. Stotts, D. Fontaine
Seminar is designed to enhance students’ knowledge of faculty roles and responsibilities. Role dimensions of research service, teaching and clinical competence will be evaluated and analyzed. Students will develop skill in and appreciation of the central aspects of communication, presentation and evaluation as they underpin all components of the role. PHYSIOL NURSG

221. Theory in Advanced Practice Nursing. (2) § F. Prerequisites: None. Lecture 2 hours. Staff
Course provides an introduction to critical thinking about the discipline of nursing. Comparative analyses of frameworks to critique competing theoretical approaches to nursing practice are presented. Methods for the development, testing and implementation of practice theories are discussed. PHYSIOL NURSG

221.01. Theories Related to Nursing Care of the Adult. (3) § F. Prerequisites: None. Restrictions: None. Lecture 3 hours. V. Carrier-Kohlman
Course provides introduction to critical thinking, clinical and ethical reasoning about the discipline of nursing and its contributions to advanced nursing practice in the care of the adult. Includes a critique of theoretical approaches that guide development of science for nursing care of the adult. Research methods for development, testing and implementation of selected theoretical approaches are discussed and critiqued. PHYSIOL NURSG

222A. Clinical Management of Chronic Illness I. (2) § W. Prerequisites: N246, N247, N247.02A. Lecture 2 hours. E. Scarr
Course presents the clinical management of patients with selected chronic illnesses. Content builds on existing knowledge of anatomy, physiology and pathophysiology. Emphasis is on common presenting symptoms, rational use of diagnostic testing and the formulation of appropriate management plans. Correlation with clinical practice is an integral aspect of course. FAM HLTH

222B. Clinical Management of Chronic Illness II. (2) § Sp.
Prerequisites: N222A, N246, N247, N247.02A, N247.02B, or instructor approval. Lecture 2 hours. E. Monasterio
Course presents the clinical management of patients and families across the life span with selected chronic illnesses. Expanded content in cardiorespiratory, endocrine and musculoskeletal conditions is emphasized, and content builds on existing knowledge of anatomy, physiology and pathophysiology. FAM HLTH

223A. Symptom Research Proseminar. (2) § F. Prerequisites:
Symptom management trainee or consent of instructor. Seminar 2 hours. J. Humphreys, B. Aouizerat
Course focuses on theories and research related to symptom perception and evaluation. INTERDEPART

223B. Symptom Research Proseminar. (2) § W. Prerequisites:
Symptom management trainee or consent of instructor. Lecture 2 hours. S. Janson
Course focuses on theories and research pertinent to symptom management strategies and therapeutics. Research on salient interventions is critiqued across symptoms and research design, methods, implementation and analysis. INTERDEPART

223C. Symptom Research Proseminar. (2) § Sp. Prerequisites:
Symptom management trainee or consent of instructor. Lecture 2 hours. V. Carrieri-Kohlman
Course focuses on symptom outcomes. Biopsychosocial and economic outcomes related to the symptom experience/management strategies are discussed, measurement issues are presented with discussion of validity and reliability issues, and research studies related to these variables are critiqued. INTERDEPART

225. Cardiac Rhythm: Theory & Analysis. (2) § W. Prerequisites:
Consent of instructor. Lecture 2 hours. B. Drew
Cardiac electrophysiology in normal and pathological states and the scientific basis for nursing's response to cardiac arrhythmias. Content includes: theory and research on the mechanisms, diagnosis, electrocardiographic monitoring, treatment of cardiac arrhythmias and use of the electrocardiogram for nursing research. PHYSIOL NURSG

226. Managed Care: Clinical Implications. (1) § W. Prerequisites:
Concurrent enrollment in S222 Health Care Economics & Policy. Seminar 1 hour. N. Stotts
Course examines the impact of managed care systems on patient care services across health care settings. Emphasis will be placed on the roles and functions of clinical nurse specialists working with aggregates of patients/clients in managed care systems. PHYSIOL NURSG
227. Theories of Mental Illness. (3) § F. Prerequisites: Consent of instructor. Seminar 3 hours. S. Weiss
Course examines major theories of mental illness and their implication for understanding the etiology and treatment of psychiatric conditions. Neurochemical, neuroendocrine, genetic, cognitive/behavioral, psychodynamic, attachment and humanistic theories will be analyzed and applied to the assessment and management of mental health problems. Ethical issues raised by different theoretical perspectives will be discussed. COMM HLTH SYST

228. Concepts in Nursing Practice. (2) § W. Prerequisites: None. Lecture 2 hours. V. Carrieri-Kohlman
Course examines selected clinical concepts from their scientific and theoretical basis. Theoretical issues related to the application of the concepts across settings and life span will be addressed. Students will be introduced to a process of concepts analysis. PHYSIOL NURSG

229. Philosophy of Nursing Science. (3) § W. Prerequisites: Doctoral standing or consent of the instructor. Lecture 2 hours. Seminar 1 hour. W. Holzemer, S. Rankin
Contemporary philosophic viewpoints on the nature of nursing science, addressing natural science, integrative science, and human science traditions and scientific integrity. PHYSIOL NURSG

230. Measuring Outcomes of Health Care. (3) § F. Prerequisites: None. Lecture 3 hours. V. Carrieri-Kohlman
Course presents current approaches and methods for clinical effectiveness and outcomes evaluation. The influence of patient, provider and organizational factors on clinical effectiveness and outcomes evaluation is critically analyzed. COMM HLTH SYST

231A. Substance Use and Mental Illness. (2) § Sp. Prerequisites: Enrollment in psychiatric master's program or consent of instructor. Lecture 2 hours. B. Phoenix
Examines causes and consequences of substance use disorders among severely mentally ill adults. Examines service delivery models developed for harm reduction and to promote recovery among high-risk populations. Emphasis on culturally competent services for diverse groups. COMM HLTH SYST

232. Clinical Pharmacology. (3) § W. Prerequisites: N270 or consent of instructor. Restrictions: Enrollment in an adult specialty. Lecture 2 hours. Online 3 hours. J. Saxe
Course introduces the clinical application of pharmacology in the management of patients, including frequently prescribed drugs for the treatment of chronic diseases and minor acute illnesses across the life span. COMM HLTH SYST

232.03. Geriatric Pharmacology. (1) § W, Sp. Prerequisites: N232, N247, N270. Lecture 1 hour. C. Deitrich
Course focuses on the clinical application of pharmacology in the management of older adults in ambulatory and nursing home settings. Emphasis is on case discussions and student participation. PHYSIOL NURSG
232.04. Neonatal/Pediatric Pharmacology. (2) § Sp. Prerequisites: None. Lecture 2 hours. N. Schapiro
Course provides systematic presentation of the clinical application of pharmacologic interventions commonly prescribed for healthy and sick infants and children in varied health care environments. Emphasis is placed on the integration of pharmacologic interventions as a component of advanced practice nursing. FAM HLTH

232.04A. Pediatric Pharmacology. (2) § Sp. Prerequisites: Past or concurrent enrollment in N246 and N283B or consent of instructor. Lecture 2 hours. N. Schapiro
Course provides overview of pediatric pharmacology with emphasis on medications used in primary care settings. Content includes developing changes in drug absorption, distribution, elimination and adverse effects from birth through adolescence. Legal, ethical, safety and patient education aspects of furnishing medications to children are discussed, as well as the integration of evidence-based pharmacologic interventions into advanced practice pediatric nursing. FAM HLTH

232.04B. Complex Topics in Pediatric Pharmacology. (2) § W. Prerequisites: Successful completion of N232.04A and successful completion of or concurrent enrollment in N283C or consent of instructor. Lecture 2 hours; online 6 hours. N. Schapiro
Course builds on content from N232.04A, focusing on pharmacologic interventions for infants, children and adolescents with critical illness or chronic conditions. Emphasis is placed on evaluating pharmacologic research to guide decisionmaking, on minimizing adverse reactions and maximizing outcomes for children on multiple medications. FAM HLTH

232.05. Antibiotic Therapeutics in Acute Care. (2) § Sp. Prerequisites: Acute care nurse practitioner student or consent of instructor. Lecture .5 hour. Web-based coursework 4.5 hours. J. Howie Esquivel
Course provides information regarding antibiotic therapy for acutely ill/hospitalized adults. This primarily web-based course contains modules on selected topics such as skin, cardiac and neurological infections. PHYSIOL NURSG

234. Program Development and Management. (3) § Sp. Prerequisites: None. Lecture 3 hours. C. Waters
Course provides content on program planning and financial analysis. Consideration is given to translating this knowledge and skills for clinical nurse specialists to utilize in a changing health care environment. COMM HLTH SYST

236A. Complementary Healing. (3) § F. Prerequisites: None. Lecture 3 hours. J. Sweet
Course provides the conceptual framework for understanding complementary approaches to health and healing, as well as holistic nursing practice. COMM HLTH SYST

236B. Exploring Indigenous Healing. (2) § W. Prerequisites: None. Restrictions: None. Lecture 2 hours. J. Sweet
A survey course covering indigenous healing principles and practices, designed to enhance nursing practice in a variety of settings by increasing cultural sensitivity and awareness and offering exposure to indigenous healing practices. COMM HLTH SYST
236D. Complementary Healing in Nursing. (3) § W. Prerequisites: N236A, N236B. Restrictions: Enrollment is (1) contingent on taking the prerequisites N236A, B and (2) limited to preserve a 1:2 faculty-student ratio to provide the necessary, intensive hands-on learning environment. Lecture 2 hours. Workshop/field work 30 hours. J. Sweet Course provides an in-depth exploration of complementary modalities within the scope of nursing practice and offers intensive workshop experiences in energy healing, imagery and herbalism. Current practice standards and state-of-the-science issues are addressed. COMM HLTH SYST

238A. Infant & Child Development. (3) § F. Prerequisites: None. Lecture 3 hours. C. Kennedy
Course is designed to provide the student with a scientific basis for understanding the normal pattern of development in the infant and child (birth to 12 years of age). Building on knowledge of normative development, common behavioral issues and mental health concerns that are encountered by advanced practice nurses in primary care and specialty settings will be reviewed. FAM HLTH

238B. Adolescent Development. (2) § Sp. Lecture 2 hours. S. Kools
Course explores relevant theory, literature and research findings dealing with normal development during the adolescent period. FAM HLTH

239A. Nutrition in Acute Care Patients. (2) § F, W, Sp, Su.
Prerequisites: None. Independent module/guided study. R. Garbez
Course focuses on examination of nutritional issues in acute care nursing practice. Guided study addresses biochemical bases of nutrition during maintenance, starvation and hypermetabolism. The nutritional needs of selected patient populations and major therapeutic nutritional modalities are addressed. PHYSIOL NURSG

239.04. Nutritional Issues in Pediatric Nursing. (1) § W. Prerequisites: None. Independent module/guided study. A. Carley
Course is designed to explore selected topics related to pediatric nutrition. Guided study and discussion will focus on clinical assessment, diagnosis and management of common nutritional problems in children. FAM HLTH

239.07. Neonatal & Infant Nutrition. (2) § W. Prerequisites: None. Lecture 2 hours. A. Carley
Course focuses on exploration of selected nutritional issues that impact on growth and development for healthy and sick neonates and infants. Analysis of the scientific literature and clinical outcomes related to nutritional interventions will be addressed. FAM HLTH

240.01. Biomarkers I. (2) § F. Prerequisites: Doctoral enrollment or by permission of instructor. Seminar 2 hours. M. Dodd
Course addresses models of biobehavioral markers in health and disease with a focus on stress-coping and immune function. Students examine the process of selecting appropriate markers and using them to assess the effect of interventions on underlying processes and mechanisms. PHYSIOL NURSG

240.02. Biomarkers II. (2) § W. Prerequisites: Doctoral enrollment or by permission of instructor. Seminar 2 hours. B. Aouizerat
Course addresses models of biobehavioral markers in health and disease with a focus on gene expression. Students examine the process of selecting appropriate markers and using them to assess the effect of interventions on underlying processes and mechanisms. PHYSIOL NURSG

240.03. Research in Grief & Bereavement. (2) § Sp. Prerequisites: None. Seminar 2 hours. B. Davies, A. Hughes
Course discusses issues relevant to the experience of grief and the study of bereavement across the life span. Theories pertinent to the study of grief and bereavement and research are critiqued for their contribution to the development of bereavement interventions and the creation of knowledge in this field. FAM HLTH

240.04. Violence & Health. (2) § F. Prerequisites: None. Seminar 2 hours. J. Humphreys, A. Alkon
Seminar focuses on family violence and its impact on health, family and community. FAM HLTH

240.05. Vulnerable Women & Their Well-Being. (3) § W. Prerequisites: None. Seminar 3 hours. T. Juarbe, C. Portillo
Course addresses the way gender interacts with multiple personal and environmental factors to affect women's health. Seminar participants critically analyze the impact of women's activities on their health and well-being, including global strategies for improving the health of women, their families and communities. FAM HLTH

240.06. Seminar on HIV/AIDS Prevention & Care. (1) § F, W, Sp. Prerequisites: None. Seminar 1 hour. W. Holzemer, C. Portillo
Course focuses upon relevant research, theories, measurement and strategies for investigating HIV/AIDS prevention and care. COMM HLTH SYST

240.08. Advanced Child Developmental Science. (2) § F, W, Sp. Prerequisites: None. Seminar 2 hours. S. Weiss, S. Kools, C. Kennedy
Course will address advanced knowledge in developmental theory and methods as the context for research with infants, children and adolescents. Developmental science serves as the paradigm for examining research on physical and mental health during childhood. INTERDEPART

240.09. Health Policy I. (2) § F. Prerequisites: Doctoral enrollment or by permission of instructor. Seminar 2 hours. C. Harrington
Course addresses models of health policy research with a focus on integrating health services research theory and methods. The students will examine different research models that address a range of health policy research questions and assess the policy outcomes. SOC BEH SCI

240.10. Health Policy II. (2) § Sp. Prerequisites: Doctoral enrollment or by permission of instructor. Seminar 2 hours. C. Harrington
Course addresses new health service research designs that address high-priority national policy issues. The students will examine different research models that address key health policy research questions and assess the policy outcomes. SOC BEH SCI

240.11. Occupational & Environmental Health Research Seminar. (1-5) § F, W, Sp. Prerequisites: Consent of instructor. Seminar 1 hour. Field work 0-12 hours. J. Faucett, M. Gillen
Seminar focuses on design and practical implementation of research
on factors at work and in the environment that affect community health. Theoretical, ethical, policy and procedural issues related to occupational and environmental health research will be discussed. Students and faculty will bring examples from their research for discussion and problem solving. COMM HLTH SYST

240.12. Family Health & Relational Research. (2) § W. Prerequisites: N290 or consent of instructor. Lecture 1 hour. Seminar 1 hour. C. Chesla Course provides an overview of research issues in family and dyadic research. It focuses on family and relational research methods, providing participants with appropriate approaches to their own research projects. Upon completion of the course, students will be able to demonstrate knowledge of the state of family science in nursing and related disciplines. FAM HLTH

240.13. Research Methods: Psychological Factors. (2) § Sp. Prerequisites: Consent of instructors, limited to doctoral students. Seminar 2 hours. L. Chafetz, S. Weiss Course focuses on research methods appropriate for the study of cognitive, emotional and behavioral variables that reflect an individual's psychosocial functioning. Emphasizes conceptual and methodological issues that need consideration when psychological factors are examined as predictors, outcomes and/or interventions. COMM HLTH SYST

240.14. Health Promotion & Chronic Disease Prevention. (2) § Sp. Prerequisites: Student should be planning or engaged in research related to health promotion/disease prevention or treatment of chronic illness. Instructor approval is required to attend seminar. Seminar 2 hours. R. Oka Seminar will focus on issues related to the conduct of clinical trials in health promotion, disease prevention and management of chronic illnesses across the life span. Students will select specific areas related to their future research programs. Content will include interventions for behavior change, multiple risk factor reduction and lifestyle modification in individuals at risk for or with chronic illnesses. COMM HLTH SYST

240.15. Gerontological Nursing Research. (2) § F. Prerequisites: None. Restrictions: Doctoral student or master's student with prior approval of faculty. Seminar 2 hours. J. Kayser-Jones Advanced nursing seminar involves a critical investigation of gerontological nursing research with an emphasis on theoretical and methodological perspectives. PHYSIOL NURSG

240.16. Research Issues in Aging: Interdisciplinary Perspectives. (2) § W. Prerequisites: None. Restrictions: Doctoral student or master's student with prior approval of faculty. Seminar 2 hours. J. Kayser-Jones Seminar is a critical examination of research in aging, focusing on collaborative, interdisciplinary research (i.e., nursing, medicine, geropsychiatry, and the social and behavioral sciences). Emphasis will be on the interdisciplinary research process and methodological and theoretical frameworks. PHYSIOL NURSG

240.17. Cardiovascular Disease Epidemiology. (1-3) § W. Prerequisites: Suitable for doctoral students in all four schools, post-doctoral students, research fellows and visiting scientists. Lecture 1 hour. Seminar 1-2 hours. E. Froelicher
Course provides selected state-of-the-art topics in cardiovascular disease, highlighting the epidemiological challenges and opportunities for additional progress in this field. PHYSIOL NURSG

240.18. Workforce & Health Systems. (2) § W. Prerequisites: None. Restrictions: Doctoral students. Seminar 2 hours. J. Seago Course critically analyzes the research process, including issues related to theory, concepts, conceptual framework, research design, data collection and analyses, scholarly dialogue and critique, and publication. Content emphasis is on health care organizations, nurse workforce, patient outcomes and analyses using large existing databases. COMM HLTH SYST

241. Dimensions of Advanced Practice Nursing. (2) § F. Prerequisites: None. Lecture 2 hours. M. Wallhagen Course provides students the opportunity to define the social, political, legal, legislative, regulatory and organizational factors that influence advanced nursing practice. PHYSIOL NURSG

241.01. Issues in Nurse Midwifery Practice. (3) § Su. Prerequisites: Enrollment in the midwifery program at UCSF School of Nursing. Seminar 3 hours. L. Ennis Seminar focuses on a critical analysis of current issues in midwifery, including the context of practice, health policy and patient education. FAM HLTH

241.04. Professional Issues in Pediatric Nursing. (1) § Sp. Prerequisites: Enrollment in the APPN program and completion of N241 or consent of instructor. Restrictions: Concurrent enrollment in N404.02. Lecture 1 hour. J. Chen Seminar is designed to enable students in the advanced practice pediatric nursing specialty to explore issues related to professional role development as an advanced practice nurse and to facilitate transition to clinical practice across pediatric clinical settings. The course will complement N241 with content and discussions on pediatric advanced practice and role delineation. FAM HLTH

241.06. Professional Issues in Midwifery Practice. (1) § W. Prerequisites: Enrollment in nurse-midwifery specialty. Lecture 1 hour. H. Kennedy Course expands content of N241 to issues important to professional practice for nurse-midwives. Includes content such as methods of ensuring quality midwifery practice, the legal basis of midwifery practice and the history of midwifery practice. FAM HLTH

242A. HIV/AIDS: An Overview. (2) § F. Prerequisites: None. Lecture 1 hour. Seminar 1 hour. C. Dawson-Rose Course will provide an overview of the AIDS epidemic with a focus on related epidemiological concepts, public health policies, health care disparities and psychosocial issues. COMM HLTH SYST

242B. HIV/AIDS: Clinical Pharmacology. (1) § W. Prerequisites: None. Lecture 1 hour. S. Stringari-Murray Course will introduce the clinical application of pharmacology in the management of HIV-infected adults and adolescents based on the current US CHHS Treatment Guidelines for Antiretroviral Therapies and the Prevention of Opportunistic Infections. COMM HLTH SYST

242C. HIV/AIDS: Population-Based Chronic Illness Care. (1) § Sp. Prerequisites: None. Lecture 1 hour. C. Portillo
Course will introduce students to population-based chronic illness models of care and the applications to the health care delivery systems. COMM HLTH SYST

Course will present evidence-based care for persons with HIV/AIDS. HIV/AIDS pathophysiology, clinical manifestations of HIV in the post-HAART era, the assessment and management of common signs and symptoms and comorbid conditions will be discussed from a model of chronic illness care perspective. COMM HLTH SYST

Course provides the student with the opportunity to enhance clinical decisionmaking abilities through case study analysis with an interdisciplinary team of HIV/AIDS experts who are providing care for persons with HIV/AIDS. COMM HLTH SYST

Course, which is a continuation of N242.01, provides the student with the opportunity to enhance clinical decisionmaking abilities through case study analysis with an interdisciplinary team of HIV/AIDS experts who regularly care for persons with HIV/AIDS. COMM HLTH SYST

243.01. Family Therapies. (3) § W. Lecture 3 hours. K. Shook
Course will examine theories of family therapies and their application to the practice of psychiatric nursing. Particular areas of emphasis are work with families of the seriously mentally ill and families experiencing trauma. Family assessments and supportive, educational and therapeutic interventions will be described and evaluated. COMM HLTH SYST

243.02. Group Psychotherapies. (2) § F, W. Prerequisites: Psychiatric/mental health students or consent of instructor. Seminar 2 hours. K. Shook, B. Phoenix
Students will examine and discuss theories and practice of various group modalities in current use. COMM HLTH SYST

243.03. Adult Psychotherapeutic Treatment Modalities. (2) § Sp. Prerequisites: N257 or equivalent content. Lecture 2 hours. L. Chafetz
Course focuses on principles of supportive psychotherapies with adults experiencing a range of psychiatric problems. It also reviews models of crisis intervention, behavioral, cognitive behavioral and motivational interventions. It is designed to use clinical case materials as the basis for discussion of assessment, goal setting and intervention. COMM HLTH SYST

244A. Theories of Human Response to Trauma. (2) § W. Prerequisites: None. Lecture 2 hours. L. Chafetz
Course examines theories from the social, behavioral and neurosciences that explicate human responses to different types of trauma. Course utilizes developmental theories to understand effects of traumatic events on persons across the life span. COMM HLTH SYST

244B. Assessment & Intervention with Survivors of Abuse & Violence. (2) § Sp. Prerequisites: N244A. Restrictions: Students in psychiatric/mental health nursing specialty or permission of instructor. Lecture 2 hours. C. Kane-Hyman
Course focuses on psychosocial assessment and treatment approaches for individuals and families with past or current experience of physical, sexual, or emotional violence or abuse. COMM HLTH SYST

244C. Mental Health Care for Populations Experiencing Disasters. (2) § F. Prerequisites: None. Lecture 2 hours. S. Garrity
Course focuses on assessment and treatment of individuals and groups experiencing disasters resulting from natural or human events. Emphasis is given to approaches that address both short- and long-term sequelae of terrorism or disasters. COMM HLTH SYST

245. Health Protection & Promotion. (2) § W. Prerequisites: None. Lecture 2 hours. R. Oka
Course emphasizes principles of individual health protection and promotion across the life span in advanced nursing practice. The examination of models of disease prevention and health promotion for individual wellness in the context of the family, community and culture is emphasized. COMM HLTH SYST

245.01. Seminar in Adult Primary Care: Health Promotion. (1-2) § W. Prerequisites: N270, presently enrolled in N245, or consent of instructor. Restrictions: Limited to those students in the ANP, APNP and ACHIN (HIV focus) programs. ANP generalists, HIV, ICH and ACHIN students will take this course for two units; all others will take course for one unit. Seminar 1 hour. One 10-hour seminar. C. Kelber
Seminar is taken concurrently with N245 and provides the specialty content necessary for the above students. Application from Health Protection & Promotion lectures will be made to the specialty areas, using case presentations and other relevant learning strategies. The addition of self-care content constitutes new course material. COMM HLTH SYST

245.02. Seminar in Family Primary Care. (2) § W. Prerequisites: Concurrent enrollment in N245. Seminar 2 hours. B. Hollinger, T. Ooms
Seminar is taken concurrently with N245 to analyze and incorporate interventions in health protection and promotion particular to families. Application from N245 will be made using case presentations and other relevant learning strategies. FAM HLTH

245.03. Seminar in Gerontological Primary Care. (1) § W. Prerequisites: Concurrent enrollment in N245. Seminar 1 hour. L. Macera
Seminar is taken concurrently with N245 and provides specialty content necessary for gerontological primary care nurse practitioners. Application from N245 lectures will be made to the specialty area, using case presentations and other relevant learning strategies. PHYSIOL NURSG

245.04. Pediatric Health Promotion and Protection. (2) § F. Prerequisites: N270, N245, or concurrent enrollment in N245, or consent of instructor. Lecture 2 hours. M. Savitz
Course provides exploration of theories, concepts and knowledge for comprehensive child health supervision, encompassing prevention and health promotion. Emphasis placed upon parents as participants in assessment, decisionmaking and management of common health problems and normal developmental stresses in infancy, childhood and adolescence. FAM HLTH

245.05. Health Promotion in Acute Care. (1) § W. Sp. Prerequisites: Concurrent enrollment in N245 or acute care nurse practitioner student or consent of instructor. Lecture 1 hour. M. Hawk

Course provides specialty content necessary for ACNPs to institute health promotion and maintenance activities in the care of stable hospitalized patients, using clinical decisionmaking models. PHYSIOL NURSG

245.07. Infant Neuromotor/Behavior Development. (2) § W. Prerequisites: None. Restrictions: Course must be taken in conjunction with N245 and N406. Lecture 2 hours. M. Lynch

Course provides an exploration of scientific literature for health promotion strategies on growth and development for the healthy and sick neonate and infant. Special emphasis reflects neuromotor and neurobehavioral development of the infant with acute or chronic illness conditions. FAM HLTH

246. Symptom Assessment & Management. (3) § Sp. Prerequisites: N270, N245. Lecture 3 hours. E. Scarr

Course introduces students to signs and symptoms of illness across the life span commonly encountered in ambulatory care. Symptoms and signs will be analyzed using a clinical decisionmaking model. FAM HLTH

246.01. Seminar in Adult Primary Care. (1) § Sp. Prerequisites: Completion of N270 and accompanying skills lab, N245 and related practicum. Seminar 1 hour. F. Dreier

Seminar is taken concurrently with N246 and provides the specialty content necessary for adult primary care nurse practitioners in the areas of adult, adult psychiatric and occupational health. Application from N246 lectures will be made to the specialty area, using case presentations and other relevant learning strategies. COMM HLTH SYST

246.02. Seminar in Family Primary Care. (2) § Sp. Prerequisites: Concurrent enrollment in N246. Seminar 2 hours. B. Hollinger, T. Ooms

Seminar is taken concurrently with N246 and provides specialty content necessary for family primary care nurse practitioners. Application from N246 lectures will be made using case presentations and other relevant learning strategies. FAM HLTH

246.03. Seminar in Gerontological Primary Care. (1) § Sp. Seminar 1 hour. L. Macklin

Seminar is taken concurrently with N246 and provides the specialty content necessary for gerontological primary care nurse practitioners. Application from N246 lectures will be made to the specialty area, using case presentations and other relevant learning strategies. PHYSIOL NURSG

246.06. Nurse-Midwifery Primary Care. (1) § Sp. Prerequisites: Enrollment in nurse-midwifery specialty and concurrent enrollment in N246. Seminar 1 hour. M. Mays
Seminar provides specialty content necessary for primary care nurse-midwives. Application from N246 lectures will be made using case presentations and other relevant learning strategies.

**247. Complex Health Problems and Management.** (3) § F. Prerequisites: N270, N245, N246 and enrollment in Family Nurse Practitioner, Adult Nurse Practitioner or Gerontological Nurse Practitioner program, or consent of instructor. Lecture 3 hours. L. Capaldini

Course introduces the more complex health problems encountered in primary care. Client’s clinical presentation, underlying causes and appropriate treatment are discussed. Separate specialty track seminars permit elaboration of problems as they occur in the specialty. COMM HLTH SYST

**247.01. Seminar in Adult Primary Care: Complex Health Problems.** (2) § Sp. Prerequisites: N270, N245, N245.01, N246, N246.01, N247. Seminar 2 hours. P. Dennehy

Seminar provides the opportunity to enhance clinical problem-solving abilities through case study analysis and provides the specialty content necessary for adult primary care nurse practitioners. COMM HLTH SYST

**247.02A. Seminar in Family Primary Care.** (3) § F. Prerequisites: Completion of N246 and concurrent enrollment in N247. Seminar 3 hours. Project 1 hour. E. Scarr, E. Monasterio

Seminar is taken concurrently with N247 and provides the specialty content necessary for family nurse practitioners. Application from N247 lectures will be made to the specialty area, using case presentations and relevant learning strategies.

**247.02B. Seminar: Advanced Family Primary Care.** (2) § W. Prerequisites: N270, N245, N245.02, N246, N246.02, N247, N247.02A, N279, N271.02 or consent of instructor. Seminar 2 hours. M. Scott, E. Monasterio

Advanced specialty seminar to extend knowledge of the varied scope of problems in family primary care. Advanced skill training in case presentation and management that represents integration of prior theoretical and clinical coursework.

**248. Group Independent Study.** (1-6) § F, W, Sp. Prerequisites: Consent of instructor. Lecture 1-6 hours. Staff

Students collaborate in clinical investigations and other studies of special problems in nursing and health sciences under the direction of faculty. Students may select areas related to their long-term interests and future research or clinical program. INTERDEPART

**249. Independent Study.** (1-5) § F, W, Sp. Prerequisites: Consent of instructor. Lecture 1-5 hours. Staff

Student undertakes an individual study with emphasis on special problems in nursing. Students may select an area of study which is related to his/her area of interest or future goals. INTERDEPART

**250. Research.** (1-8) § F, W, Sp. Prerequisites: Admission to doctoral study and consent of instructor. Staff

Course offers students an opportunity to engage in research with selected faculty. INTERDEPART

**252A. Mental Health & High-Risk Families.** (2) § F. Prerequisites: Consent of instructor. Lecture 2 hours. C. Harris-Muchell

Course analyzes the effects of impoverished environments, sociocul-
tural factors and mental health problems in the family on the mental health of children and other family members. COMM HLTH SYST

252B. Psychotherapeutic Techniques with Children & Youth. (2) § Sp. Prerequisites: N257 and N227 or consent of instructor. Lecture 2 hours. S. Weiss

Course provides an introduction to the psychotherapeutic treatment of cognitive, emotional and behavioral problems experienced by children and adolescents. Content builds upon client-centered, cognitive-behavioral and psychodynamic therapies. COMM HLTH SYST

252C. Mental Health Case Management for Children & Adolescents. (2) § F. Prerequisites: N252A, B. Lecture 2 hours. C. Harris-Muchell

Course examines the responsibilities and skills required of an effective case manager in the context of community-based mental health care for children and adolescents. COM HLTH SYST

253. Theories of the Policy Process. (3) § F. Prerequisites: None. Seminar 3 hours. R. Malone

Course focuses on learning and using theories of the policy process, including analyzing how health policy problems are constructed. Perspectives on agenda setting, media roles, advocacy, policy innovations, diffusion and implementation will be integrated with examples of policy problems. SOC BEH SCI

254.01. Neonatal and Infant Pathophysiology. (3) § Sp. Prerequisites: None. Lecture 3 hours. A. Carley

Course supports a comprehensive exploration of pathophysiologic phenomena in the cardiac, respiratory, gastrointestinal and neurologic systems in the fetus, neonate and infant. Clinical presentation, associated symptomatology and therapeutic management strategies will be discussed. FAM HLTH

254.02. Neonatal and Infant Pathophysiology. (3) § F. Prerequisites: None. Lecture 3 hours. M. Lynch

Course supports a comprehensive exploration of pathophysiologic phenomena in the hematologic, immunologic, renal, endocrine and cellular/dermatologic systems in the fetus, neonate and infant. Clinical presentation, associated symptomatology and therapeutic management strategies will be discussed. FAM HLTH

255A. Dx/Rx of Acutely Ill/Injured I. (3) § F. Prerequisites: Acute care nurse practitioner student or consent of instructor. Lecture 2 hours. Seminar 1 hour. J. Howie Esquivel

Course focuses on diagnosis and treatment of acute illness and injuries affecting body systems such as the cardiac, pulmonary and central nervous systems. Seminar provides critical analysis of selected studies utilized to monitor and manage acutely ill/injured patients. PHYSIOL NURSG

255B. Diagnosis and Treatment of Acutely Ill/Injured II. (3) § W. Prerequisites: Acute care nurse practitioner student or consent of instructor, N255A. Restrictions: None. Lecture 3 hours. J. Howie Esquivel, R. O'Malley

Lecture focuses on diagnosis and treatment of acute illness and injuries affecting body systems such as the cardiac, pulmonary and central nervous systems. PHYSIOL NURSG

111
255C. Diagnostic & Therapeutic Lecture. (2) § W. Prerequisites: Acute care nurse practitioner or critical care/trauma student. Lecture 2 hours. R. Garbez
Course provides the content necessary to order and interpret selected diagnostic and therapeutic regimens necessary to make clinical inferences of diagnoses. PHYSIOL NURSG

257. Assessment/Management of Common Psychiatric Symptoms. (2) § F. Prerequisites: None. Lecture 2 hours. L. Chafetz
Course analyzes common signs and symptoms of psychiatric illness from a biopsychosocial perspective. The diagnostic process will be highlighted and symptom management will be discussed. COMM HLTH SYST

259.01. Women's Reproductive Health. (1-2) § F. Lecture 2 hours. P. Bernal de Pheils
Course provides exploration of theories, concepts and knowledge necessary to maintain and promote women's health. Emphasis is on application of current research regarding clinical decisionmaking and management of common gynecological conditions, normal pregnancy and postpartum in collaboration with health team members. FAM HLTH

259.02. Women's Health: Special Problems. (2) § W, Sp. Prerequisites: None. Lecture 2 hours. P. Bernal de Pheils
Theory and management of biopsychosocial and cultural components of women's health and illness conditions across the life span. Emphasis is placed on critical analysis of research and clinical management strategies applied to complex women's health and illness conditions. FAM HLTH

259.03. Advanced Women's Health Seminar. (2) § Sp. Prerequisites: Consent of instructor. Seminar 2 hours. T. Juarbe
Course focuses on the assessment and management of complex women's health problems. These conditions are explored in the context of women and their families across the life span and include sociocultural, professional and ethical issues. FAM HLTH

259.04. Contraception in Primary Care. (1) § F, W, Sp. Prerequisites: None. Self-paced module. T. Ooms
Course explores the complex and comprehensive contraception issues within the context of the family and community environment. This self-paced module prepares the learner to counsel individuals and their partners in contraceptive decisionmaking. FAM HLTH

260B. Culture and Child/Family Health. (2) § F. Lecture 2 hours. L. Martinson
Course will focus on sociocultural factors such as race, ethnicity, gender and class that impact children's health and family well-being. Implications for advanced practice nursing and health policy for children and families will be considered. FAM HLTH

260C. Global Health Issues. (3) § Sp. Lecture 3 hours. J. Lipson
Course examines selected world health issues in a framework of community-oriented primary health care. Focus is on global issues such as development, environment, nutrition, population, international organizations and nursing roles in international health. COMM HLTH SYST

260D. Latino Health and Culture. (2) § Su, F. Prerequisites: Consent of instructor. Restrictions: Enrollment to be determined by availability of
practicum experience. Seminar 2 hours. P. Bernal de Pheils
Seminar analyzes issues regarding the Latino culture, its interrelation-
ship to health, illness and immigrant status in preparation for experienc-
ing nursing care in a Latin American country, and gaining understanding
of the culture, health care issues and health care delivery. FAM HLTH

260F. Cultural Competency. (2) § Sp, W. Prerequisites: None.
Workshop. C. Bain
Course is designed to provide a variety of experiences using various
strategies to enhance the student's understanding about the impact
of culture upon clients' perception of health and the delivery of care.
The course has been designed as an experiential and interactive
workshop, through class discussions, group microteaching exercises
and role playing. Preparatory work will be based on the syllabus of
required readings. COMM HLTH SYST

260G. Disparities in Women's Health Care. (2) § Sp. Prerequisites:
Consent of instructor. Seminar 2 hours. H. Kennedy
Course will use sociocultural and feminist constructs to examine
issues of disparity in the health care of women and their families. The
impact of these disparities will be examined from the multidimensional
concepts of gender, power and the environment as they influence the
chance to achieve optimal health. FAM HLTH

260H. Global Health & International Nursing. (2) § W. Prerequisites:
None. Restrictions: Enrollment in Advanced Community Health &
International Nursing (ACHIN) program or consent of instructor.
Lecture 2 hours. W. Holzemer, C. Portillo
Course will examine global health from a nursing perspective, explor-
ing global workforce issues, definitions of nursing, nursing educational
models, roles of nursing in national policy development, and international
organizations that link nursing to global health, such as the World Health
Organization, Pan American Health Organization, International Council of
Nurses and the International Council of Nurse Midwives. COMM HLTH SYST

260I. Culture, Spirituality & Health. (2) § Sp. Prerequisites: None.
Restrictions: Maximum 20 students in class. Lecture 2 hours. J. Sweet
Course will cover multicultural healing principles and practices and
the role of spirituality in health and healing. Participants will have
the opportunity to enhance their delivery of culturally sensitive care
through guided self-assessments, role playing, group discussion and
case studies. COMM HLTH SYST

261. Mental Health Nursing and the Law. (2) § W, Sp. Prerequisites:
Enrollment in MS program in psychiatric nursing or consent of instruc-
tor. Lecture 2 hours. G. Gresham
Course reviews history and development of mental health legislation
and decisional law in the United States and California. Explores current
mental health laws as they relate to and influence the practice of psy-
chiatric nursing in the public and private sectors. COMM HLTH SYST

262A. Research Methods. (2) § W. Prerequisites: None. Lecture 2
hours. A. Alkon
Course provides advanced research methods to understand research
questions/hypotheses, sampling, study designs and results. Utilization
of research findings and interpreting findings to guide clinical practice are emphasized. INTERDEPART

262.01. Research Utilization. (2) § Sp. Prerequisites: N262A. Lecture 2 hours. E. Froelicher
Course prepares students to critically evaluate published research, and to utilize research findings to guide practice, select interventions, evaluate outcomes and identify problems to be addressed by future research. PHYSIOL NURSG

262.02. Family Research Utilization. (2) § F. Prerequisites: N262A. Seminar 2 hours. R. Rehm
Course focuses on the development of critical thinking skills related to utilization and evaluation of research findings in the area of family health. The scientific and practical merit of published research reports is evaluated for potential utilization in clinical practice. FAM HLTH

262.03. Pediatric/Family Research Utilization. (2) § F. Prerequisites: N262A. Seminar 2 hours. J. Chen
Course provides advanced practice nurses with skills to utilize research related to pediatric/family health care. Research critique skills will focus on interpreting study methods, findings, conclusions and clinical implications in relevant research articles. FAM HLTH

262.04. Perinatal Research Utilization. (2) § F. Prerequisites: N262A. Seminar 2 hours. H. Kennedy
Course focuses on development of critique skills for advanced practice nurses to use in evaluation and utilization of research findings in perinatal nursing practice. Study designs, measures, findings and clinical implications of current relevant research will be explored. FAM HLTH

262.05. Primary and Complementary Care Research Utilization. (2) § Sp. Prerequisites: Successful completion of N236A and N262A. Lecture 2 hours. S. Janson
Course develops skills in research utilization and the critical review of current published research on complementary approaches to health and nursing. COMM HLTH SYST

262.06. Research Utilization in Health Policy. (2) § F, Sp. Prerequisites: N262A. Seminar 2 hours. R. Newcomer, C. Harrington
Course focuses on the development of critical thinking skills related to utilization and evaluation of research findings in the area of health policy. The course uses scientific and practical approaches to research and policy analysis. SOC BEH SCI

265. Cancer Prevention/Early Detection. (2) § F. Prerequisites: None. Seminar 2 hours. T. Koetters
Course provides in-depth examination of the cultural and economic issues surrounding cancer prevention and early detection, including: equity of access to services, the criteria for evaluating community programs, populations at risk and behavioral models to guide outreach. PHYSIOL NURSG

267.01. Ethical Issues in Nursing Practice. (3) § W. Prerequisites: None. Seminar 3 hours. P. Benner
Course explores selected ethical theories including social ethics related to health care and nursing practice. Both institutional and broader
health care policies related to ethical issues will be explored in light of virtue and social justice ethics. PHYSIOL NURSG

267.04. Neonatal/Pediatric Ethical Issues. (2) § W. Prerequisites: None. Lecture 2 hours. K. Duderstadt
Course uses ethical theories and principles to explore conflict resolution in chronic, acute and primary health care for infants, children and adolescents. FAM HLTH

269. Human Health & Nursing Systems. (4) § F. Prerequisites: None. Seminar 4 hours. B. Drew, C. Kennedy
Course analyzes theoretical foundations and research issues underlying specific content areas in nursing science. Research in each specific content area is analyzed from the perspectives of the dimensions of nursing knowledge – health, illness, environment, therapeutics – and various units of analysis. FAM HLTH

270. Advanced Health Assessment. (2) § F, W. Lecture 2 hours. M. Scott
Course introduces assessment concepts and skills to determine the health status of clients across the life span. Focuses on the collection and interpretation of clinical data derived from the history and physical exam. PHYSIOL NURSG

270.04. Pediatric Physical Assessment. (2) § F. Prerequisites: None. Lecture 2 hours. K. Duderstadt
Course is designed to enhance and complement life span content from N270. Course focuses on pediatric specialty content. FAM HLTH

270.07. Neonatal/Infant Assessment. (2) § F. Prerequisites: Course content must be taken in conjunction with N406. Lecture 2 hours. A. Carley
Course addresses concepts in advanced assessment utilized to determine the health status of neonates and infants. Discussion focuses on the collection and interpretation of clinical data derived from the history and physical exam and diagnostic interventions. FAM HLTH

271.01. Decisionmaking in Adult Primary Care. (3) § Sp. Prerequisites: N246, N247, N247.01 or consent of instructor. Lecture 3 hours. C. Kelber
Case studies of complex chronic illnesses are analyzed to delineate critical decisionmaking variables, which include the relevant pathophysiology, epidemiologic principles and psychological/sociological variables that impact symptom disease expression, clinical management and methods of coping. COMM HLTH SYST

271.02. Special Problems in Family Primary Care. (2) § W.
Prerequisites: N245, N246, N247, N270, N279 or consent of instructor. Seminar 2 hours. C. Chesla
Course explores complex health/illness problems as they occur in families. Complex assessment and management of patients and their families, across the life span, are discussed. FAM HLTH

271.04. School Health & Nursing. (3) § W. Prerequisites: School health focus or consent of instructor. Seminar 3 hours. N. Schapiro
Course explores contemporary school health issues, the interdisciplinary approach to the provision of school health services, including special education, the role of the advanced practice nurse in the school setting, comprehensive school health program and school health education. FAM HLTH
271.06. Management of Clinical Occupational Health Problems. (2) §
W. Prerequisites: Consent of instructor. Lecture 2 hours. B. Burgel
Multidisciplinary course exploring the evaluation and clinical management
of acute and chronic occupational and environmental health problems.
Clinical diagnostic strategies and epidemiologic methods are used in
evaluation of occupational health problems, including health hazards
evaluations, surveillance and disability evaluation. COMM HLTH SYST

272. Children with Special Health Needs. (2) § W. Prerequisites:
N283A, B, C or consent of instructor. Lecture 2 hours. R. Rehm
Course provides the unique health care demands of vulnerable chil-
dren with need for prolonged health support. The impact of the care-
giving environment, community and care providers will be addressed
in relation to the well-being of the child and family. FAM HLTH

273A. Current Concepts in Occupational Health Nursing. (2) § F.
Prerequisites: Consent of instructor. Lecture 2 hours. B. Burgel
Course analyzes the role of the occupational health nurse in managing
an occupational health service within a changing regulatory and fiscal
environment. Emphasis is on planning, development and evaluation of
occupational health programs. COMM HLTH SYST

273B. Issues in Occupational Health. (1) § W. Prerequisites: Consent
of instructor. Seminar 1 hour. M. Gillen
Course focuses on the process and outcomes of developing federal
and state policies and regulations for occupational health and safety.
COMM HLTH SYST

274A. Health Hazards in the Workplace. (4) § Sp. Prerequisites: M180
and/or N273A or consent of instructor. Lecture 3 hours. Field work 3
hours. P. Quinlan, M. Gillen
A prevention-focused course emphasizing the identification of chemi-
cal, biologic, physical, ergonomic, psychological and safety hazards of
work; identification of environmental monitoring methods, selection of
health surveillance and safety measures; and discussion of methods
to control exposures and injuries. COMM HLTH SYST

274B. Factors in Injury Control. (2) § F. Prerequisites: Enrollment in occupa-
tional health program or permission of instructor. Seminar 2 hours. M. Gillen
Course describes and discusses political, sociocultural, organizational,
interpersonal and individual factors affecting injuries, injury control
and work reentry. Students will learn how the principles of risk com-
munication and adult learning may be applied in occupational health
programs. COMM HLTH SYST

274C. Occupational Safety. (2) § F. Prerequisites: Consent of instruc-
tor. Lecture 2 hours. B. Plog
Course emphasizes identification of safety hazards of work; com-
ponents of an injury/illness prevention program; principles of hazard
control and accident investigation; essentials of safety inspections and
audits; application of safety inspection methods and ergonomic job
analysis. COMM HLTH SYST

274D. Farmworker Primary Health Care. (2) § Sp. Prerequisites:
N270. Lecture 2 hours. B. Hollinger
Course is an introduction to the diverse western farmworker popula-
tion and includes common health problems and the influence of socio-cultural factors and public policy on health systems. FAM HLTH

276. Research Rotation. (1-6) § F, W, Sp, Su. Prerequisites: Completion of first year of doctoral study and consent of adviser. Lab 3-18 hours. Staff
The student will participate in ongoing faculty research. This experience will contribute to the student's methodological or substantive expertise. INTERDEPART

279. Family Nursing Theory and Practice. (3) § W. Prerequisites: None. Lecture 3 hours. T. Juarbe
Course integrates empirical evidence of reciprocal family and health interactions with family theoretical and therapeutic concepts applicable to advanced nursing practice. FAM HLTH

280.02. Evidence-Based Practice: Critical Care. (2) § Sp. Prerequisites: Current enrollment in ACNP residency; ACNP student; or consent of instructor. Seminar 2 hours. V. Carriker-Kohlman
Seminar provides practice in clinical decisionmaking related to critical care area of emphasis. Evidence-based literature and clinical case studies used to evaluate diagnostics and clinical therapies. PHYSIOL NURSG

281A. Nurse-Midwifery Management I. (4) § F. Prerequisites: Enrollment in nurse-midwifery specialty. Lecture 4 hours. R. Kaplan
Course reviews and analyzes the etiology and management of selected conditions in normal pregnancy. The impact of pregnancy on the mother, baby and family will be emphasized. FAM HLTH

281B. Nurse-Midwifery Management II. (4) § W. Prerequisites: Enrollment in nurse-midwifery specialty and completion of N281A and N282A; Lecture 4 hours. D. Anderson
Course reviews and analyzes the etiology and management of selected conditions during the intrapartum and postpartum periods. The impact of these periods on the mother, baby and family will be emphasized. FAM HLTH

281C. Nurse-Midwifery Management III. (4) § Sp. Prerequisites: Enrollment in nurse-midwifery specialty and completion of N281A, B and N282A, B. Lecture 4 hours. S. Wiener
Course reviews and analyzes management of selected reproductive and gynecologic conditions from menarche through and beyond menopause. Methods of family planning are explored in depth. FAM HLTH

Course reviews and analyzes selected conditions during fetal development and the early newborn period. Focus is on midwifery management of the fetus and newborn during pregnancy, at birth and through early infancy period. FAM HLTH

282A. Nurse-Midwifery Complications I. (4) § F. Prerequisites: Enrollment in nurse-midwifery specialty. Lecture 4 hours. H. Cost
Course reviews and analyzes selected complications of pregnancy in the antepartum period. The impact of the complications on the mother, baby and family will be emphasized. FAM HLTH
282B. Nurse-Midwifery Complications II. (4) § W. Prerequisites: Enrollment in nurse-midwifery specialty and completion of N281A and N282A. Lecture 4 hours. C. Belew
Course reviews and analyzes selected complications of pregnancy in the intrapartum period. FAM HLTH

282C. Nurse-Midwifery Complications III. (2) § Su. Prerequisites: Enrollment in nurse-midwifery specialty and completion of N281A, B and N282A, B. Lecture 2 hours. C. Belew
Course reviews and analyzes complicated reproductive and gynecologic conditions requiring advanced management skills. FAM HLTH

Course reviews and analyzes selected complications of the fetal and neonatal periods. FAM HLTH

283A. Pediatric Physiologic Development. (3) § W. Prerequisites: None. Lecture 3 hours. M. Lynch
Course studies major organ system function as modified by developmental needs and system immaturity in the infant, child and adolescent. Implications for advanced practice pediatric nursing interventions will be addressed in relation to health promotion and illness prevention. FAM HLTH

283B. Common Pediatric Pathophysiology & Clinical Management. (2-3) § Sp. Prerequisites: None. Lecture 3 hours. M. Lynch
Course will provide a conceptual approach to examine common pediatric pathophysiologic phenomena observed in varied caregiving environments and across the illness continuum. The interrelationships of human responses, clinical manifestations and therapeutic interventions will be discussed. FAM HLTH

283C. Complex Pediatric Pathophysiology & Clinical Management. (3) § F. Prerequisites: N283A, B. Lecture 3 hours. M. Lynch
Course will provide a conceptual approach to examine complex acute and chronic pediatric pathophysiologic phenomena observed in varied caregiving environments in infants, children and adolescents. The interrelationships of human responses, clinical manifestations and therapeutic interventions will be discussed. FAM HLTH

283.04. Complex Pediatric Primary Care Seminar. (1) § F. Prerequisites: Successful completion of N404.02, concurrent enrollment in N404.02 and N283C or permission of instructor. Seminar 2 hours. N. Schapiro
Seminar provides students with the opportunity to apply content about complex illness to the primary care setting, and prepares students for entering specialty clinical rotations in winter quarter. Through formal case presentations, discussion and other assignments, students will refine their ability to formulate complex care plans, and start to develop other aspects of the advanced practice pediatric nursing role. FAM HLTH

Web-based course provides an overview of radiological terminology
and a basic understanding of the use of various diagnostic imaging methods in primary care across the life span. COMM HLTH SYST

285A. Qualitative Methods I. (5) §F. Prerequisites: Second-year doctoral student. Seminar 3 hours. Field work 6 hours. S. Kools
Course reviews many of the types of qualitative research methods, emphasizing assumptions, approaches. Focus on design, entree, ethics, data-gathering techniques – interviewing, observing – data recording and management. Introduction to data analysis. INTERDEPART

285B. Qualitative Methods II. (5) §W. Prerequisites: N285A and second-year doctoral student. Seminar 3 hours. Field work 6 hours. S. Kools, H. Pinderhughes
Course compares and contrasts modes of qualitative analysis. Examines issues in establishing plausibility, credibility, adequacy. Intensive data analysis and examination of the problems of presentation of findings with focus on questions of authority and preparation of text. INTERDEPART

285C. Interpretive Phenomenology. (2) §Sp. Prerequisites: Philosophy courses in phenomenology – may be acquired outside UCSF and also with the consent of the instructor – and N285A, B Qualitative Methods I and II. Seminar 2 hours. P. Benner
Course describes, explains and demonstrates interpretive phenomenological research. Students generate, present and critique interpretive commentaries of shared texts. Readings in interpretive methods and exemplary interpretive research are assigned weekly. INTERDEPART

287A. Health Systems Management. (4) §F. Prerequisites: None. Seminar 1 hour. Lecture 3 hours. J. Spicer
Course includes a comprehensive examination of organizational systems including theory and research, behavior of organizations, and behavior of individuals and groups within organizations, intra- and interorganizational restructure/redesign or work processes using change theory, and project design and management. COMM HLTH SYST

287B. Human Resource Issues in Health Care. (3) §F. Prerequisites: None. Lecture 3 hours. J. Hirsch
Course critically analyzes management and personnel theories relative to employer-employee relations in health organizations. Emphasis is on labor movement, labor legislation and regulation, contract negotiations, conflict resolution and grievance procedures, working relationships, human capital and development, and leadership. COMM HLTH SYST

287C. Strategic Marketing Management. (3) §Sp. Prerequisites: None. Lecture 3 hours. C. Waters
Course includes a comprehensive examination of strategic marketing theories and research. Emphasis is placed on organizational planning, creation of business plans and financial feasibility both inside and outside the organization, market research, development of joint ventures and multi-institutional projects. COMM HLTH SYST

287D. Financial Management for Nurse Administrators. (3) §W. Prerequisites: None. Lecture 3 hours. J. Seago
Course offers introduction to financial accounting principles as they relate to financial management in health care settings. Emphasis is on
the manager's role and responsibilities in budgeting, monitoring, controlling and in costing nursing care. COMM HLTH SYST

Course offers advanced financial management concepts including supply/demand models, working capital, financial structure, cost of capital, costing and valuation. Discussions include both financial theory and policy with an emphasis on comparisons of integrated, profit/not-for-profit and public/private health systems. COMM HLTH SYST

287G. Data Management & Analysis. (4) § W. Prerequisites: None. Lecture 3 hours. Lab 3 hours. R. Slaughter, B. Cooper

Course covers the basic concepts and methods of data management and data analysis, with practical experience in writing a plan for and carrying out a data analysis. COMM HLTH SYST

287H. Clinical Research Management II. (3) § Sp. Prerequisites: None. Lecture 3 hours. C. Portillo

The role of clinical research nurses in managing the conduct of research is analyzed. Emphasis is on roles and responsibilities involved in clinical research management through analysis and application of organizational, legal and ethical concepts. COMM HLTH SYST

288A. Management of Acutely Ill/Injured I. (3) § F. Prerequisites: Prior or concurrent enrollment in N208A and N208B or consent of instructor. Seminar 3 hours. K. Puntillo

Seminar provides a critical analysis of methods used to monitor and manage high-risk cardiopulmonary-renal-neural dysfunction and to promote patient comfort. Through use of case studies, students analyze clinical data from multiple sources, make management decisions and evaluate treatment outcomes. PHYSIOL NURSG

288B. Management of Acutely Ill/Injured II. (3) § W. Prerequisites: Prior or concurrent enrollment in N208A, N208B, prior enrollment in N288A and/or consent of instructor. Seminar 3 hours. G. Chan

Seminar provides critical analysis of methods used to monitor and manage life-threatening conditions such as sepsis/MODS, oncologic emergencies and need for resuscitation. Through use of case studies, students analyze clinical data from multiple sources, make management decisions and evaluate treatment outcomes. PHYSIOL NURSG

288C. Issues in Acute Care Advanced Practice. (2) § W. Prerequisites: Prior or concurrent enrollment in N208A, N208B or consent of instructor. Lecture 1 hour. Seminar 1 hour. K. Puntillo

Course provides critical analysis of issues and population-specific problems that confront advanced practice nurses in acute and critical care settings. Topics include family and aging issues, as well as cultural, ethical and socioeconomic factors that influence patient care. PHYSIOL NURSG

288D. Critical Care/Trauma Proseminar. (1) § F, W. Prerequisites: Enrollment in the critical care/trauma specialty. Seminar 1 hour. K. Puntillo

Course introduces advanced practice roles in critical care and trauma settings overviewing the economic, political, legal and professional influences on practice outcomes. PHYSIOL NURSG
288E. Advanced Practice in Trauma Nursing. (2) § W. Prerequisites: None. Lecture 2 hours. S. Barr, K. Puntillo
Course provides an interactive forum for review and discussion of evolving practices in emergency and trauma. Physical injuries, diagnostic modalities, management strategies, case vignettes and pertinent issues are discussed and their theoretical and practical interactions are explored. PHYSIOL NURSG

288F. Exacerbations of Chronic Illness. (3) § Sp. Prerequisites: Acute care nurse practitioner student or consent of instructor. Lecture 3 hours. R. Garbez
Course introduces complex medical disorders encountered in the inpatient setting. In didactic lectures and case-based discussion, the basic pathophysiology, clinical presentation and management of chronic medical problems and their acute exacerbations will be presented. PHYSIOL NURSG

289A. Advanced Quantitative Research Methods I. (4) § F. Prerequisites: N209, N212, B187, B192, SPSS workshop or completion of SPSS tutorial, and consent of instructor. Restrictions: Doctoral student or consent of instructor. Lecture 3 hours. Lab 2 hours. A. Alkon
This advanced quantitative nursing research course focuses on how research questions are addressed by statistical analytic models. The coursework provides content on analytic techniques, such as multiple and logistical regression and power estimation, with hands-on experience provided through lab exercises in planning, conducting and interpreting analyses using SPSS. INTERDEPART

289B. Advanced Quantitative Research Methods II. (3) § W. N209, N212, B187, N289A or consent of instructor. Restrictions: Nursing doctoral student or consent of instructor. Lecture 5 hours. S. Weiss, K. Lee
The second quarter of advanced quantitative nursing research methods focuses on research questions, designs, data collection procedures and analyses related to longitudinal studies and intervention research. Content is focused on methodological techniques and issues pertaining to investigation of change over time. INTERDEPART

289.01. Advanced Methods: Meta-Analysis. (2) § F. Prerequisites: Completion of first year of doctoral program. Lecture 2 hours. K. Lee
Course will familiarize students with meta-analysis techniques for conducting integrative research review on a phenomenon of interest. Content includes an overview of meta-analysis techniques, issues and controversies, steps in conducting a meta-analysis including effect sizes, and inter-rater reliability. FAM HLTH

290. Family Theory/Research in Health. (3) § F. Prerequisites: None. Restrictions: Doctoral student or consent of instructor. Seminar 3 hours. C. Chesla
Course presents and critiques theoretical perspectives and research approaches dominant in the study of family and health. Compatibility of theories and research approaches is examined. FAM HLTH

291. Applied Statistical Methods for Longitudinal & Hierarchical Data. (4) § Sp. Prerequisites: B192 or equivalent. Restrictions: 15 enrolled students. Lecture 3 hours. Lab 3 hours. B. Cooper
Course introduces advanced methods for correlated observations.
Reviews general linear model methods for linear regression and repeated measure – within subjects – analyses, including limitations of GLM regarding correlated and/or missing data. Presents multilevel model as preferred methods for analyzing correlated Gaussian data from longitudinal and some hierarchical designs. Introduces generalized estimating equations as additional alternative. COMM HLTH SYST

292A. Physiology of Pregnancy. (2) § W. Prerequisites: Consent of instructor. Conference 0.25 hour. Project 1.75 hours. K. Lee
Course reviews and analyzes advanced physiology and pathophysiology of pregnancy and their impact on the maternal-fetal unit as a basis for nursing practice and research. Emphasis is on reproductive and endocrine systems affecting adaptation and development during pregnancy. FAM HLTH

292B. Fetal & Neonatal Risk in Pregnancy. (2) § W. Prerequisites: None. Lecture 2 hours. A. Carley
Course addresses fetal and neonatal risks associated with complications of pregnancy. Application of research and clinical outcomes of complex pregnancy and fetal conditions and sequelae are highlighted. FAM HLTH

293C. Abstraction and Modeling III. (3) § Sp. Prerequisites: N293A and N293B or consent of instructor. Restrictions: Maximum number of students: 16-18. Lecture 3 hours. C. Mead
Course increases students’ Unified Modeling Language (UML) reading and writing skills to the point where they can critically review both specific models and the literature regarding the application of UML to understanding complex health care systems. In addition, the course focuses on two aspects of advanced visual modeling: (1) The specification of model constraints (i.e., domain-specific business rules) using the UML’s Object Constraint Language (OCL) and (2) the inclusion of known architectural “patterns.” COMM HLTH SYST

294A. Introduction to Human Genomics. (3) § F. Prerequisites: None. Lecture 2 hours. Web-based coursework 3 hours. B. Aouizerat
Course focuses on the history of genetics, basic human and molecular genetics, an introduction to genetic variation (SNPs, etc.), patterns of inheritance, multifactorial inheritance and common diseases, influences of gene action and expression, clinical cytogenetics, the Human Genome Project, genetics terminology and molecular biology laboratory methods. PHYSIOL NURSG

294B. Medical Genetics for Nursing. (3) § W. Prerequisites: N294A or consent of instructor. Lecture 2 hours. Web-based coursework 3 hours. M. Engler
Course addresses the genetic basis of human disease (cardiovascular, oncology, gerontology); genetic screening and diagnosis, ethical, legal and social implications related to genetic information and technology; ethic, racial and cultural considerations for providing genetic services; and genetic therapeutics, such as pharmacogenetics, gene therapy, stem cell transplants, enzyme replacement. PHYSIOL NURSG

294C. Advanced Practice Nursing in Genetics. (3) § Sp. Prerequisites: N294A and N294B. Lecture 2 hours. Seminar 1 hour. M. Wallhagen
Course surveys common genetic syndromes, relative risk assessment, screening and surveillance guidelines, and the educational and
management needs of clients and their families related to the predisposition to genetic disease. Course focuses on the role of the clinical nurse specialist. PHYSIOL NURSG

294D. Ethics and Policy in Genetics/Genomics. (3) § Sp. Prerequisites: Foundational coursework in clinical practice in genomics nursing or consent of instructor. Seminar 3 hours. P. Benner
Course explores ethics, philosophy and social policy of genetics research, screening and therapeutic interventions. Using case-based discussions, students will explore the use of genetics in social policy in light of past, current and future research. Social and health care implications related to the understanding of human nature, informed consent, insurance, employment, emotional impact and predictive variability of genetic screening will be explored. PHYSIOL NURSG

294E. Topics in Genetics/Genomics. (1) § Sp. Prerequisites: Foundational coursework in clinical practice in genomics nursing or consent of instructor. Seminar 1 hour. B. Aouizerat
Seminar will bring guest lecturers whose work is on the cutting edge of social, scientific, clinical and/or policy concerns regarding nursing and genetics. Using clinical case examples, these seminar discussions will span the consideration of ethics and policy, privacy, discrimination, decisionmaking support, advocacy, access to services and cultural sensitivity. PHYSIOL NURSG

295A. Care of Older Adults. (3) § F. Prerequisites: Completion of N208A, B or consent of instructor. Lecture 2 hours. Seminar 1 hour. L. Macera
Course focuses on advanced practice nursing of older clients across care settings using case studies, lectures and discussions. Integrates pathophysiological, pharmacological, psychosocial and ethical concepts. Critically analyzes evidence-based approaches to assessment and care. PHYSIOL NURSG

295B. Care of Older Adults. (3) § W. Prerequisites: Completion of N208A, B or consent of instructor. Lecture 2 hours. Seminar 1 hour. L. Mackin
Course focuses on advanced practice nursing of older clients across care settings using case studies, lectures and discussions. Integrates pathophysiological, pharmacological, psychosocial and ethical concepts. Critically analyzes evidence-based approaches to assessment and care. PHYSIOL NURSG

295C. Case Studies in Geriatrics. (3) § W, Sp. Prerequisites: N232, N270, N245, N295A, N295B. Restrictions: Must be concurrent with clinical practica or residency in gerontological nursing or by consent of instructor. Lecture 1 hour. Seminar 2 hours. C. Deitch, T. Berta
Case studies of complex illness in older adults across settings are analyzed to refine critical decisionmaking in clinical case management and pharmacotherapeutics while utilizing the theory and practice of geriatrics and gerontology. PHYSIOL NURSG

297. Human Responses to Pain. (2) § F. Lecture 2 hours. C. Miaskowski
Course explores research related to physiological, psychological and social responses to human pain; nursing implications for pain assessment; and management of acute and chronic painful conditions across the life span. PHYSIOL NURSG
298. Thesis or Comprehensive Exam. (0) § F, W, Sp. Prerequisites: Advancement to candidacy and permission of the graduate adviser. Staff For graduate students engaged in writing the thesis for the master's degree or taking a comprehensive examination required for the master's degree.

299. Dissertation. (0) § F, W, Sp. Prerequisites: Advancement to candidacy and permission of the graduate adviser. Staff For graduate students engaged in writing the dissertation for the doctor of philosophy in nursing degree.

404. Clinical Residency. (4-12) § F, W, Sp. Prerequisites: Consent of instructor. Lab 12-36 hours. Staff Student has opportunity to apply and evaluate theories, concepts and skills in the work setting under the supervision of a preceptor. INTERDEPART

404.01. Adult Primary Care Clinical Residency. (1-12) § F, W, Sp, Su. Prerequisites: N270, N245, N245.01, N246, N246.01 and consent of instructor. Seminar 1 hour. Clinic 3-36 hours. Staff Course provides an opportunity to apply and evaluate theories, concepts and skills in primary care under the supervision of a physician and/or nurse practitioner preceptor. COMM HLTH SYST

404.02. Advanced Practice Residency. (2-12) § Su, F, W, Sp. Prerequisites: Consent of instructor. Patient contact 6-36 hours. Staff Course provides student with the opportunity to apply and evaluate theories, concepts and skills under the supervision of a preceptor in one or more clinical practice settings. FAM HLTH

404.05A. ACNP Residency I. (2-8) § F. Prerequisites: Prior or concurrent enrollment in N255A, prior or concurrent enrollment in N288A, ACNP student or consent of instructor. Clinic 6-24 hours. J. Howie Esquivel Course provides a clinical experience in the role of ACNP. Focus is on decisionmaking regarding diagnosis and treatment of patients with unstable cardiopulmonary-renal problems commonly seen in acute/critical care clinical settings. PHYSIOL NURSG

404.05B. ACNP Residency II. (2-8) § W. Prerequisites: Prior or concurrent enrollment in N255B, prior or concurrent enrollment in N288B, ACNP student or consent of instructor. Clinic 6-24 hours. J. Howie Esquivel Course provides a clinical experience in the role of ACNP. Focus is on decisionmaking regarding diagnosis and treatment of patients commonly seen in acute/critical care clinical settings with metabolic dysfunctions, infections, wounds, pain and needs for sedation and nutrition. PHYSIOL NURSG

404.05C. ACNP Residency III. (4-8) § Sp. Prerequisites: Completion of N255A, B or consent of instructor. Clinic 12-24 hours. J. Howie Esquivel The culminating clinical experience in the role of the ACNP, emphasizing cardiopulmonary, critical care or emergency department/trauma. Emphasizes the ACNP as principal provider of care, with a designated team, for a specific patient care environment or a specific patient population. PHYSIOL NURSG

405. Practicum in Mental Health & Community Nursing. (1-8) § F, W, Sp. Prerequisites: Consent of instructor. Lab 3-24 hours. Staff Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of mental health
and community nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. COMM HLTH SYST 406. Practicum in Family Health Care Nursing. (1-8) § F, W, Sp. Prerequisites: Consent of instructor. Lab 3-24 hours. Staff Course provides student opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of family health care nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. FAM HLTH 407. Practicum in Physiological Nursing. (1-8) § F, W, Sp. Prerequisites: Consent of instructor. Lab 3-24 hours. Staff Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of physiological nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. PHYSIOL NURSG 407.05. Clinical Practicum and Conference. (1-6) § W. Prerequisites: Concurrent enrollment in N245 and N245.05. ACNP student or consent of instructor. Clinic 3-18 hours. M. Hawk This clinical course is designed to assist students to advance their history and physical examination skills while developing health promotion and maintenance skills for stable hospitalized patients using clinical decisionmaking models. PHYSIOL NURSG 407.07. ACNP Therapeutics Skills Lab. (1) § Sp. Prerequisites: ACNP student or consent of instructor. Lab 3 hours. M. Hawk In laboratory sessions and selected clinical settings, students develop psychomotor skills necessary for performance of invasive procedures, e.g., suturing and wound care. PHYSIOL NURSG 407.08. ACNP Chronic Illness Practicum. (2-6) § Sp. Prerequisites: Concurrent enrollment in N246 and N246.05. ACNP student or consent of instructor. Clinic 6-18 hours. R. Garbez Clinical experience focuses on episodic/chronic health needs of hospitalized adults. Emphasizes diagnosis and management of chronic illnesses of patients, e.g., those with diabetes, coronary artery disease, COPD, GI and GU problems, and infectious diseases. PHYSIOL NURSG 407.09. Skills Lab Clinical Practicum. (1) § F. Prerequisites: ACNP student or consent of instructor; concurrent enrollment or completion of N270. Lab 3 hours. R. Garbez Course provides the opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of physiological nursing. Guided clinical laboratory experience designed to develop mastery of advanced skills. PHYSIOL NURSG 407.10. Clinical Practicum. (1) § F. Prerequisites: ACNP student or consent of instructor; concurrent enrollment or completion of N270. Patient contact 3 hours. R. Garbez Course applies health assessment concepts and skills under supervision of clinical preceptors. Performance of systematic health assessment of healthy adults and/or adults with stable acute or chronic illness. Development of an increasing ability to differentiate between normal and abnormal findings. Beginning development of the role of
the acute care nurse practitioner, with emphasis on the collaborative relationship, and the continuum of care from primary to tertiary settings. PHYSIOL NURSG

407.11. Venous Access Safety. (1) § F. Prerequisites: Consent of instructor. Lab 1-2 hours. N. Donaldson, J. Pearl, M. Ryder
Course focuses on evidence-based principles that are the foundation for optimizing patient safety and outcomes related to appropriate venous access strategies, care and maintenance of vascular access devices, and management of complications associated with vascular access devices. PHYSIOL NURSG

434. Teaching Residency. (4-12) § F, W, Sp. Prerequisites: Consent of instructor. Lab 12-36 hours. Staff
Course provides the opportunity to apply and evaluate theories, concepts and skills in the work setting under the supervision of a preceptor. INTERDEPART

435. Consultation Residency. (4-12) § F, W, Sp. Prerequisites: Consent of instructor. Lab 12-36 hours. Staff
Opportunity to apply and evaluate theories, concepts and skills in the work setting under the supervision of a preceptor. INTERDEPART

436. Teaching Practicum. (1-8) § F, W, Sp. Prerequisites: Consent of instructor. Lab 3-24 hours. Staff
Supervised practice in selected components of the teaching role in nursing. COMM HLTH SYST

445. System Intervention in Pediatric Nursing. (2) § Sp. Prerequisites: None. Restrictions: Concurrent enrollment in N404.02 or consent of instructor. Clinic 6 hours. B. Davies
Clinical experience focuses on program/process/practice assessment, planning and intervention in a pediatric specialty setting(s) to improve client care processes within the setting and/or across setting boundaries. FAM HLTH

467. Teaching Residency. (1-3) § Su, F, W, Sp. Prerequisites: Admission to doctoral study and consent of instructor. Lab 1-3 hours. Staff
Course offers students an opportunity to engage in teaching with selected faculty. INTERDEPART

469. Management of Psychotropic Regimens. (2) § Sp. Prerequisites: None. Restrictions: Enrollment in psychiatric master's program or consent of instructor. Seminar 1 hour. Project 1 hour. K. Johnson, B. Phoenix
Seminar in case conference format to develop clinical judgment about management of regimens for psychiatric symptoms. COMM HLTH SYST

470. Administration Residency. (2-12) § SS1, SS2, F, W, Sp. Prerequisites: Completion of N287A, B and N287D, each with a grade of B or higher, and consent of instructor. Lab 6-36 hours. Staff
Course provides opportunity to apply and evaluate theories, concepts and skills in the work setting under the supervision of a preceptor. COMM HLTH SYST

471. Practicum in Health Policy. (1-8) § F, W, Sp, Su. Prerequisites: N253, N262A, S228 and consent of instructor. Lab 3-24 hours. Staff
Course provides an opportunity to learn hands-on policy and research analysis working with faculty on a policy or research project. Guided
laboratory experience is designed to develop mastery in policy analysis or research. SOC BEH SCI

472. Health Policy Residency. (2-8) § F, W, Sp, Su. Prerequisites: N253, N262A, S228 and consent of instructor. Lab 6-24 hours. Staff Course provides an opportunity to apply and evaluate policy theories, concepts and skills in health policy under the supervision of a health policy faculty member or preceptor in a health policy setting. SOC BEH SCI

NUTRITION

218. Nutrition Principles Across the Life Span. (2) § F, W. Prerequisites: None. Project 3 hours. Web-based coursework 3 hours. P. Sparacino Course covers nutrition principles in health promotion and treatment of disease across the life span. It emphasizes the clinical challenges of conveying nutrition information to patients in the advanced practice setting, and explores the most effective techniques for successful counseling. FAM HLTH

SOCIOLOGY

201. Violence as a Health Problem in the United States. (2-4) § W, Sp. Prerequisites: None. Lecture 2 hours. Lab 0-6 hours. H. Pinderhughes Course explores scope and etiology of violence in the United States. Discussion includes the links between different types of violence, examination of competing theoretical approaches to explain the courses of violence, and different policy approaches to resolve and prevent violence. SOC BEH SCI

205. Health Professions, Occupations and Work. (3) § W. Lecture 2 hours. Lab 3 hours. C. Harrington Course examines the nature of occupations and professions; their constellation in hospitals and clinics; the medical division of labor, specialties and specialization; professional and occupational ideologies; the sociology of work relationships, careers. SOC BEH SCI

207. Sociology of Health & Medicine. (3) § F. Seminar 2 hours. Lab 3 hours. C. Estes Course introduces the student to classical perspectives in medical sociology and development of a critical perspective in the field to serve as a foundation for independent and advanced study in medical sociology. SOC BEH SCI

208. Social Psychology of Health & Illness. (3) § W. Prerequisites: Required for doctoral students in sociology. Restrictions: Doctoral-level students in nursing or sociology. Lecture 2 hours. Lab 3 hours. H. Pinderhughes Course examines the relationship of social class, ethnic identification, group membership, family structure, occupation and lifestyle to health and illness, and therapeutic interaction of laypersons and health professionals. SOC BEH SCI

210. Proseminar in Health Policy. (1) § F, W, Sp. Prerequisites: None. Seminar 1 hour. C. Harrington, S. Chapman Policy seminar to extend knowledge of the varied scope of health policy research and analysis. The focus will be on specific policy research, analysis and implementation strategies. SOC BEH SCI
211. Information Technology & Organizational Change. (2) § Sp. Prerequisites: S262 or S225 or BMI 200 or consent of instructor. Seminar 2 hours. R. Miller
Course examines electronic medical records (EMRs) in health care organizations, focusing on: EMR capabilities, use, costs and benefits; factors affecting costs and benefits; theories of innovation diffusion; the relationship between IT and organizational changes; EMR health policy options. SOC BEH SCI

212A. Sociological Theory: Classical. (5) § F. Prerequisites: Doctoral students only. Lecture 2 hours. Lab 9 hours. B. Powers
Course examines and evaluates classical and recent contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SCI

212B. Sociological Theory: Contemporary. (5) § W. Prerequisites: S212A and must be a doctoral student. Lecture 2 hours. Research 9 hours. H. Pinderhughes
Course examines and evaluates contemporary contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SCI

212C. Sociological Theory: Symbolic Interactionism. (5) § Sp. Prerequisites: S212A, B or permission of instructor. Doctoral students only. Lecture 2 hours. Research 9 hours. A. Clarke
Course consists of readings and discussions on interactionist theory in sociology, with emphasis on the origins and development of the Chicago School of sociology, as well as an examination of the link between philosophy of pragmatism and interactionism. SOC BEH SCI

218. Advanced Topics in the Socio-Analysis of Aging. (2-4) § W. Prerequisites: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. C. Estes
Course is designed for doctoral students investigating advanced research issues preparatory to qualifying examinations. Topics of course to be analyzed will vary each year, but will be focused on a specific area. Laboratory assignments are for research activities on special topics in the area of aging. SOC BEH SCI

219. Social Policy in Aging. (2-4) § W, Sp. Prerequisites: None. Lecture 2 hours. Lab 0-6 hours. C. Estes
Course provides critical analysis of major social, economic and political issues of growing old in America, including issues of chronic illness, disabilities, social policy in the public and private sectors, including health, income and social services, and political movements. SOC BEH SCI

221. Qualifying Examination. (1-8) § F, W, Sp. Prerequisites: Completion of preliminary examinations. Open to sociology students only. C. Harrington, C. Estes, A. Clarke, R. Newcomer, V. Olesen
Course will offer preparation for the specialty area qualifying examination. SOC BEH SCI

222. Health Care Economics and Policy. (2) § W, Sp. Prerequisites: None. Lecture 32 hours. C. Harrington
Course provides a critical analysis of economic, sociological and political factors that affect health care. Examines US health policies that impact on access, quality, costs, delivery systems, professional practices and reform. SOC BEH SCI

223. Perspectives on Public Policy. (3) § F, W. Prerequisites: Consent of instructor. Lecture 2 hours. Lab 3 hours. H. Pinderhughes Course offers systematic overview of health policy in American government – its scope, dynamics, and conceptual and practical dilemmas. Students will become acquainted with major issues involved in formulating, financing, implementing and assessing patterns of decision (i.e., policy) established by government. SOC BEH SCI

225. Organizational Analysis of US Health Care. (4) § W. Lecture 2 hours. Seminar 2 hours. M. Kitchener Course develops participants' capacity to understand and conduct systematic research on health care organizations. Covers the major theoretical perspectives on organizations: contingency theory, resource dependency, organizational ecology, institutional theory, networks, strategic management, economic perspectives. Each perspective is considered in the context of studies of health care organizations including: hospitals, HMOs, mental health agencies, nursing homes, biotechnology firms and academic health centers. SOC BEH SCI

226. Long-Term Care Policies. (2-3) § F. Prerequisites: None. Seminar 2 hours. Project 3 hours. C. Harrington, R. Newcomer Course examines long-term care policies, with a special emphasis on nursing homes, home health care, and home- and community-based waiver programs. Issues around the long-term care labor market, access to services, quality of care and quality of life, and critical cost and legal issues are examined. SOC BEH SCI

227. Advanced Seminar in Organizational Analysis of US Health Care. (1-2) § Sp. Prerequisites: Successful completion of S225 or similar introduction to organizational analysis of health care. Seminar 1 hour. Project 3 hours. M. Kitchener Seminar allows those who have completed an introductory course in organizational analysis to extend their capacity to conduct theory-based research in health care settings. The seminar considers recent applications of theoretical perspectives such as institutional theory, and participants develop an analytical framework for a research project of their choice using a generic model, the weekly reading and class discussion. SOC BEH SCI

230. Sociocultural Issues in AIDS. (2-3) § W. Seminar 2 hours. Project 3 hours. C. Harrington, R. Eversley, A. Leblanc Course examines the history and social psychology of AIDS in relation to health, illness, disease and death. Includes demographic trends, the cost burden, and special problems of minorities, women and caregivers, along with policy issues. SOC BEH SCI

233. Sociology of Aging. (3) § W, Sp. Lecture 2 hours. Lab 3 hours. P. Fox Course reviews theories of aging including a review of theories of aging, current and historical trends in aging, factors related to aging,
effects of aging on individuals and families, and formal and informal service systems for an aging population. SOC BEH SCI

Course focuses on issues and evolution of tobacco control policies in the United States and internationally. Lectures and readings in the history of tobacco control will prepare students to engage in weekly discussions and case studies of particular tobacco control policies. SOC BEH SCI

236. Race/Class Factors in Health Care Delivery. (3) § F, W, Sp. Prerequisites: Consent of instructor, graduate standing. Lecture 2 hours. Lab 3 hours. H. Pinderhughes, J. Shim
Course examines racial and class membership impact on access to health care services, variations in the quality of those services, and how professional and subprofessional roles in the health care system are organized along racial and class lines. SOC BEH SCI

238. Feminist Theory. (2-4) § F, W, Sp. Prerequisites: Some background in social theory. Doctoral students only. Lecture 2 hours. Field work 0-6 hours. V. Olesen
Course provides in-depth overview and examination of 20th-century feminist theories from sociology, anthropology and interdisciplinary perspectives. Emphasis is on current contributions and debates, with attention to relations between feminist theories and issues for research in women's health and healing. SOC BEH SCI

240. Older Women's Issues. (2-4) § F, W. Lab 0-6 hours. Seminar 2 hours. C. Estes
Course analyzes postmenopausal women's socioeconomic status and changing social roles. Topics include demographic issues, economic trends, individual social and health status, policy implications for individuals and society. SOC BEH SCI

242. Women's Health: Research. (2-4) § Sp. Prerequisites: One or more women's health courses and one survey course in social research methods or social epidemiology. Seminar 2 hours. Optional project for additional units. Staff
An advanced survey of quantitative research methods in analysis of women's health issues. Will focus on data sources, design types, evaluation methods, data analysis, and proposal and report writing. Exploration of current research controversies. SOC BEH SCI

245. Gender, Race & Coloniality. (3) § Sp. Seminar 3 hours. A. Clarke
Course is a study of historical and contemporary issues in the social construction of biological and medical sciences, epistemological problems and feminist perspectives. Focus is on impact of gender on scientific work and includes scientific constructions of gender and women's careers in science. SOC BEH SCI

246. Communications & Policy Leadership. (3) § Sp. Prerequisites: None. Lecture 1 hour. Seminar 1 hour. R. Malone
Course focuses on developing students' skills in various types of policy-relevant communications and leadership across different policy venues. SOC BEH SCI
248. Group Independent Study. (1-4) § F, W, Sp. Prerequisites: Consent of instructor. Seminar 1-4 hours. Staff
Groups of two or more students select special problems to investigate on a collaborative basis. These studies may be conducted through readings, the collection or analysis of empirical data, or the development of conceptual analysis or of methodologies. SOC BEH SCI

249. Special Studies. (1-8) § F, W, Sp. Prerequisites: Consent of instructor. Staff
Students select special problems to investigate on an individual or collaborative basis. These studies may be conducted through readings, the collection or analysis of empirical data, or the development of conceptual analysis or of methodologies. SOC BEH SCI

252. Women's Health: Sociohistorical. (2-4) § W, Sp. Prerequisites: Consent of instructor. Lab 0-6 hours. Seminar 2 hours. A. Clarke
Sociological analysis of women's health status, roles as providers and patients, and the development of medical ideas about women from a historical perspective. Emphasis on 19th- and 20th-century developments in industrialized societies. SOC BEH SCI

253. Sociology of Reproduction. (2-4) § Sp. Lab 0-6 hours. Seminar 2 hours. A. Clarke
Course focuses on recent theoretical and substantive developments concerning female sexuality, birth control, population control, abortion, reproductive technologies and pregnancy/childbirth. Examines race and class relations and concerns of the state, science and medicine. SOC BEH SCI

Course examines health care policy and politics in terms of historical and contemporary issues related to access, quality and cost. Organizational, financing and labor market issues are included, along with strategies for social change. SOC BEH SCI

262.06. Research Utilization in Health Policy. (2) § F, Sp. Prerequisites: N262A. Seminar 2 hours. R. Newcomer, C. Harrington
Course focuses on the development of critical thinking skills related to utilization and evaluation of research findings in the area of health policy. The course uses scientific and practical approaches to research and policy analysis. SOC BEH SCI

Course addresses logic of research design and execution for students. Clarification of research question, delineation of work plan, and orientation to relevant theoretical literature or empirical data available. SOC BEH SCI

Course covers social and medical models and theories of disability and handicap. Areas covered include definitions, utility of role theory, models of identification and causation, and social perspectives on disability policy. SOC BEH SCI
281. Ethics and Law in Health Care. (2-3) § W. Project 0-3 hours. Seminar 2 hours. J. Weinberg
Course provides an understanding of legal policy issues relating to health care in the United States. Health care provision is profoundly affected by issues involving ethics/law/social policy. Students gain insights into ways ethical principles/legal decision/policy perspectives affect health care. SOC BEH SCI

282. Sociology of Science/Technology. (2-4) § W. Lab 0-6 hours. Seminar 2 hours. A. Clarke
Course examines early functionalist and Marxist theories, Kuhn's work, social constructionist, ethnomethodological, interactionist, neofunctionalist, critical and neo-Marxist perspectives. Focuses on laboratory, controversy, technological, and representational studies, and organization and funding. Links history and philosophy. SOC BEH SCI

283. Selected Topics/Health Economics. (2-3) § W. Prerequisites: S262 Health Care Economics. Lab 0-3 hours. Seminar 2 hours. R. Miller
Course examines selected topics in health care economics, with attention to basic economic theory of supply and demand for health care services and health insurance. Includes national health insurance proposals and the Canadian health care system. SOC BEH SCI

284. Health Care Economics. (4) § W. Prerequisites: None. Seminar 3 hours. Project 3 hours. W. Max
Course examines basic economic theory as applied to the health care sector. This will include the structure of health care service and labor markets and the analysis of critical economic and cost issues relevant to public policy. SOC BEH SCI

285A. Qualitative Methods I. (5) § F. Prerequisites: Second-year doctoral students. Seminar 3 hours. Field work 6 hours. Staff
Course reviews many of the types of qualitative research methods, emphasizing assumptions, approaches. Focus on design, entree, ethics, data-gathering techniques (interviewing, observing), data recording and management. Introduction to data analysis. SOC BEH SCI

285B. Qualitative Methods II. (5) § W. Prerequisites: S285A and second-year doctoral students. Seminar 3 hours. Field work 6 hours. H. Pinderhughes, S. Kools
Course compares and contrasts modes of qualitative analysis. Examines issues in establishing plausibility, credibility, adequacy. Intensive data analysis and examination of the problems of presentation of findings with focus on questions of authority and preparation of text. SOC BEH SCI

In-depth experience with specific type of qualitative research guided by instructor trained and experienced in that approach. Styles of work offered by various instructors will include advanced grounded theory analysis, ethnography, hermeneutic analysis, narrative analysis. SOC BEH SCI

286. Gender, Sex and Health. (2-4) § F, W, Sp. Prerequisites: None. Lecture 2 hours. Field work 0-6 hours. A. Clarke, J. Fosket
Course examines women's participation in formal/informal health and healing systems, emphasizing health problems, recruitment to health professions, images of women in health and illness, and women as providers. Health issues of women of color in the United States are highlighted. SOC BEH SCI

289A. Advanced Quantitative Research Methods I. (3) § F. Prerequisites: N209, N212 or equivalent, B187 and doctoral students only. Restrictions: None. Lecture 3 hours. Staff Course addresses theoretical basis of advanced quantitative methods. Fundamental issues of causality, and design issues pertinent to causality, are addressed using randomized clinical trials as models for experimental designs. Methods of sampling and issues in data collection and measurement are explored. INTERDEPART

289B. Advanced Quantitative Research Methods II. (3-5) § W. Prerequisites: N209, N212, B187, N289A or equivalent. Restrictions: None. Lecture 5 hours. R. Newcomer, J. Mullan The second course in a two-quarter series provides a practical understanding of the statistical procedures including logistic regression, repeated measures, survival analysis, latent variables and structural equation modeling, and cost effectiveness analysis. Attention is given to "how and when" to use each, how to diagnose and adjust to violations of the functional form and other assumptions of these procedures, and how to interpret computer output. INTERDEPART

289C. Advanced Measurement Methods. (3) § Sp. Prerequisites: S289A, B or equivalent course(s) in quantitative methods, and doctoral students only. Lecture 2 hours. Lab 3 hours. A. Stewart Overview of current standard approaches to conceptualizing and measuring self-reported health, review of psychometric properties of self-reported measures of health, adequacy of measurement in diverse populations, development of health status surveys, and selection of appropriate measures for research purposes. SOC BEH SCI

299. Dissertation. (0) § F, W, Sp. Prerequisites: Advancement to candidacy and permission of the graduate adviser. Staff For graduate students engaged in writing the dissertation for the PhD degree. SOC BEH SCI
