Courses

This chapter is a compendium of the courses of instruction offered by the University of California San Francisco. Courses are arranged in numerical order under alphabetically listed subject headings. As these headings do not in every case correspond to a department, the responsible department or other instructional unit is indicated at the end of the course description for each course. Abbreviations used for these departments or instructional units are spelled out in the list below.

Inquiries about individual courses should be addressed to the indicated department or instructional unit for information that is not included here, nor in the separately published bulletins of the four Schools or of the Graduate Division. These bulletins, available from the respective Schools or the Graduate Division, indicate, for example, the place of various courses in the different established curricula. Faculty rosters may also be found in the bulletins of the four Schools.

Course Description—Course Information is arranged in two paragraphs with periods separating items. The first paragraph includes course number, title, units in parentheses, session offered, prerequisite, format and breakdown of hours per week, and instructor in charge. The second paragraph describes the course content, followed by department or other instructional unit.

Course Numbers—All courses are numbered according to the following system: 100 series = upper division professional course, 200 and 300 series = graduate academic course, and 400 series = postdoctoral professional course. The meanings of the second (tens) and first (units) digits vary among the schools. A detailed explanation of course numbering is available from the Office of the Dean of each school. The symbol § following the units designates a course approved for credit toward a graduate academic degree.

Sessions—Su = summer term, SS = summer session, F = fall quarter, W = winter quarter, Sp = spring quarter.

Departments and Other Instructional Units:

| ABM CM MED | Division of Ambulatory and Community Medicine, School of Medicine. |
| ANATOMY | Department of Anatomy, School of Medicine. |
| ANESTHESIA | Department of Anesthesia, School of Medicine. |
| BIOCHEM | Department of Biochemistry and Biophysics, School of Medicine. |
| BIOL DYSFUNCT | Department of Nursing in Biological Dysfunction, School of Nursing. |
| CL PHARM | Division of Clinical Pharmacy, School of Pharmacy. |
| DERMATOL | Department of Dermatology, School of Medicine. |
| EPID INTL HLTH | Department of Epidemiology and International Health, School of Medicine. |
| FAM HLTH | Department of Family Health Care Nursing, School of Nursing. |
| GEN DENT | Division of General Dentistry, School of Dentistry. |
| GR DEVEL | Department of Growth and Development, School of Dentistry. |
| HIST HL SC | Department of History of Health Sciences, School of Medicine. |
| LAB MED | Department of Laboratory Medicine, School of Medicine. |
| MED ILLUSTR | Graduate Program in Medical and Biological Illustration, School of Medicine. |
| MED INF SC | Section of Medical Information Science, School of Medicine. |
| MEDICINE | Department of Medicine, School of Medicine. |
| MENT HLTH COM | Department of Mental Health and Community Nursing, School of Nursing. |
| MICROBIOL | Department of Microbiology and Immunology, School of Medicine. |
| NEURO SURG | Department of Neurological Surgery, School of Medicine. |
| NEUROLOGY | Department of Neurology, School of Medicine. |
| OB GYN RS | Department of Obstetrics, Gynecology and Reproductive Sciences, School of Medicine. |
| OPHTHALMOL | Department of Ophthalmology, School of Medicine. |
| ORAL MED | Department of Oral Medicine and Hospital Dentistry, School of Dentistry. |
| ORTHO SURG | Department of Orthopaedic Surgery, School of Medicine. |
| OTOLARYN | Department of Otolaryngology, School of Medicine. |

Additional courses are offered by the Schools under their programs of Continuing Education (see "Addresses" section).
PATHOLOGY  Department of Pathology, School of Medicine.
PEDIATRICS  Department of Pediatrics, School of Medicine.
PERIODONT  Department of Periodontology, School of Dentistry.
PHARM CHEM  Department of Pharmaceutical Chemistry, School of Pharmacy.
PHARMACOL  Department of Pharmacology, School of Medicine.
PHARMACY  Department of Pharmacy, School of Pharmacy.
PHYS THER  Curriculum in Physical Therapy, School of Medicine.
PHYSIOLOGY  Department of Physiology, School of Medicine.
PSYCHIATRY  Department of Psychiatry, School of Medicine.
RADIOLOGY  Department of Radiology, School of Medicine.
RESTOR DENT  Department of Restorative Dentistry, School of Medicine.
SOC BEH SC  Department of Social and Behavioral Sciences, School of Nursing.
SURGERY  Department of Surgery, School of Medicine.
UROLOGY  Department of Urology, School of Medicine.

Hospitals:

A  Alta Bates Hospital, Berkeley.
C  Children's Hospital and Adult Medical Center, San Francisco.
CC  Crippled Children's Hospital, Phoenix, Arizona.
CCP  Center for Training in Community Psychiatry, Berkeley.
CHMC  Children's Hospital Medical Center of Northern California, Oakland.
CHS  Community Hospital of Sonoma County, Santa Rosa.
CM  Cowell Memorial Hospital, Berkeley.
FR  French Hospital, San Francisco.
GS  Good Samaritan Hospital, San Jose.
H  Highland General Hospital, Oakland.
IMBB  Irwin Memorial Blood Bank, San Francisco.
K  Kaiser Foundation Hospital, San Francisco.
KH  Kaiser Foundation Hospital, Honolulu, Hawaii.
KP  Kaiser Permanente Medical Center, Oakland.
KSSF  Kaiser Foundation Hospital, South San Francisco.
L  Letterman Army Medical Center, San Francisco.
LPPI  Langley Porter Psychiatric Institute, San Francisco.
MC  Maricopa County Hospital, Phoenix, Arizona.
MG  Marin General Hospital, Ross.
MM  Mills Memorial Hospital, San Mateo
MZ  Mt. Zion Hospital and Medical Center, San Francisco.
NAT  Natividad Medical Center, Salinas.
NRMC  Naval Regional Medical Center, Oakland.
OC  O'Connor Hospital, San Jose.
P  Peralta Hospital, Oakland.
PH  Peninsula Hospital and Medical Center, Burlingame.
PHS  United States Public Health Service Hospital, San Francisco.
PMC  Pacific Medical Center, San Francisco.
Q  Queen's Medical Center, Honolulu, Hawaii.
RDMC  Ralph K. Davies Medical Center, San Francisco.
RLA  Rancho Los Amigos Hospital, Downey.
S  Stanford Medical Center, Palo Alto.
SCC  Santa Clara Valley Medical Center, San Jose.
SFCH  San Francisco Community Health Service, San Francisco.
SFGH  San Francisco General Hospital Medical Center, San Francisco.
SGH  Scenic General Hospital, Modesto.
SH  Shriners Hospital for Crippled Children, Honolulu, Hawaii.
SJ  San Joaquin General Hospital, Stockton.
SM  Samuel Merritt Hospital, Oakland.
SRM  Santa Rosa Memorial Hospital, Santa Rosa.
SSF  Shriners Hospital for Crippled Children, San Francisco.
STA  St. Agnes' Hospital and Medical Center, Fresno.
STJ  St. Joseph's Hospital, San Francisco.
STL  St. Luke's Hospital, San Francisco.
STM  St. Mary's Hospital and Medical Center, San Francisco.
T  Tripler Army Medical Center, Honolulu, Hawaii.
UC  University of California Hospitals and Clinics, San Francisco (includes UC, Moffitt, and Ambulatory Care Center).
VA  Veterans Administration Medical Center, San Francisco.
Ambulatory and Community Medicine

110. Required Clinical Clerkship in Ambulatory and Community Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Completion of 24 weeks of clinical clerkship, including Pediatrics 110 and either Medicine 110 or Surgery 110 and 111.

Crede

Integrated ambulatory clerkship experience of wide scope offered in a diversity of patient settings, including Adult Comprehensive, Family Care, Pediatric, and Dermatology Clinics, Home Care Service, Community Health programs, with additional assignments and seminars in radiology, psychiatry, and emergency care. AMB CM MED

140.02. Clinical and Community Health Programs. (1½ per week) Su, F, W, Sp. Prerequisite: Determined by students' clinical experiences and elective for which they are applying.

Crede and Staff

Elective experience for two or more weeks in various community health projects. Students may participate in unique health care programs such as Indian Health Services, Diabetic Summer Camp, Planned Parenthood, SFGH Holistic Health, and Asian Health Services. AMB CM MED

140.03. Occupational Medical Practice. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor.

Hine, H. Lewis

Clerkship at an industrial medical dispensary, for two to four weeks; supervised instruction in diagnosis of industrial disease, surveillance of industrial hazards, and health promotion activities. AMB CM MED

140.04. Preceptorship in Family Practice. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor.

H. Davis

Students work with a family practitioner, general internist, or pediatrician in the office, observing the practice and performing duties as training permits. Experience will teach common health problems and primary care in a community setting. Rural preceptorships will be encouraged. AMB CM MED

140.05. Social Medicine Pathway Selective. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor.

Barbaccia

Field work experience or research germane to social medicine individually arranged with consideration of student's major area of interest. AMB CM MED

140.06. Community Rehabilitation Medicine. (1½ per week) F, W, Sp. Prerequisite: Consent of instructor.

Staff

Students will be assigned to a variety of community medicine and other rehabilitation facilities for two to four weeks. Emphasis will be on the interprofessional approach to rehabilitation, and the selection of patients who are suitable for rehabilitation. AMB CM MED

H. Davis, Grace, Neal, Wellock

Clerkship in a family physician's office. Students are assigned families and participate in their total health care. Medical problems are considered in relation to the family system as a whole under the supervision of the physician and behavioral sciences staff. AMB CM MED

140.08. Family Practice Clerkship at CHS. (1½ per week) Su, F, W, Sp. Prerequisite: Third- or fourth-year standing. Medicine 110 and Pediatrics 110. Obstetrics and Gynecology 110 and Surgery 110 recommended.

Rodnick

Students assume responsibilities for the care of a variety of patients and problems at a busy family practice center and various outreach clinics in Sonoma county. They will gain exposure to the presentation and management of common acute medical problems. AMB CM MED

Crede

Students function as members of a treatment team caring for patients severely disabled by acute spinal cord injuries, acute head injuries, and neurologic and orthopedic disabilities at the Santa Clara Valley Medical Center Acute Rehabilitation Unit. Stipends are available. AMB CM MED

140.20. Family Practice Clerkship at VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. Consent of instructor for third-year students.

Velasco

Involvement in comprehensive primary medical care (inpatient and outpatient); participation in team approach to medical care; experience in utilizing appropriate community health resources in solution of medical and family problems. AMB CM MED

Knopp, D. Werdegard

A clerkship offering training in various aspects of emergency medicine. Primary responsibility for patients is included. The elective is divided into the following rotations: ambulatory pa-
140.22. Clerkship in General Medicine at STA.
(1½ per week) Su, F, W, Sp. Prerequisite: Ambulatory and Community Medicine 110 or Medicine 110. M. Joseph, Corbus, D. Werdegar

General medicine clerkship in a busy private general hospital, utilizing patients with a variety of medical and surgical problems, but stressing patient examination and formulation of problem lists and follow-up plans; supervised by practicing internists. AMB CM MED

140.23. Rehabilitation Medicine Clerkship at Fresno Community Hospital. (1½ per week) Su, F, W, Sp. Prerequisite: Ambulatory and Community Medicine 110 or Medicine 110.

Kirby, D. Werdegar

Clinical experience in techniques of rehabilitation in a model community hospital rehabilitation center. AMB CM MED

140.24. Primary Care Clerkship in a Semirural Community Hospital at Visalia. (1½ per week) Su, F, W, Sp. Sharrer, Corbus, D. Werdegar

Supervised work-up of ambulatory patients with emphasis on interdisciplintry patient management in a private practice setting; close association with the medical community and introduction to a semirural locale. AMB CM MED

140.25. Clinical Clerkship in Primary Care at a Fresno Community Hospital. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or Pediatrics 110.

D. Knapp, D. Werdegar

Clerkship based at the largest community hospital in Fresno utilizes inpatient office and community settings for clinical experience in primary care. Content of general medicine, family care, psychiatry, and obstetrics and gynecology is designed to meet students' particular interests. AMB CM MED

140.26. Clerkship in Primary Care and Community Health at the Fresno County Health Department. (1½ per week) Su, F, W, Sp. Prerequisite: Basic clinical rotations.

Defoe, Corbus, D. Werdegar

An elective course within the Fresno County Health Department which includes responsibility in patient care and a community health project, involving health education, clinical algorithms, new record pursuit, and epidemiological study. AMB CM MED

140.27. Community Medicine Clerkship in the San Joaquin Valley. (1½ per week) Su, F, W, Sp. Prerequisite: Ambulatory and Community Medicine 110, or Medicine 110, or Pediatrics 110. Clinic 40 hours.

D. Werdegar, Corbus

Field work experience in primary care and community medicine in various health care settings in the San Joaquin Valley. Emphasis is on rural health care problems. Program is designed in conjunction with the student. AMB CM MED

140.30. Family Practice Clerkship at NAT. (1½ per week) Su, F, W, Sp. Prerequisite: Third- or fourth-year standing, Medicine 110, and Pediatrics 110. Obstetrics and Gynecology 110 and Surgery 110 recommended. Clinic 40 hours.

Patinkin

Course offers experience in family practice and provides opportunity to participate in health care delivery in rural and/or underserved areas; strengthens background in internal medicine, pediatrics, obstetrics and gynecology, and the behavioral sciences in an academic environment. AMB CM MED

140.31. Family Practice Clerkship at Fort Ord. (1½ per week) Su, F, W, Sp. Prerequisite: Third- or fourth-year standing.

Meinert

Clerkship within the Department of Family Practice at Silas B. Hays Army Hospital. Student will be assigned to a staff physician and treat patients in family and community contexts. Direct ambulatory patient care and assistance in career goal evaluation. AMB CM MED

140.40. Family Practice Advanced Inpatient Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and consent of instructor.

R. Goldschmidt

Responsibility for hospitalized adult patients with diverse medical, surgical, and gynecological illnesses. Emphasis is on the role of the family physician in the care of hospitalized patients. Students function as members of the inpatient team at a junior intern level. AMB CM MED

150.01. Community Health Field Work. (1½ per week) F, W, Sp. Prerequisite: Consent of instructor.

Crede

Field work in exploration of one or more areas in social medicine or community health. Faculty from Schools of Medicine, Public Health, Nursing, Dentistry, and Social Welfare participate where needed. AMB CM MED

160.01. Clinical Aspects of Community Medicine. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Seminar and field work 2-8 hours.

Barbaccia

Assignments to community health agencies where students have patient contact and choose an aspect of the agency's program for analysis. Seminars are used to clarify issues in community health. Faculty from Schools of Medicine, Pharmacy, Nursing, and Dentistry participate where needed. AMB CM MED

Hine

Clinical demonstrations and case presentations representative of occupational and environmental disease. AMB CM MED

160.03. Family Practice in the Community. (1½) Su, F, W, Sp. Prerequisite: Consent of instructor. Field work 4 hours.

H. Davis

Assignment with a family physician for four hours a week. Students select a family physician, primary care internist, or pediatrician, observing their practice and participating in patient care.
The degree of participation is dependent upon student's level of clinical training. AMB CM MED

160.05. Centro Latino Elective. (1-2) Su, F, W, Sp. Prerequisite: Consent of instructor. Field 1 hour. Lab 6 hours. Sanchez, Pascoe

Students participate in a program serving the needs of the Latino population at all age levels, from prekindergarten to elderly. Health care, free breakfast, and lunch programs are conducted at the Centro Latino, 180 Fair Oaks Street. AMB CM MED

160.06. Latino School Elective. (3) Su, F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hours. Lab 6 hours. Sanchez, Pascoe

This project is a continuous outreach program dealing primarily with Spanish-speaking children, parents, teachers, and administrators in Mission District schools. Students participate in teaching, dissemination, and delivery of health care. AMB CM MED

Ransom, W. Gerber, Schroeder, H. Davis

Introductory principles of family medicine are discussed in class and discussion groups led by family physicians and family psychologists. Preceptorships with family physicians in private offices and community clinics. Each student will interview a family and present a case report. AMB CM MED

160.08. Introduction to Family Therapy. (1) § F, W. Seminar 1 hour. Ransom, Schroeder

This course provides an introduction for students expecting to take more advanced training in family therapy. Students will not see families themselves, but will participate in videotaped role-playing exercises aimed at practicing basic techniques. AMB CM MED

170.01. Aspects of Social Medicine in Community Health Agencies. (1-5) W. Prerequisite: Consent of Instructor. Seminar and field work 2-8 hours.

Seminars explore one or more areas in social medicine or community health. Faculty from Schools of Medicine, Public Health, Nursing, Dentistry, and Social Welfare participate where needed. AMB CM MED

170.02. Environmental Medicine. (1-5) Su, F, W. Prerequisite: Consent of Instructor. Seminar 1-5 hours. Hine

Tutorial concerned with environmental medical problems. AMB CM MED

170.03. Developmental Disabilities: Resource Overview. (2-8) F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Lab 3-5 hours. Seminar and field work 2-8 hours. L. Crain

Weekly seminar and reading assignments correlated with field observations of the spectrum of community and institutional services, including comprehensive diagnostic, therapeutic, and counseling services for children and adults with developmental disabilities. AMB CM MED

170.04. Occupational Medicine in the Community. (3½) § Su, F, W, Sp. Prerequisite: Consent of instructor. Field work 4-8 hours. H. Lewis, B. Dickerson

Medical and nursing students visit industries, governmental agencies, union groups, and medical clinics to observe work practices, environmental exposures, delivery of medical care, and interactions of regulatory control agencies with industry and labor. AMB CM MED

170.05. Rehabilitation Medicine. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Seminar and field work 2-8 hours. Crain

Through individualized arrangements, the course will provide an introduction to the broad spectrum of rehabilitation services for children and/or adults with chronic or disabling diseases. AMB CM MED

170.07. Introduction to Occupational Medicine. (1) § F. Lecture 1 hour. Hine, H. Lewis

Practices of occupational medicine as related to the prevention, recognition, and treatment of disease and injuries resulting from employment. Interactions of economic, political, and social forces bearing on worker health problems. Effects of the enterprise on the community and consumer. AMB CM MED

171. Computers and Problem Solving with Applications to Health Care. (3) § W. Bolour

The nature of information processing. Concepts of problem solving with the digital computer. Representation of information within a computer system. Introduction to programming and systematic programming methodology. Examples of present and potential applications of computer systems to the medical environment. AMB CM MED

172. Legal Medicine. (2) § F, Sp. Lecture 2 hours.

Tennenhous

Fundamental legal principles and procedures affecting medical practice including civil, criminal, administrative, business, and insurance law, with emphasis on medical negligence; the physician's role in litigation and the hazardous areas of medical practice which most frequently involve litigation. AMB CM MED

173. Clerkship Seminar in Family Medicine. (1) W. Seminar 1 hour. J. Cook

A seminar exploring various aspects of primary care related to family medicine. A practicing family physician leads discussion of topics developed by the students. Introduction to the practical aspects as well as the issues and demands of primary care. AMB CM MED

175.01. Axioms of Western Healership (Physicianship). (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Guttentag

An exploration of the theoretical premises of Western physicianship; its relationship to other disciplines and other cultural attitudes; trendiness of the holistic approach; dynamics of patient-physician relationship; and operational concepts such as optimal versus inadequate or superfluous examination. AMB CM MED
175.02. Theoretical Problems of Clinical Medicine. (1-3) § F, W. Prerequisite: Consent of instructor. Seminar 1-3 hours. Guttentag

Seminar on selected writings and of topics discussed in Ambulatory and Community Medicine 175.01. AMB CM MED

Lectures and seminars introduce entering students to social, political, economic, and environmental factors influencing health of the community and provision of care. Topics include preventive health care, health behavior, and formulation of social health policy. AMB CM MED

181. Holistic Approaches to Health. (2) W. Seminar 2 hours. Equivalent to Psychology 181.08 and Psychiatry 481. P. Lee, Pelletier

Complementary strategies to the current biomedical effort may be developed from a critical, yet open-minded examination of the limits of medicine, the determinants of health, ancient systems of healing, biofeedback and self-regulatory therapies, self-care and mutual aid. AMB CM MED

183. Perspectives on Asian-American Community Health Care. (2) § W. Lecture 1 hour. Discussion seminar 1 hour. Barbaccia

Presentation of various perspectives on health and health care in various Asian-American communities, including the socio-economic and cultural factors influencing them. Course includes guest lecturers, films, and discussions. AMB CM MED

184. Contemporary Spanish-Speaking Subcultures. (3) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours. Sanchez

Investigation of selected theories of migration, urbanization, assimilation, and conflict with emphasis on diverse Spanish-speaking populations in urban areas; relationships between this grouping and formal institutions, such as education, law enforcement, and medical services. AMB CM MED

Lecture-seminar format is used to cover aspects of the organization and function of the health care system and its subsystems, including manpower, hospitals, ambulatory care, planning regulation and control, economics, government programs, and health services research. AMB CM MED

188.01. Health Policy Seminar. (2) § F Seminar 2 hours. P. Lee and Staff

An introductory series relating health care issues to health policy and ethical analysis, specifically, “Primary Health Care.” AMB CM MED

188.02. Health Policy Seminar. (2) § W. Seminar 2 hours. P. Lee and Staff

An introductory series relating health care issues to health policy and ethical analysis, specifically, “Principles of Health Policy and Ethical Analysis—A Case Study Review.” AMB CM MED

188.03. Health Policy Seminar. (2) § F, W. Seminar 2 hours. P. Lee and Staff

An introductory series relating health care issues to health policy and ethical analysis, specifically, “Financing Health Care.” AMB CM MED

188.04. Practitioner in Therapeutic Relationships: An Interdisciplinary View. (2) § F. Prerequisite: Medicine 131C. Lecture 2 hours. P. Lee, Shenkin

Description of practitioner-patient interactions followed by past forces of education, social class, personality, and present work organization. Psychological, sociological, economic, political, and health policy viewpoints examined. Discussion of articles and Freidson’s “Profession of Medicine.” AMB CM MED

188.08. Health and Human Rights. (3) § Sp. Lecture 3 hours. Jonsen, M. Parker

Concepts of patients’ rights (right to care, right of informed consent, right to treatment) are analyzed in legal and ethical cases. Objective is to increase awareness of claims to certain “rights” which impose duties on providers of health care. AMB CM MED

189. Ethics in Health Care: Patient’s Rights. (1) § F. Lecture 1 hour. Course is given as a two-day workshop. Jonsen

Four cases illustrating typical ethical issues: patients’ rights to treatment, to refuse treatment, to choose one’s own treatment, and to equal treatment, are presented and analyzed. Formation of personal ethical position in light of current law and ethics is stressed. AMB CM MED

189.01. Ethics and Medical Care. (1) § W. Lecture 1 hour. Course is given as a two-day workshop. Jonsen

Lecture and workshop discussion of several medical care situations in light of their ethical and policy dimensions: care of endangered and defective newborns, experimentation using normal children, public funding of sterilization programs, and chronic disease and quality of life. AMB CM MED

189.02. Biomedical Ethics. (1) § Sp. Lecture 1 hour. Course is given as a two-day workshop. Jonsen

Lecture and workshop discussions of ethical and policy dimensions of several current biomedical issues: aging and health care, fetal research, behavior technology, and the role of the pharmaceutical industry in health care. AMB CM MED

190. Family Counseling and Psychotherapy. (1) § F, W. Prerequisite: Consent of instructor. Seminar 1 hour. Ransom, Schroder

Students observe family therapy sessions on videotape. Role playing family situations and therapeutic strategies will be emphasized. Appropriate readings are assigned and discussed in seminar. AMB CM MED
198. Supervised Study in Ambulatory and Community Medicine. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. AMB CM MED

200. Scientific, Ethical, and Legal Design of Clinical Research Involving Human Subjects. (1) § W. Lecture 3 hours on four days during one week. Jonsen, M. Parker, Sheiner
Analysis of protocols for clinical research in terms of criteria for scientific validity and ethical suitability; description of current local and national review process for approval of funded research. AMB CM MED

201. Ethical Theory. (4) § F. Prerequisite: Consent of instructor. Lecture 3 hours. Independent study 3 hours. Jonsen, Lebacqz
Basic concepts and methods of philosophical ethics, with particular emphasis on respect for persons and justice, will be traced in classical and modern authors. Emphasis will be placed on critical analysis of ethical argument. AMB CM MED

460. Clinical Primary Care—Medicine. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Refer to Medicine 460. Clinic 40 hours. Schroeder and Staff
Interns in the Primary Care Track of Internal Medicine are responsible for patient care in a multi-specialty primary care clinic. Other rotations include those common to the regular Medicine Residency Program and related clinical services, such as Dermatology, Neurology. AMB CM MED

461. Clinical Primary Care—Medicine. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Refer to Medicine 461. Clinic 40 hours. Schreiber and Staff
Residents in the Primary Care Track of Internal Medicine are responsible for patient care in a multi-specialty primary care clinic. Other rotations include those common to the regular Medicine Residency Program and related clinical services, such as Dermatology, Neurology. AMB CM MED

462. Clinical Primary Care—Pediatrics. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Refer to Pediatrics 462. Clinic 40 hours. Grumbach, Dower
Interns in the Primary Care Track of Pediatrics are responsible for patient care in a multi-specialty primary care clinic. Other rotations include those common to the regular Pediatrics Internship Program and related clinical services, such as Dermatology, Otolaryngology. AMB CM MED

463. Clinical Primary Care—Pediatrics. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Refer to Pediatrics 463. Clinic 40 hours. Grumbach, Dower
Residents in the Primary Care Track of Pediatrics are responsible for patient care in a multi-specialty primary care clinic. Other rotations include those common to the regular Pediatrics Residency Program and related clinical services, such as Dermatology, Otolaryngology. AMB CM MED

475.01. The Western Medical Attitude. (1) F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Guttenberg
An exploration of the theoretical premises on which Western medicine rests; its relationship to other disciplines, of the structure of patient-physician relationships, its operational concepts, such as optimal versus inadequate or superfluous examination, the concept of the clinical entity. AMB CM MED

Seminars on selected writings and of topics discussed in Ambulatory and Community Medicine 475.01. AMB CM MED

Anatomy

100A. Systemic, Regional, and Developmental Anatomy. (5) § F. Lecture 3 hours. Lab 6 hours. M. Miller
The gross structure of the human body is studied by means of dissection, demonstration, X-ray, surface, developmental, and cross-sectional anatomy with special reference to the functional aspects of the structures examined. ANATOMY

100B. Systemic, Regional, and Developmental Anatomy. (4) § W. Lecture 2 hours. Lab 6 hours. M. Miller
The gross structure of the human body is studied by means of dissection, demonstration, X-ray, surface, developmental, and cross-sectional anatomy with special reference to the functional aspects of the structures examined. ANATOMY

100C. Systemic, Regional, and Developmental Anatomy. (6) § SS. Lecture 4 hours. Lab 12 hours. L. Glass and Staff
The gross structure of the human body is studied by means of dissection, demonstration, X-ray, surface, developmental, and cross-sectional anatomy with special reference to the functional aspects of the structures examined. ANATOMY

100D. Systemic, Regional, and Developmental Anatomy. (3) § F. Lecture 2 hours. Lab 3 hours. L. Glass and Staff
The gross structure of the human body is studied by means of dissection, demonstration, X-ray, surface, developmental, and cross-sectional anatomy with special reference to the functional aspects of the structures examined. ANATOMY

102. Histology. (5) § F. Lecture 3 hours. Lab 4 hours. J. Long
Course covers the microscopic structure of
cells, tissues, and organs with the exception of the endocrine and reproductive systems.

ANATOMY

103. Nervous System: Form and Function. (4-6) § Sp. Prerequisite: Consent of instructor required for graduate students. Lecture 5 hours. Lab 4 hours. H. Ralston, Stryker, and Staff

The structure and function of the mammalian nervous system studied in lectures, conferences, demonstrations, and laboratories, with emphasis on the human nervous system and its organization. Intended for students in the School of Medicine and as an introductory course for graduate students. ANATOMY

115. Histology. (3) § W. Lecture 2 hours. Lab 3 hours. Schmucker and Staff

A study of the microscopic structures of the tissues and organs of the human body by means of lectures, demonstrations, and microscope slides. Functional aspects of the structures are stressed. ANATOMY

116. Gross Anatomy. (3) § Sp. Lecture 2 hours. Lab 3 hours. S. Sutherland

A study of the macroscopic structure of the human body by means of lectures and dissections. Functional aspects of the structures are stressed. ANATOMY

117A-B. Gross Anatomy. (4-6) § F, W, F: Lecture 2 hours. Lab 6 hours. W: Lecture 3 hours. Lab 9 hours. Coleman

Gross anatomy of the trunk, upper extremity, and the head and neck is studied by laboratory dissection and demonstration. The course includes an introduction to neuroanatomy. Emphasis is placed on the functions of the structures and systems examined. ORAL MED

118. General Histology. (3) § F. Lecture 2 hours. Lab 3 hours. McDowell

The microscopic structure of tissues and organs of the body is studied in relationship to their histophysiological considerations. ORAL MED

150.01. Gross and Regional Anatomy. (1½ per week) § Su, W, Sp. Prerequisite: Program must be approved by department and adviser during quarter previous to enrollment. Asling

Individual or group dissection; review of gross anatomy. ANATOMY

156A. Human Anatomy of the Trunk and Upper Extremity. (3) F. Lecture 2 hours. Lab 3 hours. R. D. Coleman

The gross structures of the trunk and upper extremity are studied through demonstration dissections. Consideration is given to the functional significance of the structures studied. ORAL MED

156B. Human Anatomy of the Head, Neck, and Central Nervous System. (4) W. Lecture 3 hours. Lab 3 hours. R. D. Coleman

The gross structures of the head, neck, and central nervous system are studied through demonstration dissections. Consideration is given to the functional significance and clinical applications of the structures studied. ORAL MED

170. Advanced Head and Neck Anatomy. (1-5) Sp. Prerequisite: General histology, gross anatomy of the head and neck, and oral histology. Lecture 1 hour. Lab 0-12 hours. R. D. Coleman

Designed for postgraduate specialty certificate students enrolled in the clinical speciality training programs in the School of Dentistry. Seminar presentation and demonstrations of head and neck anatomy are correlated with their application to clinical dentistry. ORAL MED

170.01. Problem Areas in Clinical Anatomy. (1) Su, F, W, Sp. Prerequisite: Anatomy 100 or concurrent enrollment. First-year standing in School of Medicine. Lindner

Discussion of important areas in clinical anatomy such as hernia, thyroid, perineum, and peritoneal cavity. Course is correlated with Anatomy 100. ANATOMY

170.02. Survey of Congenital Defects. (2) W. Prerequisite: Gross anatomy and consent of instructor. Lecture 2 hours.

Monie, R. Armstrong, I. Gilbert

This elective course provides information on the more common human congenital defects. Environmental and genetic factors which produce malformations are considered and possible mechanisms discussed. Course is intended primarily for physical therapy students. ANATOMY

170.04. Applied Gross Neuroanatomy. (2) Sp. Prerequisite: Anatomy 103 or concurrent enrollment, or consent of instructor. Lecture 1 hour. Lab 3 hours. deGroot

A laboratory-oriented consideration of the anatomy of the human brain and spinal cord. Discussion of case histories is correlated with basic neuroradiology and neuropathology. ANATOMY

Living clinical anatomy is stressed; the diaphragm, complete review of the neck, and abdominal contents. Clinical congenital anomalies are discussed in detail regarding their relationship to clinical medicine. ANATOMY

170.09. The Language of Anatomy. (1) § Su, F, W. Prerequisite: Concurrent enrollment in Anatomy 100.

Asling

A three-component elective, fostering vocabulary-building in anatomico-medical terminology, reflecting history of medical and cultural themes influencing development of anatomical nomenclature, and through student oral reports on eponymic terms, introducing some major figures in anatomy. ANATOMY

Course covers anatomy as it relates to anesthesia and periodontal surgery. ORAL MED
172. Clinical Anatomy by Cross Section. (2) § Sp. Prerequisite: Anatomy 100. Not open to first-year medical students. Lecture 1 hour. Lab 3 hours. 

Asling, L. Glass, S. Ross

Clinically-oriented survey of human anatomy by analysis of representative cross-sections of the body. Course provides an anatomical background for understanding computed tomograms. Each student will prepare and keep an anatomy atlas usable in radiologic tomography. ANATOMY

175. Congenital Abnormalities. (2) § W. Prerequisite: Anatomy 100 or equivalent and consent of instructor. Seminar 2 hours. 

Monie, T. Lin, R. Armstrong

Weekly seminars on experimental teratogenesis as a tool to understanding the formation of congenital abnormalities in man. ANATOMY

Savoskin-Asling

Course is designed to supplement required course work in anatomy (School of Dentistry) with additional dissection of the lower extremity. ORAL MED

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. ANATOMY

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ANATOMY

201. Radiation Effects on Genes and Chromosomes. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. 

S. Wolff

Concepts and mathematics of target theory relating to damage of genetic apparatus. Biophysical and biochemical studies on induction of intragenic and intergenic mutations that give insight into the structure of chromosomes and the interaction of radiation with biological material. ANATOMY

202. Seminar Course on Tissue Culture Methods in Biological Research. (1) § W. Prerequisite: Basic knowledge of biological principles and consent of instructor. Lecture 1 hour. 

J. Elias, R. Armstrong

Course covers potentials and limitations of culture methods, advantages of assessing effects of various agents (e.g., hormones and vitamins) in controlled environment and use of culture methods with other research tools (e.g., autoradiography or electron microscopy). Papers will be discussed. ANATOMY

203. Techniques in Cell Biology. (2 or 3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Enrollment limited for optional lab 3 hours. Offered in alternate years. Not offered 1980-81. 

S. Rosen

Introduction to the techniques of light microscopic and ultrastructural histochemistry; immunohistochemistry; chromatography; electrophoresis; subcellular fractionation; radioisotopes; and binding studies. Laboratory sessions will provide practical experience in these areas. ANATOMY

205. Biology of Mammalian Development. (3) § F. Prerequisite: Undergraduate course in embryology or consent of instructor. Lecture 3 hours. 

R. Pedersen

Aspects of preimplantation and postimplantation mammalian development are considered. Topics include gametogenesis, fertilization, cleavage, in vitro development, implantation, differentiation, tissue interaction, fetal development of systems, and teratogenesis. ANATOMY

J. Long, Wissig

An advanced presentation of the relationships between structural organization and the physiological activities of cells. Assigned readings, lectures, and seminar discussions are included. ANATOMY

L. Glass

Laboratory or library research in mammalian embryology or directed reading on current developments in gametogenesis, fertilization, cleavage, implantation, organogenesis, or molecular differentiation. ANATOMY

217. Anatomy of the Head and Neck for Advanced Students. (2-6) § Sp. Prerequisite: Anatomy 117A-B or equivalent and consent of instructor. Lecture 2 hours. Lab 0-12 hours. 

Coleman

A critical analysis of selected topics and methods in head and neck anatomy. Topics are correlated with appropriate laboratory experience and are presented by students, staff, and guests. ORAL MED

220. Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. 

Staff

Students, staff, or guests present selected topics concerned with current research in anatomy for criticism and discussion. ANATOMY

225. Experimental Neuroanatomy. (4) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Lab 3 hours. Offered in alternate years. Offered 1980-81. 

H. Ralston

Examination of the neural organization of the central and peripheral nervous systems, and methods available for experimental analyses of that organization. Topics include neurocytology, axon transport, neural degeneration and plasticity, histology, and immunocytochemistry. Analysis and interpretation of original research literature. ANATOMY
H. Ralston

A seminar series dealing with current literature in neuroanatomy and neurophysiology. ANATOMY

231. Molecular and Cellular Analysis of Development. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Offered in alternate years. Offered 1980-81. Calarco

Molecular and cellular events relating to differentiation and development. A variety of developmental phenomena will be surveyed and related to genetic and epigenetic control mechanisms. ANATOMY

235. Developmental Neurobiology. (1-3) § W. Prerequisite: Consent of instructor. Lecture 1-3 hours. Offered in alternate years. Not offered 1980-81. J. LaVail, M. Dennis, M. LaVail

Principles involved in the structural and functional development of the nervous system as well as detailed consideration of the development of several specific regions of the mammalian central nervous systems. Lectures, student presentations, and discussions of classical and current literature. ANATOMY

ANATOMY

273. Biological Scanning Electron Microscopy. (1) § W. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 2 hours for three sessions. Enrollment limited. J. Long, A. Jones

Principles of scanning electron microscopy including tissue preparative techniques and applications. Laboratory sessions include participation in preparing and viewing biological specimens. ANATOMY

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master’s degree. ANATOMY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. ANATOMY

300. Practicum in Teaching. (1-4) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Training in teaching in a course offered by the Department of Anatomy under the supervision of instructor in charge. Laboratory teaching, presentation of lecture material, experience in setting up and correcting of examinations, and participation in course are included. ANATOMY

400. Clinical Anatomy Through Cross Sections. (2) Su, Sp. Prerequisite: Open to house staff members of UC hospitals. Lecture 1 hour. Lab 3 hours. Equivalent to Anatomy 275. Asling, L. Glass, S. E. Ross

Clinically oriented survey of human anatomy through analysis of representative cross sections of the body. Course provides an anatomical background for understanding computed tomograms. Student will prepare and keep an anatomy atlas usable in radiologic tomography. ANATOMY

Anesthesia

110. Clinical Clerkship in Anesthesia. (3) Su, F, W, Sp. Prerequisite: Ambulatory and Community Medicine 130, Medicine 130, Medicine 131 A-B-C, Physiology 100, Pharmacology 100 A-B, and Psychiatry 130. Willenkin

Instruction and experience in operating room anesthesia including preoperative and postoperative evaluation and care. Cardiopulmonary resuscitation and care of the unconscious patient are stressed. The course is given at SFGH, UC, VA, C, FR, and A hospitals. ANESTHESIA

140.01. Clinical Anesthesia. (1½ per week) Su, F, W, Sp. Prerequisite: Anesthesia 110. Willenkin

Course covers anesthesia and analgesia for vaginal delivery and cesarean section. Emphasis is placed on effects of anesthetic techniques and drugs on normal physiologic changes in labor and delivery, placental transfer of drugs, and resuscitation of the newborn. ANESTHESIA

178. Anesthesiology. (6) Sp. Prerequisite: Interns and residents. Clinic. Hamilton and Staff

Course covers the systemic effects of the various muscle relaxants, sedatives, and stimulants and the administration of general anesthetic agents. ANESTHESIA

199. Laboratory Project in Anesthesia. (1-5) Su, F, W, Sp. Eger

A laboratory research project under direction of a member of the faculty with the approval of
the chairperson of the department. ANESTHESIA

400. Anesthesia Staff Conferences. (2) F, W, Sp. W. Stevens, R. D. Miller
Course includes didactic lectures in sciences basic to the specialty of anesthesia, as well as case reviews, clinical discussions, and seminars on current medical literature in anesthesia. ANESTHESIA

450. Anesthesia Clinical Work. (1½ per week) Su, F, W, Sp. Required during first year of residency, and during either second or third year. W. Hamilton
Residents are responsible for anesthetic care and management of patients in the operating rooms and outpatient departments, under immediate supervision of the staff. Preoperative and postoperative evaluation of patients, oxygen therapy, and resuscitation are covered. ANESTHESIA

460. Anesthesia Special Assignments. (1½ per week) Su, F, W, Sp. Elective for residents during either second or third year. UC Eger
Assignments include instruction in anesthesia for children, problems related to open heart surgery, cardiology, and opportunity for research in related fields. ANESTHESIA

Animal Science

162. Principles of Laboratory Animal Science. (3) $ W. Lecture 1 hour. Lab 6 hours. Spinelli
Introduction to the selection, anatomical and physical peculiarities, and preoperative and postoperative care of animals. Laboratory experiments in anesthesia, surgical exercises, drug administration, perfusion techniques, and individual experiments are included. PHARMACY

Anthropology

205A-B. Introduction to Medical Anthropology: Sociocultural Aspects. (3-4, 3-4) § F, W. Prerequisite: Intended primarily for doctoral students in medical anthropology, and others at graduate standing with consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Required for and open only to first-year students in the UCSF Ph.D. Program in Medical Anthropology. Two-quarter course. Ablon, Todd
Seminar in the history and theory of social anthropology as applied to problems of health and illness. Major concepts and problems will be illustrated through critical review of selected research literature. EPID INTL HLTH

206. Introduction to Biomedical Anthropology. (3-4) § F. Prerequisite: Consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Open only to first-year students in the intercampus Program in Medical Anthropology. Required for students in the UCSF Ph.D. Program in Medical Anthropology. Pawson
Survey of the biocultural areas of medical anthropology; anthropology in relationship to biomedicine and human biology. EPID INTL HLTH

211A-B-C. Research Training Seminar. (3-4, 3-4, 3-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Required for and open only to first-year students in the UCSF Ph.D. Program in Medical Anthropology. Staff
Fundamentals of anthropological research design and methods through lectures, readings, and field assignments. EPID INTL HLTH

212A-B-C. Research Apprenticeship. (2-5, 2-5, 2-5) § F, W, Sp. Prerequisite: Consent of instructor. Lab 6-15 hours. Staff
Students work with individual faculty members in ongoing research projects. Each student will work on supervised data collection and analytical tasks, and a broader range of research activities, such as problem formulation, grant preparation, sampling, and research design and execution. EPID INTL HLTH

216. Research Design. (3) § F, W. Lecture 2 hours. Lab 3 hours. Nydegger
Workshop format, utilizing student research interests. Topics include model building: problem formulation; design of research strategies; evaluation of sampling methods; operationalization of concepts; special problems for qualitative data. Course is preparatory for anthropological statistics. EPID INTL HLTH

217. Statistics in Anthropology. (2) § F, W, Sp. Prerequisite: Anthropology 216. Lecture 2 hours. Lab 3 hours. Mittens
Introduction to statistical methods for the social sciences: measurement, selected data characteristics, probability theory, statistical models, descriptive statistics, the general linear model, analysis of qualitative data. Emphasis is on understanding fundamental assumptions and procedures of statistical methods relevant to anthropology. EPID INTL HLTH

218. Computer Methods in Anthropology. (3-4) § Sp. Lecture 3 hours. Lab 0-3 hours. Staff
An introduction to data processing methods most commonly used by medical anthropologists. Topics covered in lecture and laboratory demonstrations include: how a computer works, data form design, keypunching, use of SPSS and HMD program packages, and interpretation of computer output. EPID INTL HLTH

220. Topics in Medical Anthropology. (0) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Staff
Students, staff, or guest lecturers present selected topics based on their current work. EPID INTL HLTH
221A-B. History and Theory of Anthropology. (3-3) § F, W. Prerequisite: Consent of instructor. Generally limited to students in anthropology. Lecture 3 hours.

Ruffini

A review of the history and development of anthropology and its major theoretical approaches. Lectures, discussion, and readings focus on major issues, trends, personalities, and present concerns in the field. EPID INTL HLTH

222A-B-C. Writing Skills for Medical Anthropologists. (1-3, 1-3, 1-3) § F, W, Sp. Prerequisite: Open to Medical Anthropology graduate students only. Lecture 1-3 hours. Course may be repeated for credit. Ruffini

Students submit papers for editorial comment and advice on style, organization, grammar, syntax, and proper scholarly form. Course includes lectures, informal group discussions on problems encountered in writing papers, and some assigned and recommended readings. EPID INTL HLTH

223. Social Network Analysis. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Independent study 3 hours. Todd, Lewin

Examination of origins and development of network analysis and the uses to which it has been put, particularly in urban anthropological research; methods and measures for gathering and analyzing network data; applications of network analysis to health and illness behavior. EPID INTL HLTH

225. Contemporary Issues in Medical Anthropology. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units. M. Clark

Introduction to selected controversies and current issues in medical anthropology, including sociology; sociocultural impact of high technology medicine; abortion, euthanasia and the right to life; status of research on the etiology of mental disorders; advocacy, praxis and the social scientist. EPID INTL HLTH

230. Culture and Personality. (2-3) § F. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units. Kiefer

Exploration of the relationship between culturally and conditioned ways of perceiving, thinking, and communicating, and individual behavior and personality development. Application of culture and personality findings in medical and nursing settings. EPID INTL HLTH

231. Ethnopsychiatry. (2-3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units. M. Clark, Hartog, Lauer, Maduro

Course examines principles of healing systems in the treatment of mental disorder including folk healing, cross-cultural comparisons, research methods, and implications for community psychiatry. Students study local examples of folk healers or folk healing institutions. EPID INTL HLTH

233. The Anthropology of Aging. (2-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus research project for 3 units. Staff

Cross-cultural approaches to roles, statuses, and problems of aged populations. Cultural factors influencing the condition and adaptation of the aged in American society. Topics to be covered include cultural attitudes and values, social relationships, and health problems. EPID INTL HLTH

234. Culture and Symbolic Systems. (2-3) § F. Prerequisite: Anthropology 230A or equivalent, or consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units. Maduro

Symbolic expressive behavior is considered from psychocultural life-cycle and psychoanalytic perspectives. Various projective systems are analyzed: psychological tests, dreams, folklore, myths, religious rituals, altered states of consciousness, and healing procedures. EPID INTL HLTH

235. Transcultural Aspects of Childhood. (2) § F. Prerequisite: Consent of instructor. Open to students in medicine, nursing and graduate departments. Lecture 2 hours, plus research paper. Staff

A review of child development, child rearing and family dynamics in various non-Western cultures and in selected ethnic subcultures of the United States. Cultural contexts of personality formation, deviations in development, and childhood illnesses will be discussed. EPID INTL HLTH

236. Seminar on Women and Sex Roles. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Lewin

An examination of the significance of gender in the social organization and culture of non-Western and contemporary societies, including both cross-cultural study of economic, political, and religious systems, and in-depth discussion of specific ethnographic areas. EPID INTL HLTH

238. Shamanism and Related Phenomena. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Staff

A cross-cultural survey of the practice of shamanism with emphasis on management of disease. Beliefs and practices concerning disease causation, diagnosis, and therapy will be compared with approaches used in other medical systems. Comparison of the shamanistic use of trance. EPID INTL HLTH

239. Comparative Family Systems. (3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study. Ablon

Survey of conceptual approach to family study and modes of family assessment. Structure and dynamics of varying family systems examined, emphasizing changing family forms and ways family life style and values contribute to modes of coping with stress, illness, and crisis. EPID INTL HLTH
240. Urban Anthropology. (2-3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units.  

Ablon  
The culture of modern cities. Evaluation of theories and methods for understanding urban behavior. Ethnic, racial, and subcultural pluralism in modem cities. The relevance of anthropological concepts for health planning. EPID INTL HLTH  

241. Social Devianc. (3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus field research project.  

Ablon  
A review of theory and concepts dealing with social and cultural devianc. Focus will be on deviant life styles and subcultural groups in urban areas. EPID INTL HLTH  

242. Anthropological Considerations in the Community Mental Health Field. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours.  

Ablon, Leighton  
A survey of principles and practices in the community mental health field. Emphasis is on the significance of sociocultural factors in the determination of community needs and the delivery of mental health services. EPID INTL HLTH  

Todd, Ruffini  
Cross-cultural survey of problems at law-medicine interface, including medical determinants of legal status; complementary/conflicting approaches to alcoholism, drugs, sexual conduct, therapeutic functions of social control procedures such as witchcraft, gossip; conflicts between religious beliefs and medical/legal practices. EPID INTL HLTH  

244. Legal Gerontology. (2-3) § F. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units.  

Todd, Ruffini  
A cross-cultural examination of the legal problems, needs, and behavior of the elderly, relating data from other societies to problems in the contemporary United States. Concepts, theories, and methods drawn from anthropological, legal, medical, and gerontological literature. EPID INTL HLTH  

246. Comparative Medical Systems. (2-3) § Sp. Prerequisite: Consent of instructor. Lecture 2-3 hours:  

Staff  
A comparative examination of traditional and contemporary systems of health care delivery with special attention to theories of disease including notions regarding etiology, prophylaxis, treatment and treatment settings, and the therapeutic encounter. Experience in field and clinical observation included. EPID INTL HLTH  

247. Seminar in Contemporary American Society. (3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study.  

Ablon  
A review of anthropologically oriented research on basic American values, social organization, and ethnicity. Emphasis is on socioeconomic diversity and changing institutions, values, and life styles. EPID INTL HLTH  

248. Group Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor.  

Staff  
Groups of two or more collaborate on special problems in anthropology under the direction of faculty. Students may select areas related to their long-term interest and future research program. EPID INTL HLTH  

249. Directed Reading. (1-5) § F, W, Sp. Prerequisite: Consent of instructor.  

Staff  
Independent study. EPID INTL HLTH  

Staff  
EPID INTL HLTH  

251. Seminar in Social Gerontology. (2-4) § W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units.  

C. L. Johnson, Todd  
An overview of the theoretical, empirical, and applied literature on the social processes of aging in this country. Special emphasis on health-related problems and the delivery of services to the elderly. EPID INTL HLTH  

255A-B-C. Seminar in Medical Anthropology. (2-4, 2-4, 2-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units. Intercampus seminar with UC Berkeley. M. Clark, F. Dunn  

A review of the principal fields of medical anthropology with emphasis on current research and methods. EPID INTL HLTH  

260. Epidemiology and Medical Anthropology. (2-4) § W. Prerequisite: Training in epidemiology and consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units.  

F. Dunn  
Individual or small group directed reading and discussion of epidemiological and medical ecological perspectives, methods, and findings relevant to the field of medical anthropology. EPID INTL HLTH  

263. Biological Perspectives on Growth and Development. (1) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours.  

Pawson  
Examination of the human growth process with emphasis on cellular growth and differentiation; biochemical basis of the growth process; critical periods of growth—fertilization, implantation, prenatal development, birth, early postnatal development, adolescence, senescence; and developmental adaptation and racial differences in growth. EPID INTL HLTH  

267. Nutritional Anthropology. (3) § W. Prerequisite: Consent of instructor. Lecture-Seminar 3 hours.  

C. S. Wilson  
Survey of past and current research on sociocultural and biocultural aspects of diet and
nutrition in developed and developing countries in lecture-seminar format. Methodology for nutritional anthropology field studies will be presented. EPID INTL HLTH

270. Research in Population. (2) § W. Lecture 2 hours.

Population research issues and methods, covering sources of demographic data and studies on family planning, evaluation of the impact of birth control programs on population and health, and considerations relevant to the use and acceptability of contraceptive methods. EPID INTL HLTH

297. Special Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Independent study. EPID INTL HLTH

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. EPID INTL HLTH

Biochemistry

100A-B. Cell Structure and Function. (5-5) § F, W. Prerequisite: Consent of instructor. Michaeli

Lectures and conferences in biochemistry and molecular biology presenting fundamental knowledge and illustrating its applicability to medicine. Primarily for medical students. BIOCHEM

110A-B. Cellular Structure and Function. (3-3) § F, W. Lecture 3 hours. Fineberg and Staff

Lectures in biochemistry include aspects of cell physiology and cellular ultrastructure, with some emphasis in the area of connective and mineralizing tissues. Fundamental knowledge is presented in the context of its applicability to clinical health sciences. Primarily for dental students. BIOCHEM

111. Special Study for First-Year Students. (2) E. Prerequisite: Passing of placement examination and consent of instructor. Lecture 2 hours.

Newbrun, Beirne, Bhatnagar

Discussion of biochemical problems of interest in dentistry including enamel, saliva, mineralization, connective tissue, bacterial cell walls, and oral bacterial metabolism. BIOCHEM

120A-B. Cellular Structure and Function. (4-4) § F, W. Prerequisite: Consent of instructor. Lecture 4 hours.

Rutter

Lectures and conferences in biochemistry include aspects of cell physiology and cellular ultrastructure, with some emphasis in the area of drug metabolism. Fundamental knowledge is presented in the context of its applicability to clinical medicine. Primarily for pharmacy students. BIOCHEM

150.01. Research in Biochemistry. (1½ per week) F, W, Sp. Prerequisite: Consent of instructor. Staff

Research in biochemistry. BIOCHEM

170.01. Issues in Human Nutrition. (2) W. Prerequisite: Biochemistry 100A-B. Lecture 2 hours. Offered in alternate years. Offered 1980-81.

Nestle

Course emphasizes the critical examination and analysis of the experimental evidence that relates dietary intake of specific nutrients to specific human diseases. BIOCHEM

170.02. Seminar on Current Issues in Nutrition. (1) W, Prerequisite: Biochemistry 100B or concurrent enrollment. Seminar 2 hours given in alternate weeks.

Nestle

This seminar is designed to be a serious literature-level course for students interested in an advanced study of current issues in nutrition. Students will critically evaluate and discuss current nutrition research papers. Discussion will be led by guest speakers. BIOCHEM

198. Supervised Study in Biochemistry. (1-5) § Su, F, W, Sp. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. BIOCHEM

199. Laboratory Project in Biochemistry. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. BIOCHEM

200A. Biophysics of Macromolecules. (3) § F. Prerequisite: Calculus, physical chemistry, organic chemistry, and an advanced course in biology. Lecture 3 hours.

Stroud

Fundamental principles governing the behavior of, and modern techniques for study of biological macromolecules. Topics covered include thermodynamics (entropy, equilibrium, cooperative interactions). Kinetics and catalysis: structure and function of macromolecules—DNA, membranes, proteins by X-ray and electron optics. Kinetics and structure of cooperative enzymes and systems of biological control. BIOCHEM

200B. Membranes. (1½) § W. Prerequisite: Calculus, physical chemistry, organic chemistry, introductory biochemistry, and an advanced course in biophysics. Lecture 3 hours. Kelly

Membrane architecture and biogenesis, organelle isolation, glycosylation of membrane components, endocytosis and secretion, membrane enzymes and the reconstitution of membranes. BIOCHEM

200D. Protein and Nucleic Acids. (3) § F. Prerequisite: Calculus, physical chemistry, organic chemistry, and an advanced course in biology are recommended. Lecture 3 hours. Offered in alternate years. Not offered 1980-81.

Fletterick and Staff

A comprehensive course covering the chemistry of proteins, carbohydrates and nucleic acids. Structure, sequence determination and chemical modification are emphasized. BIOCHEM
200E. Enzymology. (3) § F. Prerequisite: Calculus, physical chemistry, organic chemistry, introductory biochemistry, and an advanced course in biology, or consent of instructor. Lecture 3 hours. Offered in alternate years. Offered 1980-81.

Santi, Kenyon

Biochemically important chemical transformations from the physical organic point of view, emphasizing catalytic mechanisms pertinent to enzymic reactions, and to the development of enzyme model systems. Interimolecular forces and enzyme substrate interactions. Techniques of investigating enzyme mechanisms and kinetics. BIOCHEM

201A-B. Molecular Genetics. (1½, 3) § W, Sp. Prerequisite: Calculus, physical chemistry, organic chemistry, introductory biochemistry and an advanced course in biology. Lecture 3 hours.

O’Farrell, Alberts, H. M. Goodman, Sedat

Discussion of the discovery of principles forming the foundation of molecular biology and recent advances in rapidly developing areas of the field. Topics covered include RNA transcription, protein translation, DNA replication, control mechanisms, and genome structure and organization. BIOCHEM

202. Computation and Data Analysis in Biochemistry and Biophysics. (3) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours.

Martinez

Computer-aided mathematical methods for extracting information from numerical and non-numerical data. Elements of error analysis, parameter estimation, equation solving, signal analysis and word processing, with applications at the research level. Supportive instruction in a structured programming language. BIOCHEM

203. Introduction to Biomathematics. (3) § Sp. Lecture 3 hours.

Martinez

Mathematical modeling of enzyme kinetics, metabolic and hormonal control mechanisms, cooperative interactions of macromolecules, diffusion, passive and active transport, membrane models, excitation and conduction, flow, irreversible thermodynamics. Course offers experience in problem formulation and reading of current literature. BIOCHEM

207. Biochemistry of Connective Tissues. (2) § W. Prerequisite: Biochemistry 110A-B or equivalent and consent of instructor. Lecture 2 hours. Offered in alternate years. Offered 1980-81.

Newbrun

Lectures and assigned reading on chemistry, structure, and metabolism of the mucopolysaccharides, collagen, and elastin. Principles of histochemical reactions of connective tissues. BIOCHEM

Staff

Discussion of selected areas in biochemistry, biophysics, and biomathematics. BIOCHEM

C. Guthrie

A laboratory rotation course to familiarize new departmental graduate students with various approaches to biochemical and biophysical research. BIOCHEM

Martinez

Lectures and discussion on topics of current interest in biochemistry and biophysics. BIOCHEM

Staff

Presentations of selected topics in biochemistry by graduate students in the Department of Biochemistry. BIOCHEM

Stroud

Principles of X-ray crystallography applicable to protein structure analysis will be presented in a course oriented toward research level understanding of the field. Course will involve group participation and some experimental work. BIOCHEM

Staff

BIOCHEM

Staff

Reading and conferences for properly qualified students under the direction of a member of the staff. BIOCHEM

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

Staff

For graduate students engaged in writing the thesis for the master's degree. BIOCHEM

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. BIOCHEM

Biomathematics

Jendresen

Students are introduced to the physics, chemistry, and metallurgy of materials used in dentistry and how use effects physical and chemical properties of materials. The materials studied are gypsum, cements, resins, waxes, colloids, and metals. RESTOR DENT

120. Biomaterials Science. (1) W. Lecture 1 hour.

Jendresen

Students are presented with the rationale for the use of clinical restorative materials. Each major restorative material system is studied in respect to material manipulation and clinical application. RESTOR DENT

Jendresen
Students are taught to analyze accurately clinical and laboratory problems with respect to major material systems. Emphasis is placed on understanding why clinical failures occur with selected materials and what biological responses can be expected. RESTOR DENT

156. Dental Materials Survey. (1) Sp. Lecture 1 hour. Lab 1 hour. Bertolotti

An introduction for the dental hygienist to the basic concepts associated with selected dental materials. Emphasis is placed on the use and manipulation of materials commonly used in the practice of dentistry. RESTOR DENT

A survey of current research in the dental materials field, including evaluations of recently introduced materials and a review of the limitations and indications for all basic materials commonly used. RESTOR DENT

181A-B. Current Concepts in Dental Porcelain. (1) F, W. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 1 hour. Lacy

Introduction to advanced principles and techniques pertinent to the fabrication of fixed porcelain and porcelain-metal prostheses. A combination of lecture, clinical, and laboratory exercises will present new materials, equipment, and procedures to students. RESTOR DENT

199. Laboratory Project in Biomaterials. (1-5) F, W, Sp. Prerequisite: Third or fourth year standing and approval of the Dean. Lecture 1 hour. Lab 0-12 hours. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

Biomathematics

180. Algebra and Calculus for Biomedical Use. (3) § Su. Prerequisite: Consent of instructor. Licko

Mathematical concepts and processes for planning, representation, and analysis in biomedical research. Review of algebraic operations, equations, matrices, and graphs. Introduction to functions, sequences, convergence, derivatives, integrals, and infinite series. Applications to growth, binding, enzyme kinetics, tracer studies, population dynamics. BIOCHEM

189. Introduction to Differential Equations for Biomedical Applications. (3) § W. Prerequisite: Introductory calculus. Lecture 3 hours. Glantz

Course covers description of biomedical processes such as cardiovascular physiology, pharmacokinetics, instrumentation with ordinary differential equations; direct methods to solve equations and interpret the results; linearity origins of exponential, natural logarithm, sine and cosine functions; eigenvalues, time constants, and half-times. MEDICINE

190. Biological Modeling Through Differential Equations. (3) § F. Prerequisite: Biomathematics 180 or equivalent. Lecture 2 hours. Lab 3 hours. Licko

Development of intuitive notions regarding differential equations. Quantitative and qualitative aspects of differential equations are explored by analog, digital, and analytic techniques. Applications to selected problems in compartmental analysis, enzyme and drug kinetics, and metabolic and biological control dynamics. BIOCHEM

191. Biomedical Applications of Laplace and Fourier Transforms. (3) § Sp. Prerequisite: Biomathematics 189 or equivalent. Lecture 3 hours. Glantz

Course covers laplace transform and numerical solutions of differential equations; fourier transform and spectral analysis of biological signals; impulse, step, and frequency response; introduction to curve fitting; examples from pharmacokinetics and common laboratory instrumentation. MEDICINE

193A-B-C. Advanced Calculus and Differential Equations. (3-3-3) § F, W, Sp. Lecture 3 hours. Martinez

198. Supervised Study in Biomathematics. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Martinez and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the division. BIOCHEM

214. Endocrine Dynamics. (3) § W. Prerequisite: Biomathematics 193A-B-C, or equivalents, or consent of instructor. Licko

Review of relevant parts of compartmental and tracer analysis and control theory. Analysis of dynamics of secretory process, distribution, binding and metabolism of hormones, and hormonal control. Differential equations and both analog and digital computers are utilized throughout the course. BIOCHEM

Biophysics

13See Biochemistry 202 and 203.

14See the Biophysics and Medical Physics Group Program in the Graduate Division Bulletin.
Biostatistics

Course will cover frequency distributions, graphs, centiles, averages, variability, standard deviation, probability, the binomial distribution, standard scores, the normal curve, sampling, testing hypothesis differences between the means, correlational techniques, and linear regression. PERIODONT

161. Research Design and Evaluation. (2) F. Prerequisite: Biostatistics 151. Lecture 2 hours.

Chi-square, analysis of variance, significance of correlation coefficients, reliability, validity, stem analysis, and other statistical tests. Introduction to research and research articles, individual research, and a written report. PERIODONT

180.03. Introductory Statistical Treatment of Clinical and Laboratory Problems. (2-3) § F, W, Sp. Lecture 2 hours. Lab optional 0-3 hours. Equivalent to Epidemiology and International Health 180.03.

Basic concepts and techniques for the planning and analysis of clinical studies and scientific experiments. Introduction to statistical techniques to summarize qualitative and quantitative data and to draw inferences, taking into account the design and execution of the investigation. EPID INTL HLTH

190. Introduction to Biostatistics. (3) § F. Lecture 3 hours.

Principles of collection and tabulation of data; measures of morbidity, mortality, and health sciences; standardization techniques; planning of surveys; descriptive and inferential statistics. EPID INTL HLTH

191B-C. Introduction to the Theory of Statistics. (2-2) § W. Prerequisite: Differential and integral calculus or consent of instructor. Zippin

Introduction to probability, distribution theory, and stochastic processes in biology and medicine. EPID INTL HLTH

197. Introductory Statistics. (3) § F. Lecture 2 hours. Lab 3 hours.

An introduction to probability and statistical inference including topics such as analysis of variance, simple linear regression, and analysis of discrete data. The laboratory focuses on use of the computer in statistical computations. EPID INTL HLTH

202. Regression, Analysis of Variance, and Design of Experiments. (4) § W. Prerequisite: Biostatistics 197. Lecture 3 hours. Lab 2 hours.

This course considers analysis of variance and covariance, regression, and statistical design of experiments. EPID INTL HLTH

230A. Linear Models and Experimental Design. (4) § W. Prerequisite: Biostatistics 197 or equivalent, and one year of calculus. Lecture 3 hours. Lab 3 hours. Equivalent to Medical Information Science 230A.

Techniques for designing and analyzing data from experiments and observational studies, using the methodology of linear regression and the analysis of variance. Laboratory emphasizes computerized data analysis of clinical data. EPID INTL HLTH

230B. Linear Models and Experimental Design. (2 or 3) § Sp. Prerequisite: Biostatistics 230A. Lecture 1½ or 2½ hours. Lab 1½ or 2½ hours. Equivalent to Medical Information Science 230B.

Chemistry

11. Organic Chemistry. (3) F. Prerequisite: Chemistry 1A-B-C or equivalent. Lecture 3 hours.

An introductory study of the structure, stereochemistry, reactivity, and functionality of compounds of carbon. PHARM CHEM

12. Organic Chemistry. (3) W. Prerequisite: Chemistry 11. Lecture 3 hours.

Ketcham, R. B. Meyer

A continuation of the study of compounds of carbon including some aromatic compounds. PHARM CHEM

16. Organic Chemistry—Laboratory. (2) W. Prerequisite: Chemistry 11. Lecture 1 hour. Lab 3 hours.

Oppenheimer

Laboratory techniques in organic chemistry. The preparation and study of organic compounds, with an introduction to quantitative organic analysis. PHARM CHEM
113. Organic Chemistry. (3) F, Sp. Prerequisite: Chemistry 12. Lecture 3 hours. **Staff**

A continuation of the study of compounds of carbon including some aromatic, hydroaromatic, and heterocyclic compounds. PHARM CHEM

115. Physical Chemistry. (5) F. Prerequisite: Chemistry 5 or equivalent laboratory course in quantitative analysis and differential and integral calculus. Lecture 4 hours. Conference and demonstration 3 hours. **Kuntz, Shafer**

Elementary physical chemistry with emphasis on thermodynamics. PHARM CHEM

116. Physical Chemistry. (2) W. Prerequisite: Chemistry 115 or equivalent. Lecture 1 1/2 hours. Conference and demonstration 1 1/2 hours. **Shetlar**

Elementary physical chemistry with emphasis on chemical kinetics. PHARM CHEM

117. Organic Chemistry—Laboratory. (2) F, Sp. Prerequisite: Chemistry 12, 16, and concurrent enrollment in Chemistry 113, or consent of instructor. Conference 1 hour. Lab 4 hours. **Ketcham**

Laboratory experiments in identification and quantification of organic substances. PHARM CHEM

151. Physical Chemistry. (1-3) Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. **Shafer, Shetlar**

Selected topics at an introductory level, which vary from year to year. Past topics included structure of nucleic acid and proteins, quantum chemistry, and spectroscopy. PHARM CHEM

155. Chemical Toxicology. (2) F. Lecture 1 hour. Lab 3 hours. **K. H. Lee**

The methods of chemical detection and analysis of the common poisons. Usually open to third- and fourth-year students. PHARM CHEM

158. Physical Chemistry—Laboratory (1) Sp. Prerequisite: Chemistry 115 and 116. Lab 3 hours. **Shafer, Shetlar**

Laboratory exercises in spectroscopy. PHARM CHEM

160. Advanced Physical Chemistry. (3) § W. Prerequisite: Two quarters of physical chemistry or consent of instructor. Lecture 3 hours. **Kuntz**

Chemical thermodynamics. PHARM CHEM

161. Advanced Physical Chemistry. (3) § Sp. Prerequisite: Chemistry 116 or equivalent. Lecture 3 hours. **Shetlar**

Theory and applications of chemical kinetics. PHARM CHEM

162. Advanced Physical Chemistry. (4) § F. Prerequisite: Chemistry 151 or equivalent. Knowledge of differential equations recommended. Lecture 4 hours. **Kollman**

Quantum mechanics and applications to molecular problems. PHARM CHEM

165. Organic Chemistry—Analytical Methods. (4) § F. Prerequisite: Chemistry 113. Lecture 1 hour. Lab 9 hours. **Weinkam**

A study of the reactions of organic compounds by applying a system of qualitative analyses to the determination of characteristic groups. PHARM CHEM

170. Group Studies Course. (1-4) F, W. Sp. Prerequisite: Consent of instructor. **Staff**

Group studies of selected topics in chemistry. PHARM CHEM

198. Supervised Study in Chemistry. (1-5) F, W, Sp. **Staff**

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

199. Laboratory Project in Chemistry. (1-5) F, W, Sp. **Staff**

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

202. Advanced Organic Chemistry. (3) § Sp. Prerequisite: Chemistry 113, 116, and 165 or equivalent. Lecture 3 hours. **Oppenheimer**

A study of the detailed processes associated with organic reactions. PHARM CHEM

203. Advanced Organic Chemistry. (3) § W. Prerequisite: Chemistry 113, 115, and 165 recommended. Lecture 4 hours. **Ortiz de Montellano**

Physical organic chemistry; the structure of molecules and its relationship to mechanisms of reaction. PHARM CHEM

204. Organic Chemistry: Reactions and Synthetic Methods. (2) § F. Prerequisite: Chemistry 113 and 165 or equivalent. Lab 6 hours. **J. Craig**

A course in advanced laboratory work exemplifying the major reactions and newer synthetic methods used in organic chemistry. PHARM CHEM

205. Recent Advances in Synthetic Methods. (2) § F. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 2 hours. **J. Craig**

Recent advances in synthetic methods, comprising specific oxidizing agents, specific reducing agents, and other specific reagents. PHARM CHEM

208. Advanced Organic Chemistry. (3) § Sp. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 3 hours. **J. Craig, M. Wolff**

Terpenes and steroids. Occurrence, chemistry, stereochemistry and structure-function relationships of natural products such as carotenoids, fat-soluble vitamins and steroids, and their precursors. PHARM CHEM

209. Chemistry of Heterocycles. (3) § Sp. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 3 hours. **J. Craig, Kenyon**

A survey of the main nitrogen, oxygen, and sulfur-containing heterocycles. PHARM CHEM
Clinical Dentistry

Responsibility for patient dental care in the wards and comprehensive clinic under the direction of the attending staff. Dental consultations and treatment are coordinated with medical care. Residents take histories and perform physical examinations, laboratory tests, and dental treatment. ORAL MED

Clinical Laboratory Science

201A-B-C. Clinical Chemistry. (2-2-2) § F, W, Sp. Prerequisite: Degree in Chemistry or Medical Technology license. Lecture 2 hours. Nussenbaum
Principles and evaluation of chemical laboratory methods used to diagnose abnormalities in metabolism and organ function. LAB MED

207. Enzymology. (2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Farina
The fundamental concepts of enzyme kinetics are reviewed; enzyme measurement and automation; enzyme profiles in various diseases and specific enzyme methodology are presented. LAB MED

209. Quality Control. (2) § F, W. Prerequisite: Enrollment in Clinical Laboratory Science master's program. Barr
A review of principles of statistics and their application to quality control in the clinical laboratory; legal aspects of quality control, preventive maintenance. LAB MED

210A-B. Clinical Pathology Seminars. (1-1) § F, W. Prerequisite: Consent of instructor. Seminar 1 hour. Staff
Specialists on various established and proposed laboratory tests will present interpretation and evaluation of tests as related to pathophysiology. LAB MED

211. Computer Applications in the Clinical Laboratory. (2) § W or Sp. Prerequisite: Enrollment in Clinical Laboratory Science master's program. Lecture 2 hours. Barr
Applications of computer science in collecting, storing, analyzing, and reporting data in a clinical laboratory. Statistical quality control methods will be discussed. Practical computer programming instruction and experience, using FORTRAN, will be stressed. LAB MED

215. Clinical Toxicology. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. P. Reynolds, McKenie
Course introduces students to the implications as well as the systematic schemes and specific techniques of volatiles, acidic, neutral, and basic drugs, metals, and miscellaneous drugs and toxic agents encountered in clinical and forensic laboratories. LAB MED

216. Clinical Toxicology Laboratory. (2) § Sp. Prerequisite: Consent of instructor. Nussenbaum
Course is given as a three-week traineeship program in one of the most active toxicology laboratories in the Bay Area. LAB MED

Principles of clinical laboratory methods for diagnosis of infectious disease will be reviewed. Newer detection methods such as immunofluorescence, radioimmunoassay, gas chromatography will be examined. In vitro methods of susceptibility testing and assay of antimicrobials will be discussed.

250. Research. (1-8) § Su, F, W, Sp. Staff LAB MED

254. Clinical Immunology. (2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Hadley
Principles of antigen-antibody reactions and the evaluation of their utility in the diagnosis of disease. The role of cellular and humoral immunity in host defenses against infections. LAB MED

298. Thesis. (0) § Su, F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the thesis for the master's degree. LAB MED

Clinical Pharmacy

110. Orientation in Pharmacy. (2) F Conference and field observation 3-4 hours. R. Levin
An introduction to the scope of pharmaceutical practice including field trips to and participation in various settings where the pharmacist and patient interact. CL PHARM

130. Clinical Pharmacy. (5) F Prerequisite: Successful completion of all required first- and second-year courses or consent of instructor. Lecture 4 hours. Conference 2 hours. Winter, Kimble, Benet
Orientation to selected areas of medical practice, the clinical evaluation and comparison of drugs used in these areas, and the biopharmaceutics of drug combinations and products. CL PHARM

131. Clinical Pharmacy. (6) W. Prerequisite: Clinical Pharmacy 130 or consent of instructor. Lecture 5 hours. Conference 2 hours. L. Davis
Continuation of Clinical Pharmacy 130. CL PHARM

132. Clinical Pharmacy. (7) Sp. Prerequisite: Clinical Pharmacy 131 or consent of instructor. Lecture 6 hours. Conference 2 hours. Barriere and Staff
Continuation of Clinical Pharmacy 131. CL PHARM
135. Preclerkship Orientation and Drug Information Analysis Service (DIAS) Rotation. (3) F, W, Sp. Prerequisite: Third year standing. Concurrent or subsequent enrollment in Clinical Pharmacy 130, 131 or 132. Hart, Shimomura

Orientation to clinical services, including patient interview techniques and monitoring, training and actual experience in literature retrieval, and analysis and dissemination of drug information. CL PHARM

148A. Inpatient Clinical Clerkship. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132, and 135, and Pharmacology 136. Passing grade in the Clinical Pharmacy 130 series comprehensive examination. Clinic 40 hours per week for six weeks. Kayser and Staff

Supervised clinical pharmacy experience in an inpatient setting. Students develop and explore their roles in an interdisciplinary health care team, take medication histories, monitor drug therapy, provide patient education, and research patients' specific drug information questions. CL PHARM

148.01A. Inpatient Clinical Clerkship at San Diego. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132, and 135, and Pharmacology 136. Passing grade in the Clinical Pharmacy 130 series comprehensive examination. Clinic 40 hours per week for six weeks. Adler and Staff

Supervised clinical pharmacy experience in an inpatient setting. Students develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy, and provide patient education. Experience in community pharmacies. CL PHARM

148.01B. Inpatient Clinical Clerkship at San Diego. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 148A. Clinic 40 hours per week for six weeks. Adler and Staff

Continuation of Clinical Pharmacy 148.01A or Clinical Pharmacy 148A. CL PHARM

149A. Ambulatory Externship Clerkship. (6½) SS, F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132, and 135, and Pharmacology 136. Passing grade in the Clinical Pharmacy 130 series comprehensive examination. Clinic 36 hours per week for six weeks. Clossom and Staff

Supervised clinical experience in an outpatient setting. Students develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy, and provide patient education. Experience in community pharmacies. CL PHARM

149.01A. Ambulatory Externship Clerkship at San Diego. (6½) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132, and 135, and Pharmacology 136. Passing grade in Clinical Pharmacy 130 series comprehensive examination. Weibert and Staff

Supervised clinical experience in an outpatient setting. Students develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy, and provide patient education. Experience in community pharmacies. CL PHARM

149B. Ambulatory Externship Clerkship. (6½) SS, F, W, Sp. Prerequisite: Clinical Pharmacy 149A. Clinic 36 hours per week for six weeks. Clossom and Staff

Continuation of Clinical Pharmacy 149A. CL PHARM

149.01B. Ambulatory Externship Clerkship at San Diego. (6½) F, W, Sp. Prerequisite: Clinical Pharmacy 149.01A or 149A. Weibert and Staff

Continuation of Clinical Pharmacy 149.01A or 149A. CL PHARM

155.10. Pharmacy Systems. (3) F, W, Sp. Prerequisite: Third year standing or higher. Lecture 1 hour. Conference and special project 6 hours. Herfindal

Orientation to inpatient and outpatient pharmacy systems. Projects in design, justification and implementation of distribution systems, such as unit dose, intravenous additive services, computer applications, will be the major grading criteria. CL PHARM

155.20. Problems in Drug-Induced Diseases. (3) F, W, Sp. Prerequisite: Pathology 135. Third year standing or higher. Lecture 2 hours. Special project 4 hours. Tong

The phenomena of iatrogenic diseases will be studied with major emphasis on their significance, pathology and management. Assessment of collection and analytic methods of adverse drug reaction information and evaluation of literature will be considered. Special projects will be assigned. CL PHARM

155.30. Topics in Infectious Diseases. (3) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor. Lecture and seminar 3 hours. Barriere

Course provides students with intensive, systematic approaches to management of patients with selected infectious diseases. Emphasis is on controversies in management. Infectious diseases in specialized circumstances also included. CL PHARM

155.40. I.V. Fluid Therapy at Mary's Help Hospital. (2) Sp. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor. Seminar 4 hours. M. Kimble, Kotabe, Rupp

Seminar to review case presentations with fluid and electrolyte problems. Students are responsible for preparation and leading of conferences on a rotational basis. Special project is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM
170. **Group Studies.** (1-4) F, W, Sp. Prerequisite: Consent of instructor.  
Group studies of selected topics in clinical pharmacy. CL PHARM

175.01. **Inpatient Pediatrics at UC.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **Reale**  
Students participate in the activities of the Inpatient Pediatrics Service. Activities include reviewing patients' charts, monitoring patients' response to drug therapy; attendance at conferences, seminars and rounds; and participation in selected therapeutic consultations. CL PHARM

175.02. **Renal Medicine at UC.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **Gambertoglio**  
Students participate in the activities of the Renal Medicine Service, including patient monitoring, attendance at conferences, seminars and rounds, and application of pharmacokinetics to drug therapy. Where appropriate, students prepare detailed consultations regarding individual patient therapy. CL PHARM

175.03. **Infectious Disease at UC.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **Barriere**  
Students review Infectious Disease Service therapeutic consultations and evaluate patients' response to recommended therapy by following chart records and by direct interviews. Students attend conferences, seminars and rounds. Special projects assigned. CL PHARM

175.04. **Clinical Pharmacokinetics at UC.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. **Winter**  
Students participate in the clinical service of the Clinical Pharmacokinetics Laboratory. Course includes selecting patients to be monitored, preparation and presentation of reports, attendance at seminars, and experience in leading one. CL PHARM

175.20. **Pediatrics at K.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **M. Kimble, Pigeon**  
Students participate in the activities of the Inpatient Pediatrics Service. Activities include routine review of patients' charts, providing therapeutic consultations where appropriate, monitoring patients' response to drug therapy, attendance at conferences, seminars and rounds. Special projects assigned. CL PHARM

175.21. **Pediatric Specialty Clerkship at SFGH.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **R. Levin**  
Students participate with pediatric staff dealing with problems frequently encountered in general pediatric medicine, in addition to those which afflict children from low income, overcrowded and substandard conditions. Activities include rounds, conferences and participation in special projects. CL PHARM

175.22. **Infectious Disease at VAM.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **M. Kimble, Woo, Gee**  
Students gain experience on the Infectious Disease Consult Service. Activities include rounds, medication consultations and provision of pharmacokinetic monitoring. CL PHARM

175.25. **Inpatient Medical Services at VA.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **M. Kimble, Nagata and Staff**  
Experience in various medical services at VA. Activities include interviewing patients, monitoring drug therapy, consultation with house staff, and participation in conferences, seminars and rounds. Special projects assigned. CL PHARM

175.28. **Medicine at MM.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **M. Kimble, Chann**  
Experience in various medical services at a private community hospital. Students interview patients, monitor drug therapy, consult with house staff and nursing service, and prepare drug information reports appropriate to patient care. CL PHARM

175.30. **Clinical Pharmacology at SFGH.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **Tong**  
Students, in an interdisciplinary setting, assess clinical problems relating to the selection, pharmacodynamics and therapeutic merits of drugs and drug products. Activities include participation in rounds and conferences, collaboration on selected consultations, and retrieval and evaluation of drug literature. CL PHARM

175.31. **Clinical Pharmacology at S.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **M. Kimble, Nagata and Staff**  
Students participate in the activities of the Division of Clinical Pharmacology. Activities include utilization of computerized patient drug profiles to monitor adverse drug reactions, and participation in conferences and seminars. Special projects assigned. CL PHARM

175.40. **Thyroid Clinic at UC.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **Dong**  
Students participate in the activities of the Thyroid Clinic, including patient monitoring, attendance at conferences and seminars. Work under supervision of the clinical pharmacist and physicians in the chronic management of selected patients. CL PHARM

175.41. **Dermatology Clinic at UC.** (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132, and Pharmacy 155. Consent of instructor. **McCarr**  
Experience in various subspecialty areas in the Dermatology Clinic. Students take medication histories, and instruct patients on proper medicac-
tion usage. They participate in conferences, seminars and rounds, and provide therapeutic consultations where appropriate. Special projects are assigned. CL PHARM

175.42. Obstetrics and Gynecology Clinic at UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. M. Kimble, Ruggiero

Experience in various subspecialty areas in the Obstetrics and Gynecology Clinic. Students work with other health professionals and students in the clinic, participating in conferences and seminars. Prepare detailed consultations regarding drug therapy where appropriate. CL PHARM

175.43. Diabetes Clinic at UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. M. Kimble, Mangini

Students participate in the activities of the Diabetes Clinic, including patient education, drug therapy consultation and management, and attendance at conferences and seminars. At option of student, a special project may be undertaken in addition to regular clinic activities. CL PHARM

175.44. Tropical Medicine Clinic at UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Kayser

Students participate in the activities of the Tropical Medicine Clinic. Emphasis is placed on patient interviews and rational treatment of parasitic diseases. Special project is optional. CL PHARM

175.45. Anticoagulation Clinic at UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Kayser

Students participate in the activities of the Anticoagulation Clinic. Special project is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

175.46. Hematology-Oncology Clinic at UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Ignoffo

Students participate in the daily activities of the Hematology-Oncology and/or Oncology Clinics. Special project is required. CL PHARM

175.47. Rheumatology Clinic at UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. A. L. Leeds

Students participate in the activities of the Rheumatic Disease and/or Arthritis Clinics. Special project is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

175.60. Clerkship at Ross Valley Pharmacy. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. M. Kimble, Lofholm

Students interview patients, maintain medication records, explain medication usage to patients, and answer drug therapy questions generated by physicians, pharmacists and patients in a pharmacy located within a group medical practice. CL PHARM

175.61. Clerkship at Co-op Pharmacy in Berkeley. (1-8) Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. M. Kimble, Kamil, Olayos

Students take patient medication interviews, explain medication usage to patients, and answer drug therapy questions generated by physicians, pharmacists and patients in a community pharmacy setting. CL PHARM

Students collect data for a problem-oriented medication record, dispense medication, educate patients as to proper medication usage and provide drug therapy recommendations for patients assigned to the pharmacists for chronic therapy management. CL PHARM

Students work with the clinical pharmacist to evaluate psychiatric patients' response to drug therapy, and present consultations reviewing overall patient therapeutic management in weekly seminars. CL PHARM

175.64. Clerkship at Haight-Ashbury Heroin Detoxification Unit. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. M. Kimble, Inaba

Students work as co-therapists under the supervision of the clinical pharmacist and physicians to develop individual therapy plans for drug detoxification. Where needed, students develop detailed drug information reports appropriate to specific patient care. CL PHARM

Practical experience in a hospital-owned community pharmacy offering progressive patient-oriented services, including drug monitoring, establishment and maintenance of medical profiles, patient counseling, drug information and inservice education. CL PHARM

175.66. Rockridge Medical Care Center in Oakland. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132 and/or consent of instructor. M. Kimble, Stalker, Gonsalves

Students participate in delivery of pharmacy services in a HMO-prepaid health plan. Assess disease control, monitor therapy for patients with chronic diseases. Prepare drug bulletin articles. Involvement in patient education programs. CL PHARM

McSweeney

Students participate in I.V. fluid therapy selection and preparation, and monitor patients receiving intravenous medications. Conferences are held on topics related to problems in the use of intravenous fluid therapy in various disease states. CL PHARM

175.81 Clerkship in I.V. Additives Services at Mary's Help Hospital. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. M. Kimble, Kotabe, Rupp

Students participate in the preparation of I.V. irrigation and inhalation solutions, and are exposed to various types of I.V. equipment. Conferences are held on topics related to the clinical use of parenteral therapy and drug distribution systems. CL PHARM

175.82. I.B. Additives at VA. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. M. Kimble, Kikugawa

An introduction to the administrative, professional and technical aspects of establishing and maintaining an I.V. additive service. Students will participate in workshops and conferences. CL PHARM

175.83. I.V. Additives and Unit Dose at VAM. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. M. Kimble, Woo, Gee

Students participate in centralized I.V. admixture and unit dose systems of distribution, with involvement in the decentralized clinical activities, including patient profile reviews. CL PHARM

175.84. Drug Utilization Review at VAM. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. M. Kimble, Hirschmann, Forni

Students observe and participate in a business-professional environment to understand the role of such an organization in delivery of optimal, cost-effective health care. Special emphasis on delivery of pharmaceutical services. CL PHARM

176.01. Clerkship in Nephrology at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01 or 149.01A and 149.01B. D. Adler and Staff

Students participate on the Renal Consult Service, Hemodialysis Unit and in the Renal Clinic with the medical and nursing staff. A special project selected by the student will be required. CL PHARM

176.02. Clerkship in Pulmonary Medicine at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01 or 149.01A and 149.01B. D. Adler and Staff

Students participate in the activities of the Pulmonary Medicine Consult Service, chest clinic and asthma clinic associated with the Pulmonary Division at University Hospital. CL PHARM

176.03. Clerkship in Neonatal Care at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B. D. Adler and Staff

Students participate in the nursery's morning work rounds, attending high risk infant transportation and delivery. Students will read and evaluate current neonatal literature, and provide drug related information to medical staff and parents. CL PHARM

176.04. Clerkship in Pediatric Medicine at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B. D. Adler and Staff

Students participate in the activities of the Inpatient Pediatric Service. Activities include routine review of patients' charts, monitoring patients' response to drug therapy, attendance at conferences, seminars and rounds, and participation in selected therapeutic consults. CL PHARM
176.05. Clerkship in Psychiatry at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler and Staff**

Students participate on the Inpatient Psychiatric Service. A special project will be required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

176.40. Clerkship in Anticoagulation at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**Weibert and Staff**

Students participate in the services of the anticoagulation clinic at University Hospital, under the guidance of a clinical pharmacist. CL PHARM

176.41. Clerkship in Hematology-Oncology at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler, P. Lee**

Students participate in the activities of the Hematology-Oncology Consultation Service. Activities include review of patients’ charts, monitoring patients’ response to drug therapy, attendance at conferences, seminars, rounds and clinics, participation in therapeutic consultations and a special project. CL PHARM

176.42. Clerkship in Hypertension Clinic at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**Weibert and Staff**

This hypertension clerkship is an outpatient, six-week elective requiring students to become actively involved in one clinic day per week, as well as in one student-preceptor conference per week. CL PHARM

176.80. Clerkship in Intravenous Fluid Additive Therapy at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler and Staff**

Students participate in the activities of the Intravenous Additive Service at University Hospital. A special project will be required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

176.81. Clerkship in Drug-Poison Program at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**Manoguerra and Staff**

Students participate in the services provided by the Drug-Poison Information Center for the San Diego County. CL PHARM

176.82. Clerkship in Anticoagulation at Veterans Administration Hospital in San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler and Staff**

Students participate in the services of the Anticoagulation Clinic, under the guidance of a clinical pharmacist. CL PHARM

182. Public Health Programs. (2) Sp. Prerequisite: Third- or fourth-year standing for Pharmacy students (required course); consent of instructor for other students. Lecture 2 hours.

**Besse, Herfindal**

Survey of major world health problems, and programs and agencies concerned with their control. Relationships of pharmacy to topics such as emergency medical services, communicable diseases, nutrition, sanitation, occupational health, maternal and child hygiene, mental health and public health administration. CL PHARM

185.23. Inpatient Medicine Clerkship at Santa Rosa Community Hospital. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **Kishi, G. Dennis**

Students attend rounds, interview patients and take medical histories, monitor and evaluate drug therapy, anticipate and identify drug therapy problems, provide patient-specific information to health team members, provide drug and health information to patients, document clinical services. CL PHARM

Students attend rounds, make recommendations to physicians, take medical histories and follow patient progress, participate in interdisciplinary team meetings for primarily acutely psychotic patients. CL PHARM

185.26. Infectious Disease at SFGH. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **Tong**

Students attend rounds with the Infectious Disease Service, evaluate antibiotics selection and patients, response to therapy, serve as drug consultants to medical staff on the service. A special project relating to some aspect of infectious disease and its therapy will be completed. CL PHARM

185.29. Inpatient Medical-Surgical Clerkship at Davis Community Hospital. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **M. Kimble, Rolston, Fernandes**

Students experience clinical pharmacy and applied therapeutics in a small rural community hospital. Emphasis is placed on medical management of frequently encountered disease states, rational drug selection, dosing, recognition of clinically significant toxic and/or therapeutic drug effects. CL PHARM

185.33. Family Practice Inpatient and Outpatient Services at SFGH. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. **Dong**

Students participate in activities of the Family Practice Inpatient Service. Activities will continue in the Family Practice Outpatient Service, if applicable. Students present conferences to medical staff, and are responsible for a minimum of five written drug consultations per clerkship. CL PHARM
185.34. Psychopharmacology Clerkship at Atascadero State Hospital. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

M. Kimble, Hudgins, Raleigh, R. O'Brien

Students participate in the clinical activities of the Pharmacy Department. A special project is required, the subject of which shall be chosen by the student, with the advice and consent of the preceptor. CL PHARM

185.35 Inpatient Psychiatry at VAM. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Woo, Gee

Students participate in the activities of the Inpatient Psychiatry Service. Upon completion, students shall demonstrate the ability to function as a clinical pharmacist in an inpatient psychiatric setting. CL PHARM

185.36. Inpatient Clerkship at Sonoma State Hospital (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 & 132. Consent of instructor.

M. Kimble, H. Leung

Students participate in activities of a long-term care state hospital for developmentally disabled, including drug therapy monitoring, drug utilization reviews, ward clinical experiences, in-service conferences. Work under supervision of clinical pharmacist in the chronic management of institutionalized patients. CL PHARM

185.37. Inpatient Psychiatry Services at VA. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Buffum, Lienesberg

Students participate in the inpatient acute care psychiatric ward. Activities include monitoring and interviewing patients, participation in team meetings and conferences, and presenting on in-service program to psychiatric staff. CL PHARM

M. Kimble, Robertson

Students interview patients, monitor drug therapy, provide nursing in-service education, provide drug information consultations to physicians, and conduct drug utilization and adverse drug reaction studies. Students continuously document activities and findings and submit a written report. CL PHARM

185.68. Senior Citizens' Pharmacy Education Program. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 & 132. Consent of instructor.

M. Kimble, K. Eng, L. Eng

Students offer clinical pharmacy services such as hypertension screening, patient health education, and establishment and review of patient profile systems to senior citizens in five community senior health and drug information centers located in local community pharmacies. CL PHARM

185.69. Skilled Nursing Facility Clerkship at Pharmcare Services. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B.

M. Kimble, J. Kaufman, Caron

Students participate in activities of a skilled nursing facility pharmacy practice. Included are clinical and dispensing activities in the twelve facilities in the Sacramento area, as well as the legal responsibilities of the pharmacist as consultant in skilled nursing facilities. CL PHARM

185.71. Ambulatory Care Clinics Clerkship at SFGH. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132, physical assessment laboratory and/or consent of instructor.

M. Kimble, R. Conte

Students practice in adult specialty clinics, including anticoagulation, cardiac, chest, hypertension and medical screening clinics. Students consult with physicians and patients about drug therapy, provide limited primary care under the supervision of a physician, and obtain drug histories. CL PHARM

185.72. Chronic Pain Management Clerkship at OC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Furtado, Icaza

Students participate in activities of the pain center. Attention is directed to management of chronic pain. A special project or paper is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

M. Kimble, H. Holmes

Students function in the I.V. Additive Service of the pharmacy. Includes preparation of intravenous fluids for patients, monitoring individual patient therapies, attending and participating in clinical conferences, and consulting with physicians on specific therapies. Students work under supervision of the clinical pharmacist. CL PHARM

McCart

Students design a prospective drug utilization review study. After receiving introductory material about purpose and value of such studies, students gather, evaluate and interpret data for a final written report suitable for publication in the Hospital Pharmacy Bulletin. CL PHARM

186.59. Developmental Clinical Pharmacy Clerkship in Various Medical Specialty Clinics at San Diego. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B. Consent of instructor.

D. Adler and Staff

Exploration of the potential service roles of clinical pharmacists in various medical specialty settings. CL PHARM

D. Adler, de Forest

Students participate at the Clinica under the direction of the clinical pharmacist at the main facility, and at three satellite locations. Included are hypertension, diabetes, obstetrics and gynecology, pediatrics and general medicine clinics. CL PHARM

Herfindal, Beste, and Staff

Residents provide pharmacy service to patients in the wards and outpatient clinics including taking drug use histories, preparing and monitoring medication profiles, providing drug use information and consultation, and related activities. In addition, there are administrative and teaching responsibilities. CL PHARM

Herfindal, McCart, Kayser

Residents provide drug information and consultative services on request. Activities include literature searches, preparing reports and other communications, and teaching and administrative responsibilities involving the Drug Information Analysis Service. CL PHARM

452. Hospital Pharmacy Administrative Work. (5) Su, F, W, Sp. Prerequisite: Resident standing and approval of program director.

Herfindal, Beste, and Staff

Residents are responsible for carrying out assignments related to the administration of a modern hospital pharmacy service. Activities include preparation of budgets, supervision and development of staff, program planning, and related administrative assignments. CL PHARM.

453. Pharmacy Clinical Research. (1-5) Su, F, W, Sp. Prerequisite: Resident standing and approval of program director.

Herfindal, Beste, and Staff

Research programs are arranged with appropriate faculty members on an individual basis. CL PHARM

Community Dentistry

168. Community Health Methods. (2) F. Lecture 1 hour. Lab 3 hours. Silverstein

Dental hygiene students work in the North Oakland community with the Children and Youth Project staff. They are assigned to area schools where oral screening is done. Home visits will also be made. GEN DENT

Craniofacial Anomalies

170. Orofacial Anomalies. (2) F. Lawson

Normal development of speech, consideration of speech patterns, habits, and defects as related to dental and orofacial problems. GR DEVEL

171. Diagnosis and Treatment of Orofacial Anomalies. (2) F, W, Sp. Lecture 1 hour, Seminar and Clinic 3 hours. Chierici, Vargervik

Dietetic, preventive, and corrective methods relative to patients with congenital malformations of the orofacial region are discussed. GR DEVEL

178B-C. Abnormal Facial Growth. (2-2) W, Sp. Seminar 2 hours. Vargervik

Diagnosis of orofacial malformations. Emphasis is on the interrelationship of morphology and physiology. GR DEVEL

180.01. Speech Habilitation. (1) W. Seminar 1 hour. Lawson

Normal development of speech. Introduction to the acoustic and linguistic elements. Consideration of the speech patterns, habits, and defects related to dental and orofacial problems. GR DEVEL

186.01. Habilitation of Abnormal Orofacial Development. (1) F, W, Sp. Prerequisite: Fourth year standing or consent of instructor. Seminar and Clinic 3 hours. Chierici, Vargervik

The Pathogenesis of jaw deformities, dental malocclusions, and speech disorders associated with congenital malformation is discussed. Instruction in diagnosis and preventive and corrective treatment methods is given in the clinic. GR DEVEL

187.01. Special Study for Advanced Undergraduates. (1) F, W, Sp. Prerequisite: Fourth year standing and consent of instructor and approval of Clinic Review Committee. Seminar and Clinic 3 hours. Chierici

Instruction in biometric technique and methodology is given in connection with a selected research project. GR DEVEL

187.02 Diagnosis and Treatment Planning in Orofacial Malformations. (1) W, Sp. Prerequisite: Orofacial Anomalies 187.01. Seminar and Clinic 3 hours. Chierici

A clinical survey, a clinical experiment, or an animal experiment is designed and analyzed. GR DEVEL

401. Orofacial Prosthetics. (1-3) F. Prerequisite: D.D.S. degree or equivalent. Seminar and Lab 3-9 hours. Chierici and Staff

Prosthetic habilitation of the patient with orofacial malformations. Discussions include principles and techniques of construction of obturators, speech appliances, and retention bridges. GR DEVEL

406A-B-C. Orofacial Orthopaedics. (1-3, 1-3) F, W, Sp. Prerequisite: D.D.S. degree or equivalent. Seminar, Lab, and Clinic 3-9 hours. Chierici and Staff

Diagnosis of orofacial malformations and current preventive and corrective measures. Empha-
sis is placed on the interrelationship of morphology and physiology and the coordination of treatment by the various disciplines involved. GR DEVELO

407. Orofacial Prosthetics. (1-3) W. Prerequisite: D.D.S. degree or equivalent. Seminar, Lab, and Clinic 3-9 hours. Chierici and Staff
A course designed to acquaint the student with the many facets of prosthetic management of acquired oral defects. Relationships of prosthetics to speech, mastication, deglutition, oral biology, and surgery are discussed. The interdisciplinary management of these problems is stressed. GR DEVELO

408A-B-C. Speech Habilitation. (1-3, 1-3, 1-3) F, W, Sp. Prerequisite: D.D.S. degree or consent of instructor. Seminar, lab, and clinic 3-9 hours. Lawson and Staff
Normal development of speech, etiology, and diagnosis of speech defects; principles and methods of remedial procedures with special emphasis on patients with orofacial malformations or defects. GR DEVELO

Dental Auxiliary Utilization

120. Introduction to Use of Dental Auxiliaries. (½) Sp. Prerequisite: Preventive Dentistry and Community Health 111. Lecture 1 hour for one-half of quarter. Ino
Classroom instruction and demonstrations in the effective use of the dental assistant. GEN DENT

180. Managerial Aspects of Employing Auxiliary Personnel. (1) F, W, Sp. Prerequisite: Dental Auxiliary Utilization 120. Lecture 1 hour. Ino
An elective course primarily designed to examine the theories and practice of personnel management as related to a small, single proprietorship business such as a dental practice. GEN DENT

Dental Health Education

150. Introduction to Dental Health Education. (2) W. Lecture 2 hours. Phelps-Sandall
An introduction to theories of learning and educational methodology as applied to clinical practice of dental hygiene. Development and implementation of individualized preventive programs for dental patients are emphasized. PERIODONT

160A. Classroom Dental Health Education I. (2) F. Prerequisite: Dental Health Education 150. Lecture 2 hours P. Walsh
Course covers fundamentals of classroom education techniques, including objective writing, lesson planning, and test construction. PERIODONT

160B. Classroom Dental Health Education II. (1) W. Prerequisite: Dental Health Education 150 and 160A. Lecture 9 hours. Lab 12 hours. P. Walsh
Field work experience utilizing techniques learned in Dental Health Education 160A. PERIODONT

160C. Community Dental Health Education. (2) Sp. Prerequisite: Dental Health Education 150, 160A and 160B. Lecture 2 hours. P. Walsh
Course covers community dental health roles for dental hygienists, including program planning and financing. PERIODONT

198. Supervised Study in Dental Health Education. (1-5) F, W, Sp. Prerequisite: Dental Health Education 150, 160A, 160B, and Biostatistics. Francisco
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PERIODONT

199. Laboratory Project in Dental Health Education. (1-5) F, W, Sp. Prerequisite: Dental Health Education 150, 160A, and 160B. Lecture 1 hour. Lab 0-12 hours. Francisco
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PERIODONT

Dental Hygiene

109. Clinical Dental Hygiene. (1-2) SS. Prerequisite: Dental Hygiene 155A-B, 159, and approval of the chairperson of the division. Clinic 3-6 hours. Francisco
Course provides additional clinical dental hygiene experience before entry into the second-year clinic. PERIODONT

150A-B-C. Introduction to Dental Hygiene. (2-2-1) F, W, Sp. Lecture 2 hours F, W; 1 hour Sp. Heckman and Staff
The role of the dental hygienist in preventive dentistry is studied with emphasis on the objectives and principles of oral prophylaxis. Introduction to the anatomy and physiology of the oral cavity and to dental disease. PERIODONT

151. Orientation to Dentistry. (1) W. Lecture 1 hour. Francisco
Introduction to dental specialties and clinical dental procedures. Topics to be covered include oral diagnosis, operative dentistry, pedodontics, endodontics, and myofunctional therapy. PERIODONT

152. Introduction to Research. (2) Sp. Lecture 2 hours. J. Boyce
Introduction to research for the dental hygienist. Course includes types of research, problem selection, research protocol and evaluation. PERIODONT

155A-B. Introduction to Clinical Dental Hygiene. (2-2) F, W. Lab 3 hours. Clinic 3 hours. Hackman
Laboratory and clinical experiences in patient examination and history-taking, operator-
patient positioning, and techniques for managing slight to moderate periodontal disease. PERIODONT

159. Clinical Oral Prophylaxes. (2) Sp. Prerequisite: Dental Hygiene 155A-B. Clinic 6 hours.

Francisco and Staff

Continuation of clinical experiences from Dental Hygiene 155A-B with emphasis on improved proficiency in all areas. PERIODONT

159.01 Clinical Dental Hygiene Seminar. (1/2) Sp. Seminar 1 hour given in alternate weeks.

Francisco

Clinical seminar to discuss patient management and clinical procedures. PERIODONT

Phelps-Sandall

Students identify their personal and professional roles as members of the health team. Topics for discussion and problem solving include general office policies and procedures, interviewing techniques, job selection, taxes, insurance, ethics, jurisprudence, legislation. PERIODONT

161B-C. Orientation to Dentistry. (0-2) W, Sp. Prerequisite: Dental Hygiene 151. Lecture 2 hours.

Francisco

Continuation of Dental Hygiene 151. Course includes head and neck cancer management, tooth transplantation and implantation, orthodontics, oral surgery, craniofacial anomalies, maxillofacial rehabilitation, and removable and fixed prosthodontics. PERIODONT

162. Research Design. (2) W. Prerequisite: Dental Hygiene 152. Lecture 2 hours.

Boyle

Continuation of Dental Hygiene 152. Design and implementation of a research project and preparation of abstracts for table clinic presentation. PERIODONT

169A-B-C. Advanced Clinical Dental Hygiene. (4-4-4) F, W, Sp. Prerequisite: Dental Hygiene 155A-B and 159. Concurrent enrollment in Dental Hygiene 169.01A-B-C. Clinic 12 hours.

Francisco

Advanced clinical dental hygiene techniques including periodontal maintenance therapy, pain control, and soft tissue curetage in cases of moderate to advanced stages of periodontal disease. PERIODONT

169.01A-B-C. Clinical Dental Hygiene Seminar. (0-1, 0-1, 0-1) F, W, Sp. Prerequisite: Concurrent enrollment in Dental Hygiene 169A-B-C. Lecture variable.

Francisco

Lecture and seminar in clinic policies and procedures, dental hygiene treatment planning, periodontal maintenance therapy, clinical photography and related topics. Students will give case presentations during winter and spring quarters. PERIODONT

188A-B-C. Advanced Clinical Functions. (2-2-2) F, W, Sp. Lecture variable 1-2 hours. Lab 2 hours.

Gould

Course will encompass current regulations on the utilization of dental auxiliaries as defined by the California State Board of Dental Examiners for the Registered Dental Assistant and the Registered Dental Hygienist. PERIODONT

189. Special Study. (0-4) F, W, Sp. Prerequisite: Second-year standing in dental hygiene and consent of instructor.

Francisco

Students select an area of interest for independent study or research. These may include clinical, community, educational, institutional, or other areas. PERIODONT

189.01. Clinical Experience in Mobile Dental Clinics. (0-3) SS. Clinic variable.

Miller

Clinical experience in mobile dental clinics. PERIODONT

189.02. Community Health Clinical Practice. (0-2) F, W, Sp. Prerequisite: Winter or spring quarter standing of first-year dental hygiene curriculum; or fall, winter or spring quarter standing of second-year dental hygiene curriculum.

Francisco

One-half unit of credit for every five-hour visits made to off-campus clinics or institutions. Objective is to secure community experience and involvement. This elective is above the required eight visits to off-campus clinics and institutions. PERIODONT

199. Laboratory Project in Dental Hygiene. (1-5) F, W, Sp. Lecture 1 hour. Lab 0-12 hours.

Francisco

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PERIODONT

Dental Jurisprudence

180. Dental Jurisprudence. (1/2) F, W, Sp. Lecture 1 hour, for five sessions.

Bradley

The course broadens student insight into the legal problems and obligations of dental practice. GEN DENT

Dental Technics

115A-C. Basic Dental Technics. (1-1) F, Sp. Lab 3 hours.

Stark

First-year students are oriented to the necessity for accuracy in manipulation of materials. Impression taking, pouring of casts, waxing technique, investing, casting, and soldering are covered. Manipulation of restorative materials will be demonstrated and used in the laboratory. RESTOR DENT
185. Introduction to Basic Dental Technics. (2) SS. Lab 18 hours, for three weeks. Brigante
Technical orientation to the basic technics taught in the first year of dentistry such as morphology, prosthodontics, biomaterials, operative dentistry. RESTOR DENT

Dermatology

First-Year Coordinated Instruction—Medicine 131A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship—Ambulatory and Community Medicine 110 includes lectures and case demonstrations on the examination and diagnosis of dermatological diseases. This includes instruction in history-taking, physical diagnosis, and diagnostic and therapeutic procedures.

140.01. Clinical and Research Dermatology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Cram
Activities of students are determined after an initial interview with the instructor. Emphasis is placed on routine outpatient and inpatient care and research methods, according to individual interest. DERMATOL

140.02. Clinical Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein
Clinical clerkship in approved hospitals by special arrangement and approval of the dean and chairperson of the department. DERMATOL

150.01. Research in Dermatology. (½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein
A research project under the direction of a member of the faculty. DERMATOL

160.01. Clinical and Research Dermatology. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein
Activities of students are determined after an initial interview with the instructor. Emphasis is placed on routine outpatient and inpatient care and research methods, according to individual interest. DERMATOL

199. Laboratory Project in Dermatology. (1-5) F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. DERMATOL

400. Dermatology Staff Conferences. (2) F, W, Sp. W. L. Epstein and Staff
Residents prepare and present case histories of patients at conferences making reference to appropriate literature, special studies, and laboratory work. Conferences include discussions of new developments and research investigation by staff members and faculty from other UC departments and other universities. DERMATOL

Lectures and demonstrations of the histopathology of skin diseases with special emphasis on correlation with clinical findings. Activities include the study of microscopic sections and discussions of material presented. DERMATOL

Seminar covers recent literature in dermatology. Included is assigned reading with required reports which are evaluated by members of the faculty. DERMATOL

403. Specialty Seminars. (2) F, W, Sp. Seminar 2 hours. W. L. Epstein and Staff
Seminars include discussions, required reading, and reports on dermatology and related basic sciences such as embryology, mycology, histopathology, and parasitology in relation to dermatologic conditions; and oncology as it relates to the skin. DERMATOL

Seminar involves the evaluation of recent clinical cases of special interest. Cases are presented by the faculty and resident staff. DERMATOL

405. Research in Dermatology. (3) Su, F, W, Sp. Lab 9 hours. Fukuyama
Instruction in the conduct of research projects dealing with electron microscopy, biology, biochemistry, and immunology of the skin under normal and pathological conditions. DERMATOL

In-depth discussion of the sciences basic to an understanding of the function and dysfunction of skin, including anatomy, physiology, microbiology, pharmacology, biochemistry, genetics, and pathology. Over a three-year period, course covers all aspects of basic sciences relevant to dermatology. DERMATOL

407. Medical Cutaneous Microbiology. (2) Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Ayl
Course is designed to familiarize dermatology residents with the techniques of isolation and identification of dermatophytes, skin bacteria, and viruses. Occasional lectures on specialized topics are given. DERMATOL

Residents, under supervision, are responsible for patient care in the wards and outpatient clinic. Duties include history-taking, physical examinations, and consultations. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. DERMATOL
Residents, under supervision, are responsible for patient care in the wards and outpatient clinic. Duties include history-taking, physical examinations, and consultation. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. DERMATOL

452. Clinical and Experimental Dermatology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein
Assistant residents work at off-campus hospitals, in the United States and other countries, approved by the dean and the chairperson of the department. Course includes training in clinical and investigative dermatology. DERMATOL

Economics

180A-B. Economics. (1-1) F, W. Lecture 1 hour. Winters
Lectures and group discussions related to dental practice. Subject areas covered include equipment selection, auxiliary personnel, consultation and financial procedures, recall, and accounting systems. Prepaid dental care programs and the role of professional organizations are presented by guest lecturers. GEN DENT

Endocrinology16

192. Structure and Function of the Hormones. (2) § W Prerequisite: Course in basic biochemistry recommended. Papkoff, Ramachandran
Course will examine the chemical nature of the endocrines; the methods employed for purification, characterization, structural determination, and synthesis. The relationship of molecular structure to biological activity will be studied, as well as comparative and evolutionary aspects. ANATOMY

198. Supervised Study in Endocrinology. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Ganong and Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. ANATOMY

199. Laboratory Project in Endocrinology. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Ganong
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ANATOMY

202. Mechanisms of Hormone Action. (3) § F Prerequisite: Physiology 101 and/or Human Biology 200A and 200B, or Biochemistry 100A-B or consent of instructor. Lecture 2 hours plus independent study. Goldfine, J. A. Williams
Reading and discussion of classical and current literature concerning known and speculative mechanisms of hormone action. Major hormones covered are insulin, glucagon, thyroid, and steroid. ANATOMY

Students will attend and participate in a seminar series devoted to topics of current interest in endocrinology. ANATOMY

222. Reproductive Endocrinology Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Kuhn, R. Weiner
Seminar presentations in areas of current interest in reproductive endocrinology by guest lecturers and members of the Reproductive Endocrinology Center. Term paper required. Course may be repeated for credit. ANATOMY

230. Reproductive Endocrinology. (2) § W Prerequisite: Consent of instructor. Lecture 2 hours. Weiner.
Lectures and assigned readings in the reproductive endocrinology of the male and female. Topics include structure, function, and regulation of hypothalamic, pituitary, and gonadal hormones, with special emphasis on humans. ANATOMY

Endodontics

Clinical endodontics. Minimum of 100 points or two units required for graduation. RESTOR DENT

125. Sophomore Preclinical Endodontics Laboratory. (1½) Sp. Lecture 1 hour for five weeks. Lab 30 hours for five weeks. Nguyen
Course presents the scope of modern endodontics and lays the groundwork for endodontic clinical practice. Laboratory procedures involved in root canal therapy with emphasis on the interrelationship of endodontics to basic sciences and other disciplines of dentistry will be presented. RESTOR DENT

130. Clinical Endodontics. (1) F Prerequisite: Endodontics 125. Lecture 1 hour. Nguyen
Course covers prevention, diagnosis, and treatment of diseases of the pulp and periapical tissues. The rationale of endodontic therapy will be critically examined through documented information from the dental literature. RESTOR DENT

Diagnosis, case selection, and management of pain and infection in endodontically involved teeth; advanced techniques for treating difficult root canal system anatomy; refinements in obturation of the root canal system. RESTOR DENT

189.01 Endodontics Clinical Practice. (0-9) F, W, Sp. Prerequisite: Approval of the chairperson of the division. Clinic variable. **Nguyen and Staff**

Clinical experience at the level of Endodontics 109. RESTOR DENT

189.02. Advanced Clinical Endodontics. (0-4) Sp. Clinic variable. **Sapone**

Advanced instruction in the field of clinical endodontics. RESTOR DENT

189.03. Expanded Clinical Endodontics. (0-9) F, W, Sp. Prerequisite: Completion of endodontics graduation requirements and satisfactory progress toward graduation in all other divisions. Consent of instructor and approval of Clinic Review Committee. Clinic variable. Enrollment limited. **Nguyen and Staff**

Objectives of the course are to offer more extensive endodontic service, rather than extraction, to clinic patients; and to expand clinical experience in diagnosis and treatment for students showing interest in endodontics. RESTOR DENT

189.04. Undergraduate Clerkship in Endodontics. (0-16½) F, W, Sp. Prerequisite: Fourth-year standing and completion of majority of graduation requirements. Lecture 5½ hours for five weeks. Clinic. **Nguyen, Sapone, and Staff**

An endodontic clerkship offering advanced senior students the opportunity to gain in-depth experience in diagnosis, emergency care, and all facets of non-surgical and surgical endodontics, as well as the related endodontic-pedodontic-periodontic problems. RESTOR DENT

**Epidemiology and International Health**

100. Medical Parasitology. (2) W, Sp. Prerequisite: Microbiology 100 (without parasitology) or equivalent, or concurrent enrollment. Lecture 2 hours. 

An introduction to protozoa and helminths and human diseases they produce, with emphasis on host-parasite interactions. Parasite epidemiology and life cycles, clinical and diagnostic aspects are considered in lectures, films and kodachrome showings. Laboratory demonstrations displayed throughout week. EPID INTL HLTH

**Petrikis, Ernstner**

Basic epidemiological principles and methods for investigating the distribution and determinants of disease in the population. Emphasis is on research design, evaluation of medical literature and diagnostic tests, and assessment of patient risk factors for use in diagnosis and treatment. EPID INTL HLTH

140.02. Clinical Clerkships Abroad. (1½ per week) Su, F, W, Sp. Prerequisite: Nine months of clinical work and Epidemiology and International Health 150.01. **R. Goldsmith**

Clinical clerkship elective in a developing country. Students provide patient care at a medical school, provincial hospital, or rural health clinic for eight to twelve weeks. Arrangements may be made to participate in a public health or research program abroad. EPID INTL HLTH

140.03. Leprosy and Other Communicable Diseases. (1½ per week) § Su, F, W, Sp. Prerequisite: Medicine 110. **Gelber**

As part of the consultative team, students work-up and follow communicable disease problems on the medical and surgical services. Participation on the inpatient and outpatient leprosy service and attendance regularly at PHS conferences. EPID INTL HLTH

150.01. Medicine in Developing Countries. (1½ per week) W. Prerequisite: Epidemiology and International Health 100 or consent of instructor. **R. Goldsmith**

Two-week block elective on the recognition and treatment of diseases of tropical and developing countries. The course is designed to prepare students for clerkships abroad. Presentation format includes lectures, seminars, films, laboratory sessions, and supervised independent study. EPID INTL HLTH

160.01. Cancer Epidemiology for the Clinician. (1-2) W. Prerequisite: Epidemiology and International Health 101 or consent of instructor. Lecture 1 hour. Optional term paper for 2 units. 

**Petrikis and Staff**

Survey and discussion of milestone papers in the knowledge of the epidemiology of the major sites of cancer. Emphasis is on etiological and methodological aspects and applications to prevention. EPID INTL HLTH

170.04. Host-Parasite Interactions and Pathology. (1) W. Prerequisite: Epidemiology and International Health 100 or equivalent. Lecture and Discussion 1 hour. **Heyneman**

Lectures and discussions to review the patterns of host-parasite interactions involving protozoan and helminth infective agents of man. Topics selected will explore current views of immune and other types of response and their disorders that may result in human disease. EPID INTL HLTH

170.05. Introduction to International Health. (2) § W. Lecture 2 hours. **Dunn and Staff**

Lecture and discussions introducing the field of international health from an ecological and behavioral perspective. The course surveys world health and demographic problems, issues in the delivery of medical care and career opportunities in international health. EPID INTL HLTH
170.06. Geography of Human Health and Disease. (3-5) F. Prerequisite: Preregistration required. Course is offered and meets jointly with Geography 188 given at UC Berkeley. Lecture 3 hours. Optional term paper for 5 units. 

Dunn and Staff

Course covers principles of medical geography and landscape epidemiology including changing patterns of human health and disease in the context of physical, biotic, and sociocultural environments, and in relation to human settlements. Analysis of selected specific diseases of global importance. EPID INTL HLTH

170.07. Laboratory Project in Leprosy. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. 

Gelber

A laboratory research problem of leprosy under the guidance of a member of the staff of the Leprosy Research Unit at PHS. The Unit's major research areas are the pharmacology, immunology, and chemotherapy of leprosy in animals and man. EPID INTL HLTH

180. World Population Pressures and Family Planning Perspectives. (1-2) § W. Lecture 1 hour, plus project required for 2 units. Ernster

Implications of population growth and family planning programs in developing industrialized countries. Contraceptive and abortion methods and their socio-cultural acceptability are emphasized as well as demographic methods, population research issues, and the role of health professionals in population control. EPID INTL HLTH

180.05. Maternal and Child Health in Developing Countries. (1-2) § Sp. Lecture and Discussion 1 hour. Optional term paper for 2 units. Arnhold

Lectures and discussion to review major factors affecting maternal and child health in developing countries, including the impact of poverty, nutrition, infectious diseases, immunization, organization of ambulatory care, setting of priorities, and utilization of local people as health auxiliaries. EPID INTL HLTH

180.06. Applied Biostatistics. (2) § Sp. Prerequisite: Epidemiology and International Health 100 or 190 or consent of instructor. Lecture 2 hours. Lab 1 hour. Holly

Descriptive statistics, T-tests, Chi-square, analysis of variance, Mantel-Haenszel adjustment, correlation and regression analysis will be explored. Epidemiologic analysis with a programming calculator and its use in an occupational health setting will be introduced. EPID INTL HLTH

186. Tropical Medicine Lectures. (1) § Sp. Lecture 1 hour. R. Goldsmith

Lectures, case histories, and films emphasizing diagnosis and treatment of tropical diseases including malaria, amebiasis, cholera, typhoid, schistosomiasis, leprosy and arbovirus infections, plus a review of opportunities for clinical clerkships abroad in developing countries. EPID INTL HLTH

190. Introduction to Epidemiology. (3) § F. Prerequisite: Third- or fourth-year standing in School of Medicine, or graduate standing. Consent of instructor. Lecture 3 hours. Lab 1 hour. Enrollment limited. Holly

Introduction to the principles and methods used in epidemiology. Elements of research study design, critical analysis of journal articles, and application of epidemiological methods to common health risks in populations will be included. EPID INTL HLTH

198. Supervised Study in Epidemiology and International Health. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty. EPID INTL HLTH

199. Laboratory Project in Epidemiology and International Health. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty. EPID INTL HLTH

Exfoliative Cytology

401A-B-C-D. Exfoliative Cytology. (14-14-14-14) Su, F, W. E. King

Lectures in cytology include normal, malignant, and abnormal nonmalignant cells. Instruc-
tion covers method of specimen collection; preparation, staining, and microscopic examination of specimens; development of speed and accuracy in microscopic examination; and correlation of cellular and tissue pathology. PATHOLOGY

Fixed Prosthodontics

Clinical instruction to be taken concurrently with third- and fourth-year lecture courses. RESTOR DENT

Course provides material on the construction of a single three-unit bridge (posterior) on the typodont models, specifically preparation design, articulation and mounting principles, provisional restorations, waxing design, and casting technique. RESTOR DENT

115. Techniques in Fixed Prosthodontics. (2) Sp. Prerequisite: Concurrent enrollment in Fixed Prosthodontics 110. Lab 6 hours.   Radke
Course covers the basic techniques of fixed prosthodontics. RESTOR DENT

120A-B. Fixed Prosthodontics Technics Theory. (1-1) F, W. Prerequisite: Fixed Prosthodontics 110 and 115. Lecture 1 hour.   Radke (F), Lacy (W)

Fixed Prosthodontics 120A, in conjunction with Fixed Prosthodontics 125A, continues instruction in fundamentals of bridge construction. Fixed Prosthodontics 120B, in conjunction with Fixed Prosthodontics 125B, presents instruction in ceramo-metal restoration and its use as an individual restoration or in bridgework. RESTOR DENT

125A-B. Fixed Prosthodontics Technics. (2-2) F, W. Prerequisite: Fixed Prosthodontics 110 and 115, Biomaterials 110B-C, and Dental Technics 115A-C. Lab 6 hours.   Radke (F), Lacy (W)

Fixed Prosthodontics 125A, the laboratory corollary to Fixed Prosthodontics 120A, continues instruction of basic bridge construction. Fixed Prosthodontics 125B, the laboratory corollary to Fixed Prosthodontics 120B, presents instruction in ceramo-metal restoration as an individual entity, and also within bridge construction. RESTOR DENT

130A-B-C. Fixed Prosthodontics Theory. (1-1) SS, F, W. Lecture 1 hour F, W; 2 hours SS.   Meli (SS), Tueller (F), W. Noble (W)

RESTOR DENT

139. Clinical Fixed Prosthodontics. (0, 0-1, 0-1, 0-3) SS, F, W. Sp. Prerequisite: Third-year standing and completion of all first- and second-year courses in fixed prosthodontics, morphology, and occlusion. Clinic variable.   Tueller and Staff
Students will accrue points by performing clinical crown and bridge procedures. The required number of points for passing the course is 150. Points are allocated according to the difficulty and magnitude of the procedure, and also the quality of treatment. RESTOR DENT

Students will accrue points by performing clinical fixed prosthodontics procedures. The required number of points for completion of the course is 250. Points are allocated according to the difficulty and magnitude of the procedure, and also the quality of treatment. RESTOR DENT

170. Seminar in Fixed Prosthodontics. (2) F, W, Sp. Prerequisite: Students in Fixed Prosthodontics Certificate Program must register for this course each quarter and summer session.   Lorencki

New concepts and theories are discussed and related to research and clinical practice. Students are encouraged to develop new concepts in the application of basic sciences and research to fixed prosthodontics. RESTOR DENT

171.01A-B-C. Clinical Procedures in Fixed Prosthodontics. (3-3-3) F, W, Sp. Prerequisite: Admission to postdoctoral standing and consent of instructor. Lecture 1 hour. Clinic 6 hours.   W. H. Noble

Instruction and practice in the diagnosis, treatment planning, and treatment of clinical patients. RESTOR DENT

171.02. Clinical Procedures in Fixed Prosthodontics. (2) SS. Prerequisite: Fixed Prosthodontics 171.01A-B-C. Clinic 6 hours.   W. H. Noble

Clinical procedures in fixed prosthodontics. Course provides a continuation of clinical experience received in Fixed Prosthodontics. RESTOR DENT

172.01A-B-C. Advanced Clinical Procedures in Fixed Prosthodontics. (3-3-3) F, W, Sp. Prerequisite: Completion of first-year and summer session of Fixed Prosthodontics Certificate Program. Lecture 1 hour. Clinic 6 hours.   Eissmann
Advanced instruction and practice in the diagnosis, treatment planning, and treatment in fixed prosthodontics. RESTOR DENT

172.02. Advanced Clinical Procedure in Fixed Prosthodontics. (2) SS. Clinic 6 hours.   Eissmann

Clinical procedures in fixed prosthodontics. Course provides a continuation of experience received in Fixed Prosthodontics 172.01A-B-C. RESTOR DENT

176A-B-C. Special Study for Postdoctoral Students. (1-5, 1-5, 1-5) F, W, Sp. Research 3-15 hours.   Lorencki

Original investigation in the field of fixed prosthodontics. RESTOR DENT

The field of fixed prosthodontics and its relationship to other dental disciplines will be explored by means of case presentations to provide students with a broad base of experience in oral rehabilitation techniques. RESTOR DENT

180.01. Special Study Seminar. (1) F, W, Sp. Seminar 1 hour. Enrollment limited. Lum

Individual staff members will offer seminar type instruction on selected topics related to fixed prosthodontics. RESTOR DENT

Advanced clinical restorative elective. Lectures describe the restorative general practice. Topics include those such as office layout, laboratory relations, treatment limitations, scheduling, financial arrangements, and treatment failures. RESTOR DENT

Clinical experience at the level of Fixed Prosthodontics 149. RESTOR DENT

189.02. Advanced Restoration Elective. (0-9) F, W, Sp. Prerequisite: Consent of instructor and approval of Clinic Review Committee. Lab variable. Radke, Staffanou

Advanced clinical restorative elective. Instruction in treatment of multiple restorative cases by quadrant or full arch approach. Students are selected to participate by the course director. RESTOR DENT

Forensic Pathology and Medicine

170.01. Forensic Pathology and Medicine. (1) Sp. Seminar 1 hour. Smuckler

Course covers basic legal principles; torts and contracts; medical records and documents; medical licensure and certification; forensic pathology; the expert witness; malpractice and professional liability. PATHOLOGY

General Dentistry

An elective course in which students perform patient treatment in a variety of clinical settings. GEN DENT

109.01. Community Dentistry Rotation. (0-9) F, W, Sp. Prerequisite: Certification of competency by the various departments in the school. Seminar 3 hours. Clinic 24 hours.

Wycoff, Sinclair, M. Garcia

Multi-component rotation including seminars, patient group presentations, specialty grand rounds and comprehensive patient care. Supervised clinical and seminar experience in community setting. Students develop and explore their roles as members of the health care team and learn to meet community needs. GEN DENT

111. Changing Aspects of Dental Practice. (1) F. Lecture 1 hour. Wycoff

Survey course designed to introduce the student to current social and professional problems in dentistry. Topics include identifying patient, community, national, and professional needs, and how they are met. GEN DENT

Introduction to the clinical procedures and techniques used in the diagnosis, management, and control of oral disease. GEN DENT

120. Behavioral Sciences. (1) W. Lecture 1 hour. Eckhaus

Introduction to the basic concepts, theories, and findings of the social sciences. Emphasis is on the application of these concepts and modes of reasoning to pressing social problems and the delivery of health services. GEN DENT

121. Research Design. (1) Sp. Lecture 1 hour. Wycoff

Basic principles of biostatistics. Introduction to the concept of experimental reliability, fundamental principles of sampling techniques, selection of data, and variability. The student will plan, develop, and write a research protocol. GEN DENT

150. Dental Morphology. (2) F. Prerequisite: Concurrent enrollment in Dental Hygiene 150A. Lecture 2 hours. B. Hartman

The development and form of deciduous and permanent dentition and occlusion. Study of individual tooth and arch form to interarch relationships as well as endodontic morphology. GEN DENT

188.01. Community Health Methods. (0-9) SS. Prerequisite: Consent of instructor. Clinic. Enrollment limited. Sinclair, Ino

Students work at SFGH and Laguna Extension Center providing comprehensive community dentistry. Dental auxiliary utilization principles will be incorporated. Minimum of four days per week for at least three weeks participation. Full time DAU auxiliary provided. GEN DENT

189.01. Advanced Clinical Clerkship in General Dentistry at VA. (0-24) F, W, Sp. Prerequisite: Fourth-year standing and approval of Clinic Review Committee. G. Hall, Weir

Students provide comprehensive dental care to patients assigned to them under supervision of staff in the medical and hospital environment. Attendance at seminars and conferences included. GEN DENT
Health Sciences Education

200. Introduction to Health Sciences Training. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lem
Course focuses on instructional techniques and strategies useful for the beginning instructor. Emphasis is on the development of an effective personal teaching style. Open to advanced graduates, residents, teaching assistants, and new faculty. MEDICINE

220A-B. Health Sciences Education Seminar. (2-2) § F, W. Prerequisite: Consent of instructor. Seminar 2 hours. Rosinski
Consideration of principles of learning, including individual student differences, techniques of instruction, and approaches to evaluation of student progress. Individual teaching plans are developed and critiqued. Emphasis is placed on the graduate and professional school student as a learner. MEDICINE

221. Allied Health Sciences Seminar. (2) § F, W, Sp. Seminar 2 hours. Rosinski
Graduate seminar integrating clinical experiences and academic course work of students enrolled in Kellogg Education Project. Relationships of course work experiences to future roles as allied health teachers are considered. Individual professional problems are analyzed. MEDICINE

A seminar to review and develop objective techniques in assessing the clinical performance and competence of students and practitioners. Techniques will be developed and validated for a number of clinical disciplines. MEDICINE

History

180. History of Dentistry. (1) W. Lecture 1 hour. B. Hartman

A lecture series on the evolution of dentistry from the dawn of civilization to modern times. Emphasis is placed on the changing concept of mere pain relief to the current science involving total restoration of the mouth, control and prevention of oral diseases. Inventiveness of the dentist, his role in the discovery and application of anesthesia, with constant involvement in community health problems of people over the ages is stressed. GEN DENT

170.07A-B. History and Philosophy of the Health Professions. (1-2, 1-2) SS. Lecture 1 hour. Paper required for 2 units. Brieger and Staff
Survey of the history and development of the various health professions and services, with consideration of the economic and ethical factors involved. HIST HL SC

Course emphasizes the effects of mental illness on the lives of artists, scientists, statesmen, and other public figures. Biographical, autobiographical, and clinical studies of exceptional people will be compared. Students will be encouraged to select individual subjects for research. HIST HL SC

180.01. History of Medicine in the Soviet Union. (2-4) § Sp. Seminar 2-4 hours. Todes
Examination of medicine in the Tsarist period, with emphasis on the impact of the revolution and socialist construction upon public health, the medical care delivery system, the professional medical community and medical science. HIST HL SC

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. HIST HL SC

200. History of Historical Method and Methodology of Medical History. (2-4) § F, W, Sp. Lecture 2-4 hours. Staff
Special reading and discussion on historiography and historical method with biweekly seminars designed to teach students to do independent medicohistorical research and writing. HIST HL SC
203. The Brain and Mind in Medical History. (1-2) § F, W, or Sp. Lecture 1-2 hours. F. Schiller

Introduction to the history of neurological concepts. HIST HL SC

204. History of Non-Western Medical Systems. (1-2) § W. Prerequisite: History of Health Sciences 170.06 or 201. Lecture 1 hour. Veith

Seminars and directed readings on the philosophy of Asian, Indian, and other Non-Western systems. HIST HL SC

205.01. The Western Medical Attitude—Philosophical Foundations of Western Clinical Thought. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Guttentag

Seminar exploring the theoretical premises of Western medicine; its relationship to other disciplines and other cultural attitudes; the trendiness of the holistic approach; the dynamics of the patient-physician relationship; the operational concepts, such as optimal versus inadequate or superficial examination. HIST HL SC

205.02. The Western Medical Attitude—Philosophical Foundations of Western Clinical Thought. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Guttentag

Extended reading and conferences of History of Health Sciences 205.01. HIST HL SC

206. Introduction to History of Health Sciences—Nursing. (2) § Sp. Lecture 2 hours. Blanc

For nursing instructors and graduate students. History of the health sciences upon which nursing practice is based. Methods and examples for teaching history in the clinical setting. HIST HL SC

207. Introduction to the History and Bibliography of the Literature of the Health Sciences. (1-2) § F, Sp. Zinn

Historical survey of health sciences literature, illustrated by works from the special collections in the library. Includes an introduction to historical and modern reference works and bibliographic methods useful in research in the history of the health sciences. HIST HL SC

209. Medicine in the Victorian Age. (2) § Sp. Prerequisite: Graduate standing. Lecture 2 hours. Blanc

Investigation of medical facilities in London during 1830-1870 along with modes of practice, social setting, and levels of scientific knowledge in the mid-nineteenth century. HIST HL SC

210. The History of Medical Education. (1-3) § W, Sp. Lecture 1-2 hours, plus paper or research for 3 units. Brieger

Lectures, discussions, and readings on the development of medical theory and practice as taught from ancient times to the present. Emphasis will be on American medical education in the nineteenth and twentieth centuries. HIST HL SC

211. Theories of Human Nature. (3) § Sp. Prerequisite: Graduate standing. Lecture 3 hours. Jonsen

Course examines how several classical and modern authors in the Western philosophical tradition define human nature. Various basic theories and their implications for contemporary science and medicine are developed. HIST HL SC

220. Seminar. (1-3) § F, W, Sp. Seminar 1-3 hours. Staff

Students, staff, or guest lecturers present selected topics concerned with current research. HIST HL SC

HIST HL SC

297. Special Study. (1-3) § F, W, Sp. Staff

Reading and conferences for qualified students under the direction of a member of the staff. HIST HL SC

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree. HIST HL SC

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. HIST HL SC

Hospital Dentistry

170. Emergency Medical Care Seminar. (1) W. Prerequisite: Postdoctoral or fourth-year standing. Seminar 2 hours. R. Lim

The course is designed to stimulate group discussion on the principles of emergency medical care. Topics include transportation, disaster planning, triage, cardiopulmonary resuscitation, management of shock, head and neck injuries, as well as special problems related to dentistry. ORAL MED

171. Physical Diagnosis. (2) Su. Prerequisite: Enrollment in a postgraduate specialty program or consent of instructor. Lecture 2 hours. J. Klein

Designed to prepare the oral surgeon to conduct a physical examination as a preliminary evaluation before performing oral surgical procedures. Techniques of examination are demonstrated and practiced in the classroom; examination of pathologic conditions is conducted at bedside. ORAL MED

172. Oral Biology Conferences. (1) W. Prerequisite: Postdoctoral standing. Silverman, Ware, and Staff

Conferences include case presentations by interns and residents, and seminars covering selected subjects in oral biology relevant to clinical and preventive dentistry. ORAL MED
Human Biology

200A. Cell Biology. (3) § F. Prerequisite: Biochemistry 100A or equivalent, or consent of instructor. Lecture 3 hours.  Stoeckenius

An introductory course in the structure, biochemistry, and function of the eukaryotic cell. BIOCHEM

200B. Cell Biology. (3) § W. Prerequisite: Biochemistry 100A or equivalent, or consent of instructor. Lecture 3 hours.  Stoeckenius

An introductory course in the structure, biochemistry, and function of the eukaryotic cell. BIOCHEM

Human Development and Aging

201A-B-C. Interdisciplinary Seminar in Human Development. (3-3-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Three-quarter course.  Fiske, Kiefer and Staff

Theory and research covering adolescence to old age from sociological, psychological, psychoanalytical, and anthropological perspectives. Topics include stress, personality and cognitive change, time perspective, values, socialization processes, and adaptation. Reading and paper required. PSYCHIATRY

202A-B. Seminar in Analytic Methods. (3-3) § W, Sp. Prerequisite: Consent of instructor. Seminar 3 hours.  Kiefer, (W) Chiriboga, R. Pierce (Sp)

A two-quarter interdisciplinary course in qualitative and quantitative analytic methods in behavioral science. Students utilize data from case files and develop detailed research strategies. PSYCHIATRY

Students work on their own research interests in terms of problem formulation, research design, and/or operationalization. Emphasis dependent upon individual student needs. PSYCHIATRY

204. Scientific and Literary Approaches to Personal Development. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours.  Kiefer

Representative works from behavioral science literature and world poetry and prose are brought together in the study of personality development in adult life. Compares insights from the two fields on how the developing person copes with social, historical, and psychological challenges. PSYCHIATRY

205. Seminar on Data Analysis (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours.  Rosow

Students either provide their own or use accessible data from ongoing research projects. Emphasis is on training in data organization, analysis, and research report writing. PSYCHIATRY

206A-B-C. Advanced Seminar on Stress. (2-2-2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours.  Fiske, Horowitz, Chiriboga, Visiting Faculty

This pro-research seminar, for advanced students with a strong background in the stress research literature, is devoted to elaboration of stress theory and concepts, and refinement of methodologies addressed to specific research projects. PSYCHIATRY

208. Theoretical Approaches to Psychosocial Change in Adulthood. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours.  Fiske

An advanced course for students familiar with social sciences and clinical studies of adult change. Emphasis will be on in-depth critiques of stage, process, stress, adaptation, and other conceptual models. PSYCHIATRY

209A-B-C. Interdisciplinary Seminar in Aging. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours.  Staff

Emphasis on the aging literature; one quarter each focusing on: the individual and policy issues surrounding mental health and illness in later life; socialization, roles and intergenerational relationships; and problems and resources of the minority elderly in the United States. PSYCHIATRY

210. Socialization to Old Age. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours.  Rosow

A seminar on adult socialization theory, with prospective socialization to an aged role as a special concern. Major issues involve norms for older people, the structure of socialization situations, and the pressure of variables normally affecting socialization in earlier status transitions. PSYCHIATRY

214. Developments in Social Science Philosophy. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours.  Kiefer

Exploration of important new developments in the philosophy of social science; emphasis is on works of Jurgen Habermas and Anthony Wilden. PSYCHIATRY

216. Transcultural Studies in Child Development. (3) § Sp. Prerequisite: Consent of instructor. Seminar 3 hours.  Koss, Kiefer

Comparison of child development, child rearing practices and personality formation in Latino, Black American, Chinese, Japanese, Filipino, and Samoan cultures; cultural influences on health and mental health via nutrition, cognitive development, identity, and abnormality are treated theoretically and substantively. PSYCHIATRY

220. Proseminar. (1) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours, given in alternate weeks.  Staff

Students, staff, or guest lecturers present selected topics based on their current research. PSYCHIATRY
221. Life Stress and Adaptation. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. Chiriboga, Fiske

Qualitative and quantitative analyses of life history protocols focusing on stress and perceptions of stress in relation to a variety of indicators of adaptation such as physiological, physical, social at various life stages from adolescence to old age. PSYCHIATRY

225. Introduction to Computer Processing. (1 or 2) § W, Sp. Prerequisite: One course in statistics recommended. Consent of instructor. Lecture 1 hour, Lab 0-3 hours. Pierce

Introduction to the use of the computer in the analysis of social science research data, with emphasis on facilities and programs available at the UCSF Information Systems and Computer Center. PSYCHIATRY

227. Biological Aspects of Aging and Old Age. (2-3) § W. Prerequisite: Consent of instructor. Lecture 2 hours, Independent study 3-4 hours. Ellman

Physiological, biochemical, neurological, and anatomical changes occurring with aging are discussed. Important questions include the possible relationships to functional behavior of these changes in humans and the relevance of internal changes to psychological states. PSYCHIATRY

232. Developmental Study of Kinship Structure. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Thurnher

Kinship structure in Western and non-Western societies with emphasis on the life cycle perspective of family roles and relations. Consideration is given to relevant empirical studies and case material. PSYCHIATRY

236. Developmental Statistics. (3) § W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Pierce

A statistics course structured to the needs of students of the Human Development and Aging Program. Special emphasis is given to methods appropriate to analysis of development and change, with attention more to the understanding of statistical ideas than to computation. PSYCHIATRY

249. Special Studies. (2-8) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Students select special problems to investigate on an individual or collaborative basis. These studies may be conducted through readings, the collection and analysis of empirical data, or the development of conceptual analyses or methodologies. PSYCHIATRY

PSYCHIATRY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. PSYCHIATRY

140.22 Responsibilities of Medical Practice

Course will discuss economic forces, ethical and legal issues, social and cultural factors, and governmental policies affecting medical practice. It will define professional responsibilities in the context of these influences and the resulting forms and trends in medical practice. SURGERY

Laboratory Medicine

140.01. Clinical Pathology. (1½ per week) Su, F, W, Sp. Prerequisite: One year of medical school and consent of instructor. Pollycove

Laboratory sessions and seminars on aspects of clinical chemistry, hematology, microbiology, blood banking, and radioisotopes are held in the clinical laboratories at UC and SFGH. LAB MED

140.03. Hematology Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Second year of hematology or equivalent. Recommendation from one faculty member. Shohet and Staff

Clerkship primarily in the clinical evaluation of hemologic patients. As interesting clinical problems arise, time will be available for laboratory projects relevant to those problems. Students will act as primary consultants under close supervision of hematology residents and fellows. LAB MED

140.04. Clinical Immunohematology in Transfusion and Transplantation. (1½ per week) W. Prerequisite: Completion of two core clerkships. Vyas

A two-week clerkship in transfusion service. Rational hemotherapy utilizing principles of physiology and immunohematology in evaluation of needs, risks and benefits of blood transfu-
sion for replacement of blood loss and clinical management of various hematologic disorders. LAB MED

150.01. Laboratory Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Townsend

An intensive four-week seminar series, using patient data, designed to increase the student's ability to choose and interpret laboratory tests in a variety of clinical settings. The scope of tests discussed includes hematology, blood banking, clinical chemistry, and microbiology. LAB MED

160.01. Diagnostic Use of Radionuclides. (2) Su, F, W, Sp. Prerequisite: One year of medical school. Lecture 1 hour, Clinic 4 hours. Pollycove

Basic laboratory course in nuclear medicine. Clinical participation in the diagnosis of patients receiving radionuclides in the outpatient clinics and in the wards. LAB MED

Laboratory sessions and seminars on aspects of clinical chemistry, hematology, microbiology, blood banking, and radioisotopes are held in the clinical laboratories at UC and SFGH. LAB MED

170.02. Diagnostic Immunohematology. (1½) F. Lecture 1½ hours. Vyas

Course covers laboratory aspects of blood banking, transfusion and immunohematology in seminars, reviews or formal lectures. Theoretical and practical aspects of blood grouping, tissue typing and diagnostic immunology are also included. LAB MED

180.01. Microcomputer Programming in the Clinical Laboratory I. (3) § F. Prerequisite: Consent of instructor. Clinical laboratory experience recommended; computer experience not required. Preference given to residents in Laboratory Medicine, clinical laboratory technologists and students in Clinical Laboratory Science. Lecture 2 hours. Lab variable 2-4 hours. Enrollment limited. R. Anderson

Instruction in elementary BASIC programming and computer concepts using examples and problems drawn from the day-to-day operation of the clinical laboratory and laboratory medicine literature. LAB MED

180.02. Microcomputer Programming in the Clinical Laboratory II. (3) § W. Prerequisite: Laboratory Medicine 180.01 or consent of instructor. Clinical laboratory experience recommended; computer experience not required. Preference given to residents in Laboratory Medicine, clinical laboratory technologists and students in Clinical Laboratory Science. Lecture 2 hours. Lab variable 2-4 hours. Enrollment limited. R. Anderson

Instruction in assembly language programming and microcomputer architecture using examples of applications in clinical laboratory instruments. LAB MED

180.03. Special Problems in Clinical Laboratory Microcomputing. (1-3) § Su, F, W, Sp. Prerequisite: Laboratory Medicine 180.01 and 180.02 or consent of instructor. Lecture 1-3 hours. Enrollment limited. R. Anderson

Students work on special projects in clinical laboratory microcomputing defined in conjunction with the instructor. LAB MED

400. Clinical Pathology Staff Seminars. (2) Su, F, W, Sp. Pollycove

Residents prepare summaries of selected clinical cases which present problems in correlation of clinical and laboratory data. Residents and faculty discuss relevant literature with special reference to technical aspects of laboratory procedures and interpretation of results. LAB MED

Review of current laboratory procedures and problems in hematology, microbiology, immunology, blood banking, chemistry, and application of isotopes. Library research and occasional formal reports are required. LAB MED

Research programs are arranged with appropriate faculty members on an individual basis. LAB MED

Seminars in clinical pathology including clinical chemistry, hematology, immunohematology, microbiology, parasitology, and serology are conducted by faculty whose major interest is that under discussion. Residents do collateral reading for discussion of problems of interpretation, diagnosis, techniques, and research approaches. LAB MED

Principles of laboratory tests in hematology, chemistry, microbiology, and blood banking as well as interpretation of results and correlation of clinical and laboratory data. Residents participate in performance of tests and certain administrative duties related to operation of clinical laboratories. LAB MED

Theory and methodology of clinical chemistry, serology, blood banking, hematology, microbiology, parasitology, and clinical microscopy. Emphasis is on interpretation and correlation of data and study of literature. LAB MED

480.01. Microcomputer Programming in the Clinical Laboratory I. (3) F. Prerequisite: Consent of instructor. Clinical laboratory experience recommended; computer experience not required. Preference given to residents in Laboratory Medicine, clinical laboratory technologists and students in Clinical Laboratory Science. Lecture 2 hours. Lab variable 2-4 hours. Enrollment limited. R. Anderson

Instruction in elementary BASIC programming and computer concepts using examples and
Overview of theory in instructional development. Review and development of writing, style and form for reports, essays and theses. Study of scriptwriting for media as a special form and style of literary expression and language usage. MED ILLUS

201A-B-C. Illustration Survey. (3-3-3) § F, W, Sp. Lecture 2 hours. Lab 3 hours. StoeIting
Theoretical and practical considerations in illustration design for publication, slides and motion media; introduction to surgical illustration such as procedures, roles, observation; design technology and introduction to graphic arts and printing technologies; introduction to biological illustration; statistical graphics. MED ILLUS

204A-B-C. Advanced Illustration. (3-3-3) § F, W, Sp. Prerequisite: Medical and Biological Illustration 201A-B-C. Lecture 1 hour. Lab 6 hours. Wakerlin, StoeIting
Theory and practice in visual information design. Surgical illustration for publication and for projected media; publication design; layout, typography, paste-up and print technology. MED ILLUS

207. Specialty Surgical Illustration: Otolaryngologic and Ophthalmologic. (3) § F, W, Sp. Lecture 1 hour, Lab 6 hours. Wakerlin, StoeIting
Review of anatomy and observation of the ear and eye through otoscope, ophthalmoscope and slit lamp. Ophthalmological illustration, endoscopic drawing; finished illustrations of a retinal field, slit lamp view and a microsurgical procedure. MED ILLUS

210. Intensive Short Course in Presentation Styles and Instructional Strategies. (2) § F. Prerequisite: Consent of instructor. Lecture and Lab 40 hours given as one week of workshops. Wakerlin, Beindorf, StoeIting
Introduction for prospective teaching assistants to instructional techniques and strategies, learning-teaching, organizing study plans, presentation of information, student-teacher interactions, evaluation of learning and teaching, theories of learning and communication, planning audiovisual support materials. MED ILLUS

Ongoing seminar throughout the program. Analyses of productions in all media. Readings and discussion of instructional design, communication and learning theory, behavior modification, programmed instruction, systems design and methods of evaluation. Participation by guest lecturers. MED ILLUS

230A-B-C. Introduction to Communication Media. (3-3-3) § F, W, Sp. Lecture 1 hour. Lab 6 hours. Beindorf
Survey of media production technology and formats. Still photography methods; black and white and color. Theory of media production in film, television and slide-tape augmented by consideration of techniques in storyboarding, scriptwriting, sound and picture editing and animation. MED ILLUS

231. Advanced Media I. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours. Beindorf
Theory of motion media and practice in film and electronic camera techniques, editing, sound production and mixing, and project management. MED ILLUS

232. Advanced Media II. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours. Beindorf
Theory of production design. Roles of production personnel and task definition. Practice in preproduction plan of actual production to be selected for later production in slide-tape, film and television. Production subject to faculty approval and identification of funding. MED ILLUS

233A. Advanced Media III. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 9 hours. Beindorf
Theory and techniques of motion picture animation. Design and production of short full ani-
mation sequence with sound. Longer animated segment may be designed for completion in Medical and Biological Illustration 233B with consent of instructor. MED ILLUS

233B. Advanced Film Animation. (5) § F, W, Sp. Prerequisite: Medical and Biological Illustration 233A and consent of instructor. Lecture 2 hours. Lab 9 hours. Beindorf

Elective continuation of Medical and Biological Illustration 233A, in motion picture film animation. MED ILLUS

298. Thesis Project. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in the thesis project for the master's degree. MED ILLUS

421. Media VI—Motion Media, Film and TV. (4) F. Lecture 2 hours, Lab 6 hours. Beindorf, Banks

Film and television. Videotape production in a studio setting with inserts of student-produced motion pictures. Theories of motion, dynamics of balance, subjective camera motion. Basic cinematography, TV technology, production economics. MED ILLUS

423. Graphics for Publication. (4) F, W, Sp. Prerequisite: Medical and Biological Illustration 201A-B-C and consent of instructor. Lecture 2 hours. Lab 6 hours. Wakerlin, Stoelting

Brochure design and production; photography in graphic design; layout; copy fitting; camera-ready mechanicals; typography; printing; photo-engraving; specifications for printing; paper stocks, inks, etc. MED ILLUS

425. Three-Dimensional Illustration and Maxillofacial Prosthetic Reconstructions. (1-4) F, W, Sp. Prerequisite: Consent of instructor and approval of director. Wakerlin, Koelling, Humelaugh, Harwin

Basic three-dimensional modeling, molding, and casting techniques. Preparation of cosmetic maxillofacial prosthetic reconstructions given major emphasis in course. Students assist in preparation of prostheses for clinic patients. MED ILLUS

428. Display Design and Construction. (1-4) F, W, Sp. Prerequisite: Consent of instructor and approval of director. Wakerlin, Stoelting

Analysis of advantages and disadvantages of displays as teaching instruments. Aspects of design and construction: planning, design, materials, scale models, construction, logistics, cost effectiveness and handling. Field trips to display companies. Production of a display for an actual client. MED ILLUS

431A. Project I. (5) F, W, Sp. Prerequisite: Medical and Biological Illustration 201A-B-C and 230A-B-C. Lecture 2 hours. Lab 9 hours. Staff

Students work on an actual instructional unit in medium of their choice determined by teaching needs, and developed through instructional design concepts, storyboard, script, production planning and budget. MED ILLUS

431B. Project II. (5) F, W, Sp. Prerequisite: Medical and Biological Illustration 431A and consent of instructor. Lecture 2 hours. Lab 9 hours. Staff

Continuation of project production begun in Medical and Biological Illustration 431A. MED ILLUS

431C. Project III. (5) F, W, Sp. Prerequisite: Medical and Biological Illustration 431A-B and consent of instructor. Lecture 2 hours. Lab 9 hours. Staff

Completion of project. MED ILLUS

433. Business and Administration Practices in Medical Illustration. (2) F, W or Sp. Seminar 2 hours. Wakerlin and Staff

Seminar. Reading and discussion of principles and practices for professional business management and departmental administration. MED ILLUS

435. Special Study in Medical Illustration. (3-4) F, W or Sp. Prerequisite: Consent of instructor and approval of director. Wakerlin and Staff

An elective for special study in area of choice. MED ILLUS

436A-B. Portfolio, Presentation and Graduate Show. (3-3) F, W. Lecture 1 hour. Lab 6 hours. Wakerlin, Beindorf, Stoelting

Portfolio design and assembly; design and production of graduate show including budget and arrangements for space, guest lists, invitations, food and beverages for reception. MED ILLUS

438. Biological Illustration. (2) F, W or Sp. Prerequisite: Consent of instructor. Lab 6 hours. Christman, Stoelting

Taxonomic illustration of botanic, entomologic, parasitologic, microbiologic and other life science subjects for publication or projection. Various techniques are utilized, but mainly pen and ink. MED ILLUS

Medical Information Science

190. Information Structures. (4) § F. Prerequisite: Knowledge of one higher level programming language. Lecture 3 hours, Lab 3 hours. Bolour

Course covers elementary and high level information structures, data models, file organization techniques and searching, and sorting. Special topics in non-numeric information handling are also included. MED INF SC

195. Clinical Laboratory Computer Science. (2) § W. Prerequisite: Bachelor's degree in physical or biological science. Lecture 2 hours. Henley

A review of the fundamentals of computer sciences as they relate to clinical laboratory information systems and a detailed examination of current clinical laboratory systems. Practical experience will be given programming sample clinical laboratory problems in high level languages. MED INF SC
199. Laboratory Project in Medical Information Science. (1-5) § F, W, Sp. Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. MED INF SC

201. Medical Information Content and Organization. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Simborg
Consideration of the uses of medical information and its content, organization, and format to serve these uses. Emphasis is on the medical record as a medium of medical information communication, and a review of medical information coding methodologies. MED INF SC

202. The Medical Environment. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Bleis
Survey of the professions, institutions, organizations, and populations involved in the health care process; the aims, expectations, and constraints involved in the medical environment. Course provides background for students without previous medical/health care systems experience, concerning processes and functions. MED INF SC

205. Administration and Evaluation of Health Care Systems. (3) § Sp. Lecture 2 hours, Lab 3 hours. Staff
Introduction to the concepts, principles, definitions and processes of management and financial accounting with particular emphasis on hospitals and other health care systems. MED INF SC

210A. Computer Systems I. (4) § W. Prerequisite: Medical Information Science 190 or equivalent, or consent of instructor. Lecture 3 hours, Lab 3 hours. Wasserman
Introduction to computer system architecture and organization; operating systems; programming languages and their design. MED INF SC

210B. Computer Systems II. (4) § Sp. Prerequisite: Medical Information Science 210A or equivalent, or consent of instructor. Lecture 3 hours, Lab 3 hours. Wasserman
Language processors; software engineering concepts; specification and design of software systems; and software reliability. MED INF SC

211. Introduction to Operations Research. (3) § F. Prerequisite: Elementary statistics or probability, and one year of calculus. Lecture 3 hours. Staff
An introduction to mathematical programming, including linear programming, sensitivity analysis, and duality. Queueing processes and other selected topics such as computer simulation of operations research models are included. MED INF SC

222. Systems Analysis of Medical Care. (3) § F. Lecture 3 hours. Stimson
Introduction to use of operations research and systems analysis as aids to design, management or evaluation of medical care systems. Application of operations research techniques to hospitals and other health care facilities is studied within a systems framework. MED INF SC

225A. Design of Medical Information Systems. (2) § F. Prerequisite: Consent of instructor. Lecture 1 hour, Lab 3 hours. Henley
The design of previous medical information systems is examined. Successful components of the systems will be studied in depth, with respect to cost, performance, and acceptability. Field trips to existing systems will be made. MED INF SC

225B. Design of Medical Information Systems. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours, Lab 3 hours. Henley
The design of medical information systems is examined. The systems will be studied with respect to cost, performance, and acceptability. Analysis and proposals for new systems will be done through laboratory sessions in medical settings. MED INF SC

225C. Design of Medical Information Systems. (4) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours, Lab 6 hours. Henley
The design of medical information systems is examined. The systems will be studied with respect to cost, performance, and acceptability. Laboratory sessions involving analysis and interactive program implementation are a continuation of the studies in Medical Information Science 225B. MED INF SC

230A. Linear Models and Experimental Design. (4) § W. Prerequisite: Biostatistics 197 or equivalent, and one year of calculus. Lecture 3 hours, Lab 3 hours. Equivalent to Biostatistics 230A. Heilbron
Techniques for designing and analyzing data from experiments and observational studies, using the methodology of linear regression and the analysis of variance. Laboratory emphasizes computerized data analysis of clinical data. MED INF SC

230B. Linear Models and Experimental Design. (2) § Sp. Prerequisite: Medical Information Science 230A. Lecture 1½ hours, Lab 1½ hours. Equivalent to Biostatistics 230B. Heilbron
Continuation of analysis of variance and experimental design, including co-variance analysis, random blocks, repeated measures analysis; linear models in analysis of discrete data; linear logistic regression and log-linear models for contingency tables. MED INF SC

240. Data Base Management. (3) § Sp. Prerequisite: Medical Information Science 210B or equivalent, or consent of instructor. Bolour
Course covers techniques for logical and physical data base organization, data independence, models of data, approaches to large scale data base management, security and privacy, data description languages, and query languages. MED INF SC
245. Seminar: Software Engineering. (3) § F, W. Prerequisite: Medical Information Science 210B or equivalent, or consent of instructor. Lecture 2 hours, Lab 3 hours. Wasserman

Techniques for program design and development; methods for requirements definition and system specification; programming discipline; management of programming projects; verification and testing of programs; software tools. Emphasis on group participation in small software development projects. MED INF SC

Course covers the treatment of a number of fundamental concepts which form the basis of information science, such as the nature of information and communication, and the problem of representation of knowledge. MED INF SC

250. Research in Medical Information Science. (1-8) § F, W, S. Staff

MED INF SC

Application of interactive three-dimensional computer graphics to modeling complex biological systems, particularly large molecules and their interactions. Elements of hardware and a detailed discussion of software. Demonstration and self-scheduled projects using the computer graphics laboratory. MED INF SC

290. Seminar in Medical Information Science. (1-6) § F, W, Sp. Lecture 1 hour, Lab 0-15 hours. Staff

Selected topics in medical information science. Subjects chosen will range from special topics in information science to hardware, software, and systems studies. MED INF SC

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. MED INF SC

Medicine

110. Basic Clerkship in Medicine at UC, SFGH, VA, and MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Medicine 132A-B-C. Open to UCSF students only.

L. H. Smith, Carbone, Sleisenger, R. Haber, Woeb er

Students are part of the ward team with the house staff and faculty. Bedside instruction in history-taking, physical diagnosis, selected seminars in general medicine including the psychiatric aspects of medicine, and presentations and demonstrations of relevant cases. MEDICINE

131A-B-C. Introduction to Clinical Medicine. (1-2-3) F, W, Sp. Prerequisite: First-year standing or consent of instructor. Lecture 1 hour F; Section work 2 hours F; 4 hours W. Altman

Interdepartmental instruction in: interviewing skills and techniques; basic physical examination and interpretation of symptoms relating to locomotor system, eye, ear, upper respiratory tract, and skin; and social responsibilities of medical practice. Lectures, clinical demonstrations, conferences, preceptorship in ambulatory care setting. MEDICINE

132A-B-C. Introduction to Clinical Medicine. (8-8-3) F, W, Sp. Prerequisite: Anatomy 100, 102, and 103; Biochemistry 100A-B; Medicine 131 A-B-C; Microbiology 100A, 100B, and 100C (may be taken concurrently); Pathology 101, 102, and 103 (may be taken concurrently); Physiology 100 and 101; or consent of instructor. Lecture 5 hours F; 1 hour W; 1 hour Sp; Lab 2 hours F; Section work 4 hours F; 6 hours W. Altman

Continuation of interdepartmental course on pathophysiology of disease and techniques of collecting and assessing clinical data, including history-taking, examination of the patient, and use of laboratory tests. Lectures, demonstrations, bedside work, laboratories, conferences, and independent study. MEDICINE

140.01. Advanced Clinical Clerkship at UC, MZ, SFGH, and VA. (1½ per week) Su, F, W, Sp. Prerequisite: Satisfactory completion of Medicine 110 and consent of instructor for third-year students.

L. H. Smith, Carbone, Sleisenger, R. Haber, Woeb er

Students are assigned patients on the staff and private wards. They are supervised by attending and resident staff. They present patients on ward rounds, assist with procedures, and attend specialty conferences where their patients are involved. MEDICINE

140.02. Clinical Clerkship Off-Campus. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and approval of third and fourth year coordinator.

L. H. Smith, Carbone

Clinical clerkships in off-campus hospitals approved by the department chairman, third and fourth year coordinator and the dean. MEDICINE

140.03. Acting Intern in the Cancer Research Institute. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and 131A-B-C.

Friedman and Staff

On Clinical Cancer Chemotherapy Service, students work-up patients, present them to attending staff and at conferences, do daily procedures, and write orders under supervision. MEDICINE

140.04. Senior Internal Medicine Clinical Clerkship at NRMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Kemp

Clinical clerkship at NRMC. Student functions as intern in ward medicine under supervision of residents and attending staff, or acts as
consultant in selected subspecialty under supervision of board certified staff. MEDICINE

140.05. **Cardiology at PMC.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. **Selzer**

Students participate actively in rounds, conferences, and informal teaching sessions, with emphasis on reading electrocardiograms. MEDICINE

140.07. **Clinical and Physiological Aspects of Pulmonary Disease at SFGH.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. **Hopewell, J. Murray, Overland, Little**

Students serve as acting interns in care of patients admitted to chest ward and respiratory care unit at SFGH. They participate fully in teaching activities of the service including daily radiology conferences, teaching rounds, pulmonary function testing, and service conferences. MEDICINE

140.08. **Gastroenterology at U.C.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. **Schmid**

Students become a part of the gastroenterology group and participate in all activities including work-up of patients in clinics and wards. They attend all conferences. MEDICINE

140.09. **Clinical Cardiology Service at M.Z.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and 140.01 or equivalent senior ward medicine experience. Consent of instructor. **Mailhot**

Students work-up patients, follow through diagnostic procedures, phonocardiograms, echocardiograms, stress electrocardiograms, cardiac catheterization, and angiocardio- graphic studies. Instruction in cardiovascular diagnosis, pathophysiology of heart disease, heart sounds. Attendance at departmental conferences. Reading assigned. MEDICINE

140.11. **Renal-Electrolyte Service at PHS.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. **Hulter**

Students work-up and manage patients under supervision; participate in activities of the Dialysis Center including peritoneal and hemodialysis; attend Renal Clinic, presenting cases and daily rounds; attend seminars and conferences; and observe research activities of the unit. MEDICINE

140.12. **Clinical Cardiology at PHS.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing. **R. Sullivan, Blumberg, Moffett**

Students are assigned cardiac patients for work-up and management under supervision of resident, fellow, and instructors. They attend daily rounds, present patients in Cardiology Clinic, and observe cardiopulmonary unit procedure, including cardiac catheterization and cardioversion. Instruction in electrocardiology is included. MEDICINE

140.13. **Clinical Clerkship at PHS.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. **Lanzerotti**

Students are assigned patients for work-up and management under supervision. They make daily rounds and present cases, attend seminars, Journal Club, CPC's, Death Conference, and Grand Rounds. Scope of responsibility is similar to that of interns. MEDICINE

140.14. **Endocrine-Metabolic Medicine at PHS.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. **V. Schneider**

Students work-up patients and participate in activities of the Metabolic Service under supervision; attend Metabolic Clinic; present patients there and on endocrine rounds; attend seminars and conferences. Program structured for participation in research activities according to students' interests and qualifications. MEDICINE

140.15. **Inpatient Medicine at K.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Limited to fourth year students. **Fessel**

Students based at K serve as clinical clerks. They examine patients, participate in ward rounds and attend teaching seminars and conferences of the Department of Medicine. MEDICINE

140.16. **Hematology at SFGH.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. **Embry, R. O. Wallerstein**

Students work-up hematology patients; review pertinent clinical laboratory data of problems presented; attend slide rounds; assist in preparation of material for sessions; attend hematology rounds. MEDICINE

140.18. **Gastroenterology at VA.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. **Brandborg**

Students are incorporated into the Gastroenterology Unit. They are assigned consultations, perform sigmoidoscopies under supervision, observe upper gastrointestinal endoscopy, and small bowel biopsy. They participate in all rounds and conferences. MEDICINE

140.19. **Clinical Cardiology at VA.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. **Bristow**

Students share consultations and on-call with cardiology residents; work-up patients on wards in CCU; assist at D.C. electrical conversion; interpret EKG's and vectorcardiograms; attend rounds and conferences. MEDICINE

140.20. **Infectious Disease Clerkship at UC.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Open to UCSF students only. **J. Conte**

Students work-up and present patients under the direct supervision of the infectious disease resident. Patients are presented at attending rounds and infectious disease conferences. MEDICINE

140.21. **Private Practice.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. **L. H. Smith, Carbone**

Working experience with an internist on the clinical faculty as he makes rounds in various pri-
private hospitals and at UC, sees patients in private office and on house calls, does follow-up studies, and reads electrocardiograms. MEDICINE

140.22A. Pathophysiology of Disease—Cardiovascular. (6) F, Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

**Siperstein, Sleisenger, Scheinman**

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22B. Pathophysiology of Disease—Hematology. (6) F, Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

**Siperstein, Sleisenger, Dallman, Ries**

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22C. Pathophysiology of Disease—Renal. (6) F, Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

**Siperstein, Sleisenger, Sebastian**

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

**Siperstein, Sleisenger, L. Epstein**

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22E. Pathophysiology of Disease—Dermatologic—Infectious Disease. (6) F. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

**Siperstein, Sleisenger**

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22F. Pathophysiology of Disease—Clinical Pharmacology. (6) F. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

**Siperstein, Sleisenger, Melmon, Brater**

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

**Siperstein, Sleisenger, Talal, Fye**

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE
140.22K. Pathophysiology of Disease—Pulmonary. (6) F, Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

Siperstein, Slepenger, Boushey

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

Nestle, Siperstein, Slepenger

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

Forsham

Students based at Metabolic Research Unit and eleventh floor Moffitt Hospital act as assistants to interns, residents, and research fellows on the ward; attend endocrine and metabolic clinics and seminars, and teaching exercises of endocrinology and metabolism, including grand rounds in medicine. MEDICINE

140.24. Rheumatology—Clinical Immunology at UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Stobo

Familiarization with clinical manifestations, rheumatic disease therapy, immunologic disorders. Participation in in/outpatient clinics. Basic immunologic principles as related to clinically apparent immunologic dysfunction. Assignment of pertinent literature, lectures, and introduction to principles and practice of various immunologic testing. MEDICINE

140.25. Renal and Electrolyte Service at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Humphreys

Students work-up and follow renal and electrolyte patients seen in the service, participate actively in hemodialysis and peritoneal dialysis; they attend thrice-weekly ward rounds and bi-weekly seminars in renal and electrolyte diseases. MEDICINE

140.26. Acute Care Units at MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Uhley

Primary emphasis is on the treatment of acutely ill patients in Coronary Care Unit and Intensive Care Unit. Includes teaching in the use of monitoring and related electronic equipment, cardioversion, and related aspects of electrocardiography. MEDICINE

140.27. Clinical Clerkship Stressing Cardio-pulmonary Problems at C. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Griffeth

Students attend rounds in the Coronary Care Unit; receive instruction in cardiology, stressing electrocardiography; may work in the pulmonary function laboratory, and attend all regular teaching conferences and seminars. MEDICINE

140.28. Infectious Diseases at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Mills

Course includes active consultation service averaging three new consults per day. Daily patient rounds; weekly combined Infectious Diseases/Pediatrics mini-rounds and Infectious Diseases intercity rounds. Introduction to two Infectious Diseases clinics per week. Reading and library research. MEDICINE

140.29. Hematology at UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Shoheb

Students work-up and present patients in the wards and outpatient clinics, participate in conferences and seminars, and learn the laboratory procedures applicable to their patients. MEDICINE

140.30. Clerkship in Endocrinology-Metabolism at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Bigler, Schambelan, and Staff

The Endocrine-Metabolic Service provides daily house staff/fellow-supervised consultations, weekly clinic, bi-weekly rounds with senior staff, conferences on current research. Emphasis on clinical investigation studies of endocrine disorders in the Clinical Study Center, a seven-bed multicategorical general research center. MEDICINE

Students function as clinical clerks, working up patients under supervision of interns and residents. They assist in such specialized procedures as sigmoidoscopies per oral endoscopies. They attend radiology and pathology conferences and seminars with visiting consultants. MEDICINE

140.32. Coronary Care Unit at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Fourth-year standing or consent of instructor. A four-week cardiology elective or Medicine 140.01 is recommended.

R. W. Peters, N. Goldschlager, Scheinman

Students work as interns in the Coronary Care Unit and attend all regular teaching conferences and seminars. MEDICINE

140.33. Infectious Diseases at PMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Valentine

Students study clinical clerkship in infectious diseases. Activities include working-up patients, relating laboratory data to clinical situations, making ward rounds, and attending seminars. MEDICINE
140.34. Clerkship in Renal Disease. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Rector

The student will join the renal team and participate under supervision in evaluation and treatment of patients with renal disease or disorders of fluid, acid-base, or electrolyte balance. Emphasis is placed on pathophysiology, history-taking, physical examination, and treatment. MEDICINE

140.35. Cardiology at SFGH. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. 
Chaitlin, Rapaport, Scheinman, R. W. Peters

Students see patients in consultation and wards and clinics, read electrocardiograms, review cases with cardiac consultant, and attend all seminars and conferences. MEDICINE

140.36. Emergency Service Clerkship at UC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and consent of instructor. Advanced CVRI provider recommended, but not required. 
J. Conte, Heller

Students serve forty hours per week, Monday through Friday, as externs working and sharing responsibilities with emergency medicine fellows and medical residents. Attendance at lectures and emergency medicine conferences and participation in attending rounds and oral presentations is required. MEDICINE

140.37. Coronary Care Unit at PMC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. 
Medicine 140.05 or equivalent four-week cardiology elective recommended. Limited to fourth-year students. Seler

Students will work-up, formulate treatment plans, and follow patients in the Coronary Care Unit. Daily rounds will be made with resident and attending staff. Opportunity to participate in other teaching rounds, conferences, and ECG reading as time permits. MEDICINE

140.38. Office Practice of Clinical Rheumatology at K. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and consent of instructor. Fessel

Primary office practice of clinical rheumatology dealing with all common rheumatological problems encountered in daily clinical practice. Opportunity to attend regular staff rounds and formal teaching rounds in rheumatology at K. MEDICINE

140.39. Clinical and Physiological Aspects of Pulmonary Disease at UC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. W. Gold

Students examine patients in Chest Clinic, on the wards and in RCU and present them at ward rounds, pulmonary function and radiology conferences. They participate in pulmonary function testing and do assigned reading. MEDICINE

140.40. Clinical and Physiological Aspects of Pulmonary Diseases at A. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. Lifshay

Students examine patients in the outpatient office, on wards, ICU, RCU and present them at ward rounds. Opportunity to participate in pulmonary function testing, and introduction to respiratory therapy and chest physical therapy techniques. Acute and chronic care will be emphasized. MEDICINE

140.41. Gastroenterology at SFGH. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. Limited to fourth-year students. Cello

Students are responsible for evaluation of gastrointestinal patients on medical and surgical wards. Student work-ups are thoroughly discussed with gastroenterology staff. Students observe GI techniques including sigmoidoscopy, colonoscopy, endoscopy, liver biopsy. Daily clinical conferences are held at three affiliated hospitals. MEDICINE

140.42. Clinical Pharmacology at SFGH. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. Preference given to UCSF students. Limited enrollment for off-campus students. C. Becker

Students participate in daily pharmacology seminars reviewing basic pharmacology and therapeutic principles of commonly used drugs. Students evaluate patients regarding problems of drug choice and drug interaction. Emphasis is placed upon alcoholism, narcotic addiction, poisoning, shock and management of hypertension. MEDICINE

140.43. Basic Rheumatology and Immunology at VA. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. 
Talal

A four- to twelve-week introduction to rheumatology and immunology, offering both clinical and laboratory experience. The student will participate in inpatient and outpatient care and take part in didactic and practical aspects of the research program. MEDICINE

140.44. Clinical and Physiological Aspects of Pulmonary Disease at VA. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. Kaltreider

Students examine patients in the Chest Clinic, on the wards and in RCU and present them at ward rounds, pulmonary function and radiology conferences. They participate in pulmonary function testing and do assigned reading. MEDICINE

140.45. Endocrine-Metabolism Clerkship at VA (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and consent of instructor. Enrollment limited. Priority given to UCSF students. Siperstein, Arnaud

An introduction to the diagnosis and treatment of endocrine-metabolism diseases. Areas covered are those endocrinopathies involving the major endocrine glands, as well as diabetes mellitus and hyperlipemias. Patients will be examined and treated in both the inpatient and outpatient services. MEDICINE

140.50. Hematology Oncology at MZ. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. R. Cohen

Intensive clinical course emphasizing the diagnostic evaluation and management of pa-
tients with blood disease or cancer. The latest techniques in therapy are studied with stress on blood morphology and laboratory test interpretation. Exposure to specialized oncology care unit also available. MEDICINE

140.51. Gastroenterology at MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Aron

Clinical clerks participate in diagnosis and treatment of patients with gastrointestinal problems, biopsy and endoscopic procedures, and use of medical literature in clinical problem solving. Weekly seminars in pathophysiology, journal club, and tissue review supplement a full conference schedule. MEDICINE

140.52. Clinical Renal Elective at VA. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Arieiff

Clerkship in clinical nephrology. Lectures, rounds, conferences, renal biopsy review. Patients with acute and chronic renal disease, acute and chronic dialysis patients, patients with fluid and electrolyte problems. Renal grand rounds, journal club, nephrology research, and renal radiology conferences weekly. MEDICINE

140.53. Infectious Disease at MZ. (1½ per week) F, W, Sp. Prerequisite: Medicine 110. W. Drew

Clinical Infectious Disease Service and Clinical Microbiology Laboratory provide optimal integration of clinical and laboratory medicine. Emphasis on learning techniques of diagnostic microbiology such as bacteriology, virology, parasitology, mycology, and diagnosis management of patients with infections; research in either area. MEDICINE

Rounds with directors of Renal Service on inpatients with a variety of renal diseases, fluid, electrolyte, acid and base disorders; outpatients on chronic hemodialysis and exposure to acute hemodialysis, and related problems. Didactic sessions in clinical renal physiology. MEDICINE

140.55. Acting Internship at C. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Limited to fourth-year students. Griffeth

Students, teamed with a resident, will evaluate and share in the care of patients admitted to an acute care hospital. Experience includes history taking, physical examination, therapeutic plan, and progress notes. Attendance at daily teaching rounds and conferences. MEDICINE

140.56. Geriatric Medicine Clerkship at MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Feigenbaum, H. Brownstein, Botkin, L. Fink

Course offers opportunity for participation in various medically oriented geriatric programs. Assignment to health care teams seeing patients at home, at MZ Geriatric Day Care Center, and the Jewish Home for the Aged. Supervision under MZ faculty and house staff. MEDICINE

140.57. Cardiology at Fresno. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. J. Abbott

Students see patients in the coronary care unit, wards and clinics at the University of California Teaching Facility at Fresno. They will develop and implement treatment plans with the consultant, read electrocardiograms, and attend all seminars and conferences. MEDICINE

140.58. Pulmonary Service at VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. Stauffer

Students on Chest Service will have primary care responsibilities for medical inpatients under supervision of the Physician Director of the Respiratory Care Service. Instruction on topics such as the use of respirators, arterial blood gas sampling and techniques. MEDICINE

140.59. Medical Transplantation. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. Amend, Vincenti

Rotation through an active renal transplant service including clinical immunology, clinical renal pathophysiology, renal diagnosis such as X-ray, biopsy, scan. The student's experience in the care of inpatients and outpatients will encompass other internal medical problems as well. MEDICINE

140.60. Rheumatology Clerkship in Fresno. (1½ per week) Prerequisite: Fourth-year standing. Bertken

Full-time clinical experience in rheumatology at Valley Medical Center, Veterans Administration Hospital, Valley Children's Hospital, and at a private practice office. Major patient responsibilities, a broad spectrum of diseases, and close relationship with instructor. MEDICINE

140.61. Acting Internship in Internal Medicine at VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. Morrelli

Assignment to team with first- and second-year resident; rounds with attending faculty four to five times weekly; attend daily noon conferences; increase skills in history-taking, physical examination, write-ups, and oral presentation. Experience in writing orders countersigned by resident. MEDICINE

140.62. Emergency Medicine at MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or Surgery 110. Hellerstein

Emergency room experience providing acute care to a mixed inner city and middle class population. Students see medical emergencies, minor trauma, and acute problems in a variety of disciplines including gynecology, ophthalmology, ENT, and orthopaedics. Attendance at specialty conferences encouraged. MEDICINE

140.63. Elective in Internal Medicine. (1½ per week) Su, F, W, Sp. Shearn

Fourth-year elective rotation for one month on medical wards at Kaiser Permanente Medical Center in Oakland. Students will be integrated into the residency training program and will be
involved in the care of hospitalized patients in an urban community prepaid health plan hospital. MEDICINE

140.64. Cardiology-Electrocardiography at UC. (1½ per week) F, W, Sp. Prerequisite: Medicine 110. D. Perloff, Scheinman

Course instructs students on how to interpret electrocardiograms with additional exposure to other non-invasive procedures including echocardiography, treadmill exercise testing, and use of radioisotopes in cardiology. Students will also attend cardiology conferences, clinics, and coronary care unit rounds. MEDICINE

140.65. Elective in Clinical Oncology. (1½ per week) W. Prerequisite: Medicine 110 or Pediatrics 110. L. B. Epstein

Four one-week clinical rotations taught by faculty in inpatient medical, pediatric, radiation and surgical oncology. Daily noon lectures on diagnosis, management, therapy of patients with malignancy by faculty and guest oncologists. Syllabus of pertinent references from current oncology literature. MEDICINE

150.02. Research in Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of faculty member in charge of student’s research project and approval of third- and fourth-year coordinator. L. H. Smith, Carbone

Students continue previously initiated research projects under the guidance of faculty members. MEDICINE

150.03. Cancer Viruses. (1½ per week) Su, F, W, Sp. Prerequisite: Basic course in microbiology. J. A. Levy

Tissue culture techniques and animal experimentation will be used to demonstrate the role of viruses in animal malignancies and autoimmune disease. Research serves as a model system for studying similar disorders in man. MEDICINE

160.03. Interdisciplinary Clinical Skills. (2) W, Sp. Prerequisite: Second-year standing or consent of instructor. Seminar 1 hour. Lab 3 hours. Naughton, Veatch

Skills laboratory-seminar designed to create a working relationship between medical and nursing students, using teaching and acquisition of clinical and communication skills as the interactive mode. Bedside skills for direct patient care will be taught and practiced. MEDICINE

Faculty and students participate in a combined clinical rounds-seminar course designed to develop students’ analytical approach in relating basic medical research to clinical problems. Intended for advanced students in the Medical Scientist Training Program. MEDICINE

Instruction in basic electrophysiologic principles and interpretation of electrocardiograms. MEDICINE

170.05. Fundamentals of Electrocardiography Interpretation. (1) W. Prerequisite: Medicine 131A. Lecture 1 hour. Rapaport

Review of physical principles of electrocardiography and clinical application of electrocardiographic interpretation. MEDICINE

170.07. Non-Invasive Laboratory Cardiology. (1) Sp. Prerequisite: Medicine 170.05. Rapaport

Fundamentals of non-invasive laboratory cardiologic procedures will be discussed. Techniques and role of echocardiography, stress electrocardiography, Holter monitoring, phonocardiography, systolic time intervals, vectorcardiography, apexcardiography and other areas will be covered. MEDICINE

170.08. Introduction to Cancer Medicine. (2) F. Lecture 2 hours. L. White

Course provides a humanistic orientation to cancer that will form a framework for better understanding and integration of the information on cancer presented in other health science courses. Biomedical, clinical, and psychosocial aspects will be explored. MEDICINE

Faculty from the basic sciences and clinical departments will discuss their current research in this advanced lecture, seminar, and reading course designed for students interested in medical research. Emphasis will be on analysis and critical evaluation of biomedical research. MEDICINE

180. Industrial Toxicology. (2) F. Prerequisite: Consent of instructor. Lecture 2 hours. C. Becker

To provide understanding of basic principles of toxicology as related to work environment and workers’ health. Emphasis is on chemicals including heavy metals and pesticides, methods of surveillance, principles of acute and chronic toxicity testing. Includes lectures, student presentations, and discussion. MEDICINE

198. Supervised Study in Medicine. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor preceptor and approval of third- and fourth-year coordinator. L. H. Smith, Carbone

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. MEDICINE

199. Laboratory Project in Medicine. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor preceptor and approval of third- and fourth-year coordinator. L. H. Smith, Carbone
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. MEDICINE

400. Medical Staff Conference. (2) F, W, Sp.
UC L. H. Smith, SFGH Rapaport, VA Sleisinger

Interns and residents prepare and present case histories of patients at medical staff conferences including reference to the literature, laboratory work, and special studies. Faculty members and visiting professors discuss the cases and present new developments in their respective fields. MEDICINE

L. H. Smith

A series of discussions is conducted in the various subspecialties of internal medicine. Students take an active part in the presentation and discussion of the problems involved, including reference to the literature, clinical demonstrations, and directed student participation. MEDICINE

VA Sleisinger

Seminars on recent literature in internal medicine, with assigned reading, required reports and evaluation of presented material by interns, residents and faculty. MEDICINE

L. H. Smith

Seminars are conducted in the fields of gastroenterology, hematology, cardiology, electrocardiology, endocrinology, chest diseases and pulmonary physiology, thyroid diseases, psychosomatic medicine, arthritis and rheumatic diseases, infectious diseases, and radiology. Library research, occasional formal reports and patient presentations are required. MEDICINE

SFGH H. Williams and Staff

Seminars are conducted in cardiology, hematology, gastroenterology, infectious diseases, metabolic diseases, and pathology, involving discussions, required reading, and reports. MEDICINE

VA Sleisinger

Seminars are conducted in cardiology, electrocardiography, hematology, gastroenterology, radiology, fluid and electrolyte balance, endocrinology and pathology, involving discussions, required reading, and reports. Elective seminars include a chest disease conference, joint medical and surgical conference, tumor board, dermatology conference, and neuropsychiatry conference. MEDICINE

UC L. H. Smith, SFGH H. Williams, VA Sleisinger

Research programs are arranged with appropriate faculty members on an individual basis. MEDICINE

SFGH H. Williams, VA Sleisinger

Residents take an active part in the presentation and discussion of problems connected with the correlation of clinical manifestations of disease with postmortem studies. Conferences include reference to the literature, clinical demonstrations, and laboratory work. MEDICINE

Sokolow

Seminars (individual instruction) for residents in medicine and trainees in cardiology by cardiac consultants in the interpretation of all electrocardiograms and phonocardiograms taken at UC. MEDICINE

SFGH H. Williams, UC L. H. Smith

Residents are responsible for the care of patients, under the direction of the attending staff, and participate in student teaching. Third-year, senior, and chief residents provide teaching and consultation service in the hospitals and outpatient clinics. MEDICINE

Wocher

Residents are responsible for the care of patients, under the direction of the attending staff, and participate in student teaching. Senior residents provide teaching and consultation service in the hospital and outpatient clinics. MEDICINE

VAF Rosenstiel

Residents are responsible for patient care, under the direction of the attending staff, including history-taking, physical examinations, laboratory tests, and consultations. The chief resident, in addition, has certain responsibilities involving the residents, and consulates for all other hospital services. MEDICINE

460. Clinical Primary Care. (½ per week) Su, F, W, Sp. Prerequisite: Refer to Ambulatory and Community Medicine 460. Crede and Staff

Interns in the Primary Care Track of Internal Medicine are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Medicine Internship Program as well as related clinical services such as Dermatology, Neurology. MEDICINE

461. Clinical Primary Care. (1½ per week) Su, F, W, Sp. Prerequisite: Refer to Ambulatory and Community Medicine 461. Crede and Staff

Residents in the Primary Care Track of Internal Medicine are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Medicine Internship Program as well as related clinical services such as Dermatology, Neurology. MEDICINE

SFGH H. Williams
Interns rotate through medical wards and emergency hospital. Under the supervision of the attending staff, they are responsible for the care of patients, including history-taking, medical work-ups, laboratory tests, and consultation.

MEDICINE

SFGH H. Williams

A modified "straight" medical internship consisting of eight to nine months service in general medicine, chest, and the emergency rooms, with three to four months spent in other hospital services. MEDICINE

UC L. H. Smith

Interns are responsible for the care of patients, under the direction of the attending staff, and participate in student teaching. MEDICINE

Microbiology and Immunology

100A. Medical Immunology. (1½) Sp. Prerequisite: Biochemistry 100A-B. Lecture 2 hours for nine weeks. Equivalent to Microbiology 190A.  
J. W. Goodman

Lectures on the fundamentals of immunology. Small group seminars on patient-related problems in this field. MICROBIOL

100B. Medical Microbiology and Virology. (6½) F. Prerequisite: Biochemistry 100A-B. Lecture 4½ hours. Lab 3 hours. Conference 1 hour. Equivalent to Microbiology 190B.  
J. W. Goodman

Pathogenesis of infection by, and resistance to, bacteria, fungi and viruses. Natural history, essentials of diagnosis, treatment, and epidemiology of diseases. Laboratory demonstrations and exercises of essential medical skills. Problem-solving exercises and small group seminars involving clinical cases. MICROBIOL

120. Microbiology. (4) § Sp. Lecture 4 hours.  
Halde

Fundamentals of microbiology and immunology for pharmacy students with emphasis on mechanisms of disease production by bacteria, fungi and viruses, and mechanisms of resistance to infection. Antibiotics, mode of action and genetics, sterilization, disinfection, toxins, indigenous flora, hospital infections, immunization. MICROBIOL

126A. Microbiology. (1) Sp. Lecture 1 hour.  
Hurst, R. Speck

Introduction to general immunology. MICROBIOL

126B. Microbiology. (5) W. Lecture 3 hours. Lab and conference 6 hours.  
Hurst, R. Speck

Comprehensive presentation of microorganisms including bacteria, fungi, viruses; fundamentals of infection and resistance, disinfection, sterilization, and antimicrobial agents. Laboratory studies and demonstrations on indigenous oral flora and applications of microbiology to dentistry. MICROBIOL

127. Microbiology Laboratory. (2) § Sp. Prerequisite: Concurrent enrollment in Microbiology 120. Lab and conference 4 hours. Halde

Morphology, physiology, and immunology techniques used in laboratory diagnosis of selected bacterial diseases. Antibiotic susceptibility, disinfection, and sterility exercises. Demonstration on virology. MICROBIOL

150.01. Research in Microbiology. (1½) Su, F, W, Sp. Prerequisite: Microbiology 100A and 100B and consent of instructor.  
Staff

Research in microbiology; block elective for fourth-year students. MICROBIOL

190A. Medical Immunology for Graduate Students. (1½) § Sp. Prerequisite: Biochemistry 100A-B. Lecture 2 hours for nine weeks. Equivalent to Microbiology 100A.  
J. W. Goodman

Lectures on the fundamentals of immunology. Small group seminars on patient-related problems in this field. MICROBIOL

190B. Medical Microbiology and Virology for Graduate Students. (6½) § F. Prerequisite: Biochemistry 100A-B. Lecture 4½ hours. Lab 3 hours. Conference 1 hour. Equivalent to Microbiology 100B.  
J. W. Goodman

Pathogenesis of infection by, and resistance to, bacteria, fungi, and viruses. Natural history, essentials of diagnosis, treatment, and epidemiology of diseases. Laboratory demonstrations and exercises of essential medical skills. Problem-solving exercises and small group seminars involving clinical cases. MICROBIOL

190C. Medical Virology for Graduate Students. (1½) § F. Prerequisite: Biochemistry 100A-B. Lecture 1½ hours. Equivalent to Microbiology 100C.  
Bishop

Lectures on the fundamentals of virology. Small group seminars on patient-related problems in this field. MICROBIOL

198. Supervised Study in Microbiology and Immunology. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor.  
Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. MICROBIOL

199. Laboratory Project in Microbiology and Immunology (1-5) § F, W, Sp. Prerequisite: Consent of instructor.  
Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. MICROBIOL

203. Molecular and Cellular Immunology. (3) § F. Prerequisite: Biochemistry 100A-B and Microbiology 100A and 100B or equivalents. Lecture 3 hours. Offered in alternate years. Not offered 1980-81.  
J. W. Goodman, G. Lewis

Structural and functional aspects of antigens and antibodies, including chemical and genetic
basis of immunogenicity, structure and biosynthesis of immunoglobulins, antigen-antibody interactions, immunogenetics, properties of immunocompetent cells, cell cooperation, lymphocyte receptors for antigens. MICROBIOI

204. Immunobiology. (3) § W. Prerequisite: Microbiology 100A and 100B or equivalent course in basic immunology. Offered in alternate years. Not offered 1980-81. Linscott

An advanced course covering antigen-antibody interactions, with special emphasis on their biological importance; experimental hypersensitivity, tumor immunology, transplantation immunology, immunological unresponsiveness, cytotoxic reactions, and the role of the complement system. MICROBIOI

205. Selected Topics in Cellular Immunology. (3) § Sp. Prerequisite: Microbiology 203 and 204. Lecture 3 hours. Offered in alternate years. Not offered 1980-81. C. L. Miller

An in-depth analysis of selected areas in cellular immunology, including lymphoid cell interactions in immune regulation; specific and nonspecific immuno-suppression; and genetic control of the immune response. MICROBIOI

206. Pathogenic Fungi. (2) § F. Prerequisite: Microbiology 100A and 100B. Halde

A systematic review of the fungi responsible for human disease, emphasizing pathogenesis, epidemiology, and diagnostic laboratory procedures. MICROBIOI

207. Cellular Immunology Laboratory. (3) § Sp. Prerequisite: Microbiology 203, 204 and concurrent enrollment in Microbiology 205. Lab 9 hours. Offered in alternate years. Not offered 1980-81. C. L. Miller

Techniques of in vitro induction of cellular immune responses; separation of A, T and B leukocyte subpopulations; Jerne Plaque assays and cell mediated cytotoxicity assays will be performed. MICROBIOI

The nature of viruses: dynamics of virus-cell interaction with emphasis on animal virus systems, control of expression of virus-specific information in lytic and temperate infection, and role of viruses in malignant transformation of cells. MICROBIOI

209. Research Problems in Immunology. (3) § F, W, Sp. Prerequisite: Microbiology 203 or equivalent and consent of instructor. Lab 9 hours. J. W. Goodman, G. Lewis

Participation in ongoing research problems in the instructor's laboratory. This is not a structured laboratory methods course, but rather a practical research experience in an immunology laboratory involving basic research on mechanisms of lymphocyte activation by antigens and cell interaction. MICROBIOI

213. Clinical and Basic Immunology and Immunopathology. (2) § Sp. Lecture 2 hours. Stobo, Talal

The pathophysiology of autoimmune, rheumatic and certain malignant diseases in relationship to immunologic mechanisms; basic principles of lymphocyte heterogeneity and function; immunologic mechanisms leading to tissue destruction and factors regulating lymphocyte proliferation. Review paper on a selected topic is required. MICROBIOI

220. Seminar. (0) § F, W. Seminar 1 hour. Staff

General microbiology; individual research of advanced graduate students, invited speakers and staff members. Reviews of special topics and journal articles by advanced students. MICROBIOI

221. Oral Microbiology. (1) § F. Prerequisite: Consent of instructor. Seminar 1 hour. Hurst

A seminar course concerned with the role of microorganisms in oral health and disease, with emphasis on the ecology of the oral flora. MICROBIOI

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree. MICROBIOI

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree.

Morphology

110A. Morphology—Occlusion. (1) F. Prerequisite: Concurrent enrollment in Morphology 115A. Lecture 1 hour. Tueller

Course introduces the student to tooth morphology and includes discussion of the development and form of the primary and permanent dentition. RESTOR DENT

110B. Applied Morphology—Occlusion. (1) W. Prerequisite: Morphology 110A and 115A. Concurrent enrollment in Morphology 115B. Lecture 1 hour. Tueller, Meli

The application of individual tooth and arch form to interarch relationships. RESTOR DENT

115A-B. Morphology of Human Dentition. (0-4, 0-4) F, W. Prerequisite: Concurrent enrollment in Morphology 110A and 110B. Lab 6 hours. Hamaguchi

Study of individual tooth form and relationship to adjacent and opposing anatomical structures. RESTOR DENT
Neurological Surgery

Core Clerkship—Neurology 110. Students serve as clinical clerks in the inpatient and outpatient clinics.

140.01. Clinical Neurological Surgery Clerkship at UC, SFGH or VA. (1½ per week) Su, F, W, Sp. C. B. Wilson, Rosegay, Pitts
The student will become a member of the house staff, attending ward rounds, working-up patients, assisting at operations, and taking night call on rotation with a resident. Limited to one student per hospital. NEURO SURG

140.02. Clinical Neurological Surgery Clerkship at SFGH or VA. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110. Pitts
The student becomes a member of the house staff, attending ward rounds, working-up patients, assisting at operations, and taking night call on rotation with a resident. Limited to one student per hospital. NEURO SURG

198. Supervised Study in Neurosurgery. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. NEURO SURG

199. Laboratory Project in Neurosurgery. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Hoff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. NEURO SURG

Residents, under supervision, prepare and present case histories of ward patients including laboratory work, X-ray studies, special investigation and reference to the literature. Discussion is led by the faculty with participation by visitors. NEURO SURG

Conference includes the discussion of special problems and topics in neurology and neurological surgery relating to case presentations. Members of the house staff and graduate students participate. NEURO SURG

Residents discuss clinicopathological aspects of cases, and their correlation with the literature and special studies. Faculty and visitors discuss developments in related fields. Second-year residents organize conferences and participate in gross autopsies on patients from the Neurological Surgery Service. NEURO SURG

Recent literature in neurology and neurological surgery is presented. Discussion by members of the faculty in attendance and by visitors from other schools interested in this and related fields. NEURO SURG

Residents, under supervision, are responsible for patient care in the wards and outpatient clinics including history-taking, physical examinations, laboratory tests, and consultations. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. NEURO SURG

Residents are responsible for the care of patients, under the direction of the attending staff, including history-taking, physical examinations, laboratory tests, and consultations. In addition, the senior resident has certain teaching and administrative responsibilities required by the attending staff. NEURO SURG

Residents are responsible for diagnosis and care of patients in wards and clinics and performance of studies and selected neurosurgical procedures under supervision of the attending staff. They also present patients at conferences and attend seminars and rounds at UC. NEURO SURG

490. Clinical Neurological Surgery at SFGH and VA. (1½ per week) Su, F, W, Sp. Pitts, M. S. Edwards
Interns rotate through neurological surgery wards. Under the supervision of the attending staff, they are responsible for the care of patients, including history-taking, neurologic examinations, laboratory tests, diagnostic procedures, and consultation. NEURO SURG

Neurology

Second-Year Coordinated Instruction—Medicine 132A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Students are assigned patients for study under supervision of attending and resident staffs. They attend work rounds, attending rounds, grand rounds, conferences and lecture-seminars, emphasizing diagnosis and management of common clinical problems and psychiatric aspects of neurology. NEUROLOGY

140.01. Acting Internship in Neurology at UC, SFGH and VA. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110. Approval of the chairperson of the department. R. Fishman
Students serve as acting interns on the inpatient services. Attendance at departmental clinical rounds, seminars, and conferences is required. NEUROLOGY

140.02. Extramural Clinical Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110.

R. Fishman

Clinical clerkship in approved hospitals by special arrangement and approval of the Dean and the chairperson of the department. NEUROLOGY

140.03. Advanced Clinical Clerkship at UC. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor.

R. Fishman

Students serve as clinical clerks in the outpatient clinics. Attendance at departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY

Berg

Participation in child neurology activities, both inpatient and outpatient, and all regularly scheduled conferences of the Child Neurology Division. Study of the developing nervous system and diseases of the nervous system affecting infants, children and adolescents. NEUROLOGY

140.05. Advanced Clinical Clerkship at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor.

R. Fishman

Students serve on the consultation service under the supervision of resident and attending neurologist. Attendance at departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY

140.06. Advanced Clinical Clerkship at VA. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor.

R. Fishman

Students serve on the consultation service under the supervision of resident and attending neurologist. Attendance at departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY

R. Fishman

Opportunities for research in one of the departmental laboratories by arrangement with the chairperson of the department. NEUROLOGY

Baringer

Tissue pathology of diseases of the nervous system will be explored in greater depth in the postmortem room and by gross and microscopic techniques. NEUROLOGY

199. Laboratory Project in Neurology. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor.

R. Fishman and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. NEUROLOGY

R. Fishman

Seminars covering selected subjects in the basic sciences relevant to neurology including neuroanatomy, neurochemistry, neurophysiology, and neuropathology. NEUROLOGY

R. Fishman

Conference includes resident preparation and presentation of patient case histories including reference to the literature, laboratory work, and special studies. Faculty members and visiting professors from other universities discuss new developments in their respective fields. NEUROLOGY

Malamud

Course involves the presentation and discussion of clinical histories and pathologic findings in selected cases of neurologic interest and histopathologic study, and discussion of surgical and postmortem specimens from neurological and neurosurgical patients. NEUROLOGY

Malamud

Course involves pathologic and clinicopathologic research into various aspects of neuropathology. Specific subjects of research are chosen in conjunction with members of the staff. NEUROLOGY

Aminoff

Clinical or basic research in various aspects of electroencephalography may be undertaken under supervision. Specific subjects of research are chosen in conjunction with members of the staff. NEUROLOGY

T. Newton, D. Norman, Winestock, Mani

Neuroradiologic techniques and interpretations are reviewed in detail with particular emphasis on X-rays of the skull and spine, pneumoencephalography, myography and arteriography. NEUROLOGY

R. Fishman

Clinical and basic research in biochemical and metabolic aspects of neurological disorders. After consultation, assignments to one of the several departmental laboratories will be possible. NEUROLOGY

VA Baringer
Specific projects in experimental pathology of the nervous system may be undertaken by direct arrangement. Techniques include neurohistology, histologic autoradiography, and electron microscopy. NEUROLOGY

453. Instruction in Clinical Electroencephalography. (1 1/2 per week) Su, F, W, Sp. Aminoff
Resident learn interpretation of electroencephalograms under the supervision of experienced electroencephalographers. They interpret electroencephalograms on patients they have seen clinically, with individual instruction available as required. Instruction is accredited by the Board of Qualification of the American Electroencephalographic Society. NEUROLOGY

454. Clinical Training in Electromyography. (1 1/2 per week) Su, F, W, Sp. Pickett
Students learn the application of electromyography in the diagnosis of patients seen in the wards and in the outpatient clinic with individual instruction as required. NEUROLOGY

Residents spend three months or more in the Neuropathology Laboratory at LPPI performing supervised autopsies and pathologic studies of brains from neurological, neurosurgical, and psychiatric patients. NEUROLOGY

Course offers experience in the diagnosis and management of children with acute and chronic neurologic disorders. Outpatient clinics are held weekly for pediatric convulsive disorders and behavioral and learning problems of the schoolchild. NEUROLOGY

Residents participate in clinical evaluation of patients in preparation for rounds. Clinical teaching in neuro-ophthalmology. NEUROLOGY

Neuroscience

201A-B-C. Basic Concepts of Neurosciences. (4-4-4) § F, W, Sp. Prerequisite: Admission to Neuroscience Program or consent of instructor. Lecture 4 hours. R. Steinberg
Interdisciplinary introduction to nervous system function: membrane structure, biophysics, ion transport mechanisms, cellular neuroanatomy, synaptic transmission; biochemical and metabolic aspects, development of synaptic connections, plasticity, mainly invertebrate; sensory and motor systems, mainly vertebrate; autonomic and neuro-endocrine regulatory mechanisms, higher functions. PHYSIOLOGY

212. Developmental Biology: The Role of the Cell Surface. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Enrollment limited. Reichardt
Course covers current literature on the role of the cell’s surface in development, with emphasis on immune and neuronal systems. Student presentations will be given each week. PHYSIOLOGY

Nursing

101A. Introduction to Nursing. (2) SS. Prerequisite: Admission to School of Nursing. Lewis
Course introduces nursing students to the role of their profession in today’s society and provides an orientation to a specific system of teaching and learning. FAM HLTH

101B. Introduction to Nursing. (1) F. Lecture 1 hour. Lewis
Course introduces nursing students to the role of their profession in today’s society and provides an orientation to a specific system of teaching and learning. FAM HLTH

102. Analysis and Presentation of Clinical Data. (2) W. Prerequisite: Nursing 101A and/or 101B, or consent of instructor. Lecture 2 hours. Lewis
Development of a systematic approach to the analysis and presentation of clinical data. Course emphasizes current nursing and medical knowledge, concepts and terminology, while utilizing material from parallel courses. FAM HLTH

110. Physiological Basis of Nursing Assessment. (3) F. Prerequisite: Consent of instructor. Lecture 3 hours. Preisig
Alterations of normal structure and function in selected major organ systems that occur in common illnesses are examined. Emphasis is placed on physiological concepts and facts that facilitate nursing observations and assessment. BIOL DYSFUNCT

111A. Health Assessment in Nursing. (7) F, W, Sp. Prerequisite: Nursing 110 or concurrent enrollment. Lecture 2 hours. Lab 15 hours. Staff
Explores the components of health, theoretical basis of health assessment, and identification of patient problems. Introduces the role of the nurse as a health assessor in inpatient and outpatient settings, on an age continuum from infancy to senescence. BIOL DYSFUNCT

111B. Health Assessment in Nursing. (7) F, W, Sp. Prerequisite: Nursing 110 and 111A. Lecture 2 hours. Lab 15 hours. Staff
Explores the components of health, theoretical basis of health assessment, and identification of patient problems. Introduces the role of the nurse as a health assessor in inpatient and outpatient
settings, on an age continuum from infancy to senescence. BIOL DYSFUNCT

Course provides a theoretical foundation on the dynamics of small groups. Principles and issues related to the structure and functioning of groups are explored. Optional experiential laboratory includes the application of theoretical data through process group participation. MENT HLTH COM

113A. Communication: Theory and Practice in Nursing. (2) F, W, Sp. Prerequisite: Concurrent enrollment in Nursing 111A or consent of instructor. Lecture 2 hours. Norbeck

Communication theory and principles in laboratory and clinical settings. Development and utilization of communication skills in nursing practice. Application of these skills with clients in the delivery of health care. MENT HLTH COM

113B. Communication: Theory and Practice in Nursing. (2) F, W, Sp. Prerequisite: Concurrent enrollment in Nursing 111B or consent of instructor. Lecture 1 hour. Lab 3 hours. J. G. Lipson

Communication theory and principles in laboratory and clinical settings. Development and utilization of communication skills in nursing practice. Application of these skills with clients in the delivery of health care. MENT HLTH COM

114A. Introduction to Family Health Care Nursing. (3) F, W, Sp. Prerequisite: Psychology 113A. Concurrent enrollment in Nursing 111B. Lecture 2 hours. Lab 3 hours. Staff

Introduction to the nursing process through an in-depth involvement with a family unit in a primary health care setting. Theories, concepts, and issues related to family development from conception to death will be explored. FAM HLTH

114B. Introduction to Family Health Care Nursing. (1) W, Sp. Prerequisite: Nursing 114A. Lab 3 hours. Staff

Introduction to the nursing process through an in-depth involvement with a family unit in a primary health care setting. Theories, concepts, and issues related to family development from conception to death will be explored. FAM HLTH

Course deals with theory and practice essential to identifying, understanding, and intervening in forms of adaptive behavior in a variety of settings. In laboratory, focus is on working with psychiatric patients, using the nurse-patient relationship as a therapeutic tool. MENT HLTH COM

118. Family and Community Patterns in Health and Illness. (5) F, Sp. Prerequisite: Concurrent enrollment in Nursing 117. Lecture 3 hours. Lab 6 hours. J. G. Lipson

Theory and practice essential to the assessment of family and community patterns in health and illness, and for planning, implementing, and evaluating nursing care measures related to families, groups, and communities. FAM HLTH

Selected pathophysiological interruptions and adaptations in children and adults. Emphasis on promotion of optimal physiological function through assessing levels of function, evaluating adaptive mechanisms, and investigating nursing interventions. Laboratory to implement nursing process utilizing course content framework. BIOL DYSFUNCT

121. Physiological Basis of Nursing Practice. (3) F, W, Sp. Prerequisite: Nursing 110, 111A and 111B. V. Young

Course examines structural and functional alterations and related adaptive mechanisms in disease of selected major organ systems, and discusses manifestations, diagnostic tools, and therapies of disease processes in relation to nursing assessment and action. BIOL DYSFUNCT

122. Integrated Science for Nursing. (4) F. Lecture 4 hours. V. Young

Examination of content in regulation, sensation, protection, and motion as they relate to adaptive mechanisms in man at the cellular level. BIOL DYSFUNCT

123. Seminar in Advanced Social Systems Theory and Application to Nursing Practice. (2) Sp. Prerequisite: Sociology 123 or consent of instructor. Lecture 2 hours. Staff

In-depth exploration and application of social systems and change theories to clinical experience. Identification of factors which affect the delivery of nursing care and the quality of health services. FAM HLTH

124. Theories and Concepts of Psychosocial Nursing. (3) F. Lecture 3 hours. Dye, Oda

Course synthesizes key theories and processes from mental health and community nursing to provide students with a perspective for analyzing concepts basic to psychosocial adaptation and development. MENT HLTH COM

125. Issues in Nursing and Health Care. (3) W. Prerequisite: Second-year standing. Lecture 3 hours. Meleis

Consideration of advances in nursing and other disciplines. Examination of the health care system and the relationship of nursing to it. MENT HLTH COM

126. Human Behavior and Development. (3) W. Lecture 3 hours. Kayser-Jones

Examination of human development such as biological, cognitive and social aspects, and be-
havior across the life span. Emphasis will be on adult development and application to nursing practice. FAM HLTH

127. Adaptation in Acute Illness. (5) F. Lecture 2 hours. Lab 7 hours. Conference 2 hours. Ferrone

Utilization of the nursing process as a vehicle for examination of selected adaptation problems that occur in illness and/or trauma. BIOL DYSFUNCT

128. Introduction to Research and Theory: Intellectual Craftsmanship in Nursing. (3) W. Lecture 2 hours. Seminar 1 hour. Wilson

Introduces basic research concepts, language, process, logic, and methods for various types of research as well as the meaning and use of nursing theory. Engages students in skills of intellectual craftsmanship including effective reading, thinking, and writing to improve research consumership. MENT HLTH COM

129. Health Assessment. (3) F. Lecture 2 hours. Lab 3 hours. Antle-May

Presentation of a basis for health assessment of clients within an adaptation-developmental model of nursing. Emphasizes data collection through history, physical examination, clinical studies, and identification of stressors altering health status. Laboratory for integration of theory and skill mastery. FAM HLTH

Course provides theory and clinical experience in a focused area of nursing practice over two quarters. Emphasis is on further development of clinical competence, utilization of a systematic method of inquiry, and development of the leadership role. MENT HLTH COM

130B. Clinical Practice in Circumscribed Areas of Nursing. (8) F, W, Sp. Prerequisite: Nursing 130A and Sociology 123. Lecture 2 hours. Lab 18 hours. Staff

Course provides theory and clinical experience in a focused area of nursing practice over two quarters. Emphasis is on further development of clinical competence, utilization of a systematic method of inquiry, and development of the leadership role. MENT HLTH COM

Presentation and synthesis of essential concepts and processes from mental health and community nursing to facilitate assessment and management of client-patient systems' psychosocial adaptation to situational and developmental stressors. MENT HLTH COM

133A. Family Health Care Nursing. (3) W. Prerequisite: Nursing 129. Lecture 2 hours. Lab 10 hours given every other week. Conference 2 hours given every other week. Bobett, I. Lewis and Staff

Course deals with the healthy family as the primary unit of health care management. Nursing process applied to promoting family health is emphasized utilizing the adaptation-developmental framework. Community involvement with a family is an integral part of the course. FAM HLTH

133B. Care of Families with Situational or Developmental Stressors. (3) Sp. Prerequisite: Nursing 133A. Lecture 2 hours. Lab 4 hours given every other week. Conference 2 hours given every other week. I. Lewis, Bobett

Analysis of families with situational or developmental problems utilizing an adaptation-developmental framework. Involvement with families in communities is an integral component of the course. Nursing process applied to promote the health of families is emphasized. FAM HLTH

Course provides opportunity to develop a professional nursing role in a health care system appropriate to the student's area of interest. Knowledge and skill basis to the professional nursing leadership role are the foci of the course. BIOL DYSFUNCT

137. Community Assessment and Intervention. (4) Sp. Lecture 2 hours. Lab 6 hours. Archer

Theories of planning and community organization and development applied to assessing community health and social indicators. Emphasizes use of data obtained from community sources in organization and planning to alleviate stressors and facilitate adaptation and development of aggregates in the community. MENT HLTH COM

Course deals with commonly used drugs, with emphasis on classification, use, rationale for choice, mode of action, and significant side effects. BIOL DYSFUNCT

156. Creative Uses of Play with Young Children. (3) F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours or equivalent time spent in weekend workshops. Hardgrove

A practical introduction to play designed to increase nursing skills in promoting growth, communication and mental health in young children, using experiences and demonstrations with play materials, techniques, and methods in relating to young children therapeutically. FAM HLTH

177. Theory and Process of Human Interaction. (3) Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Rosenaur and Staff

Relevant principles of psychiatric theory, including communication and interpersonal, are
related to interactional patterns of adult health
urse practitioners as they relate to individuals in
their health maintenance role. Problems in inter-
actional process are explored. Laboratory re-
quired. MENT HLTH COM

181. Law and the Practice of Nursing. (2) § W.
Lecture 2 hours. Tennenhous, Takano
Survey of fundamental and critical current is-
sues in law with respect to the theory and prac-
tice of nursing. Emphasis on legal contingencies
encountered in the everyday practice of nursing
in both hospital and community settings. BIOL
DYSFUNCT

182A-B. Health Education in Practice. (3-3) §
W, Sp. Prerequisite: Consent of instructor. Lecture
2 hours. Lab 3 hours. R. A. Terry
Processes and means of incorporating health
education into professional practice: identification
of audience, delineation of specific pertinent
health concern, and exploration of modes of
transmitting health information. Evaluation
methods are explored. MENT HLTH COM

Lecture 3 hours. Zalar
Theories and concepts of femininity, mascu-
linity and sexuality throughout the life cycle.
Exploration of the wide range of human sexual
behavior. Content includes sexual response,
common sexual dysfunctions and therapy, mastur-
bation, homosexuality, and sexuality in some
health conditions. FAM HLTH

Staff
Groups of two or more collaborate in clinical
investigation and studies of special problems re-
lated to nursing and health sciences, under the
direction of faculty. Students may select study
topics related to their areas of interest. FAM
HLTH

198. Supervised Study in Nursing. (1-5) § F, W,
Sp. Prerequisite: Consent of instructor. Staff
Library research and directed reading under
supervision of a member of the faculty with the
approval of the chairperson of the department.
MENT HLTH

199. Laboratory Project in Nursing. (1-5) § F,
W, Sp. Prerequisite: Consent of instructor. Staff
A laboratory research project under direction
of a member of the faculty with the approval of
the chairperson of the department. FAM HLTH

200. Administrative Problems of Nurse Man-
gers. (3) § F, Sp. Prerequisite: Consent of in-
structor. Lecture 3 hours. Archer
Theories of organization in relation to the di-
лемmas nurse managers face in administering
nursing service and educational programs.
Special emphasis is placed on ambulatory care set-
tings and schools of nursing. MENT HLTH
COM

201. Curriculum Development in Nursing. (4) §
F, Sp. Lecture 4 hours. Dunlap
Principles of curriculum development. Utiliza-
tion of these principles as a frame of reference for
planning educational programs in schools of
nursing and nursing services. BIOL DISFUNCT

202A. Theory Development in Nursing. (3-4) §
F. Prerequisite: D.N.S. student standing. Lecture
3 hours. Meleis, M. Dunlap
Examines, philosophically and analytically,
nature of theory and relationship between phi-
losophy, theory, and science. Provides knowledge
and experience in all stages of theory develop-
ment; exploration and critique of epistemological
and historical ideas in nursing; scholarly ex-
change toward independent discovery. MENT
HLTH COM

202B. Prototype Theories in Nursing. (3-4) §
W. Prerequisite: D.N.S. student standing. Lecture
3 hours. Meleis, M. Dunlap
Comparative study and critical analysis of the
major prototype theories from which conceptions
of nursing are derived. Emphasis is placed on sys-
tems, symbolic interaction, developmental ex-
change, and adaptation level theories. MENT
HLTH COM

202C. Theories and Conceptual Frameworks.
(3-4) § Sp. Prerequisite: D.N.S. student stand-
ing. Lecture 3 hours. Meleis, M. Dunlap
Comparative study and critical analysis of
major conceptual models and theories in nursing.
Consider relationship congruency of models to
prototype theories; system, interaction, devel-
opmental, adaptation level theories. Examines
the implication of nursing theories and models
for practice and research. MENT HLTH COM

203. Theory and Process of Consultation. (2-3)
§ Sp. Lecture 2 hours. Lab 0-3 hours.
Oda, Hookins
Study of theories and concepts of consultation
as a facilitating process relevant to nurses work-
ing in primary, secondary, and tertiary prevention
services. Emphasis will be on consultation strat-
egies. Optional laboratory for theory testing.
MENT HLTH COM

204A-B-C. Comparative Nursing Administra-
tion. (2-3, 2-3, 2-3) § F, W, Sp. Prerequisite:
Consent of instructor. Archer, Schatzman, Hill
Comparative analysis of nursing with emphasis
on nursing administration in the United States
and other selected countries, using perspectives
from anthropological, educational, historical,
organizational, philosophical, and sociological
contexts applicable to each country. Particularly
recommended for international students. MENT
HLTH COM

205. Processes of Supervision. (3) § W or Sp.
Prerequisite: Consent of instructor. Lecture 2
hours. Lab 3 hours. Giles
A study of the supervisory process, the role of
the supervisor, the development of staff, and the
principles and practice of supervision in nursing.
Observation and laboratory experience in super-
vision arranged for and guided by the faculty.
MENT HLTH COM
206. Microteaching. (4) § F, W. Sp. Lecture 2 hours. Lab 2 hours plus other hours arranged. 
Eaton
Analysis of the selected teaching components of reinforcement, stimulus variation, questioning, set induction, and closure utilized in individual and group instruction with application and practice in a microteaching laboratory setting. BIOL DYSFUNCT

207. The Teaching-Learning Process. (2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. 
H. Wilson
Exploration of teaching methodologies with a focus on the changing characteristics of student learners, and the changing roles of health professionals. Principles of evaluation and test construction are emphasized. BIOL DYSFUNCT

210A. Family Dynamics, Concepts and Assessment. (3) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
J. Moore
Lecture/seminar that examines family dynamics and major concepts useful in assessment of families. The family as a system wherein roles, cultural values, and interpersonal communication are emphasized, is considered. Selected research included. MENT HLTH COM

210B. Family Dynamics, Pathology and Therapy. (3) § Sp. Prerequisite: Nursing 210A or equivalent and consent of instructor. Lecture 2 hours. Lab 3 hours. 
J. Moore
Seminar emphasizing family concepts which aid in the understanding of dysfunctional families. Marriage and family therapy as treatment modalities are studied. Simulation laboratory experiences are used to test theory. Concurrent enrollment in Nursing 405 with consent of instructor. MENT HLTH COM

211. Introduction to Research: Perspectives and Styles of Research and Researchers. (3) § F, W, Sp. Prerequisite: Elementary statistics or equivalent. Lecture 2 hours. Lab 3 hours. 
L. Reif
Lectures and small group sections present an overview of the research process including the styles of researchers, the research attitude, logic, ethics, philosophy, and tools of science. FAM HLTH

211.11B. Critical Analysis of Clinical Interventions with Young Retarded Children. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
Pothier
Critical analysis of clinical interventions with young retarded children with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.01B. Critique of Studies in Patient-Family Teaching. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
Hallburg
Critique of studies in patient-family teaching with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.02B. Critique of Studies in Maternal-Child Nursing. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
Highley, Savedra
Critique of studies in maternal-child nursing with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.04B. Critique of Research in Death in Childhood. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
Waechter
Critique of studies in death in childhood with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.05B. Critique of Studies in the Field of Aging. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
E. Nichols, L. Reynolds
Critique of studies in the field of aging with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.14. Critique of Studies in Illness Behavior. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
Chafetz
Critique of research in illness behavior, including psychiatric factors, with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. MENT HLTH COM

211.16B. Critique of Research on the Role of Social Support in Health and Illness. (3) § W or Sp. Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3 hours. 
Norbeck
Critique analysis of studies which explore relationships between social support and individual functioning in a variety of life stress and illness situations. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. MENT HLTH COM

211.21B. Critique of Cardiopulmonary Research. (3) § Sp. Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3 hours. 
Barstow
Critique of cardiopulmonary research with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. BIOL DYSFUNCT

211.22B. Critique of Research Studies in Quality of Patient Care. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
Carriere, Politeo, Barbaccia
212. Research Methodologies for Clinical Nursing Questions. (3) § W. Sp. Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3 hours. 
Carriero, Holzemer

Application of research methodology to clinical nursing questions: formulation of clinical questions, experimental and quasi-experimental design, instrumentation, introduction to data analysis, including statistical methods and computer usage. BIOL DYSFUNCT

213A. Nursing Measurements and Patient Monitoring. (2-3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-3 hours. 
Beaumont

Fundamentals of electronics, transducers, and instrumentation directly applicable to the modes of obtaining physiological data from patients. BIOL DYSFUNCT

213B. Nursing Measurements and Patient Monitoring. (2-4) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. 
Beaumont

Fundamentals of electronics, transducers, and instrumentation directly applicable to the modes of obtaining physiological data from patients. BIOL DYSFUNCT

214. The Family at Risk in Early Parenting. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
Mercer

Physical and psychological factors affecting parenting, early parent-infant interactions and theories, and modes of assessing attachment in expected and unexpected outcomes, such as birth of premature or anomalous infant, threat to mother's welfare, are explored with clinical data. FAM HLTH

215A. Health in the Community. (3) § F, W. Prerequisite: Consent of instructor. Seminar 2 hours. Lab 3 hours. 
Deasy

Exploration of theories, concepts and principles pertaining to the practice of community health nursing with focus on positive health factors and interaction within families, groups and communities. MENT HLTH COM

215B. Health Care Planning in Communities. (3) § F, W. Prerequisite: Consent of instructor. Seminar 2 hours. Lab 3 hours. 
R. A. Terry

Exploration of analytic planning models applicable to community health services. Utilization of the community as a basis for planning and delivery of health care. Emphasis is on the role of the community health nurse in health planning. MENT HLTH COM

215C. Community Health Issues. (3) § F, W, Sp. Prerequisite: Nursing 215A or 215B and consent of instructor. Seminar 2 hours. Lab 3 hours. 
Bello

Exploration of community health issues, previously identified in community health nursing. Opportunity to explore theories and test their applicability to community and family health. MENT HLTH COM

215D. Strategies of Community Organization. (3) § W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. 
Staff

Exploration of strategies of institutional analysis, community assessment, and methods of community organization and development, which enable nurses to facilitate others' capacities to define, plan for, and meet their own physical, social, and mental health priorities. MENT HLTH COM

217. Psychosocial Care of Hospitalized Children and Their Families. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 
Tesler

Exploration of the theory related to the psychosocial experiences of illness and hospitalization for the child and his family. Focus is directed to minimizing trauma and promoting growth. Concurrent practicum recommended. FAM HLTH

219A. Nursing Care of the Acutely Ill Child. (2) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. 
J. Ward

Focus is on exploration of immature physiological and pathophysiological processes and their implications for planning nursing management of the acutely ill child. Students employ the problem-oriented framework to assess and manage theoretical patient problems. Practicum optional. BIOL DYSFUNCT

219B. Nursing Care of Acutely Ill Children. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. 
J. Ward

Focus is on exploration of immature physiological and pathophysiological processes and their implications for planning nursing management of the acutely ill child. Students employ the problem-oriented framework to assess and manage theoretical patient problems. BIOL DYSFUNCT

220. Advanced Seminar in Nursing Research. (3) § F, W. Sp. Prerequisite: Nursing 211A and 211B or equivalent and consent of instructor. 
Chater

A seminar intended for doctoral students to discuss methods and problems in current nursing research. Course may be repeated for credit. MENT HLTH COM

221A. Role Development: Specialized Nursing Roles. (2-3) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab optional 0-3 hours. 
Oda

Lecture/seminar focusing on the critical analysis of specialized nursing role developments. Role research emphasized. Includes traditional, existing, expanded, and emerging roles relating to specialization. Optional laboratory for theory testing and systematic observations. MENT HLTH COM
221B. Role Development: Specialized Nursing Roles. (2-3) § W. Prerequisite: Nursing 211A or equivalent and consent of instructor. Lecture 2 hours. Lab 0-3 hours. Oda

Lecture/seminar focusing on the critical analysis of specialized nursing role developments. Role research approach and methodology are emphasized. Includes traditional, existing, expanded, and emerging roles relating to specialization. Optional laboratory for theory testing and systematic observation is required for research credit. MENT HLTH COM

222A. Survey of Modern Psychiatric Thought. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. A. J. Davis, Meleis

Selected theories related to human behavior will be presented. Clinical application of, and research related to theories will be reviewed. Lecture-discussion on interaction theories of human behavior will focus on communication and systems theory. MENT HLTH COM

222B. A Survey of Modern Psychiatric Thought. (3) § W. Lecture 3 hours. Norbeck, Pothier

Selected theories related to human behavior will be presented. Clinical application of, and research related to theories will be reviewed. Lecture-discussion on cognitive theories of human behavior will focus on Piaget's theory and behavioral theory. MENT HLTH COM

222C. Survey of Modern Psychiatric Thought. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Underwood

Selected theories related to human behavior will be presented. Clinical application of, and research related to theories will be reviewed. Lecture-discussion on psychiatric personality theories will focus on intra-psychic and interpersonal models. MENT HLTH COM

223. Theories of Brief Psychotherapy. (2) § Sp. Seminar 2 hours. Hookins

Seminar focusing on selected theoretical models of brief psychotherapy. Emphasis will be placed on the theory of assessment and treatment with the brief psychotherapy model. MENT HLTH COM

224. Current Trends in Group Psychotherapy. (3) § F. Prerequisite: Nursing 244 or consent of instructor. Lecture 3 hours. Dye

Seminar focusing in depth on the theoretical bases and implementation of role playing, psychodrama, and gestalt psychotherapy in the group setting by the psychiatric nurse. Designed for nurses desiring advanced preparation in group psychotherapy. MENT HLTH COM

225. Research on Selected Psychiatric-Mental Health Nursing Concepts. (3) § Sp. Prerequisite: Graduate standing. Lecture 2 hours. Lab 3 hours. A. Davis

Exploration of the research conducted on selected major psychiatric-mental health nursing concepts to ascertain the state of the knowledge on which clinical practice is based. MENT HLTH COM

226. Nursing in Long-Term Illness. (3) § F, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Hallburg

Intensive study of problems related to long-term illness. Explorations of the inter-relationship of various cultural, psychosocial, and pathophysiological factors involved in continuing health problems. Field experience included. FAM HLTH

227. Conceptual Approaches to Functional Psychoses. (3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Knight

Lecture-seminar with emphasis on comparative study and analysis of selected biological, sociological and psychological theories of schizophrenia and depression. Selected research is included. Laboratory is for synthesis of theory and research findings in relationship to nursing practice. MENT HLTH COM

228. Research in Human Communication. (3) § W. Prerequisite: Graduate standing. Lecture 2 hours. Lab 3 hours. A. Davis

Review of communication studies relevant to nursing. Studies will be organized around specific major concepts in communication theory. Students will be expected to gain background communication theory from the extensive bibliography. MENT HLTH COM

229. Crisis Intervention. (2-4) § F, W. Lecture 2 hours. Lab 0-6 hours. Hookins

A seminar to discuss theories of crisis and innovative uses of crisis intervention in selected nursing areas. Emphasis is on stress as the antecedent of crisis, adaptive and maladaptive coping as behavioral manifestations, and intervention techniques to facilitate successful resolution. MENT HLTH COM

230. Legislative Processes and Strategies. (2-4) § W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. Archer

Exploration of legislative processes which affect professional practice. Analysis of strategies for proposal, passage, implementation, and evaluation of legislation. Examination of concepts and principles of professional lobbying, systems management of governmental relations, role of research, and expertise in policy making. BIOL DYSFUNCT

231A. Nursing Administration. (4) § W. Prerequisite: Consent of instructor. Lecture 4 hours. Bailey

An advanced course designed to apply major concepts in organizational theory and management to nursing administration practice. Emphasis on systems approach and relevant analytical techniques that will enable students to conceptualize and analyze problems in health care settings. BIOL DYSFUNCT

231B. Nursing Administration. (4) § Sp. Prerequisite: Nursing 231A and consent of instructor. Bailey
An advanced course designed to apply major concepts in organizational theory and management to nursing administration practice. Emphasis on systems approach and relevant analytical techniques that will enable students to conceptualize and analyze problems in health care settings. BIOL DYSFUNCT

232A. Dimensions of Leadership. (2-4) § E, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. Staff

Overview of concepts, theories, principles and research studies relative to leadership and adjacent processes such as group dynamics and structure. Focuses on systematic analysis of decision processes related to planned change in health care services. Laboratory includes computer simulation. BIOL DYSFUNCT

232B. Dynamics of Leadership. (2-4) § W or Sp. Prerequisite: Nursing 232A or consent of instructor. Lecture 2 hours. Lab 0-6 hours. Claus

Analysis of interactive variables and functional relationships of leadership: characteristics of the leader, follower, and health-care environmental situations. Focuses on ideas, theories and research relative to leadership behaviors, styles, and strategies. Laboratory includes computer simulated problems. BIOL DYSFUNCT

232C. Problems in Leadership. (2-4) § Sp. Prerequisite: Nursing 232A and 232B or consent of instructor. Lecture 2 hours. Lab 0-6 hours. Claus

Seminar focuses on the analysis of selected problems and case studies and on creative management of human resources in health services. Application and testing of ideas, principles, models, and theories related to leadership roles, decision-making, and planned change. BIOL DYSFUNCT

233. Coping Styles of Children. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Dunbar

Examination and assessment of individual coping styles in young children. Theoretical framework based upon Murphy, Lazarus, Menninger, and others. Laboratory data is used to explore nursing interventions relating to stress periods and coping patterns in children. FAM HLTH

234. The Threat of Death in Clinical Practice. (3) § F, W or Sp. Lecture 3 hours. Lagerquist

Seminar providing opportunity for discussion about multiple issues which come into play when adult patients face death. Discussion focuses on meaning of dying from perspective of persons undergoing the experience and/or problems of health professionals when patients are dying. BIOL DYSFUNCT

235. Process of Aging: Implications for Nursing Care. (2-4) § F, W or Sp. Lecture 2 hours. Lab 0-6 hours. Takano, Mirsky

Study of the physiological, psychological, and sociological aspects of aging. Focus is on selected theories and research relevant to nursing care of the aged. Laboratory utilizes a variety of settings serving the aged. BIOL DYSFUNCT

236. Expectant Parent Group Education. (2-3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Antle-May

Theoretical sessions related to methodology and techniques of conducting expectant parent education groups. Exploration of content relevant to concerns of expectant parents encompassing childbearing and early child rearing experiences. Concurrent practicum recommended, but not required. FAM HLTH

237. Health Assessment Throughout the Life Cycle. (3) § Sp. Prerequisite: Enrollment in the Nurse Practitioner Program. Lecture 2 hours. Lab 3 hours. McLain

Presentation of theoretical principles of health assessment throughout the life cycle. Topics to be covered include exploration of methodologies of data gathering and data analysis essential to comprehensive health assessment of all age groups. Laboratory for testing and integration of theory. FAM HLTH

238A. Development of the Infant and Preschool Child. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab to be arranged. Enrollment limited. Waechter

Exploration of the major theories and research findings dealing with the physical, intellectual, and emotional development of the child from birth to school age. FAM HLTH

238B. Development in Middle Childhood. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Enrollment limited. Waechter

Exploration of the relevant theories, literature, and research findings dealing with normal cognitive, emotional, and social development during the elementary school years. FAM HLTH

238C. Adolescent Development. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Enrollment limited. Waechter

Exploration of relevant theory, literature, and research findings dealing with normal development during the adolescent period. FAM HLTH

239. Adult Development: Young and Middle Adulthood. (3) § Sp. Prerequisite: Graduate standing, Child Development, and consent of instructor. Lecture 2 hours. Lab 3 hours. Kayser-Jones

This seminar, using an anthropological, sociological, and psychological perspective, will cover developmental theory and research from young adulthood through the middle adult years. Current issues in young and middle adulthood will be discussed with an emphasis on implications for health care. FAM HLTH

In-depth psychophysiological exploration of concepts of anxiety, stress, body image, and adaptation as they relate to and influence nursing practice. BIOL DYSFUNCT
243.01. Nursing Management of Metabolic Alteration in Surgical Patients. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Stotts

Exploration and testing of theories, concepts, and principles underlying metabolic alterations in the preoperative and postoperative period. Emphasis is on the physiological and pathophysiological changes associated with surgery in adults and the nurse's role in promoting or inhibiting those alterations. BIOL DYSFUNCTION

243.02. Nursing Management of the Surgical Patient in the Preoperative and Postoperative Period. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Stotts, L. Friesen

Application and testing of theories, concepts, and principles related to physiological and psychological adaptations in the preoperative and postoperative period. Emphasis is on nursing management of the high-risk patient with selected maladaptations. BIOL DYSFUNCTION

243.03. Nursing Management of Patients with Surgery on Selected Body Systems. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. Friesen, Stotts

This seminar focuses on nursing management of patients with disequilibrium secondary to surgery. Each student will explore the physiology and pathophysiology of a selected body system, frequently used surgical treatments, and the theoretical bases of nursing management. BIOL DYSFUNCTION

244. Theories of Group Psychotherapy. (3) § W. Sp. Prerequisite: Nursing 112 or consent of instructor. Lecture 2 hours. Lab 3 hours. Dye

Theories of group psychotherapy based on psychoanalytic, interpersonal, and communication theories pertinent to practice of group psychotherapy by nurses. Exploration of differing models of therapy, basic principles and techniques of group therapy, and role of psychiatric nurse as leader. MENT HLTH COM

246. Deterrents to Parenting. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Tesler

Exploration of evolving mother-child relationships, adaptive tasks, and environmental and interpersonal situations interrupting healthy development of mothering. Implications for nurturing and nursing roles. BIOL DYSFUNCTION

247.01. Issues and Trends in the Health Care of the Aged. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. E. Nichols

An exploration of the interrelationships of various issues, trends, and theories related to the aged. A discussion of the nurse's role in the planning and delivery of health care to the aged, both sick and well. FAM HLTH

247.02. Legislative Issues and Political Aspects of Aging in Long-Term Health Care. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. G. Doyle

Investigation of legislative and political issues of long-term health care and the implications for nursing practice. FAM HLTH

248. Group Independent Study. (1-6) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-6 hours. Staff

Groups of two or more collaborate in clinical investigations and other studies of special problems in nursing and health sciences under the direction of faculty. Students may select areas related to their long-term interests and future research or clinical program. BIOL DYSFUNCTION

249. Independent Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Individual study with emphasis on special problems in nursing. Students may select areas of study which are related to their area of interest or future goals. BIOL DYSFUNCTION

250. Research. (1-8) § F, W, Sp. Prerequisite: Admission to doctoral study and consent of instructor. Staff

BIOL DYSFUNCTION

251. Professional Nurses in Bureaucracies. (3-4) § W. Prerequisite: Three months work experience as RN or consent of instructor. Lecture 3 hours. Lab 0-3 hours. M. Kramer

Exploration and analysis of research and issues of professionalism and bureaucracy: evolution, process, and relationship to goal achievement. Course focuses on problems and conflicts encountered by professional nurses in bureaucracies and research related to identification and amelioration of these conflicts. SOC BEH SC

252. Constructive Conflict Resolution in Nursing Practice. (3) § Sp. Lecture 2 hours. Lab 3 hours. M. Kramer

Course focuses on the theory of and provides practice in solving typical interpersonal conflicts in nursing. Students identify actual or anticipated conflicts in administrative, teaching, specialist, or practitioner roles, and hypothesize and test out constructive conflict resolution strategies. SOC BEH SC

253. Research in Small Group Behavior. (3) § W, Sp. Prerequisite: Nursing 211A and consent of instructor. Dye

A comprehensive analysis of research design, theory, concepts, and methodology applied to the group process. Variables such as group interaction, performance characteristics, and group structure will be examined with particular emphasis on mensuration and experimental design. MENT HLTH COM

254.01. Maternal Physiology and Clinical Assessment. (2-4) § W. Prerequisite: Consent of instructor. Lecture 2-3 hours. Lab 0-3 hours. Mahon

Exploration of normal physiological changes occurring during pregnancy and childbirth. Emphasis will be on reproductive systems, endoc-
255.02. Child Health Maintenance. (2-3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-3 hours. 
Course provides exploration of theories, concepts and knowledge for comprehensive child health maintenance, encompassing prevention and promotion. Emphasis on parents as participants in assessment, decision-making, and management of common health problems and normal developmental stresses in infancy and childhood. 
FAM HLTH

255.03. Management of Common Pediatric Illness. (4) § W. Prerequisite: Consent of instructor. Lecture 4 hours. 
Covers theoretical basis of physiological and psychological principles necessary for understanding management of common pediatric illnesses. Provides format for integrating material with clinical findings, utilizing developmental and communication concepts in assessment and management. Collaborative roles between nurse, family, and physician emphasized. 
FAM HLTH

256. Therapeutic Use of Play. (2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. 
Practical experience using play materials, techniques, and methods, in relating to young children to increase the graduate nursing student's observational skills and afford opportunities to test and develop theories of child development. Practicum optional. 
FAM HLTH

257A. Children at Risk. (3) § W. Prerequisite: Nursing 238A, 238B, or 238C or equivalent and/or consent of instructor. Lecture 2 hours. Lab 3 hours. 
Introduction to assessment of temperament and constitutional factors in child development and early recognition of vulnerability for developmental deviations; assessment of child-rearing styles and environmental impact on quality of life. Emphasis on designing a conceptual framework for individual assessments. 
FAM HLTH
Theory and management of bio-psychosocial deviations from normal in women before and during pregnancy, interconceptional period, and climacteric. Emphasis placed on critical analysis of research in metabolic, infectious, and functional disorders including collaborative management of women manifesting these disorders. 

FAM HLTH

261. Introduction to Computer-based Instructional Systems in Nursing Education and Practice. (2-4) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours.

_Claus, Kamp, Veatch, Gorton_

Focus is on computers to aid instruction in nursing education and practice. Concepts, principles, and methods of computer-based instruction will be discussed. Laboratory provides opportunities to design and write interactive instructional programs or to evaluate use of computerized systems. BIOL DYSFUNCTION

262. Conceptualization in Psychiatric Nursing. (3) § E. Lecture 2 hours. Lab 3 hours.

_Underwood_

Seminar focusing on psychiatric personality theories in psychiatric nursing conceptual framework for clinical practice and research. Major emphasis is on use of theory by psychiatric nurses in developing conceptualizations for practice and research. Students are expected to develop beginning conceptualizations. MENT HLTH COM

263A. Nursing Evaluations of the Long Term Client. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours.

_Davidow_

Selected frameworks for assessment, analysis of data and presentation of diagnoses are explored as related to long-term-care clients in institutional and community settings. Data bases and methodologies for collecting client information are studied. Concurrent four-unit practicum required. FAM HLTH

263B. Restorative Nursing with Long Term Care Clients. (2) § Sp. Prerequisite: Nursing 263A or consent of instructor. Lecture 2 hours. 

_Davidow_

Examination of restorative nursing with long-term clients in various institutional and community settings. Exploration of methods of implementation of prescribed nursing care and evaluation outcomes toward client goal achievement and independence. Concurrent practicum required. FAM HLTH

263C. Quality Assurance in Health Care. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

_Davidow_

Focus is on dimensions of quality assurance. Impact of value judgments and components of quality assurance such as peer and utilization review, professional standards, consumer and institutional control, and vested interests examined on the basis of outcomes in long-term care. 

264. Social Context of Nursing Practice. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 

_E. Nichols_

Focus is on the exploration of social processes and how they impinge on nursing practice. Interventions based on empirical data are considered. FAM HLTH

265A. Research Methods in Program Planning and Evaluation. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. 

_Archer_

Exploration of research approaches in program planning and evaluation, emphasizing conceptualizing the evaluation problem, developing a research strategy, and implementing the evaluation. Focus is on problem definition and instrument construction. MENT HLTH COM

265B. Research Methods in Program Planning and Evaluation. (3) § Sp. Prerequisite: Nursing 265A and consent of instructor. Lecture 2 hours. Lab 3 hours. 

_Archer_

Exploration of research approaches to program planning and evaluation, emphasizing conceptualizing the evaluation problem, developing a research strategy, and implementing the evaluation. Focus is on data collection, analysis, and reporting. MENT HLTH COM

266A. Research Conceptualization. (3-5) § W. Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3-9 hours. 

_Gortner, Carriere_

Discussion and practice in research problem formulation and design selection for producers of research. Core classes and small group sessions are organized around students' interests. SOC BEH SC

266B. Research Implementation. (3-5) § Sp. Prerequisite: Nursing 266A. Lecture 2 hours. Lab 3-9 hours. 

_M. Kramer_

Data collection, analysis, and reporting of a research project, or of some aspect of a research project, such as tool construction, validity, or reliability studies. SOC BEH SC

267. Ethical Dilemmas and Nursing Practice. (2) § F. W. Prerequisite: Graduate standing. Lecture 2 hours. 

_A. Davis_

Exploration of selected ethical theories and dilemmas in health care and nursing practice. Focus is on selected case studies depicting ethical dilemmas in nursing practice, nursing research, and health policy. MENT HLTH COM

268. Current Professional Issues in Nursing. (2-4) § F. W. Prerequisite: Admission to the DNS program. Lecture 2-4 hours. 

_Hornof_

Presentation and discussion of current issues and trends in nursing and the health fields. MENT HLTH COM

_Styles_

This course is designed to explore major issues and trends in contemporary nursing and health
care delivery as they relate to nursing practice, education, and research. MENT HLTH COM

270. Health Assessment of the Adult. (4) § E Prerequisite: Concurrent enrollment in Nursing 406. Consent of instructor. Lecture 4 hours.

D. D. Stanford

Course presents theoretical framework for complete assessment of adults in primary care. Introduces systematic approach for collecting, interpreting clinical data derived from history and physical examination. Emphasizes pathophysiological bases of signs, symptoms. Incorporates framework for health maintenance of adults.

FAM HLTH

271A. Clinical Management in Adult Primary Care. (1-4) § Prerequisite: Concurrent enrollment in Nursing 404 or consent of instructor. Lecture 1 hour.

H. Rutledge

Course introduces concepts essential in the management of common health problems of adults in primary care. Emphasizes the integration of psychosocial and pathophysiologic aspects of illness. Focus is on process of clinical decision-making through case method approach utilizing relevant research. MENT HLTH COM

271B. Clinical Management in Adult Primary Care. (1-2) § W. Prerequisite: Concurrent enrollment in Nursing 404 or consent of instructor. Lecture 1 hour.

L. Ray

Course introduces concepts essential in the management of common health problems of adults in primary care. Emphasizes the integration of psychosocial and pathophysiologic aspects of illness. Focus is on process of clinical decision-making through case method approach utilizing relevant research. MENT HLTH COM

271C. Clinical Management in Adult Primary Care. (1-2) § Sp. Prerequisite: Concurrent enrollment in Nursing 404 or consent of instructor. Lecture 1-2 hours.

R. Glaser

Introduction of concepts essential in the management of common health problems of adults in primary care. Emphasizes the integration of psychosocial and pathophysiologic aspects of illness. Focus is on process of clinical decision-making through case method approach utilizing relevant research. MENT HLTH COM

272. Prospective Health Care of Adults. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours.

Rosenaur

Course introduces principles of health maintenance for adults including health risk appraisal, problem identification and management. Focus is on health risks related to age, sex, health habits, history of individual and family illness, and life stress. FAM HLTH

273A. Current Concepts in Occupational Health Nursing. (2) § F. W. Prerequisite: Consent of instructor. Lecture 2 hours.

Resnik

From a historical perspective, the structure and organization of occupational health programs and services are discussed. In overview, major topics are introduced: industrial organization systems; worker protection through health safety legislation; occupational health program development and the nursing role. MENT HLTH COM

274.01. Cardiopulmonary-Renal-Neuroendocrine Nursing: Physiology. (3-6) § F. Lecture 3-6 hours.

E. Clarke

A study of cardiopulmonary, renal, and neuroendocrine theories applicable to nursing practice. Emphasis will be on physiology and selected pathophysiology that support nursing interventions. BIOL DYSFUNCT

274.02. Cardiopulmonary-Renal-Neuroendocrine Nursing: Pathophysiology. (3-6) § W. Prerequisite: Nursing 274.01 and consent of instructor. Lecture 3-6 hours.

Stotts

A study of diseases that affect cardiopulmonary, renal, and neuroendocrine systems. An advanced understanding of pathophysiology of these categories of diseases will provide the basis for more sophisticated and research-oriented nursing practice. BIOL DYSFUNCT

274.03. Pharmacology for the Cardiopulmonary Patient. (3) § Sp. Prerequisite: Graduate standing. Lecture 2½ hours. Discussion and case study review ½ hour.

E. Clarke

Study of cardiopulmonary nursing problems and their amelioration by drugs affecting the autonomic nervous system and cardio-respiratory-renal core systems. Review of relevant anatomy, physiology, and drug action included. BIOL DYSFUNCT

274.04. Cardiopulmonary-Renal-Neuroendocrine Nursing: Acute Interventions. (3) § F. Prerequisite: Nursing 274.01, 274.02 and graduate standing. Seminar 3 hours.

Stotts

Investigation of the theoretical basis of selected nursing interventions commonly used on patients with acute cardiopulmonary and renal dysfunction. Therapeutic andiatrogenic aspects of intervention will be explored. Recent research will form the basis for discussion. BIOL DYSFUNCT

274.05. Cardiopulmonary Nursing: Rehabilitation. (3) § F. Prerequisite: Nursing 274.01, 274.02. Lecture 2 hours. Lab 3 hours.

Barstow

Theoretical basis for rehabilitation of patients in acute care setting with cardiopulmonary physical illness. Exploration of related concepts such as conservation and mobilization of energy. Relevant research will be included. BIOL DYSFUNCT

276. Theoretical Perspectives for Nursing Practice. (3-4) § Sp. Prerequisite: Consent of instructor. Lab 3 hours. Seminar 3 hours.

M. Dunlap

Comparative study of selected nursing conceptions and theories and their implications for nursing practice, curriculum development and research. Critique of theories will address key questions relevant to nursing goals, intervention focus and outcomes, recipient of nursing, and social significance. BIOL DYSFUNCT
277. Research on Problems in the Management of Illness and the Delivery of Health Services. (3) § F, W. Prerequisite: Nursing 211A, or graduate course on research methods in social science, or consent of instructor. Lecture 2 hours. Lab 3 hours. Course may be repeated for credit. Reif

Methods for conducting exploratory studies on social-psychological and organizational factors which affect the management of illness and delivery of health services. Problem identification, collection and analysis of data, and presentation of findings and policy implications of research are included. FAM HLTH

278. History and Philosophy of Nursing Science and Research. (3) § F. Prerequisite: DNS student standing or consent of instructor. Lecture 3 hours. Gortner

An analysis of the history and development of nursing science and research in the United States, addressing the origins of scientific questions and methods in nursing, and the debates currently ongoing regarding definition, credibility, design, conduct, and outcomes of research. FAM HLTH

280. Sexual Counseling. (3) § W. Prerequisite: Nursing 189 or equivalent, and consent of instructor. Lecture 2 hours. Lab 3 hours. Enrollment limited. Ayres

Theories, concepts, research, and techniques of sexual counseling with individuals and groups. A conceptual model will provide the direction for assessment, intervention, and evaluation of common sexual concerns and dysfunctions. Optional practicum available. FAM HLTH

281. Sexuality and Illness. (3) § Sp. Prerequisite: Nursing 189 or equivalent, and consent of instructor. Lecture 2 hours. Lab 3 hours. Ayres

Physical, emotional, and interpersonal implications of short- and long-term illness on sexuality. Course includes review of research findings, analysis of relevant literature, and application of nursing process to selected medical/surgical conditions in sexuality. Optional practicum available. FAM HLTH

282. Sex Education. (3) § Sp. Prerequisite: Nursing 189 or equivalent, and consent of instructor. Lecture 2 hours. Lab 3 hours. Zalar

Review of theories of teaching/learning, curriculum models, and needs assessment of a target population will prepare students to develop methods, strategies, and materials for sex education of a population of choice. FAM HLTH

283. Preventive Models in Child Development. (2) § F or W. Prerequisite: Nursing 257A and 257B, or consent of instructor. Lecture 2 hours. Norbeck

Exploration of prevention theory, mental health needs of children, and a model of delivery of mental health services through the collaboration of mental health specialists and primary health care providers. Analysis of theoretical bases for various intervention strategies. MENT HLTH COM

290.01. Conceptual Approaches to Family Study. (2-4) § F. Prerequisite: Enrollment in the DNS program. Lecture 2 hours. Lab 0-6 hours. Savedra, Mercer

Comparative study and critical analysis of classical theories applicable to family interaction with emphasis on interactional and structural-functional. Seminar focuses on theoretical applications to nursing problems in the maintenance of family health. FAM HLTH

290.02. Conceptual Approaches to Family Study. (2-4) § W. Prerequisite: Nursing 290.01 and/or consent of instructors. Enrollment in the DNS program. Lecture 2 hours. Lab 0-6 hours. Savedra, Mercer

Comparative study and critical analysis of classical theories applicable to family interaction with emphasis on the developmental, psychoanalytic and institutional. Seminar focuses on theoretical applications to nursing problems in the maintenance of family health. FAM HLTH

290.03. Conceptual Approaches to Family Study. (2-4) § Sp. Prerequisite: Nursing 290.01, 290.02 and/or consent of instructors. Enrollment in the DNS program. Lecture 2 hours. Lab 0-6 hours. Savedra, Mercer

Individual development of an approach or model for study of a specific problem in family health nursing. Seminar focuses on critique of models generated by students and their applicability to the research problem. FAM HLTH

291A. Clinical Approaches to Family Study. (3-4) § W. Prerequisite: Nursing 202A, 202B, 202C, or 290.01 or equivalent. DNS student standing. Lecture 2 hours. Lab 3-6 hours. Lewis, E. Nichols

Application and testing of theoretical frameworks for patient-family care. Emphasis is on continuing care situations. Clinical involvement is required. FAM HLTH

298. Thesis or Comprehensive Examination. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree or taking a comprehensive examination required for the master's degree. BIOL DYSFUNCT

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Doctor of Nursing Science (DNS) degree. BIOL DYSFUNCT

401. Teaching Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours. Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. FAM HLTH

402. Administration Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours. Staff
Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. FAM HLTH

403. Consultation Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours. Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. FAM HLTH

404. Clinical Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours. Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. FAM HLTH

404.06A. Clinical Residency-Pediatric Nurse Associate. (5) F. Prerequisite: Consent of instructor. Lab 15 hours. Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

404.06B. Clinical Residency-Pediatric Nurse Associate. (5) W. Prerequisite: Nursing 404.06A and consent of instructor. Lab 15 hours. Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

404.06C. Clinical Residency-Pediatric Nurse Associate. (5-6) Sp. Prerequisite: Nursing 404.06A, 404.06B and consent of instructor. Lab 15-18 hours. Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

405. Practicum in Mental Health and Community Nursing. (1-8) F, W, Sp. Prerequisite: Consent of instructor. Lab 3-24 hours. Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of mental health and community nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. MENT HLTH COM

406. Practicum in Family Health Care Nursing. (1-8) F, W, Sp. Prerequisite: Consent of instructor. Lab 3-24 hours. Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of family health care nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. FAM HLTH

407. Practicum in Physiological Nursing. (1-8) F, W, Sp. Prerequisite: Consent of instructor. Lab 3-24 hours. Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of physiological nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. BIOL DYSFUNCT

409. Continuing Education Residency. (6-12) F, W, Sp. Prerequisite: Nursing 201 or equivalent, and consent of instructor. Lab 18-36 hours. Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. Focus is on development of the Continuing Education Specialist role in meeting continuing education needs of registered nurses. MENT HLTH COM

410. Teaching Practicum. (1-8) F, W, Sp. Prerequisite: Consent of instructor. Lab 3-24 hours. Staff

Supervised practice in selected components of the teaching role in nursing. MENT HLTH COM

Nutrition

130B-C. Human Nutrition. (1-1) W, Sp. Lecture 1 hour. Silverstein (W) Eckhaus (Sp.)

An introduction to the basic principles of human nutrition. Subject material is related to the maintenance of normal nutrition throughout one's life span, and emphasis is on normal nutrition and its preventive role in maintaining general health, specifically oral health. GEN DENT

132. Principles of Diet as Therapy in Nursing Interventions. (2) W, Sp. Prerequisite: Nursing 110 or consent of instructor. Gutierrez

Concepts of dietary modification as required in the prevention and treatment of major disease entities. Emphasis is on clinical approaches useful in nursing practice. MENT HLTH COM

160. Nutrition for the Dental Hygienist. (2) W. Lecture 2 hours. P. Morgan

Review of biochemical principles of nutrition related to development and maintenance of oral tissue, and the interrelationship of food stuffs. Emphasis will be on practical application of nutritional assessment and counseling for dietary/behavioral change. PERIODONT

Supervised practicum in nutrition counseling with dental clinic patients. Students will apply techniques of diet analysis, preventive program planning, and patient counseling. PERIODONT

181. Nutrition Counseling for Families (3) F. Prerequisite: Nursing 114 and/or consent of instructor. Lecture 2 hours, Lab 3 hours. Gutierrez

Course provides theory and practice in the interpretation of current concepts and principles of
nutrition counseling with an emphasis on cultural nutrition. FAM HLTH

200. Maternal and Infant Nutrition. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours.

Application of current maternal nutrition research to train students in working with other health professionals to offer interdisciplinary maternal nutrition counseling in the prevention of low birth weight. Emphasis will be on cross-cultural factors in assessment and counseling. FAM HLTH

201. Current Principles of Diet Therapy. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

Concepts of dietary modifications as required in the prevention and treatment of major disease entities. Emphasis will be on current diet therapy research and on clinical approaches useful in practice. FAM HLTH

202. Nutrition Counseling for Families. (3) § Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Theory and practice in the interpretation of current concepts, principles, and research in nutrition for family counseling. Emphasis will be on cultural dietary patterns. FAM HLTH

Obstetrics, Gynecology and Reproductive Sciences

110. Core Clerkship in Obstetrics and Gynecology. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 132A-B-C. Jaffe and Staff

Basic principles and fundamental techniques in obstetrics and gynecology, including the psychiatric aspects of obstetrics and gynecology are discussed in a series of seminars, case discussions, and teaching clinics. Students gain practical experience in clinics, wards, delivery room, and operating room under direct supervision. OB GYN R S

140.01. Senior Clerkship in Obstetrics and Gynecology at C. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110, and Medicine 110 or Surgery 110, or consent of instructor. G. Webb

Students will have responsibilities of full-time acting residents on both the obstetrical and gynecological services. OB GYN R S

140.02. Advanced Clinical Clerkships. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110, consent of instructor, and approval of department at off-campus hospital.

Braga, R. Glass

Advanced clinical clerkship. Senior clerkships in both inpatient and outpatient obstetrics and gynecology are available at the following and other various hospitals by arrangement: L, MZ, SJ, KH, VMC, NRMC. OB GYN R S

140.06. Gynecologic Clerkship at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110, and Medicine 110 or Surgery 110 or consent of instructor. R. Sweet and Staff

Course is individually structured for each student by the instructor, with emphasis on areas of interest and need for in-depth exposure to gynecology. OB GYN R S

140.07. Gynecologic Clerkship at UC. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110, and Medicine 110 or Surgery 110 or consent of instructor.

Braga, R. Glass

The clerk functions in the role of an acting resident on the gynecology service. Responsibilities are primarily on the inpatient service and will include both surgical and non-surgical aspects of gynecologic oncology, endocrinology, infertility, and general gynecology. OB GYN R S

140.08. Preceptorship in Obstetrics, Gynecology and Reproductive Sciences. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110 and consent of instructor and chairperson of the department. Staff

Clinical experience in a subspecialty area or general obstetrics and gynecology under the direction of a member of the faculty. OB GYN R S

150.01. Research in Obstetrics, Gynecology and Reproductive Sciences. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department. Staff

A nonclinical research project under the direction of a member of the faculty. OB GYN R S

198. Supervised Study in Obstetrics, Gynecology and Reproductive Sciences. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. OB GYN R S

199. Laboratory Project in Obstetrics, Gynecology and Reproductive Sciences. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. OB GYN R S

222. Reproductive Endocrinology Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Jaffe and Staff

Seminar presentations in areas of current interest in reproductive endocrinology by guest speakers and members of the Reproductive Endocrinology Center. Students will be required to submit a term paper. Course may be repeated for credit. OB GYN R S

230. Reproductive Endocrinology. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Minimum of 4 students. R. Weiner

Lectures and assigned readings on the reproductive endocrinology of the male and female.
Topics include structure, function, and regulation of the hypothalamic, pituitary, and gonadal hormones, with special emphasis on the human. OB GYN R S

231. Hormone Receptor Binding. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. J. Roberts

An in-depth assessment of the characterization of hormone receptor interactions by ligand binding methods. Lectures, assigned readings, and problems will focus on theoretical and practical aspects of techniques and data analysis. OB GYN R S

232. Morphological Basis of Neuroendocrinology. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. R. Weiner

Lectures and assigned readings on the morphology of the brain-hypothalamic-pituitary axis at the gross, light, and ultrastructural levels. Topics will include pituitary morphology, hyposial-portal circulation, localization and cytoarchitecture of neurosecretory neurons, and hypothalamic and extrahypothalamic neural pathways. OB GYN R S

Course is designed to develop skills for using transmission electron microscopy in research. The effects of anesthesia, fixation, and such on tissue will be discussed. Students will be expected to carry out the process from tissue to electron micrograph. OB GYN R S

400. Staff Conferences. (1) Su, F, W, Sp. Jaffe and Staff

Conferences comprised of formal discussions by staff, faculty, and visiting lecturers. OB GYN R S

Seminar includes the presentation of pathologic material from the obstetric and gynecologic services with formal instruction and discussions. OB GYN R S

Seminars include presentations of special topics, literature reviews, and discussions. Discussions of resident staff functions also are held. OB GYN R S

Residents are responsible for the care of patients in the hospital and outpatient clinic. Formal and individual instruction is conducted. OB GYN R S

Occlusion

120. Applied Dental Morphology and Physiology of Occlusion. (1) Sp. Prerequisite: Concurrent enrollment in Oral Diagnosis 129. Lecture 1 hour. W. H. Noble

A conjoint lecture and discussion series on the relationship of occlusion to the clinical phases of dentistry. RESTOR DENT

180. Diagnosis and Treatment of Special Occlusal Problems. (1) F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Enrollment limited. Pavone

Course covers the diagnosis and treatment of occlusal disorders of the adult dentition. The etiology of functional disturbances, analysis of occlusal relationships of the opposing arches, and a rationale for therapy will be presented and discussed. RESTOR DENT

Operative Dentistry

Clinical instruction. RESTOR DENT

Beginning techniques in operative dentistry. Five hours of lecture on the theory and principles of cavity design and preparation are included in the spring quarter. RESTOR DENT

125A-B. Operative Techniques. (0-6, 0-6) F, W. Prerequisite: Operative Dentistry 115A-B-C. Lecture 1 hour. Lab 6 hours. D. Graham

Continuing techniques in operative dentistry. One hour of lecture each week accompanies the laboratory work; lectures reinforce principles taught in the laboratory. Clinic rotation is included. RESTOR DENT

This course must be taken concurrently with Operative Dentistry 109. RESTOR DENT

139. Clinical Operative Dentistry. (0-4) F, W, Sp. Prerequisite: Concurrent enrollment in Operative Dentistry 130A-B-C. Clinic variable. Schuchard

Students are evaluated on their daily treatment. Requirement for demonstrating clinical proficiency is earning four units of clinical credit with a reasonable distribution among nine basic restorative procedures. Two examinations demonstrating satisfactory clinical competence are required for assignment of units. RESTOR DENT

Students are evaluated on their daily treatment and clinical examinations. Seven units of clinical credit are required with reasonable distribution among the nine basic restorative procedures. Satisfactory completion of the course requires five clinical examinations and two certificate examinations. RESTOR DENT

Lectures and televised demonstrations covering quadrant dentistry, washed field technics, complex restorations, analysis of related research, and clinical applications of the various restorative procedures. RESTOR DENT

180.01. Advanced Operative Dentistry Theory. (1) W. Prerequisite: Operative Dentistry 180. Lecture 1 hour. M. Stark and Staff

Continuation of Operative Dentistry 180. RESTOR DENT

180.02. Advanced Operative Dentistry Theory. (1) Sp. Prerequisite: Operative Dentistry 180.01. Lecture 1 hour. M. Stark and Staff

Continuation of Operative Dentistry 180.01. Organization of the material is planned in relation to progress of students enrolling in the 180 series. RESTOR DENT

189. Direct Gold Restorative Procedures. (1) F, W, Sp. Prerequisite: Open to fourth year students with approval of the chairman of the division. Clinic 3-6 hours. Enrollment limited. Schuchard

Techniques and procedures for Class III restorations using the conservative approach, as well as wedge and matrix. Work also will be done on Class V direct gold restorations. Students learn to use various materials including fibrous gold, goldent, and electrolyte. RESTOR DENT

189.01. Advanced Clinical Operative Dentistry. (0-25) F, W, Sp. Prerequisite: All previous courses in operative dentistry curriculum sequence. Clinic variable. Schuchard and Staff

Continuation of clinical experience at the level of Operative Dentistry 109. RESTOR DENT

189.02. Advanced Clinical Operative Dentistry. (0-4) Sp. Prerequisite: Approval of the chairman of the division. Clinic 0-12 hours. Schuchard and Staff

Advanced instruction in the field of clinical operative dentistry, utilizing procedures different from those presented at the level of Operative Dentistry 109, such as quadrants and plastics. RESTOR DENT

199. Laboratory Project in Operative Dentistry. (1-5) F, W, Sp. Prerequisite: Approval of the Dean. Schuchard and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

Ophthalmology

First-Year Coordinated Instruction—Medicine 131A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients. Core Clerkship—Surgery 110 and 111 includes lectures and clinical experience in the diagnosis and care of eye diseases.

140.01. General Clinical Ophthalmology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. O'Donnell

Clinical observations of patients in wards and surgery. Seminars on ophthalmic pathology, microbiology, and optics at UC. OPHTHALMOL

140.02. Clinical Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. S. Kramer and Staff

Clinical clerkship in approved hospitals by special arrangement and approval by the Dean and the chairperson of the department. OPHTHALMOL

140.03. Clinical Clerkship at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Goodner and Staff

Clinical observation of patients in the clinics, wards, and surgery at SFGH. OPHTHALMOL

140.04. Clinical Clerkship at L. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Metz

Clinical observation of patients in the clinics, wards, and surgery at L. OPHTHALMOL

150.01. Ophthalmic Pathology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. J. B. Crawford

Seminars include gross and microscopic ophthalmic pathology with clinical correlation of cases from the Eye Clinic, wards, and other hospitals. OPHTHALMOL

150.02. Research in Ophthalmology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairman of the department. S. Kramer

A research project under the direction of a member of the faculty carried out in the Department of Ophthalmology. OPHTHALMOL

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. OPHTHALMOL

199. Laboratory Project in Ophthalmology. (1-5) F, W, Sp. S. Kramer

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. OPHTHALMOL

Residents prepare and present diagnostic and therapeutic problem cases. Discussion by faculty and visitors follows. Residents also present papers on various aspects of medicine and ophthalmology which are discussed by faculty members. OPTHALMOL

Conferences include grand rounds and case presentations of hospital patients, review of recent literature in ophthalmology, and assigned reading with required reports. OPTHALMOL

Seminars include didactic lectures in practical work covering pathology, neuro-ophthalmology, uveitis, physiological optics, refraction, ocular motility, glaucoma, and microbiology. OPTHALMOL

403. Basic Ophthalmologic Science Course. (6) Su. Required for first year residents. S. Kramer

Didactic lectures and demonstrations cover the basic sciences as applied to ophthalmology. These include anatomy, histology, biochemistry, physiology, and pharmacology. OPTHALMOL

Residents, under supervision, are responsible for patients in the Eye Clinic. First year residents assist in eye surgery and the Eye Bank program. Specialty clinics include external diseases, extracocular muscles, medical ophthalmology, ophthalmoscopy, refraction, cataract, glaucoma, neuro-ophthalmology, plastic surgery, and tumor. OPTHALMOL

Residents, under supervision, are responsible for patient care including diagnostic studies and treatment of medical eye care, diagnosis, surgery, and follow-up treatment of surgical eye cases. OPTHALMOL

Residents, under supervision, are responsible for patient care including diagnostic studies and treatment of medical eye care, diagnosis, surgery, and follow-up treatment of surgical eye cases. Residents consult for other hospital services. OPTHALMOL

Fourth-year residency taken at UC or at any approved institution subject to the approval of the chairman of the department and the Dean. OPTHALMOL

Residents or fellows, under supervision, are responsible for patient care, including diagnostic studies and treatment of medical-eye care, diagnosis, surgery, and follow-up treatment of surgical-eye cases. OPTHALMOL

Residents, under supervision of the attending staff, are responsible for patient care on wards and in the follow-up clinic, including diagnostic studies and consultation. This rotation is combined with patient-care assignments in the Otolaryngology Service. OPTHALMOL

Oral Diagnosis

Credit is assigned on a point basis for independent case work-ups and case presentations. GEN DENT

109.01. Oral Diagnosis and Roentgenology Rotation. (0-2) F, W, Sp. Prerequisite: Third-year standing. Clinic and Seminar Block rotation 60 hours. Braly and Staff

Clinical experience and small group instruction are provided in diagnosis and treatment planning, emergency dental care, clinical photography, and roentgenology. GEN DENT

109.02. Dental Emergency Clinic. (0-1) F, W, Sp. Prerequisite: Oral Diagnosis 109.01. Clinic rotation 30 hours. S. Eakle

Experience in the provision of dental emergency care in the UC Clinics and in the initial evaluation of persons seeking dental care. Instruction is provided on an individual and small group basis. GEN DENT

116A-B-C. Clinical Dentistry. (0-4, 0-4, 1½) F, W, Sp. Lecture 1 hour F, W; Clinic 3 hours F, W; 4 hours Sp. Braly

An introduction to concepts of dental health and disease and a recognition of these through a multidisciplinary clinical orientation program. GEN DENT

129. Diagnosis and Treatment Planning. (2) Sp. Prerequisite: Oral Diagnosis 116A-B-C. Clinic and Seminar 6 hours. Maxwell

Small group instruction is provided in comprehensive case work-up of dental patients. Student completes a case history, clinical examination, studies case analysis, and diagnosis and treatment plan, meeting the patient's total dental needs. GEN DENT

Continuation of clinical experience at the level of Oral Diagnosis 109. GEN DENT
Oral Medicine and Hospital Dentistry

Chinn, Caswell and Staff
Group rotation through two five-week sections: clinical diagnosis—patient presentation, history-taking, examination, diagnosis, treatment, and follow-up; and medicine—introduction to internal medicine and physical diagnosis. ORAL MED

120. Oral Medicine. (3) Sp. Prerequisite: Oral Medicine and Hospital Dentistry 126 and 127. Lecture 3 hours. T. E. Daniels
Handling of patients is introduced by emphasizing history-taking, differential diagnosis, medical implications, clinical pathology laboratory in dental practice, and fundamentals of treatment. Classification, etiology, pathogenesis, diagnosis, and treatment of some benign lesions occurring in the oral cavity are covered. ORAL MED

Introduction to clinical medicine for dental students. Pathophysiology and differential diagnosis of disease will be discussed. Emphasis will be placed on ways that medical diseases influence clinical care of dental patients. ORAL MED

126. Oral Biology. (5) F. Prerequisite: Anatomy 118. Lecture 4 hours, Lab 4 hours. Christie and Staff
Introduction to oral biology correlating morphology, chemistry, function of dental and para-dental tissues. Topics include head and neck embryology, enamel, dentin, cementum, pulp and pulpal disease, dental caries, dental anomalies, tooth eruption, periodontium and periodontal disease, and oral mucous membranes. ORAL MED

127. Introduction to Oral Pathology. (3) W. Prerequisite: Oral Medicine and Hospital Dentistry 126. Lecture 2 hours. Lab 3 hours.
Greenspan, T. E. Daniels, Merrell
Course correlates clinical oral pathology with histologic changes. Emphasis is placed on the microscopic and laboratory interpretation of cellular tissue, and chemical alterations. ORAL MED

Clinical oral pathology for the dental hygienist. Diagnosis and management of some common oral lesions are covered. Use of diagnostic aids and methods of treatment are emphasized. ORAL MED

170. Temporomandibular Joint Seminar. (1) F, W. Sp. Prerequisite: D.D.S. degree. With consent of instructor, fourth-year students may take this course as an elective. R. Taylor
Seminar series covering differential diagnostic techniques and treatment approach to temporomandibular joint disease. ORAL MED

Armitage (F) Savostin-Asling (W, Sp)
Advanced study of the oral tissues, with emphasis on their histophysiological aspects. ORAL MED

172. Current Oral Pathology. (1-2) Sp. Lecture 1-2 hours. L. Hansen and Staff
A seminar designed to acquaint postdoctoral students with current advances, techniques, trends, and developments in the field of oral pathology. ORAL MED

175A-B. Oral Immunology and Immunopathology. (0-4) F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Two-quarter course. J. Greenspan
Lectures and seminars on immunological mechanisms and their contribution to oral diseases. Topics to be covered include the immunology of periodontal disease, oral microbial diseases, oral autoimmune disease, and discussions of the interface of immunopathology and inflammation. ORAL MED

Lectures and seminars on diseases of the oral regions. Disease entities are studied from a clinical and histopathological standpoint with emphasis on etiology and pathogenesis. ORAL MED

179. Oral Medicine. (0-2) F, W, Sp. Prerequisite: D.D.S. degree. With consent of instructor, fourth-year students may take this course as an elective. Due to patient commitments in the clinic, students, once selected, may not withdraw. Clinic 10-20 weeks. R. Taylor
Participation in the Temporomandibular Joint Clinic applying knowledge of history-taking and differential diagnosis and utilizing such diagnostic techniques. ORAL MED
180A-B-C. Clinical Pathology Conference. (1-1-1) F, W, Sp. Prerequisite: Fourth-year standing. Lecture 1½ hours. S. Silverman and Staff

Clinical pathology conference; biology, diagnosis, and treatment of various oral lesions and associated patient problems. Some oral conditions are critically reevaluated in the light of current research advances. Specific medical knowledge is related to patient care. ORAL MED

Identification by means of dental evidence, known as forensic odontology. Course includes identification procedures in single and multiple deaths, including homicides and mass disasters, forensic dental radiology, bite marks and bite injury, the medico-legal autopsy, fire research, and forensic anthropology. ORAL MED

The advanced dental student participates in lecture-seminars, in which emphasis is placed on the diagnosis of oral disease correlating the history, clinical, operative, radiographic, laboratory, and histopathological findings. ORAL MED

186. Introduction to the Biological Sciences. (1) SS. Lecture, Laboratory and Demonstration 9 hours for three weeks. Christie

Introduction to the biological sciences taught in the first year of dentistry: anatomy, biochemistry, and physiology. Course includes one-half day per week orientation to the campus community. ORAL MED

189.01. Oral Medicine. (1) F, W, Sp. Prerequisite: Oral Biology 109.01 and consent of instructor. Clinic 3 hours. S. Silverman

Participation in the Oral Medicine Clinic: apply knowledge of history-taking and differential diagnosis; utilize various diagnostic techniques such as biopsy, cytology, and certain clinical pathology laboratory tests; interpret results, prescribe treatment and follow-up; hospital rounds and weekly seminar. ORAL MED

189.03. Advanced Clinical Clerkship in General Dentistry at UC. (1½ per week) F, W, Sp. Prerequisite: Fourth-year standing and approval of Clinic Review Committee. S. Silverman, Ware

Students provide comprehensive dental care to patients assigned to them under supervision of staff in the medical and hospital environment. Students also attend seminars and conferences. ORAL MED

Review of oral diseases most relevant to physicians. Etiology, diagnosis, management and prevention are covered. Subjects include introduction to dentistry, caries, fluoride, periodontal disease, precancerous lesions, oral cancer, saliva, salivary gland disease, oral aphthae, herpes, smoking, diseases of the tongue. ORAL MED

199. Laboratory Project in Oral Biology. (1-5) F, W, Sp. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ORAL MED

202. Experimental Techniques in Oral Biology. (3) § W, Sp. Prerequisite: Oral Biology 126 or equivalent. Lecture 1 hour. Lab 6 hours. Staff

Principles and methods employed in studying oral tissues such as histochemistry, autoradiography, decalcification procedures, cryostat sectioning, and enzyme histochemistry will be presented. ORAL MED

206. Seminar in Oral Biology. (1-4) § F, W, Sp. Prerequisite: D.D.S. degree and consent of instructor. Seminar 1-4 hours. S. Silverman and Staff

A wide spectrum of selected topics related to oral biology is presented with emphasis on basic and applied research methodology, pertinence of problems, significance of findings, and critical evaluation of data. ORAL MED

Advanced considerations in the field of histopathology. Applications of newer techniques and concepts are presented to increase understanding of the oral cavity in health and disease. Etiology, diagnosis, and therapeutics are discussed. ORAL MED

208A-B. Oral Immunology and Immunopathology. (0-4) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Two quarter course. J. Greenspan

Lectures and seminars on immunological mechanisms and their contribution to oral diseases. Topics to be covered include the immunology of periodontal disease, oral microbial diseases, oral autoimmune disease, and discussions of the interface of immunopathology and inflammation. ORAL MED

209. Biology of Connective Tissue. (2-3) § W, Sp. Prerequisite: Biochemistry 207 or consent of instructor. Lecture 2-3 hours. Staff

A seminar course in connective tissue biology, concerned mainly with the development, differentiation, and pathology of connective tissues; includes such topics as regulatory controls of connective tissue macromolecules, fibrosis, wound healing, inflammation, tissue destruction, and selected genetic disorders. ORAL MED

A seminar series covering current advances in research in oral biology in a systematic manner. Current literature is critically reviewed by students under faculty supervision, or by faculty or guest lecturers. ORAL MED

ORAL MED
297. Special Study. (1-3) § F, W, Sp. Staff
Reading and conferences under the direction of a member of the staff. ORAL MED

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.
Staff
For graduate students engaged in writing the thesis for the master's degree. ORAL MED

300. Practicum in Teaching. (1-4) § F, W, Sp. Prerequisite: Consent of instructor. Staff
Practice in teaching a course in oral biology under the supervision of the instructor in charge. ORAL MED

A wide spectrum of selected topics related to oral biology is presented with emphasis on basic and applied research methodology, pertinence of problems, significance of findings, and critical evaluation of data. ORAL MED

Lectures and seminars on diseases of the oral regions. Disease entities are studied from a clinical and histomorphological standpoint with emphasis on etiology and pathogenesis. ORAL MED

Participation in the Oral Medicine Clinic applying knowledge of history-taking and differential diagnosis; utilizes various diagnostic techniques such as biopsy, cytology, and certain clinical pathology laboratory tests; interpret results, prescribe treatment and follow-up; hospital rounds; and weekly seminars. ORAL MED

409.02. Oral Medicine. (1) F, W, Sp. Prerequisite: D.D.S. degree and consent of instructor. Clinic 3 hours. Ware, R. Taylor and Staff
Participation in the Temporomandibular Joint Clinic applying knowledge of history-taking and differential diagnosis; utilizes such diagnostic techniques as laminographic X rays, occlusal analysis, and other specific joint tests; interprets results; prescribes treatment; and follows-up with patient reviews. ORAL MED

109. Radiology

109.01. Oral Radiology. (0-1) SS, F. Prerequisite: Oral Radiology 121. Lab rotation 24 hours. Parks
A course in intraoral X ray technique, including instruction in the long cone paralleling method, and practice on skulls and mannequins. Objective of the course is to prepare the student for clinical experience during the oral diagnosis course rotation. GEN DENT

121. Radiographic Interpretation. (1) F. Lecture 1 hour. Parks
An introduction to the fundamentals of radiographic interpretation, some of the basic physics of X ray generation, and radiation biology. GEN DENT

Course is a continuation of Oral Radiology 121 and is intended to broaden the scope of radiographic interpretation. Additional aspects concerning radiation biology are also included. GEN DENT

150. Oral Radiology for Dental Hygiene. (2) W. Lecture 2 hours. Parks
Course covers basically the same material as Oral Radiology 121, but is modified to meet the special needs of the dental hygienist. GEN DENT

159. Oral Radiology. (1) W. Lab 3 hours. Parks
A course in intraoral X ray technique including instruction in the long cone paralleling method and practice on mannequins and skulls. GEN DENT

169. Oral Radiology. (1) F. Prerequisite: Oral Radiology 150 and 159. Clinic 3 hours. Parks
Course offers, in addition to intraoral technique, instruction and experience in panoramic radiography. GEN DENT

Continuation of Oral Radiology 121 and 131 in a seminar teaching format. GEN DENT

199. Laboratory Project in Oral Radiology. (1-5) F, W, Sp. Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. GEN DENT

Oral Surgery

Students learn to recognize and treat common emergencies; perform routine exodontia and minor oral surgical procedures; assist on major procedures in operating room setting; utilize common techniques of pain and anxiety control; admit, work-up, discharge hospital patients; perform cardiopulmonary resuscitation. ORAL MED

120. Local Anesthesia. (½) Sp. R. A. Smith
Course covers local anesthesia technique as it pertains to the dentition and oral cavity. ORAL MED

130A. Oral Surgery. (1) SS. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture 1 hour. N. Gordon
An introduction to the basic principles of exodontia, post-operative care, hemorrhage control, and medical emergencies. ORAL MED
130B. Oral Surgery. (1) F. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture 1 hour. 
N. Gordon
A didactic course outlining the basic principles of removal of unerupted teeth, preprosthetic surgery, prescription writing, maxillary sinus involvement, tooth transplantation, wound healing, referrals and consultations. ORAL MED

130C. Oral Surgery. (1) W. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture 1 hour. 
R. A. Smith
A didactic course outlining the principles of pain control with nitrous oxide and I.V. sedation; management of medically compromised patient and medical emergencies in the dental office are presented. ORAL MED

R. A. Smith
Procedural skills and academic knowledge the general dentist should be familiar with: includes the treatment of cysts, infection, developmental deformities of the jaw and salivary glands, duct diseases, and procedures. ORAL MED

132. Medical Evaluation, Medical Emergencies, and Parenteral Administration of Drugs. (½) F. 
R. A. Smith
Medical evaluation of dental patients and in-depth evaluation and treatment of patients with medical problems. Evaluation and treatment of cardiac arrest. Discussion of emergency drugs and infection of an office emergency kit. Demonstrations of parenteral administration of drugs. ORAL MED

Courage
Relationships of gross anatomical structures of the head and neck are studied during laboratory dissections. Emphasis is placed on the correlation of cadaver dissection findings to diagnosis and operating room surgery. ORAL MED

173. Surgical Orthodontics. (0-3) F, W, Sp. Prerequisite: Enrollment in oral surgery residency or general practice residency program. Lecture 0-3 hours. 
Ware, Courage
Orthodontic and oral surgery residents will participate in evaluating and defining treatment possibilities for patients with facial and occlusal deformities which may require combined therapy. Review and presentation of previously treated cases and pertinent literature will be included. ORAL MED

175. Oral Surgery. (13) Su. Prerequisite: Limited to oral surgery interns. Hospital and Clinic 40 hours. 
Ware and Staff
Principles of surgery and local anesthesia as related to the mouth and clinical operations on patients. ORAL MED

175.01A-B. Oral Surgery. (2-7, 2-7) F, W. Prerequisite: Limited to interns and residents. Lecture-Seminar 2 hours, Clinic 0-15 hours. 
Ware and Staff
Continuation of Oral Surgery 175. ORAL MED

175.02. Oral Surgery. (15) Su. Prerequisite: Limited to oral surgery residents. Seminar 2 hours, Hospital and Clinic 40 hours. 
Ware and Staff
Continuation of Oral Surgery 175.01A-B. ORAL MED

175.03. Oral Surgery. (13) F. Prerequisite: Limited to oral surgery residents. Hospital and Clinic 40 hours. 
Ware and Staff
Hospital procedures, ward rounds, and clinical practice in several hospitals; treatment of jaw fractures, osteomyelitis, cellulitis, and other complicated oral surgical procedures. Resident will have administrative responsibilities in conducting ward rounds and weekly conferences. ORAL MED

Ware and Staff
Continuation of Oral Surgery 175.03 with the addition of surgery of the jaws for correction of such facial deformities as prognathism, apertognathia, and retrognathia. Instruction in temporomandibular joint surgery. ORAL MED.

175.05. Oral Surgery. (13) Su. Prerequisite: Oral Surgery 175.04B-C. Limited to oral surgery residents. Hospital and Clinic 40 hours. 
Ware and Staff
Continuation of clinical oral surgery. Certain periods each week devoted to supervised instruction of undergraduate students. ORAL MED

Ware and Staff
Continuation of Oral Surgery 175.05. ORAL MED

Courage
Under oral surgery office conditions, and under immediate supervision of the staff, residents will be responsible for care and management of the ambulatory patient who is to undergo an oral surgery procedure under ambulatory anesthesia. ORAL MED

R. A. Smith
An elective didactic and demonstration course with practice sessions to insure the student's knowledge and capability of managing the psychomotor skills of cardiopulmonary resuscitation. ORAL MED

Ware and Staff
Additional clinical experience in oral surgery.

ORAL MED

Course provides limited experience in hospital oral surgery including assisting and performing oral surgery procedures, and aspects of premedication as related to the ambulatory patient; orientation in hospital decorum and operating room procedures. ORAL MED

Ware and Staff
Course provides limited experience in hospital oral surgery including assisting and performing oral surgery procedures, and aspects of premedication as related to the ambulatory patient; orientation in hospital decorum and operating room procedures. ORAL MED

Ware, Courage, Khosla
Students participate in oral surgery care of hospital inpatients and outpatients. They also attend seminars and lectures. ORAL MED

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ORAL MED

Course is designed to teach the dental intern exodontia procedures under close supervision in the oral surgery clinic. The trainee takes responsibility for care of the oral surgery patient including preoperative evaluation, surgery planning, and postoperative care. ORAL MED

Orthodontics

109. Clinical Orthodontics. (0-3) F, W, Sp. Prerequisite: Orthodontics 121 and 131A-B, or concurrent enrollment in Orthodontics 131A or 131B. Clinic variable. R. M. Meyer
Evaluation and treatment of clinical orthodontic problems as experienced in general dental practice. Students will treat problems and refer others to specialists. Observation of specialists' management of the more difficult problems is also available. GR DEVEL

121. Introduction to Growth and Development. (1) Sp. Lecture 1 hour. R. M. Meyer
Course describes the mode of growth of the craniofacial complex. General aspects of growth with clinical implications for the growing child are discussed, including the eruption of teeth and their correlation with facial growth. GR DEVEL

130. Basic Orthodontic Technics. (1) SS. Lecture 1 hour for six weeks. Lab 3 hours for six weeks. R. M. Meyer
A lecture and laboratory course designed to enable the student to fabricate and place a removable orthodontic appliance, a lingual arch, and solder wires. Experience in producing study casts, and measurement and analysis of casts and headfilms will be included. GR DEVEL

131A-B-C. Orthodontics in General Practice. (0-3, 0-3, 0-3) F, W, Sp. Prerequisite: Orthodontics 121. Lecture 1 hour. R. M. Meyer
Recognition and treatment of the problems most commonly seen by the general practitioner. GR DEVEL

160. Principles of Orthodontics. (0-3) Sp. Lecture 0-3 hours. E. West and Staff
A discussion of recognition, etiology, and principles of orthodontics for the dental hygienist. GR DEVEL

170A-B-C. Fundamentals of Orthodontics. (0-3, 0-3, 0-3) F, W, Sp. Lecture 0-3 hours. E. West
Classification, etiology, and diagnosis of malocclusion. Study of the dentition and the relationships of dental and cranial structures. GR DEVEL

171B-C. Orthodontics in Periodontic Practice. (0-3) W, Sp. Prerequisite: Consent of instructor and enrollment in a postdoctoral specialty program. Lecture 0-3 hours. E. West and Staff
Course includes orthodontic principles and techniques that are applicable in a periodontic practice. GR DEVEL

171.05A-B-C-D-E. Growth and Development. (0-3, 0-3, 0-3, 0-3) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in orthodontics program. Lecture 0-3 hours. Issacson
Orthodontic applications of basic craniofacial growth and development. GR DEVEL

172A-B-C-D-E. Cephalometrics. (0-3, 0-3, 0-3, 0-3) F, W, Sp, SS1, SS2. Lecture 0-3 hours. Poulton and Staff
Use of lateral headfilms; reliability of landmarks, applications in dentistry. Technics of tracing, evaluation of relationships, and of superposition are discussed and illustrated. GR DEVEL

172.02A-B-C-D-E. Supervised Orthodontic Research. (0-3, 0-3, 0-3) F, W, Sp, SS1, SS2. Lecture 0-3 hours. Baumrin and Staff
Participation in group and individual clinical investigations including experience in hypothesis
Orthodontics / Orthopaedic Surgery 123

Continuation of Orthodontics 179.01A-B-C-D-E. GR DEVEL

179.04. Clinical Orthodontics. (0-5) SS. Clinic 15 hours. E. West and Staff
Continuation of Orthodontics 179.03A-B-C. GR DEVEL

Various concepts of occlusion will be evaluated as they affect habilitation and functional problems of the temporomandibular joint. GR DEVEL

182A-B. Applied Growth and Development. (1-1) F. Prerequisite: Orthodontics 121, 131A-B-C. Lecture 1 hour. Yoshikawa
Review of general principles of craniofacial growth as applied to detection in treatment of incipient malocclusion. GR DEVEL

Orthopaedic Surgery

First-Year Coordinated Instruction— Medicine 131A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship— Surgery 110 and 111 includes seven to eight orthopaedic lectures, case presentations, and outpatient clinic assignments. Students are given instruction in methods of examination of patients with musculoskeletal disorders with emphasis on diagnosis and principles of treatment.

140.01. Orthopaedic Surgery Clinical Clerkship at UC, SFGH and VA. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111. UC W. Murray
Students assigned to inpatient and outpatient services, receive instruction and experience in examination and treatment of patients. Assistance in surgery and use of treatment modalities
are required. Clinical demonstrations, seminars, and conferences form the basis for didactic instruction. ORTHO SURG

140.02. Orthopaedic Surgery Clinical Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111.

Orthopaedic surgery clinical clerkships are offered in off-campus hospitals approved by the chairman of the department and the Dean. ORTHO SURG

W. Murray

Library research and directed reading under direction of a member of the faculty with the approval of the chairperson of the department. Lecture, individualized instruction, and clinical experience may also be included. ORTHO SURG

UC J. Johnson

A lecture series covering tumors and infections of the musculoskeletal system, illustrated by microscopic slides and photographs of gross specimens. ORTHO SURG

402. Seminars in Physiology of Musculoskeletal System. (1) F, W, Sp. UC Trafton

Seminars cover connective tissue metabolism; muscle, bone, and joint physiology; preoperative and postoperative management of patients; wound infections; microbiology; and surgical principles. ORTHO SURG

Course includes lectures by students and faculty on gross and functional anatomy, laboratory dissections of cadaver material, and demonstrations of surgical approaches. ORTHO SURG

UC Trafton

Seminars are student presentations of selected orthopaedic surgery subjects featuring historical review complete with bibliography. They are moderated by an assigned faculty member. ORTHO SURG

Clinical instruction in the care and management of orthopaedic problems in rheumatoid arthritis and allied diseases. Cases are presented by residents to attending staff and rheumatology consultants. ORTHO SURG

Seminars include presentation of problem cases by residents for consideration of diagnosis, treatment, and discussion by the attending staff. ORTHO SURG

408. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. SFGH Bovill

Selected problems are illustrated by cases treated or under treatment. Cases are presented by the resident staff and discussed by members of the attending staff. ORTHO SURG

409. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. SSF L. Larsen

Conference with emphasis on children's problems in which residents make case presentations of inpatients for review and of new patients for consideration of diagnosis and therapeutic plan. ORTHO SURG

411. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. VA Maurer

Conference includes review of admissions and discharges of hospitalized patients by the attending and consultant staffs. Cases are presented by the residents. ORTHO SURG

412. Orthopaedic Clinical Seminars. (1) Su, F, W, Sp. CHMC Barer, H Slabaugh, SM W. Jackson

Seminars are held in rotation at each of these hospitals with residents from all three hospitals attending. They include literature review and demonstrations related to surgical approaches, anatomical dissections, diagnosis and treatment. ORTHO SURG

413. Medical Staff Conference. (1) Su, F, W, Sp. UC W. Murray

Residents prepare and present case histories of inpatients and selected outpatients. Course includes discussions on diagnostic procedures, indications for surgery, immediate postoperative follow-up, and problem cases (consultations). ORTHO SURG

Residents are responsible for patient care in the wards and outpatient care in the wards and outpatient clinics including history-taking, physical examinations, laboratory tests, elective surgery, fracture treatment, plaster techniques, and consultations. ORTHO SURG

Residents are responsible for patient care in the wards and outpatient clinic including history-taking, physical examinations, laboratory tests, elective surgery, fracture treatment, plaster techniques, and consultations. ORTHO SURG

452. Clinical Traumatic and Adult Orthopaedics. (1½ per week) Su, F, W, Sp. SFGH Bovill, SM W. Jackson, VA Maurer, H Slabaugh

Residents are responsible for patient care in the wards and outpatient clinic including history-taking, physical examinations, labora-
tory tests, elective surgery, fracture treatment, plaster techniques, and consultations. ORTHO SURG

Under faculty supervision, the chief resident organizes care and referral of staff patients; supervises a weekly follow-up clinic; administers the teaching-bed fund; independently performs operative procedures in selected cases; advises interns, residents, and fourth-year medical students; participates in paramedical teaching. ORTHO SURG

Clinical instruction in the care and management of orthopaedic problems in athletic injuries. Course consists of clinical practice under supervision as well as didactic lectures every third week. ORTHO SURG

Interns rotate through orthopaedic wards and follow-up clinics. They are responsible for patient care under the direction of the attending staff, including history-taking, physical examinations, X-ray conferences, and consultation. ORTHO SURG

Otolaryngology

First-Year Coordinated Instruction—Medicine 131 A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship—Surgery 110 and 111 includes lectures and case demonstrations on the examination and diagnosis of otolaryngological diseases, particularly those related to trauma and infection. Instruction is given in the examination and diagnosis of ward and clinic patients with otolaryngological surgical diseases.

140.01A. Clinical Otolaryngology Clerkship at UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. Boles
A practical course in general otolaryngology, including diagnosis and treatment of common ear, nose, and throat problems. Both inpatient and outpatient experiences will be offered. OTOLARYN

140.01B. Clinical Otolaryngology Clerkship at VA. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. J. Ross
A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.01C. Clinical Otolaryngology Clerkship at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. Crumley
A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.01D. Clinical Otolaryngology Clerkship at L. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. R. Wong
A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.01E. Clinical Otolaryngology Clerkship at NRMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. C. M. Johnson
A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

Clinical clerkships in off-campus hospitals approved by the chairman of the department and the Dean. OTOLARYN

198. Supervised Study in Otolaryngology. (1-5) F, W, Sp. Prerequisite: Consent of instructor. R. Schindler
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. OTOLARYN

199. Laboratory Project in Otolaryngology. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Merzenich
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. OTOLARYN

400. Didactic Lectures. (2) F, W, Sp. Crumley
Lectures cover the anatomical, physiological, and clinical aspects of otolaryngology. OTOLARYN

401. Gross Anatomy of the Head and Neck. (1) W. Crumley
A formal course in the anatomy of the head and neck. OTOLARYN

403. Ear, Nose, and Throat Histology and Pathology. (½) F, W. Dekelboum
A review of ear, nose, and throat pathology from currently available gross and microscopic surgical pathological material from the operating rooms and pathology laboratories. OTOLARYN

404. Staff Rounds. (2) Su, F, W, Sp. Boles
Weekly seminars are held with discussion of current problems concerning diagnosis and management of patients with reference to current literature, modern theory, and controversial aspects. OTOLARYN

405. Seminar in Audiology and Speech Pathology. (1) F, W, Sp. UC Owens
Seminar includes psychophysical backgrounds in audiology, basic and advanced tests of hearing, functional hearing loss, hearing aids, testing of children, aural rehabilitation, and speech and hearing problems of children and adults.

OTOLARYN

406. Tumor Conference in Otolaryngology. (1) Su, F, W, Sp. UC Dedo
Conference includes presentation of patients, study of histories, and discussion of the treatment of the patient in light of modern progress in the field. OTOLARYN

Basic science and clinical aspects of cosmetic facial surgery and reconstructive surgery of the head and neck are covered in a weekly one-hour seminar. Slide presentations, videotape movies, didactic lectures, and anatomic dissections constitute the curriculum. OTOLARYN

A laboratory course conducted in the ear, nose, and throat pathology laboratory. All resident staff members are required to familiarize themselves thoroughly with the microscopic anatomy of the temporal bone under formal staff instruction. OTOLARYN

412. Tumor Board. (1) Su, F, W, Sp. VA J. Ross
Tumor cases are presented for diagnosis and recommendations for treatment. OTOLARYN

413. Audiology Conference. (1) Su, F, W, Sp. VA J. Ross
Combined Audiology and Otolaryngology Staff Conference where all patients evaluated for hearing problems are presented, and diagnosis and treatment recommendations are made. OTOLARYN

Residents, under supervision, are responsible for patient care in the wards and outpatient clinics including history-taking, physical examination, laboratory tests, preoperative and postoperative care, minor surgery, audiology, vestibular testing, and consultations. Senior resident has certain administrative, teaching, and clinical responsibilities. OTOLARYN

A study of the techniques of endoscopy and some practical laboratory study including cadaver work. OTOLARYN

490. Clinical Otolaryngology at SFGH. (1½ per week) Su, F, W, Sp. Crumley
Interns, under supervision of the attending staff, are responsible for patient care on wards and in the follow-up clinic, including history-taking, examination, and consultation. This rotation is combined with patient-care assignments in the Ophthalmology Service. OTOLARYN

Parasitology

135. Medical Parasitology. (3) W. Lecture 2 hours. Lab demonstration 2 hours. Heyneman and Staff
An introduction to the protozoa, helminths, and anthropods that parasitize man. Parasite ecology and disease epidemiology, clinical and diagnostic aspects of parasitic diseases and their treatment are considered in lecture and laboratory. Emphasis in the laboratory is on demonstration. EPID INTL HLTH

Pathology

101. General and Systemic Pathology. (4) F. Prerequisite: Substantive courses in anatomy, biochemistry, physiology, histology, microbiology (or concurrent enrollment), concurrent enrollment in Medicine 132A. If in doubt as to adequacy of preparation, consult the instructor. Lecture 3 hours. Lab 2 hours. Friend, Margaretten, and Staff
Mechanisms and language of disease are discussed, with emphasis on cell injury, inflammation, infectious agents, repair, regeneration, hemodynamic derangements, neoplasia. Recent advances and classical concepts of diseases as they affect the heart and blood vessels, lungs, gastrointestinal tract are presented. PATHOLOGY

102. Systemic Pathology. (3) W. Prerequisite: Pathology 101. Lecture 3 hours. Lab 2 hours. Margaretten, M. Warnock, and Staff
Recent advances and classical concepts of diseases as they affect the following organ systems are presented: pancreas, liver, central nervous system, kidney, endocrine system, skin. Emphasis will be on correlation of functional and morphologic characteristics of diseases of organ systems. PATHOLOGY

103. Systemic Pathology. (3) Sp. Prerequisite: Pathology 102. Lecture 3 hours. Lab 2 hours. Margaretten, M. Warnock, and Staff
Recent advances and clinical concepts of diseases as they affect the following organ systems are presented: reproductive systems, skeletal system, hematopoietic system, and lymph nodes. Emphasis will be on correlation of functional and morphologic characteristics of diseases of organ systems. PATHOLOGY
126. General Pathology. (5) $ F. Prerequisite: Substantive courses in biochemistry, physiology, histology, microbiology (first quarter, concurrent) or an introduction to immunology. If in doubt as to adequacy of preparation, consult the instructor. Lecture 3 hours. Lab 6 hours.

Biava and Staff

Mechanisms and language of disease are discussed, with emphasis on the dynamic nature of fundamental disease processes: cell injury, immunopathology, inflammation, responses to infectious agents, repair, regeneration hemodynamic derangements, genetic disorders, disturbances of cell growth, and neoplasia. PATHOLOGY

135. General Pathology. (4) $ F. Prerequisite: Substantive courses in biochemistry, physiology, histology, microbiology (first quarter, concurrent) or an introduction to immunology. If in doubt as to adequacy of preparation, consult the instructor.

This course is identical to the lecture portion of Pathology 126. PATHOLOGY

M. Warnock

Performance of three or four complete autopsies. Emphasis will be on review of normal anatomy and histology and systematic observations and descriptions of pathologic material. Objective of the course is to provide a better understanding of clinical-pathologic correlations. PATHOLOGY

Smuckler

Clinical clerkships in off-campus hospitals approved by the chairperson of the department and the Dean. PATHOLOGY

150.03. Surgical Pathology and Postmortem Examinations at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Pathology 102 and consent of instructor. McKay, Margaretten, Howes

Students prepare surgical specimens, perform autopsies under supervision, and participate in teaching conferences. PATHOLOGY

Staff

Students work closely with the faculty and house staff in the performance of autopsies and in the diagnostic work-up of surgical specimens. They actively participate in departmental conferences and seminars. Opportunity provided for development of specific areas of investigation. PATHOLOGY

150.05. Research in Pathology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department.

Staff

A research project under the direction of a member of the faculty. PATHOLOGY

170.01. Clinical Cytology. (3) Sp. Prerequisite: Anatomy 102, Pathology 101 and 102.

E. King, E. Hill

Lectures on basic fundamentals of cytology, normal cells, malignant cells, abnormal non-malignant cells, collection, and preparation methods. Microscopic examination of specimen and correlation of cellular and tissue pathology with colposcopic and clinical findings on examination of the patient. PATHOLOGY

Biava

Study of clinical and pathological aspects of current cases of renal disease. New material is presented each quarter during an academic year; therefore course may be repeated for credit. PATHOLOGY

Staff

Presentation of selected current cases seen in the hospital pathology laboratory. Discussion of pathological findings, and correlation with clinical and radiologic findings and treatment.

PATHOLOGY

170.05. Neuropathology. (2) W. Prerequisite: Pathology 102. Third- or fourth-year standing. Lecture and Seminar 2 hours.

J. J. Townsend

Emphasis is placed on clinicopathological correlation of neurological diseases by means of study of gross and microscopic material and participation in conferences. PATHOLOGY

170.08. Studies in Pathology. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department.

Staff

Studies in pathology at other institutions with the approval of the chairperson of the department. PATHOLOGY

180.01. Pathology. (3) F. Prerequisite: Anatomy 118. Lecture 3 hours.

Biava and Staff

This course is identical to the lecture portion of Pathology 126. Elective in the dental hygiene curriculum. PATHOLOGY

198. Supervised Study in Pathology. (1-5) $ F, W, Sp. Prerequisite: Consent of instructor.

Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department.

PATHOLOGY

199. Laboratory Project in Pathology. (1-5) $ F, W, Sp. Prerequisite: Consent of instructor.

Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PATHOLOGY

209. Applied Pathology. (3) $ W. Prerequisite: Microbiology 126A-B and Pathology 126 or equivalents.

J. Greenspan
Weekly seminars are designed to provide students with an understanding of the basic principles of pathology. Emphasis is placed on research; students will critically review current literature in the field, under faculty supervision. PATHOLOGY

220. Seminar. (1) § F, W, Sp. Prerequisite: Permission of the graduate adviser of the department. Seminar 1 hour. Required for graduate students in the Program in Experimental Pathology. R. Stern

Faculty members and graduate students discuss research in experimental pathology. PATHOLOGY

Students and faculty review literature and discuss current concepts and experiments in connective tissue research. Included are role of structural proteins, such as collagen and elastin in pathology, cell matrix, interactions in developmental biology and morphogenesis. PATHOLOGY

PATHOLOGY

296. Experimental Models for the Study of Human Disease. (2) § Sp. Prerequisite: Previous course in pathology recommended. Lecture 2 hours. R. Stern

This course will attempt to establish interactions between the basic sciences and clinical problems. Several experimental animal models for basic human disease processes will be explored. Various lecturers will present model systems which they are currently using in their own laboratories. PATHOLOGY

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree. PATHOLOGY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. PATHOLOGY

400. Combined Pathology and Laboratory Medicine Staff Seminars. (1) F, W, Sp. Interns and residents. Prerequisite: Medicine 110 and Surgery 110 or consent of instructor. Seminar 1 hour. R. Stern

Recent developments in diagnosis and research in pathology and laboratory medicine are discussed by faculty and guest speakers. PATHOLOGY

401. Special Pathology Seminars. (Units to be arranged) Su, F, W, Sp. Interns and residents. Staff

Seminars focusing upon the pathology of specific organ systems are conducted by specialists. Emphasis is on the correlation between clinical manifestations of the disease and pathologic findings. PATHOLOGY

402. Pathology Research. (1-8) Su, F, W, Sp. Interns and residents. Staff

Students, under supervision, pursue original investigation in pathology and allied subjects. Investigators review the literature, make observations, and correlate physiological with pathologic concepts. PATHOLOGY

Conference includes the collection of data and materials, summary of histories, and citation of pertinent literature by faculty. Residents participate in clinicopathological conferences where emphasis is placed on correlation of clinical manifestations of disease with clinical laboratory and autopsy findings. PATHOLOGY

450. Pathologic Anatomy. (5-10) Su, F, W, Sp. Required for interns; elective for residents. Staff

Theory and methodology of pathologic anatomy, interpretation and correlation of data, and study of literature. PATHOLOGY

455. Seminars in Diagnostic Electron Microscopy. (1) W. Prerequisite: Medicine 110 and Surgery 110 and consent of instructor. Lecture 1 hour. Elective for interns and residents. Staff

Course covers basic electron microscopic techniques, indications for use of electron microscopy in pathologic diagnosis, and the specific ultrastructural features of normal and diseased tissue. Emphasis is placed on renal biopsy and tumor diagnosis. Documented attendance is required. PATHOLOGY

495. Pathologic Anatomy. (1½ per week) Su, F, W, Sp. Required for interns. Staff

Theory and methodology of pathologic anatomy, interpretation and correlation of data, and study of literature. PATHOLOGY

Pediatrics

100. Medical Genetics. (2) F. Lecture 2 hours. C. Epstein

Basic aspects of human genetics are presented in a context relevant to the diagnosis, treatment, and counseling of genetic disorders and congenital malformations. Emphasis is placed on the application of genetic knowledge to actual counseling problems. PEDIATRICS

Practical experience in the ward, newborn nursery, and outpatient clinics with emphasis on case assignments. Teaching and supervision by attending and resident staffs. Required seminars cover aspects of pediatrics, infectious diseases, and child psychiatry. PEDIATRICS

Advanced clerkship including: Normal newborn and IC Nursery; OPD Acute Care Unit; Inpatient at UC; OPD at SFGH; Outpatient clinics at L; Inpatient and outpatient at K; Inpatient and outpatient at CHMC; Inpatient and outpatient at NRMC. PEDIATRICS

140.01A. Advanced Clerkship at UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor.

140.01B. Advanced Clinical Clerkship—Outpatient at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor.

140.01C. Advanced Clinical Clerkship—Outpatient at L. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

140.01D. Advanced Clinical Clerkship—Outpatient at CHMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor.

Students are assigned patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01E. Advanced Clinical Clerkship—Inpatient at CHMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01F. Advanced Clinical Clerkship—Inpatient at K. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor.

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01H. Advanced Clinical Clerkship—Outpatient at NRMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01I. Advanced Clinical Clerkship—Inpatient at NRMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01J. Advanced Clinical Clerkship at Moffitt Nursery. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Clinical clerkship in off-campus hospitals approved by the chairman of the department and the Dean. PEDIATRICS

Working with a pediatric house staff and pediatric nurse practitioner team and under the supervision of the staff pediatrician, the clerk will have direct primary care and health supervision responsibilities for selected well and acutely ill children in a clinic setting. PEDIATRICS

Experience in cardiac evaluation and treatment including clinical work-up in the ward and clinic, cardiac catheterization, angiography, children's electrocardiographs, surgical management, and postoperative care. PEDIATRICS
140.05. Pediatric Private Practice. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Open to UCSF students only. L. P. Smith

Working experience with a pediatrician on the clinical faculty as the pediatrician sees patients in the office and in the hospital. Student may select time in small group, large group or subspecialty practice, or a combination of these. PEDIATRICS

140.06. Adolescent Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Gareis

Clinical clerkship in adolescent medicine with emphasis on outpatient clinical experience in a wide range of health problems of the adolescent. PEDIATRICS

140.08. Ambulatory Pediatric Clerkship at MZ. (1½ per week) F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. R. Ballard, D. Bergman

Students participate as members of physician team in the ambulatory pediatric program with Children and Youth Project. Night call includes pediatric E.R. and inpatient experience. Students will follow patients from their team on the inpatient service. PEDIATRICS

Supervised participation in clinical activities, both inpatient and outpatient, and all regularly scheduled conferences of the Child Neurology Division. Study of the developing nervous system and diseases of the nervous system affecting infants, children, and adolescents. PEDIATRICS

140.10. Pediatric Hematology and Oncology. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Open to UCSF students only. Mentzer, P. Dallman, Koerper, Lubin

Students participate in ward rounds, outpatient clinic, and laboratory evaluation of blood and bone marrow specimens at UC, SFGH, and CHMC. Pursuit of special interests in the clinic or laboratory is encouraged. PEDIATRICS

140.11. Pediatric Cardiology at CHMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Higashino

Students participate in clinical experience including outpatient evaluation, instruction in the noninvasive methods of diagnosis, care of ward medical and surgical cardiac patients, cardiopulmonary laboratory, and cardiovascular conferences. Emphasis is on the physiological principles of diagnosis and management. PEDIATRICS

Advanced clerkship on the general medical-surgical pediatric inpatient unit. Family-centered care is emphasized through the Care With Parent Program. Night call includes pediatric E.R. experience. PEDIATRICS

Participation in the clinical and investigative aspects of endocrine and metabolic problems in children. Students spend time in the laboratory, on the wards, and in the clinics. PEDIATRICS

Work under the direction of the instructor in Diabetic Camp, clinical and management aspects of diabetes. Students have an opportunity to participate in the operation of the camp program and treatment of many aspects of diabetes in children, adolescents, and young adults. PEDIATRICS

Participation in management of patients with solid tumors and leukemia; attendance at pediatric tumor board, ward rounds and outpatient clinic. Special emphasis on psychosocial problems; supervised reading and discussion with preceptor. PEDIATRICS

Introduction to general nephrology. Clinical experience in pediatric nephrology with children having nutritional problems, ESRD, and chronic renal failure. Posttransplant and dialysis consultations, new cases from the nursery, and cases requiring TPN. Research projects may be arranged with instructors. PEDIATRICS

Evaluation and management of children and adults with hereditary (including cytogenetic) diseases, with particular emphasis on genetic counseling, patterns of human malformation, and the biochemical and genetic mechanisms involved in the pathogenesis and transmission of these conditions. PEDIATRICS

Students participate in patient care in close association with the house staff and clinical fellows both in wards caring for sick children and in Newborn Intensive Care Unit, and in rounds and conferences conducted by senior staff. PEDIATRICS
Giammona

Students participate in the comprehensive care of children. Experience with various illnesses is provided in appropriate specialty clinics. A wide variety of child care problems will be seen during visits to offices of senior pediatricians participating in the program. PEDIATRICS

Frick

Participation in the activities of allergy-immunology trainees, including basic clinical immunology course, journal club, and seminars. PEDIATRICS

Frick

Clinical experience in a busy community hospital Ambulatory Pediatric Clinic to prepare the student for daily patient encounters and responsibilities of pediatric or family practitioners. Teaching of patients in well and ill general pediatrics, well baby, preventive medicine, and pediatric subspecialties. PEDIATRICS

Cohn

Students participate in the care of infants in the intensive care nursery in close association with the house staff, fellows, and senior staff and in conferences conducted by senior staff. PEDIATRICS

R. Ballard

Experience in normal newborn and intensive care nurseries, according to student’s interests and skills. Student participates in the care of transport infants, and on night call. PEDIATRICS

Gorski

Newborn through pre-school-age developmental assessments; clinical teaching conferences; literature seminars; consultations in the nursery and the pediatric ward; day-care experience and seminar; improvement of physician-patient communication skills; clinic for developmental and behavioral problems in 0-3-year-olds. PEDIATRICS

140.27. Elective in Pediatric Inpatient Care in a Prepaid Health Care Program at KP. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.  
Schoen

Within the country's largest prepaid health care program students will participate in office visits, urgent ambulatory care, health education, and inpatient care. They will work with staff and resident physicians, nurse practitioners and health educators. PEDIATRICS

Grumbach, F. Conte

Participation in human cytogenetic studies in children. Emphasis is on laboratory work with exposure to clinical problems and patients. PEDIATRICS

Grumbach and Staff

Student research projects under guidance of faculty members. Programs must be approved by instructors. Students may initiate or continue research programs under supervision of faculty members. PEDIATRICS

Grumbach

Students prepare case presentations weekly from patients on the pediatrics wards. Course correlates patients’ problems with work in the required curriculum. Experience on the ward in the clinical setting. PEDIATRICS

Grumbach and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PEDIATRICS

199. Laboratory Project in Pediatrics. (1-5) F, W, Sp. Prerequisite: Consent of instructor.  
Grumbach and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PEDIATRICS

UC Grumbach

Conferences include house staff preparation and presentation of patient case histories with reference to the literature, laboratory work, and special studies. Faculty members and consultants from other departments as well as other universities discuss recent developments in their respective fields. PEDIATRICS

UC Gooding
Residents in the Primary Care Track of Pediatrics are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Pediatrics Residency Program as well as related clinical services such as Dermatology, Otolaryngology. PEDIATRICS

Interns rotate through newborn nursery, pediatric wards and clinic, communicable diseases ward, and emergency room. They are responsible for the care of patients, under the direction of the attending staff, including history-taking, physical examination, laboratory tests, diagnosis, and treatment. PEDIATRICS

Interns, under supervision, are responsible for patient care in the wards and outpatient clinic including history-taking, physical examination, laboratory tests, diagnosis, and treatment. Emphasis is on diagnosis and management of infection trauma, and pediatric emergencies. PEDIATRICS

Pedodontics

Clinical diagnosis, plan of treatment, dietary analysis and counseling, fabrication of appliances for and treatment of children requiring tooth guidance, space management, and preventive orthodontics. Units assigned upon completion of clinic requirements. GR DEVEL

109.01. Clinical Pedodontics Rotation. (0-½) F, W, Sp. Prerequisite: Third-year standing. Clinic rotation 12 hours. M. Morris and Staff

Introduction to the examination of the child patient, treatment planning, prevention instruction, dietary analysis, and the performance of operative procedures. Proper management of the child patient will be stressed. GR DEVEL

109.02. Pedodontics Rotation. (0-2) F, W, Sp. Prerequisite: Fourth-year standing. Clinic rotation 60 hours. M. Morris and Staff

Course is broken up into two components: Mondays, Tuesdays, and Wednesdays will be spent at the Dental Annex Clinic; Thursdays and Fridays at the Mobile Dental Clinic in Stockton. GR DEVEL

130A-B-C. Pedodontics. (1-1-1) F, W, Sp. Prerequisite: Operative Dentistry 125A-B. Lecture 1 hour. M. Morris and Staff

Lecture course presenting dental procedures unique to, or modified to meet, the needs of the child. Examination, diagnosis, treatment planning, pain control and management, restorative procedures, preventive orthodontics, diet analysis, and carries control are stressed. GR DEVEL

170.01A-B-C-D. Clinical Pedodontics. (0-5, 0-5, 0-5, 0-5) F, W, Sp, SS. Clinic variable. B. A. Smith and Staff

170.02A-B-C. Clinical Pedodontics. (0-5, 0-5, 0-5) F, W, Sp. Prerequisite: Pedodontics 170.01A-B-C-D. Clinic 0-15 hours. B. A. Smith

Continuation of Pedodontics 170.01A-B-C-D. GR DEVEL

171.01A-B-C-D-E. Pedodontic Seminar. (0-3, 0-3, 0-3, 0-3) F, W, Sp, SS1, SS2. Seminar 1-3 hours. B. A. Smith and Staff

A variety of pedodontic patients are discussed through documented case history presentations. Current and classical literature in pedodontics and allied specialty areas is reviewed. GR DEVEL
173. Pedodontic Community Outreach. (0-6) SS. Prerequisite: Pedodontics 170.02A-B-C. Clinic variable. M. Morris and Staff

Students provide dental care for a non-English speaking migrant population, utilizing facilities of the mobile clinic. GR DEVEL

175. Pediatric Oral Surgery. (3) F. SFGH 90 hours. Khosla, Devlin

Hospital procedures, management of trauma and emergencies involving the primary and young succedaneous teeth. Extractions, replantation, pulp protection, stabilization of luxated teeth, management of infection, and supportive therapy are emphasized. GR DEVEL

176. Pediatric General Anesthesia. (0-3) F. CHMC: 90 hours. K. Schroeder and Staff

An introductory course in general anesthesia to familiarize the student with general anesthesia: the attendant problems and risks, the agents used, and methods of delivery. Clinical experience under close supervision. GR DEVEL

177. Pediatric Hospital Dentistry. (0-3) Su, F, W, Sp. M. Morris and Staff

Experience is provided in history-taking, admitting, laboratory tests, orders, and chart keeping. Students are assigned to an interdisciplinary health care team and provide dental care for patients on the ward or in the operating room, using a general anesthesia. GR DEVEL

178. Advanced Clerkship. (0-18) Sp. Prerequisite: Postdoctoral standing and arrangement through head, postdoctoral pedodontists, to observe the practice management of the offices. Lecture and lab variable. B. A. Smith and Staff

Course provides varied clinical experiences, skills, and competence. This advanced clerkship is available for second-year students in pedodontics who have successfully completed the requirements considered core to the program. GR DEVEL

180.01B-C. Pedodontic Seminar. (1-1) W, Sp. Prerequisite: Completion of third-year pedodontic lecture series and approval of the Dean. Lecture 1 hour. B. A. Smith

Documented discussions on occlusion, mixed dentition analysis, malocclusions, missing incisors and premolars, hypoplasias, anomalies, injuries, and oral manifestations of systemic disease. Designed for students considering pedodontics as a specialty. Counseling is provided for postdoctoral education. GR DEVEL

185A-B-C. Advanced Pedodontic Appliance Laboratory. (0-3, 0-3, 0-3) F, W, Sp. Prerequisite: Postdoctoral standing or approval of Clinic Review Committee and chairperson of the division. Lecture 1 hour. Lab 3 hours. Aubuchon

Demonstrations followed by individual assistance in fabrication of projects. A reading assignment will be provided for each session. GR DEVEL

189.01. Clinical Practice in Pedodontics. (0-9) F, W, Sp. Prerequisite: Pedodontics 130A-B-C and completion of clinical pedodontics and all third-year clinical and didactic courses in operative dentistry. Approval of Clinical Review Committee. Clinic variable. M. Morris and Staff

Course provides additional clinical experience in pedodontics. GR DEVEL

189.02. Community Pedodontics. (0-4) F, W, Sp. Prerequisite: Completion of clinical requirements for graduation or approval of Clinic Review Committee. Clinic 0-120 hours. M. Morris, Stark and Staff

An elective clinic course in pedodontics. Students provide care for children at selected migrant farm labor camps. Course includes preventive education, comprehensive operative procedures including pulp therapy and necessary minor dental surgery, taking and processing needed radiographs. GR DEVEL

Periodontology

Treatment of a variety of periodontal diseases under the direct supervision of faculty. PERIODONT

Introduction to the recognition and diagnosis of inflammatory periodontal disease. The pathogenesis of periodontal disease is discussed from clinical, histopathological, and biochemical points of view. PERIODONT

119. Periodontal Therapy (Introduction). (½) Sp. Clinic five 4-hour periods. S. R. Miller

Introduction to the techniques of supragingival scaling and root planing. PERIODONT

121. Periodontal Therapy (Introduction). (1) F. Prerequisite: Periodontology 110. Lecture 1 hour. Armitage

Introduction to the rationale and objectives of periodontal therapeutic procedures. Also considered are the recognition and treatment of periodontal disease in children, acute periodontal emergencies, and periodontal considerations in restorative dentistry. PERIODONT

Introduction to clinical techniques in oral prophylaxis including plaque control, scaling, root planing. During fall and winter quarters, students provide dental hygiene therapy for senior patients. The spring quarter is utilized for treatment of their own patients. PERIODONT

131. Periodontics. (1) F. Prerequisite: Periodontology 121. Lecture 1 hour. Parr

The demonstration and rationale of surgical treatment of periodontal lesions. PERIODONT
150. Periodontics. (2) Sp. Lecture and Demonstration 2 hours.  
Lodberg  
Introduction to the oral hygiene problems of the periodontal patient and the means and methods available to the dentist and auxiliaries to motivate the patient to self-care. PERIODONT

160. Periodontics. (1) F. Prerequisite: Periodontology 150. Lecture 1 hour.  
S. R. Miller  
Classification of periodontal diseases and methods of their prevention. Principles of pathology are correlated with therapeutic procedures. A faculty panel discusses the role of the hygienist in dental practice. PERIODONT

161. Periodontics. (1) W. Prerequisite: Periodontology 160. Lecture 1 hour.  
S. R. Miller  
The demonstration and rationale of surgical treatment of periodontal lesions. The role of the dental hygienist in dental practice, especially related to prevention, recognition, and aid in treatment of periodontal diseases. PERIODONT

170A-B-C. Histopathology of the Periodontium. (2-2-2) F, W, Sp. Lecture 1 hour, Lab 3 hours.  
Dienstein  
Dynamics of inflammation and its role in the periodontal tissues. PERIODONT

171A-B-C. Clinical Periodontics. (0-8-4) F, W, Sp. Prerequisite: Enrollment in periodontology program. Clinic 12 hours.  
Shibata, E. Green and Staff  
Clinical procedures in periodontal therapy. This course is an enlargement on earlier clinical experience. PERIODONT

172. Examination and Treatment Planning. (1) F. Prerequisite: Enrollment in postgraduate specialty program or consent of instructor.  
Parr  
Lectures on examination and treatment planning. PERIODONT

172.01. Hospital Anesthesiology. (6) SS. Prerequisite: Consent of instructor. Seminar 10 hours, Clinic 24 hours.  
C. Chang  
Practical course in operating room anesthesia. Instruction in hospital administration, physical and preanesthesia evaluation of the patient, monitoring of vital signs, administration of intravenous psychosedation, general anesthesia, and handling of resultant medical emergencies. Clinical instruction is supplemented by seminars. PERIODONT

Shibata  
Clinical periodontics integrated into the regular medical and rehabilitative activities of MZ. Course provides patients with quality dental care, appreciation for preventive dentistry, and concept of total health care. Students are exposed to various medical conditions. PERIODONT

173.01. Periodontal Therapy. (2) SS. Prerequisite: Periodontology 171A-B-C. Clinic 60 hours.  
Shibata  
Clinical procedures in periodontal therapy. This course is an enlargement on earlier clinical experience. PERIODONT

173.02A-B-C. Periodontal Therapy. (4-4-4) F, W, Sp. Prerequisite: Periodontology 171A-B-C. Clinic 12 hours.  
Shibata, E. Green and Staff  
Advanced clinical procedures in periodontal therapy. PERIODONT

173.03. Periodontal Therapy. (2) SS. Prerequisite: Periodontology 173.02C. Clinic and Seminar 60 hours.  
Shibata, E. Green and Staff  
Advanced surgical techniques in management of periodontal lesions. PERIODONT

174. Periodontics. (1) SS. Prerequisite: DDS degree. Seminar 1 hour.  
Parr  
A seminar to discuss and evaluate the problems common to the specialties of orthodontics and periodontics. PERIODONT

175A-B-C-D. Treatment Planning and Surgery Seminar. (0-3-0-3, 0-3-1) F, W, Sp, SS. Seminar 1 hour.  
Shibata and Staff  
Students present and discuss management of their cases that are either planned for treatment or currently under treatment. They are expected to defend their treatment plan and therapeutic procedure based on relevant literature and clinical experience. PERIODONT

175.01A-B-C-D. Advanced Treatment Planning and Surgery Seminar. (1-1-1)) F, W, Sp.  
Seminar 1 hour.  
Shibata and Staff

Students present and discuss management of their cases that are either planned for treatment or currently under treatment. They will be responsible for defending their treatment plan and therapeutic procedures based on relevant literature and clinical experience. PERIODONT

176. Original Investigation in the Field of Periodontology. (1-5) F, W, Sp. Prerequisite: Enrollment in postgraduate specialty program or consent of instructor. Lab 3-15 hours.  
Armitage Research. PERIODONT

Rust

Study in depth with literature review and seminar discussions on surgical techniques used to treat lesions involving the hard and soft tissue of the periodontium. PERIODONT

E. Green (F)  
W. H. Noble (Sp)

Course provides a broad concept of the principles of occlusion, upon which definitive therapeutic procedures can be based. PERIODONT

179A-B. Molecular and Biochemical Basis of Disease. (2-2) F, W. Prerequisite: Resident or graduate standing. Lecture 2 hours. Lab 1 hour.  
Bhatnagar

Course reintroduces students to principles of biochemistry and molecular biology in relation to current concepts of the molecular basis of major disease entities including cancer, metabolic disorders, fibrotic and degenerative disor-

Shibata (F) E. Green (W) Bhatnagar (Sp)

Elements of experimental design, statistical inference, and methods of laboratory and clinical research. PERIODONT

209. Periodontology Literature Review Seminar. (2) § F, W, Sp. Lecture 2 hours. Staff

Seminar designed to correlate basic sciences with problems in periodontology and evaluate concepts in the direction of research, clinical application, and teaching. Selected papers in the literature are reviewed and evaluated. Other instructors are invited to participate. PERIODONT

Pharmaceutical Chemistry

120. Principles of Pharmaceutical Chemistry. (3) § F. Prerequisite: Chemistry 113. Lecture 2 hours. Lab 3 hours.

R. B. Meyer, Ortiz de Montellano

A study of physicochemical and biological factors which contribute to drug action; in vivo and in vitro biotransformations of drugs and related organic compounds. PHARM CHEM

121. Principles of Pharmaceutical Chemistry. (2) W. Prerequisite: Pharmaceutical Chemistry 120 and concurrent enrollment in Pharmacology 121. Lecture 2 hours. Jorgensen, M. Wolff

A systematic survey of the chemical features of synthetic drugs, including correlations between chemical structure and biological activity. Emphasis on steroids, hormones, and drugs for metabolic disorders. PHARM CHEM

154. Pharmaceutical Quality Control. (2) W. Prerequisite: Pharmacy 165, Pharmacy 166 or concurrent enrollment. Lecture 2 hours. Brochmann-Hanssen

General principles of total quality control applied to the manufacture of pharmaceuticals, introduction to statistical quality control, its application to process studies, and evaluation of dosage forms. Consideration given to simplified quality control systems for small-scale manufacturing and hospital pharmacy. PHARM CHEM
155. Introduction to Computers. (3) F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Langridge

Introduction to the use of computers, emphasizing non-numerical applications such as text editing and formatting. No mathematics above college freshman level nor experience in the use of computers is required. PHARM CHEM

156. Pharmaceutical Analysis. (2) Sp. Lab 6 hours. Brochmann-Hanssen

Experiments in pharmaceutical analysis applied to drug entities, dosage forms, and samples of biological origin. PHARM CHEM

Analytical theory and techniques for determining drugs and metabolites in biological fluids. PHARM CHEM

158. Radioisotope Measurements. (1) W, Sp. Prerequisite: Pharmaceutical Chemistry 152 or consent of instructor. Lab 3 hours. Peng

Detection and measurement of radionuclides commonly used in biology and medicine. PHARM CHEM

160. Fundamentals in Radioactivity. (2) § F, W. Lecture 2 hours. Perez-Mendez

This course will treat the principles of physical decay in radionuclides, characteristics of nuclear emissions, interaction with matter, and related aspects in radioactivity. PHARM CHEM

162. Radioisotope Imaging. (1) § Sp. Prerequisite: Pharmaceutical Chemistry 152 or consent of instructor. Lecture 1 hour. D. Price

This course will treat the theory and methodology in the application of radionuclides to organ imaging in nuclear medicine. PHARM CHEM

170. Group Studies Course. (1-4) § F, W, Sp. Prerequisite: Consent of instructor and advisor. Staff

Group studies of selected topics in pharmaceutical chemistry. PHARM CHEM

198. Supervised Study in Pharmaceutical Chemistry. (1-5) F, W, Sp. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

199. Laboratory Project in Pharmaceutical Chemistry. (1-5) F, W, Sp. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

200. Physical Chemical Properties and Biological Activity. (1) § W. Prerequisite: Consent of instructor. Lecture 1 hour. Kollman

Lectures and conferences dealing with the relationship between physical properties and biological activity, with special emphasis on the uses of molecular orbital calculations in this connection. PHARM CHEM

201. Advanced Survey of Medicinal Chemistry. (2) § F, Prerequisite: Consent of instructor. Lecture 2 hours. Jorgensen

Basic principles of medicinal chemistry and a survey of the relationships between structure and biological action for major drug classes. PHARM CHEM

202. Macromolecular Structure. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Kunz, Langridge

A review of protein and nucleic acid structures. Emphasizes the general principles which govern secondary and tertiary structure, with an introduction to the current approaches to this problem for proteins and transfer RNA. PHARM CHEM

203. Drug Metabolism. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Castagnoli, Sadee

Study of the in vivo and in vitro biotransformation of foreign compounds with particular emphasis on drugs. When possible, detailed chemical and biochemical mechanisms are considered. PHARM CHEM

204. Hormones. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. M. Wolff, Jorgensen

Lectures and conferences dealing with structure-function relationships and action of hormones at the molecular level. Special emphasis is given to steroids and peptide hormones. PHARM CHEM

205. Analogs of Nucleic Acid Constituents. (2) § W or Sp. Prerequisite: Organic chemistry and biochemistry recommended. Lecture 2 hours. R. B. Meyer

The chemistry and mechanism of action of purines, pyrimidines, their nucleosides and nucleotides, and related derivatives which have anticancer and antimicrobial activity are discussed in detail. PHARM CHEM

208. Advanced Survey of Pharmaceutics. (2) § F or W. Lecture 2 hours. Benet and Staff

Basic principles underlying the area of pharmaceutics directed at the needs of graduate students with limited familiarity with pharmaceutical sciences. PHARM CHEM

211. Selected Topics in Pharmaceutical Chemistry. (2) § Sp. Prerequisite: Pharmaceutical Chemistry 120. Staff

Reports and discussion of topics of current interest in pharmaceutical chemistry, with emphasis on relationships between chemical structure, physical properties, and biological response. PHARM CHEM

212. Fortran IV Programming. (3) § Sp. Lecture 2 hours, Lab 3 hours. Veng Pederson, C. Hunt

Introduction to Fortran IV. Special emphasis will be on understanding the language with particular emphasis on applications in pharmacokinetics. PHARM CHEM
213. Basic Considerations in the Kinetics of Drug Absorption and Disposition. (3) § F Pre-
requisite: Chemistry 115. Calculus background is recommended. Lecture 2 hours, Lab 3 hours.
Cec, C. Hunt
A basic study of the concentration-time course
of drugs and their metabolites, methods of phar-
makokinetic analysis, and the design of dosage
regimen. Laboratory emphasizes the application
of electronic calculators and analog computers.
PHARM CHEM

214. Advanced Aspects of the Kinetics of Drug Absorption and Disposition. (3) § W. Pre-
requisite: Pharmaceutical Chemistry 213 and
Biochemistry 202 or equivalents. Lecture 2
hours, Lab 3 hours. Riegelman, Benet and Staff
Advanced consideration of pharmacokinetics
including multicompartiment models, assessment
of intrinsic absorption and disposition parame-
ters, and correlation of pharmacological response
with the concentration-time course of a drug.
Laboratory will include analog and digital com-
putational methods. PHARM CHEM

217. Advanced Pharmaceutics. (3) § W. Pre-
requisite: Physical chemistry or consent of in-
structor. Lecture 3 hours. Offered in alternate
years. Offered 1980-81.
F. Pedersen, Shell, Cooper
Physical pharmacy of solids and solid forms.
PHARM CHEM

218A. Advanced Pharmaceutics. (3) § F. Pre-
requisite: Chemical kinetics or consent of in-
structor. Lecture 3 hours. Offered in alternate
years. Not offered 1980-81. C. Hunt, Hoener
A study of the stability of drugs in solution.
This course is offered biennially, alternating with
Pharmaceutical Chemistry 218B. PHARM CHEM

218B. Advanced Pharmaceutics. (2) § Sp. Pre-
requisite: Physical chemistry or consent of in-
structor. Lecture 2 hours. Offered in alternate
years. Offered 1980-81. Hoener, Goyan

A study of equilibria phenomena with empha-
sis on acid-base equilibria and the complexity of
drugs and biomacromolecules. This course is of-
fered biennially, alternating with Pharmaceutical
Chemistry 218A. PHARM CHEM

219. Enzyme Mechanisms. (1-2) § Sp. Lecture
1-2 hours. Kenyon, Santi
Selected topics on enzyme mechanisms. Gen-
eral survey of enzyme catalysis: general acid-base
catalysis, proprioiet effects, strain and con-
formational change. Covalent intermediates in
enzyme catalysis. The role of cofactors in enzyme
catalysis. Phosphate transfer reactions. PHARM
CHEM

220. Research Conference in Pharmaceutics.
(1) § F, W, Sp. Lecture 1 hour. Staff
A program involving the presentation of core
material in pharmaceutical chemistry in the
pharmaceutics pathway. The presentations are
made by graduate students and examination is by
a series of cumulative examinations. PHARM
CHEM

221. Research Conference in Pharmaceutical	
Chemistry. (1) § F, W, Sp. Prerequisite: Graduate
standing in the Department of Pharmaceutical
Chemistry. Lecture 1 hour. M. Wolff
A series of weekly research conferences in
medicinal chemistry given by visiting lecturers,
faculty, and advanced graduate students.
PHARM CHEM

222. Seminar in Physical Chemistry. (1) § F, W,
Sp. Prerequisite: Consent of instructor. Lecture 1
hour. Kuntz and Staff
Topics of current research interest in physical
and biophysical chemistry. PHARM CHEM

230. Spectroscopy. (4) § Sp. Prerequisite: Chem-
istry 162 or equivalent. Lecture 3 hours,
Lab 3 hours. Offered in alternate years. Offered
1980-81. Kuntz, Kollman
The theory and application of molecular elec-
tron and vibrational spectroscopy; optical
rotary dispersion and circular dichroism.
PHARM CHEM

230B. Spectroscopy. (3) § W or Sp. Prerequisite:
Chemistry 162 recommended. Lecture 3
hours. T. James
Theory and application of nuclear magnetic reson-
ance and electron-spin resonance; mass
spectrometry. PHARM CHEM

230C. Spectroscopy. (1) § W. Lab 3 hours.
T. James
Laboratory work in nuclear magnetic reson-
ance and electron-spin resonance; mass
spectrometry. PHARM CHEM

231. Spectroscopy. (1-4) § W. Prerequisite: Phar-
maceutical Chemistry 230B. Lecture 1-4
hours. T. James
Selected topics in spectroscopy and related
areas. Content of the course changes, as in the
case of seminars. Course may be repeated for
credit. PHARM CHEM

(2) § F. Prerequisite: Consent of instructor. Lecture
2 hours. Burlington
Elucidation of molecular structure, character-
izations of mixtures, and quantitative mea-
surements. Presentation of basic tools, concepts,
and strategies in the complementary usage of cur-
rently available techniques in present biochemi-
ical and biomedical research. PHARM CHEM

Prerequisite: Consent of instructor. Lab 3-6
hours. Peng
Theory and techniques related to the synthesis
of isotopically labeled organic compounds.
Course may be repeated for credit. PHARM
CHEM

241. Radiobiological Analysis. (1) § W. Pre-
requisite: Consent of instructor. Lab 3 hours.
Peng
Experimental techniques related to various as-
pects of radioassay of biological specimens,
biochemical compounds, and drugs isotopically labeled with tritium and/or radio-carbon. PHARM CHEM

242. Radiotracer Methodology. (1) § W. Prerequisite: Pharmaceutical Chemistry 152 or 160, or consent of instructor. Lecture 1 hour. Peng, Benet, Licko

Discussions on the theory and principles in the use of radionuclides as tracers in biological systems. Emphasis is on the design of experiments and data evaluation. PHARM CHEM

243. Chemical and Biological Effects of Ionizing Radiation. (1) § Sp. Prerequisite: Pharmaceutical Chemistry 152 or 160, or consent of instructor. Lecture 1 hour. Peng, J. W. Harris, Painter

Effects of ionizing radiation on chemical and biological systems will be discussed. PHARM CHEM

Application of interactive three-dimensional computer graphics to modeling complex biological systems, particularly large molecules and their interactions. Elements of hardware and a detailed discussion of software. Demonstration and self-scheduled projects using the computer graphics laboratory. PHARM CHEM

266. Conferences in Research Planning. (1) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Staff

Discussion and practice in research problem formulation and design selection. Core classes and small group sessions are organized around students' interests by faculty within the area of specialization. PHARM CHEM

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree. PHARM CHEM

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. PHARM CHEM

Pharmacognosy

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACY

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARMACY

Pharmacology

100A-B. Medical Pharmacology. (3-5) § W, Sp. Prerequisite: Biochemistry 100A-B and Physiology 120 and 125 or equivalents. Lecture 3 hours W, 5 hours Sp. Kattung (W), Trevor (Sp)

A systematic presentation of pharmacologic agents based on drug group classification. Major emphasis is on clinically significant aspects of therapeutic effects, toxic effects, and evaluation of drugs. PHARMACOL

121. Pharmacology and Toxicology. (1) § W. Prerequisite: Concurrent enrollment in Pharmaceutical Chemistry 121. Lecture 1 hour. Burkhalter

Systematic survey of action and uses of drugs with emphasis on steroids, hormones, and drugs for metabolic disorders. PHARMACOL

125. Pharmacology and Toxicology. (4) § Sp. Prerequisite: Biochemistry 120A-B and Physiology 120 and 125. Lecture 3 hours. Lab 3 hours. Hondeghem, Burkhalter

Systematic survey of action and uses of drugs acting on autonomic nervous and cardiovascular systems and the kidneys. PHARMACOL

126B-C. Dental Pharmacology. (2-4) § W, Sp. Prerequisite: Physiology 110. Lecture 2 hours W, 3 hours Sp. Lab 3 hours Sp. F. Meyers and Staff

Objective of the course is to acquaint dental and dental hygiene students with the fundamentals of pharmacology. Various classes of drugs are examined in regard to actions, absorption, fate, excretion, and toxicity. Agents useful in dentistry are emphasized. PHARMACOL

130. Toxicology. (2) § W. Prerequisite: Pharmacology 125 and 136. Lecture 2 hours. Hine, Hodge, F. Meyers, Piper, Vore

The occurrence, mode of action, recognition, and treatment of poisoning by environmental chemicals and therapeutic agents. PHARMACOL

134. Pharmacology and Toxicology. (1) § W. Prerequisite: Concurrent enrollment in Pharmaceutical Chemistry 134. Lecture 1 hour. Trevor, Apple

Systematic survey of action and uses of antiinfective and anti-neoplastic drugs. PHARMACOL

136. Pharmacology and Toxicology. (4) § F. Prerequisite: Pharmacology 125. Lecture 3 hours. Lab 3 hours. Burkhalter and Staff
Systematic survey of action and uses of drugs acting on the central nervous system. PHARMACOL

150.01. Pharmacology Research. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture and Lab to be arranged. **Staff** Students perform individual research in a field of their choice under the guidance and supervision of a member of the faculty. PHARMACOL

170. Group Studies Course. (1-4) F, W, Sp. Prerequisite: Consent of instructor. **Staff**

Group studies of selected topics in pharmacology. PHARMACOL

170.01. Experimental Techniques in Pharmacology. (1-5 SS. Prerequisite: Consent of instructor and completion of biochemistry, physiology, and pharmacology courses.

**Loh, Trevor**

Practical laboratory experience to acquaint the student with biochemical and physiological techniques used in the study of drug action in systems from the subcellular level to the intact animal. PHARMACOL

193. Special Topics in Pharmacology and Toxicology. (1-3) $ F, W, Sp. Prerequisite: Consent of instructor. Seminar 1-3 hours. **Staff**

A seminar course covering various aspects of pharmacology and toxicology. PHARMACOL

198. Supervised Study in Pharmacology. (1-5) $ F, W, Sp. **Staff**

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACOL

206A-B-C. General Pharmacology. (3-3-3) $ F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours.

**Trevor, Katzung, Loh**

Lecture-conference dealing with fundamental aspects of interactions between chemical compounds and the components of biological systems. Mechanisms of drug action at molecular, biochemical, membrane, tissue, and organ levels of the cardiovascular, muscular, and central nervous systems are considered. PHARMACOL

208. Biochemistry of Oxidative Drug Metabolism. (2) $ F Lecture 2 hours

**Ortiz de Montellano, Correia**

The biochemical, regulatory, and chemical aspects of mixed-function oxygenases with particular emphasis on cytochrome P-450. PHARMACOL

209. Molecular Mechanisms of Action of Biologically Active Substances. (3) $ F, W or Sp. Prerequisite: Consent of instructor. **Kun**

Advanced biochemical experiment and theories concerning the mechanism of action of biologically active substances on a macromolecular level. The content of the course, beyond certain theoretical material, varies with each participant and consists of guided experiments in novel subjects. PHARMACOL

210A-B-C. Introductory Toxicology. (1-1-1) $ F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour.

**Hine, Hodge, F. Meyers, Piper, Embree**

Introductory toxicology divided into the following three components: toxicity testing procedures; environmental toxicology; selected topics; and clinical toxicology; current developments. PHARMACOL

211A-B-C. Advanced Toxicology. (1-1-1) $ F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour.

**Hine, Hodge, F. Meyers, Piper, Embree**

A detailed examination of the field of toxicology as it relates to agricultural, environmental, forensic, industrial, military, regulatory and therapeutic problems. Emphasis is placed on mechanism of action of toxic substances. Current advances and classical concepts of toxicology are presented. PHARMACOL

220. Seminar. (0-1) $ F, W, Sp. **Staff**

Seminar to discuss present methods and problems in current teaching and research in pharmacology and toxicology. PHARMACOL

250. Research. (1-8) $ F, W, Sp. **Staff**

PHARMACOL

253. Drug Metabolic Laboratory. (2-5) $ F, W or Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 3-12 hours.

**Piper**

Laboratory experiments dealing with the pharmacokinetics of environmental chemicals, including measurement of plasma protein binding, rates of plasma absorption and clearance, tissue distribution, excretion, half-life, metabolic detection and factors modifying metabolism by the hepatic microsomal mixed function oxidase system. PHARMACOL

292. Physiological Techniques in Pharmacology. (3) $ F, W or Sp. Prerequisite: Survey course in pharmacology or consent of instructor. Lab 9 hours.

**Hondeghem, Katzung**

Principles and applications of physiological techniques used in the study of drugs. Emphasis is on the study of cardiovascular and autonomic agents. PHARMACOL

296. Laboratory Techniques in Toxicology. (2) $ Sp. Lab 6 hours. **Hodge and Staff**

Principles and application of experimental techniques in the evaluation of the toxicologic hazards of drugs and environmental chemicals. Techniques for testing acute and chronic toxicity, skin irritation and sensitization, mutagenesis and carcinogenesis will be covered. PHARMACOL

298. Thesis. (0) $ F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. **Staff**
For graduate students engaged in writing the thesis for the master’s degree. PHARMACOL
299. Dissertation. (0) § F, W. Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. PHARMACOL
300A-B-C. Practicum in Teaching. (1-3, 1-3, 1-3) F, W. Sp. Prerequisite: Advancement to candidacy for the Ph.D. degree. Staff
Opportunity is provided to participate in a formalized way in the teaching of pharmacology under the direction of the faculty. PHARMACOL

Pharmacy

111. Non-Prescription Products. (1) F. Conference 2 hours. Lem and Staff
Evaluation and comparison of non-prescription medications and appliances. Discussion on their patterns of use in the community is included. Emphasis is on verbal communications. PHARMACY

112. Non-Prescription Products. (1) W. Prerequisite: Pharmacy 111. Conference 2 hours. Lem and Staff
Continuation of Pharmacy 111. PHARMACY

113. Non-Prescription Products. (1) Sp. Prerequisite: Pharmacy 112. Conference 2 hours. Lem and Staff
Continuation of Pharmacy 112. PHARMACY

114. Biopharmaceutics and Physical Pharmacy. (3) F. Prerequisite: Concurrent enrollment in Chemistry 115. Lecture 3 hours. Hoener
A study of the physical, chemical, and biological factors which interact and dominate the design of dosage forms as drug delivery systems, including an introduction to the analysis of clinical data. PHARMACY

115. Biopharmaceutics and Physical Pharmacy. (4) W. Prerequisite: Pharmacy 114 and concurrent enrollment in Chemistry 116. Lecture 3 hours. Lab 3 hours. C. Hunt, Shell, R. Day
Continuation of Pharmacy 114 with the addition of laboratory preparation of basic drug delivery systems. PHARMACY

Continuation of Pharmacy 115. PHARMACY

127. Biopharmaceutics and Dispensing. (4) E. Prerequisite: Pharmacy 116 and Pharmacy Administration 112. Lecture 2 hours. Lab 6 hours. R. Day, C. Jackson, Hoener
Continuation of Pharmacy 116 with the addition of training in the professional and dispensing aspects of pharmacy. PHARMACY

128. Pharmacokinetics. (3½) W. Prerequisite: Pharmacy 116. Lecture 3 hours. Conference 1-2 hours. Øie, Tozer
Course covers the pharmacokinetic basis of variability in the therapeutic, pharmacologic, and toxicologic effects of drugs. PHARMACY

129. Pharmacokinetics. (3½) Sp. Prerequisite: Pharmacy 128. Lecture 3 hours. Conference 1-2 hours. Øie, Tozer
Continuation of Pharmacy 128. PHARMACY

133. Biologic Products. (3) Sp. Prerequisite: Third-year standing. Lecture 3 hours. K. H. Lee
A study of food and nutrition for all age groups. Diet therapy is discussed. PHARMACY

151. Community Health Education. (2) Sp. Lecture and Discussion 2 hours. Participation in at least four community health education programs. R. Gibson
Course is designed to train students for participation in community health education programs dealing with drug abuse education and other drug-health related areas, such as poison prevention, venereal disease, and birth control. Course may be repeated for credit. PHARMACY

155. External Drug Products. (4) Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 6 hours. T. Schwarz
Discussion and laboratory exercises on the formulation of products for external use, including drugs and cosmetics. The course deals with the properties and ingredients of such products. PHARMACY

161. Biologic Products. (2) W. Prerequisite: Third-year standing. Lecture 2 hours. K. H. Lee
A discussion of the pharmaceutical aspects and evaluations of the therapeutic values of biologic preparations in current clinical use, including enzymes, blood and its derivatives, plasma substitutes, hematologic preparations, and biologic products. PHARMACY

164. Veterinary Products. (3) Sp. Prerequisite: Microbiology 125, Pathology 135, Pharmacology 136 and Pharmacy 116. Lecture 3 hours. Spinelli
Course is designed to familiarize the student with common ailments of domestic animals and livestock, products used for the prevention and treatment of such diseases, the interrelationship of pharmacist, veterinarian and animal owner, and legal limitations on veterinary dispensing. PHARMACY

165. Pharmaceutical Technology. (3) F. Prerequisite: Pharmacy 116. Lecture 1 hour. Lab 6 hours. R. Gibson, Cooper, Blake
An introduction to the technology of liquid and semisolid pharmaceuticals. Special emphasis is given to the problems encountered and the materials used in pharmaceutical manufacturing. PHARMACY

166. Pharmaceutical Technology. (3) W. Prerequisite: Pharmacy 165. Lecture 1 hour. Lab 6 hours. R. Gibson, Cooper, Blake
An introduction to the technology of solid dosage forms, especially tablets and capsules. Emphasis is placed on problems encountered in
preparation of this type of medication. PHARMACY

167. Pharmaceutical Technology. (3) Sp. Prerequisite: Pharmacy 166. Lecture 1 hour. Lab 6 hours. 
   R. Gibson, Cooper, Blake
   An advanced study of the relationship of the art and science of pharmaceutical technology to solid dosage forms. PHARMACY

168. Seminar in Clinical Pharmacokinetics. (2) F, W, Sp. Prerequisite: Fourth-year standing or consent of instructor. Reports and Conferences 6 hours. Enrollment limited. 
   Tozer, Riegelman
   Discussion and review of the literature on the clinical application of pharmacokinetic principles in drug therapy. PHARMACY

   Staff
   Group studies of selected topics in pharmacy. PHARMACY

107.02. Special Topics in Pharmaceutics. (2) Sp. Prerequisite: Pharmacy 116 or concurrent enrollment. Lecture 2 hours. 
   Veng Pedersen
   An intermediate course offering an opportunity to explore, in greater depth, special drug delivery systems and some fundamental relationships involved in their design or action. PHARMACY

180. Drugs and Society. (3) W. Prerequisite: Basic course sequence in pharmacology and consent of instructor. Lecture 3 hours. Enrollment limited. 
   M. Silverman
   An analysis of the roles of the drug industry, pharmacy and medical professions, trade associations, governmental agencies, the Congress, consumer groups, and the press in the development, safety, efficacy, quality, advertising, prescribing, and pricing of selected drugs. PHARMACY

   Staff
   Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACY

   Staff
   A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARMACY

   T. Schwartz, C. Jackson
   Introduction to the formulation and technology of parenteral preparations. Laboratory includes participation in hospital activities in which parenterals are made and administered. PHARMACY

Pharmacy Administration

111. Pharmacy Laws. (2) F. Lecture 2 hours. 
   J. R. Nielsen
   Introduction to court systems and administration boards and their relationship to the health professions. Discussion of basic principles of criminal law, negligence, and business law with particular emphasis on the legal relationship and responsibility of the practitioner to the patient. PHARMACY

112. Pharmacy Laws. (2) W. Lecture 2 hours. 
   J. R. Nielsen
   A detailed examination of federal and state drug, cosmetic, and narcotic laws; their promulgation, enforcement, and effect upon the practice of pharmacy. Course involves some administrative work. PHARMACY

150. Marketing. (4) W. Lecture 4 hours. 
   Staff
   An analysis of the marketing functions that facilitate the flow of pharmaceutical products from production to consumption, and of the decision-making processes of marketing institutions. Emphasis is given to the environmental factors affecting marketing decisions. PHARMACY

154. Community Pharmacy Management. (4) 
   Sp. Prerequisite: Pharmacy Administration 150 and 155. Lecture 4 hours. 
   Staff
   Principles of management, specially directed toward considering familiar with current problems peculiar to community pharmacy operation. Emphasis is given to elements in locating, organizing, operating, and adapting a pharmacy. PHARMACY

155. Accounting. (3) F. Lecture 1 hour. Discussion 2 hours. 
   Staff
   Consideration of the fundamental concepts of accounting and its applied uses, with special emphasis on the accounting requirements of the community pharmacy. Problem cases and demonstrations are presented. PHARMACY

   J. R. Nielsen
   A survey of laws relating to landlord-tenant, dissolution, property division, support payments, probate and decedent's estates, with particular emphasis on how pharmacists may expect their practice to be affected by these laws, and some practical preventive legal techniques. PHARMACY

   Staff
   Group studies of selected topics in pharmacy administration. PHARMACY

180A-B-C. Legal Problems Related to Health Care. (2-2-2) F, W, Sp. Prerequisite: Third-year standing. Pharmacy Administration 180A is prerequisite to 180B, and 180B to 180C; but completion of entire sequence is not required. 
   J. R. Nielsen
   Conducted in cooperation with law students who are teamed with students from professional schools on this campus to investigate assigned problems of their respective disciplines, with par-
Physical Therapy

100A. Anatomy. (4) F. Prerequisite: Anatomy 102 or equivalent. Lecture 2 hours. Lab 6 hours.

Pagliarulo

Course is designed to present the foundation of the structure and function of the human body with emphasis in lecture and laboratory on topographical, skeletal, vascular, and neuromuscular aspects. Dissection of the upper limb, neck, and trunk is emphasized. PHYS THER

100B. Anatomy. (2) W. Prerequisite: Physical Therapy 100A. Lecture 1 hour. Lab 3 hours.

Pagliarulo

Course is designed to present the foundation of the structure and function of the human body, with emphasis in lecture and laboratory on topographical, skeletal, vascular, and neuromuscular aspects. Review plus dissection of the lower limb are stressed. PHYS THER

101A. Pathology. (3) F. Lecture 3 hours. Biava

A general summary of the fundamentals of pathology with special emphasis on the correlation between pathological processes and the clinical signs, symptoms, and course of diseases. Gross pathology is demonstrated and autopsy material is available. PHYS THER

102A. Physiology. (3) F. Prerequisite: General human physiology or equivalent. Lecture 3 hours.

Thrasher

A review of certain aspects of human physiology, with special emphasis on the cardiovascular system and metabolism. Specific aspects of pathological physiology are considered, especially in relation to stroke and heart disease. Applications of physical principles to physiology are discussed. PHYS THER

103A. Neuroanatomy. (2) F. Lecture 1 hour. Lab 3 hours.

Garoutte

The development of the human nervous system with special reference to structure and functional relationships. ANATOMY

104A. Physical Therapy Procedures I. (6) F. Prerequisite: Introductory physics. Lecture 3 hours. Lab 9 hours.

Puglisi

Lectures and laboratory practice in electrotherapy, kinesiology, and tests and measurements. Emphasized are therapeutic uses of electricity in certain pathologic conditions, analysis of musculoskeletal function in normal and abnormal states, methods of performing, recording and interpreting testing and measuring procedures. PHYS THER

104B. Physical Therapy Procedures II. (6) W. Prerequisite: Physical Therapy 104A. Lecture 3 hours. Lab 9 hours.

Puglisi

Lectures, demonstrations, and laboratory practice in hydrotherapy, massage, and therapeutic exercise. Emphasized are therapeutic uses of water and massage techniques applied to various pathologic problems and techniques of administration of exercises commonly used in orthopaedic, medical, and neurological conditions. PHYS THER

104C. Physical Therapy Procedures III. (6) Sp. Prerequisite: Physical Therapy 104A and 104B. Lecture 3 hours. Lab 9 hours.

Puglisi

Lectures and laboratory practice in therapeutic exercise. Emphasized are methods of evaluating the patient and planning his program, use and care of assistive devices in rehabilitation of the handicapped, use and evaluation of changing concepts, and special techniques of exercise. PHYS THER

105B. Physical Medicine and Rehabilitation. (3) W. Lecture 3 hours.

Ranallo

Lectures and clinical demonstrations concerning peripheral vascular problems, geriatric patients, various types of arthritis, muscular dystrophy, spinal cord injury, cerebrovascular accidents, the brain-damaged child, neck pain, and back pain. PHYS THER

106B. Clinical Medicine I. (5) W. Lecture 5 hours.

Schiller, J. Schneider

Lectures and clinical presentations of medical and neurologic patients are designed to increase the student's understanding of the basic interrelationship of structure and function of the various body systems. Conditions requiring physical therapy treatments are fully discussed. PHYS THER

106C. Clinical Medicine II. (5) Sp. Prerequisite: Abnormal psychology or equivalent. Lecture 5 hours.

Hoaglund

Lectures in orthopaedic surgery, pediatrics, psychiatry, surgery, obstetrics, gynecology, geriatrics, and dermatology are presented by physicians in these specialties. PHYS THER

107B. Neuromuscular Physiology. (2) W. Lecture 2 hours.

Garoutte

A study of the physiology of striated muscle and peripheral nerve in relationship to controlling mechanisms within the central nervous system. Special emphasis is given to the physiological disturbances which occur in various types of human motor disability. ANATOMY

108C. Basic Medical Procedures. (2) Sp. Lecture 1 hour. Lab 3 hours.

Pagliarulo

The study of procedures necessary for the total care of patients. PHYS THER

Gilbert

A study of professional attitudes and obligations and the organization and administration of a department of physical therapy. Laboratory
work includes observation in outpatient clinics and a clerkship in an approved hospital by special arrangement of the clinical supervisor. PHYS THER

170.02. Survey of Congenital Defects. (2) W. Prerequisite: Gross anatomy course and consent of instructor. Monie

This elective course is designed to provide physical therapists with information on the more common human congenital defects. Environmental and genetic factors that produce malformations are considered and possible mechanisms discussed. ANATOMY

410D. Clinical Clerkship. (14) Su. Prerequisite: Completion of all physical therapy courses in curriculum sequence. Gilbert and Staff

Clinical clerkships consisting of one-month assignments in three different institutions or agencies. Under supervision, students participate actively in clinical evaluation and care of patients. Clinical clerkship lectures are also included. PHYS THER

Physiology

100. Organ System Physiology. (6) § W. Prerequisite: Anatomy 100 and 102, and concurrent enrollment in Biochemistry 100A-B; or consent of instructor. Lecture 4 hours. Conference 2 hours. Lab 4 hours. Ramsay

Normal function of the cardiovascular, respiratory, renal, and gastrointestinal systems and the metabolic functions of the body as a whole are studied in lectures, conferences, laboratory exercises, demonstrations, and clinical illustrations. PHYSIOLOGY

101. Endocrinology. (4) § Sp. Prerequisite: Anatomy 100 and Biochemistry 100A-B, or consent of instructor. Lecture 3 hours. Lab 3 hours. M. Dallman

The structure and function of the endocrine glands and selected aspects of endocrine pharmacology and pathology are studied in lectures, demonstrations, and clinical conferences. PHYSIOLOGY

110. Integrative and Nutritive Systems. (6) § Sp. Prerequisite: College level biology, physics, and chemistry, or consent of instructor. Lecture 5 hours. Conference 3 hours. Rothman

Introduction to organ systems with emphasis on nervous, endocrine, circulatory, respiratory, and alimentary function in vertebrates. Importance of organ systems for the success of multicellular forms serves as focus. Fundamental cell processes are also discussed, emphasizing differentiated function. PHYSIOLOGY

120. Mammalian Physiology. (3) § W. Prerequisite: Physiology 125 required for students in School of Pharmacy; may be taken separately by graduate students with consent of instructor only. Lecture 3 hours. Reid

Study of the integrative systems of the mammalian organism, particularly the nervous and endocrine systems. PHYSIOLOGY

125. Mammalian Physiology. (7) § F. Prerequisite: Consent of instructor. Lecture 5 hours. Conference 2 hours. Lab 4 hours. Mines

Introduction to mechanisms by which mammals, especially man, function. The interaction of internal and external environments and their relationship to the functions of cells and muscular, circulatory, respiratory, gastrointestinal, and excretory systems. PHYSIOLOGY

150.01. Research in Physiology. (1½ per week) Su, F, W. Sp. Prerequisite: Consent of instructor. Lecture and Lab to be arranged. Staff

Individual research in endocrinology, respiratory physiology, neurophysiology, cardiovascular physiology, cell physiology, or other areas offered by individual staff members. PHYSIOLOGY

198. Supervised Study in Physiology. (1-5) § F, W. Sp. Prerequisite: Consent of instructor. Ganong and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHYSIOLOGY

199. Laboratory Project in Physiology. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Ganong and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHYSIOLOGY

200. Tutorial in Physiology. (0) § F, W, Sp. Prerequisite: Consent of instructor. Ganong and Staff

Directed reading organized in seminar or tutorial fashion to review aspects of physiology under supervision of a member of the faculty. PHYSIOLOGY

201. Physiology of Vision. (2) § Sp. Prerequisite: Anatomy 103 or Physiology 110 or equivalent, or consent of instructor. Lecture 2 hours. Course will not be offered for fewer than four students. K. Brown

Study of the mechanisms underlying vision. Consideration is given to chemistry and anatomy of the visual system, but the emphasis is on neurophysiology, with coverage of the visual system from the photoreceptors to the visual cortex. PHYSIOLOGY

204. Seminar: Topics in Physiology. (1) § W. Prerequisite: A minimum of six units of introductory physiology. Seminar 1 hour. Rothman

This seminar discusses selected topics in cellular and integrative physiology. Readings are drawn from primary and secondary sources. PHYSIOLOGY

206. Advanced Kidney and Electrolyte Physiology. (2-3) § Sp. Prerequisite: Physiology 100 or 125 and consent of instructor. Lecture 2-3 hours. Offered in alternate years. Not offered 1980-81. C. Berry

Current theories regarding renal hemodynamics and regulation of whole body acid-
base, electrolyte and fluid balance will be discussed. Emphasis will be placed on the transport mechanisms operating across renal tubular membranes. PHYSIOLOGY

207. Neuroendocrinology. (1-3) § Sp. Prerequisite: Endocrinology and neural sciences or consent of instructor. Lecture 1-3 hours. Course may be repeated for credit. Course will not be offered for fewer than four students. M. Dallman

Mechanisms for regulation of endocrine function by the central nervous system and the influence of hormones on the nervous system are considered in view of anatomical, biochemical, physiological and behavioral data in the literature. PHYSIOLOGY

209. Physiology of the Auditory, Vestibular, and Other Sensory Systems. (2) § Sp. Prerequisite: Anatomy 103 or equivalent. Lecture 2 hours.

Merzenich

Lectures and demonstrations provide basic information on the physiology of the auditory system, vestibular system, chemical senses, and somatosensory system. Material includes historical and current concepts derived from relevant psychophysics, neuroanatomy, and neurophysiology. PHYSIOLOGY

210. Cellular Mechanisms of Hormone Secretion. (2) § Sp. Prerequisite: Physiology 101 or consent of instructor. Lecture 2 hours. Offered in alternate years. Offered 1980-81. J. A. Williams

Discussion of current literature pertaining to the mechanism of hormone synthesis, packaging, and release. PHYSIOLOGY

221. Advanced Cardiovascular, Renal, and Pulmonary Physiology. (2) § F, W, Sp. Prerequisite: Physiology 100 or equivalent. Lecture 2 hours.

Coleridge, Nadel

Course includes critical reviews of topics of current importance, presentation of unsolved problems by staff, and critical evaluation of published articles by the group. The total program is presented over six successive quarters.

PHYSIOLOGY

222. Endocrinology Seminar. (1) § F, W, Sp. Seminar 1 hour. Course may be repeated for credit. Ganong

Guest lectures alternating with reports of research in progress by members of the graduate group in endocrinology. A different topic of endocrinological interest is the subject of guest presentations each quarter. PHYSIOLOGY

223. Seminar. (1) § F, W. Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Course may be repeated for credit. Ganong

Seminar presentations by guest lecturers, alternating with discussion by Physiology staff members of their current research. Each quarter, a different topic of physiological interest is the subject of guest presentations. PHYSIOLOGY

250. Research. (1-8) § F, W, Sp. Prerequisite: Consent of instructor. Lab variable. Ganong and Staff

PHYSIOLOGY

298. Thesis. (0) § Su, F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate advisor. Ganong and Staff

For graduate students engaged in writing the thesis for the master's degree. PHYSIOLOGY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate advisor. Ganong and Staff

For graduate students engaged in writing the dissertation for the Ph.D. Degree. PHYSIOLOGY

300. Practicum in Teaching Physiology. (0) § F, W, Sp. Prerequisite: Previous training in physiology and consent of instructor. Lecture and Lab variable. Ganong and Staff

Practice in teaching physiology under faculty supervision. Students supervise laboratory work, conduct conferences, deliver lectures, and assist in preparing and grading examinations. Responsibilities are assigned according to the individual's stage of development. PHYSIOLOGY

301. Scientific Writing. (0) § F, Sp. Prerequisite: Consent of instructor. Seminar 3 hours.

Coleridge

A seminar workshop designed to show the predoctoral or postdoctoral fellow how to best put into words, tables and figures work done in the laboratory, and how to do so in a concise, precise, and logical form. PHYSIOLOGY

302. Group Practice in the Art of Lecturing. (0) § F, W. Prerequisite: Consent of instructor. Lecture 1½ hours. Enrollment limited. Staub, Conroe

A course in teaching techniques. Students present short lectures, and video-tapes of these presentations are analyzed by self- and group-criticism. PHYSIOLOGY

Preventive Dentistry and Community Health

S. Gold

Participatory seminars utilizing role playing, open discussions, and exercises to study interpersonal relationships in dentistry. Topics covered include active listening, effective ways of communicating, and creative conflict-solving. GEN DENT

Ino, Sinclair

Students work in the Guadalupe Health Center, providing dental care in a community setting of comprehensive health care. GEN DENT

Sinclair

Students work at the South of Market Health Center, a satellite to SFCH, providing dental care in a community setting of comprehensive health care. GEN DENT
Psychiatry
100A. Psychological Basis of Medicine. (2) F. Lecture 1 hour. Horowitz
Introduction to the basic psychological principles underlying response to the stress of illness and its treatment with emphasis on mental mechanisms, development, death and dying, and various types of doctor-patient relationships.

PSYCHIATRY

100B. Social, Cultural and Biological Bases of Illness Behavior. (2) W. Seminar 2 hours. Brodsky, Ornstein
Presentation of the social and cultural factors that affect patients' health and illness behavior when well, when they fear illness, when ill, during rehabilitation, and after recovery. Acculturates students with seven of the major themes in the study of brain-behavior relationships.

PSYCHIATRY

110. Core Clerkship in Psychiatry. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Psychiatry 100A-B and 131A-B.

Staff
Four-week assignment to a psychiatric service. Students, under supervision, are responsible for patient evaluation and participation in treatment planning. They attend seminars related to clinical work, and make field visits to other types of psychiatric facilities.

PSYCHIATRY

Introduction to psychiatry as a clinical discipline. Basic behavioral science data is presented. Focus is on interviewing techniques, normal psychological development, diagnosis and treatment of psychopathological syndromes, and the discussion of the interface between psychiatry and medicine. Videotaped lectures, patient interviews, small group seminars.

PSYCHIATRY

135. Psychiatric Aspects of Medical Practice. (0) Su, F, W, Sp. Prerequisite: Satisfactory completion of the first and second years in the School of Medicine as specified in the prerequisites for the 110 clerkships listed below. Clinical seminar 2 hours.

D. Rosen
The Psychiatric Aspects of Medical Practice is a weekly two-hour clinical seminar, and a required part of the following clerkships: Ambulatory and Community Medicine 110, Medicine 110, Obstetrics, Gynecology and Reproductive Sciences 110, Pediatrics 110 and Surgery 110.

PSYCHIATRY

140.01. Advanced Clinical Clerkship in Psychiatry. (1½ per week) Su, F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry.

Boatman
Participation, with supervision of attending and resident staff of the Department of Psychiatry, in psychiatric assessment, treatment and/or consultation with adult or child inpatients or outpatients. Seminars, assigned reading and case presentations may be required.

PSYCHIATRY

140.02. Clinical Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.

Boatman
Clinical clerkship in off-campus hospitals, approved by the chairman of the department and the Dean.

PSYCHIATRY

140.04. Psychiatric Clerkship at VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry.

G. Solomon
Course provides clinical clerkships in psychiatry within the Fresno community mental health and Veterans Administration Hospital, and includes inpatient, crisis, and rural services with individualized supervision. A limited number of housing accommodations or stipends are available.

PSYCHIATRY

140.05. Clinical Psychiatry. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.

Boatman
Participation, under close supervision in accordance with students' level of experience and special interests, in clinical psychiatric treatment of adult or child inpatients or outpatients.

PSYCHIATRY

150.01. Psychiatric Research. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.

Callaway
Participation according to students' level of experience in experimental work in areas such as neurophysiology, operant conditioning, psychophysiology, immunochemistry, and nonlexical communication. All work is under the close supervision of members of the faculty.

PSYCHIATRY

150.02. Block Elective in Human Development. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.

Fiske and Staff
Guided reading and research in human development. Work may focus on culture and personality studies; social psychology of human development; socialization including the role of values; adaptive processes across the adult life course. Refer to Human Development and Aging courses.

PSYCHIATRY

150.03. Block Elective in Human Sexuality. (1½ per week) Su, F, W, Sp. Prerequisite: Psychiatry 180 and consent of Department of Psychiatry.

Gendel
An introduction to sexual functioning, sexual dysfunctions and their treatment, the spectrum of human sexual experience, and students' own sexual values. A paper or project will be required.
160.01. Psychopathology of Speech and Language. (2) 5, W, Sp. Prerequisite: Consent of Department of Psychiatry. Lecture 1 hour. Lab 3 hours.

A clinical course focusing on speech and language pathology. Students' eligibility depends on previous experience with psychiatric patients and interest in specific problems of communication. Patients with characteristic syndromes will be interviewed and suitable treatment procedures performed under supervision. PSYCHIATRY

160.05. Demonstration of Psychotherapy with Outpatients. (2) W, Sp. Prerequisite: Psychiatry 131A-B or consent of instructor. Lecture 2 hours.

Berblinger

Students observe psychotherapeutic sessions with outpatients who are under intensive treatment. The observation session is followed by a seminar discussion. The purpose of the course is audiovisual participation in and viewing of models of intensive psychiatric treatment.

160.07. Psychotherapy for Outpatients. (2-7) Su, 5, W, Sp. Prerequisite: Consent of Department of Psychiatry. Lecture 2 hours. Lab 0-15 hours.

Amini

Practical experience in psychotherapeutic work with outpatients to increase students' understanding of psychopathology, psychodynamics, and psychotherapeutics. Students are assigned patients under supervision of a member of the faculty. Assigned reading, seminars, and chart writing. PSYCHIATRY

160.08. Psychosomatic Case Conference. (1½) 5, W, Sp. Prerequisite: Consent of instructor. Lecture 1½ hours.

Murphey

Cases are presented in rotation by social work students. Emphasis is placed on the interrelationship between psychological, social, and somatic factors. Although primarily intended for social work students, course may be taken by psychiatric residents and other mental health professionals. PSYCHIATRY

160.11. Psychotherapeutic Interview Techniques. (4-5) 5, W, Sp. Prerequisite: Consent of Department of Psychiatry. Lecture 4-5 hours.

Ostwald

Individual and group supervision of clinical work with patients. The focus is on developing rapport, obtaining relevant information, and establishing a satisfactory therapist-patient relationship. Supplementary reading may be assigned. PSYCHIATRY

160.13. Hysteria. (2) 5, W. Prerequisite: Consent of instructor. Lecture 2 hours. Berblinger

Seminar course designed for students who intend to enter primary care and nonsychiatric specialties. Emphasis is on the diagnosis and management of the hysterical personality in medical practice. Clinical case material will serve as a basis for assigned reading. PSYCHIATRY

160.14. Health Aspects of Human Sexuality. (2) § 5. Prerequisite: Consent of Department of Psychiatry. Lecture 16 hours plus seminar 4 hours total given during the quarter. Gendel

A consideration of human sexuality as an integral part of health. Emphasis is on accurate information regarding the range of human sexual behavior, and the typical sexual concerns of patients. PSYCHIATRY

160.15. Sex Therapy: Principles and Practice. (2) § 5. Prerequisite: Psychiatry 160.14 or 180. Consent of instructor. Lecture 20 hours. Course is given over a weekend. Gendel and Staff

A didactic experimental overview of the etiology and nosology of functional sexual problems and of the principles underlying treatment. Lectures, clinical demonstrations, and group process are included. PSYCHIATRY

160.17. Sexuality and Disability. (1) Sp. Prerequisite: Psychiatry 180 and consent of Department of Psychiatry. Lecture 12 hours. Course is given over a weekend. Gendel and Staff

Course covers the role of sexuality in rehabilitation of the physically and mentally handicapped, and principles of sexual counseling of the handicapped. Lectures, films, seminar, and community resource people will be involved. PSYCHIATRY

170.01 Introduction to the Study of Suicide. (2) 5. Prerequisite: Consent of Department of Psychiatry. Lecture 2 hours. Motto

Suicide is surveyed from a multidisciplinary approach in seminars led by persons working in the field. PSYCHIATRY

170.03. Behavioral Specialist Pathway Elective. (2-6) 5, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry. Lecture 2-6 hours.

Boatman

Students in the Behavioral Specialist Pathway elect individual or group study of a topic not included in other formal courses. Supervised reading, research, fieldwork, and clinical assignments are given in accordance with the students' level of interest and experience. PSYCHIATRY

170.06. Research in Human Sexuality. (2) Su, 5, W, Sp. Prerequisite: Psychiatry 160.14 or 180, and consent of Department of Psychiatry. Lecture 1 hour. Lab 3 hours. D. H. Wallace

Collaboration or directed research in various topics related to human sexuality. PSYCHIATRY

170.07. Mental Health Aspects of Social, Physical, and Sensory Deprivation. (2) § 5. Prerequisite: Consent of Department of Psychiatry. Lecture 2 hours.

H. Schlesinger

Compares and contrasts influences of cultural, physical, social, and sensory deprivation on cognitive and emotional development. Emphasis on social stigma and family response to handicapped child, nature of problems and treatment of handicapped groups, development and utilization of community resources. PSYCHIATRY

170.15. Psychological Aspects of Psychosis. (1½) Sp. Prerequisite: Consent of Department of Psychiatry. Lecture 1½ hours.

I. Feinberg, G. Fein

Exploration of the current status of research in schizophrenia, chronic brain syndrome in the elderly, and acute brain syndromes. PSYCHIATRY

Motto
Continuation of the study of mortality and morbidity resulting from self-destructive behavior. Subjects to be covered and the method of study are determined by the interests of the students. PSYCHIATRY

180. Human Sexuality and Medical Practice. (2) W. Seminar 2 hours. Gendel

Social, behavioral, and clinical aspects of human sexuality are covered in a series of lectures and seminar periods. Lectures present didactic material and seminars focus on clinical and ethical problems related to sex and medical practice. PSYCHIATRY

182. Transcultural Psychiatry. (1) § F, Sp. Prerequisite: Psychiatry 100A-B or equivalent psychiatry experience, and consent of Department of Psychiatry. Consent of instructor for graduate students. Seminar 1½ hours. Hartog

A series of seminars exploring the field of transcultural psychiatry, ranging from entering the alien community and epidemiology to folk healing. The relevance to American urban and ethnic issues is discussed. Examples, problems, methodology, and possibilities of research are also presented. PSYCHIATRY

185. Women's Sexual Health Education Seminar. (1) § Sa. Seminar 12 hours, given over two 6 hour sessions given over 2 days. Gendel

Female sexuality is studied as an entity of its own, rather than merely a response to male sexuality. Emphasis is on increasing personal knowledge through the study of physiological, psychological, social and cultural influences on sexuality, both historical and current. PSYCHIATRY

198. Supervised Study in Psychiatry. (1-5) F, W, Sp. Prerequisite: Consent of Department of Psychiatry. L. J. Epstein and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PSYCHIATRY

199. Laboratory Project in Psychiatry. (1-5) F, W, Sp. Prerequisite: Consent of Department of Psychiatry. L. J. Epstein and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PSYCHIATRY

200A-B-C-D-E-F-G-H-I. Mental Health Practicum—Outpatient Services. (3-8 per section) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 6-15 hours. Wamerman

Supervised practical in diagnosis and treatment of psychiatric outpatients. Students are responsible for diagnostic evaluations, treatment planning, psychiatric consultations, and ongoing psychotherapy. Course includes instruction concerning appropriate use of psychopharmacologic agents, outpatient team meetings, rounds, case conferences and seminars. PSYCHIATRY

201A-B-C-D-E-F-G-H-I. Mental Health Practicum—Children's Service. (1-5 per section) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 3-9 hours. Spielman

Supervised practice in privacy of psychiatric services for children. Course includes diagnostic evaluations, treatment planning, ongoing psychotherapy of children and their families, consultative work with school personnel, pediatricians, case conferences and seminars relating to child psychiatry services. PSYCHIATRY

202A-B-C. Mental Health Practicum—Inpatient Services. (5-5) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hour. Lab 11 hours. S. R. Schwartz

Under supervision, students assume responsibility for care of psychiatric inpatients. Course includes individual psychotherapy, group, family and milieu therapy, instruction in the use of psychoactive medications, administrative issues in patient management, working with other ward staff and related seminars. PSYCHIATRY

203A-B-C. Mental Health Practicum—Psychiatric Emergency Services. (3-3) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 4½ hours. Zlatchin

Supervised practicum in psychiatric emergency services. Course includes crisis evaluation, triage, disposition and treatment planning, crisis intervention, brief psychotherapy, instruction in the use of psychoactive medications, case conferences and seminars on related topics. PSYCHIATRY

204A-B-C. Mental and Psychological Issues in Patient Care. (3-3) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 4½ hours. H. T. Stein

Exploration of psychiatric and psychological issues in medical care and biomedical issues in psychiatric care. Course includes varied, supervised experiences such as rounds in the general hospital, preceptorships, consultation to medical units, and lectures and seminars on related topics. PSYCHIATRY

211. Theoretical Bases of Psychotherapeutic Inquiry. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-5 hours. L. J. Epstein, Weinsel
Directed reading and small group seminars regarding models of understanding and psychotherapeutic intervention in emotional disturbance.  

**PSYCHIATRY**

Ahern  

Theoretical background for trainees in psychosocial diagnosis, individual and group therapy, family therapy, brief therapy and crisis intervention, cross-cultural therapy; work with systems and other disciplines. Emphasis on clinical social work with geriatric patients, the physically ill, and others.  

PSYCHIATRY

249. Special Studies in Mental Health. (1-5) $ $ E, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 0-2 hours. Lab 3-9 hours.  

Wanerman and Staff  

Students, with faculty approval, select particular areas of the mental health field for advanced or intensive study. Areas chosen may be primarily clinical or nonclinical, but in most instances will combine clinical and nonclinical issues.  

PSYCHIATRY

R. S. Wallerstein  

Members of the Department of Psychiatry make clinically centered presentations reflecting all areas of the department's work. Each topic involves a two-session sequence, with the second week consisting of formal discussion of the previously presented work from various viewpoints.  

PSYCHIATRY

402. Introduction to Psychotherapy of the Severely Disturbed. (1) Su. Prerequisite: Assignment to Inpatient Treatment and Research Services, psychiatric resident, or consent of instructor. Seminar 1 hour.  

Scotton  

Seminar is designed to provide a theoretical framework and develop technical skills for psychotherapy of severely disturbed patients with attention to support, management, uncovering, and coordination with the broad-based treatment approach of the ITRRS. Includes lectures, discussion, and supervised interviews.  

PSYCHIATRY

Ostwald  

Individual consultation with psychiatric residents and other advanced trainees concerning treatment and management problems. Diagnostic questions, indications for somatic and psychological interventions, the course of therapy, and research issues are emphasized.  

PSYCHIATRY

404. Theories of Personality. (1) $ E, W.  

J. Fisher, E. Burke  

Focus is on personality theories other than Freudian, such as Piaget, Skinner, and Rogers. Course includes an examination, study, and discussion of contemporary personality theories, their concepts, systematic application to the behavioral sciences, and research potentials. Parallel reading is required.  

PSYCHIATRY

J. Fisher, E. Burke, Steinheber  

Seminar presents techniques of assessing personality and intellectual functions in relation to psychodiagnostic evaluations and study of prognosis with psychotherapy. Discussion of development, design, and theory of clinical psychological methods and clinical applications and demonstrations with appropriate case material.  

PSYCHIATRY

Ostwald  

Individual and group instruction is given for psychiatric residents working with medical students in Psychiatry 110. Technical and theoretical issues in supervision and learning are analyzed, together with selected reading assignments.  

PSYCHIATRY

Callaway  

Course consists of supervised clinical and basic research in behavioral abnormalities, psychopathology, and experimental psychiatry. Specific subjects for research are chosen in conjunction with members of the staff.  

PSYCHIATRY

408. Theory of Psychotherapy. (1½) $ Sp. Prerequisite: Resident in Department of Psychiatry or consent of instructor. Seminar 1½ hours.  

Horowitz  

Course provides a framework for residents which will enable them to take a systematic and rational approach in evaluation of various psychotherapies, including a method for assessing the conceptual consistency and validity of a given approach.  

PSYCHIATRY

Malamud  

Discussion of the neuropathology of neurological and psychiatric disorders with illustrations from gross and microscopic material.  

PSYCHIATRY

412. Jungian Psychoanalytic Theory. (1) $ E, W.  

Sp. Lecture 1 hour.  

Brookes, F. Irvine  

Ongoing review of major principles of Jung's analytical psychology with special reference to their application to practice of psychotherapy. Designed to elaborate dynamics of psychotherapeutic process by utilizing psychotherapists from widely differing theoretical backgrounds in simultaneous dialogue around clinical material.  

PSYCHIATRY

413. Introduction to the Computer. (2-3) $ E, W, Sp. Lecture 1 hour. Lab 3-6 hours.  

Starkweather  

Seminar presents a review of digital computing and its applications in psychiatry. Residents explore these concepts through their own programming efforts.  

PSYCHIATRY
414. Issues of Diagnosis and Treatment Planning. (1½) F, W. Lecture 1½ hours.

R. S. Wallerstein

Individual cases are presented by students for assessment. Goals are discussed and the rationale for the particular psychotherapeutic approach is considered. Course is required for first-year residents in psychiatry and students in the Doctor of Mental Health Program. PSYCHIATRY

Starkweather

Supervised research with computer methods for the simulation of behavior in clinical interactions. Applications of computers to the analysis of human communication. PSYCHIATRY

419. Child Development and Personality. (½) Su. Prerequisite: Consent of Instructor.

Friedlander, D. Morrison

Seminar is focused on the most common and prevalently used methods of assessing intelligence, perceptual-motor integration, and personality in children. Actual testing materials as well as supporting research are covered. Participation is required. PSYCHIATRY

S. Hall, Havassy

Survey of research on issues concerning treatment of substance abusers and theories of etiology and treatment. Substances covered are heroin, alcohol, barbiturates, amphetamines, caffeine and nicotine. Obesity will also be included. PSYCHIATRY

421. Cultural Sources of Western Concepts of Man. (1) F, W, Sp. Prerequisite: Third-year resident standing, or one year of clinical experience, or consent of instructor. Seminar 1 hour.

E. Burke

Examination of religious, philosophical, and scientific views of man. Course objective is to broaden students' familiarity with the background of contemporary conceptualizations of human personality. Course is required for third-year residents. PSYCHIATRY

424. Research on Human Response to Stress. (4) Su, F, W, Sp. Prerequisite: Graduate or advanced resident standing. One year of advanced psychological or psychiatric work. M. Horowitz

Guided research using experimental, field, and clinical modes of investigation into the typical and idiosyncratic human responses to external stresses. The focus is on conscious and unconscious ideational, emotional, and defensive processes. PSYCHIATRY

427. Advanced Psychotherapy. (2-4) Su, F, W, Sp. Prerequisite: One year of full-time experience in the conduct of outpatient psychotherapy or equivalent. Lecture 2 hours. Lab 4-10 hours.

M. Horowitz

Course covers psychotherapy of selected cases with recordings of the process, supervision during treatment, and group seminars in which the therapy is reviewed in retrospect using microscopic and macroscopic levels of abstraction. PSYCHIATRY

428A-B-C. Practicum in Sex Counseling. (7-7) F, W, Sp. Prerequisite: Psychiatry 180 or Psychiatry 160.14 and 160.15, or consent of instructor. Lecture 2 hours. Clinical 15 hours. Course must be taken in order and consecutively.

Gendel and Staff

A nine-month (two days per week) minimum rotation in the Sex Counseling Unit involving didactic presentations, case conferences, and supervised counseling experience with couples and individuals presenting sexual dysfunctions. PSYCHIATRY

Members of the faculty and visiting professionals present clinical discussions and new developments related to the field of child and adolescent psychiatry. PSYCHIATRY

Attkisson

A seminar course designed to provide a basic overview of the organizational context of program evaluation; design and implementation of information systems; assessment of community needs; evaluation of program quality and effectiveness, and training of evaluators. PSYCHIATRY

432. Clinical Biofeedback. (2) Sp. Seminar 2 hours. Equivalent to Psychology 181L.03. Pelletier

Integration of biofeedback with psychotherapy and medical practice; methods of intervention and prevention will be presented in a therapeutic model emphasizing psychological factors in stress disorders. Biofeedback instruments are demonstrated and applied. Course is intended for clinical practitioners. PSYCHIATRY

Callaway

An ongoing seminar devoted primarily to the research interests of the group studying human event related potentials. Course includes visiting scientists, as well as presentations by staff and postdoctoral fellows. PSYCHIATRY

434. Cerebral Hemispheric Specialization and Integration. (2) Sp. Prerequisite: Background in neurophysiology, anatomy, cognitive psychology; intended for advanced students. Consent of instructor. Seminar 2 hours. Equivalent to Psychology 181L.02.

Galin

Group discussions of readings in seminar format of neuropsychology of hemispheric specialization for cognitive function, and integration of the two hemispheres; developmental, psychiatric and educational implications; evaluation of data from study of brain lesions, elec-
435. The Individual and Society: Psychoanalysis and Social Science. (2) W. Prerequisite: Background in psychoanalytic and sociological theories. Consent of instructor. Seminar 2 hours. Equivalent to Psychology 247. R. S. Wallerstein, Smelser

Exploration of the more successful articulations between the psychoanalytic and sociocultural paradigms, making use of classical theoretical statements, studies of social traumas and catastrophes, political biography, organizational and institutional behavior, and cultural productions. PSYCHIATRY

438A-B-C-D. Intermediate Family Therapy. (1½-3-3-3) SS 2, F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Four-quarter course. Equivalent to Psychology 285A-B-C-D. Hatcher

Stages in family development, communications analysis, role definitions, family myths, power and resistance systems, growth models of family therapy, and intervention techniques. Emphasis on clinical and practical issues, video presentations of families in treatment, clinical supervision of ongoing cases. PSYCHIATRY

440. Impact of Legislation and Health Insurance on Practice. (2) Lecture 2 hours. Equivalent to Psychology 290. Dorken

Review of the nature and types of health insurance as economic forces in practice; discussion of health care delivery models, manpower resources, peer review systems, utilization data; national health insurance and the legislative process will emphasize recent state and federal laws. PSYCHIATRY

Overview of the major concepts and approaches in health education, focusing on chronic diseases and primary and secondary prevention of health risks and problems; societal factors and individual determinants; specific techniques for helping people modify life styles. PSYCHIATRY

A seminar course focusing on a current topic in biological psychology such as neuroethology, lateralization of brain function, psychophysiology of stress, or physiology of attention. Individual presentations and discussion are required. PSYCHIATRY

Models for dealing with psychosocial issues involved in caring for the dying patient. Emphasis on the sequence of events encountered by the health professional and patient from diagnosis through death. Course is intended for medical, nursing, and mental health students. PSYCHIATRY

Course emphasizes the effects of mental illness on the lives of artists, scientists, statesmen, and other public figures. Biographical, autobiographical, and clinical studies of exceptional people will be compared. Students will be encouraged to select individual subjects for research. PSYCHIATRY

Post-residency seminar examines psychodynamics and related psychotherapy processes. PSYCHIATRY

The second of a two-year seminar covering the development of psychoanalytic theory. Emphasis is placed on normal development, developmental pathology, and adult psychopathology. Pertinent issues of treatment approach to particular psychopathologies are also discussed. PSYCHIATRY

447. Psychotherapy Case Conference. (1) F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Amini

Seminar covers in-depth issues related to the initial basis of psychotherapy. Emphasis is on assessment, formulation, and initial treatment planning. Case presentations and discussion will be extensively utilized. PSYCHIATRY

448. Comparative Psychotherapy. (1) F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Zegans

Seminar covers both theoretical and clinical perspectives, and will compare and contrast the different psychotherapeutic approaches and theories behind them. PSYCHIATRY

Residents are responsible for the study and treatment of psychiatric patients and consultation of non-psychiatric patients under the supervision of senior staff members of the faculty. Parallel reading is required. PSYCHIATRY

Program planning and consultation concerning administrative, teaching and research roles of chief residents. PSYCHIATRY

I. Philips

Residents in child psychiatry are responsible for the diagnosis and treatment of children with psychiatric problems and for therapeutic work with their parents under the supervision of the senior staff. PSYCHIATRY

I. Philips

In addition to clinical work, the residents in child psychiatry are required to supervise the work of others and to preside over treatment reviews and interagency conferences.

PSYCHIATRY

Lectures in the theory and practice of mental health consultation, program evaluation and administration, and preventive services. Supervision of related field experiences by senior faculty in seminar setting. Interdisciplinary interaction emphasized. Review of relevant literature.

PSYCHIATRY

457. Working Clinically with Dreams from the Jungian Perspective. (1) Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Richman

Seminar presenting the theoretical aspects of dreams and clinical application within the Jungian framework. PSYCHIATRY

458. Forensic Psychiatry. (1½) W. Prerequisite: Consent of instructor. Seminar 1½ hours. B. Diamond, I. J. Epstein, Terr

An elective seminar discussing the major aspects of forensic psychiatry relevant to the practice of the clinician. Topics covered include competency, commitment, and criminal responsibility. PSYCHIATRY

An elective continuous case conference focusing on transference and counter-transference from a Jungian perspective. Major theoretical concepts will be discussed in context of the cases being presented. PSYCHIATRY

460. Treatment of the Borderline Character. (1½) F, W, Sp. Prerequisite: Open to third-year residents only with consent of instructor. Seminar 1½ hours. Course given at San Francisco Psychoanalytic Institute Library. Oremland

Seminar reviewing the literature pertinent to psychotherapy of the severely disturbed, predominantly borderline patient. A case will be presented and discussed. PSYCHIATRY

Discussion of issues in clinical research, focusing on questions in clinical research design in the study of psychotherapy. Course will also cover psychotherapy with various character types. PSYCHIATRY

Demonstration of group therapy to be viewed on videotape. Material viewed will serve as a focus for the discussion of theory and technique in group therapy. PSYCHIATRY

Seminar covers the theory and implementation of the technique of psychotherapy with children. Emphasis is placed on play therapy. The seminar will also cover psychopathology as manifested in children, including descriptions and possible ideologies. PSYCHIATRY

Seminar covering family, group, and behavior therapy. Both theoretical and technical issues will be presented with case illustrations where appropriate. PSYCHIATRY

Seminar offers instruction in the theoretical bases of psychoanalysis. PSYCHIATRY

Seminar offers instruction in the technique of psychoanalytic psychotherapy and its theoretical basis. PSYCHIATRY

The theory of an individual outpatient psychotherapy is presented. The case in treatment is followed on a weekly basis. PSYCHIATRY

468. Interdisciplinary Seminar in Human Development. (3) F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Three-quarter course. Fiske and Staff

Theory and research covering adolescence to old age from sociological, psychological, psychoanalytical, and anthropological perspectives. Topics include stress, personality and cognitive change, time perspective values, socialization processes and adaptation. Reading and paper required. PSYCHIATRY

Diagnosis and treatment of psychiatric problems associated with speech, hearing, or language difficulty. Supervised clinical work with se-
lected patients according to resident’s level of experience. Instruction with such alternative audiovisual communication systems as manual signing and voice printing. PSYCHIATRY

470. Neurology. (1) W. Lecture 1 hour. Required for fourth-year residents in psychiatry. Palu

Review of clinical neurology with emphasis on neurological disorders that may have psychiatric implications. PSYCHIATRY

471. Growth and Development II. (1) F Seminar 1 hour. Required for third-year residents in psychiatry. A. Simon, Keifer, L. J. Epstein

This seminar follows Growth and Development I. It will cover adulthood and aging. PSYCHIATRY

472. Problems in Psychotherapy. (½) W. Sp. Lecture 1½ hours. R. S. Wallerstein

Problems in psychotherapy conducted within a psychodynamic framework. Topics include: treatment indications, goals, motivation and treatability, resistance and defense, transference and countertransference, dreams in psychotherapy, third party involvements, emergency and hospitalization, adjacent drug management, note taking and recording, transfer and termination. PSYCHIATRY

An approach to individual psychotherapy with more severely disturbed patients is presented. Case and treatment are followed on a weekly basis. PSYCHIATRY

Instructor’s psychotherapeutic sessions with the patient are videotaped and played back and discussed with second- and third-year residents and other trainees. The material is objective and repeatable; the therapist is frank and self-critical; various theoretical views are compared. PSYCHIATRY

475. Self-Administration of Psychoactive Drugs. (2) W. Lecture 2 hours. Equivalent to Psychology 181.09. J. Bachman

Course is designed to acquaint students with some psychopharmacological determinants and consequences of psychoactive drug use and abuse, focusing on cannabis, alcohol, and tobacco. Topics include psychopharmacological effects, individual differences in persons’ personalities, and reinforcement properties that maintain use. PSYCHIATRY

A study of the development and changes in psychological functions from birth to senescence. Biological aspects of growth relevant to psychological functioning are considered. Emphasis is on observational data. PSYCHIATRY

Examination of neurotic and character disorders from a psychodynamic perspective. PSYCHIATRY

Exploration of biochemistry, physiology, and neuroanatomy related to mental functioning and behavior, and application of concepts to the understanding of etiology and biological treatment of psychoses. Phenomenology and psychopathology of disorders are studied and rationale for various psychological interventions. PSYCHIATRY

Examination of the development and application of crisis theory and therapy. Readings, discussion, and patient interviews are also included. PSYCHIATRY

480. Introduction to Clinical Psychiatry. (3) Su. Seminar 3 hours. Required for second-year residents in psychiatry. Staff

Seminar provides an introduction to the psychiatric interview and diagnosis, with emphasis on psychiatric emergencies. PSYCHIATRY

481. Holistic Approaches to Health. (2) W. Seminar 2 hours. Equivalent to Ambulatory Health and Community Medicine 181 and Psychology 181.08. Pelletier, P. Lee

Complementary strategies to the current biomedical effort may be developed from a critical, yet open-minded examination of the limits of medicine, the determinants of health, ancient systems of healing, biofeedback and self-regulatory therapies, self-care and mutual aid. PSYCHIATRY

482. Behavior Modification in the Treatment of Childhood Psychopathology. (1) F. Prerequisite: Consent of instructor. Lecture 12 hours for four weeks. D. Morrison

Basic introduction to use of both operant conditioning and behavior modification techniques with children. Theoretical and applied issues are discussed and reviewed in the context of research with a broad range of psychopathological conditions of childhood. PSYCHIATRY

483. Research Methodology in Child Psychiatry. (1) F. Prerequisite: Consent of instructor. Lecture 12 hours for four weeks. D. Morrison

Review of basics of experimental design and methodology such as reliability and validity of measuring techniques, statistical inference, control group designs and pre- and post-test designs. Clinical research with children provides a focus for discussion of relevant issues. PSYCHIATRY

484. Psychologies of Other Cultures. (2) F. Prerequisite: Current appointment at LPPI as resident in psychiatry, fellow in psychology, or consent of instructor. Seminar 2 hours. Scottson

Examination of other psychologies for their basic assumptions about man and the world, the
resultant psychology, resultant societal behavior, and possible applications to psychotherapy. Includes lecture, discussion, and presentation of one system by each participant. PSYCHIATRY 485. Psychobiology II. (1) F, W. Sp. Seminar 1 hour. Required for third-year residents in psychiatry. R. K. Stone

Seminars explore biochemistry, physiology, and neuroanatomy as related to mental functioning and behavior, and applies concepts to the understanding of etiology and biological treatment of psychoses. Phenomenology and psychopathology of disorders and rationale for various psychological interventions are studied. PSYCHIATRY

486. Medical Decision Making. (2) Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Equivalent to Psychology 203. P. J. Hoffman

Review of selected studies drawn from decision analysis and judgment research literature. Subjective probability estimates; confidence, bias, and diagnostic accuracy; Bayes optimal strategies; computer-aided diagnosis; medical schools admission decisions; judgments of clinical competence and administrative decision making. PSYCHIATRY

Psychology

113A-B. Human Growth and Behavior. (3) F, W. Prerequisite: First-year standing or consent of instructor. Lecture 3 hours. Kayser-Jones

Examination of patterns and sequences of human development. Exploration of human behavior and maturation with a view to the influences affecting the human condition through the life span. Various theoretical bases are explored in conjunction with biological and psychosocial concepts. MENT HLTH COM

170. Patient Compliance. (2) W. Lecture 2 hours. G. Stone

Patients' cooperation with health regimens contributes significantly to outcomes of health care. This course reviews factors that affect degree of compliance achieved and examines results of attempts to improve compliance. Stress is placed on tailoring methods to specific clinical circumstances. PSYCHIATRY

170.01 Communication in Health Transactions. (2) W. Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 3 hours. Enrollment limited. G. Stone

Lectures, readings, role-playing, and video replay will be used to teach social psychological influences on participants in health transactions; communication as joint problem-solving; specific skills of listening and speaking; awareness of nonverbal aspects of communication. PSYCHIATRY

Models for dealing with psychosocial issues involved in caring for the dying patient. Emphasis on the sequence of events encountered by the health professional and patient from diagnosis through death. Course is intended for medical, nursing and mental health students. PSYCHIATRY

180.01 Seminar in Psychology. (1) W. Seminar 1 hour. Plainfield

Weekly discussions in which students' clinical cases are analyzed by dynamic application of behavioral theory. GEN DENT

180.02 Psychological Aspects of Treatment Planning. (1) W. Lecture 1 hour. Plainfield

This course integrates students' basic training from the specialty courses in dentistry with knowledge of the psychological considerations necessary to individualize treatment. Appropriate treatment may then be planned to the practitioners' awareness of the unique needs of patients. GEN DENT

180.03. Advanced Psychology for Dental Hygienists. (1) Sp. Seminar 1 hour. Plainfield

Seminar discussions on the emotional aspects of interpersonal transactions among office personnel, therapists, and patients. GEN DENT

181.02. Cerebral Hemispheric Specialization and Integration. (2) Sp. Prerequisite: Background in neurophysiology, anatomy, cognitive psychology; intended for advanced students. Consent of instructor. Seminar 2 hours. Equivalent to Psychiatry 434. Galin

Group discussions of readings in seminar format of neuropsychology of hemispheric specialization for cognitive function, and integration of the two hemispheres; developmental, psychiatric, and educational implications; evaluation of data from study of brain lesions, electrophysiological recordings, and behavioral testing. PSYCHIATRY

181.03. Clinical Biofeedback. (2) W. Seminar 2 hours. Equivalent to Psychiatry 432. Paletier

Integration of biofeedback with psychotherapy and medical practice; methods of intervention and prevention will be presented in a therapeutic model emphasizing psychological factors in stress disorders. Biofeedback instruments are demonstrated and applied. Course is intended for clinical practitioners. PSYCHIATRY

181.04. Issues and Research in the Treatment of Substance Abuse. (2) F. Prerequisite: Consent of instructors. Seminar 2 hours. Enrollment limited. Equivalent to Psychiatry 420. S. Hall, Havassy

Survey of research on issues concerning treatment of substance abusers and of theories of etiology and treatment. Substances covered are heroin, alcohol, barbiturates, amphetamines, caffeine and nicotine. Obesity will also be included. PSYCHIATRY

Overview of the major concepts and approaches in health education, focusing on chronic diseases and primary and secondary prevention of health risks and problems; societal factors and individual determinants; specific techniques for helping people modify life styles.

PSYCHIATRY

Blackwell

Consideration of psychological processes utilized under stress and of alternative constructive methods for coping, with practice in using these techniques. Course is designed to help students handle stress and apply such principles to management of patients. PSYCHIATRY

181.08. Holistic Approaches to Health. (2) § W. Seminar 2 hours. Equivalent to Ambulatory and Community Medicine 181 and Psychiatry 481. Pelletier, P. Lee

Complementary strategies to the current biomedical effort may be developed from a critical, yet open-minded examination of the limits of medicine, the determinants of health, ancient systems of healing, biofeedback and self-regulatory therapies, self-care and mutual aid.

PSYCHIATRY

181.09. Self-Administration of Psychoactive Drugs. (2) § W. Sp. Lecture 2 hours. Equivalent to Psychiatry 475. J. Bachman

Course is designed to acquaint students with some psychopharmacological determinants and consequences of psychoactive drug use and abuse, focusing on cannabis, alcohol, and tobacco. Topics include psychophysiological effects, individual differences in users' personalities, and reinforcement properties that maintain use.

PSYCHIATRY

185. Nonverbal Communication (1) § F. Lecture 8 hours given in one day, plus research project. Ekman

Reading messages from the face and body; what patients reveal without words about their feelings and personality, and what you are revealing to them. PSYCHIATRY

198. Supervised Study in Psychology. (1-5) § F, W, Sp. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PSYCHIATRY

200. Theory and Research in Learning and Cognition. (3) § F. Prerequisite: Graduate standing in Health Psychology Program, or upper division courses in learning and cognitive psychology, and consent of instructor. Seminar 3 hours. Offered in alternate years. Offered 1980-81. G. Stone

Course provides a basis for continued reading of current research and theory in learning and cognition, and for designing interventions in health transactions based on readings; identifies and traces history of major issues and viewpoints.

PSYCHIATRY

202A-B. Computer Simulation of Personality and Human Interaction. (3-3) § W, Sp. Prerequisite: Psychology 257 or equivalent. Lecture 1 hour. Lab 6 hours. Starkweather

The development and testing of theoretical models of personality are explored by means of computer programs. Students program the computer for simulation and symbol manipulation.

PSYCHIATRY

203. Medical Decision-Making. (2) § F. Prerequisite: Graduate standing or consent of instructor. Lecture 2 hours. Equivalent to Psychiatry 486. P. J. Hoffman

Review of selected studies drawn from decision analysis and judgment research literature. Subjective probability estimates; confidence, bias, and diagnostic accuracy; Bayes optimal strategies; computer-aided diagnosis; medical schools' admission decisions; judgments of clinical competence and administrative decision making.

PSYCHIATRY

210. Personality Psychology (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. Offered in alternate years. Not offered 1980-81. F. Cohen

General and systematic issues in the study of personality; evaluation of major theories and points of view; theoretical and methodological issues in the assessment of personality.

PSYCHIATRY

211A-B. Theories of Personality. (2-2) § W, Sp. Prerequisite: Graduate standing and consent of instructor. Psychology 211A is prerequisite of 211B, but may be taken independently of 211B. Seminar 2 hours. Enrollment limited. J. Fisher

Survey of major contemporary theories of personality, including some more recent, selected philosophic points of view; study of their structure, how they conceptualize personality development, how they relate to empirical phenomena, and what research is generated by them.

PSYCHIATRY

212. Psychological Stress and Coping. (3) § W. Prerequisite: Consent of instructor. Seminar 3 hours. Offered in alternate years. Offered 1980-81. F. Cohen

Course examines stress theory and research from clinical, field, and laboratory settings; measures of stress; issues in stress research; the nature of coping and coping processes.

PSYCHIATRY

This seminar will acquaint students with research in health psychology. Presentations of research studies in health care problems and discussion of related issues will be given by students as well as by guest speakers.

PSYCHIATRY
221. Program Evaluation in Health and Other Human Service Organizations. (2) § W, Sp. Prerequisite: Consent of instructor. Seminar 2 hours. Equivalent to Psychiatry 431. Attkisson

A seminar course designed to provide a basic overview of the organizational context of program evaluation; design and implementation of information systems; assessment of community needs; evaluation of program quality and effectiveness, and training of evaluators.

PSYCHIATRY

230. Physiological Aspects of Health Psychology. (3) § E Prerequisite: Graduate standing in Health Psychology Program or consent of instructor. Lecture 3 hours. Offered in alternate years. Not offered 1980-81. G. Stone

An overview of major organ systems of the human body stressing psychological impacts on their functioning and psychological consequences of abnormality. Course will prepare student for reading medical literature and interacting effectively with health professionals in planning research.

PSYCHIATRY

231. Basic Physiological Psychology. (3) § E Prerequisite: Basic courses in experimental psychology and consent of instructor. Lecture 3 hours. Herning

Central nervous system mechanisms involved in the regulation of behavior will be emphasized. Elementary neurophysiology, anatomy and neurochemistry will be discussed as background material. Focus is on the substrates of behavior of the intact organism.

PSYCHIATRY

232. Current Topics in Biological Psychology. (2) § E Prerequisite: Basic courses in physiological psychology, experimental psychology, and consent of instructor. Seminar 2 hours. Equivalent to Psychiatry 442. Salamy

A seminar course focusing on a current topic in biological psychology such as neuroethology, lateralization of brain function, psychophysiology of stress, or physiology of attention. Individual presentations and discussion are required.

PSYCHIATRY

233A-B-C. Special Seminar in Physiological-Biological Research in Psychopathology. (1-1-1)

§ E, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Equivalent to Psychiatry 433A-B-C. Callaway

An ongoing seminar devoted primarily to the research interests of the group studying human event related potentials. Course includes visiting scientists, as well as presentations by staff and postdoctoral fellows.

PSYCHIATRY

234. Neurochemical Basis of Abnormal Psychology. (2) § E, Sp. Prerequisite: Consent of instructor. Seminar 2 hours. Ellman

Seminar and readings on subjects related to the neurochemical, neuropharmacological basis of CNS functions, cell physiology of the nervous system.

PSYCHIATRY

Course considers the relationship among behavior, subjective experience, and physiological processes, including autonomic and central neural. Review of methods of achieving increased awareness and control of physiological activity. Demonstrations, laboratory.

PSYCHIATRY

240. Social Psychology. (3) § E Prerequisite: Consent of instructor. Lecture 3 hours. Offered in alternate years. Not offered 1980-81. N. Adler

A survey of social psychological theory and research. Topics to be covered include attitude formation and change, decision-making, role theory, group dynamics, conformity and social influence, person perception and attribution theory.

PSYCHIATRY

247. The Individual and Society: Psychoanalysis and Social Science. (2) § W. Prerequisite: Background in psychoanalytic and sociological theories. Consent of instructors. Seminar 2 hours. Equivalent to Psychiatry 435.

R. S. Wallerstein, Smelser

Exploration of the more successful articulations between the psychoanalytic and sociocultural paradigms, making use of classical theoretical statements, studies of social traumas and catastrophe, political biography, organizational and institutional behavior, and cultural productions.

PSYCHIATRY

248. Independent Study. (1-6) § E, W, Sp. Prerequisite: Consent of instructor. Staff

Independent study under the supervision of a member of the faculty.

PSYCHIATRY

250. Research. (1-8) § E, W, Sp. Staff PSYCHIATRY

251A. Statistics for Psychology. (4) § W. Prerequisite: Undergraduate courses in statistics. Consent of instructor. Lecture 4 hours. Offered in alternate years. Not offered 1980-81. G. Fein

Introduction to parametric and nonparametric techniques appropriate for analyzing outcomes of experiments and field studies. Problems of sampling, estimating population values, combining data from multiple studies will be considered.

PSYCHIATRY

251B. Statistics for Psychology. (4) § Sp. Prerequisite: Psychology 251A or equivalent. Lecture 4 hours. Offered in alternate years. Not offered 1980-81. Hargreaves

Correlational methods and multiple regression as a general approach to data analysis, and its application to simple analysis of variance problems.

PSYCHIATRY

251C. Statistics for Psychology. (4) § E Prerequisite: Psychology 251B or equivalent. Lecture 4 hours. Offered in alternate years. Offered 1980-81. Hargreaves
Advanced application of multiple regression. The general linear model in analysis of variance and co-variance. Introduction to factor analysis.

PSYCHIATRY

254A. Research Methods. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Offered in alternate years. Not offered 1980-81.

N. Adler

An overview of research strategies and their associated strengths and weaknesses: experimental and quasi-experimental designs, correlational approaches, interview techniques, survey and questionnaire construction, uses of archival data, and observational techniques.

PSYCHIATRY

N. Adler, Attiksson, Hargreaves

An in-depth study on three issue areas of research, such as treatment experiments, program evaluation and ethics, and artifact. Emphasis is placed on developing a research protocol.

PSYCHIATRY

255. Tests and Measurement. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Not offered 1980-81.

O’ Sullivan

Psychological test construction, including item analysis, standardization, reliability, and validity.

PSYCHIATRY

257. Introduction to the Computer for Behavioral Sciences. (3) § F. Prerequisite: Elementary statistics and consent of instructor. Lecture 1 hour. Lab 6 hours.

Starkweather

The computer is studied as a useful tool for data analysis and controlled experiment. Students will learn to make use of existing program systems.

PSYCHIATRY

260. The Health System. (3) § W. Prerequisite: Graduate standing in Health Psychology Program, or consent of instructor. Lecture 1½ hours. Seminar 1½ hours. Offered in alternate years. Offered 1980-81.

Attiksson

Function and tasks of the health system; resources available and their deployment; institutions and organizations, professional roles; constraints imposed by rules, customs, societal factors. Issues of access, utilization, outcomes, financing will be stressed. Participation by invited guest experts.

PSYCHIATRY

262. Introduction to Health Psychology. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Offered in alternate years. Not offered 1980-81.

F. Cohen

Examination of empirical research and theoretical perspectives in certain problem areas within the health system where psychological knowledge is of direct relevance, such as information-processing in patient and physician, compliance, coping with the stresses of illness.

PSYCHIATRY

263A-B-C. Research Placement and Seminar. (3-3-3) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Lab 6 hours. Offered in alternate years. Offered 1980-81.

N. Adler, Attiksson

Students will be placed in an ongoing research project in which they will carry out an individual project. They will participate in a concurrent seminar, where research methods and strategies and problems of research will be discussed.

PSYCHIATRY

264. Health Transactions. (2) § Sp. Prerequisite: Consent of instructor. Seminar 2 hours.

G. Stone

Processes of giving and gaining health services are viewed as multi-person problem situations to be resolved through communication. Participation in investigating relevant literature for descriptions and analyses from which a systematic taxonomic framework can be developed.

PSYCHIATRY

265. Stress and Bodily Disease. (3) § Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Offered in alternate years. Offered 1980-81.

F. Cohen

Examination of the psychological and physiological models and empirical research linking stress and other psychological factors to the development of bodily disease.

PSYCHIATRY

266. Reproductive Behavior. (3) § Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Offered in alternate years. Not offered 1980-81.

N. Adler

Examination of the role that psychological and social factors can play in variety of reproductive behaviors: pregnancy, obstetrical complications, postpartum reactions, infertility, contraceptive use and nonuse, spontaneous and induced abortion.

PSYCHIATRY

270A-B-C. Communication Skills in Health Transactions. (2-2-2) § F, W, Sp. Prerequisite: Graduate standing in Health Psychology Program, or consent of instructor. Lecture 1 hour. Lab 3 hours. Offered in alternate years. Offered 1980-81.

G. Stone

A three-part course that teaches a number of skills involved in face-to-face interactions and prepares the student to do research on communication, and to teach the skills to others.

PSYCHIATRY

280. Clinical Approaches to Psychological Disorders. (3) § W. Prerequisite: Psychology 210 or equivalent, and consent of instructor. Lecture 3 hours. Offered in alternate years. Not offered 1980-81.

F. Cohen

Critical evaluation of current models of behavior pathology; issues of prevention; theory and method of clinical assessment; processes of therapeutic intervention.

PSYCHIATRY

281A-B-C-D. Seminar in Clinical Psychology. (1½-1½-1½-1½) § Su, F, W, Sp. Prerequisite: Consent of instructor. Seminar 1½ hours.

Steinheber

Seminar discussions of clinical work in clinical psychology and psychiatry, reports of research and current literature by students and staff, and
282. Major Variants of Behavior: Abnormal Psychology. (2) § F, W, Sp. Prerequisite: Consent of instructor. Course is intended primarily for advanced students. Seminar 2 hours.

J. Fisher

Nature, causes, development and treatment of major behavior disorders such as the brain syndromes, drug addictions and the functional psychoses which result in disabling disturbances of interpersonal relations. Contemporary theories of personality development and clinical study of the major disorders. PSYCHIATRY

283 A-B. Seminar in Clinical Neuropsychology. (1-1-1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour.

Steinheber

Clinical investigations of human brain-behavior functions, emphasizing relationships between higher cognitive components of behavior and brain disorders. The laboratory consists of supervised neuropsychological evaluations of brain damaged patients. Course is intended primarily for advanced students in clinical specialties. PSYCHIATRY

285 A-B-C-D. Intermediate Family Therapy. (1½-3-3-3) § SS 2, F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Four-quarter course. Equivalent to Psychiatry 438 A-B-C-D.

Hatcher

Stages in family development, communications analysis, role definitions, family myths, power and resistance systems, growth models of family therapy, and intervention techniques. Emphasis on clinical and practical issues, video tape presentations of families in treatment, clinical supervision of ongoing cases. PSYCHIATRY

290. Impact of Legislation and Health Insurance on Practice. (2) § F. Lecture 2 hours. Equivalent to Psychiatry 440.

Dorken

Review of the nature and types of health insurance as economic forces in practice; discussion of health care delivery models, manpower resources, peer review systems, utilization data; national health insurance and the legislative process will emphasize recent state and federal laws. PSYCHIATRY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. PSYCHIATRY

300. Practicum in Teaching Psychology. (0) § F, W, or Sp. Prerequisite: Consent of instructor. Lecture and lab variable. Staff

Supervised classroom or tutorial teaching experience. PSYCHIATRY

Radiation Oncology

140.01. Radiation Oncology Clinical Clerkship at UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C.

T. Phillips

Participation in examination of cancer patients under treatment in radiation oncology. Students participate in rounds, conferences and clinics, and see demonstrations on the use of newer radiotherapeutic techniques. RADIOL OGY

140.06. Clinical Clerkship in Radiation Oncology at MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C.

J. Castro

Participation in examination of cancer patients under treatment in the Claire Zellerbach Saroni Tumor Institute at MZ. Students participate in rounds, conferences, and clinics, and see demonstrations on the use of newer radiotherapeutic techniques. RADIOL OGY

150.01. Research Selective. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C.

T. Phillips

Individual research in radiation oncology by arrangement with the chairperson of the department. Students work under close supervision of a member of the staff. RADIOL OGY

T. Phillips

 Rounds include presentation of problem cases with discussions of diagnosis and treatment as well as biologic implications. Frequent guest lectures are used to cover important aspects of oncology. RADIOL OGY

T. Phillips

 Seminars include discussions of the diagnosis, treatment, and results of specialty oncology problems, including head and neck, gynecologic, otolaryngologic, pediatric, dermatologic, lymphomatous, and general malignancies. RADIOL OGY

T. Phillips

Study of principles of radiobiology and their application to radiotherapy. Seminars deal in depth with textbooks, selected readings and prepared seminars leading to understanding of mechanisms of action of radiation in clinical radiotherapy. Oriented to radiotherapy fellows and residents. RADIOL OGY

423. Concepts of Treatment Planning and Dosimetry in Therapeutic Radiology. (3) Su. Prerequisite: Residents assigned to therapeutic radiology.

V. Smith

A workshop course to provide residents in therapeutic radiology with the elements of treatment planning and dose calculations. RADIOL OGY

V. Smith

A lecture-seminar course with practical sessions to provide the resident with a basic knowledge of radiological physics with special reference to those aspects relating to therapeutic radiology. RADIOL OGY

Residents, under supervision, are responsible for diagnosis, treatment, and follow-up of patients referred to radiation therapy from the wards and outpatient clinics. Radiation therapy rounds include discussion of newly referred patients; chart rounds include the discussion of patients under treatment. RADIOLOGY

Radiology

100. Introduction to Clinical Radiology. (2) F, W, Sp. Prerequisite: Anatomy 100 and 103, Medicine 130, Pathology 102, and Psychiatry 130; concurrent enrollment in Medicine 131A-B-C. Lecture 1 hour. Lab 1 hour. S. Ross

Course provides instruction in basic aspects of therapeutic and diagnostic radiology and nuclear medicine. Illustration of diagnostic and therapeutic modalities in specific disease states provides instruction in use of radiologic resources. RADIOLOGY

140.01. Roentgen Diagnosis. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Surgery 110. Margulis

Clerkship in radiology. Observation of procedures, review of pathology, pathophysiology, diagnosis, and natural history of selected diseases through study of roentgenograms with case histories. Potentials and limitations of radiologic method included. RADIOLOGY

140.02. Clinical Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. Margulis

Clinical clerkship in approved hospital by special arrangement and approval of the chairperson of the department and the dean. RADIOLOGY

140.04. Clinical Clerkship in Nuclear Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. Hattner

Observation of basic nuclear medicine procedures and participation in diagnostic tests employing radioisotopic tracers. Completion of Radiology 140.04, 140.12, 170.08, and 170.09 meet the State of California requirements for licensure to use radioactive isotopes in clinical medicine. RADIOLOGY

140.05. Diagnostic Radiology at MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Third- or fourth-year standing. A. Davidson

Rotation through each service in the department of Radiology on a scheduled basis; participation in film interpretation with residents and faculty, and attendance at daily conferences; tutorials available with members of the faculty; role of radiology in clinical management emphasized. RADIOLOGY

140.08. Clinical Clerkship in Cardiovascular Radiology. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. Carlsson

Cardiovascular radiology provides an opportunity to become acquainted with the radiologic studies of the cardiovascular system through active participation in the examinations and their interpretation. RADIOLOGY

140.09 Clinical Clerkship in Diagnostic Radiology at SFCH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. Minagi

Students serve a clerkship in the Diagnostic Section of the Department of Radiology. They observe performance of radiologic procedures and interpretation of films, attend conferences, and learn basic philosophy of conducting radiologic examinations and the rules of interpretation. RADIOLOGY

140.11. Radiology Clerkship at C. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. F. Margolin

Course includes all types of radiologic procedures, pediatric radiology, and radiation therapy with emphasis on the radiologist as a consultant to other specialties as related to use and indications for all radiologic techniques. RADIOLOGY

140.12. Radioactivity Laboratory. (½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. Consent of instructor. Perez-Mendez

Course is designed to teach accurate measurement radioactivity techniques for biomedical purposes. RADIOLOGY

140.13. Radiology and Medical Diagnosis. (1½ per week) Su, F Prerequisite: Medicine 131A-B-C. S. Ross

A clerkship for third-year students to help acquire knowledge and attitudes that ease transition from preclinical studies to clinical medicine. Radiographs with case presentations are used to help learn mechanisms of disease and clinical judgment. RADIOLOGY

Course demonstrates anatomy in the living through the use of radiographs. Objectives are to show the usefulness of knowing anatomy, to begin acquiring a medical vocabulary, the elements of clinical thinking, and useful habits in learning. For freshman "Blue" group. RADIOLOGY

170.06A-B-C-D. Pathology of Internal Organs. (1-3, 1-3, 1-3) Su, F, W, Sp. Lecture 1-3 hours. S. Ross

A lecture course limited to small groups, with active participation on selected aspects of pathological anatomy and its usefulness in understanding disease, its origins, development, and clinical manifestations. For sophomores. RADIOLOGY

Course demonstrates anatomy in the living through the use of radiographs. Objectives are to show the usefulness of knowing anatomy, to begin acquiring a medical vocabulary, the ele-
ments of clinical thinking, and useful habits in learning. For freshman "Gold" group.

RADIOLOGY

170.08. Nuclear Medicine Physics. (3½) Su. Prerequisite: Concurrent enrollment in Radiology 170.09. 

Perez-Mendez

Introduction to the physics of radioactivity, nuclear instrumentation and gamma ray imaging techniques. RADIOLOGY

D. Price

Introduction to basic nuclear medicine diagnostic procedures, both in vivo and in vitro, and therapy with radiopharmaceuticals. RADIOLOGY

Minagi, R. Lim, Laing

Weekly seminar covering the radiologic studies of surgical cases emphasizing indications, risks, and information derived from procedures. Active participation in X-ray interpretation is included. RADIOLOGY

Minagi

An elective course for fourth-year medical students. Consideration of the role of the radiologist as a consultant in the emergency room. Topics covered include head injuries, fractures, dislocations, chest, abdominal and genito-urinary trauma, and management of contrast reactions. RADIOLOGY

Margulis and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. RADIOLOGY

Margulis and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RADIOLOGY

220. Seminars in Radiological Physics for Physicians. (2) § F, W, Sp. Prerequisite: Bachelor's or higher degree in the physical sciences. 

V. Smith, R. Baker

Seminars provide physicists with an in-depth knowledge of radiological physics. RADIOLOGY

295A. Nuclear Medicine Instrumentation and Techniques. (4) § F. Prerequisite: Graduate courses in quantum mechanics, electricity and magnetism, nuclear physics, and computer sciences. Consent of instructor. Lecture 4 hours. 

L. Kaufman

Selected readings and seminars on nuclear medicine and imaging and counting instrumentation and techniques. Principles, design, performance and evaluation of instruments, including gamma cameras, scanners, collimators and well counters. Students will be responsible for two presentations to the staff. RADIOLOGY

295B. New Developments in Nuclear Medicine Instrumentation. (5) § W. Prerequisite: Graduate course in quantum mechanics, electricity and magnetism, nuclear physics, and computer sciences. Radiology 295A and consent of instructor. Lecture 5 hours. 

L. Kaufman

Selected readings, techniques and seminars on nuclear medicine's current developments in new imaging cameras and scanners, semiconductor detectors, stable tracer techniques, computer systems and applications, coincidence detectors and tomographic reconstruction. Students will be responsible for two presentations to the staff. RADIOLOGY

H. Goldberg

Faculty from radiology and other departments lecture and discuss various diseases of all systems of the body. Residents prepare case histories stressing roentgen findings and correlative surgical and laboratory work, special studies, library, and film research. RADIOLOGY

Margulis, Gooding

Films of interesting cases from the daily work are presented and reviewed. Roentgenograms of surgically and pathologically proved cases are correlated with the gross and microscopic pathologic findings. RADIOLOGY

Margulis

Seminars require preparation and presentation of roentgen findings on patients under discussion at medical, surgical, pediatric, obstetric and gynecologic departmental conferences and seminars on congenital heart disease, disease of the gastrointestinal tract, and orthopaedics. RADIOLOGY

Minagi

Role of radiologist as consultant in the emergency room; head injuries, fractures, dislocations, blunt and penetrating chest trauma, blunt and penetrating abdominal trauma, trauma to genito-urinary system; management of contrast reactions; indications for, conduct of, interpretation of special radiologic procedures. RADIOLOGY

Margulis

Elective.

Numerous research projects are conducted in the department and facilities are available for new ones. Residents are encouraged to take advantage of these opportunities. RADIOLOGY

Seidritz

The elements of radiological physics are studied in a series of lectures and problem assignments. The basic phenomena experienced in
producing, measuring, and absorbing radiation are illustrated. Course is designed to give residents in radiology the necessary background to practice radiology. RADIOLOGY

   SFGH Coulson
   Interdepartmental seminars in which the radiological picture of problem cases either of diagnostic or therapeutic nature is presented. This course includes surgical and medical radiological rounds, consultative tumor board, clinicopathological conferences, and other department grand rounds. RADIOLOGY

   Interdepartmental seminars in which the radiological picture of problem cases either of diagnostic or therapeutic nature is presented. These include medical-surgical, clinicopathological, chest, medical X-ray, rheumatology, neurology and neurological surgery conferences; consultative tumor board; and surgical and orthopaedic grand rounds. RADIOLOGY

410. Radiobiology: Radiation Effects on Genes and Chromosomes. (2) W. Prerequisite: Consent of instructor. Lecture 2 hours. S. Wolff
   Concepts and mathematics of target theory related to damage of genetic apparatus. Biophysical and biochemical studies on induction of intragenic and intergenic mutations that give insight into the structure of chromosomes and interaction of radiation with biological material. RADIOLOGY

411. Introduction to Nuclear Medicine. (2) Su, F, W, Sp. Prerequisite: Concurrent enrollment in Radiology 421. Hoffer and Staff
   Introduction to basic nuclear medicine diagnostic procedures, both in vivo and in vitro, and therapy with radiopharmaceuticals. RADIOLOGY

412. Pathology. (1) Su, F, W, Sp. VA Ovenfors
   Course includes review of surgical pathology material and attendance at autopsy rounds. RADIOLOGY

413. Pathology. (1) Su, F, W, Sp. SFGH Minagi
   Course includes presentation of pathological material of special interest to radiologists with emphasis on the correlation of diagnostic X-rays and pathological findings and a study of the pathology of patients under radiation treatment. RADIOLOGY

414. Physics of Diagnostic Radiology. (2) W. Prerequisite: Radiology 406. Lecture 1½ hours. Lab 2 hours. Seidlitz
   A seminar course with laboratory experiments designed to acquaint the student with current knowledge of physics applicable to diagnostic radiology. Topics include generation and extraction of radiologic information, image conversion, recording methods, and special purpose equipment. RADIOLOGY

419. Growth Kinetics of Cells, Tissues, and Tumors. (2) W. Prerequisite: Consent of instructor. Lecture 2 hours. Cleaver, Patt
   An analysis of cell population growth in tissues, tumors, and cultures. Emphasis is given to radioactive tracers such as thymidine and its biochemical and experimental methods for studying cell proliferation in vivo and in vitro. RADIOLOGY

   Rotating assignments of topics for discussion by residents in nuclear medicine training programs in all affiliated hospitals. Critical reviews of available information in limited areas are used to provide a broad review of nuclear medicine for all trainees. RADIOLOGY

   Introduction to physics of radioactivity, nuclear instrumentation, and gamma ray imaging techniques. RADIOLOGY

422. Basic Radiological Sciences. (3) Su.
   Perez-Mendez, L. Kaufman
   Course intended for all first-year residents in radiology; provides an introductory survey of radiobiology, diagnostic X-ray physics, radiocytology, and radiation instrumentation. RADIOLOGY

450. Clinical Nuclear Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Radiology 422. Hoffer and Staff
   Clinical experience in diagnostic and therapeutic nuclear medicine to satisfy requirements of American Board of Radiology for certification in diagnostic radiology and radiation therapy. RADIOLOGY

   Residents, under supervision, carry out radiological examination and interpretation of X-rays of patients referred from wards and outpatient clinics. The chief resident has certain administrative duties relative to the resident training program. RADIOLOGY

452. Clinical Diagnostic Radiology. (1½ per week) Su, F, W, Sp. Prerequisite: Radiology 450. VA Ovenfors
   Residents, under supervision, are responsible for the diagnostic activities of the department, including diagnostic consultations and reports, history-taking, and physical examinations. In addition, the chief resident has certain administrative duties relative to the resident training program. RADIOLOGY

   residents are responsible for the diagnostic and therapeutic activities of the department under the direction of staff radiologists including
diagnostic consultations and reports, history-taking, physical examinations, radiation therapy, and follow-up of patients referred for the therapeutic consultations. RADIOLOGY

455. Radioactivity Laboratory. (1½ per week) Su, F, W, Sp. Prerequisite: Residents assigned to nuclear medicine section and consent of instructor. Perez-Mendez

Course is designed to teach accurate measurement radioactivity techniques for biomedical purposes. RADIOLOGY

Removable Prosthodontics

RECTOR DENT

110B-C. Elementary Complete Denture Prosthodontics. (1) W, Sp. Prerequisite: Concurrent enrollment in Removable Prosthodontics 110B-C. Removable Prosthodontics 110B is a prerequisite to 110C. Lecture 1 hour. Harman, Firtell, Brigante

Lectures on the elementary principles of complete denture prosthodontics emphasizing the biological background and clinical application of the technical steps. RESTOR DENT

A laboratory course on the elementary principles of complete denture prosthodontics. Laboratory exercises demonstrate technical and clinical procedures. RESTOR DENT

122. Immediate Dentures. (1) W. Prerequisite: Removable Prosthodontics 110B-C, 116B-C and 126.01. Concurrent enrollment in Removable Prosthodontics 126.02. Lecture 1 hour. Fitzloff

Presentation of clinical procedures for immediate dentures. RESTOR DENT

Course will enable students to be able to identify the needs for variations from routine treatment to be able to handle the problems of the more senior, non-ambulatory, bedridden, and institutionalized patient. Included are physiology, psychological and clinical needs. RESTOR DENT

126.01. Partial Dentures. (3) F. Prerequisite: Removable Prosthodontics 116B-C. Lecture 1 hour. Lab 6 hours. Elahi

Fundamentals of partial denture design and construction of the partial denture. RESTOR DENT

126.02. Immediate Dentures. (2) W. Prerequisite: Removable Prosthodontics 110B-C, 116B-C and concurrent enrollment in Removable Prosthodontics 122. Lab 6 hours. Wood, Fitzloff

Course provides experience in fabrication of immediate dentures. RESTOR DENT

126.03. Complete Prosthodontics. (2) Sp. Prerequisite: Removable Prosthodontics 126.01 and 126.02. Lab 3 hours. Seminar 1 hour. T. Wood

Course will demonstrate to preclinical students patient management and the techniques of fabricating a complete denture. They will practice independently or on student partners the techniques demonstrated. Discussion of problems encountered in practice. RESTOR DENT

130A. Treatment Planning and Prosthesis. (1) F. Prerequisite: Removable Prosthodontics 122, 123, 126.01, 126.02 and 126.03. Lecture 1 hour. A. Green

Treatment planning for the partially edentulous and the edentulous patient. Course is designed to relate the varying biological and physical factors with the type and design of the prosthesis: fixed partial, removable partial, or complete dentures. RESTOR DENT

130B. Advanced Removable Partial Denture Design. (1) W. Prerequisite: Removable Prosthodontics 130A. Lecture 1 hour. Krol

Principles and concepts of partial denture design in relation to clinical dentistry. Treatment planning for removable partial dentures especially as related to preventive dentistry will be emphasized. Special attention will be given to design of the extension base partial denture. RESTOR DENT

130C. Orofacial Prosthetics. (1) Sp. Prerequisite: Removable Prosthodontics 130B. Lecture 1 hour. Chiucci and Staff

Biologic principles underlying prosthetic treatment of patients with congenital and acquired malformations, defects and dysfunctions. Includes the development of normal and abnormal speech as it relates to prosthodontics. The basis for prosthetic therapy in temporomandibular joint disorders is also presented. RESTOR DENT

139. Clinical Practice. (0-2½) F, W, Sp. Prerequisite: Satisfactory completion of first and second years in removable prosthodontics. Clinic variable. Firtell

Clinical application of principles and techniques taught in the first and second-year courses in removable prosthodontics. Students are required to complete a minimum of 2½ units, and have demonstrated satisfactory competence. RESTOR DENT

149. Clinical Practice. (0-6) F, W, Sp. Prerequisite: Satisfactory completion of Removable Prosthodontics 139. Clinic variable. Firtell

Clinical application of principles and techniques taught in the first- and second-year courses in removable prosthodontics. Students are required to complete a minimum of 6 units. The total units for Removable Prosthodontics
139 and 149 will equal 8½ units. RESTOR DENT

171. A-B-C. Complete Prosthodontics. (4-4-4) F, W, Sp. Lecture 1 hour. Lab and Clinic 9 hours. Regli, M. L. Parker and Staff

Instruction in clinical and laboratory procedures related to complete prosthodontics. RESTOR DENT

172.01A-B-C. Partial Prosthodontics. (4-4-4) F, W, Sp. Lecture 1 hour. Lab and Clinic 9 hours. Regli, M. L. Parker and Staff

Instruction in clinical and laboratory procedures related to partial prosthodontics. RESTOR DENT

172.02. Partial Prosthodontics. (5) SS. Lecture 1 hour. Lab and Clinic 12 hours. Regli, M. L. Parker and Staff

Instruction in clinical and laboratory procedures related to partial prosthodontics. Continuation of Removable Prosthodontics 172.01A-B-C. RESTOR DENT

170. A-B-C. Clinical Practice. (4) SS. Prerequisite: Removable Prosthodontics 171A-B-C, 172.01A-B-C and 172.02. Lab 12 hours. Regli, M. L. Parker and Staff

Clinical practice on patients for partial and complete prosthodontics. RESTOR DENT

Instruction in clinical and laboratory procedures related to complete prosthodontics. Course will include in-service hospital treatment at VA. RESTOR DENT

175. A-B-C. Partial Dentures. (3-3-4) F, W, Sp. Lecture 1 hour. Lab and Clinic 6 hours F, W, 9 hours Sp. Regli, M. L. Parker and Staff

RESTOR DENT

Original investigation in the field of removable prosthodontics. RESTOR DENT

177. Prosthodontics Seminar. (4) F, W, Sp. Prerequisite: Students in removable prosthodontics certificate program must enroll in this course each quarter and summer session for entire program. Seminar 4 hours. Regli, M. L. Parker and Staff

Review of the literature related to prosthodontics. RESTOR DENT

An elective course offering instruction in procedures and materials other than those normally used in the clinic. RESTOR DENT

181. Fixed and Removable Methods. (1) F, W. Prerequisite: Fourth-year standing. Lecture 1 hour. Firtell, Fitzloff

Concepts of vertical and cross-arch stabilization relating to partial prosthodontics are reviewed. Preservation of a few remaining teeth and the edentulous ridges through bioengineering principles is emphasized. Patient psychology, periodontics, endodontics and dental implants are related to removable prosthodontics. RESTOR DENT

182. Advanced Partial Denture Design. (1) Sp. Prerequisite: Completion of three removable partial dentures. Seminar 1 hour. Firtell, Fitzloff

Seminar to discuss and determine the reasons for clinical cases failed and to recommend new treatment or design principles of routine situations, but unusual cases may be used to depict specific problems. RESTOR DENT

Continuation of clinical experience at the level of Removable Prosthodontics 109. RESTOR DENT

189.02. Complete Prosthodontics. (0-7½) SS. Prerequisite: Fourth-year standing. Lab and clinic variable. Regli

Work is done in a clinic location on an Indian reservation near Albuquerque, New Mexico. Each student will treat five patients. For clinical work completed, credit will be given to satisfy part of the Removable Prosthodontics 109 requirement. RESTOR DENT

Senior dental students will observe and perform maxillofacial prosthodontic services for patients in the Maxillofacial Clinic. A detailed case history will be required each quarter. Attendance at related tumor board conferences and field trips to other therapy centers. RESTOR DENT

199. Laboratory Project in Removable Prosthetics. (1-5) F, W, Sp. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

Course is designed to acquaint residents with multidisciplinary aspects of maxillofacial prosthetics. Lectures will be given on maxillofacial prosthetic techniques, oncology, head and neck surgery, plastic surgery, oral surgery, therapeutic radiology, psychology and related oral biology. RESTOR DENT

Residents and advanced prosthodontic students will observe and perform maxillofacial prosthodontic services for patients in the Maxillofacial Clinic. A detailed case history will be required each quarter. Attendance at related
tumor board conferences and field trips to other therapy centers. RESTOR DENT

Restorative Dentistry

Regli

Students elect to complete requirements in any one or more of the divisions after satisfactorily completing all requirements in Fixed Prosthodontics 109, Operative Dentistry 109, and Removable Prosthodontics. RESTOR DENT

171A-B-C. Advanced Restorative Dentistry. (3-3-3) Yr. Lecture 1 hour. Clinic 6 hours.

Schuchard, M. Stark

Seminars and current literature review correlating basic and preclinical science with the practice of restorative dentistry. Selected cases requiring medical and dental diagnostic procedures and treatment planning will be presented. RESTOR DENT

173. Postdoctoral Clinical Practice. (2) SS. Prerequisite: Restorative Dentistry 171A-B-C. Clinic 60 hours.

Schuchard, M. Stark

Clinical practice applying advanced restorative procedures. RESTOR DENT

174A-B-C. Advanced Restorative Dentistry. (3-3-3) F, W, Sp. Prerequisite: Restorative Dentistry 171A-B-C. Lecture 1 hour. Clinic 6 hours.

Schuchard, M. Stark

Advanced restorative dentistry. Seminars will be directed toward the psychology of patient management in relation to treatment planning. The clinical phase will provide experience in contact instruction. RESTOR DENT

175. Postdoctoral Clinical Practice. (2) SS. Prerequisite: Restorative Dentistry 174A-B-C. Clinic 60 hours.

Schuchard, M. Stark

Clinical practice applying advanced restorative procedures. Continuation of Restorative Dentistry 173 on an advanced level. RESTOR DENT

Schuchard, M. Stark

A research project in the field of restorative dentistry. Findings must be prepared for publication. RESTOR DENT

Schuchard, M. Stark

Study and interpretation of current literature contributing to the advance of dental science. Discussion is directed toward defining areas of further study and considerations of modifying scope of dental education to include advances. Research protocols are developed and implemented. RESTOR DENT

177.02. Seminar. (2) SS. Prerequisite: Restorative Dentistry 177.01A-B-C. Seminar 2 hours.

Schuchard, M. Stark

Continuation of Restorative Dentistry 177.01A-B-C. RESTOR DENT

177.03A-B-C. Seminar. (2-2-2) F, W, Sp. Prerequisite: Restorative Dentistry 177.02A-B-C. Seminar 2 hours.

Schuchard, M. Stark

Continuation of Restorative Dentistry 177.02A-B-C. RESTOR DENT

177.04. Seminar. (2) SS. Prerequisite: Restorative Dentistry 177.03A-B-C. Seminar 2 hours.

Schuchard, M. Stark

Continuation of Restorative Dentistry 177.03A-B-C. RESTOR DENT

Sociology

Staples

Presentation of prominent sociocultural features of dominant systems in American society. Integration and dissonance between and among these systems with emphasis on major social problems which result, such as racism, inequality, youth, disjunction between technology and humanistic values. SOC BEH SC

120. Statistics. (3) Sp. Lecture 2 hours. Lab 3 hours. Enrollment limited. Newcomer, Swan

Emphasis on basic logic of quantitative methods, the application of appropriate statistical techniques to given research objectives, and the ability to use the statistics and interpret the results. Statistical package for social sciences and manual computation will be used. SOC BEH SC

122. Health and Illness in American Society. (3) F Lecture 3 hours.

Estes

Broad survey of features of American society that produce either health or morbidity or both. A variety of significant factors is explored in conjunction with ideological implications for the quantity and quality of health care services. SOC BEH SC

123. Social Systems Theory and Application to Nursing Practice. (2) W. Prerequisite: Fifth-quarter standing or consent of instructor. Lecture 2 hours.

Schatzman

Course presents a theoretical framework from which patient care and health delivery systems can be analyzed, approached, and influenced by the professional nurse. SOC BEH SC

126. Families of the Third World. (2) § W. Lecture 2 hours. Lab 3 hours.

Staples

Examination of family structures and dynamics among Third World peoples. Families to be discussed include Africans and Afro-Americans, Asians, Native Americans and Latinos. Emphasis on continuities in the family life of these groups in their native land and the United States. SOC BEH SC

130. Socio-Cultural Variations in Health. (3) § W. Lecture 3 hours.

A. Strauss

Course addresses socio-cultural variations in health with implications for nursing practice. SOC BEH SC
132. Individual and Change. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours.  
Olesen

The relationship of social structures to individuals and their behavior. Emphasis will be on individuals as members of society rather than on individuals or society as such. SOC BEH SC.

134. Women's Roles in Health Care and Healing Systems. (3) § F, W or Sp. Lecture 3 hours.  
Olesen

Analysis of sex roles in general and women's roles in particular in health care receipt and delivery, with special emphasis on recruitment problems to health professions, images of women in therapeutic situations, and crosscultural features of health care. SOC BEH SC.

136. Pain: Social, Organizational and Interactional Aspects. (3) § Sp. Lecture 2 hours. Lab 3 hours.  
A. Strauss

Pain as experienced, expressed, and managed in a variety of settings by patients, staff, and family. Sociological and organization perspectives on assessing, legitimizing, and controlling pain. SOC BEH SC.

137. Sociology of Sexual Behavior. (3) § F, Lecture 2 hours. Lab 3 hours.  
Staples

A sociological perspective of human sexuality as expressed in various forms, varied among different segments of the population and influenced by diverse social forces, with emphasis on sexual relations as an element of social relations. SOC BEH SC.

138. Sociology of Change in Health Care Systems (3) § W, Sp. Prerequisite: Open to upper division and graduate students. Lecture 3 hours.  
Staff

Review of social change in health care systems with particular attention to implications of change at all system levels such as patients, alternative curing practices, policies, new occupations, types of future care. Debate on and examination of key issues. SOC BEH SC.

160. Policy and Politics of Health. (3) § F. Lecture 3 hours.  
Estes

Course addresses the organization of health care and its politics, with emphasis on both United States and international health issues. SOC BEH SC.

167. Social Organization of Health Care With Primary Emphasis on Hospitals. (2) F. Prerequisite: Consent of instructor. Lecture 2 hours.  
Staff

An inquiry into the nature of the organizational forms by which health care is distributed, with particular emphasis on hospital organization and the interaction among health care personnel. SOC BEH SC.

168. Contemporary Social Problems. (3) § F. Lecture 2 hours.  
Staff

The genesis and natural history of social problems and a substantive survey of such leading contemporary problems as race relations, juvenile delinquency, the role of women in American society, and the distribution of health services in the United States. SOC BEH SC.

Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. SOC BEH SC.

203. Social and Psychological Aspects of Chronic Illness. (3) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.  
A. Strauss

Problems faced by chronically ill persons and their families including crisis management, handling symptoms, managing regimens, social isolation, phases of the disease, temporal difficulties, normalization, dying. Some policy issues, including those confronting health care personnel as well as the general public. SOC BEH SC.

204. Sociology of Psychiatry. (3) § Sp. Lecture 3 hours.  
Schatzman

Psychiatric practices, professional careers, and institutions conceptualized sociologically, as historic, symbolic systems and interactional processes. SOC BEH SC.

205. The Sociology of Health Professions and Occupations. (4) § F. Lecture 4 hours.  
A. Strauss

The nature of occupations and professions; their constellation in hospitals and clinics, the medical division of labor, specialties and specialization, professional and occupational ideologies, the sociology of work relationships, careers. SOC BEH SC.

206. Sociology of Devalued Occupations. (2-4) § W. Prerequisite: Consent of instructor. Lecture 2-4 hours.  
Olesen

Review and analysis of occupational theory with special reference to the trends, both social and psychological, involved in occupations customarily considered "dirty" or devalued. Analysis of the organization of such work; the life styles of the persons who pursue it. SOC BEH SC.

207. Microsociology. (2-4) § W. Prerequisite: Consent of instructor. Lecture 2-4 hours.  
Olesen

Analysis of social behavior utilizing concepts of territoriality, proxemics, social schema; review of relevant animal studies, as well as such concepts as privacy; consideration of cross-cultural uses of space. SOC BEH SC.

208. Social Psychology of Health and Illness. (3) § W. Prerequisite: Required for graduate students in sociology. Lecture 2 hours. Lab 3 hours.  
Olesen

The relationship of social class, ethnic identification, group membership, family structure, occupation and life style to health and illness, and therapeutic interaction of laymen and health professionals. SOC BEH SC.

212A. Sociological Theory. (2) § W. Lecture 2 hours.  
A. Strauss
An examination and evaluation of classical and recent contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SC

212B. Sociological Theory. (2) § W. Prerequisite: Sociology 212A. Lecture 2 hours. Staff
An examination and evaluation of classical and recent contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SC

213. Studies in Participant Observation. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Schatzman
A basic course in the logic and operations of social research in the field. Lectures, readings and discussion on research strategies; entree, watching, listening, data recording, and analyzing. SOC BEH SC

214A. Discovery of Social Reality. (3) § F. Prerequisite: Required for graduate students in sociology. Lecture 2 hours. Lab 3 hours. Olesen, Schatzman
Practicum in sociological field observation; course is designed to sensitize students to demographic and behavioral components of social life in public places. Observation of human aggregates in varied neighborhoods of a metropolis. Instruction in observational techniques and data organization. SOC BEH SC

214B. Discovery of Social Reality. (3) § W. Lecture 2 hours. Lab 3 hours. Olesen, Schatzman
Sociological field observation. Instruction in observation, interviewing, the organization of data, descriptive analysis, and research writing. Continuation of Sociology 214A. SOC BEH SC

214C. Qualitative Analysis. (3) § F, Sp. Prerequisite: Sociology 214A and 214B. Lecture 2 hours. Lab 3 hours. A. Strauss
Examination of modes of analysis applicable to qualitative data; emphasis on dimensions and properties exhibited in student-presented data. SOC BEH SC

214D. Qualitative Analysis. (3) § F, W, Sp. Prerequisite: Sociology 214A, 214B and 214C. Lecture 2 hours. Lab 3 hours. A. Strauss
Qualitative analysis; the development of substantive and formal sociological theory. Emphasis on student-presented data and their conceptualization. SOC BEH SC

215. Problems in Microsociology: Urban Life. (2-4) § Sp. Prerequisite: Consent of instructor. Sociology 207 recommended. Seminar 2-4 hours. Olesen
A graduate research seminar on selected problems in microsociology especially related to urban life, the urban environment, and the bearing on health care settings such as clinics. Application and critique of research and concepts in this area. SOC BEH SC

216. Comparative Organizations. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. Staff
A critical review of classical and recent contributions to the sociology of formal organizations. A variety of types of organizations will be considered, with special emphasis on service organizations. SOC BEH SC

217. Seminar on the Future of the Family. (3) § Sp. Lecture 2 hours. Lab 3 hours. Staples
Exploration of changing dating, sexual, sex-role, marital, and familial patterns in the United States. Discussion of futuristic models of family life as affected by sociocultural forces. Special emphasis given to changing sex-role behavior as affecting male-female relationships. SOC BEH SC

219. Political Sociology of Aging. (2-4) § W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. Estes
Major paradigms in the study of community and national power structures examined in terms of theoretical, methodological, empirical, ideological content. Issues of actual and potential power of the aging considered in light of available data and the major paradigms discussed. SOC BEH SC

220. Seminar in Sociology. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Required for graduate students in Sociology. Seminar 2 hours. Lab 0-6 hours. Staff
Doctoral student seminar to discuss methods and problems in current research. Course may be repeated for credit. SOC BEH SC

Qualifying examinations for graduate students in sociology are given in three areas: sociological theory, medical sociology, and special interest. This course will provide for preparation in each area. SOC BEH SC

222. Politics of Planning in the Human Services. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Estes
Examination of trends in planning for the human services, including the role of government organizations, professionals and consumers in generating and benefiting from major human services planning reforms. Planning in the fields of health and aging is emphasized. SOC BEH SC

224. Epistemological Problems in the Social Sciences. (4) § W, Sp. Prerequisite: Consent of instructor. Staff
Central epistemological problems in the social sciences and their bearing on issues of the research role, modes of conceptualization, scientific communication, and public information. SOC BEH SC
230. Analysis of Symbolic Systems. (2-4) § Sp. Prerequisite: Consent of instructor. Olesen
Critical inspection and analysis of American symbolic systems, such as educational institutions and mass media of communication with respect to the diffusion and alteration of values in specific sections of the society, such as health professions. SOC BEH SC

232. Advanced Problems in Social Psychology. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 2-4 hours. Olesen and Staff
An advanced seminar dealing with theoretical and conceptual problems in various areas of social psychology. Recent developments in theory and concept will be reviewed. SOC BEH SC

233. Seminar in Urban Social Relations. (3) § F. Lecture 2 hours. Lab 3 hours. A. Strauss
Research seminar on selected topics bearing on the social psychology of urban living and the sociology of cities. SOC BEH SC

234. Health and Aging. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2-4 hours. H. Lipton
Examination of the health status of the aged in the United States in light of relevant biological, behavioral, sociocultural, environmental factors. Social, cultural, economic factors affecting organization, financing, and delivery of health care to the aging population will be examined. SOC BEH SC

235. Health Factors in Marriage and Family Behavior. (3) § F Prerequisite: Consent of instructor. Graduate-student standing. Lecture 2 hours. Lab 3 hours. Staples
Exploration of how marital and family behavior generate mental and physical health problems. Topics to be covered are family violence, child abuse, sexually transmitted diseases, suicide, psychological problems, and the relationship of marital status to morbidity and mortality. SOC BEH SC

236. Race and Class Factors in Health Care Delivery. (3) § W. Prerequisite: Consent of instructor. Graduate-student standing. Lecture 2 hours. Lab 3 hours. Staples
Examination of how racial and class membership impact on access to health care services, variations in the quality of those services, how professional roles in the health care system are organized along racial and class lines. SOC BEH SC

237. History of Sociological Thought. (4) § F. Lecture 4 hours. Schatzman
Introduction to history of sociological thought. Objective of the course is to provide perspective and vocabulary for examining major schools of thought which constitute sociological tradition. Discussion of conceptual frameworks and their relationship to theory will provide understanding of sociological work. SOC BEH SC

Opportunity to work with both theoretical and research questions on the subject of women’s participation in health and healing systems. Critical questions on appropriate method, relationship to theory, and articulation of questions will be considered. SOC BEH SC

239. Field Research as an Evaluation Method. (3) § F, W, Sp. Prerequisite: Sociology 214A and 214B. Lecture 3 hours. Schatzman, Olesen
Analysis of field work as evaluation method; as applied to health care settings and programs, contrasting this approach with quantitative methods predicated on analysis of outcomes. Conduct of such evaluative research, and relationship with audiences, such as policymakers, analyzed. SOC BEH SC

249. Studies in Sociology. (1-8) § F, W, Sp. Prerequisite: Consent of instructor. Staff
Students select special problems to investigate on an individual or collaborative basis. These studies may be conducted through readings, the collection or analysis of empirical data, or the development of conceptual analysis or of methodologies. SOC BEH SC

250. Research. (1-8) § F, W, Sp. Prerequisite: Admission to doctoral study and consent of instructor. Staff

298. Thesis or Comprehensive Examination. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of graduate adviser. Staff
For graduate students engaged in writing the thesis for the master’s degree or taking a comprehensive examination required for the master’s degree. SOC BEH SC

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. SOC BEH SC

Speech and Hearing Science

210. Fundamentals of Auditory Neurobiology. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Snyder, Merzenich
Reading and critical discussion of selected original research papers on the anatomy and physiology of the auditory system. Each level of the auditory nervous system from the periphery to the cortex will be considered in turn. OTOLARYN

220. Inner Ear Anatomy. (3) § W. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours. Staff
Consideration of the gross anatomy, histology, and fine structure of the mammalian cochlea and vestibular sense organs. Basic aspects of the phylogenetic and embryologic development of the ear will be included. Lectures, demonstrations, dissections, and student presentations. OTOLARYN
230. Seminar on Research in Speech Reception. (3) § W. Prerequisite: Consent of instructor. Seminar 3 hours. M. White

consideration of the significant features of the acoustic speech signal; transaction characteristics of the normal and pathological cochlea; and the neural encoding of important features of the speech signal at the eighth nerve and cochlear nucleus. OTOLARYN

231. Seminar on Research in Speech Production. (3) § Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Izdebski

Review of research on respiratory function in speech, phonation physiology, and articulation processes. Measurements and recording techniques of these functions with application to normal and pathological aspects of speech production are considered. OTOLARYN

247. Special Studies in Audiology. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-2 hours. Lab 0-3 hours. Owens

Directed reading and laboratory work in the auditory process and its disorders. OTOLARYN

249. Independent Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Flower, Owens and Staff

Students and instructor develop jointly a study plan involving tutorials, reading, and laboratory work. Students engage in intensive exploration of specific topics related to the anatomic, physiologic, psychophysical, and behavioral aspects of the speech and hearing sciences. OTOLARYN

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. OTOLARYN

Surgery

110. Required Core Clinical Clerkship in General Surgery. (1.5 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Surgery 110. Ebert, Blaisdell, L. Way, V. Richards

Core general clerkship in surgery. Students assigned to wards and clinics at UC, SFGH, VA, and C. The application of basic sciences, pathology, radiology, and psychiatry to surgery is emphasized in ward rounds and seminars. SURGERY

Students serve as senior clerk on the wards and in the operating rooms at UC, SFGH, and VA. Rounds and seminars focus on the physiological approach to surgery. SURGERY

140.01 Advanced General Surgery Clerkship. (1.5 per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111. T. Hunt, Trunkey, L. Way, V. Richards, Heer, Peter, P. Smith

Senior clinical clerks participate in clinic, ward, and operating room with direct involvement in postoperative and preoperative care at UC, SFGH, VA, C, RDMC, VMCC, and K. SURGERY

140.02 Clinical Clerkship. (1.5 per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111. Ebert

Clinical clerkship in approved hospitals in other universities by special arrangement and approval of the chairman of the department and the Dean. SURGERY

140.04. Vascular Surgery Clerkship. (1.5 per week) Su, F, W, Sp. Prerequisite: Medicine 110, Surgery 110 and 111. Goldstone

Students serve as acting interns on the vascular surgery team, participating in preoperative, intraoperative, and postoperative management of patients, as well as in clinics, rounds, and conferences. SURGERY

140.05. Operable Heart Disease. (1.5 per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111. UC B. Roe, VA Ellis

Ward rounds and conferences on patients with operable, congenital or acquired heart disease. Details of selection, differential diagnosis, and results of surgery are discussed. SURGERY

140.06. SFGH Emergency Clerkship (1.5 per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111. R. Lim and Teufel

Four weeks participation on the Emergency Ward at SFGH. Students will work up selected cases, perform minor procedures under supervision, and follow all surgical emergencies as time permits. SURGERY

140.07. Shock and Trauma Research. (1.5 per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111. Sheldon

Course involves clinical and laboratory investigation and a detailed study of specific patients with trauma and shock. SURGERY

140.08. General Surgery Clinical clerkship at C. (1.5 per week) Su, F, W, Sp. Prerequisite: Second- and third-year clinical clerkship in Surgery. V. Richards

Students work as interns on Surgical Service; they evaluate general surgical patients preoperatively; work with patients in operating room; assume graduated, increasing responsibility in postoperative management. Rounds and conferences enhance clinical experience; interaction with staff in patient care emphasized. SURGERY
140.09. Clinical Clerkship in Trauma Surgery. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111 and consent of instructor. Sheldon
Clinical clerkship in the trauma service of the Department of Surgery at SFGH. The student will work at intern-clerk level as an integral part of the service. SURGERY

140.10. Clinical Experience in Cardiothoracic Surgery. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or Surgery 110 or 111. Ellis
As an integral member of the cardiothoracic team, the student directly and actively shares in preoperative evaluation, operative procedures, and postoperative care. Cardiac and thoracic conferences and daily ward rounds provide the didactic teaching. SURGERY

140.11. Burn Care Elective. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110. Trunkey
Clinical rotation on a large Burn Center Service. Pathophysiology of thermal injury including pulmonary aspects will be stressed. Students act as integral members of the team and participate directly in patient care. SURGERY

Participation in clinical activities of plastic surgery. Students work on patients and take part in operative procedures, as well as manage the post-operative patient. Exposure to patients with general reconstructive problems; trauma to head and neck, hand surgery, and congenital anomalies. SURGERY

140.13. Clinical Clerkship in General Surgery at VA and Community Hospital in San Joaquin Valley (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111. O'Hara
Course provides broad clinical experience in general surgery in close association with practicing surgeons in a variety of settings in Central San Joaquin Valley with contrasting facilities and patient populations. Clerkship is individually designed according to the student's interests. SURGERY

160.03. Clinical Cardiopulmonary Surgery. (2) Sp. Prerequisite: Third- or fourth-year standing. Lecture 2 hours. Ebert, B. Roe, J. Hutchinson, N. Fishman
Seminar is conducted on a series of subjects relating to cardiopulmonary surgery, which may be attended separately or in conjunction with weekly rounds on cardiopulmonary patients. SURGERY

160.05. Advanced Surgery Reading Course. (2) F, Sp. Trunkey
A weekly seminar where previously assigned papers are discussed and critiqued. Papers representing the classical and current concepts in general surgery are covered. SURGERY

160.06. Total Parenteral Nutrition Clerkship. (5) Su, F, W, Sp. Prerequisite: Surgery 110 and consent of instructor. Lecture 3 hours. Lab 6 hours. Sheldon
Course emphasizes nutritional and metabolic requirements of injured, ill, and malnourished patients. Clinical rotation involves methods of preparation, administration, and assessment of patients receiving calorie protein or amino acid support as part of specific therapy. SURGERY

170.02. Emergency Medical Care at SFGH. (1) F. Lecture 2 hours given in alternate weeks. R. Lim and Staff
Topics include first aid care with an introduction to splinting, resuscitation, psychiatric and civil emergency. Format includes lectures, discussions, films, practice, and tour of Mission Emergency. Course is offered primarily for first- and second-year medical students. SURGERY

198. Supervised Study in Surgery. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Ebert and Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. SURGERY

199. Laboratory Project in Surgery. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Ebert and Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. SURGERY

400. General Surgical Staff Conferences. (1½) F, W, Sp. UC Ebert, SFGH Trunkey, VA L. Way
Conferences include presentation of case studies with reference to the literature, case records, laboratory tests, and special studies. Faculty and occasional guest lecturers discuss surgical problems. Death and complications are reviewed weekly. SURGERY

402. General Surgical Pathology Seminar. (1) F, W, Sp. Interns and residents. UC Rambo
Seminars include case reports and demonstrations of the currently available gross and microscopic surgical pathological material from the operating rooms and pathology laboratories. SURGERY

403. General Surgical Seminar. (2) Su, F, W, Sp. Interns and residents. RDMC Heer, SFGH Blaisdel, UC Ebert, VA L. Way
Seminar is held in the surgical wards with discussion of current problems concerning the diagnosis and management of general surgical patients. SURGERY

450. Clinical Surgery. (1½ per week) Su, F, W, Sp. UC Ebert, SFGH Trunkey, VA L. Way, RDMC Heer, C V. Richards
Residents, under supervision, are responsible for the preparation of case records, laboratory work, preoperative patient preparation, assistance at operations, postoperative care, and attendance at follow-up clinic. Senior residents have certain additional administrative, teaching, and clinical responsibilities. SURGERY
452. Experimental Surgical Laboratory. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 450 and 452 may not be taken concurrently.

UC Ebert, SFGH Trunkey, VA L. Way

Course includes experimental investigations of general surgical problems and the development of technical and laboratory methods to be applied in general surgery. SURGERY

453. Clinical and Experimental Surgery. (10)

Su, F, W, Sp. Ebert

Assistant residents in off-campus hospitals approved by the chairperson of the department and the Dean. Course includes clinical and experimental investigations of general surgical problems and the development of technical and laboratory methods to be applied in surgery. SURGERY

SFGH Trunkey

Interns rotate through the general surgical service, including the intensive care unit. Under the direction of the attending staff, experience is provided in vascular, chest, hand and plastic surgery, and surgery of maxillofacial injuries. SURGERY

UC Ebert

Interns, under supervision, are responsible for the preparation of case records, laboratory work, preoperative patient preparation, assistance at operations, postoperative care, and attendance at follow-up clinic. SURGERY

Teaching Methodology

Course provides resource information in the form of a systematic overview of educational technology. This information is introduced in conjunction with the development by the individual student of an actual microcourse, teaching a single skill. GEN DENT

Practical teaching experience in selected courses under the supervision of members of the staff. GEN DENT

180.02A-B-C. Teaching Methods. (0-3, 0-3, 0-3) F, W, Sp. Prerequisite: Fourth-year standing or consent of instructor. Lecture 1 hour. R. J. Miller

Predominantly group discussion based on selected readings in educational methodology. Specialists in education are invited to participate. Practical experience in teaching is included in Teaching Methodology 186.01A-B-C. Students teach in selected courses under supervision. GEN DENT

186.01A-B-C. Practice Teaching. (0-3, 0-3, 0-3) F, W, Sp. Lab 3 hours. R. J. Miller

Practical teaching experience in selected courses under the supervision of senior members of the staff. GEN DENT

Urology

Clinical clerkship in off-campus hospitals approved by the chairperson of the department and the Dean. UROLOGY

140.03. Urology Clinical Clerkship at VA. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110.

R. D. Williams

Students work as interns on the Urology Service at VA. They also attend rounds and scheduled seminars with residents and visiting staff. UROLOGY

140.04. Urology Clinical Clerkship at SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 100.

McAninch

Students work as interns on the Urology Service at SFGH. They also attend rounds and scheduled seminars with residents and visiting staff. UROLOGY

170.01. Fundamentals of Urology (2) F, W, Sp. Prerequisite: Consent of instructor.

Tanagho and Staff

Seminar and library research. UROLOGY

199. Laboratory Project in Urology. (1-5) F, W, Sp. Prerequisite: Consent of instructor.

Tanagho and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. UROLOGY

Tanagho

Seminar includes study of the basic sciences and urologic roentgenology with members of the attending staff. UROLOGY

Tanagho

Course includes experimental investigation in urologic problems. UROLOGY

Tanagho

Seminar includes discussion of diagnosis and treatment of patients in the urology wards with the attending staff. UROLOGY
403. General Urologic Staff Conference. (½)
Su, F. W. Sp.
Tanagho

Conference includes presentation and discussion of urologic problems by the house staff and faculty. UROLOGY

450. Clinical Urology. (1½ per week) Su, F. W.
Sp. UC Tanagho, SFGH McAninch, VA Meares

First-year residents care for patients in the wards and outpatient clinics. Second- and third-year residents, under supervision, perform instrumental examinations on clinic patients. Senior residents, under supervision, perform instrumental and surgical procedures and have administrative, clinical, and teaching responsibilities. UROLOGY

490. Clinical Urology. (1½ per week) Su, F. W.
Sp. SFGH McAninch
Interns rotate through urological wards. Under the direction of the attending staff they are responsible for the care of patients, including history-taking, physical examination, laboratory tests, and consultation. UROLOGY
