Courses

This chapter is a compendium of the courses of instruction offered by the University of California San Francisco. Courses are arranged in numerical order under alphabetically listed subject headings. As these headings do not in every case correspond to a department, the responsible department or other instructional unit is indicated at the end of the course description for each course. Abbreviations used for these departments or instructional units are spelled out in the list below.

Inquiries about individual courses should be addressed to the indicated department or instructional unit for information that is not included here, nor in the separately published bulletins of the four School's or of the Graduate Division. These bulletins, available from the respective Schools or the Graduate Division, indicate, for example, the place of various courses in the different established curricula. Faculty rosters may also be found in the bulletins of the four Schools.

Course Description—Course information is arranged in two paragraphs with periods separating items. The first paragraph includes course number, title, units in parentheses, session offered, prerequisite, format and breakdown of hours per week, and instructor in charge. The second paragraph describes the course content, followed by department or other instructional unit.

Course Numbers—All courses are numbered according to the following system: 100 series = upper division professional course, 200 and 300 series = graduate academic course, and 400 series = postdoctoral professional course. The meanings of the second (tens) and first (units) digits vary among the departments. A detailed explanation of course numbering is available from the Office of the Dean of each school. The symbol § following the units designates a course approved for credit toward a graduate academic degree.

Sessions—Su = summer term, SS = summer session, F = fall quarter, W = winter quarter, Sp = spring quarter.

Departments and Other Instructional Units

</table>
The structure and function of the mammalian nervous system studied in lectures, conferences, demonstrations, and laboratories, with emphasis on the human nervous system and its organization. Intended for students in the School of Medicine and as an introductory course for graduate students. ANATOMY

115. Histology. (3) § W. Lecture 2 hours. Lab 3 hours.  
J. Elias
A study of the microscopic structures of the tissues and organs of the human body by means of lectures, demonstrations, and microscope slides. Functional aspects of the structures are stressed. ANATOMY

Sutherland
A study of the macroscopic structure of the human body by means of lectures and dissections. Functional aspects of the structures are stressed. ANATOMY

117A-B. Gross Anatomy. (4-6) § F, W, F: Lecture 2 hours. Lab 6 hours. W: Lecture 3 hours. Lab 9 hours.  
Coleman
Gross anatomy of the trunk, upper extremity, and the head and neck is studied by laboratory dissection and demonstration. The course includes an introduction to neuroanatomy. Emphasis is placed on the functions of the structures and systems examined. ORAL MED

118. General Histology. (3) § F. Lecture 2 hours. Lab 3 hours.  
Christie
The microscopic structure of tissues and organs of the body is studied in relationship to their histophysiological considerations. ORAL MED

150.01. Gross & Regional Anatomy. (1½ per week) § SS2, F, Sp. Prerequisite: Program must be approved by department and adviser during quarter previous to enrollment.  
Asling
Individual or group dissection; review of gross anatomy. ANATOMY

156A. Hum Anat: Trunk & Upper Extrem. (3) F. Lecture 2 hours. Lab 3 hours.  
W. Kaiser
The gross structures of the trunk and upper extremity are studied through demonstration dissections. Consideration is given to the functional significance of the structures studied. ORAL MED

156B. Hum Anat: Head, Neck & CNS. (4) W. Lecture 3 hours. Lab 3 hours.  
W. Kaiser
The gross structures of the head, neck, and central nervous system are studied through demonstration dissections. Consideration is given to the functional significance and clinical applications of the structures studied. ORAL MED

170. Advanced Head & Neck Anatomy. (1-5) Sp. Prerequisite: General histology, gross anatomy of the head and neck, and oral anatomy. Lecture 1 hour. Lab 0-12 hours.  
R. D. Coleman
Designed for postgraduate specialty certificate students enrolled in the clinical specialty training programs in the School of Dentistry. Seminar presentation and demonstrations of head and neck anatomy are correlated with their application to clinical dentistry. ORAL MED

170.01. Problem Areas in Clin Anatomy. (1) Su, F, W, Sp. Prerequisite: Anatomy 100 or concurrent enrollment. First-year standing in School of Medicine.  
Lindner
Discussion of important areas in clinical anatomy such as hernia, thyroid, perineum, and peritoneal cavity. Course is correlated with Anatomy 100. ANATOMY

170.02. Survey of Congenital Defects. (2) W. Prerequisite: Gross anatomy and consent of instructor. Lecture 2 hours.  
Monie, R. Armstrong, I. Gilbert
This elective course provides information on the more common human congenital defects. Environmental and genetic factors
which produce malformations are considered and possible mechanisms discussed. Course is intended primarily for physical therapy students. ANATOMY

170.04. Applied Gross Neuroanatomy. (2) Sp. Prerequisite: Anatomy 103 or concurrent enrollment, or consent of instructor. Lecture 1 hour. Lab 3 hours. deGroot

A laboratory-oriented consideration of the anatomy of the human brain and spinal cord. Discussion of case histories is correlated with basic neuroradiology and neuropathology. ANATOMY

170.08. Regional & Topographical Anatomy. (1) F, W. Prerequisite: Second- and third-year medical students. Lecture 1 hour. Lindner

Living clinical anatomy is stressed; the diaphragm, complete review of the neck, and abdominal contents. Clinical congenital anomalies are discussed in detail regarding their relationship to clinical medicine. ANATOMY

170.09. Language of Anatomy. (1) § Su. F, W. Prerequisite: Concurrent enrollment in Anatomy 100. Asling

A three-component elective, fostering vocabulary-building in anatomico-medical terminology, reflecting history of medical and cultural themes influencing development of anatomical nomenclature, and through student oral reports on eponymous terms, introducing some major figures in anatomy. ANATOMY

Course covers anatomy as it relates to anesthesia and periodontal surgery. ORAL MED

172. Clin Anat through Cross-Section. (2) § Sp. Prerequisite: Anatomy 100. Not open to first-year medical students. Lecture 1 hour. Lab 3 hours. Asling

Clinically oriented survey of human anatomy through analysis of representative cross-sections of the body. Course provides an anatomical background for understanding computed tomograms. Student will prepare and keep an anatomy atlas usable in radiology. ANATOMY

175. Congenital Abnormalities. (2) § W. Prerequisite: Anatomy 100 or equivalent and consent of instructor. Seminar 2 hours. Monie, T. Lin

Weekly seminars on experimental teratogenesis as a tool to understanding the formation of congenital abnormalities in man. ANATOMY

180. Lower Extremity Anatomy. (1-2) Sp. Prerequisite: Anatomy 117A-B. Lab 3-6 hours. Savostin-Asling

Course is designed to supplement required course work in anatomy (School of Dentistry) with additional dissection of the lower extremity. ORAL MED

198. Supervised Study. (1-5) § Su, F, W, Sp. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. ANATOMY

199. Laboratory Project. (1-5) § Su, F, W, Sp. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ANATOMY

201. Radiat Effects on Genes & Chrom. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. S. Wolff

Concepts and mathematics of target theory relating to damage of genetic apparatus. Biophysical and biochemical studies on induction of intragenic and intergenic mutations that give insight into the structure of chromosomes and the interaction of radiation with biological material. ANATOMY

202. Tissue Culture Meth in Biol Res. (1) § W. Prerequisite: Basic knowledge of biological principles and consent of instructor. Lecture 1 hour. Elias, R. Armstrong

Course covers potentials and limitations of culture methods, advantages of assessing effects of various agents (e.g., hormones and vitamins) in controlled environment and use of culture methods with other research tools (e.g., autoradiography or electron microscopy). Papers will be discussed. ANATOMY

203. Techniques in Cell Biology. (2 or 3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Enrollment limited for optional lab 3 hours. Offered in alternate years. Rosen, S.

Introduction to the techniques of light microscopic and ultrastructural histochemistry: immunochemistry; chromatography; electrophoresis; subcellular fractionation; radioisotopes; and binding studies. Laboratory sessions will provide practical experience in these areas. ANATOMY

204. Cytogenetic Techniques. (3) § Sp. Prerequisite: Consent of instructor. Lab 6 hours. Wolff, S.

Course covers instruction in various methods of chromosome banding as well as cell cycle analysis by autoradiography. ANATOMY

205. Biology of Mammalian Development. (3) § F. Prerequisite: Undergraduate course in embryology or consent of instructor. Lecture 3 hours. Martin, G. R.

Aspects of preimplantation and postimplantation mammalian development are considered. Topics include gametogenesis, fertilization, cleavage, in vitro development, implantation, placentaion, differentiation, tissue interaction, fetal development of systems, and teratogenesis. ANATOMY

An advanced presentation of the relationships between structural organization and the physiological activities of cells. Assigned readings, lectures, and seminar discussions are included. ANATOMY

216. Developmental Biology. (1-4) § F, W, Sp. Prerequisite: Consent of instructor. Enrollment limited. L. Glass

Laboratory or library research in mammalian embryology or directed reading on current developments in gametogenesis, fertilization, cleavage, implantation, organogenesis, or molecular differentiation. ANATOMY

217. Adv Head & Neck Anatomy for Dent. (2-6) § Sp. Prerequisite: Anatomy 117 A-B or equivalent and consent of instructor. Lecture 2 hours. Lab 0-12 hours. R. D. Coleman

A critical analysis of selected topics and methods in head and neck anatomy. Topics are correlated with appropriate laboratory experience and are presented by students, staff, and guests. ORAL MED

220. Anatomy Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Staff

Students, staff, or guests present selected topics concerned with current research in anatomy for criticism and discussion. ANATOMY

225. Experimental Neuroanatomy. (4) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Lab 3 hours. Offered in alternate years. H. Ralston

Examination of the neural organization of the central and peripheral nervous systems, and methods available for experimental analyses of that organization. Topics include neurocytology, axon transport, neural degeneration and plasticity, histochemistry, and immunocytochemistry. Analysis and interpretation of original research literature. ANATOMY

A seminar series dealing with current literature in neuroanatomy and neurophysiology. ANATOMY

231. Devel of Cellular & Molec Biol. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Offered in alternate years. Offered 1982-83. Calarco

Molecular and cellular events relating to differentiation and development. A variety of developmental phenomena will be surveyed and related to genetic and epigenetic control mechanisms. ANATOMY

233. Mammalian Chimeras. (3) § Sp. Prerequisite: Anatomy 204 or consent of instructor. Lecture 3 hours. Offered in alternate years. Offered 1982-83. Pedersen

Course focuses on procedures for producing mammalian chimeras and the use of chimeras in analysis of development. Topics to be covered include analysis of parthenogenesis, cell commitment, differentiation, growth control, neoplasia, germ cells, and reproduction. ANATOMY

235. Developmental Neurobiology. (1-3) § W. Prerequisite: Consent of instructor. Lecture 1-3 hours. Offered every three years. Offered 1982-83. J. LaVall, M. LaVall, L. Reichardt

Principles involved in the structural and functional development of the nervous system as well as detailed consideration of the development of several specific regions of the mammalian central nervous system. Lectures, student presentations, and discussions of classical and current literature. ANATOMY

250. Research. (1-6) § F, W, Sp. Staff

ANATOMY

273. Biol Scanning Electron Micros. (1) § W. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 2 hours for three sessions. Enrollment limited. J. Long, A. Jones

Principles of scanning electron microscopy including tissue preparative techniques and applications. Laboratory sessions include participation in preparing and viewing biological specimens. ANATOMY

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree. ANATOMY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. ANATOMY

300. Practicum in Teaching. (1-4) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Training in teaching in a course offered by the Department of anatomy under the supervision of instructor in charge. Laboratory teaching, presentation of lecture material, experience in setting up and correcting of examinations, and participation in course are included. ANATOMY

400. Clin Anat through Cross-Section. (2) Su. Prerequisite: Open to house staff members of UC hospitals. Lecture 1 hour, Lab 3 hours. Asling

Clinically oriented survey of human anatomy through analysis of representative cross-sections of the body. Course provides an anatomical background for understanding computed tomograms. Student will prepare and keep an anatomy atlas usable in radiologic tomography. ANATOMY

Anesthesia

110. Anesthesia Core Clerkship. (3) Su. F, W. Prerequisite: Medicine 130, 131 A-B-C, Physiology 100, Pharmacology 100 A-B, and Psychiatry 130. Strong
Instruction and experience in operating room anesthesia including preoperative and postoperative evaluation and care. Cardio-pulmonary resuscitation and care of the unconscious patient are stressed. The course is given at SF GH, UC, VA, C, FR, and AB hospitals. ANESTHESIA

140.01 Advanced Anesthesia Clerkship. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Anesthesia 110. Strong

Instruction and experience in cardiopulmonary resuscitation, care of the unconscious patient, and treatment of pain problems. Rotation through UC, SF GH, and VA. Attendance at the teaching conferences of the department. ANESTHESIA

140.02 Off-Campus Clerkship. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Anesthesia 110. Strong

Clinical clerkships in approved hospitals by special arrangement and approval of the chairperson of the department. ANESTHESIA

140.03A. Intensive Care Clerkship-SFGH. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Anesthesia 110 and/or consent of instructor. Schlobohm

Course is designed to familiarize the student with techniques of intensive care with emphasis on clinical, renal, respiratory, and circulatory physiology applied to support of patients with cardiopulmonary insufficiency. ANESTHESIA

140.03B. Intensive Care Clerkship-UC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Anesthesia 110 and/or consent of instructor. Don

Course is designed to familiarize the student with techniques of intensive care with emphasis on clinical, renal, respiratory, and circulatory physiology applied to support of patients with cardiopulmonary insufficiency. ANESTHESIA

140.04. Anesthesia Obstetrical Clerkship. (1 1/2 per week) Su, F, W. Prerequisite: Anesthesia 110, Obstetrics and Gynecology 110, and consent of instructor. Shinder

Course covers anesthesia and analgesia for vaginal delivery and cesarean section. Emphasis is placed on effects of anesthetic techniques and drugs on normal physiologic changes in labor and delivery, placental transfer of drugs, and resuscitation of the newborn. ANESTHESIA

178. General Anesthesiology. (6) Sp. Prerequisite: Interns and residents. Clinic. Hamilton and Staff

Course covers the systemic effects of the various muscle relaxants, sedatives, and stimulants and the administration of general anesthetic agents. ANESTHESIA

199. Laboratory Project. (1 1/2) Su, F, W, Sp. Eger

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ANESTHESIA

400. Anesthesia Staff Conference. (2) F, W, Sp. Stevens, R. D. Miller

Course includes didactic lectures in sciences basic to the specialty of anesthesia, as well as case reviews, clinical discussions, and seminars on current medical literature in anesthesia. ANESTHESIA

450. Anesthesia Clinical Work. (1 1/2 per week) Su, F, W, Sp. Required during first year of residency, and during either second or third year. W. Hamilton

Residents are responsible for anesthetic care and management of patients in the operating rooms and outpatient departments, under immediate supervision of the staff. Pre-operative and post-operative evaluation of patients, oxygen therapy, and resuscitation are covered. ANESTHESIA

460. Special Assignment. (1 1/2 per week) Su, F, W, Sp. Elective for residents during either second or third year. UC Eger

Assignments include instruction in anesthesia for children, problems related to open heart surgery, cardiology, and opportunity for research in related fields. ANESTHESIA

Animal Science

162. Principles of Animal Lab Science. (3) § W. Lecture 1 hour. Lab 6 hours. Spinelli

Introduction to the selection, anatomical and physical peculiarities, and preoperative and postoperative care of animals. Laboratory experiments in anesthesia, surgical exercises, drug administration, perfusion techniques, and individual experiments are included. PHARMACY

Anthropology

205A-B. Intro to Sociocultural Aspects. (3-4, 3-4) § F, W. Prerequisite: intended primarily for doctoral students in medical anthropology, and others at graduate standing with consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Required for and open only to first-year students in the UCSF Ph.D. Program in Medical Anthropology. Two-quarter course. Ablon, Todd

Seminar in the history and theory of social anthropology as applied to problems of health and illness. Major concepts and problems will be illustrated through critical review of selected research literature. EPID INTL HLTH

206A-B. Intro to Biomedical Anthropology. (3-4, 3-4) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Open only to first-year students in the intercampus program in Medical Anthropology. Required for students in the UCSF Ph.D. Program in Medical Anthropology.

F. Dunn (F), Pawson (W)
Survey of the biocultural areas of medical anthropology; anthropology in relationship to biomedicine and human biology. EPID INTL HLTH

211A-B. Research Training Seminar. (3-4, 3-4, 3-4) 1 F,W,Sp. Prerequisite: Consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Required for and open only to first-year students in the UCSF Ph.D. Program in Medical Anthropology.

M. Clark, Lewin, Ablon

Fundamentals of anthropological research design and methods through lectures, readings and field assignments. EPID INTL HLTH

212A-B-C. Research Apprenticeship. (2-5, 2-5, 2-5) 1 F, W, Sp. Prerequisite: Consent of instructor. Lab 6-15 hours. Staff

Students work with individual faculty members in ongoing research projects. Each student will work on supervised data collection and analytical tasks, and a broader range of research activities, such as problem formulation, grant preparation, sampling, and research design and execution. EPID INTL HLTH

216. Research Design. (3) 1 F, W. Lecture 2 hours. Lab 3 hours. Nydegger

Workshop format, utilizing student research interests. Topics include model building; problem formulation; design of research strategies; evaluation of sampling methods; operationalization of concepts; special problems for qualitative data. Course is preparatory for anthropological statistics. EPID INTL HLTH

217. Statistics. (2) 1 F, W, Sp. Prerequisite: Anthropology 216. Lecture 2 hours. Lab 3 hours. Mitteness

Introduction to statistical methods for the social sciences: measurement, selected data characteristics, probability theory, statistical models, descriptive statistics, the general linear model, analysis of qualitative data. Emphasis is on understanding fundamental assumptions and procedures of statistical methods relevant to anthropology. EPID INTL HLTH

218. Computer Methods. (3-4) 1 Sp. Lecture 3 hours. Lab 0-3 hours. Staff

An introduction to data processing methods most commonly used by medical anthropologists. Topics covered in lecture and laboratory demonstrations include: how a computer works, data form design, keypunching, use of SPSS and HMD program packages, and interpretation of computer output. EPID INTL HLTH

220. Selected Topics. (0) 1 F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Staff

Students, staff, or guest lecturers present selected topics based on their current work. EPID INTL HLTH

221A-B. History & Theory of Anthropology. (3-3) 1 F, W. Prerequisite: Consent of instructor. Generally limited to students in anthropology. Lecture 3 hours. Staff

A review of the history and development of anthropology and its major theoretical approaches. Lectures, discussion, and readings focus on major issues, trends, personalities, and present concerns in the field. EPID INTL HLTH

222A-B-C. Writing Skills. (1.5, 1.5, 1.5) 1 F, W, Sp. Prerequisite: Open to Medical Anthropology graduate students only. Lecture 1.5 hours. Course may be repeated for credit.

Todd

Students submit papers for editorial comment and advice on style, organization, grammar, syntax, and proper scholarly form. Course includes lectures, informal group discussions on problems encountered in writing papers, and some assigned and recommended readings. EPID INTL HLTH

223. Social Network Analysis. (3) 1 F, W, Sp. Prerequisite: Consent of instructors. Lecture 2 hours. Independent study 3 hours.

Todd, Lewin

Examination of origins and development of network analysis and the uses to which it has been put, particularly in urban anthropological research; methods and measures for gathering and analyzing network data; applications of network analysis to health and illness behavior. EPID INTL HLTH

225. Contemporary Issues. (2-4) 1 F, W. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units. Staff

Introduction to selected controversies and current issues in medical anthropology, including sociology: sociocultural impact of high technology medicine; abortion, euthanasia and the right to life; status of research on the etiology of mental disorders: advocacy, praxis and the social scientist. EPID INTL HLTH

G. Becker, Ablon

Examination of social attributes of stigma to such conditions as deafness, alcoholism, obesity, dwarfism, mental and physical disabilities. Self-help groups organized around such conditions will be examined. Guest speakers who have experienced these conditions will contribute to the course. EPID INTL HLTH

230. Culture & Personality. (2-3) 1 F, Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units.

Kiefer

Exploration of the relationship between culturally conditioned ways of perceiving, thinking, and communicating, and individual behavior and personality development. Application of cultural and personality findings in medical and nursing settings. EPID INTL HLTH

231. Ethnopsychiatry. (2-5) 1 F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units.

M. Clark, Hartog, Maduro
Course examines principles of healing systems in the treatment of mental disorder including folk healing, cross-cultural comparisons, research methods, and implications for community psychiatry. Students study local examples of folk healers or folk healing institutions. EPID INTL HLTH

233. Anthropology of Aging. (2-3) § F. W. Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus research project for 3 units.

Cross-cultural approaches to roles, statuses, and problems of aged populations. Cultural factors influencing the condition and adaptation of the aged in American society. Topics to be covered include cultural attitudes and values, social relationships, and health problems. EPID INTL HLTH

234. Culture & Symbolic Systems. (2-3) § F. Prerequisite: Anthropology 230A or equivalent, or consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units.

Symbolic expressive behavior is considered from psychocultural life-cycle and psychoanalytic perspectives. Various projective systems are analyzed: psychological tests, dreams, folklore, myths, religious rituals, altered states of consciousness, and healing procedures. EPID INTL HLTH

235. Transcult Aspects of Childhood. (2) § F. Prerequisite: Consent of instructor. Open to students in medicine, nursing and graduate departments. Lecture 2 hours, plus research paper.

Review of child development, child rearing and family dynamics in various non-Western cultures and in selected ethnic subcultures of the United States. Cultural contexts of personality formation, deviations in development, and childhood illness will be discussed. EPID INTL HLTH

236. Women & Sex Roles. (3) § F. W. Prerequisite: Consent of instructor. Lecture 3 hours.

An examination of the significance of gender in the social organization and culture of non-Western and contemporary societies, including both cross-cultural study of economic, political, and religious systems, and in depth discussion of specific ethnographic areas. EPID INTL HLTH

238. Shamanism & Related Phenomena. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours.

A cross-cultural survey of the practice of shamanism with emphasis on management of disease. Beliefs and practices concerning disease causation, diagnosis, and therapy will be compared with approaches used in other medical systems. Comparison of the shamanistic use of trance. EPID INTL HLTH

239. Comparative Family Systems. (3) § F. W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study.

Survey of conceptual approach to family study and modes of family assessment. Structure and dynamics of varying family systems examined, emphasizing changing family forms and ways family life style and values contribute to modes of coping with stress, illness, and crises. EPID INTL HLTH

240. Urban Anthropology. (2-3) § F. W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units.

The culture of modern cities. Evaluation of theories and methods for understanding urban behavior. Ethnic, racial, and subcultural pluralism in modern cities. The relevance of anthropological concepts for health planning. EPID INTL HLTH

241. Social Deviance. (3) § F. W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus field research project.

A review of theory and concepts dealing with social and cultural deviance. Focus will be on deviant life styles and subcultural groups in urban areas. EPID INTL HLTH

242. Com Mental Hlth Considerations. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours.

A survey of principles and practice in the community mental health field. Emphasis is on the significance of sociocultural factors in the determination of community needs and the delivery of mental health services. EPID INTL HLTH

243. Interfaces between Law & Med. (2-3) § Sp. Prerequisite: Consent of instructor. Lecture 2-3 hours.

Todd, Ruffini

Cross-cultural survey of problems at law–medicine interface, including medical determinants of legal status; complementary/conflicting approaches to alcoholism, drugs, sexual conduct; therapeutic functions of social control procedures such as witchcraft, gossip; conflicts between religious beliefs and medical/legal practices. EPID INTL HLTH

244. Legal Gerontology. (2-3) § F. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units.

Todd, Ruffini

A cross-cultural examination of the legal problems, needs, and behavior of the elderly, in the contemporary United States. Concepts, theories, and methods drawn from anthropological, legal, medical, and gerontological literature. EPID INTL HLTH

245. Development in Late Adulthood. (3) § F. Lecture 2 hours. Lab 3 hours.

Kayser-Jones

Course covers developmental theory and research in aging. Emphasis is on anthropological and sociological studies, but biological and psychological perspectives are included. Current issues in aging with emphasis on implications for health care are discussed. EPID INTL HLTH

246. Comparative Medical Systems. (2-3) § Sp. Prerequisite: Consent of instructor. Lecture 2-3 hours.

Staff
A comparative examination of traditional and contemporary systems of health care delivery with special attention to theories of disease, including notions regarding etiology, prophylaxis, treatment and treatment settings, and the therapeutic encounter. Experience in field and clinical observation included. EPID INTL HLTH

247. Contemporary American Society. (3) § F, W, or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study.

A review of anthropologically oriented research on basic American values, social organization, and ethnicity. Emphasis is on socio-economic diversity and changing institutions, values, and life styles. EPID INTL HLTH

248. Group Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Groups of two or more collaborate on special problems in anthropology under the direction of faculty. Students may select areas related to their long-term interest and future research program. EPID INTL HLTH

249. Directed Reading. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Independent study. EPID INTL HLTH

250. Research. (1-8) § F, W, Sp. Prerequisite: Consent of instructor. Staff

EPID INTL HLTH

251. Social Gerontology. (2-4) § W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units. C. L. Johnson, Todd

An overview of the theoretical, empirical, and applied literature on the social processes of aging in this country. Special emphasis on health-related problems and the delivery of services to the elderly. EPID INTL HLTH

255A-B-C. Intercampus Seminar with UCB. (2-4, 2-4, 2-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units. Intercampus seminar with UC Berkeley.

M. Clark, F. Dunn

A review of the principal fields of medical anthropology with emphasis on current research and methods. EPID INTL HLTH

260. Epidemiology & Med Anthro. (2-4) § Sp. Prerequisite: Training in epidemiology and consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units.

Individual or small group directed reading and discussion of epidemiological and medical ecological perspectives, methods, and findings relevant to the field of medical anthropology. EPID INTL HLTH

263. Biol Perspec on Growth & Devel. (1) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Pawson

Examination of the human growth process with emphasis on cellular growth and differentiation; biochemical basis of the growth process; critical periods of growth—fertilization, implantation, prenatal development, birth, early postnatal development, adolescence, senescence; and developmental adaptation and racial differences in growth. EPID INTL HLTH

267. Nutritional Anthropology. (2-3) § F, W, or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus research paper for 3 units. C. S. Wilson

Survey of past and current research on sociocultural and biocultural aspects of diet and nutrition in developed and developing countries in lecture-seminar format. Methodology for nutritional anthropology field studies will be presented. EPID INTL HLTH

270. Research in Population. (2) § W, Lecture 2 hours. Ernstner

Population research issues and methods, covering sources of demographic data and studies on family planning, evaluation of the impact of birth control programs on population and health, and considerations relevant to the use and acceptability of contraceptive methods. EPID INTL HLTH

297. Special Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Independent study. EPID INTL HLTH

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate advisor. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. EPID INTL HLTH

Biochemistry

100A-B. Cellular Structure & Function. (5-5) § F, W. Prerequisite: Consent of instructor. Michaeli

Lectures and conferences in biochemistry and molecular biology presenting fundamental knowledge and illustrating its applicability to medicine. Primarily for medical students. BIOCHEM

110A-B. Cellular Structure & Function. (4-4) F, W. Lecture 4 hours. Watson

Lectures in biochemistry include aspects of cell physiology and cellular ultrastructure, with emphasis on the area of connective and mineralizing tissues. Fundamental knowledge is presented in the context of its applicability to clinical health sciences. Primarily for dental students. BIOCHEM

111. First-Year Special Study. (2) F. Prerequisite: Passing of placement examination and consent of instructor. Lecture 2 hours. Newburn, Beirne, Bhatnagar

Discussion of biochemical problems of interest in dentistry including enamel, saliva, mineralization, connective tissue, bacterial cell walls, and oral bacterial metabolism. BIOCHEM
200B. Membranes. (1½) § W. Prerequisite: Calculus, physical chemistry, organic chemistry, introductory biochemistry, and an advanced course in biophysics. Lecture 3 hours.

R. Kelly
Membrane architecture and biogenesis, organelle isolation, glycosylation of membrane components, endocytosis and secretion, membrane enzymes and the reconstitution of membranes. BIOCHEM

200D. Protein & Nucleic Acids. (3) § F. Prerequisite: Calculus, physical chemistry, organic chemistry, and an advanced course in biology are recommended. Lecture 3 hours. Offered in alternate years. Not offered in 1982-83.

Fletterick and Staff
A comprehensive course covering the chemistry of proteins, carbohydrates and nucleic acids. Structure, sequence determination and chemical modification are emphasized. BIOCHEM

200E. Enzymology. (3) § F. Prerequisite: Calculus, physical chemistry, organic chemistry, introductory biochemistry, and an advanced course in biology, or consent of instructor. Lecture 3 hours. Offered in alternate years. Offered 1982-83.

Santi, Kenyon
Biochemically important chemical transformations from the physical organic point of view, emphasizing catalytic mechanisms pertinent to enzymic reactions, and to the development of enzyme model systems. Inter-molecular forces and enzyme substrate interactions. Techniques of investigating enzyme mechanisms and kinetics. BIOCHEM

210A-B. Molecular Genetics. (1½, 3) § W, Sp. Prerequisite: Calculus, physical chemistry, organic chemistry, introductory biochemistry and an advanced course in biology. Lecture 3 hours.

K. Yamamoto
Discussion of the discovery of principles forming the foundation of molecular biology and recent advances in rapidly developing areas of the field. Topics covered include DNA transcription, protein translation, DNA replot,
ious approaches to biochemical and biophysical research. BIOCHEM

220. Selected Topics. (0) § F, W, Sp. Lecture 1 hour.  
Alberts
Lectures and discussion on topics of current interest in biochemistry and biophysics. BIOCHEM

221. Selected Topics. (0-1) § F, W, Sp. Lecture 1 hour.  
Staff
Presentations of selected topics in biochemistry by graduate students in the Department of Biochemistry. BIOCHEM

240. Macromolecule Struc & Dynamics. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Offered in alternate years. Offered 1982-83.  
A.R. Cooke, Stroud
Consideration of the structure, dynamics and function of macromolecules along with a treatment of the methods used to probe aspects of molecular organization and dynamics. Emphasis will be on modern E.M., X-ray and fluorescence, and magnetic resonance methods. BIOCHEM

242. Structural Analysis. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Offered in alternate years. Not offered 1982-83.  
Stroud
Principles of X-ray crystallography applicable to protein structure analysis will be presented in a course oriented toward research level understanding of the field. Course will involve group participation and some experimental work. BIOCHEM

Kirschner, Alberts, R. Kelly
Modern aspects of biochemical basis of cell biology and development will be examined with emphasis on spatial organization and morphogenesis. BIOCHEM

BIOCHEM

297. Special Study. (1-3) § F, W, Sp. Staff  
Reading and conferences for properly qualified students under the direction of a member of the staff. BIOCHEM

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.  
Staff
For graduate students engaged in writing the thesis for the master's degree. BIOCHEM

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.  
Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. BIOCHEM

Biomaterials

110B-C. Biomaterials Science. (1.1) W. Lecture 1 hour. Jendresen
Students are introduced to the physics, chemistry, and metallurgy of materials used in dentistry and how use affects physical and chemical properties of materials. The materials systems studied are gypsum, cements, resins, waxes, colloids, and metals. RESTOR DENT

120. Biomaterials Science. (1) W. Lecture 1 hour. Jendresen
Students are presented with the rationale for the use of clinical restorative materials. Each major restorative material system is studied in respect to material manipulation and clinical application. RESTOR DENT

Students are taught to analyze accurately clinical and laboratory problems with respect to major material systems. Emphasis is placed on understanding why clinical failures occur with selected materials and what biological responses can be expected. RESTOR DENT

156. Dental Materials Survey. (1) Sp. Lecture 1 hour. Lab 1 hour.  
Bertolotti
An introduction for the dental hygienist to the basic concepts associated with selected dental materials. Emphasis is placed on the use and manipulation of materials commonly used in the practice of dentistry. RESTOR DENT

170A-B. Biomaterials Science. (2-2) F, W. Seminar 2 hours. Open to Dental residents, postdoctoral and postgraduate students only.  
Jendresen
Course covers biomaterials science as applied to clinical restorative dentistry with emphasis on restorative material selection and use, based on acceptable physical and biological properties. Current research and new restorative materials will be discussed. RESTOR DENT

A survey of current research in the dental materials field, including evaluations of recently introduced materials and a review of the limitations and indications for all basic materials commonly used. RESTOR DENT

181. Cosmetic Dentistry. (1) F, W. Prerequisite: Consent of instructor. Lecture 1 hour.  
Lacy
Review of a variety of materials and techniques related to the delivery of cosmetic or esthetic dentistry. New materials and procedures in both operative dentistry and fixed prosthodontics are emphasized. RESTOR DENT

190. Laboratory Project. (1.5) F, W, Sp. Prerequisite: Third- or fourth-year standing and approval of the Dean. Lecture 1 hour. Lab 0.12 hours.  
Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT
Biomathematics

180. Algebra & Calculus for Biomed. (3) § W. Prerequisite: Consent of instructor.

Licko

Mathematical concepts and processes for planning, representation, and analysis in biomed research. Review of algebraic operations, equations, matrices, and graphs. Introduction to functions, sequences, convergence, derivatives, integrals, and infinite series. Applications to growth, binding, enzyme kinetics, tracer studies, population dynamics.

BIOCHEM

189. Diff Equations for Biomed Use. (3) § W. Prerequisite: Introductory calculus. Lecture 3 hours.

Glantz

Course covers description of biomedical processes such as cardiovascular physiology, pharmacokinetics, instrumentation with ordinary differential equations; direct methods to solve equations and interpret the results; linearity origins of exponential, natural logarithm, sine and cosine functions; eigenvalues, time constants, and half-times.

MEDICINE

190. Biolog Modeling through Diff Eqn. (3) § F. Prerequisite: Biomathematics 180 or equivalent. Lecture 2 hours. Lab 3 hours.

Licko

Development of intuitive notions regarding differential equations. Quantitative and qualitative aspects of differential equations are explored by analog, digital, and analytic techniques. Applications to selected problems in compartmental analysis, enzyme and drug kinetics, and metabolic and biological control dynamics.

BIOCHEM

191. Laplace & Fourier Transforms. (3) § Sp. Prerequisite: Biomathematics 189 or equivalent. Lecture 3 hours.

Glantz

Course covers Laplace transform and numerical solutions of differential equations; Fourier transform and spectral analysis of biological signals; impulse, step, and frequency response; introduction to curve fitting; examples from pharmacokinetics and common laboratory instrumentation.

MEDICINE

Martinez

BIOCHEM

198. Supervised Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor.

Martinez and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the division.

BIOCHEM

214. Endocrine Dynamics. (3) § W. Prerequisite: Biomathematics 193A-B-C or equivalents, or consent of instructor.

Licko

Review of relevant parts of compartmental and tracer analysis and control theory. Analysis of dynamics of secretory process, distribution, binding and metabolism of hormones, and hormonal control. Differential equations and both analog and digital computers are utilized throughout the course.

BIOCHEM

Biophysics

Staff

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree.

Biostatistics

Staff

An introductory course for those interested in learning statistics to evaluate better the literature in their fields. A working knowledge of algebra will be assumed. Topics include descriptive statistics, estimation, tests of hypotheses and measures of association.

EPID INTL HLTH

J. Hoffman and Staff

An introduction to probability and statistical inference including analysis of variance, simple linear regression and analysis of discrete data. Course is intended for those who may need to use statistics in their work or who plan further work in statistics.

EPID INTL HLTH

201. Qual & Categorical Data Methods. (3) § F. Prerequisite: Biostatistics 183 or equivalent. Lecture 3 hours.

G. Fein

Course will focus on data analysis of studies in which summary statistics are rates and proportions. Topics include sample size, cross-sectional study design and analysis, prospective samples and misclassification errors.

EPID INTL HLTH

210A. Regression Analysis. (3-4) § W. Prerequisite: Biostatistics 185 or equivalent. Lecture 3 hours. Lab optional 0-3 hours.

Hargreaves, Hellbron

Course covers the uses of multivariable regression techniques, focusing on the choice of technique and interpretation of results rather than on mathematical development of the methods. Design of experiments is stressed with appropriate emphasis on power analysis.

EPID INTL HLTH

210B. Regression Analysis. (3-4) § Sp. Lecture 3 hours. Lab 0 or 2 hours.

Hargreaves, Hellbron

---

1See Biochemistry 202 and 203.

2See the Biophysics and Medical Physics Group Program in the Graduate Division Bulletin.
Continuation of the material and approach of Biostatistics 210A. Topics include analysis of variance and co-variance (primarily from a regression standpoint), repeated measures analysis of variance, and regression analysis of a dichotomous response variable. EPID INTIL HLTH

Presentation of analysis of variance methods for experimental data. Topics include factorial designs, randomized blocks and repeated measures designs. EPID INTIL HLTH

213. Multivariate Methods. (3) § F. Prerequisite: Biostatistics 183 or equivalent. Lecture 3 hours. Bostrom

Course covers multivariate methods from several areas such as multivariate analysis of variance, factors analysis and classification methods. Emphasis will be on application and interpretation of these procedures with real data. EPID INTIL HLTH

214. Nonparametric Methods. (3) § W. Prerequisite: Biostatistics 183 or equivalent. Lecture 3 hours. Heilbron

This intermediate level course considers the more common and useful distribution free methods from an applications standpoint. Topics include contingency tables, rank tests and tests based on the binomial distribution. EPID INTIL HLTH

220. Selected Topics. (2 or 3) § F, W, Sp. Lecture 2 or 3 hours. Staff

Course will cover topics such as statistical methods for failure time data; statistical epidemiology; logic and practice of scientific inquiry. EPID INTIL HLTH

EPID INTIL HLTH

270. Nonlinear Regression. (2) § Sp. Prerequisite: Medical Information Science 230A or equivalent. Lecture 2 hours. Beal

Nonlinear regression models. Maximum likelihood, least squares and robust parameter estimation methods. Numerical iterative techniques for implementation of these methods. Confidence sets and hypothesis tests. Examination of statistical asymptotic theory. Practice with analyzing actual data with computer programs. EPID INTIL HLTH

297. Special Study. (1-3) § F, W, Sp. Conference 1-3 hours. Staff

Reading and conferences for qualified students under the direction of a member of the staff. EPID INTIL HLTH

Chemistry

11. Organic Chemistry. (3) F. Prerequisite: Chemistry 1A-B-C or equivalent. Lecture 3 hours. Oppenheimer

An introductory study of the structure, stereochemistry, reactivity, and functionality of compounds of carbon. PHARM CHEM

12. Organic Chemistry. (3) W. Prerequisite: Chemistry 11. Lecture 3 hours. J. Craig

A continuation of the study of compounds of carbon including some aromatic compounds. PHARM CHEM

16. Organic Chemistry Laboratory. (2) W. Prerequisite: Chemistry 11. Lecture 1 hour. Lab 3 hours. Ketcham

Laboratory techniques in organic chemistry. The preparation and study of organic compounds, with an introduction to quantitative organic analysis. PHARM CHEM

113. Organic Chemistry. (3) F. Prerequisite: Chemistry 12. Lecture 3 hours. Burlingame

A continuation of the study of compounds of carbon including some aromatic, hydroaromatic, and heterocyclic compounds. PHARM CHEM

115. Physical Chemistry. (5) F. Prerequisite: Chemistry 5 or equivalent laboratory course in quantitative analysis and differential and integral calculus. Lecture 4 hours. Conference and demonstration 3 hours. T. James

Elementary physical chemistry with emphasis on thermodynamics. PHARM CHEM

116. Physical Chemistry. (2) W. Prerequisite: Chemistry 115 or equivalent. Lecture 1½ hours. Conference and demonstration 1½ hours. Kutz

Elementary physical chemistry with emphasis on chemical kinetics. PHARM CHEM

117. Organic Chemistry Laboratory. (2) F, Sp. Prerequisite: Chemistry 12, 16 and concurrent enrollment in Chemistry 113, or consent of instructor. Conference 1 hour. Lab 4 hours. Ketcham, Burlingame

Laboratory experiments in identification and quantification of organic substances. PHARM CHEM

151. Physical Chemistry. (1-3) Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Kutz

Selected topics at an introductory level, which vary from year to year. Past topics included structure of nucleic acid and proteins, quantum chemistry, and spectroscopy. PHARM CHEM

158. Physical Chemistry Laboratory. (1) Sp. Prerequisite: Chemistry 115 and 116. Lab 3 hours. Kutz

Laboratory exercises in spectroscopy. PHARM CHEM

160. Advanced Physical Chemistry. (3) § W. Prerequisite: Two quarters of physical chemistry or consent of instructor. Lecture 3 hours. Tuck, Shafer

Chemical thermodynamics. PHARM CHEM

161. Advanced Physical Chemistry. (3) § Sp. Prerequisite: Chemistry 116 or equivalent. Lecture 3 hours. Shetlar
Theory and applications of chemical kinetics. PHARM CHEM

162. Advanced Physical Chemistry. (4) § F. Prerequisite: Chemistry 151 or equivalent.
Knowledge of differential equations recommended. Lecture 4 hours.
Quantum mechanics and applications to molecular problems. PHARM CHEM

165. Organic Chem-Analytical Meth. (4) § F. Prerequisite: Chemistry 113. Lecture 1 hour. Lab 9 hours. Kenyon, Shafer
A study of the reactions of organic compounds by applying a system of qualitative analyses to the determination of characteristic groups. PHARM CHEM

Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

202. Advanced Organic Chemistry. (3) § Sp. Prerequisite: Chemistry 113, 116, and 165 or equivalent. Lecture 3 hours. Oppenheimer
A study of the detailed processes associated with organic reactions. PHARM CHEM

203. Advanced Organic Chemistry. (3) § W. Prerequisite: Chemistry 113, 115, and 165 recommended. Lecture 3 hours. Ortiz de Montellano
Physical organic chemistry: the structure of molecules and its relationship to mechanisms of reaction. PHARM CHEM

204. Reactions & Synthetic Methods. (2) § F. Prerequisite: Chemistry 113 and 165 or equivalent. Lab 6 hours. J. Craig
A course in advanced laboratory work exemplifying the major reactions and newer synthetic methods used in organic chemistry. PHARM CHEM

205. Advances in Synthetic Methods. (2) § F. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 2 hours. J. Craig
Recent advances in synthetic methods, comprising specific oxidizing agents, specific reducing agents, and other specific reagents. PHARM CHEM

208. Advanced Organic Chemistry. (3) § Sp. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 3 hours. J. Craig, M. Wolf
Terpenes and steroids. Occurrence, chemistry, stereochemistry and structure-function relationships of natural products such as carotenoids, fat-soluble vitamins and steroids, and their precursors. PHARM CHEM

209. Chemistry of Heterocycles. (3) § Sp. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 3 hours. J. Craig, Kenyon
A survey of the main nitrogen, oxygen, and sulfur-containing heterocycles. PHARM CHEM

Clinical Dentistry

Staff
Responsibility for patient dental care in the wards and comprehensive clinic under the direction of the attending staff. Dental consultations and treatment are coordinated with medical care. Residents take histories and perform physical examinations, laboratory tests, and dental treatment. ORAL MED

Clinical Laboratory Science

201A-B-C. Clinical Chemistry. (2 2 2) § F, W, Sp. Prerequisite: Degree in Chemistry or Medical Technology license. Lecture 2 hours. Kollman
Nussenzbaum
Principles and evaluation of clinical laboratory methods used to diagnose abnormalities in metabolism and organ function. LAB MED

207. Enzymology. (2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Farina
The fundamental concepts of enzyme kinetics are reviewed; enzyme measurement and automation; enzyme profiles in various diseases and specific enzyme methodology are presented. LAB MED

209. Quality Control. (2) § F, W. Prerequisite: Enrollment in Clinical Laboratory Science master's program. Barr
A review of principles of statistics and their application to quality control in the clinical laboratory; legal aspects of quality control, preventive maintenance. LAB MED

210A-B. Clinical Pathology Seminar. (1-1) § F, W. Prerequisite: Consent of instructor. Seminar 1 hour.
Staff
Specialists on various established and proposed laboratory tests will present interpretation and evaluation of tests as related to pathophysiology. LAB MED

211. Laboratory Computer Applications. (2) § F, W or Sp. Prerequisite: Enrollment in Clinical Laboratory Science master's program. Lecture 2 hours. Barr
Applications of computer science in collecting, storing, analyzing, and reporting data in a clinical laboratory. Statistical quality control methods will be discussed. Practical computer programming instruction and experience, using FORTRAN, will be stressed. LAB MED
215. Clinical Toxicology. (2) § F, Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

P. Reynolds, McKnie

Course introduces students to the implications as well as the systematic schemes and specific techniques of volatiles, acidic, neutral, and basic drugs, metals, and miscellaneous drugs and toxic agents encountered in clinical and forensic laboratories. LAB MED

216. Clinical Toxicology. (2) § F, W, Sp. Prerequisite: Consent of instructor.

Nussenbaum

Course is given as a three-week training program in one of the most active toxicology laboratories in the Bay Area. LAB MED

Hadley

Principles of clinical laboratory methods for diagnosis of infectious disease will be reviewed. Newer detection methods such as immunofluorescence, radioimmunoassay, gas chromatography will be examined. In vitro methods of susceptibility testing and assay of antimicrobials will be discussed.

LAB MED

254. Clinical Immunology. (2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

Hadley

Principles of antigen-antibody reactions and the evaluation of their utility in the diagnosis of disease. The role of cellular and humoral immunity in host defenses against infections. LAB MED

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree. LAB MED

Clinical Pharmacy

110. Orientation. (2) F. Conference and field observation 3-4 hours.

R. Levin

An introduction to the scope of pharmaceutical practice including field trips to and participation in various settings where the pharmacist and patient interact. CL PHARM

130. Therapeutics. (6) F. Prerequisite: Successful completion of all required first- and second-year courses or consent of instructor. Lecture 5 hours. Conference 2 hours.

Guglielmo, Kudzia

Orientation to selected areas of medical practice, the clinical evaluation and comparison of drugs used in these areas, and the biopharmaceutics of drug combinations and products. CL PHARM

131. Therapeutics. (6) W. Prerequisite: Clinical Pharmacy 130 or consent of instructor. Lecture 5 hours. Conference 2 hours.

L. J. Davis, L. Hart

Continuation of Clinical Pharmacy 130. CL PHARM

132. Therapeutics. (7) Sp. Prerequisite: Clinical Pharmacy 131 or consent of instructor. Lecture 6 hours. Conference 2 hours.

Barriere and Staff

Continuation of Clinical Pharmacy 131. CL PHARM

133. Nutrition. (3) Sp. Prerequisite: Third-year standing. Lecture 3 hours.

McSweeney

Clinical aspects of nutrition in ambulatory and institutional practice with emphasis on special needs of different populations. Nutritional supplements, enteral and parenteral products will be discussed as they apply to these populations. CL PHARM

134. Public Health Programs. (2) Sp. Prerequisite: Third- or fourth-year standing for pharmacy students (required course); consent of instructor for other students. Lecture 2 hours.

Beste, Herfindal

Survey of major world health problems, and programs and agencies concerned with their control. Relationships of pharmacy to topics such as emergency medical services, communicable diseases, nutrition, sanitation, occupational health, maternal and child hygiene, mental health, and public health administration. CL PHARM

135A. Drug Information Orientation. (3) F, W, Sp. Prerequisite: Third-year standing. Concurrent or subsequent enrollment in Clinical Pharmacy 130, 131 or 132.

L. Hart, L. J. Davis

Orientation to clinical services, including patient interview techniques and monitoring; training and actual experience in literature retrieval, analysis and dissemination of drug information. CL PHARM

L. Hart, L. J. Davis

Continuation of Clinical Pharmacy 135A. CL PHARM

148A. Inpatient Clinical Clerkship. (9) F, W, Sp. Prerequisite: Successful completion of all first-, second- and third-year courses and Clinical Pharmacy 130 series comprehensive examination. Clinical 40 hours per week for six weeks.

Kayser and Staff

Supervised clinical pharmacy experience in an inpatient setting. Students develop and explore their roles in an interdisciplinary health care team, take medication histories, monitor drug therapy, provide patient education, and research patients' specific drug information questions. CL PHARM

148B. Inpatient Clinical Clerkship. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 148A. Clinic 40 hours per week for six weeks.

Kayser and Staff

Continuation of Clinical Pharmacy 148A. CL PHARM

148.01A. Inpatient Clerkship—UCSD. (9) F, W, Sp. Prerequisite: Successful completion
of all first-, second- and third-year courses and Clinical Pharmacy 130 series comprehensive examination. Clinic 40 hours per week for six weeks.

**Adler and Staff**

Supervised clinical pharmacy experience in an inpatient setting. Students develop and explore their roles in an interdisciplinary health care team; take medication histories, monitor drug therapy, provide patient education, and research patients' specific drug information questions. CL PHARM

148.01B. Inpatient Clerkship—UCSD. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 148A. Clinic 40 hours per week for six weeks.

**Adler and Staff**

Continuation of Clinical Pharmacy 148.01A or Clinical Pharmacy 148A. CL PHARM

148.02A. Inpatient Clerkship—UCI & MHLB. (9) F, W, Sp. Prerequisite: Successful completion of all first-, second- and third-year courses and Clinical Pharmacy 130 series comprehensive examination.

**Shimomura and Staff**

Supervised clinical pharmacy experience in an inpatient setting. Students will develop and explore their roles in an interdisciplinary health care team; take medication histories, monitor drug therapy, provide patient education, and research patients' specific drug information questions. CL PHARM

148.02B. Inpatient Clerkship—UCI & MHLB. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 148.02A.

**Shimomura and Staff**

Continuation of Clinical Pharmacy 148.02A. CL PHARM

**Leeds and Staff**

Supervised clinical experience in an outpatient setting. Students develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy, and provide patient education. Experience in community pharmacies. CL PHARM

149.01A. Ambulatory Externship/Clerkship—UCSD. (6½) F, W, Sp. Prerequisite: Successful completion of all first-, second- and third-year courses and Clinical Pharmacy 130 series comprehensive examination.

**Welbert and Staff**

Supervised clinical experience in an outpatient setting. Students develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy, and provide patient education. Experience in community pharmacies. CL PHARM

149.01B. Ambulatory Externship/Clerkship—UCSD. (6½) F, W, Sp. Prerequisite: Clinical Pharmacy 149.01A or 149A.

**Welbert and Staff**

Continuation of Clinical Pharmacy 149.01A or 149A. CL PHARM

149.02A. Amb. Externship/Clerkship—UCI & MHLB. (6½) F, W, Sp. Prerequisite: Successful completion of all first-, second- and third-year courses and Clinical Pharmacy 130 series comprehensive examination.

**Shimomura and Staff**

Supervised clinical experience in an outpatient setting. Students develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy, and provide patient education. Experience in community pharmacies. CL PHARM

149.02B. Amb. Externship/Clerkship—UCI & MHLB. (6½) F, W, Sp. Prerequisite: Clinical Pharmacy 149.02A.

**Shimomura and Staff**

Continuation of Clinical Pharmacy 149.02A. CL PHARM

**Reale**

Students participate in the activities of the Inpatient Pediatric Service. Activities include...
routine review of patients' charts, monitoring patients' response to drug therapy; attendance at conferences, seminars and rounds; and participation in selected therapeutic consultations. CL PHARM

175.02. Renal Medicine - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Gambertoglio
Students participate in the activities of the Renal Medicine Service, including patient monitoring, attendance at conferences, seminars and rounds; and application of pharmacokinetics to drug therapy. Where appropriate, students prepare detailed consultations regarding individual patient therapy. CL PHARM

175.03. Infectious Diseases - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Barriere
Students gain experience on the Infectious Disease Consult Service. Activities include rounds, medication consultations and provision of pharmacokinetic monitoring. CL PHARM

175.25. Inpatient Medicine - VA. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Woo, Gee
Students participate in the activities of the Division of Clinical Pharmacology. Activities include utilization of computerized patient drug profiles to monitor adverse drug reactions, and participation in conferences and seminars. Special projects assigned. CL PHARM

175.40. Thyroid - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Dong
Students participate in the activities of the Thyroid Clinic, including patient monitoring, attendance at conferences and seminars. Work under supervision of the clinical pharmacists and physicians in the chronic management of selected patients. CL PHARM

175.41. Dermatology - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132, and Pharmacy 155. Consent of instructor.

M. Kimble, Chann
Experience in various medical services at a private community hospital. Students interview patients, monitor drug therapy, consult with house staff and nursing service, and prepare drug information reports appropriate to patient care. CL PHARM

175.50. Clinical Pharmacology - SFCH. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Tong
Students, in an interdisciplinary setting, assess clinical problems relating to the selection, pharmacodynamics and therapeutic merits of drugs and drug products. Activities include participation in rounds and conferences, collaboration on selected consultations, and retrieval and evaluation of drug literature. CL PHARM

175.51. Clinical Pharmacology - S. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Mangini
Students participate in the activities of the Division of Clinical Pharmacology. Activities include utilization of computerized patient drug profiles to monitor adverse drug reactions, and participation in conferences and seminars. Special projects assigned. CL PHARM

175.40. Thyroid - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Dong
Students participate in the activities of the Thyroid Clinic, including patient monitoring, attendance at conferences and seminars. Work under supervision of the clinical pharmacists and physicians in the chronic management of selected patients. CL PHARM

175.41. Dermatology - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132, and Pharmacy 155. Consent of instructor.

M. Kimble, Chann
Experience in various medical services at a private community hospital. Students interview patients, monitor drug therapy, consult with house staff and nursing service, and prepare drug information reports appropriate to patient care. CL PHARM

175.50. Clinical Pharmacology - SFCH. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Tong
Students, in an interdisciplinary setting, assess clinical problems relating to the selection, pharmacodynamics and therapeutic merits of drugs and drug products. Activities include participation in rounds and conferences, collaboration on selected consultations, and retrieval and evaluation of drug literature. CL PHARM

175.51. Clinical Pharmacology - S. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Mogni
Students participate in the activities of the Division of Clinical Pharmacology. Activities include utilization of computerized patient drug profiles to monitor adverse drug reactions, and participation in conferences and seminars. Special projects assigned. CL PHARM

175.40. Thyroid - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Dong
Students participate in the activities of the Thyroid Clinic, including patient monitoring, attendance at conferences and seminars. Work under supervision of the clinical pharmacists and physicians in the chronic management of selected patients. CL PHARM

175.41. Dermatology - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132, and Pharmacy 155. Consent of instructor.

M. Kimble, Ruggiero
Experience in various subspecialty areas in the Dermatology Clinic. Students take medication histories, and instruct patients on proper medication usage. They participate in conferences, seminars and rounds, and provide therapeutic consultations where appropriate. Special projects assigned. CL PHARM

175.42. OB-GYN - UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Ruggiero
Experience in various subspecialty areas in the Obstetrics and Gynecology Clinic. Students work with other health professionals
and students in the clinic, participating in conferences and seminars. Prepare detailed consultations regarding drug therapy where appropriate. CL PHARM

175.43. Diabetes—UC (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble

Students participate in the activities of the Diabetes Clinic, including patient education, drug therapy consultation and management, and attendance at conferences and seminars. At option of student, a special project may be undertaken in addition to regular clinic activities. CL PHARM

175.44. Tropical Medicine—UC (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Koo

Students participate in the activities of the Tropical Medicine Clinic. Emphasis is placed on patient interviews and rational treatment of parasitic diseases. Special project is optional. CL PHARM

175.45. Anticoagulation—UC (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Kayser

Students participate in the activities of the Anticoagulation Clinic. Special project is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

175.46. Hematology/Oncology—UC (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Ignoffo

Students participate in the daily activities of the Hematology-Oncology and/or Oncology Clinics. Special project is required. CL PHARM

175.47. Rheumatology—UC (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

A. L. Leeds

Students participate in the activities of the Rheumatic Disease and/or Arthritis Clinics. Special project is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

175.60. Ross Valley Pharmacy Clerkship—UC (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor.

M. Kimble, Lofholm

Students interview patients, maintain medication records, explain medication usage to patients, and answer drug therapy questions generated by physicians, pharmacists, and patients in a pharmacy located within a group medical practice. CL PHARM

M. Kimble, Kamil, Olayos

Students take patient medication interviews, explain medication usage to patients, and answer drug therapy questions generated by physicians, pharmacists, and patients in a community pharmacy setting. CL PHARM

M. Kimble, Whooley, A. Rogers

Students collect data for a problem-oriented medication record, dispense medication, educate patients as to proper medication usage and provide drug therapy recommendations for patients assigned to the pharmacists for chronic therapy management. CL PHARM

175.63. Sunset Mental Hlth Cln Clerkship—UC (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, T. Wong, S. I. Cohen, S. Kaufman

Students work with the clinical pharmacist to evaluate psychiatric patients' response to drug therapy, and present consultations reviewing overall patient therapeutic management in weekly seminars. CL PHARM

175.64. Haight Heroin Detox Unit Clerkship—UC (1-8) F, W, Sp. Prerequisite: Consent of instructor.

M. Kimble, Inaba

Students work as co-therapists under the supervision of the clinical pharmacist and physicians to develop individual therapy plans for drug detoxification. Where needed, students develop detailed drug reports appropriate to specific patient care. CL PHARM

M. Kimble, Scheidtman, Arauzo, Letcher

Practical experience in a hospital-owned community pharmacy offering progressive patient-oriented services, including drug monitoring, establishment and maintenance of medical profiles, patient counseling, drug information and in-service education. CL PHARM

175.80. IV Additives & Fluid Therapy—UC (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

McSweeney

Students participate in I.V. fluid therapy selection and preparation, and monitor patients receiving intravenous medications. Conferences are held on topics related to problems in the use of intravenous fluid therapy in various disease states. CL PHARM

175.82. IV Additives Clerkship—VA (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

M. Kimble, Kikugawa

An introduction to the administrative, professional and technical aspects of establishing and maintaining an I.V. additive service.
Students will participate in workshops and conferences. CL PHARM

**175.83. IV Additives & Unit Dose - VAM.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

**M. Kimble, Woo, Gee**

Students participate in centralized IV admixture and unit dose systems of distribution, with involvement in the decentralized clinical activities, including patient profile reviews. CL PHARM

**175.84. Drug Utilization Review - VAM.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

**M. Kimble, Woo, Gee**

Students participate in establishing and presenting the protocol for a drug utilization review. Students will complete the study during the rotation, and present results to the physicians and other disciplines involved. CL PHARM

**175.88. Unit Dose Systems - MH.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

**M. Kimble, Scarpese, Kahl**

Practical experience in a community hospital pharmacy unit dose system. Conferences are held on topics related to the principles and theory of the unit dose system, drug therapy problems encountered in monitoring and interprofessional relationships. CL PHARM

**175.90. Drug Information Clerkship - UC.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

**L. Hart**

Advanced experience in drug information retrieval and analysis. Activities include participation in conferences, seminars and selective teaching assignments in Clinical Pharmacy 135. Special projects assigned. CL PHARM

**175.91. Drug Information Clerkship - AB.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132 and 135. Consent of instructor.

**M. Kimble, W. H. Lee and Staff**

Experience in collection, evaluation and dissemination of drug information in a community-based drug information service. Activities include answering drug information requests from community practitioners. CL PHARM

**175.93. Quality Assurance.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

**M. Kimble, Hirschman, Formi**

Students observe and participate in a business-professional environment to understand the role of such an organization in delivery of optimal, cost-effective health care. Special emphasis on delivery of pharmaceutical services. CL PHARM

**176.01. Nephrology - UCSD.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler and Staff**

Students participate in the Renal Consult Service, Hemodialysis Unit and in the Renal Clinic with the medical and nursing staff. A special project selected by the student will be required. CL PHARM

**176.02. Pulmonary Medicine - UCSD.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler and Staff**

Students participate in the activities of the Pulmonary Medicine Consult Service, chest clinic and asthma clinic associated with the Pulmonary Division at University Hospital. CL PHARM

**176.03. Neonatal Care - UCSD.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler and Staff**

Students participate in the nursery's morning work rounds, attending high risk infant transportation and delivery. Students will read and evaluate current neonatal literature, and provide drug related information to medical staff and parents. CL PHARM

**176.04. Pediatrics - UCSD.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler and Staff**

Students participate in the activities of the Inpatient Pediatric Service. Activities include routine review of patients' charts, monitoring patients' response to drug therapy, attendance at conferences, seminars and rounds, and participation in selected therapeutic consults. CL PHARM

**176.05. Psychiatry - UCSD.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler and Staff**

Students participate in the Inpatient Psychiatric Service. A special project will be required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

**176.40. Anticoagulation - UCSD.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**Wellberg and Staff**

Students participate in the services of the anticoagulation clinic at University Hospital under the guidance of a clinical pharmacist. CL PHARM

**176.41. Hematology/Oncology - UCSD.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**D. Adler, P. Lee**

Students participate in the activities of the Hematology-Oncology Consultation Service. Activities include review of patients' charts, monitoring patients' response to drug therapy, attendance at conferences, seminars, rounds and clinics, participation in therapeutic consultations and a special project. CL PHARM

**176.42. Hypertension - UCSD.** (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01A and 149.01B.

**Wellberg and Staff**

This hypertension clerkship is an outpatient, six-week elective requiring students to become actively involved in one clinic day per week, as well as in one student-preceptor conference per week. CL PHARM
176.80. IV Additives & Fluid Therapy – UCSD. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A.01 or 149A.01 and 149B.01B.

**D. Adler and Staff**

Students participate in the activities of the Intravenous Additive Service at University Hospital. A special project will be required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

176.81. Poison Information – UCSD. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A.01 or 149A.01 and 149B.01B.

**Manoguerra and Staff**

Students participate in the services provided by the Poison Information Center for San Diego County, including receiving calls concerning ingestions and treatments, and seminars for the public and various school groups. CL PHARM

176.82. Anticoagulation – VASD. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A.01 or 149A.01 and 149B.01B.

**D. Adler and Staff**

Students participate in the services of the Anticoagulation Clinic under the guidance of a clinical pharmacist. CL PHARM

176.83. Drug Information – UCSD. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A.01 or 149A.01 and 149B.01B.

**P. Anderson**

Students participate in the services provided by the Drug Information Service including receiving drug information requests, researching and writing formal responses. CL PHARM

185.05. Oncology – UC. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor.

**Ignoffo**

Students attend work rounds, housestaff management rounds and teaching conferences; learn techniques utilized in caring for patients with hematologic or solid tumors. Emphasis on acute care of cancer patient: anti-emetic and brain control; hyperalimentation; treatment of hypercalcemia and infections. Project. CL PHARM

185.23. Medicine – SRM. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

**Kishi, G. Dennis**

Students attend rounds, interview patients and take medical histories, monitor and evaluate drug therapy, anticipate and identify drug therapy problems, provide patient with specific information to health team members, provide drug and health information to patients, document clinical services. CL PHARM

**M. Kimble, Banducci**

Students attend rounds, make recommendations to physicians, take medical histories and follow patient progress, participate in interdisciplinary team meetings for primarily acutely psychotic patients. CL PHARM

185.26. Infectious Diseases – SFGH. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of Instructor.

**Tong**

Students attend rounds with the Infectious Disease Service, evaluate antibiotics selection and patient’s response to therapy, serve as drug consultants to medical staff on the service. A special project relating to some aspect of infectious disease and its therapy will be completed. CL PHARM

185.27. Burn Unit – SFT. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor.

**M. Kimble, Damato, Jansen**

Students work in Burn Unit Satellite, monitoring patient’s wound cultures, antibiotic therapy and drug serum levels, renal function, nutritional status, and pain management. Students are involved with patient from surgical intervention through rehabilitation. CL PHARM

185.32. Intensive Care – VAM. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A, and/or consent of instructor.

**M. Kimble, Woo, J. Gee**

Attendance and participation in clinical activities in the Intensive Care Unit. Activities may include rounds with pulmonary, cardiology or surgical ICU teams, monitoring drug therapy, pharmacokinetic monitoring of selected medicines, and working with various health care professionals regarding medicine use and misuse. CL PHARM

185.33. Family Practice – SFGH. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

**Dong**

Students participate in activities of the Family Practice Outpatient Service. Activities will continue in the Family Practice Outpatient Service, if applicable. Students present conferences to medical staff, and are responsible for a minimum of five written drug consultations per week. CL PHARM

185.34. Psychopharmacology – AS. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor.

**M. Kimble, Hudgins, Raleigh, R. O’Brien**

Students participate in the clinical activities of the Pharmacy Department. A special project is required, the subject of which shall be chosen by the student, with the advice and consent of the preceptor. CL PHARM

185.35. Inpatient Psychiatry – VAM. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

**M. Kimble, Woo, Gee**

Students participate in the activities of the Inpatient Psychiatry Service. Upon completion, students shall demonstrate the ability to function as a clinical pharmacist in an inpatient psychiatric setting. CL PHARM

M. Kimble, H. Leung

Students participate in activities of a long-term care state hospital for developmentally disabled, including drug therapy monitoring, drug utilization reviews, ward clinical experiences, in-service conferences. Work under supervision of clinical pharmacist in the chronic management of institutionalized patients. CL PHARM.

185.37. Inpatient Psychiatry - VA (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Buffum, Liesenberg

Students participate in the inpatient acute care psychiatric ward. Activities include monitoring and interviewing patients, participation in team meetings and conferences, and presenting one in-service program to psychiatric staff. CL PHARM.

185.38. Alcoholism & Poly-Drug Abuse - OC (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Furtado, Icaza, Macres

Detoxification and management of alcoholism and poly-drug abuse. Emphasis on methods of acute detoxification and support services in rehabilitation of patients, including responsibilities of health care team members and consideration of physical and psychological consequences. CL PHARM.

185.39. Oncology-Nutrition Support - SFT (4.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B and/or consent of instructor.

M. Kimble, Honda

Students work on the Oncology Unit monitoring patients on chemotherapy, nutrition support, pain control and antibiotic therapy. Students will gain in-depth knowledge of the role of the clinical pharmacist in a private hospital Oncology Unit. CL PHARM.

185.67. Extended Care - Marin Country (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

M. Kimble, Robertson

Students interview patients, monitor drug therapy, provide nursing in-service education, provide drug information consultations to physicians, and conduct drug utilization and adverse drug reaction studies. Students continuously document activities and findings and submit a written report. CL PHARM.

185.68. Senior Citizens Educ Prog. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

M. Kimble, K. Eng, L. Eng

Students offer clinical pharmacy services such as hypertension screening, patient health education, and establishment and review of patient profile systems to senior citizens in five community senior health and drug information centers located in local community pharmacies. CL PHARM.

185.69. Skilled Nursing/Pharmacare Serv. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B.

M. Kimble, J. Kaufman, Caron

Students participate in activities of a skilled nursing facility pharmacy practice. Included are clinical and dispensing activities in the twelve facilities in the Sacramento area, as well as the legal responsibilities of the pharmacist as consultant in skilled nursing facilities. CL PHARM.

185.70. Pharmaceutical Services Pharmacy. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Nico, Rhoades

Students gain experience in both the skilled nursing facility and the pharmacy. Activities include evaluating drug therapy and other consultant roles in the facility service, participating in unit dose medication systems, and researching drug information. Special projects required. CL PHARM.

185.72. Pain Management. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

M. Kimble, Furtado, Icaza

Students participate in activities of the pain center. Attention is directed to management of chronic pain. A special project or paper is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM.

185.87. Drug Utilization Review - UC (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

McCarr

Students design a prospective drug utilization review study. After receiving introductory material about purpose and value of such studies, students gather, evaluate and interpret data for a final written report suitable for publication in the Hospital Pharmacy Bulletin. CL PHARM.

185.94. Drug Information - S (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor.

M. Kimble, Tatro

Students participate in the activities of the Drug Information Service including answering drug related questions, writing a newsletter, and drug review. Students work under supervision of the director for drug information. CL PHARM.

186.59. Medical Specialties - UCSD. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

D. Adler and Staff

Exploration of the potential service roles of clinical pharmacists in various medical specialty settings. CL PHARM.

186.79. Clínicas de Salud. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

D. Adler, de Forest

Students participate at the Clinica under the direction of the clinical pharmacist at the
main facility, and at three satellite locations. Included are hypertension, diabetes, obstetrics and gynecology, pediatrics and general medicine clinics. CL PHARM

187.01. Oncology-MHILB. (1.8) W, Sp. Prerequisite: Clinical Pharmacy 148A or 149. Consent of instructor.

Shimomura, Diamant, Towne

General orientation to the most frequently occurring diseases of oncology and hematology. Emphasis on developing working knowledge of chemotherapeutic agents. Emphasis on application of chemotherapy to oncologic diseases, prevention and administration of agents, side effects and toxicity, applicable pharmacokinetic calculations. CL PHARM

187.02. Pharmacokinetics-MHILB. (1.8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149. Consent of instructor.

Shimomura, Harrelson

Participation in all aspects of clinical pharmacokinetics service including information, consultations, and drug dosing regulations, under approved protocols. Involvement in analysis and evaluation of serum drug levels, particularly in patients with altered drug disposition. CL PHARM

187.03. Anticoagulation-MHILB. (1.8) W, Sp. Prerequisite: Clinical Pharmacy 148A and consent of instructor.

Shimomura, R. Cook

Participation in application of heparin and warfarin guidelines, which involve dosage adjustment, clinical assessment, data collection, medical audit. Students learn about management of patients with thromboembolic diseases through conferences, selected readings and clinical participation. CL PHARM

Shimomura, Haddow, Folli, Rivers

Participation in patient care rounds, monitoring case presentations, pharmacokinetic evaluations, literature research, and CPRs in neonatal and pediatric patients. Major pediatric disease states and appropriate drug therapy will be reviewed daily. Six to ten hours of medical seminars each week. CL PHARM

187.05. Psychiatry-UCL. (1.8) W, Sp. Prerequisite: Fourth-year standing and consent of instructor.

Shimomura, Plon

Active involvement with patients and staff in acute care mental health facility. Students interview, interact with, and monitor patients. Through background into various forms of mental disorders, treatment and role of pharmacists will be presented. CL PHARM

187.06. Pediatrics-UCL. (1.8) W, Sp. Prerequisite: Clinical Pharmacy 148A or 149. Consent of instructor.

Shimomura, Zenk

Students participate in activities of neonatal intensive care unit and inpatient pediatric services, monitoring patients, attending rounds and conferences. Emphasis will be on acute inpatient pediatric medicine and neonatology under supervision of pediatric clinical pharmacist and pediatricians. CL PHARM

Shimomura, S. Gardner

Students participate in the activities of the Jules Stein Eye Institute, which include patient monitoring, attendance at conferences and seminars, and dispensing of ocular medications. Students work under the supervision of the pharmacist preceptor in learning the management of common diseases of the eye. CL PHARM

187.08. Drug Information-MHILB. (1.8) W, Sp. Prerequisite: Fourth-year standing and consent of instructor.

Shimomura, T. Simpson, Bodendorfer

Students will be provided the opportunity to develop the skills required to work in a drug information service, which includes organization and retrieval of drug information, drug literature evaluation, and effective verbal and written communication. CL PHARM

187.81. IV Additives-UCL. (1.8) F, W, Sp. Prerequisite: Fourth-year standing and consent of instructor.

Shimomura, Ming

Students participate in the activities of an intravenous additive service in a large university teaching hospital. Students will learn about aseptic technique, compatibility and stability of drugs in intravenous solution, total parenteral nutrition, pre-filled syringe programs, home hyperalimentation and piggybacks. CL PHARM

187.82. Drug Information-UCL. (1.8) W, Sp. Prerequisite: Fourth-year standing and consent of instructor.

Shimomura, Vrabel

An on-line experience in a drug information center serving a large multidisciplinary teaching hospital. Through a series of experience modules, in addition to day-to-day information requests received by the center, students will be expected to demonstrate competence in drug literature evaluation and drug information retrieval skills. CL PHARM

187.83. IV Additives-UCL. (1.8) W, Sp. Prerequisite: Fourth-year standing and consent of instructor.

Shimomura, Hazlet, Casselman

Clerkship provides an opportunity for students to develop and use skills relating to all areas of a centralized IV additive service. Students will make routine case presentations regarding patients receiving different types of intravenous therapy, including parenteral nutrition. CL PHARM

198. Superseded Study. (1.5) F, W, Sp. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. CL PHARM

Herdinal, Beste and Staff

Residents provide pharmacy service to patients in the wards and outpatient clinics including taking drug use histories, preparing and monitoring medication profiles, providing drug use information and consultation, and related activities. In addition, there are administrative and teaching responsibilities.

Cl. PHARM

Herdinal, Mc Cart, Kayser

Residents provide drug information and consultative services on request. Activities include literature searches, preparing reports and other communications, and teaching and administrative responsibilities involving the Drug Information Analysis Service.

Cl. PHARM

452. Administration. (5) S, F, W. Sp. Prerequisite: Resident standing and approval of program director.

Herdinal, Beste and Staff

Residents are responsible for carrying out assignments related to the administration of a modern hospital pharmacy service. Activities include preparation of budgets, supervision and development of staff, program planning and related administrative assignments.

Cl. PHARM

453. Research. (1-5) S, F, W, Sp. Prerequisite: Resident standing and approval of program director.

Herdinal, Beste and Staff

Research programs are arranged with appropriate faculty members on an individual basis.

Cl. PHARM

Community Dentistry

168. Community Health Methods. (2) F. Lecture 1 hour. Lab 3 hours. Silverstein

Dental hygiene students work in the North Oakland community with the Children and Youth Project staff. They are assigned to area schools where oral screening is done. Home visits will also be made. GEN DENT

407. Orofacial Prosthetics. (1-3) W. Prerequisite: D.D.S. degree or equivalent. Seminar, Lab, and Clinic 3-9 hours.

Chierici and Staff

A course designed to acquaint the student with the many facets of prosthetic management of acquired oral defects. Relationships of prosthetics to speech, mastication, deglutition, oral hygiene, and surgery are discussed. The interdisciplinary management of these problems is stressed.

408. Orofacial Anomalies

171. Diagnosis & Treatment. (2) F, W. Sp. Lecture 1 hour. Seminar and Clinic 3 hours.

Chierici, Vargervik

Diagnostic, preventive, and corrective methods relative to patients with congenital malformations of the orofacial region are discussed.

Vargervik

Diagnosis of orofacial malformations. Emphasis is on the interrelationship of morphology and physiology.

186.01. Abnormal Orofacial Development (F) Sp. Prerequisite: Fourth-year standing or consent of instructor. Seminar and Clinic 3 hours.

Chierici, Vargervik

The pathogenesis of jaw deformities, dental malocclusions, and speech disorders associated with congenital malformation is discussed. Instruction in diagnosis and preventive and corrective treatment methods is given in the clinic.

188. Neuromuscular Function. (2) F. Prerequisite: Physiology. Lecture 2 hours.

Chierici, A. Miller

Course emphasizes the importance of sensori-motor pathways to mandibular position and tongue posture. The use of facial and mandibular muscles is taught as related to posture, deglutition and mastication. The neuromuscular effects and adaptation to oral respiration are emphasized.

401. Orofacial Prosthetics. (1-3) F, W. Prerequisite: D.D.S. degree or equivalent. Seminar and Lab 3-9 hours.

Chierici and Staff

Prosthetic habilitation of the patient with orofacial malformations. Discussions include principles and techniques of construction of obturators, speech appliances, and retention bridges. GR DEVEL

120. Use of Dental Auxiliaries. (½) Sp. Prerequisite: Preventive Dentistry and Community Health 111. Lecture 1 hour for one half of quarter.

Ino

Classroom instruction and demonstrations in the effective use of the dental assistant.

180. Employing Auxiliaries. (1) Sp. Prerequisite: Dental Auxiliary Utilization 120. Lecture 1 hour.

Ino

An elective course primarily designed to examine the theories and practice of personnel management as related to a small, single proprietorship business such as a dental practice.

Dental Health Education

150A-B. Intro to Dental Health Education. (0-2, 0-2) F, W. Lecture 2 hours.

Hannebrink

An introduction to theories of learning and educational methodology as applied to clinical practice of dental hygiene. Development
Dental Hygiene

109. Clinical Dental Hygiene. (1-2) SS. Prerequisite: Dental Hygiene 155A-B, 159, and approval of the chairperson of the division. Clinic 3-6 hours. **Staff**

Course provides additional clinical dental hygiene experience before entry into the second-year clinic. **PERIODONT**

Role of dental hygienist in dentistry studied; emphasis on objectives and principles of preventive periodontal treatment procedures. Various procedures and their rationale are integrated as related to clinical skills. Introduction to anatomy, physiology and pathology of oral cavity is included. **PERIODONT**

151. Orientation to Dentistry. (1) F, W. Lecture 1 hour. **Poupard**

Introduction to dental specialties and clinical dental procedures. Topics to be covered include oral diagnosis, operative dentistry, pedodontics, endodontics, and myofunctional therapy. **PERIODONT**

152. Introduction to Research. (2) Sp. Lecture 2 hours. **Scarff**

Introduction to research for the dental hygienist. Course includes types of research, problem selection, research protocol and evaluation. **PERIODONT**

155A-B. Intro to Clinical Dental Hygiene. (2-2) F, W. F: Lab 3 hours. Clinic 3 hours W: Lab 6 hours. **Heckman**

Laboratory and clinical experiences in patient evaluation, record keeping, case presentation and instrumentation techniques for providing prevention-oriented dental hygiene treatment. **PERIODONT**

155.01A-B. Clinical Dental Hygiene Seminar. (0-2, 0-2) F, W. **Francisco and Staff**

Clinical laboratory seminar to discuss clinical procedures and patient management following Dental Hygiene 155A-B. **PERIODONT**

159. Clinical Oral Prophylaxes. (2) Sp. Prerequisite: Dental Hygiene 155A-B. Clinic 6 hours.

Continuation of clinical experiences from Dental Hygiene 155A-B with emphasis on improved proficiency in all areas. **PERIODONT**

159.01. Clinical Dental Hygiene Seminar. (½) Sp. Seminar 1 hour given in alternate weeks. **Francisco**

Clinical seminar to discuss patient management and clinical procedures. **PERIODONT**

160B-C. Jurisprudence & Office Mgmt. (1, 2) W. Sp. Lecture 1 hour W; 2 hours Sp. **Hannebrink**

Introduction to the ethical, legal and professional responsibilities of the dental hygienist. Emphasis on the California Dental Practice Act, malpractice prevention and professional organizations. Integrated topics include practice management and career planning. **PERIODONT**

161B-C. Orientation to Dentistry. (0-2, 0-2) W, Sp. Prerequisite: Dental Hygiene 151. Lecture 2 hours. **Hannebrink (W), Scarff (Sp)**

Continuation of Dental Hygiene 151. Course includes head and neck cancer management, tooth transplantation and implantation, orthodontics, oral surgery, craniofacial anomalies, maxillofacial rehabilitation, and removable and fixed prosthetics. **PERIODONT**

162A-B. Research Design. (0-4, 0-4) F, W. Prerequisite: Dental Hygiene 152. Lecture 2-4 hours. **Scarff**

Continuation of Dental Hygiene 152. Design and implementation of a research project and preparation of abstracts for oral clinic presentation. **PERIODONT**
169A-B-C. Adv Clinical Dental Hygiene. (3-5 S) F, W, Sp. Prerequisite: Dental Hygiene 155A B, 155.01A-B and 159. Concurrent enrollment in Dental Hygiene 169.01A-B. Clinic 9 hours; F, 15 hours W, Sp. Francisco

Advanced clinical dental hygiene techniques including periodontal maintenance therapy, pain control, and soft tissue curetage in cases of moderate to advanced stages of periodontal disease. PERIODONT

169.01A-B-C. Clinical Seminar. (0.1, 0.1, 0.1) F, W, Sp. Prerequisite: Concurrent enrollment in Dental Hygiene 169A-B-C. Lecture variable. Francisco

Lecture and seminar in clinic policies and procedures, dental hygiene treatment planning, periodontal maintenance therapy, clinical photography and related topics. Students will give case presentations during winter and spring quarters. PERIODONT

Course will encompass current regulations on the utilization of dental auxiliaries as defined by the California State Board of Dental Examiners for the Registered Dental Assistant and the Registered Dental Hygienist. PERIODONT

189. Independent Study. (0-4) F, W, Sp. Prerequisite: Second-year standing in dental hygiene and consent of instructor. Francisco

Students select an area of interest for independent study or research. These may include clinical, community, educational, institutional, or other areas. PERIODONT

189.01. Mobile Clinic. (0-3) SS. Clinic variable. R. Miller

Clinical experience in mobile dental clinics. PERIODONT

189.02. Community Health Clinic. (0-2) F, W, Sp. Prerequisite: Winter or spring quarter standing of first-year dental hygiene curriculum; or fall, winter or spring quarter standing of second-year dental hygiene curriculum. Francisco

One-half unit of credit for every five three-hour visits made to off-campus clinics or institutions. Objective is to secure community experience and involvement. Elective is above the required eight visits to off-campus clinics and institutions. PERIODONT

199. Laboratory Project. (1-5) F, W, Sp. Lecture 1 hour. Lab 0-12 hours. Francisco

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PERIODONT

Dental Jurisprudence

180. Dental Practice Problems. (½) W. Lecture 1 hour, for five sessions. F. Bradley

The course broadens student insight into the legal problems and obligations of dental practice. GEN DENT

Dental Technics

185. Intro to Basic Dental Technics. (2) SS. Lab 18 hours, for three weeks. Brigante

Technical orientation to the basic technics taught in the first year of dentistry such as morphology, prosthodontics, biomaterials, operative dentistry. RESTOR DENT

Dermatology

First-Year Coordinated Instruction—Medicine 131A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients. Core Clerkship—Family and Community Medicine 110 includes lectures and case presentations on the examination and diagnosis of dermatological diseases. This includes instruction in history-taking, physical diagnosis, and diagnostic and therapeutic procedures.

140.01. Advanced Dermatology Clerkship. (1½ per week) Su, F, W. Sp. Prerequisite: Consent of instructor. Cram

Activities of students are determined after an initial interview with the instructor. Emphasis is placed on routine outpatient and inpatient care and research methods, according to individual interest. DERMATOL

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W. Sp. Prerequisite: Consent of instructor. W. L. Epstein

Clinical clerkship in approved hospitals by special arrangement and approval of the dean and chairperson of the department. DERMATOL

150.01. Dermatology Research. (½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein

A research project under the direction of a member of the faculty. DERMATOL

160.01. Clinical & Research Clerkship. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein

Activities of students are determined after an initial interview with the instructor. Emphasis is placed on routine outpatient and inpatient care and research methods, according to individual interest. DERMATOL

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. DERMATOL

400. Staff Conference. (2) F, W. Sp. W. L. Epstein and Staff
Residents prepare and present case histories of patients at conferences, making reference to appropriate literature, special studies, and laboratory work. Conferences include discussions of new developments and research investigation by staff members and faculty from other UC departments and other universities. DERMATOL.

Lectures and demonstrations of the histopathology of skin diseases with special emphasis on correlation with clinical findings. Activities include the study of microscopic sections and discussions of material presented. DERMATOL.

Seminar covers recent literature in dermatology. Included is assigned reading with required reports which are evaluated by members of the faculty. DERMATOL.

403. Specialty Seminar. (2) F, W, Sp. Seminar, 2 hours. W. L. Epstein and Staff
Seminars include discussions, required reading, and reports on dermatology and related basic sciences such as embryology, myology, histopathology, and parasitology in relation to dermatologic conditions and oncology as it relates to the skin. DERMATOL.

Seminar involves the evaluation of recent clinical cases of special interest. Cases are presented by the faculty and resident staff. DERMATOL.

405. Research. (3) Su, F, W, Sp. Lab, 9 hours. Fukuyama
Instruction in the conduct of research projects dealing with electron microscopy, biology, biochemistry, and immunology of the skin under normal and pathological conditions. DERMATOL.

In-depth discussion of the science basic to an understanding of the function and dysfunction of skin, including anatomy, physiology, microbiology, pharmacology, and pathology. Over a three-year period, course covers all aspects of basic sciences relevant to dermatology. DERMATOL.

407. Cutaneous Microbiology. (2) Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture, 2 hours. Aly
Course is designed to familiarize dermatology residents with the techniques of isolation and identification of dermatophytes, skin bacteria, and viruses. Occasionally lectures on specialized topics are given. DERMATOL.

Residents, under supervision, are responsible for patient care in the wards and outpatient clinic. Duties include history-taking, physical examinations, and consultations. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. DERMATOL.

Residents, under supervision, are responsible for patient care in the wards and outpatient clinic. Duties include history-taking, physical examinations, and consultation. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. DERMATOL.

452. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. W. L. Epstein
Assistant residents work at off-campus hospitals, in the United States and other countries, approved by the dean and the chairperson of the department. Course includes training in clinical and investigative dermatology. DERMATOL.

Economics

180A-B. Economic Management in Dentistry. (1-1) F, W. Lecture, 1 hour. Winters
Lectures and group discussions related to dental practice. Subject areas covered include equipment selection, auxiliary personnel, consultation and financial procedures, recall, and accounting systems. Prepaid dental care programs and the role of professional organizations are presented by guest lecturers. GEN DENT.

Endocrinology

150.01. Research. (1½ per week) F, W, Sp. Prerequisite: Consent of instructor. R. Weiner
Individual research in endocrinology supervised by members of the faculty in the Interdisciplinary Group in Endocrinology. PHYSIOLOGY.

198. Supervised Study. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Ganong and Staff
Library research and directed reading under supervision of a member of the faculty with approval of the chairperson of the department. PHYSIOLOGY.

199. Laboratory Project. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Ganong
A laboratory research project under direction of a member of the faculty with approval of the chairperson of the department. PHYSIOLOGY.

Courses in Endocrinology are offered through various departments. For further information regarding any of them, contact instructor in charge or Dr. William F. Ganong, Chairperson, Department of Physiology, Interdisciplinary Program in Endocrinology.
201. Hormone Structure & Function. (3) § F. Prerequisite: Basic course in biochemistry recommended. Consent of instructor. Lecture 3 hours.

Papoff, Ramachandran, Bewley
Examination of the chemical nature of the endocrin; the methods employed for purification, characterization, structural determination and synthesis. The relationship of molecular structure to biological activity will be studied, as well as comparative and evolutionary aspects. PHYSIOLOGY

202. Mechanisms of Hormone Action. (3) § F. Prerequisite: Physiology 101 and/or Human Biology 200A and 200B, or Biochemistry 100A,B or consent of instructor. Lecture 2 hours plus independent study.

R. H. Roth, J. A. Williams
Reading and discussion of classical and current literature concerning known and speculative mechanisms of hormone action. Major hormones covered are insulin, glucagon, thyroid, and steroid. PHYSIOLOGY

220. Topics in Experimental Endo. (1) § F, W, Sp. Seminar 2 hours, given in alternate weeks.

Papoff, Ramachandran
Students will attend and participate in a seminar series devoted to topics of current interest in endodontology. PHYSIOLOGY

222. Reproductive Endo Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour.

Kuhn, R. Weiner
Seminar presentations in areas of current interest in reproductive endodontology by guest lecturers and members of the Reproductive Endodontology Center. Term paper required. Course may be repeated for credit. PHYSIOLOGY

224. Neuroendocrinology. (4) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Seminar 1 hour. Conference 1 hour.

P. Goldsmith, R. Weiner, Dallman
Mechanisms for regulation of endocrine function by the central nervous system and the influence of hormones on the nervous system are considered in view of anatomical, biochemical, physiological and behavioral data. PHYSIOLOGY

230. Reproductive Endocrinology. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours.

Lectures and assigned readings in the reproductive endocrinology of the male and female. Topics include structure, function, and regulation of hypothalamic, pituitary, and gonadal hormones, with special emphasis on humans. PHYSIOLOGY

Physiology

Endodontics

Nguyen and Staff
Clinical endodontics. Minimum of 100 points or two units required for graduation. RESTOR DENT

125. Preclinical Instruction. (1) W. Prerequisite: Concurrent enrollment in Endodontics 126. Lecture 1 hour.

Nguyen
Course presents the scope of modern endodontics and lays the groundwork for endodontic preclinical and clinical practice. RESTOR DENT

126. Preclinical Laboratory. (1) W. Prerequisite: Concurrent enrollment in Endodontics 125. Lab 3 hours.

Nguyen
Laboratory procedures involved in root canal therapy will be performed with emphasis on the interrelationship of endodontics to basic sciences and other disciplines of dentistry. RESTOR DENT

130. Clinical Endodontics. (1) F. Prerequisite: Endodontics 125. Lecture 1 hour.

Nguyen
Course covers prevention, diagnosis, and treatment of diseases of the pulp and periapical tissues. The rationale of endodontic therapy will be critically examined through documentation of information from the dental literature. RESTOR DENT

R. J. Rosenberg
Diagnosis, case selection, and management of pain and infection in endodontically involved teeth; advanced techniques for treating difficult root canal system anatomy; refinements in obturation of the root canal system. RESTOR DENT

Yip
A wide spectrum of selected topics related to endodontics will be reviewed. Research findings leading to modern concepts in endodontic treatment will be emphasized. Students are encouraged to participate in research projects and in table clinics at dental meetings. RESTOR DENT

189.01. Clinical Practice. (0-9) F, W, Sp. Prerequisite: Approval of the chairperson of the division. Clinic variable.

Nguyen and Staff
Clinical experience at the level of Endodontics 109. RESTOR DENT

189.02. Advanced Clinical Practice. (0-4) Sp. Clinic variable.

Saposnek
Advanced instruction in the field of clinical endodontics. RESTOR DENT

189.03. Expanded Clinical Practice. (0-9) F, W, Sp. Prerequisite: Completion of endodontics graduation requirements and satisfactory progress toward graduation in all other divisions. Consent of instructor and approval of Clinical Review Committee. Clinic variable. Enrollment limited.

Nguyen and Staff
Objectives of the course are to offer more extensive endodontic service, rather than extraction, to clinic patients; and to expand clinical experience in diagnosis and treatment for students showing interest in endodontics. RESTOR DENT
189.04. Undergrad Clinical Clerkship. (0-16%) F, W. Prerequisite: Fourth-year standing and completion of majority of graduation requirements. Lecture 5½ hours for five weeks. Clinical.

Nguyen, Sapone and Staff

An endodontic clerkship offering advanced senior students the opportunity to gain in-depth experience in diagnosis, emergency care, and all facets of non-surgical and surgical endodontics, as well as the related endodontic-pedodontic-periodontic problems. RESTOR DENT

Epidemiology and International Health

100. Medical Parasitology. (2) W. Sp. Prerequisite: Microbiology 100 (without parasitology) or equivalent, or concurrent enrollment. Lecture 2 hours. Heyneman

An introduction to protozoa and helminths and human diseases they produce, with emphasis on host-parasite interactions. Parasite epidemiology and life cycles, clinical and diagnostic aspects are considered in lectures, films and kodachrome showings. Laboratory demonstrations displayed throughout week. EPID INTL HLTH

Basic epidemiological principles and methods for investigating the distribution and determinants of disease in the population. Emphasis is on research design, evaluation of medical literature and diagnostic tests, and assessment of patient risk factors for use in diagnosis and treatment. EPID INTL HLTH

140.02A. Clinical Clerkship Abroad. (1½ per week) Su, F, W. Prerequisite: Nine months of clinical work and Epidemiology and International Health 150.01.

R. Goldsmith, Halde

Clinical clerkship elective in a developing country. Students provide patient care at a medical school, provincial hospital, or rural health clinic for eight to twelve weeks. Arrangements may be made to participate in a public health or research program abroad. EPID INTL HLTH

140.02B. Off-Campus Clerkship. (1½ per week) Su, F, W. Prerequisite: Consent of chairperson of department. Petrakis and Staff

Clerkships in clinical epidemiology in off-campus settings. EPID INTL HLTH

140.03. Leprosy & Communicable Diseases. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110.

As part of the consultative team, students work-up and follow communicable disease problems on the medical and surgical services. Participation on the inpatient and outpatient leprosy service and attendance regularly at conferences. EPID INTL HLTH

150.01. Medicine in Developing Countries. (1½ per week) W. Prerequisite: Epidemiology and International Health 100 or consent of instructor. R. Goldsmith

Two-week block elective on the recognition and treatment of diseases of tropical and developing countries. The course is designed to prepare students for clerkships abroad. Presentation format includes lectures, seminars, films, laboratory sessions, and supervised independent study. EPID INTL HLTH

150.02. Field & Laboratory Research. (1½ per week) Su, F, W. Sp. Prerequisite: Consent of instructor. Petrakis and Staff

Research under faculty supervision in the United States or abroad. Research may be in public health, clinical or preventive medicine, or basic medical sciences. EPID INTL HLTH

160.01. Cancer Epidemiology. (1-2) W. Prerequisite: Epidemiology and International Health 101 or consent of instructor. Lecture 1 hour. Optional term paper for 2 units. Petrakis and Staff

Survey and discussion of milestone papers in the knowledge of the epidemiology of the major sites of cancer. Emphasis is on etiological and methodological aspects and applications to prevention. EPID INTL HLTH

170.04. Host-Parasite Interactions. (1) W. Prerequisite: Epidemiology and International Health 100 or equivalent. Lecture and Discussion 1 hour. Heyneman

Lectures and discussion to review the patterns of host-parasite interactions involving protozoa and helminth infective agents of man. Topics selected will explore current views of immune and other types of response and their disorders that may result in human disease. EPID INTL HLTH

170.05. Intro to International Health. (2) W. Lecture 2 hours. Dunn and Staff

Lectures and discussion to survey the history, organizational structure, major activities and topics that comprise the field of international health. EPID INTL HLTH

170.06. Human Health Geography. (3-5) F. Prerequisite: Preregistration required. Course is offered and meets jointly with Geography 188 given at UC Berkeley. Lecture 3 hours. Optional term paper for 5 units. Dunn and Staff

Course covers principles of medical geography and landscape epidemiology including changing patterns of human health and disease in the context of physical, biotic, and sociocultural environments, and in relation to human settlements. Analysis of selected specific diseases of global importance. EPID INTL HLTH

170.07. Leprosy Laboratory Project. (1-5) Su, F, W. Prerequisite: Consent of instructor. Gelber

A laboratory research problem of leprosy under the guidance of a member of the staff of the Leprosy Research Unit. The Unit's major
research areas are the pharmacology, immunology, and chemotherapy of leprosy in animals and man. EPID INTL HLTH

180. Family Planning Perspectives. (1-2)
§ W. Lecture 1 hour, plus project required for 2 units.
Ernest

Implications of population growth and family planning programs in developing industrialized countries. Contraceptive and abortion methods and their socio-cultural acceptability are emphasized as well as demographic methods, population research issues, and the role of health professionals in population control. EPID INTL HLTH

180.01. Tropical Medicine Clinics. (1-2)
§ Su, F, W, Sp. Prerequisite: Epidemiology and International Health 100 and six months of clinical experience. Clinic 3-6 hours.
R. Goldsmith, Frierson and Staff

Examination and treatment of patients in the Tropical Medicine Clinics under staff supervision. Students also assist with consultations on hospitalized patients. Most of the patients seen in these clinics at UC and SFGH have diseases associated with the transmission of parasites. EPID INTL HLTH

180.04. Research Design. (2-3) § F. Prerequisite: Consent of instructor. Seminar 2 hours. Optional term paper for 5 units.
Hulley

Primary readings on diverse clinical topics from the recent literature will be discussed. The objective is to enhance skills in interpreting and designing clinical research. Major themes are the difficulty of demonstrating cause and effect, and the challenge of guiding health policy. EPID INTL HLTH

180.05. Maternal & Child Health-Devel Cntr. (1-2) § Sp. Lecture and Discussion 1 hour. Optional term paper for 2 units.
Arnhold

Lectures and discussion to review major factors affecting maternal and child health in developing countries, including the impact of poverty, nutrition, infectious diseases, immunization, organization of ambulatory care, setting of priorities, and utilization of local people as health auxiliaries. EPID INTL HLTH

180.07. Environmentally Induced Disease. (1) W. Lecture 1 hour.
Tarcher, R. Goldsmith

A lecture series on the cause, diagnosis, treatment and prevention of environmentally induced diseases. Topics include pesticides, hazardous wastes, indoor and outdoor air pollution, water pollution, susceptible populations, and the relationship of nutrition to environmentally induced disease. EPID INTL HLTH

180.08. Epidemiology. (2) § Sp. Seminar 2 hours, plus student presentation.
A. R. Moss

Topics in epidemiology and epidemiological methods from the public policy point of view, including issues associated with low-level radiation, and environmental and occupational carcinogenesis. Other topics may include the decline of heart disease and the politics of environmental epidemiology. EPID INTL HLTH

186. Tropical Medicine Lectures. (1) § Sp. Lecture 1 hour.
R. Goldsmith

Lectures, case histories, and films emphasizing diagnosis and treatment of tropical diseases including malaria, amebiasis, cholera, typhoid, schistosomiasis, leprosy and arbovirus infections, plus a review of opportunities for clinical clerkships abroad in developing countries. EPID INTL HLTH

190. Introduction to Epidemiology. (3) § F, W, Sp. Prerequisite: Third or fourth-year standing in School of Medicine, or graduate standing. Lecture 3 hours. Lab 1 hour.
Hulley

Introduction to the principles and methods used in epidemiology. Elements of research study design, critical analysis of journal articles, and application of epidemiological methods to common health risks in populations will be included. EPID INTL HLTH

198. Supervised Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty. EPID INTL HLTH

199. Laboratory Project. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty. EPID INTL HLTH

Exfoliative Cytology

401A-B-C-D. Clinical Diagnostic Cytology. (14-14-14-14) Su, F, W, Sp. E. King

Lectures in cytology include normal, malignant, and abnormal nonmalignant cells. Instruction covers methods of specimen collection, preparation, staining, and microscopic examination of specimens; development of speed and accuracy in microscopic examination; and correlation of cellular and tissue pathology. PATHOLOGY

Family and Community Medicine

110. FCM Core Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Completion of 24 weeks of clinical clerkship including Pediatrics 110 and either Medicine 110 or Surgery 110 and 111.
Werdegar, Rodnick, D. Mitchell

Students function as family/primary physicians in ambulatory settings at affiliated residency programs. Family Practice; at SFGH, CHS in Santa Rosa, NAF in Salinas, VMC in Fresno, and SHH at Ford Ord. Primary Care Internal Medicine; at UC, SFGH, and MZ FAM CM MED
140.01 A-B-C-D. Advanced Family Practice. (1/2 per week) A, B, C, and D are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Werdgar, Comelli, W. Shore, Dervin

A = VMC in Fresno; B = SFH; C = CHS in Santa Rosa; D = other sites. Comprehensive inpatient and outpatient experience in family practice. Students assume sub-intern responsibility for patient care. Community assignments may be individually arranged. FAM CM MED

140.02. Community Health Programs. (1/2 per week) Su, F, W, Sp. Prerequisite: Determined by student's clinical experience. Consent of instructor. Barbaccia and Staff

Elective clinical experience for two or more weeks in various community health projects in California and out of state as well. Programs include Indian Health Service, Diabetic Summer Camp, Asian Health Service, and varied neighborhood clinics. FAM CM MED

140.04. Family Practice Preceptorship. (1/2 per week) Su, F, W, Sp. Prerequisite: Consent of instructor. H. Davis

Students work with a family practitioner, alternatively general internist or general pediatrician, in the office, observing the practice and performing duties as training permits. Experience will teach common health problems and primary care in a community. Rural preceptorships are encouraged. FAM CM MED

140.05 A-B-C-D. Social Medicine. (1/2 per week) F, W, Sp, Su. Prerequisite: Consent of instructor. Course may be taken three consecutive quarters in fulfillment of pathway requirements, or one quarter on a selective basis. Barbaccia

Field work experience or research germane to social medicine individually arranged with consideration to student's major area of interest. FAM CM MED

140.06 A-B-C. Rehabilitation Medicine. (1/2 per week) A, B, and C are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Consent of instructor. L. Crain, H. Davis

A = San Francisco Bay Area; B = Fresno; C = other sites. Students are assigned to rehabilitation facilities for two to four weeks. Emphasis will be on the selection of patients who are suitable for rehabilitation and the interprofessional approach to rehabilitation. FAM CM MED

140.07. Adv Family Pract Preceptorship. (1/2 per week) Su, F, W, Sp. Prerequisite: Advanced medical school standing and consent of instructor. H. Davis

Students may select from several sites such as urban practice in San Francisco and Berkeley, or rural practice in Healdsburg, Hopa and Hughson. Students participate in the care of patients and their families at the physician's practice, local hospital and emergency room. FAM CM MED

140.10. Scientific Basis of Family Practice. (3) Sp. Prerequisite: Family and Community Medicine 110. Lecture 10 hours. Seminar 10 hours. Reading and library research 20 hours. Course is given over 12 weeks. Rodnick, Ransom, Slater

A two-week lecture-discussion-library research course for senior medical students interested in Family Medicine careers. Course will cover researchable questions pertinent to ambulatory care. Lectures will be combined with student presentations of literature reviews. FAM CM MED

140.30 A-B-C. Family Practice Clerkship. (1/2 per week) A, B, and C are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Patinkin, J. Morrison

A = NAF in Salinas; B = SFH at Fort Ord; C = other sites. Course strengthens students' clinical skills and exposes them to hospitals with family practice residency programs. Provides opportunity to participate in health care in rural and/or underserved areas. FAM CM MED

140.40. Adv Inpatient Fam Med Clerkship. (1/2 per week) Su, F, W, Sp. Prerequisite: Senior medicine clerkship. R. Goldschmidt, M. Johnson

The Family Practice Inpatient Service employs the family practice approach to hospitalized adult patients with diverse medical problems. Students function as members of the multi-disciplinary inpatient team at a junior intern level. Attending rounds are held daily. FAM CM MED

140.50 A-B-C-D. Com Clerkship-San Joaquin Valley. (1/2 per week) A, B, C and D are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Consent of instructor. Corbus

A = St. Agnes Hospital; B = Visalia Hospital; C = Fresno Community Hospital; D = other sites. Family practice clerkships in community practices in Valley communities. Students are introduced to the varied medical and surgical problems commonly found. Provides opportunity to assess health resources in a semi-rural area of California. FAM CM MED

Students receive practical training in emergency medicine in emergency pre-hospital care, and also in the care of the critically ill and injured patient in the emergency room. Daily emergency medicine case conferences and weekly conferences augment clinical experience. FAM CM MED

150.01. Research. (1/2 per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Werdgar, Barbaccia and Staff
Clinical epidemiology, health services, or behavioral science research approaches are applied in the study of selected areas in family medicine or community health. FAM CM MED

Barbacci

Non-block assignments to community health agencies where students have patient contact. Students choose an aspect of the agency's program for analysis. FAM CM MED

160.02. Family Practice Continuity. (2) Su, F, W, Sp. Prerequisite: Consent of instructor. Course must be taken for one full academic year.

R. Goldschmidt, J. Mandel

Course will provide students the opportunity to follow a small number of patients and families over the entire year, during their non-scheduled time in coordination with the instructor. Continuing the experience for four years is encouraged. FAM CM MED

160.03. Family Practice Preceptorship. (1-3) Su, F, W, Sp. Prerequisite: Medical student standing. Consent of instructor. Field work 4-12 hours.

H. Davis

Non-block assignment with a family physician in a private office or community clinic for a minimum of four hours a week. Pre-clinical students observe their preceptors in order to gain an introduction to family care. FAM CM MED

160.04. Sports Med for Non-Orthopedists. (2-3) F. Prerequisite: Consent of instructor. Lecture 2 hours. Clinic optional 4 hours.

Benner

Athletic medicine ranging from youth athletics to senior participation. Emphasis on evaluation and prevention of injury, conditioning and rehabilitation, directed at the community. Course consists of lectures and optional field work. FAM CM MED

160.05. Mission Community Hlth Elec- tive. (1-3) Su, F, W, Sp. Prerequisite: Consent of instructor. Lab 2-6 hours. Field work 2-8 hours.

D. Sanchez, D. Fink

Explores health care attitudes, health problems and health care resources in the multi-ethnic Mission Area of San Francisco. Students receive clinical assignments in one or more community health and social service agencies. Field experience is analyzed in seminars and tutorials. FAM CM MED

160.07A-B. The Family; Health & Care. (2-2) F, W, Seminar 2 hours. Field work 4 hours.

Ransom, R. Goldschmidt, H. Davis

Introductory principles of family medicine are discussed in class and discussion groups led by family physicians and family psychologists. Preceptorships with family physicians in private offices and community clinics. Each student will interview a family and present a case report. FAM CM MED

160.08. Introduction to Family Therapy. (1) W, Seminar 1 hour.

Ransom, H. Davis

Course provides an introduction for students expecting to take more advanced training in family therapy. Students will not see families themselves, but will participate in video-taped role playing exercises aimed at practicing basic techniques. FAM CM MED

170.01A-B-C. Special Issues in Health Care. (0-3) A, B, and C. Care offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture and reading 1-3 hours.

Werdegar and Staff

Explores in systematic (lecture/readings/discussion) format new issues in health care or special content areas related to family and community health. Topics are developed and prepared according to faculty student interests. FAM CM MED

170.03. Developmental Disabilities. (2-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Field work 4-8 hours.

L. Crain

Resource overview with reading assignments correlated with field observations of the spectrum of community and institutional services, including comprehensive diagnostic, therapeutic, and counseling services for children and adults with developmental disabilities. FAM CM MED

170.05. Rehabilitation Medicine. (1) F, W, Sp. Prerequisite: Consent of instructor. Field work 4-8 hours.

L. Crain

Through individualized arrangements, course provides an introduction to the broad spectrum of rehabilitation services for children and/or adults with chronic or disabling diseases. FAM CM MED

171. Comprr Applications in Hlth Care. (3) F. Lecture 3 hours.

Boilour

The nature of problem solving with the digital computer; representation of information within a computer system; introduction to programming and systematic programming methodology; examples of present and potential applications of computer systems to the medical environment. FAM CM MED

172. Legal Medicine. (2) § F, W, Lecture 2 hours.

Tennenhous

Fundamental legal principles and procedures affecting medical practice, with emphasis on medical negligence; the physician's role in the litigation process; the areas of medical practice which most frequently involve litigation; and practical measures to minimize the risk of lawsuit. FAM CM MED

J. Cook

Exploration of various aspects of primary care as related to family medicine. A practicing family physician leads discussion of topics developed by the students. Introduc- tion to the practical aspects as well as the issues and demands of family practice. FAM CM MED
175.01. Meaning of Being a Physician. (1-5) F, W. Sp. Prerequisite: Consent of instructor. Seminar 1-3 hours. Guttenag
Exploration of the theoretical premises of Western physicianhood; relationship to other disciplines, such as theology and man's spiritual dimension, and other cultural attitudes; trendiness of the holistic approach; dynamics of patient-physician relationship; operational concepts such as the clinical entity. FAM CM MED

175.02. Theoretical Problems Of Medicine. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Seminar 1-3 hours. Guttenag
Seminar on selected readings and of topics discussed in Family and Community Medicine 175.01. FAM CM MED

180. Intro to Social & Preventive Med. (1-2) F. Lecture and seminar 1-2 hours. Barbaccia
Lectures and seminars introduce entering students to social, political, economic and environmental factors influencing health of the community and provision of care. Topics include preventive health care, health behavior and formulation of policy. FAM CM MED

Lecture-seminar format is used to cover most aspects of the organization and function of the health care system and its subsystems, including manpower, hospitals, ambulatory care, planning regulation and control, economics, government programs and health services research. FAM CM MED

190. Family Counseling & Psychother. (1) F, W. Seminar 1 hour. Ransom, H. Davis
Students observe family therapy sessions on videotape. Role playing family situations and therapeutic strategies will be emphasized. Appropriate readings are assigned and discussed in seminar. FAM CM MED

198. Supervised Study. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Werdegar and Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. FAM CM MED

475.01. Western Medical Attitude. (1) F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Guttenag
An exploration of the theoretical premises on which Western medicine rests: its relationship to other disciplines, the structure of patient-physician relationships, its operational concepts, such as optimal versus inadequate or superfluous examination, the concept of the clinical entity. FAM CM MED

Seminar on selected readings and of topics discussed in Family and Community Medicine 475.01. FAM CM MED

Fixed Prosthodontics

109. Clinical Fixed Prosthodontics. (0.8) F, W, Sp. Prerequisite: Third-year standing in fixed prosthodontics. Clinic variable. Tueller
Clinical instruction to be taken concurrently with third- and fourth-year lecture courses. RESTOR DENT

Course provides material on the construction of a single three-unit bridge (posterior) on the typodont models, specifically preparation design, articulation and mounting principles, provisional restorations, waxing design, and casting technique. RESTOR DENT

115. Fixed Prosthod Techniques. (2) Sp. Prerequisite: Concurrent enrollment in Fixed Prosthodontics 110. Lab 6 hours. Radke
Course covers the basic techniques of fixed prosthodontics. RESTOR DENT

Course will acquaint students with the techniques available for the restoration of endodontically treated teeth with severe loss of coronal structure. RESTOR DENT

120A-B. Fixed Prosthodontics Theory. (1-1) F, W. Prerequisite: Fixed Prosthodontics 110 and 115. Lecture 1 hour. Radke (F), Lacy (W)
Fixed Prosthodontics 120A, in conjunction with Fixed Prosthodontics 125A, continues instruction in fundamentals of bridge construction. Fixed Prosthodontics 120B, in conjunction with Fixed Prosthodontics 125B, presents instruction in ceramics in metal restoration and its use as an individual restoration or in bridgework. RESTOR DENT

125A-B. Fixed Prosthodontics. (2-2) F, W. Prerequisite: Fixed Prosthodontics 110 and 115 and Biomaterials 110B-C. Lab 6 hours. Sherraden (F), Lacy (W)
Fixed Prosthodontics 125A, the laboratory corollary to Fixed Prosthodontics 120A, continues instruction of basic bridge construction. Fixed Prosthodontics 125B, the laboratory corollary to Fixed Prosthodontics 120B, presents instruction in ceramics in metal restoration as an individual entity, and also within bridge construction. RESTOR DENT

130A-B-C. Fixed Prosthodontics Theory. (1-1) SS, F, W. Lecture 1 hour F, W; 2 hours SS. Meli (SS), Tueller (F, W)
RESTOR DENT
170. New Concepts. (2) F, W, Sp. Prerequisite: Students in Fixed Prosthodontics Certificate Program must register for this course each quarter and summer session.

Lorencki

New concepts and theories are discussed and related to research and clinical practice. Students are encouraged to develop new concepts in the application of basic sciences and research to fixed prosthodontics. RESTOR DENT

171.01A-B-C. Clinical Procedures. (3-3-3) F, W, Sp. Prerequisite: Admission to postdoctoral standing and consent of instructor. Lecture 1 hour. Clinic 6 hours. Pavone

Instruction and practice in the diagnosis, treatment planning, and treatment of clinical patients. RESTOR DENT

171.02. Clinical Procedures. (2) SS. Prerequisite: Fixed Prosthodontics 171.01A-B-C. Clinic 6 hours. W. H. Noble

Clinical procedures in fixed prosthodontics. Course provides a continuation of clinical experience received in fixed prosthodontics. RESTOR DENT

172.01A-B-C. Advanced Clinical Procedures. (3-3-3) F, W, Sp. Prerequisite: Completion of first year and summer session of Fixed Prosthodontics Certificate Program. Lecture 1 hour. Clinic 6 hours. Eissmann

Advanced instruction and practice in the diagnosis, treatment planning, and treatment in fixed prosthodontics. RESTOR DENT

172.02. Advanced Clinical Procedures. (2) SS. Clinic 6 hours. Eissmann

Clinical procedures in fixed prosthodontics. Course provides a continuation of experience received in Fixed Prosthodontics 172.01A-B-C. RESTOR DENT

176A-B-C. Postgraduate Independent Study. (1.5, 1.5, 1.5) F, W, Sp. Research 3-15 hours. Lorencki

Original investigation in the field of fixed prosthodontics. RESTOR DENT

180. Oral Rehabilitation. (1) W. Seminar 1 hour. Lorencki

The field of fixed prosthodontics and its relationship to other dental disciplines will be explored by means of case presentations to provide students with a broad base of experience in oral rehabilitation techniques. RESTOR DENT

180.01. Selected Topics. (1) Sp. Seminar 1 hour. Enrollment limited. Lum

Individual staff members will offer seminar type instruction on selected topics related to fixed prosthodontics. RESTOR DENT

180.02. Senior Restorative Elective. (1) F. Lecture 1 hour. Mell

Advanced clinical restorative elective. Lectures describe the restorative general practice. Topics include those such as office layout, laboratory relations, treatment limitations, scheduling, financial arrangements, and treatment failures. RESTOR DENT

Clinical experience at the level of Fixed Prosthodontics 149. RESTOR DENT

189.02. Advanced Restorative Elective. (0-9) F, W, Sp. Prerequisite: Consent of instructor and approval of Clinic Review Committee. Lab variable. Radke, Staffannou

Advanced clinical restorative elective. Instruction in treatment of multiple restorative cases by quadrant or full arch approach. Students are selected to participate by the course director. RESTOR DENT

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

Forensic Pathology and Medicine

170.01. Basic Legal Principles. (1) Sp. Seminar 1 hour. Smuckler

Course covers basic legal principles; torts and contracts; medical records and documents; medical licensure and certification; forensic pathology; the expert witness; malpractice and professional liability. PATHOLOGY

General Dentistry

109.01. Community Dentistry Rotation. (0-9) F, W, Sp. Prerequisite: Certification of competency by the various departments in the school. Seminar 3 hours. Clinic 24 hours. Wycoff, Sinclair, M. Garcia

Multi-component rotation including seminars, patient group presentations, specialty grand rounds and comprehensive patient care. Supervised clinical and seminar experience in community setting. Students develop and explore their roles as members of the health care team and learn to meet community needs. GEN DENT

111. Problems In Dental Practice. (1) F. Lecture 1 hour. Wycoff

Survey course designed to introduce the student to current social and professional problems in dentistry. Topics include identifying patient, community, national, and professional needs, and how they are met. GEN DENT

Introduction to the clinical procedures and techniques used in the diagnosis, management, and control of oral disease. GEN DENT

120. Behavioral Sciences. (1) W. Lecture 1 hour. J. Fine

Introduction to the basic concepts, theories, and findings of the social sciences.
Emphasis is on the application of these concepts and modes of reasoning to pressing social problems and the delivery of health services. GEN DENT

Basic principles of biostatistics. Introduction to the concept of experimental reliability, fundamental principles of sampling techniques, selection of data, and variability. The student will plan, develop, and write a research protocol. GEN DENT

150. Dental Morphology. (2) F. Prerequisite: Concurrent enrollment in Dental Hygiene 150A. Lecture 2 hours. B. Hartman
The development and form of deciduous and permanent dentition and occlusion. Study of individual tooth and arch form to interarch relationships as well as endodontic morphology. GEN DENT

Genetics 86

200A. Principles Of Genetics. (3) § F. Lecture 3 hours. Kornberg, Herskowitz
In depth analysis of genetic mechanisms in selected procaryotes, eucaryotes. Topics include genetic exchange (conjugation, generalized and specialized transduction, transformation), recombination (general, site-specific, "illegitimate"), mapping, mutagenesis (induction and consequences), mobile genetic elements, gene expression, meiotic and mitotic segregation, allelism, position effects. BIOCHEM

215. Laboratory Rotation. (3) § F. W. Sp. Lab 9 hours. Guthrie
A laboratory rotation course to familiarize first year students with various approaches to research. Students are required to rotate through three different laboratories at least two subject areas, and give an open seminar at the end of each quarter. BIOCHEM

225. Topics in Genetics. (1½) § F. Lecture 1½ hours. Intended for second year graduate students. Course is not limited to graduate students in genetics. Herskowitz and Staff Students prepare a presentation and lead a discussion in consultation with a member of the Genetics Division staff. A different Genetics Division staff member will participate each week. Topics include specialties of the staff in consultation with the students. BIOCHEM

250. Research. (1.8) § F. W. Sp. Staff BIOCHEM

Health Sciences Education

200. Intro to Teaching Health Science. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lem
Course focuses on instructional techniques and strategies useful for the beginning instructor. Emphasis is on the development of an effective personal teaching style. Open to advanced graduates, residents, teaching assistants, and new faculty. PHARMACY

220A-B. Selected Topics. (2-2) § F. W. Prerequisite: Consent of instructor. Seminar 2 hours. Rosinski
Consideration of principles of learning, including individual student differences, techniques of instruction, and approaches to evaluation of student progress. Individual teaching plans are developed and critiqued. Emphasis is placed on the graduate and professional school student as a learner. MEDICINE

221. Teaching Allied Health. (2) § F. W. Sp. Seminar 2 hours. Rosinski
Graduate seminar integrating clinical experiences and academic course work of students enrolled in Kellogg Education Project. Relationships of course work experiences to future roles as allied health teachers are considered. Individual professional problems are analyzed. MEDICINE

310. Eval of Clinical Performance. (2) § F. W. Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Rosinski
A seminar to review and develop objective techniques in assessing the clinical performance and competence of students and practitioners. Techniques will be developed and validated for a number of clinical disciplines. MEDICINE

History

180. History of Dentistry. (1) W. Lecture 1 hour. B. Hartman
A lecture series on the evolution of dentistry from the dawn of civilization to modern times. Emphasis is placed on the changing concept of mere pain relief to the current science involving total restoration of the mouth, control and prevention of oral diseases. Inventiveness of the dentist, his role in the discovery and application of anesthesia, with constant involvement in community health problems of people over the ages is stressed. GEN DENT

History of Health Sciences

150. History of Pharmacy. (3) F. Lecture 3 hours. Sadee
Emphasis is on the historical development of pharmacy, its relationship to the other health professions, and the personalities who significantly contributed to the advancement of health care. HIST HL SC

170.02. Medical History & Bibliography. (1.5) § F. W or Sp. Lecture 1 hour. J. Saunders
Lectures and informal seminars on aspects of medical history. HIST HL SC
170.03. Evolution of American Medicine. (1-5) § F, W or Sp. Brieger
Lectures and informal seminars on the growth of American medicine from Colonial
times to the present, with an examination of the sociopolitical and socioeconomic factors
influencing that growth. HIST HL SC
170.06. Intro to History of Medicine. (1-5) § F, W or Sp. Lecture 1 hour. Independent
study variable. Todes
An introductory course intended for all
students in the history professions and
graduate students interested in the broad
central developments influencing the
growth of medical sciences and the health
professions from the classical to the modern
period. HIST HL SC

to Psychiatry 444. Brieger, Ostwald
Course emphasizes the effects of mental
illness on the lives of artists, scientists,
statesmen, and other public figures.
Biographical, autobiographical, and clinical
studies of exceptional people will be
compared. Students will be encouraged to
select individual subjects for research. HIST
HL SC

180.01. History of Soviet Medicine. (2-4) § F. Seminar 2-4 hours. Todes
Examination of medicine in the Tsarist
period, with emphasis on the impact of the
revolution and socialist construction upon
public health, the medical care delivery
system, the professional medical community
and medical science. HIST HL SC

188.08. Health & Human Rights. (2) § F. Seminar 2 hours. Brieger, Todes, Jansen, Jameton
A study of how fundamental social theories
give shape to health care practice. HIST
HL SC

195A. Doctors in Fiction. (2) § W. Seminar 2 hours. Todes, F. Schiller
Seminar examines the changing image of
the physician, and the social, professional,
philosophical and personal issues involved
in medical practice, as reflected in popular
literature. Course provides a consumer's view
of medicine in different societies and
historical periods. HIST HL SC

195B. Doctors in Fiction. (2) § W, Sp. Seminar 2 hours. Todes, F. Schiller
Continuation of History of Health Sciences
195A. Seminar examines the changing image
of the physician, and the social, professional,
philosophical and personal issues involved
in medical practice, as reflected in popular
literature. HIST HL SC

198. Supervised Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor.
Library research and directed reading
under supervision of a member of the faculty
with the approval of the chairperson of the
department. HIST HL SC

200. Historical Methods. (2-4) § F, W or Sp. Lecture 2-4 hours.
Staff
Special reading and discussion on
historiography and historical method with biweekly seminars designed to teach
students to do independent medico-historical
research and writing. HIST HL SC

203. Brain/Mind in Medical History. (1-2) § F, W or Sp. Lecture 1-2 hours.
F. Schiller
Introduction to the history of neurological
concepts. HIST HL SC

204. Non-Western Medical Systems. (1-2) § W. Prerequisite: History of Health Sciences
170.06. Lecture 1 hour. Veith
Seminar and directed readings on the
philosophy of Asian, Indian, and other non-
Western systems. HIST HL SC

205.01. Western Medical Attitudes. (1-3) § F, W. Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Guttentag
Exploration of the theoretical premises of
Western physiocrasy; relationship to other
disciplines, such as theology and man's
spiritual dimension, and other cultural
tendencies of the cohesive approach; dynamics of patient-physician relationship;
operational concepts, such as the clinical
entity. HIST HL SC

205.02. Western Medical Attitudes. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Guttentag
Extended reading and conferences of
History of Health Sciences 205.01. HIST
HL SC

206. Intro to History of Nursing. (2) § W. Lecture 2 hours. Blanc
For nursing instructors and graduate
students. History of the health sciences
upon which nursing practice is based. Methods and
examples for teaching history in the clinical
setting. HIST HL SC

207. Historical Bibliography. (1-2) § F, Sp. Zinn
Historical survey of health sciences
literature, illustrated by works from the
special collections in the library. Includes an
introduction to historical and modern
reference works and bibliographic methods
useful in research in the history of the health
sciences. HIST HL SC

209. Victorian Age Medicine. (2) § W. Prerequisite: Graduate standing. Lecture 2 hours.
Blanc
Investigation of medical facilities in
London during 1830-1870 along with modes of
practice, social setting, and levels of
scientific knowledge in the mid-nineteenth
century. HIST HL SC

210. History of Medical Education. (1-3) § W. Sp. Lecture 1-2 hours, plus paper or
research for 3 units. Brieger
Lectures, discussions, and readings on the development of medical theory and practice as taught from ancient times to the present. Emphasis will be on American medical education in the nineteenth and twentieth centuries. HIST HL SC

211. Theories of Human Nature. (3) § Sp. Prerequisite: Graduate standing. Lecture 3 hours. Jonsen
Course examines how several classical and modern authors in the Western philosophical tradition define human nature. Various basic theories and their implications for contemporary science and medicine are developed. HIST HL SC

220. Seminar. (1-3) § F, W, Sp. Seminar 1-3 hours. Staff
Students, staff, or guest lecturers present selected topics concerned with current research. HIST HL SC

HIST HL SC

251. Ethical Clinical Research. (1) § W. Seminar 3 hours on four days. Jonsen
Analysis of protocols for clinical research in terms of criteria for scientific validity and legal suitability; description of current local and national review process for approval of funded research. HIST HL SC

252. Ethical Theory. (3) § F. Prerequisite: Graduate standing or consent of instructor. Seminar 3 hours. Jonsen, Jameton
Basic concepts and methods of philosophical ethics with particular emphasis on respect for persons and justice, will be traced in classical and modern authors. Emphasis will be placed on critical analysis of ethical argument. HIST HL SC

297. Special Study. (1-3) § F, W, Sp. Staff
Reading and conferences for qualified students under the direction of a member of the staff. HIST HL SC

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the thesis for the master's degree. HIST HL SC

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. HIST HL SC

Hospital Dentistry

170. Emergency Medical Care. (1) W. Prerequisite: Postdoctoral or fourth-year standing. Seminar 2 hours. R. Lim
The course is designed to stimulate group discussion on the principles of emergency medical care. Topics include transportation, disaster planning, triage, cardiopulmonary resuscitation, management of shock, head and neck injuries, as well as special problems related to dentistry. ORAL MED

171. Physical Diagnosis. (2) Su. Prerequisite: Enrollment in a postgraduate specialty program or consent of instructor. Lecture 2 hours. Nakamura
Designed to prepare the oral surgeon to conduct a physical examination as a preliminary examination before performing oral surgical procedures. Techniques of examination are demonstrated and practiced in the classroom; examination of pathologic conditions is conducted at bedside. ORAL MED

172. Oral Biology Conferences. (1) W. Prerequisite: Postdoctoral standing. Silverman, Ware and Staff
Conferences include case presentations by interns and residents, and seminars covering selected subjects in oral biology relevant to clinical and preventive dentistry. ORAL MED

Human Biology

200A. Cell Biology. (3) § F. Prerequisite: Biochemistry 100A or equivalent, or consent of instructor. Lecture 3 hours. Stoeckenius
An introductory course in the structure, biochemistry, and function of the eukaryotic cell. PHYSIOLOGY

200B. Cell Biology. (3) § W. Prerequisite: Biochemistry 100A or equivalent, or consent of instructor. Lecture 3 hours. Stoeckenius
An introductory course in the structure, biochemistry, and function of the eukaryotic cell. PHYSIOLOGY

Human Development and Aging

With the 1982 addition of Professors Pearlman and Lieberman to the faculty, there will be an expansion of courses available. For further information, please contact the Program office.

201A-B-C. Interdisc Sem Human Development. (3-3-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Three-quarter course. Pearlman and Staff
Theory and research covering adolescence to old age from sociological, psychological, psychoanalytical, and anthropological perspectives. Topics include stress, personality and cognitive change, time perspective, values, socialization processes, and adaptation. Reading and paper required. PSYCHIATRY

202A-B. Analytic Methods. (3-3) § W, Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Kiefer (W), Chiriboga (Sp)
A two-quarter interdisciplinary course in qualitative and quantitative analytic methods in behavioral science. Students utilize data from case files and develop detailed research strategies. PSYCHIATRY
203. Prob Formulation & Res Design. (3) § F, W. Prerequisite: Consent of instructor.
Rosow
Students work on their own research interests in terms of problem formulation, research design, and/or operationalization. Emphasis dependent upon individual student needs. PSYCHIATRY

204. Personal Development. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours.
Kiefer
Representative works from behavioral science literature and world poetry and prose are brought together in the study of personality development in adult life. Compares insights from the two fields on how the developing person copes with social, historical, and psychological challenges. PSYCHIATRY

205. Data Analysis. (3) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours.
Rosow
Students either provide their own or use accessible data from ongoing research projects. Emphasis is on training in data organization, analysis, and research report writing. PSYCHIATRY

206A-B-C. Advanced Seminar on Stress. (2-2-2) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours.
Fiske, Horowitz, Chiriboga, Visiting Faculty
This pro-research seminar, for advanced students with a strong background in the stress research literature, is devoted to elaboration of stress theory and concepts, and refinement of methodologies addressed to specific research projects. PSYCHIATRY

208. Psychosocial Change in Adulthood. (3) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours.
Fiske
An advanced course for students familiar with social sciences and clinical studies of adult change. Emphasis will be on in-depth critiques of stage, process, stress, adaptation, and other conceptual models. PSYCHIATRY

209A-B-C. Interdisciplinary Sem on Aging. (3-3-3) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours.
Pearlin and Staff
Emphasis on the aging literature; one quarter each focusing on the individual and policy issues surrounding mental health and illness in later life; socialization, roles and intergenerational relationships; and cross-cultural studies of aging. PSYCHIATRY

210. Socialization to Old Age. (3) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours.
Rosow
A seminar on adult socialization theory, with prospective socialization to an aged role as a special concern. Major issues involve norms for older people, the structure of socialization situations, and the pressure of variables normally affecting socialization in earlier status transitions. PSYCHIATRY

214. Social Science Philosophy. (2) § Sp. Prerequisite: Consent of instructor. Seminar 2 hours.
Kiefer
Exploration of the philosophies of knowledge which underlie medicine, natural science, and social science. Course offers an approach to behavioral problems in health care which reconciles medical and social science epistemologies. For both health professional and social science students. PSYCHIATRY

220. Pro-Seminar. (1) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours, given in alternate weeks. Staff
Students, staff, or guest lecturers present selected topics based on their current research. PSYCHIATRY

221. Life Stress & Adaptation. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours.
Chiriboga, Fiske
Qualitative and quantitative analyses of life history protocols focusing on stress and perceptions of stress in relation to a variety of indicators of adaptation such as physiological, physical, social at various life stages from adolescence to old age. PSYCHIATRY

227. Biological Aspects of Aging. (2-3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Independent study 3-4 hours.
Ellman
Physiological, biochemical, neurological, and anatomical changes occurring with aging are discussed. Important questions include the possible relationships to functional behavior of these changes in humans and the relevance of internal changes to psychological states. PSYCHIATRY

232. Kinship Structure. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours.
Thurnher
Kinship structure in Western and non-Western societies with emphasis on the life cycle perspective of family roles and relations. Consideration is given to relevant empirical studies and case material. PSYCHIATRY

249. Special Studies. (2-8) § F, W. Prerequisite: Consent of instructor. Staff
Students select special problems to investigate on an individual or collaborative basis. These studies may be conducted through readings, the collection and analysis of empirical data, or the development of conceptual analyses or methodologies. PSYCHIATRY

250. Research. (1-8) § F, W. Staff
PSYCHIATRY

299. Dissertation. (0) § F, W. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. PSYCHIATRY
Human Sexuality

R. Day

Social, behavioral, and clinical aspects of human sexuality are covered in a series of lectures. Lectures will present didactic material. PHARMACY

Interdepartmental Studies

135. Reproduction Growth & Devel. (3) F. Lecture 3 hours. Charlton, Parer

Course is designed to trace the biological mechanisms concerned with conception, development of the fertilized ovum through embryonic and fetal life, and postnatally to the mature individual. OB GYN RS

Jonsen, Dunphy

Course will discuss economic forces, ethical and legal issues, social and cultural factors, and governmental policies affecting medical practice. It will define professional responsibilities in the context of these influences and the resulting forms and trends in medical practice. SURGERY

Laboratory Medicine

140.01. Clinical Pathology. (1½ per week) Su, F, W, Sp. Prerequisite: One year of medical school and consent of instructor. Gottfried

Laboratory sessions and seminars on aspects of clinical chemistry, hematology, microbiology, blood banking, and radioisotopes are held in the clinical laboratories at UC and SFGH. LAB MED

140.03. Hematology Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Second year of hematology or equivalent. Recommendation from one faculty member.

Shohet and Staff

Clerkship primarily in the clinical evaluation of hematologic patients. As interesting clinical problems arise, time will be available for laboratory projects relevant to those problems. Students will act as primary consultants under close supervision of hematology residents and fellows. LAB MED

140.05. Clinical Pathology-VMC (1½ per week) F, W, Sp. Prerequisite: Medicine 110 and consent of instructor.

M. Fisher, Sobenes

Clerkship in laboratory medicine including indications for tests, problems of collection and performance, interpretation of data to assist clinicians in rendering diagnoses and following therapy. Topics include clinical chemistry, radiisotopic pathology, hematology, immunology and serology, blood banking, microbiology, mycology, parasitology. LAB MED

150.01. Laboratory Medicine-UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Townsend

An intensive four-week seminar series, using patient data, designed to increase the student's ability to choose and interpret laboratory tests in a variety of clinical settings. The scope of tests discussed includes hematology, blood banking, clinical chemistry, and microbiology. LAB MED

Lab MED

170.01. Clinical Pathology-SFGH (2) Su, F, W, Sp. Gottfried

Laboratory sessions and seminars on aspects of clinical chemistry, hematology, hematology, blood banking, and radiisotopes are held in the clinical laboratories at UC and SFGH. LAB MED

Residents prepare summaries of selected clinical cases which present problems in correlation of clinical and laboratory data. Residents and faculty discuss relevant literature with special reference to technical aspects of laboratory procedures and interpretation of results. LAB MED

Review of current laboratory procedures and problems in hematology, microbiology, immunology, blood banking, chemistry, and application of isotopes. Library research and occasional formal reports are required. LAB MED

Research programs are arranged with appropriate faculty members on an individual basis. LAB MED

Seminars in clinical pathology including clinical chemistry, hematology, immunohematology, microbiology, parasitology, and serology are conducted by faculty whose major interest is that under discussion. Residents do collateral reading for discussion of problems of interpretation, diagnosis, techniques, and research approaches. LAB MED

Principles of laboratory tests in hematology, chemistry, microbiology, and blood
banking as well as interpretation of results and correlation of clinical and laboratory data. Residents participate in performance of tests and certain administrative duties related to operation of clinical laboratories. LAB MED

451. Clinical Pathology Theory, (5-10)
Su, F, W, Sp. Marton, Gottfried, Nickoll

Theory and methodology of clinical chemistry, serology, blood banking, hematology, microbiology, parasitology, and clinical microscopy. Emphasis is on interpretation and correlation of data and study of literature.
LAB MED

Medical and Biological Illustration

200A-B-C. Introduction to Graduate Study. (2-2-2) § F, W, Sp. Lecture 2 hours. Three quarter course. Wakerlin, Beindorf

Overview of theory in informational development. Review and development of writing, style and form for reports, essays and theses. Study of scriptwriting for media as a special form and style of literary expression and language usage. MED ILLUS

201A-B-C. Illustration Theory. (3-6, 3-6, 3-6) § F, W, Sp. Lecture 2 hours. Lab 3 hours.

Wakerlin

Theoretical and practical considerations in illustration design for publication, slides and motion media; introduction to surgical illustration such as procedures, rules, observation, design technology and introduction to graphic arts and printing technologies; introduction to biological illustration; statistical graphics. MED ILLUS

204A-B-C. Advanced Illustration. (3-6, 3-6, 3-6) § F, W, Sp. Prerequisite: Medical and Biological Illustration 201A-B-C.

Wakerlin, Dohrmann

Theory and practice in visual information design. Surgical illustration for publication and for projected media; publication design, layout, typography, paste-up and print technology. MED ILLUS

Wakerlin, Beindorf, B. Morris, Dohrmann

Review of anatomy and observation of the ear and eye through oto scope, ophthalmoscope and slit lamp. Ophthalmological illustration; endoscopic drawing; finished illustrations of a retinal field, slit lamp and a microsurgical procedure. MED ILLUS

210. Teaching Styles & Strategies. (4) § F. Prerequisite: Consent of instructor. Lecture and Lab 40 hours given as one week of workshops.

Wakerlin, Beindorf

Introduction for prospective teaching assistants to instructional techniques and strategies, learning-teaching, organizing study plans, presentation of information, student-teacher interactions, evaluation of learning and teaching, theories of learning and communication, planning audiovisual support materials. MED ILLUS

Wakerlin, Beindorf

Ongoing seminar periodically throughout the program. Analysis of productions in all media. Readings and discussion of instructional design, communication and learning theory, and methods of evaluation. Participation by guest lecturers. MED ILLUS

230A-B-C. Intro to Communication Media. (3-6, 3-6, 3-6) § F, W, Sp. Lecture 1 hour. Lab 6 hours.

Beindorf

Survey of media production technology and formats. Still photography methods; black and white and color. Theory of media production in film, television and slide-tape augmented by consideration of techniques in storyboarding, scriptwriting, sound and picture editing and animation. MED ILLUS

231. Advanced Media I. (3-6) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours.

Beindorf

Theory of motion media and practice in film and electronic camera techniques, editing, sound production and mixing, and project management. MED ILLUS

232. Advanced Media II. (3-6) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours.

Beindorf

Theory of production design. Roles of production personnel and task definition. Practice in preproduction plan of actual production to be selected for later production in slide-tape, film and television. Production subject to faculty approval and identification of funding. MED ILLUS

233A. Advanced Media III. (3-6) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 9 hours.

Beindorf

Theory and techniques of motion picture animation. Design and production of short full animation sequence with sound. Longer animated segment may be designed for completion in Medical and Biological Illustration 233B with consent of instructor. MED ILLUS

233B. Advanced Film Animation. (3-6) § F, W, Sp. Prerequisite: Medical and Biological Illustration 233A and consent of instructor. Lecture 2 hours. Lab 9 hours.

Beindorf

Elective continuation of Medical and Biological Illustration 233A, in motion picture film animation. MED ILLUS

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in the thesis project for the master's degree. MED ILLUS

421. Motion Media. (4) F. Lecture 2 hours. Lab 6 hours.

Beindorf, Banks

Film and television. videotape production in a studio setting with insertion of student-produced motion pictures. Theories of
motion, dynamics of balance, subjective camera motion. Basic cinematography, TV technology, production economics. MED ILLUS

423. Graphics for Publication. (4) F, W. Sp. Prerequisite: Medical and Biological Illustration 201A B-C and consent of instructor. Lecture 2 hours. Lab 6 hours. 

Wakerlin

Brochure design and production; photography in graphic design; layout; copy fitting; camera-ready mechanicals; typography; printing; photoengraving; specifications for printing; paper stocks, inks, etc. MED ILLUS

431A. Project I. (5) F, W, Sp. Prerequisite: Medical and Biological Illustration 201A B-C and 230A B-C. Lecture 2 hours. Lab 9 hours.

Staff

Students work on an actual instructional unit in medium of their choice determined by teaching needs and developed through instructional design concepts, storyboard, script, production planning and budget. MED ILLUS

431B. Project II. (5) F, W, Sp. Prerequisite: Medical and Biological Illustration 431A and consent of instructor. Lecture 2 hours. Lab 9 hours.

Staff

Continuation of project production begun in Medical and Biological Illustration 431A. MED ILLUS

431C. Project III. (5) F, W, Sp. Prerequisite: Medical and Biological Illustration 431A and 431B and consent of instructor. Lecture 2 hours. Lab 9 hours.

Staff

Completion of project. MED ILLUS

435. Special Study. (3-4) F, W or Sp. Prerequisite: Consent of instructor and approval of director. Wakerlin, Beindorf

An elective for special study in area of choice. MED ILLUS

436A-B-C. Portfolio and Graduate Show. (4-4-4) F, W, Sp. Lecture 1 hour. Lab 9 hours. Wakerlin, Beindorf

Portfolio design and assembly; design and production of graduate show including budget and arrangements for space, guest lists, invitations, food and beverages for reception. MED ILLUS

Medical Diagnosis

Crede and Staff

The dental intern participates in medical history-taking, physical examinations, ordering laboratory tests, and developing differential diagnoses on medical clinical patients under the supervision of the medical staff. Comprehensive care of patients is emphasized. GEN DENT

Medical Information Science

172. Programming Style. (3) § W. Prerequisite: Medical Information Science 171 or equivalent or consent of instructor. Lecture 3 hours. Wasserman

A systematic approach to the design and construction of computer programs. Development of clear, reliable, efficient and easily modifiable programs; introduction and use of Pascal; use of software tools; programming exercises involving advanced programming techniques. MED INF SC

190. Information Structures. (4) § Sp. Prerequisite: Knowledge of one higher level programming language. Lecture 3 hours. Lab 3 hours.

Staff

Course covers elementary and high level information structures, data models, file organization techniques and searching, and sorting. Special topics in non-numerical information handling are also included. MED INF SC

199. Laboratory Project. (1-5) § F, W, Sp.

Wakerlin, Beindorf

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. MED INF SC

201. Content & Format of Information. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Whiting-O’Keefe

Consideration of the uses of medical information and its content, organization, and format to serve these uses. Emphasis is on the medical record as a medium of medical information communication, and a review of medical information coding methodologies. MED INF SC

202. The Medical Environment. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Blois

Survey of the professions, institutions, organizations, and populations involved in the health care process; the aims, expectations, and constraints involved in the medical environment. Course provides background for students without previous medical health care systems experience, concerning processes and functions. MED INF SC

210A. Computer Systems I. (4) § F. Prerequisite: Medical Information Science 190 or equivalent, or consent of instructor. Lecture 3 hours. Lab 3 hours. Wasserman

Introduction to computer system architecture and organization; operating systems; programming languages and their design. MED INF SC

210B. Computer Systems II. (4) § W. Prerequisite: Medical Information Science 210A or equivalent, or consent of instructor. Lecture 3 hours. Lab 3 hours. Wasserman

Language processors; software engineering concepts; specification and design of software systems; and software reliability. MED INF SC

222. Systems Analysis of Medical Care. (3) § W. Lecture 3 hours. Stimson

Introduction to use of operations research
and systems analysis as aids to design, management or evaluation of medical care systems. Application of operations research techniques to hospitals and other health care facilities is studied within a systems framework. MED INF SC

225. Design of Systems. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours.

The design of previous medical information systems is examined. Successful components of the systems will be studied in depth, with respect to cost, performance, and acceptability. Field trips to existing systems will be made. MED INF SC

240. Data Base Management. (3) § Sp. Prerequisite: Medical Information Science 210B or equivalent, or consent of instructor. Lecture 3 hours.

Course covers techniques for logical and physical database organization, data independence, models of data, approaches to large-scale database management, security and privacy, data description languages, and query languages. MED INF SC

Course covers the treatment of a number of fundamental concepts which form the basis of information science, such as the nature of information and communication, and the problem of representation of knowledge. MED INF SC

MED INF SC

Selected topics in medical information science. Subjects chosen will range from special topics in information science to hardware, software, and systems studies. MED INF SC

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. MED INF SC

Medicine

110. Medicine Core Clerkship. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 131A, B-C and 132A, B-C. Open to UGSP students only.

L. H. Smith, Carbone, Slesinger, R. Haber, Woebner

Students are part of the ward team with the house staff and faculty. bedside instruction in history-taking, physical diagnosis, selected seminars in general medicine including the psychiatric aspects of medicine, and presentations and demonstrations of relevant cases. MEDICINE

131A-B-C. Intro to Clinical Medicine. (1-2-3) F, W, Sp. Prerequisite: First-year standing or consent of instructor. Lecture 1 hour F. Section work 2 hours F; 4 hours W, Sp.

Alman

Interdepartmental instruction in interviewing skills and techniques; basic physical examination and interpretation of symptoms relating to locomotor system, eye, ear, upper respiratory tract, and skin; and social responsibilities of medical practice. Lectures, clinical demonstrations, conferences, preceptorship in ambulatory care setting. MEDICINE

132A-B-C. Intro to Clinical Medicine. (8-8-3) F, W, Sp. Prerequisite: Anatomy 100, 102, and 103; Biochemistry 100A-B; Medicine 131 A-B-C; Microbiology 100A and 100B (may be taken concurrently); Pathology 101, 102, and 103 (may be taken concurrently); Physiology 100 and 101; or consent of instructor. Lecture 5 hours F, W, 1 hour Sp. Lab 2 hours F; Section work 4 hours F, Sp; 6 hours W.

Alman

Continuation of interdepartmental course on pathophysiology of disease and techniques of collecting and assessing clinical data, including history-taking, examination of the patient, and use of laboratory tests. Lectures, demonstrations, bedside work, laboratories, conferences, and independent study. MEDICINE

140.01. Advanced Medicine Clerkship. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Satisfactory completion of Medicine 110 and consent of instructor for third-year students.

L. H. Smith, Carbone, Slesinger, R. Haber, Woebner

Students are assigned patients on the staff and private wards. They are supervised by attending and resident staff. They present patients on ward rounds, assist with procedures, and attend specialty conferences where their patients are involved. MEDICINE

140.02. Off-Campus Clerkship. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and approval of third- and fourth-year coordinator.

L. H. Smith, Carbone

Clinical clerkships in off-campus hospitals approved by the department chairperson, third- and fourth-year coordinator and the dean. MEDICINE

140.03. Adv Medicine Clerkship CRJ-LC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and 131A, B-C.

Friedman and Staff

On Clinical Cancer Chemotherapy Service, students work up patients, present them to attending staff and at conferences, do daily procedures, and write orders under supervision. MEDICINE

140.04. Advanced Medicine Clerkship-NRMC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110.

B. Potter

Clinical clerkship at NRMC. Student functions as intern on ward medicine under supervision of residents and attending staff, or acts as consultant in selected subspecialty
under supervision of board certified staff.

MEDICINE

140.05. Cardiology—PMG. (1½ per week)
Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor.

Selzer
Students participate in various clinical cardiological activities and attend related teaching conferences and patient rounds. They are instructed in electrocardiographic interpretation and participate in daily ECG teaching sessions. MEDICINE

140.06. Occupational Medical Practice.
(1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor.

Hine, Garb
Clerkship at an industrial medical dispensary, for two to four weeks; supervised instruction in the diagnosis of industrial disease, surveillance of industrial hazards, and health promotion activities. MEDICINE

140.08. Gastroenterology—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Schmid
Students become a part of the gastroenterology group and participate in all activities including work up of patients in clinics and wards. They attend all conferences. MEDICINE

140.09. Cardiology—MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and 140.01 or equivalent senior ward medicine experience. Consent of instructor.

Mailhot, E. Cohen, Paley
Students work up patients, follow through diagnostic procedures, phonocardiograms, echocardiograms, stress electrocardiograms, nuclear cardiology, and angiocardio graphic studies. Instruction in diagnosis of heart disease, pathophysiology of heart disease, heart sounds and therapy. Attendance at departmental conferences. Reading assigned. MEDICINE

140.10. Pulmonary Medicine—MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and 140.01 or equivalent senior ward medicine. Consent of instructor.

Addison
Consultative service including diagnostic pulmonary problems. Intensive Care Unit consultations. Fiberoptic bronchoscopy and physiologic evaluation. Students will work up patients and follow them on a daily basis, discussing all aspects of their care with pulmonary residents and attending physician. MEDICINE

140.15. Advanced Medicine Clerkship—K.
(1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Limited to fourth-year students.

Fessel
Students based at K serve as clinical clerks. They examine patients, participate in ward rounds and attend teaching seminars and conferences of the Department of Medicine. MEDICINE

140.16. Hematology—SFH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Embry, R., O. Wallerstein, R. Cohen
Students work up hematology patients; review pertinent clinical laboratory data of problems presented; attend slide rounds; assist in preparation of material for sessions; attend hematology rounds. MEDICINE

140.18. Gastroenterology—V. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Brandborg
Students are incorporated into the Gastroenterology Unit. They are assigned consultations, perform sigmoidoscopies under supervision, observe gastrointestinal endoscopy, and small bowel biopsy. They participate in all rounds and conferences. MEDICINE

Karliner
Students share consultations and on-call with cardiology residents; work up patients on wards in CCU; assist at DC electrical con-

version; interpret EKG's and vectorcardiograms; attend rounds and conferences. MEDICINE

140.20. Infectious Disease—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

J. Conte
Students work up and present patients under the direct supervision of the infectious disease resident. Patients are presented at attending rounds and infectious disease conferences. MEDICINE

140.21. Private Practice. (1½ per week)
Su, F, W, Sp. Prerequisite: Medicine 110.

I. H. Smith, Carbone
Working experience with an internist on the clinical faculty as he makes rounds in various private hospitals and at UC sees patients in private office and on house calls, does follow-up studies, and reads electrocardiograms. MEDICINE

140.22A. Pathophysiology—Cardiovascular. (6) W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

S. Johnston, Siegengs, Scheinman
Overview emphasis on prototypes of cardiac disease demonstrating fundamental physiologic defects. Lectures cover background material and general concepts. Students participate in discussions, attend laboratory demonstrations, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22B. Pathophysiology—Hematology. (6) F, Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

Siperstein, Siegengs, Dapman, Ries
Overview emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiologic defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are
encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE 140.22C. Pathophysiology-Renal Disease. (6) F. Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sebastian, Sleisenger

Intensive review of renal physiology and pathophysiology. Two seminars per day. Two-volume syllabus of journal articles provided. Students participate in discussions and learn to evaluate literature critically. MEDICINE 140.22D. Pathophysiology-Oncology. (6) F, W. Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

Siperstein, Sleisenger, L. Epstein

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE 140.22E. Pathophysiology-Derm/Inf Disease. (6) F. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

Siperstein, Sleisenger

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE 140.22F. Pathophysiology-Pharmacology. (6) F. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sebastian, Sleisenger, Hoford

Emphasis on rational therapies. Participation in daily activities of the clinical pharmacokinetics laboratory to understand the effect of disease on drug disposition. Lectures cover theory and application of pharmacokinetics and pharmacodynamics to the treatment of disease. Reading lists. MEDICINE 140.22G. Pathophysiology-Immunology. (6) W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sobol, Sleisenger, Stobbe

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE 140.22H. Pathophysiology-Neurology. (6) F. Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

Siperstein, Sleisenger, I. Diamond

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE 140.22I. Pathophys-Endocrine Metabolism. (6) F. Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110.

Sobol, S., L. Kaplan

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE 140.22J. Pathophys-Gastroenterology. (6) Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sobol, Sleisenger, Ockner

Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE 140.22K. Pathophysiology-Pulmonary. (6) W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sobol, Sleisenger, Boushey, W. Gold

Emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, workshops, seminars; are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE 140.22L. Pathophysiology-Nutrition. (6) W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sobol, Sleisenger, Nestle

Emphasizes biochemical and physiological concepts that determine nutritional management of problems in clinical medicine. Students attend lectures, participate in discussions and develop an independent ability to critically evaluate research literature in nutrition and apply information to management of specific clinical problems. MEDICINE 140.23. Endocrine Metabolism-UC (1 ½ per week) F, W. Sp. Prerequisite: Medicine 110.

Baxier, Karam

Students based at Moffitt Hospital, eleventh floor east, act as assistants to interns, residents and research fellows on the ward; attend endocrine and metabolic clinics and seminars, and teaching exercises of endocrinology and metabolism, including Medicine Grand Rounds. MEDICINE
140.24. Rheumatology & Immunology -UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Sobo

Familiarization with clinical manifestations, rheumatic disease therapy, immunologic disorders. Participation in in/outpatient clinics. Basic immunologic principles as related to clinically apparent immunologic dysfunction. Assignment of pertinent literature, lectures, and introduction to principles and practice of various immunologic testing. MEDICINE

140.25. Renal Disease -SGFH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Humphreys

Students work-up and follow renal and electrolyte patients seen in the service, participate actively in hemodialysis and peritoneal dialysis; attend three-weekly ward rounds and bi-weekly seminars in renal and electrolyte diseases. MEDICINE

Primary emphasis is on the treatment of acutely ill patients in Coronary Care Unit and Intensive Care Unit. Includes teaching in the use of monitoring and related electronic equipment, cardiovascular, and related aspects of electrocardiography. MEDICINE

140.27. Cardiopulmonary -C. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Keroses

Students attend rounds in the Coronary Care Unit, receive instruction in cardiology, stressing electrocardiography; may work in the pulmonary function laboratory, and attend all regular teaching conferences and seminars. MEDICINE

140.28. Infectious Disease -SGFH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. J. Mills

Course includes active consultation service averaging three new consultations per day. Daily patient rounds; weekly combined infectious diseases/pediatrics mini-rounds and infectious diseases intercity rounds. Introduction to two infectious diseases clinics per week. Reading and library research. MEDICINE

140.29. Hematology -UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Shoheit

Students work-up and present patients in the wards and outpatient clinics, participate in conferences and seminars, and learn the laboratory procedures applicable to their patients. MEDICINE

140.30. Endocrine Metabolism -SGFH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Biglieri, Schambelan and Staff

The Endocrine-Metabolic Service provides daily house staff/fellow-supervised consultations, weekly clinic, bi-weekly rounds with senior staff, conferences on current research. Emphasis on clinical investigations of endocrine disorders in the Clinical Study Center, a seven-bed multiscategorical General Research Center. MEDICINE

Students function as clinical clerks, working-up patients under supervision of interns and residents. They assist in such specialized procedures as sigmoidoscopies per oral endoscopies. They attend radiology and pathology conferences and seminars with visiting consultants. MEDICINE

140.32. Coronary Care -SGFH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Fourth-year standing or consent of instructor. A four-week cardiology elective or Medicine 140.05 is recommended. N. Goldschlager, Rapaport

Students work as interns in the Coronary Care Unit and attend all regular teaching conferences and seminars. MEDICINE

140.33. Infectious Diseases -PMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Open to UCSF students only. Valentine

Students may elect clinical clerkship in infectious diseases. Activities include working-up patients, relating laboratory data to clinical situations, making ward rounds, and attending seminars. MEDICINE

140.34. Renal Disease -UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Rector

The student will join the renal team and participate under supervision in evaluation and treatment of patients with renal disease or disorders of fluid, acid-base, or electrolyte balance. Emphasis is placed on pathophysiology, history-taking, physical examination, and treatment. MEDICINE

140.35. Cardiology -SGFH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Chetlin, Rapaport, N. Goldschlager, Warnowicz, Byrd

Students see patients in consultation on wards and clinics, read electrocardiograms, review cases with cardiac consultant, and attend all seminars and conferences. MEDICINE

140.36. Emergency Medicine -UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and consent of instructor. Heller

Students serve forty hours per week, Monday through Friday, as externs working and sharing responsibilities with residents and interns. Lectures and emergency medicine conferences are held daily. Emphasis is on bedside instruction. MEDICINE

140.37. Coronary Care -PMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Medicine 140.05 or equivalent four-week cardiology elective recommended. Limited to fourth-year students. Pasternak

Students will work-up, formulate treatment plans, and follow patients in the Coronary Care Unit. Daily rounds will be made with
resident and attending staff. Opportunity to participate in other teaching rounds, conferences, and ECG reading as time permits. MEDICINE

140.38. Rheumatology/Office Practice—K (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and consent of instructor.

Feigenbaum

Primary office practice of clinical rheumatology dealing with all common rheumatologic problems encountered in daily clinical practice. Opportunity to attend regular staff rounds and formal teaching rounds in rheumatology at K. MEDICINE

140.39. Pulmonary Disease—UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Bowlby

Students examine patients in Chest Clinic; on the wards and in ICU, and present them at ward rounds. Students are assigned to pulmonary function testing and radiology conferences. They participate in pulmonary function testing and do assigned reading. MEDICINE

140.40. Pulmonary Disease—AB (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Lifshay

Students examine patients in the outpatient office, on wards, ICU, RCU and present them at rounds. Opportunity to participate in pulmonary function testing, and to participate in respiratory therapy and chest physical therapy techniques. MEDICINE

140.41. Gastroenterology—SPGH (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Limited to fourth year students. Cello

Students are responsible for evaluation of gastrointestinal patients on medical and surgical wards. Student work-ups are thoroughly discussed with gastroenterology staff. Students observe GI techniques including sigmoidoscopy, colonoscopy, endoscopy, liver biopsy. Daily clinical conferences are held at three affiliated hospitals. MEDICINE

140.42. Toxicology & Occup Med—SPGH (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Preference given to UCSF students. Limited enrollment for off-campus students. C. Becker

Students evaluate patients in hospital and clinic settings. Students participate in patient oriented rounds with special emphasis on toxicology, occupational medicine, drug overdose, drug abuse and alcoholism, as well as treatment of cardiovascular and gastrointestinal diseases. MEDICINE

140.43. Rheumatology & Immunology—VA (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Seaman

A four- to twelve-week introduction to rheumatology and immunology, offering both clinical and laboratory experience. The student will participate in inpatient and outpatient care and take part in didactic and practical aspects of the rheumatology program. MEDICINE

140.44. Pulmonary Disease—UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Kaltreider

Students examine patients in the Chest Clinic, on the wards and in ICU, and present them at ward rounds, pulmonary function and radiology conferences. They participate in pulmonary function testing and do assigned reading. MEDICINE

140.45. Endocrine Metabolism—VA (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Limited to fourth year students. Enrollmen t limited. Priority given to UCSF students. Siperstein, Arnaud

An introduction to the diagnosis and treatment of endocrine-metabolism diseases. Areas covered include endocrinopathies involving the major endocrine glands, as well as diabetes mellitus and hyperlipemias. Patients will be examined and treated in both the inpatient and outpatient services. MEDICINE

140.50. Hematology, Oncology—MZ (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. R. Cohen, Glassberg

Intensive clinical course emphasizing the diagnostic evaluation and management of patients with blood disease or cancer. The latest techniques in therapy are studied with stress on blood morphology and laboratory test interpretation. Exposure to specialized oncology care unit also available. MEDICINE

140.51. Gastroenterology—MZ (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and consent of instructor. Aron

Clinical clerks participate in diagnosis and treatment of patients with gastrointestinal problems, biopsy and endoscopic procedures, and use of medical literature in clinical problem solving. Weekly seminars in pathophysiology, journal club, and tissue review supplement a full conference schedule. MEDICINE

140.52. Renal Disease—VA (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Arleff

Clinical clerkship in clinical nephrology. Lectures, rounds, conferences, renal biopsy review. Patients with acute and chronic renal disease, acute and chronic dialysis patients, patients with fluid and electrolyte problems. Renal grand rounds, journal club, nephrology research, and renal pathophysiology conferences weekly. MEDICINE

140.53. Infectious Disease—MZ (1½ per week) F, W, Sp. Prerequisite: Medicine 110. L. Drew, Mintz

Clinical Infectious Disease Service and Clinical Microbiology laboratory provide optimal integration of clinical and laboratory medicine. Emphasis on learning techniques of diagnostic microbiology such as bacteriology, virology, parasitology, mycology, and diagnosis management of patients with infections; research in either area. MEDICINE
140.54. Nephrology—AR (1½ per week) F, W, Sp. Prerequisite: Medicine 110.
L. Gold, Block, Karlinsky
Rounds with directors of Renal Service include inpatients with a variety of renal diseases such as fluid, electrolyte and acid-base disorders; outpatients on chronic hemodialysis; and exposure to acute hemodialysis and related problems. Didactic sessions in clinical renal physiology. MEDICINE

140.55. Advanced Medicine Clerkship—C (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Limited to fourth-year students.
Busch
Students, teamed with a resident, will evaluate and share in the care of patients admitted to an acute care hospital. Experience includes history-taking, physical examination, therapeutic plan, and progress notes. Attendance at daily teaching rounds and conferences. MEDICINE

140.56. Geriatric Medicine (1¼ per week) Su, F, W, Sp. Prerequisite: Medicine 110.
Feigenbaum, H. Brownstein, Botkin, L. Fink
Course offers opportunity for participation in various medically oriented geriatric programs. Assignment to health care teams seeing patients at home, at MZ Geriatric Day Care Center, and the Jewish Home for the Aged. Supervision under MZ faculty and house staff. MEDICINE

140.57. Cardiology—VMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor.
J. Abbott
Students see patients in the coronary care unit, wards and clinics at the University of California Teaching Facility at Fresno. They will develop and implement treatment plans with the consultant, read electrocardiograms, and attend all seminars and conferences. MEDICINE

140.58. Pulmonary Disease—VAF (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. Stauffer
Students on Chest Service will have primary care responsibilities for medical inpatients under supervision of the Physician Director of the Respiratory Care Service. Instruction on topics such as the use of respirators, arterial blood gas sampling and techniques. MEDICINE

Rotation through an active renal transplant service including clinical immunology, clinical renal pathophysiology, renal diagnosis such as X ray, biopsy, scan. The student's experience in the care of inpatients and outpatients will encompass other internal medical problems as well. MEDICINE

140.60. Rheumatology—VMC & VAF (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. Berkien
Experience with rheumatic diseases and chronic musculoskeletal pain including arthropathies and collagen-vascular disorders as seen in clinics. Develop skills in history-taking, physical examination, selection and interpretation of diagnostic procedures, approaches to management, including drug therapy. Supervision by division chief and faculty. MEDICINE

140.61. Advanced Medicine Clerkship—VAF (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. Morrelli
Assignment to team with first- and second-year resident; rounds with attending faculty four to five times weekly; attend daily noon conferences; increase skills in history-taking, physical examination, write-ups, and oral presentation. Experience in writing orders countersigned by resident. MEDICINE

C. Getz
Emergency room experience providing acute care to a mixed inner-city and middle class population. Students see medical emergencies, minor trauma, and acute problems in a variety of disciplines including gynecology, ophthalmology, ENT, and orthopaedics. Attendance at specialty conferences encouraged. MEDICINE

140.63. Advanced Medicine Clerkship—KP (1½ per week) Su, F, W, Sp. Shern
Fourth-year elective rotation for one month on medical wards at Kaiser Foundation Hospital in Oakland. Students will be integrated into the residency training program and will be involved in the care of hospitalized patients in an urban community prepaid health plan hospital. MEDICINE

140.64. Cardiology—UC (1½ per week) F, W, Sp. Prerequisite: Medicine 110.
D. Perloff, Scheinman
Instruction in interpreting electrocardiograms as well as other diagnostic procedures used in cardiology, such as echocardiography, exercise testing, use of radioisotopes, electrophysiology, hemodynamics and radiologic studies. Students regularly attend cardiac and hypertension clinics, cardiology conferences and rounds. MEDICINE

140.65. Oncology—UC (1½ per week) W. Prerequisite: Medicine 110 or Pediatrics 110 or Surgery 110.
L. B. Epstein
Four one-week clinical rotations taught by faculty in inpatient medical, pediatric, radiation and surgical oncology. Daily noon lectures on diagnosis, management, therapy of patients with malignancy by faculty and guest oncologists. Syllabus of pertinent references from current oncology literature. MEDICINE
140.66. Internal Medicine - VMC (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. Libke

Students assigned to teams with first- and second-year residents, rounds with attending faculty, participate in daily conferences. Emphasis on pathophysiology of disease processes, management of acute medical problems. Refine skills in history-taking, physical examination, write-ups, presentations, techniques of diagnostic procedures. MEDICINE

140.67. Ambulatory Care - VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing and Medicine 110.

Nightingale, Ginier

Students refine clinical skills through participation in pre-admission evaluation of ambulatory patients. Schedule also permits participation in selected specialty clinics. Students attend daily conferences of the Department of Medicine. MEDICINE

140.68. Infectious Disease - VMC & VAF (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Libke, Aduan

Management of common and unusual infectious diseases. May include use of antimicrobials in presence of impaired renal or hepatic function, treatment of infection in immunologically compromised host, etc. Participation in patient evaluation, treatment follow-up, ward rounds, conferences. Microbiology laboratory can be arranged. MEDICINE

140.69. Cardiology - VMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. Grayson

Participation with housestaff in patient care on CCU, ICU, medical wards, outpatient clinics. Introduction to invasive and non-invasive diagnostic procedures, techniques of management in care of hospitalized and ambulatory patients. Attend ECG interpretations, CCU rounds, consults, and teaching conferences. MEDICINE

140.70. Hematology, Oncology - VMC & VAF (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing and Medicine 110.

Stolberg, Jensen-Akula

Students participate in the work-up of hospitalized patients and follow up progress of patients in specialty clinics seen in consultation by hematology oncology staff. Clinical experience is augmented by reading program, slide review sessions, tumor board meetings and specialty conferences. MEDICINE

140.71. Pulmonary Disease - VMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. Lohne

Evaluation and management of adult patients with respiratory diseases, supervised by housestaff and faculty, Pulmonary Medicine section. Emphasis on physical examination of chest, interpretation of X-ray, arterial blood gases, pulmonary function studies. Gain familiarity with respirators and other aspects of respiratory care. MEDICINE

140.72. Gastroenterology - VAF (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing and Medicine 110. Gitlin

Participation in evaluation of patients with gastrointestinal problems (gastroscopies, ERCP, colonoscopies, liver biopsies, peritoneoscopy, bowel biopsies) on wards and in outpatient clinic. Experience includes demonstration of investigation (acid perfusion and others), weekly clinical conference, liver histology and tutorial discussion sessions. MEDICINE

140.73. Rheumatology & Immunology - SFGH (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

I. Goldstein, Perez, J. Rosenbaum

Students will be assigned inpatients and outpatients for work-up and management under the supervision of fellows and attending physicians. Students also will participate in clinical rounds, clinical conferences, research seminars and journal clubs. MEDICINE

150.02. Research in Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of faculty member in charge of student's research project and approval of third- and fourth-year coordinator. L.H. Smith, Carbine

Students continue previously initiated research projects under the guidance of faculty members. MEDICINE

150.03. Cancer Viruses. (1½ per week) Su, F, W, Sp. Prerequisite: Basic course in microbiology. J.A. Levy

Tissue culture techniques and animal experimentation will be used to demonstrate the role of viruses in animal malignancies and autoimmune disease. Research serves as a model system for studying similar disorders in man. MEDICINE

160.03. Clinical Skills Seminar. (2) W. Prerequisite: Second-year standing or consent of instructor. Seminar 1 hour. Lab 3 hours. Altman, K. Fitzgerald, Veatch

Skills laboratory-seminar designed to create a working relationship between medical and nursing students, using teaching and acquisition of clinical and communication skills as the interactive mode. Bedside skills for direct patient care will be taught and practiced. MEDICINE

Faculty and students participate in a combined clinical rounds-seminar course designed to develop students' analytical approach in relating basic medical research to clinical problems. Intended for advanced students in the Medical Scientist Training Program. MEDICINE
Hine, Discher, La Dou, Garb
Clinical demonstrations and case presentations representative of occupational and environmental disease. MEDICINE

M. Goldman
Instruction in basic electrophysiologic principles and interpretation of electrocardiograms. MEDICINE

170.05. EKG Interpretation. (1) W. Prerequisite: Medicine 151A. Lecture 1 hour.
Rapaport
Review of physical principles of electrocardiography and clinical application of electrocardiographic interpretation. MEDICINE

170.07. Non-Invasive Lab Cardiology. (1) Sp. Prerequisite: Medicine 170.05.
Rapaport
Fundamentals of non-invasive laboratory cardiology. Techniques and role of echocardiography, stress electrocardiography, Holter monitoring, phonocardiography, systolic time intervals, vectorcardiography, apexcardiography and other areas will be covered. MEDICINE

170.08. Introduction to Cancer Medicine. (2) W. Lecture 2 hours. L. White
Course provides a humanistic orientation to cancer that will form a framework for better understanding and integration of the information on cancer presented in other health science courses. Biomedical, clinical, and psychosocial aspects will be explored. MEDICINE

D. W. Martin, Nestle
Faculty from the basic sciences and clinical departments will discuss their current research in this advanced lecture, seminar, and reading course designed for students interested in medical research. Emphasis will be on analysis and critical evaluation of biomedical research. MEDICINE

170.10. Intro to Occupational Medicine. (1) W. Lecture 1 hour.
Hine
Practice of occupational medicine as related to the prevention, recognition, and control of disease and injuries resulting from employment. Interaction of economic, political and social forces bearing on worker health problems. Effects of the enterprise on the community and consumer. MEDICINE

170.11. Environmental Medicine. (1.5) F, W. Seminar 1.5 hours.
Hine
Tutorial concerned with environmental medical problems. MEDICINE

170.12. Geriatric Medicine. (2) W. Lecture 1 1/2 hours.
Feigenbaum
Course will inform students about issues pertaining to the health care of the elderly and to educate them about medical and social concerns of elderly people before the students begin their clinical years. MEDICINE

170.13. Current Issues in Nutrition. (1) W. Prerequisite: Biochemistry 100B or concurrent enrollment. Lecture 1 hour.
Nestle
Course emphasizes critical examination and analysis of the experimental evidence that relates dietary intake of specific nutrients to human disease conditions. MEDICINE

170.14. Nutrition in Health Sciences. (1) W. Prerequisite: Biochemistry 100B or concurrent enrollment. Lecture 1 hour.
Nestle and Staff
Course emphasizes the application of nutritional principles for the prevention and treatment of disease in ambulatory as well as hospitalized patients. MEDICINE

180. Industrial Toxicology. (2) F. Prerequisite: Consent of instructor. Lecture 2 hours.
C. Becker
To provide understanding of basic principles of toxicology as related to work environment and workers' health. Emphasis is on chemicals including heavy metals and pesticides, methods of surveillance, principles of acute and chronic toxicity testing. Includes lectures, student presentations, and discussion. MEDICINE

181.08. Holistic Approaches to Health. (2) W. Seminar 2 hours. P. Lee, Pelletier
Complementary strategies to the current biomedical effort may be developed from a critical, yet open-minded examination of the limits of medicine, the determinants of health, ancient systems of healing, biofeedback and self-regulatory therapies, self-care and mutual aid. MEDICINE

188.01. Health Policy Seminar. (2) F. Seminar 2 hours.
P. Lee and Staff
An introductory series relating health care issues to health policy and ethical analysis, specifically, "Primary Health Care." MEDICINE

188.02. Health Policy Seminar. (2) W. Seminar 2 hours. P. Lee and Staff
An introductory series relating health care issues to health policy and ethical analysis, specifically, "Principles of Health Policy and Ethical Analysis—A Case Study Review." MEDICINE

188.03. Health Policy Seminar. (2) F. W or Sp. Seminar 2 hours. P. Lee
An introductory series relating health care issues to health policy and ethical analysis, specifically, "Financing Health Care." MEDICINE

188.08. Health & Human Rights. (3) Sp. Lecture 3 hours. Jonsen, M. Parker
Concepts of patients' rights, right to care, right of informed consent, right to treatment, will be analyzed in legal and ethical cases. Objective is to increase awareness of claims to certain "rights" which impose duties on providers of health care. MEDICINE

189. Patients' Rights in Health Care. (1) § F. Lecture 12 hours. course is given as a two-day workshop. Jonsen
Four cases illustrating typical ethical issues: patients' rights to treatment, to refuse treatment, to choose one's own treatment, and to equal treatment, are presented and analyzed. Formation of personal ethical position in light of current law and ethics is stressed. MEDICINE

189.01. Ethics in Health Care. (1) § W. Lecture 12 hours. Course is given as a two-day workshop.

Jonsen

Lecture and workshop discussion of several medical care situations in the light of their ethical and policy dimensions: care of handicapped and defective newborns, experimentation using normal children, legal funding of sterilization programs, and chronic disease and quality of life. MEDICINE

189.02. Biomedical Ethics. (1) § Sp. Lecture 12 hours. Course is given as a two-day workshop.

Jonsen

Lecture and workshop discussion of ethical and policy dimensions of several current biomedical issues: aging and health care, fetal research, behavior technology, and the role of the pharmaceutical industry in health care. MEDICINE

198. Supervised Study. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor preceptor and approval of third- and fourth-year coordinators.

L. H. Smith, Carbone

Library research and directed reading under supervision of a member of the faculty with the approval of the chairman of the department. MEDICINE

199. Laboratory Project. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor preceptor and approval of third- and fourth-year coordinators.

L. H. Smith, Carbone

A laboratory research project under direction of a member of the faculty with the approval of the chairman of the department. MEDICINE

200. Health & Aging. (2-4) § Sp. Prerequisite: Graduate standing. Consent of instructor. Lecture 2 hours. P. Lee, H. Lipton

Examine the health status of the aged in the U.S. in light of relevant biological, behavioral, sociocultural, and environmental factors. Social, cultural, and economic factors affecting the organization, financing, and delivery of health care to the aging population are examined. MEDICINE

400. Medical Staff Conferences. (2) F, W, Sp. UC L. H. Smith, SFGH Rapaport, V4 Sleisenger

Interims and residents prepare and present case histories of patients at medical staff conferences including references to the literature, laboratory work, and special studies. Faculty members and visiting professors discuss the cases and present new developments in their respective fields. MEDICINE

L. H. Smith

A series of discussions is conducted in the various subspecialties of internal medicine. Students take an active part in the presentation and discussion of the problems involved, including reference to the literature, clinical demonstrations, and directed student participation. MEDICINE

L. H. Smith, SFGH H. Williams, V4 Sleisenger

Seminars on recent literature in internal medicine, with assigned reading, required reports and evaluation of presented material by interns, residents and faculty. MEDICINE

L. H. Smith

Seminars are conducted in the fields of gastroenterology, hematology, cardiology, electrocardiology, endocrinology, chest diseases, psychosomatic medicine, arthritis and rheumatic diseases, infectious diseases, and radiology. Library research, occasional formal reports and patient presentations are required. MEDICINE

SFGH H. Williams and Staff

Seminars are conducted in cardiology, hematology, gastroenterology, infectious diseases, metabolic diseases, and pathology, involving discussions, required reading, and reports. MEDICINE

V4 Sleisenger

Seminars are conducted in cardiology, electrocardiology, hematology, gastroenterology, radiology, fluid and electrolyte balance, endocrinology and pathology, involving discussions, required reading and reports. Elective seminars include a chest disease conference, joint medical and surgical conference, tumor board, dermatology conference, and neuropsychiatry conference. MEDICINE

Research programs are arranged with appropriate faculty members on an individual basis. MEDICINE

SFGH H. Williams, V4 Sleisenger

Residents take an active part in the presentation and discussion of problems connected with the correlation of clinical manifestations of disease with postmortem studies. Conferences include reference to the literature, clinical demonstrations, and laboratory work. MEDICINE

408. EKG Interpretation. (2) Su, F, W, Sp.

Sokolow

Seminars (individual instruction) for residents in medicine and trainees in cardiology by cardiac consultants in the interpretation of all electrocardiograms and phonocardiograms taken at UC MEDICINE

SFGH H. Williams, UC L. H. Smith

Residents are responsible for the care of patients, under the direction of the attending
staff, and participate in student teaching. Third-year, senior and chief residents provide teaching and consultation service in the hospitals and outpatient clinics. MEDICINE

Woober
Residents are responsible for the care of patients, under the direction of the attending staff, and participate in student teaching. Senior residents provide teaching and consultation service in the hospital and outpatient clinics. MEDICINE

VAF Rosenstiel
Residents are responsible for patient care under the direction of the attending staff, including history-taking, physical examinations, laboratory tests, and consultations. The chief resident, in addition, has certain responsibilities involving the residents, and consults for all other hospital services. MEDICINE

Crede and Staff
Interns in the Primary Care Track of Internal Medicine are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Medicine Internship Program as well as related clinical services such as Dermatology, Neurology. MEDICINE

Crede and Staff
Residents in the Primary Care Track of Internal Medicine are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Medicine Internship Program as well as related clinical services such as Dermatology, Neurology. MEDICINE

SFGH H. Williams
Interns rotate through medical wards and emergency hospital. Under the supervision of the attending staff, they are responsible for the care of patients, including history-taking, medical work-ups, laboratory tests, and consultation. MEDICINE

SFGH H. Williams
A modified "straight" medical internship consisting of eight to nine months service in general medicine, chest, and the emergency rooms, with three to four months spent in other hospital services. MEDICINE

Liu L. H. Smith
Interns are responsible for the care of patients under the direction of the attending staff, and participate in student teaching. MEDICINE

**Microbiology and Immunology**

100A. Medical Immunology. (1½) Sp.

Prerequisite: Biochemistry 100A-B. Lecture 2 hours. Equivalent to Microbiology 121 and 190A.

Linscott
Lectures on the fundamentals of immunology. Small group seminars on patient-related problems in this field. MICROBIO

100B. Medical Microbiology & Virology. (6½) F.

Prerequisite: Biochemistry 100A-B. Lecture 4½ hours. Lab 3 hours. Conference 1 hour. Equivalent to Microbiology 190B.

W. Levinson
Pathogenesis of infection by, and resistance to, bacteria, fungi and viruses. Natural history, essentials of diagnosis, treatment, and epidemiology of diseases. Laboratory demonstrations and exercises of essential medical skills. Problem-solving exercises and small group seminars involving clinical cases. MICROBIO

120. Fundamentals for Pharmacy. (3) Sp.

Introduction to general medicine. MICROBIO

126A. Applications to Dentistry. (1) Sp.

R. Speck
Introduction to general medicine. MICROBIO

126B. Lab Applications to Dentistry. (5)

W. Lecture 3 hours. Lab and conference 6 hours.

R. Speck
Comprehensive presentation of microorganisms including bacteria, fungi, viruses; fundamentals of infection and resistance, disinfection, sterilization, and antimicrobial agents. Laboratory studies and demonstrations on indigenous oral flora and applications of microbiology to dentistry. MICROBIO

127. Laboratory Techniques. (2) § Sp.

Prerequisite: Concurrent enrollment in Microbiology 120. Lab and conference 4 hours.

Halde
Morphology, physiology, and immunology techniques used in laboratory diagnosis of selected bacterial diseases. Antibiotic susceptibility, disinfection, and sterilization exercises. Demonstration on virology. MICROBIO
150.01. Microbiology Research. (1½ per week) Su, F, W, Sp. Prerequisite: Microbiology 100A and 100B and consent of instructor. Staff

Research in microbiology; block elective for fourth-year students. MICROBIO.

190A. Med Immunology—Grad Sdnts. (1½) § F. Prerequisite: Biochemistry 100A-B. Lecture 2 hours for nine weeks. Equivalent to Microbiology 100A and 121.

J. W. Goodman

Lectures on the fundamentals of immunology. Small group seminars on patient-related problems in this field. MICROBIO.

190B. Microbiol & Virology—Grad Sdnts. (6½) § F. Prerequisite: Biochemistry 100A-B. Lecture 4½ hours. Lab 3 hours. Conference 1 hour. Equivalent to Microbiology 100B.

W. Levinson

Pathogenesis of infection by, and host resistance to, bacteria, fungi, and viruses. Natural history, essentials of diagnosis, treatment, and epidemiology of diseases. Laboratory demonstrations and exercises of essential medical skills. Problem-solving exercises and small group seminars involving clinical cases. MICROBIO.

198. Supervised Study. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. MICROBIO.

199. Laboratory Project. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. MICROBIO.

203. Molecular & Cellular Immunology. (3) § F. Prerequisite: Biochemistry 100A-B and Microbiology 100A and 100B or equivalent. Lecture 3 hours. Offered in alternate years. Not offered in 1982-83.

J. W. Goodman, G. Lewis

Structural and functional aspects of antigens and antibodies, including chemical and genetic basis of immunogenicity, structure and biosynthesis of immunoglobulins, antigen-antibody interactions, immunogenetics, properties of immunocompetent cells, cell cooperation, lymphocyte receptors for antigens. MICROBIO.

204. Immunobiology. (3) § W. Prerequisite: Microbiology 100A and 100B or equivalent course in basic immunology. Offered in alternate years. Not offered in 1982-83.

Linscott

An advanced course covering antigen-antibody interactions, with special emphasis on their biological importance; experimental hypersensitivity; tumor immunology; transplantation immunology; immunological unresponsiveness, cytotoxic reactions, and the role of the complement system. MICROBIO.

205. Selected Topics in Cell Immunol. (3) § Sp. Prerequisite: Microbiology 203 and 204. Lecture 3 hours. Offered in alternate years. Not offered 1982-83. — C. L. Miller

An in-depth analysis of selected areas in cellular immunology, including lymphoid cell interactions in immune regulation; specific and non-specific immunosuppression; and genetic control of the immune response. MICROBIO.

206. Pathogenic Fungi. (2) § F. Prerequisite: Microbiology 100A and 100B or equivalent. — Halde

A systematic review of the fungi responsible for human disease; emphasizing pathogenesis, epidemiology, and diagnostic laboratory procedures. MICROBIO.

207. Cellular Immunology Lab. (3) § Sp. Prerequisite: Microbiology 203, 204 and concurrent enrollment in Microbiology 205. Lab 9 hours. Offered in alternate years. Not offered 1982-83. — C. L. Miller

Techniques of in vitro induction of cellular immune responses; separation of T and B leukocyte subpopulations; Jerne plaque assays and cell mediated cytoxicity assays will be performed. MICROBIO.

208. Molec Biology of Animal Viruses. (3) § W. Prerequisite: General knowledge of nucleic acid structure and chemistry and multiplication of viruses. Lecture 2 hours. Seminar 1 hour. Offered in alternate years. Offered 1982-83.

Bishop, W. Levinson, Levintow, Varmus

The nature of viruses: dynamics of virus-cell interaction with emphasis on animal virus systems, control of expression of virus-specific information in lytic and temperate infection, and role of viruses in malignant transformation of cells. MICROBIO.

209. Special Topics in Immunology. (1) § Sp. Prerequisite: Microbiology 203 and 204. Conference 1 hour.

J. W. Goodman and Staff

Small group tutorial in which topics and cumulative reading will be selected by students for discussion with individual faculty members. MICROBIO.

Staff

General microbiology; individual research of advanced graduate students, invited speakers and staff members. Reviews of special topics and journal articles by advanced students. MICROBIO.

221. Oral Microbiology. (1) § F. Prerequisite: Consent of instructor. Seminar 1 hour.

Hurst

A seminar course concerned with the role of microorganisms in oral health and disease, with emphasis on the ecology of the oral flora. MICROBIO.

299. Dissertation (0) F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff MICROBIOl.

For graduate students engaged in writing the dissertation for the Ph.D. degree. MICROBIOl.

Morphology

115A-B. Dental Morphology (0.4, 0.4) F, W, lab 6 hours. Hamaguchi
Study of individual tooth form and relationship to adjacent and opposing anatomical structures. RESTOR DENT.

Neurological Surgery

Core Clerkship—Neurology 110. Students serve as clinical clerks in the inpatient and outpatient clinics.

140.01. Advanced Neurosurgery Clerkship (1 1/2 per week) Su, F, W, Sp. C. B. Wilson, Pitts, M. Edwards
The student will become a member of the house staff, attending ward rounds, working up patients, assisting at operations, and taking night call on rotation with a resident. Limited to one student per hospital. NEURO SURG.

140.02. Off-Campus Clerkship (1 1/2 per week) Su, F, W, Sp. Prerequisite: Neurology 110. Rosegay
Clinical clerkship in approved hospitals by special arrangement, and approval of the dean and chairperson of the department. NEURO SURG.

198. Supervised Study (1.5) F, W, Sp. Prerequisite: Consent of instructor. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. NEURO SURG

199. Laboratory Project (1.5) F, W, Sp. Prerequisite: Consent of instructor. Pitts
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. NEURO SURG.

400. Staff Conference (2) Su, F, W, Sp. C. B. Wilson
Residents, under supervision, prepare and present case histories of ward patients, including laboratory work, X-ray studies, special investigations, and reference to the literature. Discussion is led by the faculty with participation by visitors. NEURO SURG.

Residents discuss clinopathological aspects of cases, and their correlation with the literature and special studies. Faculty and visitors discuss developments in related fields. Second-year residents organize conferences and participate in gross autopsies on patients from the Neurological Surgery Service. NEURO SURG.

Recent literature in neurology and neurological surgery is presented. Discussion by members of the faculty in attendance and by visitors from other schools is related in this and related fields. NEURO SURG.

Residents, under supervision, are responsible for patient care in the wards and outpatient clinics, including history-taking, physical examinations, laboratory tests, and consultations. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. NEURO SURG.

Residents are responsible for the care of patients, under the direction of the attending staff, including history-taking, physical examinations, laboratory tests, and consultations. In addition, the senior resident has certain teaching and administrative responsibilities required by the attending staff. NEURO SURG.

Residents are responsible for diagnosis and care of patients in wards and clinics and performance of studies and selected neurosurgical procedures under supervision of the attending staff. They also present patients at conferences and attend seminars and rounds at U.C. NEURO SURG.

Interns rotate through neurological surgery wards. Under the supervision of the attending staff, they are responsible for the care of patients, including history-taking, neurologic examinations, laboratory tests, diagnostic procedures, and consultation. NEURO SURG.

Neurology

Second-Year Coordinated Instruction—Medicine 132A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Students are assigned patients for study under supervision of attending and resident staffs. They attend ward rounds, attending rounds, grand rounds, conferences and lecture seminars, emphasizing diagnosis and management of common clinical problems and psychiatric aspects of neurology. NEUROLOGY.
140.01. Acting Internship Neurology. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110. Approval of the chairperson of the department. R. Fishman

Students serve as acting interns on the inpatient services. Attendance at departmental clinical rounds, seminars, and conferences is required. NEUROLOGY.

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110. R. Fishman

Clinical clerkship in approved hospitals by special arrangement and approval of the Dean and the chairperson of the department. NEUROLOGY.

140.03. Advanced Neurology. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor. R. Fishman

Students serve as clinical clerks in the inpatient clinics. Attendance at departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY.

Participation in child neurology activities, both inpatient and outpatient, and all regularly scheduled conferences of the Child Neurology Division. Study of the developing nervous system and diseases of the nervous system affecting infants, children, and adolescents. NEUROLOGY.

140.05. Advanced Neurology Clerksfhip-SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor. R. Fishman, R. Simon

Students serve as clinical clerks in the inpatient clinics and on the consultation service. Attendance at departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY.

140.06. Advanced Neurology Clerkship-V4. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor. R. Fishman, Baringer

Students serve as clinical clerks in the outpatient clinics and on the consultation service. Attendance at departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY.

Opportunities for research in one of the departmental laboratories by arrangement with the chairperson of the department. NEUROLOGY.

150.02. Neuroradiology. (1½ per week) F, W, Sp. Prerequisite: Anatomy 103 and Pathology 102. R. L. Davis, Baringer

Tissue pathology of diseases of the nervous system will be explored in greater depth in the postmortem room and by gross and microscopic techniques. NEUROLOGY.

199. Laboratory Project. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. R. Fishman and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. NEUROLOGY.

Seminars covering selected subjects in the basic sciences relevant to neurology including neuroanatomy, neurochemistry, neuropathology, and neurophysiology. NEUROLOGY.

Conference includes resident preparation and presentation of patient case histories including reference to the literature, laboratory work, and special studies. Faculty members and visiting professors from other universities discuss new developments in their respective fields. NEUROLOGY.

Course involves the presentation and discussion of clinical histories and pathologic findings in selected cases of neurologic interest and histopathologic study, and discussion of surgical and postmortem specimens from neurologic and neurosurgical patients. NEUROLOGY.

Course involves pathologic and clinicopathologic research into various aspects of neuropathology. Specific subjects of research are chosen in consultation with members of the staff. NEUROLOGY.

Neuroradiologic techniques and interpretations are reviewed in detail with particular emphasis on x-rays of the skull and spine, pneumoencephalography, myography, and arteriography. NEUROLOGY.

Clinical and basic research in neurological disease. After consultation, assignments to one of the several departmental laboratories may be possible. NEUROLOGY.

Specific projects in experimental pathology of the nervous system may be undertaken by direct arrangement. Techniques include neurohistology, histologic autoradiography, and electron microscopy. NEUROLOGY.

Residents are responsible for the care of pa-
Neuroscience

201A-B-C. Basic Concepts of Neurosciences. (4-4) § F, W, Sp. Prerequisite: Admission to Neuroscience Program or consent of instructor. Lecture 4 hours.

R. Steinberg, Reichardt, J. Korenbrot

An in-depth interdisciplinary introduction to fundamental aspects of nervous system function: membrane structure, biophysics, ion transport mechanism, cellular neuroanatomy, synaptic transmission, integration, and development of synaptic connections invertebrate and vertebrate, sensory, motor systems, autonomic and neuroendocrine regulatory mechanisms, higher functions.

PHYSIOLOGY

212. Developmental Biology. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Enrollment limited. Offered every three years. Offered 1984-85.

Reichardt

Course covers current literature on the role of the cell's surface in development, with emphasis on immune and neuronal systems. Student presentations will be given each week. PHYSIOLOGY

220. Selected Topics. (4) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour.

Z. Hall

Topic in neurobiology is selected such as development, anatomy and physiology of the visual system, biochemistry of membranes. Pertinent papers from the recent literature are read and discussed. Each student must participate regularly and present one seminar per quarter. PHYSIOLOGY

Y-N Jan, A. Basbaum, H. A. Fields, L. Jan, Mayers, R. Nicoll

Course covers the possible roles of peptides in the nervous system. Current literature pertaining to functions of peptides in the nervous system such as neurotransmitters, hormones, trophic factors will be included. Emphasis on issues of current interest and new techniques.

PHYSIOLOGY

230. Experimental Neurobiology. (5) § SS. Prerequisite: Consent of instructor. Lecture and lab.

Y-N Jan

Laboratory course designed for students with electrophysiology and anatomical methods used in studying peripheral and central nervous systems. Techniques included are extra- and intracellular recordings, iontophoresis, dye injection, tracing of neuronal pathways.

Nursing

103. Introduction to Nursing. (7) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 2 hours. Lab 15 hours.

C. West

Introduction to nursing and nursing process: fundamental nursing, terminology, facts, trends, and their application in nursing practice.

PHYSIOL NURS

104. Nursing of Adults. (9) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 2 hours. Lab 21 hours.

C. West

Application of the nursing process to the physiological, psychological and sociological aspects of regulating response mechanisms to stress.

PHYSIOL NURS

105. Maternal-Child Nursing. (9) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 2 hours. Lab 21 hours.

Savedra

Application of principles and theories to nursing care given during the life processes of reproduction, nurturance and development, and alterations due to stressors during pregnancy and child development from birth to adolescence.
106. Psychiatric Mental Health Nursing. (9) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 2 hours. Lab 21 hours.

J. G. Lipson

Principles and dynamics of personality and family development. Application of the nursing process with clients who have coping problems resulting from stressors in selected developmental or situational crises. MENT HLTH COM

122. Integrated Science. (4) F. Lecture 4 hours.

Preising

Examination of content in regulation, sensation, protection, and motion as they relate to adaptive mechanisms in man at the cellular level. PHYSIOLOG NURS

124. Psychosocial Nursing Concepts. (5) F. Lecture 3 hours. O'Rourke, Oda

Course synthesizes key theories and processes from mental health and community nursing to provide students with a perspective for analyzing concepts basic to psychosocial adaptation and development. MENT HLTH COM

126. Human Behavior & Development. (3) W. Lecture 3 hours. Kayser-Jones

Examination of human development such as biological, cognitive, social and ethical aspects, and behavior across the life span. Emphasis will be on adult development and application to nursing practice. FAM HLTH

127. Acute Illness Adaptation. (5) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Nursing 129 or concurrent enrollment. Lecture 2 hours. Lab 3 hours. Seminar 2 hours.

C. West

Course describes and explores concepts related to the nursing care of the acutely ill patient. Description of behaviors, measurements and nursing actions appropriate to the concepts will be compared and contrasted across a variety of acute illnesses. PHYSIOLOG NURS

128. Intro to Research & Theory. (3) W. Lecture 2 hours. Seminar 1 hour.

H. Wilson

Introduces basic research concepts, language, process, logic, and methods for various types of research as well as the meaning and use of nursing theory. Engages students in skills of intellectual craftsmanship including effective reading, thinking, and writing to improve research consumerism. MENT HLTH COM

129. Health Assessment. (3) F. Lecture 2 hours. Lab 3 hours. Branton

Presentation of a basis for health assessment of clients within an adaptation-developmental model of nursing. Emphasizes data collection through history, physical examination, laboratory studies, and identification of stressors altering health status. Laboratory for integration of theory and skill mastery. FAM HLTH

131. Psychosocial Adaptation. (5) W. Lecture 2 hours. Lab 8 hours. Conference 1 hour.

O'Rourke

Presentation and synthesis of concepts and processes from mental health and community nursing essential to the assessment and management of client-patient systems. Emphasis is placed on psychosocial adaptation to situational and developmental stressors. MENT HLTH COM

133A. Family Health Care. (3) W. Prerequisite: Nursing 129. Lecture 2 hours. Lab 1 hour. Conference 2 hours. Branton

Course deals with the healthy family as the primary unit of health care management. Nursing process applied to promoting family health is emphasized utilizing the adaptation-developmental framework. Community involvement with the family is an integral part of the course. FAM HLTH

133B. Care of Stressed Families. (3) Sp. Prerequisite: Nursing 133A. Lecture 2 hours. Lab 1 hour. Conference 2 hours. Branton

Analysis of families with situational or developmental problems utilizing an adaptation-developmental framework. Involvement with families in communities is an integral component of the course. Nursing process applied for promoting the health of families is emphasized. FAM HLTH

Course provides opportunity to develop a professional nursing role in a health care system appropriate to the student's area of interest. Knowledge and skill basic to the professional nursing leadership role are the focus of the course. MENT HLTH COM

137. Com Assessment & Intervention. (4) Sp. Lecture 2 hours. Lab 6 hours. C. Kelly

Theories of planning and community organization and development applied to assessing community health and social indicators. Emphasizes use of data obtained from community sources in organization and planning to alleviate stressors and facilitate adaptation and development of aggregates in the community. MENT HLTH COM

155. Clinical Uses of Drugs. (3) F. W. Lecture 3 hours. Okamoto

Course deals with commonly used drugs, with emphasis on classification, use, rationale for choice, mode of action, and significant side effects. PHYSIOLOG NURS

177A. Adlt Primary Care Psychosoc Prob. (3) F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. O'Rourke

Assessment and management of common adaptive responses to situational, developmental stresses, and interruptions in patterns of cognition, sensations, and feelings of adults. Nurse practitioners' behaviors which interact with clients' coping responses will be explored. MENT HLTH COM
177B. Adlt Primary Care Psychosoc Prob. (2) W. Prerequisite: Nursing 177A or consent of instructor. Lecture 2 hours.

J. G. Lipson

Assessment and management of common adaptive responses to situational, developmental stresses and interruptions in patterns of cognition, sensations, and feelings of adults. Nurse practitioners' behaviors which interact with clients' coping responses will be explored. MENT HLTH COM

181. Law & Nursing Practice. (2) § Sp. Lecture 2 hours. Tennenhouse, Takano

Survey of fundamental and critical current issues in law with respect to the theory and practice of nursing. Emphasis on legal contingencies encountered in the everyday practice of nursing in both hospital and community settings. PHYSIOS NURS

Theories and concepts of femininity, masculinity and sexuality throughout the life cycle. Exploration of the wide range of human sexual behavior. Content includes sexual response, common sexual dysfunction and therapy, masturbation, homosexuality, and sexuality in some health conditions. FAM HLTH

197. Group Independent Study. (1-5) F, W, Sp. Lecture and lab variable. Staff

Groups of two or more collaborate in clinical investigation and study of special problems related to nursing and health sciences, under the direction of faculty. Students may select study topics related to their areas of interest.

198. Supervised Study. (1-5) § F, W. Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department.

199. Laboratory Project. (1-5) § F, W. Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department.

200. Administrative Problems. (3) § F, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. W. Everett

Theories of organization in relation to the dilemmas nurse managers face in administering nursing service and educational programs. Special emphasis is placed on ambulatory care settings and schools of nursing. MENT HLTH COM

Principles of curriculum development. Utilization of these principles as a frame of reference for planning educational programs in schools of nursing and nursing services. PHYSIOS NURS

202A. Theory Development. (3-4) § F. Prerequisite: D.N.S. student standing. Lecture 3 hours. Meleis

Examines, philosophically and analytically, the nature of theory and relationship between philosophy, theory, and science. Provides knowledge and experience in all stages of theory development; exploration and critique of epistemological and historical ideas in nursing; scholarly exchange toward independent discovery. MENT HLTH COM

202B. Prototype Theories. (3-4) § W. Lecture 3 hours. Meleis

Comparative study and critical analysis of the major prototype theories from which conceptions of nursing are derived. Emphasis is placed on systems, symbolic interaction, developmental exchange, and adaptation level theories. MENT HLTH COM

202C. Theories & Conceptual Framework. (3-4) § Sp. Prerequisite: D.N.S. student. Lecture 3 hours. Meleis

Comparative study and critical analysis of major conceptual models and theories in nursing. Considers relationship congruency of models to prototype theories: system, interaction, developmental, adaptation level theories. Examines the implications of nursing theories and models in practice and research. MENT HLTH COM

203. Consultation Theory & Process. (2-3) § Sp. Lecture 2 hours. Lab 0-3 hours. Oda

Study of theories and concepts of consultation as a facilitating process relevant to nurses working in primary, secondary, and tertiary prevention services. Emphasis will be on consultation strategies. Optional laboratory for theory testing. MENT HLTH COM

204A-B-C. Comparative Nursing Admin. (2-3, 2-3, 2-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Term paper optional for 3 units. Archer

Comparative analysis of nursing with emphasis on nursing administration in the United States and other selected countries, using perspectives from anthropological, educational, historical, organizational, philosophical, and sociological contexts applicable to each country. Particularly recommended for international students. MENT HLTH COM

205. Supervision Processes. (3) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Wellons

A study of the supervisory process, the role of the supervisor, the development of staff, and the principles and practice of supervision in nursing. Observation and laboratory experience in supervision arranged for and guided by the faculty. MENT HLTH COM
206. Adult Psychiatric Nursing. (3) § W. Sp. Prerequisite: Nursing 227 and 219 or equivalent, and consent of instructor. Lab 3 hours. Seminar 2 hours. P. Underwood, H. Wilson

Seminar designed for graduate psychiatric nursing students to examine and discuss various theories and practice approaches to the nursing management of psychiatric conditions in adults. MENT HLTH COM

207. Clinical Physiology. (3-5) § F. W. Sp. Prerequisite: D.N.S. student standing. Lab 3-9 hours. Seminar 2 hours. Carrieri

Advanced study of the theory and research in the care of patients with physiological disruption and/or illness. In-depth examination of patient problems, assessment and management in the student's selected specialty area. Seminar with clinical laboratory. PHYSIOL NURS

208A. Description Theory & Practice. (3) § F. Prerequisite: D.N.S. student standing. Seminar 3 hours. Carrieri, Lindsey

Using clinical rounds and seminar approaches, concepts related to major biological phenomena are examined and described from theoretical, clinical and empirical perspectives. Concepts of interest to nursing are selected from health illness states observed in patients in acute care settings. PHYSIOL NURS

208B. Measurement Theory & Practice. (3) § W. Prerequisite: D.N.S. student standing. Nursing 208A or consent of instructor. Seminar 3 hours. Carrieri, Lindsey

Seminar focuses on the measurement of concepts relevant to physiological processes. Students critically analyze existing quantitative and qualitative instruments used to measure the concepts. Exemplary concepts may include sleep, dyspnea, pain, immobility, cachexia. PHYSIOL NURS

208C. Testing Theory & Practice. (3) § F. Sp. Prerequisite: D.N.S. student standing. Nursing 208A and 208B or consent of instructor. Seminar 3 hours. Carrieri, Lindsey

Seminar focuses on the development and testing of instruments used to measure the concept selected by the student for study. The student will conduct a pilot study to determine the validity, reliability and utility of the instruments. PHYSIOL NURS

209. Social Support Concept & Meth. (2-4) § W. Sp. Prerequisite: D.N.S. student standing. Seminar 2 hours. Independent study optional 3 or 6 hours for 3 or 4 units. Norbeck

Analysis of the literature relating social support to various health and adjustment outcomes with emphasis on conceptual and methodological issues. Students will develop a focused review of the social support literature relevant to their research and/or clinical interests. MENT HLTH COM

210A. Family Dynamics-Concepts & Asmt. (2) § W. Lecture 2 hours. B. Hall, Tescher

An in-depth study of the theories dealing with family function and dysfunction. Individual dysfunction is seen from the perspective of family system structure and development. Analysis of theory includes identification of concepts that have heuristic value for nursing practice. MENT HLTH COM

210B. Family Dynamics-Pathology & Ther. (2) § W. Sp. Prerequisite: Nursing 279, 210A or equivalent and consent of instructor. Lecture 2 hours. Tescher, B. Hall

Seminar emphasizing family concepts which aid in the understanding of dysfunction of families. Marriage and family therapy as treatment modalities are studied. MENT HLTH COM

211A. Introduction to Research. (3) § F. Sp. Prerequisite: Elementary statistics or equivalent. Lecture 2 hours. Lab 3 hours. Gortner

Lectures and small group sections present an overview of the research process including the styles of researchers, the research attitude, logic, ethics, philosophy, and tools of science. FAM HLTH

211.01B. Patient-Family Teaching Critique. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Hallburg

Critique of studies in patient-family teaching with an intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.02B. Maternal-Child Nursing Critique. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Highley, Savedra

Critique of studies in maternal-child nursing with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.04B. Death in Childhood Res Critique. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Staff

Critique of studies in death in childhood with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.05B. Critique of Aging Studies. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. H. A. Fields

Critique of studies in the field of aging with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH
211.07. Critique of Oncology Nursing. (3) § W, Prerequisite: Consent of instructor. Seminar 3 hours.

Dodd

Presentation of the scholarly process of critiquing published research in oncology nursing. Emphasis will be on an evaluation of the research processes utilized by investigators, and the implications of empirical findings for oncology nursing practice. PHYSIOL NURS

211.11B. Retarded Child Interven Analysis. (3) § W, Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Pothier

Critical analysis of clinical interventions with young retarded children with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. MENT HLTH COM

211.14. Illness Behavior Critique. (3) § W, Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Chafeetz, Carrieri, Politeo, Barbaccia

Critique of research in illness behavior, including psychiatric factors, with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. MENT HLTH COM

211.16B. Role of Social Support Critique. (3) § W or Sp, Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3 hours.

Norbeck

Critical analysis of studies which explore relationships between social support and individual functioning in a variety of life stress and illness situations. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. MENT HLTH COM

211.20. Perinatal-Pediatric Critique. (3) § W, Prerequisite: Consent of instructor. Seminar 2 hours. Lab 3 hours.

Abu-Saad, K. Mahon

Critique of studies which reflect physiological or situational stressors in the high risk and pediatric patient. Course will facilitate the appreciation, appraisal and integration of research findings into clinical practice. PHYSIOL NURS

211.21B. Cardio-pulmonary Res Critique. (3) § W, Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3 hours.

Stotts

Critique of cardiopulmonary research with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. PHYSIOL NURS

211.22B. Q1ty Patient Care Res Eval. (3) § W, Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Carrieri, Dodd

Critique of research studies in quality of patient care emphasizing the utilization of a systematic critique process, methodologies employed in evaluation programs, and identification of major problems in patient care evaluation research. PHYSIOL NURS

212. Clinical Research Methodologies. (3) § W, Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3 hours.

Carrieri, Dodd

Application of research methodology to clinical nursing questions: formulation of clinical questions, experimental and quasi-experimental design, instrumentation, introduction to data analysis, including statistical methods and computer usage. PHYSIOL NURS

213A. Mess & Patient Monitoring. (2.3) § W, Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0.3 hours.

Beaumont

Fundamentals of electronics, transducers, and instrumentation directly applicable to the modes of obtaining physiological data from patients. PHYSIOL NURS

213B. Meas & Patient Monitoring. (2.4) § W, Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0.6 hours.

Beaumont

Fundamentals of electronics, transducers, and instrumentation directly applicable to the modes of obtaining physiological data from patients. PHYSIOL NURS

214. Family Risk in Early Parenting. (3) § W, Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Mercer

Physical and psychological factors affecting parenting, early parent-infant interactions, theories, and modes of assessing attachment in expected and unexpected outcomes, such as birth of premature or anomalous infant, threat to mother's welfare, are explored with clinical data. FAM HLTH

215A. Community Health. (3) § F, W, Prerequisite: Consent of instructor. Seminar 2 hours. Lab 3 hours.

Archers

Exploration of theories, concepts and principles pertaining to the practice of community health nursing with focus on positive health factors and interaction within families, groups and communities. MENT HLTH COM

215B. Community Health Care Planning. (3) § F, W, Prerequisite: Consent of instructor. Seminar 2 hours. Lab 3 hours.

Archers

Exploration of analytic planning models applicable to community health services. Utilization of the community as a basis for planning and delivery of health care. Emphasis is on the role of the community health nurse in health planning. MENT HLTH COM

215C. Community Health Issues. (3) § F, W, Prerequisite: Nursing 215A or 215B and consent of instructor. Seminar 2 hours. Lab 3 hours.

Archers
Exploration of community health issues previously identified in community health nursing. Opportunity to explore theories and test their applicability to community and family health. MENT HLTH COM

215D. Com Organization Strategies. (3) § W. Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Archer

Exploration of strategies of institutional analysis, community assessment, and methods of community organization and development, which enable nurses to facilitate others' capacities to define, plan for, and meet their own physical, social, and mental health priorities. MENT HLTH COM.

216. Interventions for Work Stress. (2) § F. Prerequisite: Graduate standing. Seminar 2 hours. Baldwin

Course will help to enable students to evaluate the recent research and current models of nursing work stress. From this base, students will critically select strategies for assisting and intervening in nursing stress situations. PHYSIOL NURS.

217. Psychosocial Care of Children. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Tesler

Exploration of the theory related to the psychosocial experiences of illness and hospitalization for the children and their family. Focus is directed to minimizing trauma and promoting growth. Concurrent practicum recommended. PHYSIOL NURS/FAM HLTH.

218A. Care of Ill or Injured. (3-4) § F. Prerequisite: Nursing 276. Prior or concurrent enrollment in physiology or consent of instructor. Lecture 1 hour. Seminar 2 hours. Lab optional 3 hours for 4 units. Stotts, Dodd

Knowledge is organized around phenomena common to ill or injured individuals across the life span. Concepts such as stress, healing, clotting, infection, consciousness, pain and coping will be examined from a theoretical and clinical perspective. PHYSIOL NURS.

218B. Care of Ill or Injured. (3-4) § W. Prerequisite: Nursing 276. Prior or concurrent enrollment in physiology or consent of instructor. Lecture 1 hour. Seminar 2 hours. Lab optional 3 hours for 4 units. Dodd, Stotts

Knowledge is organized around phenomena common to ill or injured individuals across the life span. Concepts such as starvation, ischemia, immobility, dyspnea, hypoxemia, body image and sexuality will be examined from a theoretical and clinical perspective. PHYSIOL NURS.

218C. Current Therapeutics. (1-5) § F. Prerequisite: Physiology, Nursing 218A and 218B. Seminar 1-5 hours. Stotts, C. West

Investigation of the theoretical basis of selected therapies commonly used with the ill or injured. Therapeutic aspects of interventions as well as side effects will be explored. Recent research will be used as the basis for discussion. PHYSIOL NURS.

218D. Illness or Injury Rehabilitation. (2-3) § W. Prerequisite: Graduate standing. Nursing 218A and 218B. Seminar 2 hours. Lab optional 3 hours. C. West

Examination of the theoretical basis for rehabilitation of patients following physical illness or injury. Nursing therapies which promote optimal adaptation and development are evaluated utilizing relevant research as a base. Clinical laboratory optional. PHYSIOL NURS.

219. Psychiatric Assessment of Adults. (3) § W. Sp. Prerequisite: Nursing 227 or equivalent and consent of instructor. Seminar 2 hours. Lab 3 hours. H. Wilson, P. Underwood

Seminar is designed for graduate psychiatric nursing students to examine and discuss various theoretical approaches to assessment of behavior in adults. Laboratory will be used to synthesize and test material. MENT HLTH COM.

220. Advanced Nursing Research. (3) § F. W. Sp. Prerequisite: Nursing 211A and 211B or equivalent and consent of instructor. Meleis

A seminar intended for doctoral students to discuss methods and problems in current nursing research. Course may be repeated for credit. MENT HLTH COM.

221A. Specialized Nursing Roles. (2-3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab optional 3 hours. Oda

Lecture-seminar focusing on the critical analysis of specialized nursing role developments. Role research emphasized. Includes traditional, existing, expanded, and emerging roles relating to specialization. Optional laboratory for theory testing and systems observation. MENT HLTH COM.

221B. Specialized Nursing Roles. (2-3) § W. Prerequisite: Nursing 211A or equivalent and consent of instructor. Lecture 2 hours. Lab optional 3 hours. Oda

Lecture-seminar focusing on the critical analysis of specialized nursing role developments. Role research approach and methodology are emphasized. Includes traditional, existing, expanded, and emerging roles relating to specialization. Optional laboratory for theory testing and systems observation is required for research credit. MENT HLTH COM.

222. Modern Psychiatric Thought. (2) § W. Sp. Prerequisite: Consent of instructor. Lecture 2 hours. P. Underwood

Selected theories related to human behavior will be presented. Clinical application of, and research related to theories will be reviewed. Lecture-discussion on psychiatric personality theories will focus on intrapsychic and interpersonal models. MENT HLTH COM.
223A. Systems Analysis. (3) § Sp. Prerequisite: Consent of instructor. Lab 3 hours. Seminar 2 hours. Tescher, B. Hall

Selected general and social system theories are examined in relation to their contribution to the understanding of clinical nursing phenomena, particularly in the area of patient care. MENT HLTH COM

223B. Systems Intervention. (3) § Sp. Prerequisite: Nursing 223A and consent of instructor. Lab 3 hours. Seminar 2 hours.

B. Hall, Tescher

Organizational and social systems theories are used to assess functional and dysfunctional aspects of health care organizations that may affect the delivery of nursing care. Case studies and clinical work are used to explore appropriate intervention strategies. MENT HLTH COM

224. Cognitive & Behavioral Theories. (2) § F. Prerequisite: Graduate standing. Seminar 2 hours. Norbeck, Pothier

Behavioral theory and Piaget's theory of cognitive development will be presented, and research related to these theories will be reviewed. The relationship of these theories to human behavior and to clinical application will be developed in lectures and seminars. MENT HLTH COM

225. Psychiatric Nursing Concepts Res. (3) § Sp. Prerequisite: Graduate standing. Lecture 2 hours. Lab 3 hours. A. Davis

Exploration of the research conducted on selected major psychiatric mental health nursing concepts to ascertain the state of the knowledge on which clinical practice is based. MENT HLTH COM

226. Long-Term Illness. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Hallburg

Intensive study of problems related to long-term illness. Explorations of the interrelationship of various cultural, psychosocial, and pathophysiological factors involved in continuing health problems. Field experience included. FAM HLTH

227. Psychiatric Conditions Theories. (2) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. H. Wilson, P. Underwood

Lecture-seminar with emphasis on comparative study and analysis of selected biological, sociological and psychological theories of major psychiatric conditions. Selected research is included. MENT HLTH COM

228. Human Communication Research. (2-4) § F, W. Prerequisite: Graduate standing. Lecture 2 hours. Lab 3 hours. A. Davis

Review of communication studies relevant to nursing. Studies will be organized around specific major concepts in communication theory. Students will be expected to gain background communication theory from the extensive bibliography. MENT HLTH COM

230A. Legislative Processes. (2-4) § F. Lecture 2 hours. Lab 0-6 hours. Archer

Exploration of legislative processes which affect professional practice. Analysis of strategies for proposal, passage, implementation, and evaluation of legislation. Examination of concepts and principles of professional lobbying, systems management of governmental relations, role of research and expertise in policy making. MENT HLTH COM

230B. Legislative Processes. (3) § W, Sp. Lecture 3 hours. Archer

Exploration of legislative processes which affect professional practice. Analysis of strategies for proposal, passage, implementation, and evaluation of legislation. Examination of concepts and principles of professional lobbying, systems management of governmental relations, role of research and expertise in policy making. MENT HLTH COM

232B. Dynamics of Leadership. (2-4) § W or Sp. Prerequisite: Nursing 232A or consent of instructor. Lecture 2 hours. Lab 0-6 hours. Hendricks

Analysis of interactive variables and functional relationships of leadership: characteristics of the leader, follower, and health-care environmental situations. Focuses on ideas, theories and research relevant to leadership behaviors, styles, and strategies. Laboratory includes computer simulated problems. MENT HLTH COM

232C. Problems in Leadership. (2-4) § Sp. Prerequisite: Nursing 232A and 252B or consent of instructor. Lecture 2 hours. Lab 0-6 hours. Staff

Seminar focuses on the analysis of selected problems and case studies and on creative management of human resources in health services. Application and testing of ideas, principles, models, and theories related to leadership roles, decision-making, and planned change. MENT HLTH COM

234. Physiological Research Seminar. (3) § Sp. Seminar 3 hours. Carriari

Evaluation of research in the student's area of specialization. Emphasis is on critique of the design, methodology, and findings. Synthesis of the evaluation of studies results in the identification of major research questions in the field. PHYSIOL NURS

235. Implications of Nursing in Aging. (2-4) § F, W or Sp. Lecture 2 hours. Lab 0-6 hours. Takano, Frazier

Study of the physiological, psychological, and sociological aspects of aging. Focus is on selected theories and research relevant to nursing care of the aged. Laboratory utilizes a variety of settings serving the aged. PHYSIOL NURS

236. Expectant Parent Group Education. (2-3) § Sp. Prerequisite: Consent of instructor. Lab 3 hours. Seminar 2 hours. May

Theoretical sessions related to methodology and techniques of conducting
expectant parent education groups. Exploration of content relevant to concerns of expectant parents encompassing childbirth and early child rearing experiences. Concurrent practicum recommended, but not required. FAM HUTH

237. Health Assessment through Life. (3) § F. Prerequisite: Enrollment in the Nurse Practitioner Program. Lecture 2 hours. Lab 3 hours.

Staff

Presentation of theoretical principles of health assessment throughout the life cycle. Topics to be covered include exploration of methodologies of data gathering and data analysis essential to comprehensive health assessment of all age groups. Laboratory for testing and integration of theory. FAM HUTH

238A. Preschool Child Development. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab to be arranged. Enrollment limited.

Staff

Exploration of the major theories and research findings dealing with the physical, intellectual, and emotional development of the child from birth to school age. FAM HUTH

238B. Middle Childhood Development. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Enrollment limited.

Staff

Exploration of the relevant theories, literature, and research findings dealing with normal cognitive, emotional, and social development during the elementary school years. FAM HUTH

238C. Adolescent Development. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Enrollment limited.

Staff

Exploration of relevant theory, literature, and research findings dealing with normal development during the adolescent period. FAM HUTH

239. Young & Middle Adult Development. (3) § Sp. Prerequisite: Graduate standing. Child Development, and consent of instructor. Lab 3 hours. Seminar 2 hours.

Kayser-Jones

This seminar, using an anthropological, sociological, and psychological perspective, will cover developmental theory and research from young adulthood through the middle adult years. Current issues in young and middle adulthood will be discussed with an emphasis on implications for health care. FAM HUTH

240A. Family Primary Care I. (5) § F. Prerequisite: Enrollment in Family Nurse Practitioner Program and Nursing 237. Lecture 5 hours.

McLain

Theories, concepts, and knowledge for comprehensive assessment and management of common health and illness conditions throughout the life cycle will be presented. Emphasis will be on primary care of the family unit. FAM HUTH

240B. Family Primary Care II. (5) § W. Prerequisite: Nursing 240A. Lecture 5 hours.

S. Carroll

Theories, concepts, and knowledge for comprehensive assessment and management of selected episodic, stable chronic illness and related health conditions throughout the life cycle will be presented. Emphasis will be on primary care of the family unit. FAM HUTH

240C. Family Primary Care III. (5) § Sp. Prerequisite: Nursing 240A and 240B. Lecture 5 hours.

Bowe

Theories, concepts and knowledge for comprehensive assessment and management of special problems in family primary care will be presented. Emphasis will be on primary care of the family unit. FAM HUTH

241A. Primary Care Role Development. (1) § F. Prerequisite: Consent of instructor and concurrent enrollment in clinical residency. Seminar 1 hour.

Bowe and Staff

Critical analysis of issues and research related to collaboration in primary care. Emphasis will be on philosophy, interaction and role negotiation. Course is facilitated by Nursing and Medical faculty. FAM HUTH

241B. Primary Care Role Development. (1) § W. Prerequisite: Consent of instructor and concurrent enrollment in clinical residency. Seminar 1 hour.

McLain and Staff

Critical analysis of issues and research related to collaboration in primary care. Emphasis will be on joint decision making and conflict resolution. Course is facilitated by Nursing and Medical faculty. FAM HUTH

241C. Primary Care Role Development. (1) § Sp. Prerequisite: Consent of instructor and concurrent enrollment in clinical residency. Seminar 1 hour.

Bowe and Staff

Critical analysis of issues and research related to collaboration in primary care. Emphasis will be on organization and process of care. Course is facilitated by Nursing and Medical faculty. FAM HUTH

Staff

Seminar intended for graduate students in psychiatric nursing to examine and discuss theories and practice approaches of various individual psychotherapeutic modalities in current use. MENT HUTH COM

243. Group Psychotherapeutic Modalities. (2) § F. Prerequisite: Consent of instructor. Seminar 2 hours.

Staff

A seminar intended for graduate students of psychiatric nursing to examine and discuss theories and practice of various group modalities in current use. MENT HUTH COM

245. Self-Care in Nursing. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

Steiger

The theoretical and practical bases of self-care and health promotion are studied with active participation of students. Development of skills such as formulation of client teaching...
plans and doing self-care will be emphasized.
FAM HLTH

246. Parenting Deterrents. (3) § F, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Tesler
Exploration of evolving mother-child relationships, adaptive tasks, and environmental and interpersonal situations interrupting healthy development of mothering. Implications for nurturing and nursing roles.
PHYS IOL NURS

247.01. Issues in Health Care of Aged. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. H. A. Fields
An exploration of the interrelationships of various issues, trends, and theories related to the aged. A discussion of the nurse's role in the planning and delivery of health care to the aged, both sick and well. FAM HLTH

247.02. Political Aspects of Aging. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Staff
Investigation of legislative and political issues of long-term health care and the implications for nursing practice. FAM HLTH

248. Group Independent Study. (1-6) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-6 hours. Staff
Groups of two or more collaborate in clinical investigations and other studies of special problems in nursing and health sciences under the direction of faculty. Students may select areas related to their long-term interests and future research or clinical program.

249. Independent Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff
Individual study with emphasis on special problems in nursing. Students may select areas of study which are related to their area of interest or future goals.

250. Research. (1-8) § F, W, Sp. Prerequisite: Admission to doctoral study and consent of instructor. Staff

251. Cross-Cultural Nursing Research. (3) § F, W, Sp. Prerequisite: Nursing 211A or equivalent and consent of instructor. Seminar 3 hours.

Seminar examining selected international nursing issues including primary care, nursing education and nursing service, women's roles and patients' rights.

253. Physical Assessment. (3) § F, W. Lecture 2 hours. Lab 3 hours. K. Fitzgerald
The theoretical basis of clinical manifestations of alterations in normal physiology and structure related to the ill or injured. Course also provides opportunity to practice history and physical assessment skills relevant to the clinical nurse specialist. Clinical laboratory required. PHYS IOL NURS

254.02. Fetal-Newborn Development. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Loper-Hunter
Exploration of the critical phases and processes of fetal growth, development and function as a basis for understanding the genesis of congenital anomalies, pathophysiological problems in the newborn, and the nursing implications.

255.02. Child Health Maintenance. (2-3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-3 hours. Durand
Course provides exploration of theories, concepts and knowledge for comprehensive child health maintenance, encompassing preven tion and promotion. Emphasis on parents as participants in assessment, decision-making, and management of common health problems and normal developmental stresses in infancy and childhood.

255.03. Common Pediatric Illness Mgmt. (4) § W. Prerequisite: Consent of instructor. Lecture 4 hours. J. Phillips
Covers theoretical basis of physiological and psychological principles necessary for understanding management of common pediatric illnesses. Provides format for integrating material with clinical findings, utilizing developmental and communication concepts in assessment and management. Collaborative roles between nurse, family, and physician emphasized. FAM HLTH

257. Health of Aging Family Member. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. G. Doyle
Course focuses on health promotion and maintenance of the older person within the family context. Exploration of applicable theories, concepts and principles. Special emphasis on physical, emotional and social resources for the frail elderly.

258A. Family & Childbearing. (3) § F. Lab 3 hours. Seminar 2 hours. May, Mercer
Critical analysis of psychosocial and physiological factors as they impact on the family during pregnancy and childbirth. Emphasis on evolving maternal/paternal roles and tasks related to pregnancy, body image, sexuality, childbirth and parenting.

258B. Family & Childbearing. (3) § W. Lab 3 hours. Seminar 2 hours. Mercer, May
Critical analysis of psychosocial and physiological factors as they impact on the family during childbirth and early parenting. Emphasis on transition to parenthood, parental and couple concerns, and issues in effecting change to provide optimal nursing care.
259.01. Women's Health Care. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours.  
K. Patterson, Neeeson
Course provides a broad perspective of women's health care. Problems discussed include both the historical perspective and the current view. Included is the philosophical and political discussion of women as health care providers and women as health care receivers. FAM HLTH

259.02. Women's Health: Theories & Mgmnt. (1-4) § F. Prerequisite: Consent of instructor. Lecture 1-4 hours.  
Neeeson
Exploration of theories, concepts and knowledge necessary to maintain and promote women's health. Emphasis on application of current research; decision making and management of pregnancy, the interconceptional period, and the climacteric, including collaboration with health team members. FAM HLTH

259.03. Women's Health: Theories & Assmt. (1-4) § W. Prerequisite: Consent of instructor. Lecture 1-4 hours.  
K. Patterson
Theory and management of bio-psycho-social deviations from normal in women before and during pregnancy, interconceptional period, and climacteric. Emphasis placed on critical analysis of research in metabolic, infectious, and functional disorders including collaborative management of concerns affecting women and family. FAM HLTH

J. G. Lipson
Introduction to basic concepts and issues in medical anthropology and transcultural nursing. Course provides opportunity to critically review research literature and discuss implications for nurses and other health care professionals. MENT HLTH COM

261. Computers In Nursing. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours.  
M. Cook
Comparative analysis of potential effects on nursing of formalized patient and administrative information systems. Course will focus on critique of manual and computerized information systems in nursing. MENT HLTH COM

263A. Long-Term Client Evaluations. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours.  
G. Doyle
Selected frameworks for assessment, analysis of data and presentation of diagnoses are explored as related to long-term care clients in institutional and community settings. Data bases and methodologies for collecting client information are studied. Concurrent four unit practicum required. FAM HLTH

263B. Long-Term Restorative Nursing. (2) § Sp. Prerequisite: Nursing 263A or consent of instructor. Lecture 2 hours.  
G. Doyle
Examination of restorative nursing with long-term clients in various institutional and community settings. Exploration of methods of implementation of prescribed nursing care and evaluation outcomes toward client goal achievement and independence. Concurrent practicum required. FAM HLTH

263C. Quality Assurance in Health Care. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.  
G. Doyle
Focus is on dimensions of quality assurance. Impact of value judgments and components of quality assurance such as peer and utilization review, professional standards, consumer and institutional control, and vested interests examined on the basis of outcomes in long-term care. FAM HLTH

264. Social Context of Nursing. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours Lab 3 hours.  
E. Nichols
Focus is on the exploration of social processes and how they impinge on nursing practice. Interventions based on empirical data are considered. FAM HLTH

265A. Prog Planning Research Methods. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.  
Archer
Exploration of research approaches to program planning and evaluation, emphasizing conceptualizing the evaluation problem, developing a research strategy, and implementing the evaluation. Focus is on problem definition and instrument construction. MENT HLTH COM

265B. Prog Planning Research Methods. (3) § Sp. Prerequisite: Nursing 265A and consent of instructor. Lecture 2 hours. Lab 3 hours.  
Archer
Exploration of research approaches to program planning and evaluation, emphasizing conceptualizing the evaluation problem, developing a research strategy, and implementing the evaluation. Focus is on data collection, analysis, and reporting. MENT HLTH COM

266. Research Protocol. (3) § Sp. Prerequisite: Nursing 211A or consent of instructor. Lecture 1 hour. Seminar 2 hours.  
Reif
Lecture and guided study in the elements of the research proposal. Development of a research area and design appropriate for conduct of a thesis or dissertation. Opportunity for concentrated study in an area under special arrangement with other faculty (TBA). FAM HLTH

267. Ethical Dilemmas & Nursing Prac. (2) § F, W. Prerequisite: Graduate standing. Lecture 2 hours.  
A. Davis
Exploration of selected ethical theories and dilemmas in health care and nursing practice. Focus is on selected case studies depicting ethical dilemmas in nursing practice, nursing research, and health policy. MENT HLTH COM

268. Psychiatric Liaison Nursing. (3) § F. W. Sp. Prerequisite: Nursing 211A or consent of instructor. Enrollment in psychiatric liaison
track in M.S. program. Lab 3 hours. Seminar 2 hours. Staff

A theory course which reviews current practice models for psychiatric nurses in non-psychiatric settings. Clinical reports and research on psychiatric liaison services will be critically analyzed. Legal and professional issues in the psychiatric care of the mentally ill are examined. MENT HLTH COM

269. Historical & Contemporary Issues. (2-3) § W. Lecture 2 hours. Seminar optional 1 hour. Staff

This course is designed to explore major issues and trends in contemporary nursing and health care delivery as they relate to nursing practice, education and research. MENT HLTH COM

270. Adult Health Assessment. (4) § S2. Prerequisite: Consent of instructor. Lecture 4 hours. Staff

Burgel

Course introduces assessment techniques for determining health status of adults. Focuses upon collection and interpretation of clinical data derived from the history and physical examination. Emphasizes identification of actual potential stressors as well as adequate responses. MENT HLTH COM

271A. Adult Primary Care Management. (1-4) § F. Prerequisite: Nursing 270 or consent of instructor. Lecture 1-4 hours. Staff

Introduces primary health care concepts essential to management of common physical illness in adults. Emphasis is on promotion of optimum client adaptation, selection of clinical interventions congruent with clients’ adaptive potential, and incorporation of the nursing process into clinical decision-making. MENT HLTH COM

271B. Adult Primary Care Management. (1-4) § W. Prerequisite: Consent of instructor. Lecture 1-4 hours. Staff

Introduces primary health care concepts essential to management of common physical illness in adults. Emphasis is on promotion of optimum client adaptation, selection of clinical interventions congruent with clients’ adaptive potential, and incorporation of the nursing process into clinical decision-making. MENT HLTH COM

272. Adult Prospective Health Care. (2) § Sp. Lecture 2 hours. Staff

Introduction to principles of health maintenance care for adults including health risk appraisal and problem identification. Emphasis on health risks related to age, sex, race, health habits, history of individual and family illness. MENT HLTH COM

273. Concepts in Occupational Health. (3) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Seminar 1 hour. Staff

Resnik

The structure and organization of the occupational health system, including regulatory control mechanisms for worker protection, labor management relations, and costs are analyzed. Emphasis is on planning, development, and evaluation of occupational health programs. MENT HLTH COM

275A. Physiological Basis for Nursing. (1-3) § F, W. Lecture 1-3 hours. Lindsay

275B. Physiological Basis for Nursing. (1-3) § W, Sp. Lecture 1-3 hours. C. Robinson, Preisig

Study of physiological theories applicable to nursing. Focus is on normal function of gastrointestinal, cardiovascular, renal and pulmonary systems which serve as a basis for nursing practice. PHYSIOL NURS

276. Theoretical Perspectives in Nurs. (3-4) § F, W. Prerequisite: Consent of instructor. Lab 3 hours. Seminar 3 hours. Staff

Wachter-Shikora

Comparative study of selected nursing conceptions and theories and their implications for nursing practice, curriculum development and research. Critique of theories will address key questions relevant to nursing goals, intervention focus and outcomes, recipient of nursing, and social significance. PHYSIOL NURS

277. Illness Management Research. (3) § F, W. Sp. Prerequisite: Nursing 211A, or graduate course in research methods in social science, or consent of instructor. Lecture 2 hours. Lab 3 hours. Course may be repeated for credit. Reif

Methods for conducting exploratory studies on social-psychological and organizational factors which affect the management of illness and delivery of health services. Problem identification, collection and analysis of data, and presentation of findings and policy implications of research are included. FAM HLTH

278. Nursing Science History & Philos. (3-4) § F. Prerequisite: D.N.S. student standing or consent of instructor. Lecture 3 hours. Seminar optional 1 hour. Gortner

An analysis of the history and development of nursing science and research in the United States, addressing the origins of scientific questions and methods in nursing, and the debates currently ongoing regarding definition, credibility, design, conduct, and outcomes of research. FAM HLTH
279A. Family Stress & Coping. (3–5) § F. Lecture 3 hours. Seminar optional 2 hours. Nolan, Ventura
Analysis of selected family concepts, stress factors and coping strategies in development- and situational events in the family life cycle. FAM HLTH
279B. Family Stress & Coping Research. (3) § F. W. Prerequisite: Consent of instructor. Lecture 2 hours. Seminar 1 hour. Ventura, Gortner, Nolan
Seminar designed to critically examine concepts of family health, stress and coping, and to develop skills in research design and analysis related to the family as a unit. FAM HLTH
279C. Family Stress & Coping Therap. (3–5) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Seminar optional 2 hours. Nolan, Ventura, McLain
Presentation of theories and research relative to care of the family as a unit. Course content focuses on methods of assessment, intervention and evaluation of family stress factors, resources and coping behaviors, as well as models of family nursing. FAM HLTH
280. Sex Counseling. (3) § W. Prerequisite: Nursing 189 or equivalent, and consent of instructor. Lecture 2 hours. Lab 3 hours. Enrollment limited. Ayres
Theories, concepts, research, and techniques of sexual counseling with individuals and groups. A conceptual model will provide the direction for assessment, intervention, and evaluation of common sexual concerns and dysfunctions. Optional practicum available. FAM HLTH
281. Sexuality & Illness. (3) § Sp. Prerequisite: Nursing 189 or equivalent, and consent of instructor. Lecture 2 hours. Lab 3 hours. Ayres
Physical, emotional, and interpersonal implications of short- and long-term illness on sexuality. Course includes review of research findings, analysis of relevant literature, and application of nursing process to selected medical/surgical conditions in sexuality. Optional practicum available. FAM HLTH
Exploration of prevention theory, mental health needs of children, and a model of delivery of mental health services through the collaboration of mental health specialists and primary health care providers. Analysis of theoretical bases for various intervention strategies. MENT HLTH COM
284. Adolescent Health Care. (2) § F. Prerequisite: Consent of instructor. Seminar 2 hours. Savedra, Dole
Examination and analysis of theory and research related to health care of adolescents and their families in a variety of settings. Emphasis will be on adaptation to selected stresses including trauma, chronicity, hospitalization, terminal illness and disability. FAM HLTH
285A. Psychiatric Research Methods. (2) § F. Lecture 2 hours. A. Davis
Course is part of a three-quarter sequence designed to teach research methods for utilization in psychiatric-mental health settings. Clinical studies in mental health settings will be analyzed regarding research design. Students will develop their own clinical research. MENT HLTH COM
285B. Psychiatric Research Methods. (2) § W. Lecture 2 hours. P. Underwood
Course is part of a three-quarter sequence designed to teach research methods for utilization in psychiatric-mental health settings. Clinical studies in mental health settings will be analyzed regarding research design. Students will develop their own clinical research. MENT HLTH COM
285C. Psychiatric Research Methods. (2) § Sp. Lecture 2 hours. B. Hall
Course is part of a three-quarter sequence designed to teach research methods for utilization in psychiatric-mental health settings. Clinical studies in mental health settings will be analyzed regarding research design. Students will develop their own clinical research. MENT HLTH COM
287. Nursing Administration I. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. C. Kelly, Hendricks
A critical review and analysis of concepts, theories, principles and research studies relative to leadership and adjunct processes such as decision making, communication, change and conflict resolution. MENT HLTH COM
287B. Nursing Administration II. (3) § W. Prerequisite: Nursing 287A and consent of instructor. Lecture 3 hours. Wellons
An analysis of major organizational concepts and theories. Emphasis on a systems framework to examine external and organizational variables and their relationship to nursing administration roles and functions. A critical review of health care systems, alternative approaches, and related research. MENT HLTH COM
287C. Nursing Administration III. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Wellons
Synthesizes leadership, professional governance, organization, and communication theories and concepts to selected nurse-administrator roles in a variety of health care and educational settings. Emphasis on personnel management, marketing, regulatory processes and other administrative responsibilities. MENT HLTH COM
288. Nursing Administration Seminar. (2) § F. Prerequisite: Consent of instructor. Seminar 2 hours. Styles, S. J. Weiss
A seminar for doctoral students to analyze theories and models of administration relative to executive roles in academic and service settings. MENT HLTH COM
289. Labor Relations. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours.
  W. Neff
Critical analysis of organization and exchange theories relative to managing
employer-employee relations in health care and educational settings. Emphasis is on the
labor movement, labor legislation and regulation, contract negotiations, and grievance
procedures. MENT HLTH COM

290.01. Family Health Theory. (3-4) § F.
Prerequisite: Enrollment in D.N.S. or other
doctoral program. Lab 0-3 hours. Seminar
3 hours.
  Savedra, Mercer
Comparative analysis of classical theories and
methodologies for deriving a theory base
for family health nursing. Emphasis is on
interactional, role, structural-functional, and
systems theories. FAM HLTH

290.02. Family Health Theory. (3-4) § W.
Prerequisite: Nursing 290.01 or consent of
instructor. Enrollment in doctoral program.
Seminar 3 hours.
  Savedra, Mercer
Comparative analysis of classical theories and
methodologies deriving a theory base
for family health nursing. Emphasis is on
developmental, psychoanalytic, exchange,
cognitive, dissonance, conflict and field
theories. FAM HLTH

290.03. Family Health Theory. (3-4) § Sp.
Prerequisite: Nursing 290.01 and 290.02 or
consent of instructor. Enrollment in doctoral
program. Seminar 3 hours.
  Savedra, Mercer
Individual development of a framework or
model for study of a specific problem in
family nursing. Emphasis is on critique of
texts models generated by students and their
applicability to research problems. FAM HLTH

292A. Physiology of Pregnancy. (1) § W.
Prerequisite: Nursing 274.01A or consent
of instructor. Lecture 1 hour.
  Staff
Review and analysis of advanced physiological
basis for assessing and developing
nursing practice and research. Emphasis is
on reproductive and endocrine systems af-
fecting adaptation and development during
pregnancy. PHYSIOL NURS

292B. Physiology of Pregnancy. (1) § Sp.
Prerequisite: Nursing 274.01B or consent of
instructor. Lecture 1 hour.
  Hutkins
Review and analysis of advanced physiological
basis for assessing and developing
nursing practice and research. Emphasis is
on cardiovascular, hematologic, neuroendo-
crine and renal systems affecting adaptation
and development during pregnancy. PHYSIOL
NURS

293. Nursing Serv & Educ Evaluation.
(3) § F, W. Prerequisite: Consent of instructor.
Seminar 3 hours.
  Holzemer
Case studies are utilized to demonstrate the
activity of program evaluation in nursing
service and education. JCAH and NLN criteria
are examined. Evaluation designs, instru-
mentation, data utilization, and political com-
ponents of evaluation for policy decision-
making are critically analyzed. PHYSIOL
NURS

Prerequisite: One course in research design.
Seminar 3 hours.
  Holzemer
Course will focus on selection and construc-
tion of data-gathering tools in nursing
research. Validity, reliability and utility are
discussed. Computer coding and conducting
a pilot study are included. PHYSIOL NURS

295. Quasi-Experimentation in Res. (3)
§ F, Sp. Prerequisite: Consent of instructor.
Seminar 3 hours.
  Holzemer
Seminar discussing validity issues of quasi-
experimentation in nursing research. Designs
examined in nursing literature include non-
equivalent control group designs, interrupted
time-series designs, passive observation, and
randomized experiments. PHYSIOL NURS

296. Teaching Theories & Evaluation.
(4) § W. Prerequisite: Consent of
instructor. Lecture 2 hours. Seminar 2 hours.
  Okamoto, Abu-Saad
Analysis of principles, theories and
research in the field of teaching with
emphasis on teaching strategies and
evaluation methods applicable to clinical and
educational settings. A microteaching format
is incorporated for application and evaluation
of selected teaching interactions. PHYSIOL
NURS

Prerequisite: Consent of instructor. Lecture 3
hours.
  W. Everett
Critical analysis and synthesis of basic eco-
nomic theories and accounting principles
and their relationship to financial planning
and control in health care and educational
settings. Critiques nurse manager's roles and
responsibilities in fiscal management of these
settings. MENT HLTH

298. Thesis or Comprehensive Exam.
(0) § F, W, Sp. Prerequisite: Advancement to
candidacy and permission of the graduate
adviser.
  Staff
For graduate students engaged in writing
the thesis for the master's degree or taking a
comprehensive examination required for the
master's degree.

Prerequisite: Advancement to candidacy and
permission of the graduate adviser.
  Staff
For graduate students engaged in writing
the dissertation for the Doctor of Nursing
Science (D.N.S.) degree.

Prerequisite: Consent of instructor. Lab. 12-36
hours.
  Staff
Opportunity to apply and evaluate theo-
ries, concepts, and skills in the work setting
under the supervision of a preceptor.
402. Administration Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours.

Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor.

403. Consultation Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours.

Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor.

404. Clinical Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours.

Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor.

404.06A. Pediatric Residency. (5) F. Prerequisite: Consent of instructor. Lab 15 hours.

Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

404.06B. Pediatric Residency. (5) W. Prerequisite: Nursing 404.06A and consent of instructor. Lab 15 hours.

Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

404.06C. Pediatric Residency. (5-6) Sp. Prerequisite: Nursing 404.06A, 404.06B and consent of instructor. Lab 15-18 hours.

Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of mental health and community nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. MENT HLTH COM

Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of family health care nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. FAM HLTH

Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of physiological nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. PHYSIOL NURS

409. Continuing Education Residency. (6-12) F, W, Sp. Prerequisite: Nursing 201 or equivalent, and consent of instructor. Lab 18-36 hours.

Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. Focus is on development of the Continuing Education Specialist role in meeting continuing education needs of registered nurses.

Staff

Supervised practice in selected components of the teaching role in nursing.

Nutrition

Hochstein

An introduction to the basic principles of human nutrition. Subject material is related to the maintenance of normal nutrition throughout one's life span, and emphasis is on normal nutrition and its preventive role in maintaining general health, specifically oral health. GEN DENT

160. Nutrition in Dental Hygiene. (2) W. Lecture 2 hours.

J. Levine

Review of biochemical principles of nutrition related to development and maintenance of oral tissue, and the interrelationship of food stuffs. Emphasis will be on practical application of nutritional assessment and counseling for dietary/behavioral change. PERIODONT

Talbot

Supervised practicum in nutrition counseling with dental clinic patients. Students will apply techniques of diet analysis, preventive program planning, and patient counseling. PERIODONT

181. Counseling for Families. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Gutierrez

Course provides theory and practice in the interpretation of current concepts and principles of nutrition counseling with an emphasis on cultural nutrition. FAM HLTH

200. Maternal & Infant Nutrition. (2-4) § W. Prerequisite: Consent of instructor. Lecture 2-4 hours.

Gutierrez

Application of current maternal nutrition research to train students in working with other health professionals to offer interdisciplinary maternal nutrition counseling in the
prevention of low birth weight. Emphasis will be on cross-cultural factors in assessment and counseling. FAM HLTH

201. Principles of Diet Therapy. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Gutiérrez

Concepts of dietary modifications as required in the prevention and treatment of major disease entities. Emphasis will be on current diet therapy research and on clinical approaches useful in practice. FAM HLTH

202. Counseling for Families. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 5 hours. Gutiérrez

Theory and practice in the interpretation of current concepts, principles, and research in nutrition for family counseling. Emphasis will be on cultural dietary patterns. FAM HLTH

Obstetrics, Gynecology and Reproductive Sciences

110. Ob Gyn Core Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 132A-B-C. Jaffe and Staff

Basic principles and fundamental techniques in obstetrics and gynecology, including the psychiatric aspects of obstetrics and gynecology are discussed in a series of seminars, case discussions, and teaching clinics. Students gain practical experience in clinics, wards, delivery room, and operating room under direct supervision. OB GYN R S

140.01. Advanced Ob Gyn Clerkship-C. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110 and Medicine 110 or Surgery 110 or consent of instructor. C. Levinson

Students will have responsibilities of full-time acting residents on both the obstetrical and gynecological services. OB GYN R S

140.02A-B-C-D-E-F-G. Advanced Clinical Clerkships. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110, consent of instructor, and approval of department at off-campus hospital. Braga, R. Glass

Advanced clinical clerkship. Senior clerkships in both inpatient and outpatient obstetrics and gynecology are available at the following and other various hospitals by arrangement: L, MZ, S, K, VMG, NMHC. OB GYN R S

140.06. Advanced Gyn Clerkship-SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110 and Medicine 110 or Surgery 110 or consent of instructor. R. Sweet and Staff

Course is individually structured for each student by the instructor, with emphasis on areas of interest and need for in-depth exposure to gynecology. OB GYN R S

140.07. Advanced Gyn Clerkship-UC. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110 and Medicine 110 or Surgery 110 or consent of instructor. Braga, R. Glass

The clerk functions in the role of an acting resident on the gynecology service. Responsibilities are primarily on the inpatient service and will include both surgical and nonsurgical aspects of gynecologic oncology, endocrinology, infertility, and general gynecology. OB GYN R S

140.08. Ob Gyn Preceptorship. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110 and consent of instructor and chairperson of the department. Staff

Clinical experience in a subspecialty area or general obstetrics and gynecology under the direction of a member of the faculty. OB GYN R S

150.01. Research in Ob Gyn & Repro Sci. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department. Staff

A nonclinical research project under the direction of a member of the faculty. OB GYN R S

170.01. Sociocultural Aspects of Nutrition. (2) F. Lecture 1 hour. Seminar 1 hour. Abrams

A survey of the social, cultural and psychological factors that determine food behavior in the individual. Lectures, discussions and readings will identify barriers to healthy food patterns. Brief written assignments and class discussions will develop practical approaches to the provision of nutritional care. OB GYN R S

198. Supervised Study. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. OB GYN R S

199. Laboratory Project. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of the faculty with the approval of the chairperson of the department. OB GYN R S

222. Reproductive Endocrinology Sem. (1) § F, W. Prerequisite: Consent of instructor. Seminar 1 hour. Jaffe and Staff

Seminar presentations in areas of current interest in reproductive endocrinology by guest speakers and members of the Reproductive Endocrinology Center. Students will be required to submit a term paper. Course may be repeated for credit. OB GYN R S

230. Reproductive Endocrinology. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Minimum of 4 students. R. Weiner

Lectures and assigned readings on the reproductive endocrinology of the male and female. Topics include structure, function, and regulation of the hypothalamic, pituitary,
and gonadal hormones, with special emphasis on the human. OB GYN R S

231. Hormone Receptor Binding. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours.
J. Roberts
An in-depth assessment of the characterization of hormone receptor interactions by ligand binding methods. Lectures, assigned readings, and problems will focus on theoretical and practical aspects of techniques and data analysis. OB GYN R S

234. Electron Microscopy Techniques. (3) § Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours. Connell
Course is designed to develop skills for using transmission electron microscopy in research. The effects of anesthesia, fixation, and such on tissue will be discussed. Students will be expected to carry out the process from tissue to electron micrograph. OB GYN R S

Jaffe and Staff
Conferences comprised of formal discussions by staff, faculty, and visiting lecturers. OB GYN R S

F. Hill, Braga, H. Jones
Seminar includes the presentation of pathologic material from the obstetric and gynecologic services with formal instruction and discussions. OB GYN R S

Laros
Seminars include presentations of special topics, literature reviews, and discussions. Discussions of resident staff functions also are held. OB GYN R S

Laros, SFGH R. Sweet, C. Webb
Residents are responsible for the care of patients in the hospital and outpatient clinic. Formal and individual instruction is conducted. OB GYN R S

Occlusion

110A. Introduction to Occlusion. (1) F. Lecture 1 hour.

Tuell, Braly, T. Jacobson
Course is designed to teach students tooth morphology while introducing them to occlusion. As students learn the classic shapes of teeth, the reasons for each concavity and convexity will be explained. RESTOR DENT

110B. Introduction to Occlusion. (1) W. Prerequisite: Satisfactory completion of Occlusion 110A. Lecture 1 hour.

Tuell, Braly, T. Jacobson
Building on the content of Occlusion 110A, this course continues the study of occlusion. Classes of occlusion, diseased occlusion, therapeutic approaches and the "ideal occlusion" form the basis for the series of lectures. RESTOR DENT

120. Occlusion Morphology & Physiol. (1) Sp. Prerequisite: Concurrent enrollment in Oral Diagnosis 129. Lecture 1 hour. Hu
A conjoint lecture and discussion series on the relationship of occlusion to the clinical phases of dentistry. RESTOR DENT

180. Special Crown & Bridge Problems. (1) W. Prerequisite: Consent of instructor. Lecture 1 hour. Enrollment limited.
Pavone
Course covers the diagnosis and treatment of occlusal disorders of the adult dentition. The etiology of functional disturbances, analysis of occlusal relationships of the opposing arches, and a rationale for therapy will be presented and discussed. RESTOR DENT

Operative Dentistry

Schuchard and Staff
Clinical instruction. RESTOR DENT

D. Graham and Staff
Beginning techniques in operative dentistry. Five hours of lecture on the theory and principles of cavity design and preparation are included in the spring quarter. RESTOR DENT

125A-B. Operative Techniques. (0-6, 0-6) F, W. Prerequisite: Operative Dentistry 115A-B-C. Lecture 1 hour. Lab 6 hours.
D. Graham
Continuing techniques in operative dentistry. One hour of lecture each week accompanies the laboratory work; lectures reinforce principles taught in the laboratory. Clinic rotation is included. RESTOR DENT

Schuchard
This course must be taken concurrently with Operative Dentistry 109. RESTOR DENT

180. Advanced Operative Theory. (1) F. Prerequisite: Operative Dentistry 130 A-B-C. Lecture 1 hour.
M. Stark
Lectures and televised demonstrations covering quadrant dentistry, washed field techniques, complex restorations, analysis of related research, and clinical applications of the various restorative procedures. RESTOR DENT

180.01. Advanced Operative Theory. (1) W. Prerequisite: Operative Dentistry 180. Lecture 1 hour.
D. Knapp
Continuation of Operative Dentistry 180. RESTOR DENT

180.02. Advanced Operative Theory. (1) Sp. Prerequisite: Operative Dentistry 180.01. Lecture 1 hour.
D. Knapp
Continuation of Operative Dentistry 180.01. Organization of the material is
planned in relation to progress of students enrolling in the 180 series. RESTOR DENT

189. Direct Gold Restorative Proc. (1) F, W, Sp. Prerequisite: Open to fourth-year students with approval of the chairman of the division. Clinic 3-6 hours. Enrollment limited.

Schuchard
Techniques and procedures for Class III restorations using the conservative approach, as well as wedge and matrix. Work also will be done on Class V direct gold restorations. Students learn to use various materials including fibrous gold, goldent, and electrolite. RESTOR DENT

189.01. Adv Clinical Operative Dentistry. (0.25) F, W, Sp. Prerequisite: All previous courses in operative dentistry curriculum sequence. Clinic variable. Schuchard
Continuation of clinical experience at the level of Operative Dentistry 109. RESTOR DENT

189.02. Adv Clinical Operative Dentistry. (0.4) Sp. Prerequisite: Approval of the chairman of the division. Clinic 0-12 hours.

Schuchard and Staff
Advanced instruction in the field of clinical operative dentistry, utilizing procedures different from those presented at the level of Operative Dentistry 109, such as quadrants and plastics. RESTOR DENT

199. Laboratory Project. (1.5) F, W, Sp. Prerequisite: Approval of the Dean.

Schuchard and Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairman of the department. RESTOR DENT

Ophthalmology

First-Year Coordinated Instruction—
Medicine 131A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship—Surgery 110 and 111 include lectures and clinical experience in the diagnosis and care of eye diseases.

140.01A. Advanced Ophthalmology Clerkship—UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Surgery 110 or consent of instructor. O’Donnell
Students will serve as subsitute residents on the ophthalmology wards. They will work-up and present patients, and attend surgery and postoperative clinics. This is an intensive clerkship where students will be on twenty-four hour call the entire time. OPTHALMOL

140.01B. Advanced Ophthalmology Clerkship—UC (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. O’Donnell
Students will observe, work-up and present ophthalmology outpatients at the Eye Clinic. They will attend department rounds and conferences. OPTHALMOL

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. S. Kramer and Staff
Clinical clerkship in approved hospitals by special arrangement and approval by the Dean and the chairman of the department. OPTHALMOL

140.03. Adv Ophthalmology Clerkship—SPGH (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Goodner and Staff
Clinical observation of patients in the clinics, wards, and surgery at SPGH. OPTHALMOL

Clinical observation of patients in the clinics, wards, and surgery at L OPTHALMOL

140.05. Adv Ophthalmology Clerkship—VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Whitten

Under close supervision, students are involved in the clinical observation of patients in the Eye Clinic, on the wards and in surgery, and participate in departmental conferences. Main objective of the course is to enable students to perform a complete eye examination. OPTHALMOL

140.06. Adv Ophthalmology Clerkship—VA (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Stanley
Clinical observation of patients in clinics and surgery. OPTHALMOL

150.01. Ophthalmic Pathology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. J. B. Crawford
Seminars include gross and microscopic ophthalmic pathology with clinical correlation of cases from the Eye Clinic, wards, and other hospitals. OPTHALMOL

150.02. Ophthalmology Research. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department. S. Kramer
A research project under the direction of a member of the faculty carried out in the Department of Ophthalmology. OPTHALMOL

198. Supervised Study. (1.5) F, W, Sp. S. Kramer
Library research and directed reading under supervision of a member of the faculty with the approval of the chairman of the department. OPTHALMOL

199. Laboratory Project. (1.5) F, W, Sp. S. Kramer
A laboratory research project under direction of a member of the faculty with the approval of the chairman of the department. OPTHALMOL

400. Staff Conference. (1) F, W, Sp. S. Kramer
Residents prepare and present diagnostic and therapeutic problem cases. Discussion by faculty and visitors follows. Residents also present papers on various aspects of medi-
cine and ophthalmology which are discussed by faculty members. OPHTHALMOL

401. Staff Conference. (1) F, W, Sp. Prerequisite: First- and third-year residents. S. Kramer
Conferences include grand rounds and case presentations of hospital patients, re-
view of recent literature in ophthalmology, and assigned reading with required reports.
OPHTHALMOL

Seminars include didactic lectures in prac-
tical work covering pathology, neuro-oph-
thalmology, uveitis, physiological optics,
refraction, ocular motility, glaucoma, and
microbiology. OPHTHALMOL

Didactic lectures and demonstrations cov-
er the basic sciences as applied to ophthal-
mology. These include anatomy, histology,
biochemistry, physiology, and pharmacol-
y. OPHTHALMOL

454. Clinical Ophthalmology. (1½ per
week) Su, F, W, Sp. UC Beard, CHMC E. Stern
Residents, under supervision, are respon-
sible for patient care including diagnostic
studies and treatment of medical eye care,
diagnosis, surgery, and follow-up treatment
of surgical eye cases. Residents consult for
other hospital services. OPHTHALMOL

455. Fourth-Year Residency. (1½ per
week) Su, F, W, Sp. S. Kramer
Fourth-year residency begins at UC or at an
approved institution subject to the approval
of the chairperson of the department and the
Dean. OPHTHALMOL

457. Clinical Ophthalmology. (1½ per
week) Su, F, W, Sp. PHI A. Schwartz,
STM R. N. Shaffer, Schatz,
CHS, SRM Rathbone, RDMC T. Moore
Residents or fellows, under supervision,
are responsible for patient care, including
diagnostic studies and treatment of medical
eye care, diagnosis, surgery, and follow-up
treatment of surgical eye cases. OPHTHAL-
MOL

490. Clinical Ophthalmology. (1½ per
week) Su, F, W, Sp. Goodner
Residents, under supervision of the attend-
ing staff, are responsible for patient care on
wards and in the follow-up clinic, including
diagnostic studies and consultation. This
rotation is combined with patient-care
assignments in the Otolaryngology Service.
OPHTHALMOL

Oral Diagnosis

109. Clinical Oral Diagnosis. (1-3) SS, F,
W, Sp. Prerequisite: Third-year standing and
Oral Diagnosis 129. Clinic 30-90 hours. Braly and Staff
Clinical instruction on an individual basis
in area of baseline education and compre-
hsive treatment planning as part of patient
activities in the dental clinics. Credit is
assigned on the basis of time spent perform-
ing diagnostic procedures on assigned clinic
patients. GEN DENT

109.01. Oral Diagnosis & Roentgeno-
logy. (0-2) F, W, Sp. Prerequisite: Third-year
standing. Clinic and Seminar block rotation
60 hours. Braly and Staff
Clinical experience and small group in-
struction are provided in diagnosis and
treatment planning, emergency dental care,
clinical photography, and roentgenology.
GEN DENT

109.02. Dental Emergency Clinic. (0-1)
F, W, Sp. Prerequisite: Oral Diagnosis 109.01.
Clinic rotation 30 hours. S. Eakle
Experience in the provision of dental
emergency care in the UC Clinics and in the
initial evaluation of persons seeking dental
care. Instruction is provided on an individual
and small group basis. GEN DENT

129. Diagnosis & Treatment Planning.
(2) Sp. Prerequisite: Oral Diagnosis 116A-B.
Clinic and Seminar 6 hours. Maxwell
Small group instruction is provided in
comprehensive case work-up of dental pa-
tients. Student completes a case history,
clinical examination, studies case analysis,
diagnosis and treatment plan, meeting the
patient's total dental needs. GEN DENT

189.01. Clinical Oral Diagnosis. (0-9) F,
Clinic variable. Braly
Continuation of clinical experience at the
level of Oral Diagnosis 109. GEN DENT

Oral Medicine and
Hospital Dentistry

109.01. Clinical Oral Medicine. (0-2) F,
W, Sp. Prerequisite: Oral Medicine and Hospital
Dentistry 120, 126, and 127. Lecture and
Clinic 2 hours. Chinn, Caswell and Staff
Group rotation through two five-week
sections: clinical diagnosis—patient
presentation entailing history-taking, exam-

170. Temporomandibular Joint Disease. (1) F, W. Sp. Prerequisite: D.D.S. degree. With consent of instructor, fourth-year students may take this course as an elective.

175A-B. Oral Immunology & Immunopath. (0-4, 0-4) F. W. Prerequisite: Consent of instructor. Lecture 2 hours. Two-quarter course. J. Greenspan.

Lectures and seminars on immunological mechanisms and their contribution to oral disease. Topics to be covered include the immunology of periodontal disease, oral microbial diseases, oral autoimmune disease, and discussions of the interface of immunopathology and inflammation. Oral MED

Lectures and seminars on diseases of the oral regions. Disease entities are studied from a clinical and histomorphological standpoint with emphasis on etiology and pathogenesis. Oral MED

179. Oral Medicine. (0-2) F, W. Sp. Prerequisite: D.D.S. degree. With consent of instructor, fourth-year students may take this course as an elective. Due to patient commitments in the clinic, students, once selected, may not withdraw. Clinic 10-20 weeks. R. Taylor

Participation in the Temporomandibular Joint Clinic applying knowledge of histological and differential diagnosis and utilizing such diagnostic techniques. Oral MED

Clinical pathology conference; biology, diagnosis, and treatment of various oral lesions and associated patient problems. Some oral conditions are critically re-evaluated in the light of current research advances. Specific medical knowledge is related to patient care. Oral MED

181. Forensic Odontology. (1) W. Prerequisite: Consent of instructor. Lecture 1 hour. B. Beckstead
Identification by means of dental evidence, known as forensic odontology. Course includes identification procedures in single and multiple deaths, including homicides and mass disasters, forensic dental radiology, bite marks and bite injury, the medico-legal autopsy, fire research, and forensic anthropology. ORAL MED

Merrell

The advanced dental student participates in lecture-seminars, in which emphasis is placed on the diagnosis of oral disease correlating the history, clinical, operative, radiographic, laboratory, and histopathological findings. ORAL MED

186. Intro to Biological Sciences. (1) SS. Lecture, Laboratory and Demonstration 9 hours for three weeks.

Christie

Introduction to the biological sciences taught in the first year of dentistry: anatomy, biochemistry, and physiology. Course includes one-half day per week orientation to the campus community. ORAL MED

S. Silverman

Participation in the Oral Medicine Clinic: apply knowledge of history-taking and differential diagnosis; utilize various diagnostic techniques such as biopsy, cytology, and certain clinical pathology laboratory tests; interpret results, prescribe treatment and follow-up; hospital rounds and weekly seminar. ORAL MED

189.03. Adv General Dentistry Clerkship. (1½ per week) F, W, Sp. Prerequisite: Fourth-year standing and approval of Clinic Review Committee.

S. Silverman, Ware

Students provide comprehensive dental care to patients assigned to them under supervision of staff in the medical and hospital environment. Students also attend seminars and conferences. ORAL MED

S. Silverman, T. E. Daniels, J. Olson

Review of oral diseases most relevant to physicians. Biopsy, diagnosis, management and prevention are covered. Subjects include introduction to dentistry, caries, fluoride, periodontal disease, precancerous lesions, oral cancer, salivary gland disease, oral aphthae, herpes, smoking, diseases of the tongue. ORAL MED

199. Laboratory Project. (1-5) F, W, Sp. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ORAL MED

Newbrun and Staff

Principles and methods employed in oral biology, such as radiotechniques, spectroscopy, chromatographic techniques, use of animal models, cell fractionation and enzyme purification, methods in cell mediated immunology, antibody quantitation, immunomorphology, antibiotic sensitivity testing and indices for quantitating dental diseases. ORAL MED

S. Silverman and Staff

A wide spectrum of selected topics related to oral biology is presented with emphasis on basic and applied research methodology, pertinence of problems, significance of findings, and critical evaluation of data. ORAL MED

S. Silverman

Advanced considerations in the field of histopathology. Applications of newer techniques and concepts are presented to increase understanding of the oral cavity in health and disease. Etiology, diagnosis, and therapeutics are discussed. ORAL MED

208A-B. Oral Immunology & Immuno-path. (0-4, 0-4) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Two-quarter course.

J. Greenspan

Lectures and seminars on immunological mechanisms and their contribution to oral diseases. Topics to be covered include the immunology of periodontal disease, oral microbial diseases, oral autoimmune disease, and discussions of the interface of immunopathology and inflammation. ORAL MED

209. Connective Tissue Biology. (2-3) § W. Prerequisite: Biochemistry 207 or consent of instructor. Lecture 2-3 hours.

Staff

A seminar course in connective tissue biology, concerned mainly with the development, differentiation, and pathology of connective tissues; includes such topics as regulatory controls of connective tissue macromolecules, fibrosis, wound healing, inflammation, tissue destruction, and selected genetic disorders. ORAL MED

Staff

A seminar series covering current advances in research in oral biology in a systematic manner. Current literature is critically reviewed by students under faculty supervision, or by faculty or guest lecturers. ORAL MED

Staff

ORAL MED

Staff

Reading and conferences under the direction of a member of the staff. ORAL MED
298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. **Staff**

For graduate students engaged in writing the thesis for the master's degree. ORAL MED

300. Teaching Practicum. (1-4) § F, W, Sp. Prerequisite: Consent of instructor. **Staff**

Practice in teaching a course in oral biology under the supervision of the instructor in charge. ORAL MED

406. Selected Topics. (1) F, W, Sp. Seminar 1 hour. **Staff**

A wide spectrum of selected topics related to oral biology is presented with emphasis on basic and applied research methodology, pertinence of problems, significance of findings, and critical evaluation of data. ORAL MED

408A-B-C. Oral Pathology. (2.2.2) F, W, Sp. Lecture and Seminar 2 hours. L. Hansen

Lectures and seminars on diseases of the oral regions. Disease entities are studied from a clinical and histomorphological standpoint with emphasis on etiology and pathogenesis. ORAL MED

Participation in the Oral Medicine Clinic applying knowledge of history-taking and differential diagnosis; utilizes various diagnostic techniques such as biopsy, cytology, and certain clinical pathology laboratory tests, interpret results, prescribe treatment and follow-up, hospital rounds, and weekly seminars. ORAL MED

489.02. Oral Medicine. (1) F, W, Sp. Prerequisite: D.D.S. degree and consent of instructor. Clinic 3 hours. **Staff**

Participation in the Temporomandibular Joint Clinic applying knowledge of history-taking and differential diagnosis; utilizes such diagnostic techniques as radiographic X-rays, occlusal analysis, and other specific joint tests; interprets results; prescribes treatment; and follows-up with patient. ORAL MED

492. Advanced Radiographic Interpretation. (1) F. Lecture 1 hour. **Kircos and Staff**

An introduction to the fundamentals of radiographic interpretation, some of the basic physics of X-ray generation, and radiation biology. GEN DENT

121. Radiographic Interpretation. (1) Sp. Prerequisite: Oral Radiology 121. Lecture 1 hour. **Kircos**

Course is a continuation of Oral Radiology 121 and is intended to broaden the scope of radiographic interpretation. Additional aspects concerning radiation biology are also included. GEN DENT

150. Oral Radiology for Dent Hygiene. (2) W. Lecture 2 hours. **Kircos**

Course covers basically the same material as Oral Radiology 121, but is modified to meet the special needs of the dental hygienist. GEN DENT

159. X-Ray Technique. (1) W. Lab 3 hours. **Kircos**

A course in intraoral X-ray technique including instruction in the long cone paralleling method and practice on mannequins and skulls. GEN DENT

169. Intraoral & Panoramic Radiography. (1) F. Prerequisite: Oral Radiology 150 and 159. Clinic 3 hours. **Kircos**

Course offers, in addition to intraoral technique, instruction and experience in panoramic radiography. GEN DENT

Continuation of Oral Radiology 121 and 131 in a seminar teaching format. GEN DENT

199. Laboratory Project. (1-5) F, W, Sp. **Staff**

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. GEN DENT

190. Clinical Oral Surgery. (0.75) SS, F, W, Sp. Prerequisite: Passing grades in the following courses before senior rotation: Oral Surgery 130A, 130B, 120 or consent of faculty (third-year rotation), Oral Surgery 130C, 131, 132 or consent of faculty. Clinic. **Staff**

Students learn to recognize and treat common emergencies; perform routine exodontia and minor oral surgical procedures; assist on major procedures in operating room setting; utilize common techniques of pain and anxiety control; admit, work-up and discharge hospital patients. ORAL MED

120. Local Anesthesia. (1-½) Sp. R. A. Smith

Course covers local anesthesia technique as it pertains to the dentition and oral cavity. ORAL MED
130A. Introduction to Oral Surgery. (1) SS. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture 1 hour.

**N. Gordon**

An introduction to the basic principles of exodontia, post-operative care, hemorrhage control, and medical emergencies. ORAL MED

130B. Introduction to Oral Surgery. (1) F. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture 1 hour.

**N. Gordon**

A didactic course outlining the basic principles of removal of unerupted teeth, pre-prosthetic surgery, prescription writing, maxillary sinus involvement, tooth transplantation, wound healing, referrals and consultations. ORAL MED

130C. Pain Control & Medical Emergency. (1) W. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture 1 hour.

**R. A. Smith**

A didactic course outlining the principles of pain control with nitrous oxide and IV sedation, management of medically compromised patient and medical emergencies in the dental office are presented. ORAL MED

**R. A. Smith**

Procedural skills and academic knowledge the general dentist should be familiar with: includes the treatment of cysts, infection, developmental deformities of the jaws and salivary glands, duct diseases, and procedures. ORAL MED

132. Patient Evaluation in Med Emer. (¼) F.

**R. A. Smith**

Medical evaluation of dental patients and in-depth evaluation and treatment of patients with medical problems. Evaluation and treatment of cardiac arrest. Discussion of emergency drugs and development of an office emergency kit. Demonstrations of parenteral administration of drugs. ORAL MED

171. Applied Surgical Anatomy. (1) F, W. Sp. Prerequisite: Limited to interns and residents. Lab 3 hours. **Courage**

Relationships of gross anatomical structures of the head and neck are studied during laboratory dissections. Emphasis is placed on the correlation of cadaver dissection findings to diagnosis and operating room surgery. ORAL MED

173. Surgical Orthodontics. (0-3) F, W. Sp. Prerequisite: Enrollment in oral surgery residency or general practice residency program. Lecture 0-3 hours.

**Ware, Courage**

Orthodontic and oral surgery residents will participate in evaluating and defining treatment possibilities for patients with facial and occlusal deformities which may require combined therapy. Review and presentation of previously treated patients and pertinent literature will be included. ORAL MED

175. Advanced Clinical Oral Surgery. (13) Su. Prerequisite: Limited to oral surgery interns. Hospital and Clinic 40 hours.

**Ware and Staff**

Principles of surgery and local anesthesia as related to the mouth and clinical operations on patients. ORAL MED

175.01A-B. Advanced Clinical Oral Surgery. (2-7, 2-7) F, W. Sp. Prerequisite: Limited to interns and residents. Lecture-Seminar 2 hours. Clinic 0.15 hours. **Ware and Staff**

Continuation of Oral Surgery 175. ORAL MED

175.02. Advanced Clinical Oral Surgery. (15) Su. Prerequisite: Limited to oral surgery residents. Seminar 2 hours. Hospital and Clinic 40 hours.

**Ware and Staff**

Continuation of Oral Surgery 175.01 A-B. ORAL MED

175.03. Advanced Clinical Oral Surgery. (13) F. Prerequisite: Limited to oral surgery residents. Hospital and Clinic 40 hours.

**Ware and Staff**

Hospital procedures, ward rounds, and clinical practice in several hospitals; treatment of jaw fractures, osteomyelitis, cellulitis, and other complicated oral surgical procedures. Resident will have administrative responsibilities in conducting ward rounds and weekly conferences. ORAL MED

175.04B-C. Advanced Clinical Oral Surgery. (10-10) W. Sp. Prerequisite: Limited to oral surgery residents. Lecture 2 hours. Hospital and Clinic 24 hours.

**Ware and Staff**

Continuation of Oral Surgery 175.03 with the addition of surgery of the jaws for correction of such facial deformities as prognathism, apertognathia, and retrognathia. Instruction in temporomandibular joint surgery. ORAL MED

175.05. Advanced Clinical Oral Surgery. (13) Su. Prerequisite: Oral Surgery 175.04B-C. Limited to oral surgery residents. Hospital and Clinic 40 hours.

**Ware and Staff**

Continuation of clinical oral surgery. Certain periods each week devoted to supervised instruction of undergraduate students. ORAL MED

**Ware and Staff**

Continuation of Oral Surgery 175.05. ORAL MED

**Courage**

Under oral surgery office conditions, and under immediate supervision of the staff,
residents will be responsible for care and management of the ambulatory patient who is to undergo an oral surgery procedure under ambulatory anesthesia. ORAL MED

R. A. Smith
An elective didactic and demonstration course with practice sessions to insure the student's knowledge and capability of managing the psychomotor skills of cardiopulmonary resuscitation. ORAL MED

189.01. Advanced Oral Surgery Clinic. (8-9 SS. Prerequisite: Fourth-year standing and consent of instructor. Clinic variable.

Wared and Staff
Additional clinical experience in oral surgery. ORAL MED

Wared, Courage
Course provides limited experience in hospital oral surgery including assisting and performing oral surgery procedures, and aspects of premedication as related to the ambulatory patient; orientation in hospital decorum and operating room procedures. ORAL MED

Wared and Staff
Course provides limited experience in hospital oral surgery including assisting and performing oral surgery procedures, and aspects of premedication as related to the ambulatory patient; orientation in hospital decorum and operating room procedures. ORAL MED

Students participate in oral surgery care of hospital inpatients and outpatients. They also attend seminars and lectures. ORAL MED

Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ORAL MED

Course is designed to teach the dental intern exodontia procedures under close supervision in the oral surgery clinic. The trainee takes responsibility for care of the oral surgery patient including preoperative evaluation, surgery planning, and postoperative care. ORAL MED

Orthodontics

109. Clinical Orthodontics. (0-3) F. W, Sp. Prerequisite: Orthodontics 121 and 131A-B, or concurrent enrollment in Orthodontics 131A or 131B. Clinic variable. R. M. Meyer
Evaluation and treatment of clinical orthodontic problems as experienced in general dental practice. Students will treat problems and refer others to specialists. Observation of specialists' management of the more difficult problems is included. GR DEVEL

121. Intro to Growth & Development. (1) Sp. Lecture 1 hour. Issacson
Course describes the mode of growth of the craniofacial complex. General aspects of growth with clinical implications for the growing child are discussed, including the eruption of teeth and their correlation with facial growth. GR DEVEL

130. Basic Orthodontic Techniques. (1) SS. Lecture 1 hour for six weeks. Lab 3 hours for six weeks. Quinn
A lecture and laboratory course designed to enable the student to fabricate and place a removable orthodontic appliance, a lingual arch, and solder wires. Experience in producing study casts, and measurement and analysis of casts and headfilms will be included. GR DEVEL

131A-B. Orthodontics in General Practice. (0-3, 0-3) F, W. Prerequisite: Orthodontics 121. Lecture 2 hours F; 1 hour W. Yoshikawa
Recognition and treatment of the problems most commonly seen by the general practitioner. GR DEVEL

160. Principles of Orthodontics. (0-3, 0-3) Sp. Lecture 0-3 hours. E. West and Staff
A discussion of recognition, etiology, and principles of orthodontics for the dental hygienist. GR DEVEL

170A-B-C-D-E. Fundamentals of Orthodontics. (0-3, 0-3, 0-3, 0-3, 0-3) F, W, Sp. SS1, SS2. Lecture 0-3 hours. E. West
Classification, etiology, and diagnosis of malocclusion. Study of the dentition and the relationships of dental and cranial structures. GR DEVEL

171B-C. Orthodontics in Periodontic Pract. (0-3, 0-3) W. Sp. Prerequisite: Consent of instructor and enrollment in a postdoctoral specialty program. Lecture 0-3 hours. E. West and Staff
Course includes orthodontic principles and techniques that are applicable in a periodontic practice. GR DEVEL
171.05A-B-C-D-E. Growth & Development. (0.5, 0.5, 0.3, 0.3, 0.5) F, W, Sp, Ss1, Ss2. Prerequisite: Enrollment in orthodontics program. Lecture 0.5 hours. 

Orthodontic applications of basic craniofacial growth and development. GR DEVEL.

172.02A-B-C-D-E. Supervised Research. (0.3, 0.3, 0.3, 0.3, 0.3) F, W, Sp, Ss1, Ss2. Lecture 0.3 hours. 

Orthodontics, primary, and mixed dentition is designed to provide diagnostic information and treatment planning for malocclusions in the primary and mixed dentition periods of dental development. GR DEVEL.

173A-B-C-D-E. Orthognathic Surgery Conference. (0.3, 0.3, 0.3, 0.3, 0.3) F, W, Sp, Ss1, Ss2. Prerequisite: Enrollment in orthodontics residency program. Lecture 0.3 hours.

174A-B-C-D-E. Primary & Mixed Dentition. (0.3, 0.3, 0.3, 0.3, 0.3) F, W, Sp, Ss1, Ss2. Prerequisite: Enrollment in postgraduate orthodontics program. Lecture 0.3 hours. 

Yoshikawa and Staff 

174A-B-C-D-E. Orthognathic Surgery Conference. (0.3, 0.3, 0.3, 0.3, 0.3) F, W, Sp, Ss1, Ss2. Prerequisite: Enrollment in orthodontics residency program. Lecture 0.3 hours. 

Litt and Staff 

Orthodontic and oral surgery residents will participate in evaluating and defining treatment possibilities for patients with facial and occlusal deformities which may require combined therapy. Review and presentation of previously treated patients and pertinent literature will be included. GR DEVEL.

173.08A-B-C-D-E. Diagnosis & Treatment Planning. (0.5, 0.5, 0.5, 0.5) F, W, Sp, Ss1, Ss2. 

Isaacson and Staff 

Evaluation and treatment planning of various types of malocclusion. GR DEVEL.

173.06A-B-C-D-E. Treatment Evaluation. (0.3, 0.3, 0.3, 0.3) F, W, Sp, Ss1, Ss2. Lecture 0.3 hours. 

Isaacson and Staff 

An evaluation of orthodontic treatment and prognosis for stability of results of treatment. GR DEVEL.

174A-B-C-D-E. Biomechanics. (0.3, 0.3, 0.3, 0.3, 0.3) F, W, Sp, Ss1, Ss2. Lecture 0.3 hours. 

Yoshikawa and Staff 

Fundamental concepts of force systems will be presented. Included are equilibrium force, equivalence and free body analysis. Concepts will be related to orthodontic tooth movement and appliance design. GR DEVEL.

179.01A-B-C-D-E. Clinical Orthodontics. (0.5, 0.5, 0.5, 0.5, 0.5) F, W, Sp, Ss1, Ss2. Prerequisite: Enrollment in postgraduate orthodontics program. Lab variable. Clinic 21-30 hours. 

Isaacson and Staff 

Laboratory instruction precedes clinical experience. A minimum of 1,080 hours is included in the series of Orthodontics 179.01A-B-C-D-E and 179.03A-B-C-D-E. GR DEVEL.

179.03A-B-C-D-E. Clinical Orthodontics. (0.5, 0.5, 0.5, 0.5, 0.5) F, W, Sp, Ss1, Ss2. Prerequisite: Enrollment in postgraduate orthodontics program. Lab variable. Clinic 21-30 hours. 

Isaacson and Staff 

Scholz 

Various concepts of occlusion will be evaluated as they affect habilitation and functional problems of the temporomandibular joint. GR DEVEL.

182A-B. Applied Growth & Development. (1.1) F, Sp. Prerequisite: Orthodontics 121 and 131A-B-C. Lecture 1 hour. 

Yoshikawa 

Review of general principles of craniofacial growth as applied to detection in treatment of incipient malocclusion. GR DEVEL.

Orthopaedic Surgery 

First-Year Coordinated Instruction—Medicine 151A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients. 

Core Clerkship—Surgery 110 and 111 include seven to eight orthopaedic lectures, case presentations, and outpatient clinic assignments. Students are given instruction in methods of examination of patients with musculoskeletal disorders with emphasis on diagnosis and principles of treatment.

140.01. Adv Ortho Clinshp—UCSF GH VA (10 per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111. 

W. Murray 

Students, assigned to inpatient and outpatient services receive instruction and experience in examination and treatment of patients. Assistance in surgery and use of treatment modalities are required. Clinical demonstrations, seminars, and conferences form the basis for didactic instruction.

ORTHOSURG
140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111.
W. Murray
Orthopaedic surgery clinical clerkships are offered in off-campus hospitals approved by the chairperson of the department and the Dean. ORTHO SURG

198. Supervised Study. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor.
W. Murray
Library research and directed reading under direction of a member of the faculty with the approval of the chairperson of the department. Lecture, individualized instruction, and clinical experience may also be included. ORTHO SURG

UC J. Johnson
A lecture series covering tumors and infections of the musculoskeletal system, illustrated by microscopic slides and photographs of gross specimens. ORTHO SURG

402. Musculoskeletal System Physiology. (1) F, W, Sp. UC Trafton
A lecture series on connective tissue metabolism; muscle, bone, and joint physiology; preoperative and postoperative management of patients; wound infections; microbiology; and surgical principles. ORTHO SURG

Course includes lectures by students and faculty on gross and functional anatomy, laboratory dissections of cadaver material and demonstrations of surgical approaches. ORTHO SURG

Seminar is a student presentation of selected orthopaedic surgery subjects featuring historical review complete with bibliography. They are moderated by an assigned faculty member. ORTHO SURG

UC W. Murray
Clinical instruction in the care and management of orthopaedic problems in rheumatoid arthritis and allied diseases. Cases are presented by residents to attending staff and rheumatology consultants. ORTHO SURG

HH Slabaugh
Seminar includes presentation of problem cases by residents for consideration of diagnosis, treatment, and discussion by the attending staff. ORTHO SURG

SFGH Bovill
Selected problems are illustrated by cases treated or under treatment. Cases are presented by the resident staff and discussed by members of the attending staff. ORTHO SURG

409. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. SSF L. Larsen
Conference with emphasis on children's problems in which residents make case presentations of inpatients for review and of new patients for consideration of diagnosis and therapeutic plan. ORTHO SURG

411. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. VA Maurer
Conference includes review of admissions and discharges of hospitalized patients by the attending and consultant staffs. Cases are presented by the residents. ORTHO SURG

CHMC Debenham, HH Slabaugh, SM W. Jackson
Seminars are held in rotation at each of these hospitals with residents from all three hospitals attending. They include literature review and demonstrations related to surgical approaches, anatomical dissections, diagnosis and treatment. ORTHO SURG

413. Orthopaedic Medical Staff Conf. (1) Su, F, W, Sp.
UC W. Murray
Residents prepare and present case histories of inpatients and selected outpatients. Course includes discussions on diagnostic procedures, indications for surgery, immediate postoperative follow-up, and problem cases (consultations). ORTHO SURG

RDMC Maec, PMC Niebauer, KP J. Johnston, MD R. Gordon, WJ L. Larsen, RE J. Perry, FR Hartwig, UC W. Murray
Residents are responsible for patient care in the wards and outpatient clinic in the wards and outpatient clinics including history-taking, physical examinations, laboratory tests, elective surgery, fracture treatment, plaster techniques, and consultations. ORTHO SURG

C L. Larsen, CHMC Debenham, SSF L. Larsen, SH J. Larsen
Residents are responsible for patient care in the wards and outpatient clinic including history-taking, physical examinations, laboratory tests, elective surgery, fracture treatment, plaster techniques, and consultations. ORTHO SURG

SFGH Bovill, SM W. Jackson, VA Maurer, HH Slabaugh
Residents are responsible for patient care in the wards and outpatient clinic including history-taking, physical examinations, laboratory tests, elective surgery, fracture treatment, plaster techniques, and consultations. ORTHO SURG

UC W. Murray
Under faculty supervision, the chief resident organizes care and referral of staff pa-
Otolaryngology

First-Year Coordinated Instruction—Medicine 131A-B-C. Lecture demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship—Surgery 110 and 111 include lectures and case discussions on the examination and diagnosis of otolaryngological diseases, particularly those related to trauma and infection. Instruction is given in the examination and diagnosis of ward and clinic patients with otolaryngological surgical diseases.

140.01A. Adv Otolaryngology Clerkship—Va (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. Boles

A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.01B. Adv Otolaryngology Clerkship—Va (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. J. Ross

A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.01C. Adv Otolaryngology Clerkship—SFGH (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. Boles

A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.01D. Adv Otolaryngology Clerkship—L (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. R. Wong

A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.01E. Adv Otolaryngology Clerkship—NRMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. C. M. Johnson

A practical course in general otolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. Boles

Clinical clerkships in off-campus hospitals approved by the chairperson of the department and the Dean. OTOLARYN

198. Supervised Study. (1½) F, W, Sp. Prerequisite: Consent of instructor. R. Schindler

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. OTOLARYN

199. Laboratory Project. (1½) F, W, Sp. Prerequisite: Consent of instructor. Merzenich

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. OTOLARYN

400. Didactic Lectures. (2) F, W, Sp. R. Schindler

Lectures cover the anatomical, physiological, and clinical aspects of otolaryngology. OTOLARYN

401. Head & Neck Gross Anatomy. (1) W. Boles

A formal course in the anatomy of the head and neck. OTOLARYN

403. Histology & Pathology. (½) F, W R. Wong Dekelhoum

A review of ear, nose, and throat pathology from currently available gross and microscopic surgical pathological material from the operating rooms and pathology laboratories. OTOLARYN

404. Staff Rounds. (2) Su, F, W, Sp. Boles

Weekly seminars are held with discussion of current problems concerning diagnosis and management of patients with references to current literature, modern theory, and controversial aspects. OTOLARYN

405. Audiology & Speech Pathology. (1) UC Owens

Seminar includes psychophysical backgrounds in audiology, basic and advanced tests of hearing, functional hearing loss, hearing aids, testing of children, aural rehabilitation, and speech and hearing problems of children and adults. OTOLARYN

406. Tumor Conference. (1) Su, F, W, Sp. UC Dedo
Conference includes presentation of patients, study of histories, and discussion of the treatment of the patient in light of modern progress in the field. OTOARYN

Based on science and clinical aspects of cosmetic facial surgery and reconstructive surgery of the head and neck are covered in a weekly one-hour seminar. Slide presentations, videotape movies, didactic lectures, and anatomic dissections constitute the curriculum. OTOARYN

A laboratory course conducted in the ear, nose and throat pathology laboratory. All resident staff members are required to familiarize themselves thoroughly with the microscopic anatomy of the temporal bone under formal staff instruction. OTOARYN

412. Tumor Board. (1) Su, F, W, Sp. 1/4 J. Ross
Tumor cases are presented for diagnosis and recommendations for treatment. OTOARYN

Combined Audiology and Otolaryngology Staff Conference where all patients evaluated for hearing problems are presented, and diagnosis and treatment recommendations are made. OTOARYN

Residents, under supervision, are responsible for patient care in the wards and outpatient clinics including history-taking, physical examination, laboratory tests, preoperative and postoperative care, minor surgery, audiometry, vestibular testing, and consultations. Senior resident has certain administrative, teaching, and clinical responsibilities. OTOARYN

A study of the techniques of endoscopy and some practical laboratory study including cadaver work. OTOARYN

Interns, under supervision of the attending staff, are responsible for patient care on wards and in the follow-up clinic, including history-taking, examination, and consultation. This rotation is combined with patient-care assignments in the Ophthalmology Service. OTOARYN

Parasitology

135. Medical Parasitology. (3) W. Lecture 2 hours. Lab demonstration 2 hours.
Heyneman and Staff
An introduction to the protozoa, helminths, and arthropods that parasitize man. Parasite ecology and disease epidemiology, clinical and diagnostic aspects of parasitic diseases and their treatment are considered in lecture and laboratory. Emphasis in the laboratory is on demonstration. EPID INTL HTH

Pathology

101. General Systemic Pathology. (4) F. Prerequisite: Substantive courses in anatomy, biochemistry, physiology, histology, microbiology (or concurrent enrollment), concurrent enrollment in Medicine 132A. If in doubt as to adequacy of preparation, consult the instructor. Lecture 3 hours. Lab 2 hours. Friend, Margareten, and Staff
Mechanisms and language of disease are discussed, with emphasis on the dynamic nature of fundamental disease processes: cell injury, immunopathology, inflammation, responses to infectious agents, repair, regeneration, hemodynamic derangements, genetic disorders, disturbances of cell growth, and neoplasia. PATHOLOGY

135. General Pathology. (3) F. Prerequisite: Substantive courses in biochemistry, physiology, histology, microbiology (first quarter, concurrent) or an introduction to immunology. If in doubt as to adequacy of preparation, consult the instructor. Lecture 3 hours. Biava
This course is identical to the lecture portion of Pathology 126. PATHOLOGY

150.01. Autopsy Dissection Principles. (1.5 per week) Su, F, W. Sp. Prerequisite: Pathology 101. Consent of instructor. Enrollment limited.

M. Warnock

Performance of one to two autopsies. Emphasis will be on review of normal anatomy and histology and systematic observations and descriptions of pathologic material. Objective of the course is to provide a better understanding of clinical-pathologic correlations. PATHOLOGY

150.02. Off-Campus Pathology Clerkship. (1.5 per week) Su, F, W, Sp. Prerequisite: Pathology 101 and 102. Smuckler

Clinical clerkships in off-campus hospitals approved by the chairperson of the department and the Dean. PATHOLOGY

150.03. Pathology Clerkship—SFCH. (1.5 per week) Su, F, W, Sp. Prerequisite: Pathology 102 and consent of instructor.

McKay, Margaretten, Howes

Students prepare surgical specimens, perform autopsies under supervision, and participate in teaching conferences. PATHOLOGY

150.04. Pathology Clerkship—UC & VA. (1.5 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Surgery 110. Consent of instructor.

Staff

Students work closely with the faculty and house staff in the performance of autopsies and in the diagnostic work-up of surgical specimens. They actively participate in departmental conferences and seminars. Opportunity provided for development of specific areas of investigation. PATHOLOGY

150.05. Research. (1.5 per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department.

Staff

A research project under the direction of a member of the faculty. PATHOLOGY

150.06. Surgical Pathology—VMC. (1.5 per week) F, W, Sp. Prerequisite: Pathology 102 and consent of instructor.

H. M. Price, Bezmanovic

Clerkship is designed to acquaint students with available techniques of tissue analysis, from light microscope to micromolecular levels, and their application in diagnosis and surgical care. Experience includes post-mortem examination, review of surgical biopsies and frozen sections, electron microscopy. PATHOLOGY

170.01. Clinical Cytology. (3) Sp. Prerequisite: Anatomy 102, Pathology 101 and 102.

E. King, E. Hill

Lectures on basic fundamentals of cytology, normal cells, malignant cells, abnormal nonmalignant cells, collection, and preparation methods. Microscopic examination of specimens and correlation of cellular and tissue pathohy with colposcopic and clinical findings on examination of the patient. PATHOLOGY

Biava

Study of clinical and pathological aspects of current cases of renal disease. New material is presented each quarter during an academic year. Therefore course may be repeated for credit. PATHOLOGY

Staff

Presentation of selected current cases seen in the hospital pathology laboratory. Discussion of pathological findings, and correlation with clinical and radiologic findings and treatment. PATHOLOGY

170.05. Neuropathology. (2) W. Prerequisite: Pathology 102. Third or fourth-year standing. Lecture and Seminar 2 hours.

J. J. Townsend

Emphasis is placed on clinicopathological correlation of neuropathological diseases by means of study of gross and microscopic material and participation in conferences. PATHOLOGY

Staff

Studies in pathology at other institutions with the approval of the chairperson of the department. PATHOLOGY

180.01. General Pathology. (3) F. Prerequisite: Anatomy 118. Lecture 3 hours.

Biava and Staff

This course is identical to the lecture portion of Pathology 126. Elective in the dental hygiene curriculum. PATHOLOGY

Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PATHOLOGY

199. Laboratory Project. (1–5) F, W, Sp. Prerequisite: Consent of instructor.

Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PATHOLOGY

209. Applied Pathology. (3) F. Prerequisite: Microbiology 126A-B and Pathology 126 or equivalents.

J. Greenspan

Weekly seminars are designed to provide students with an understanding of the basic principles of pathology. Emphasis is placed on research, students will critically review current literature in the field, under faculty supervision. PATHOLOGY
220. Experimental Pathology Seminar. (2) F, W. Sp. Prerequisite: Permission of the graduate adviser of the department. Lecture 1 hour. Seminar 1 hour. R. Stern

Presentation of research by students and seminar in pathology and disease mechanisms. Basic and clinical sciences faculty discuss current research in disease processes. Readings assigned. Formation of testable hypothesis and discussion of experimental design led by student leader each session. PATHOLOGY

Students and faculty review literature and discuss current concepts and experiments in connective tissue research. Included are role of structural proteins, such as collagen and elastin, in pathology, cell matrix, interactions in developmental biology and morphogenesis. PATHOLOGY

PATHOLOGY

296. Exptl Models for Human Disease. (3) Sp. Lecture 3 hours. R. Stern

Course covers experimental carcinogenesis, survey of experimental models for the study of human neoplasia. PATHOLOGY

298. Thesis. (0) F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree. PATHOLOGY

299. Dissertation. (0) F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. PATHOLOGY

400. Pathology & Lab Med Seminar. (1) F, W. Sp. Interns and residents. Prerequisite: Medicine 110 and Surgery 110 or consent of instructor. Seminar 1 hour. Staff

Recent developments in diagnosis and research in pathology and laboratory medicine are discussed by faculty and guest speakers. PATHOLOGY

401. Special Topics Seminar. (Units to be arranged) Su, F, W, Sp. Interns and residents. Staff

Seminars focusing upon the pathology of specific organ systems are conducted by specialists. Emphasis is on the correlation between clinical manifestations of the disease and pathologic findings. PATHOLOGY

402. Pathology Research. (1-8) Su, F, W, Sp. Interns and residents. Staff

Students, under supervision, pursue original investigation in pathology and allied subjects. Investigators review the literature, make observations, and correlate physiological with pathologic concepts. PATHOLOGY

Conference includes the collection of data and materials, summary of histories, and citation of pertinent literature by faculty. Residents participate in clinopathological conferences where emphasis is placed on correlation of clinical manifestations of disease with clinical laboratory and autopsy findings. PATHOLOGY

405. Dermatopathology. (2) F, W, Sp. Prerequisite: Pathology 101 or equivalent by consent of instructor. Lab 2 hours. Seminar 1 hour. Sagebiel

Survey of inflammatory and neoplastic skin diseases by study of histopathologic changes and discussion with emphasis on clinical-pathologic correlations. PATHOLOGY

450. Pathologic Anatomy. (5-10) Su, F, W, Sp. Required for interns; elective for residents. Staff

Theory and methodology of pathologic anatomy, interpretation and correlation of data, and study of literature. PATHOLOGY

455. Electron Microscopy Seminar. (1) W. Prerequisite: Medicine 110 and Surgery 110 and consent of instructor. Lecture 1 hour. Elective for interns and residents. Staff

Course covers basic electron microscopic techniques, indications for use of electron microscopy in pathologic diagnosis, and the specific ultrastructural features of normal and diseased tissue. Emphasis is placed on renal biopsy and tumor diagnosis. Documented attendance is required. PATHOLOGY

495. Pathologic Anatomy. (1-½ per week) Su, F, W, Sp. Required for interns. Staff

Theory and methodology of pathologic anatomy, interpretation and correlation of data, and study of literature. PATHOLOGY

Pediatrics

100. Medical Genetics. (2) F. Lecture 2 hours. C. Epstein

Basic aspects of human genetics are presented in a context relevant to the diagnosis, treatment, and counseling of genetic disorders, including congenital malformations. Emphasis is placed on the application of genetic knowledge to actual counseling problems. PEDIATRICS

Practical experience in the ward, newborn nursery, and outpatient clinics with emphasis on case assignments. Teaching and supervision by attending and resident staffs. Required seminars cover aspects of pediatrics, infectious diseases, and child psychiatry. PEDIATRICS

140.01. Advanced Pediatric Clerkship. (1-½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Grumbach

Advanced clerkship including: Normal newborn and IC Nursery; OPD Acute Care
Unit: Inpatient at UC; OPD at SFGH. Outpatient clinics at L, Inpatient and outpatient at K. Inpatient and outpatient at CHMC. Inpatient and outpatient at NRMC. PEDIATRICS

140.01A. Adv Outpt Pediatric Clerkship-UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **Panelli, Bergman, S. Rowe**

   Students are assigned general pediatric patients for assessment and treatment. Supervision will be given with respect to interviewing skills and clinical decision making. Frequent use will be made of video taped interviews and decision analysis techniques as teaching aids. PEDIATRICS

140.01B. Adv Outpt Pediatric Clerkship-SFGH (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. **Pascoe**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01C. Adv Outpt Pediatric Clerkship-UC (1½ per week) F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **Grumbach, Bruhn**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01D. Outpt Pediatric Clerkship-CHMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. **Gersden**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01E. Adv Inpt Pediatric Clerkship-CHMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **Gersden**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01F. Outpt Pediatric Clerkship-KP (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. **Shinefield**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01G. Inpatient Pediatric Clerkship-K. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **Shinefield**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01H. Outpatient Pediatric Clerkship-NRMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **Koenig**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01I. Inpatient Pediatric Clerkship-NRMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **Koenig**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01J. Advanced Nursery Clerkship-UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **Phibbs**

   Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.02. Off-Campus Clerkship. (1½ per week) Tu, W, Th, Sa. Prerequisite: Medicine 110 and Pediatrics 110. **Grumbach**

   Clinical clerkship in off-campus hospitals approved by the chairperson of the department and the Dean. PEDIATRICS

140.03. Outpatient Pediatrics-VMC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **McCann**

   Experience caring for sick and well children with 27,000 patient visits/year. Preventive medicine and anticipatory guidance along with principles of growth and development. All activities closely supervised by either senior residents or faculty. Daily morning conferences, chart rounds, assigned readings. PEDIATRICS

140.04. Pediatric Cardiology. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. **S. J. Robinson**

   Experience in cardiac evaluation and treatment including clinical work-up in the ward and clinic, cardiac catheterization, angiography, children's electrocardiographs, surgical management, and postoperative care. PEDIATRICS

140.05. Pediatric Private Practice. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine
110 and Pediatrics 110. Consent of instructor. Open to UCSF students only. L. P. Smith
Working experience with a pediatrician on the clinical faculty as the pediatrician sees patients in the office and in the hospital. Student may select time in small group, large group or subspecialty practice, or a combination of these. PEDIATRICS

140.06. Adolescent Medicine. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.
Gareis
Clinical clerkship in adolescent medicine with emphasis on outpatient clinical experience in a wide range of health problems of the adolescent. PEDIATRICS

140.08. Outpatient Pediatrics—MZ (1 1/2 per week) F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.
R. Ballard, D. Bergman
Students participate as members of physician team in the ambulatory pediatric program with Children and Youth Project. Night call includes pediatric E.R. and inpatient experience. Students will follow patients from their team on the inpatient service. PEDIATRICS

Berg
Supervised participation in clinical activities, both inpatient and outpatient, and all regularly scheduled conferences of the Child Neurology Division. Study of the developing nervous system and diseases of the nervous system affecting infants, children, and adolescents. PEDIATRICS

140.10. Hematology & Oncology. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Open to UCSF students only.
Mentzer, P. Dallman, Koerpel, Lubin
Students participate in outpatient clinic, and laboratory evaluation of blood and bone marrow specimens at UC, SPGH, and CHMC.

Pursuit of special interests in the clinic or laboratory is encouraged. PEDIATRICS

140.11. Cardiology—CHMC (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.
Kigasho
Students participate in clinical experience including outpatients evaluation, instruction in the noninvasive methods of diagnosis, care of ward medical and surgical cardiac patients, cardiopulmonary laboratory, and cardiovascular conferences. Emphasis is on the physiological principles of diagnosis and management. PEDIATRICS

Zoger, M. Abbott
Advanced clerkship on the general medical-surgical pediatric inpatient unit. Family-centered care is emphasized through the Care With Parent Program. Night call includes pediatric E.R. experience. PEDIATRICS

Grumbach, S. L. Kaplan, F. Conte
Participation in the clinical and investigatory aspects of endocrine and metabolic problems in children. Students spend time in the laboratory, on the wards, and in the clinics. PEDIATRICS

140.14. Juvenile Diabetes. (1 1/2 per week) Su. Prerequisite: Medicine 110 and Pediatrics 110.
Olney
Work under the direction of the instructor in Diabetic Camp, clinical and management aspects of diabetes. Students have an opportunity to participate in the operation of the camp program and treatment of many aspects of diabetes in children, adolescents, and young adults. PEDIATRICS

140.15. Oncology—UC (1 1/2 per week) F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor.
Ablin, Kushner, Zoger
Participation in management of patients with solid tumors and leukemia; attendance at pediatric tumor board, ward rounds and outpatient clinic. Special emphasis on psychosocial problems; supervised reading and discussion with preceptor. PEDIATRICS

140.16. Pediatric Nephrology—UC (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor.
D. E. Potter
Introduction to general nephrology. Clinical experience in pediatric nephrology with children having nutritional problems, ESRD, and chronic renal failure. Post-transplant and dialysis consultations, new cases from the nursery, and cases requiring TPN. Research projects may be arranged with instructors. PEDIATRICS

140.17. Genetics—UC (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor.
C. Epstein, B. Hall
Evaluation and management of children and adults with hereditary (including cytogenetic) diseases, with particular emphasis on genetic counseling, patterns of human malformation, and the biochemical and genetic mechanisms involved in the pathogenesis and transmission of these conditions. PEDIATRICS

Giammona
Students participate in patient care in close association with the house staff and clinical fellows in wards caring for sick children and in newborn intensive care unit, and in rounds and conferences conducted by senior staff. PEDIATRICS

Giammona
Students participate in the comprehensive care of children. Experience with various illnesses is provided in appropriate specialty clinics. A wide variety of child care problems will be seen during visits to offices of senior pediatricians participating in the program.

Frick

Participation in the activities of allergy-immunology trainees, including basic clinical immunology course, journal club, and seminars. PEDIATRICS

Cohn

Clinical experience in a busy community hospital Ambulatory Pediatric Clinic to prepare the student for daily patient encounters and responsibilities of pediatric or family practitioners: Teaching of patients in well and ill general pediatrics, well baby, preventive medicine, and pediatric subspecialties. PEDIATRICS

Hirata

Students participate in the care of infants in the intensive care nursery in close association with the house staff, fellows, and senior staff and in conferences conducted by senior staff. PEDIATRICS

Ballard

Experience in normal newborn and intensive care nurseries, according to student’s interests and skills. Student participates in the care of transport infants, and on night call. PEDIATRICS

Newborn through pre-school age developmental assessments; clinical teaching conferences; literature seminars; consultations in the nurseries and the pediatric ward; day-care experience and seminar; improvement of physician-patient communication skills; clinic for developmental and behavioral problems in 0-3-year-olds. PEDIATRICS

Within the country’s largest prepaid health care program students will participate in office visits, urgent ambulatory care, health education, and inpatient care. They will work with staff and resident physicians, nurse practitioners and health educators. PEDIATRICS

**140.27. Inpatient Pediatrics – KP** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Schoen

Students will perform histories and physical examinations on the pediatric ward under supervision of resident and attending physicians. They will attend resident conferences, see urgent clinic cases with resident and participate in outpatient clinic for discharged patients. PEDIATRICS

**140.28. Adolescent Medicine – SFGH** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. R. C. Brown

Course offers clinical experience in both outpatient and inpatient health care of youth at SFGH. Service includes medical, emotional and social care of youth in a diverse community. PEDIATRICS

**140.29. Inpatient Pediatrics – VMC** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110, Pediatrics 110 and consent of instructor. Moreno

Students are assigned to a clinical team of house officers, faculty and practitioners, and participate in the care of acutely ill hospitalized children. Students refine skills in history-taking, physical examinations, case write-ups and presentations, assist in special procedures and attend daily conferences. PEDIATRICS

**150.02. Human Cytogenetics – UC** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Grumbach, F. Conte

Participation in human cytogenetic studies in children. Emphasis is on laboratory work with exposure to clinical problems and patients. PEDIATRICS

Student research projects under guidance of faculty members. Programs must be approved by instructors. Students may initiate or continue research programs under supervision of faculty members. PEDIATRICS

**160.01. Clinical Correlation in Peds – UC** (2) F, W. Grumbach

Students prepare case presentations weekly from patients on the pediatrics wards. Course correlates patients’ problems with work in the required curriculum. Experience on the ward in the clinical setting. PEDIATRICS

**170.01. Peds Devel Resource Overview** (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. L. Crain

Weekly seminar and reading assignments correlated with observation of the spectrum of community and institutional services, diagnostic, preventive and program services for individuals with developmental disabilities included. PEDIATRICS

**170.02. Primary School Health Educ.** (1-2) F, W, Sp. Prerequisite: Consent of instructor. Attendance of initial orientation by the curriculum department of the San Francisco Unified School District, scheduled
at the first session of the quarter. Field work 3 hours plus class participation. Topic paper optional with consent of instructor for 2 units. L Crain, Ernster

Health professions students are oriented to working with Primary Grades Health Curriculum Program, and participate, under guidance of qualified instructors, in implementing PGHCP for K-3 grade children in local schools. PEDIATRICS

180.01A-B-C-D. Adolescent Development. (2) § F, W, Sp. Su. Prerequisite: Consent of instructor. Seminar 2 hours. Irwin

A four-quarter course covering the physiologic, psychologic, cognitive and social development of adolescence. Also included is material on sexuality, nutrition, family interaction, cultural differences, legal issues, school behavior, substance abuse and psychiatric problems, and common medical problems. PEDIATRICS

198. Supervised Study. (1-5) F, W, Sp. Prerequisite: Consent of instructor.

Grumbach and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PEDIATRICS

199. Laboratory Project. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor.

Grumbach

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PEDIATRICS

400. Staff Conference. (1½) Su, F, W, Sp. Interns and residents. UC Grumbach

Conferences include house staff preparation and presentation of patient case histories with reference to the literature, laboratory work, and special studies. Faculty members and consultants from other departments as well as other universities discuss recent developments in their respective fields. PEDIATRICS

Conferences include review and discussion of recent X-ray studies of pediatric cases in the wards and outpatient service. PEDIATRICS

Seminar includes review and discussion of selected cases of unusual interest, reports on special topics with review of recent literature, and clinicopathological conferences on psychiatric cases. PEDIATRICS

450. Clinical Pediatrics—UC. (1½ per week) Su, F, W, Sp. Interns and residents. UC Grumbach

Residents, under supervision, are responsible for patient care in the wards and outpatient clinic including history-taking, physical examination, laboratory tests, diagnosis and treatment. In addition, the chief resident has certain administrative, teaching, and clinical responsibilities. PEDIATRICS

Residents, under supervision, are responsible for patient care in the wards, communicable disease section, and outpatient clinic including history-taking, physical examination, laboratory tests, diagnosis, and treatment. Emphasis is on diagnosis and management of infection trauma, and pediatric emergencies. PEDIATRICS

Interns in the Primary Care Track of Pediatrics are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Pediatrics Internship Program as well as related clinical services such as Dermatology, Otolaryngology. PEDIATRICS

Residents in the Primary Care Track of Pediatrics are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Pediatrics Residency Program as well as related clinical services such as Dermatology, Otolaryngology. PEDIATRICS

Interns rotate through newborn nursery, pediatric wards and clinic, communicable diseases ward, and emergency room. They are responsible for the care of patients, under the direction of the attending staff, including history-taking, physical examination, laboratory tests, and consultation. PEDIATRICS

Interns, under supervision, are responsible for patient care in the wards and outpatient clinic including history-taking, physical examination, laboratory tests, diagnosis and treatment. PEDIATRICS

Pedodontics

M. Morris and Staff

Clinical diagnosis, plan of treatment, dietary analysis and counseling, fabrication of appliances for and treatment of children requiring orthodontic care, and preventive oral hygiene. Units assigned upon completion of clinical requirements. GR DEVEL

M. Morris and Staff

Introduction to the examination of the child patient, treatment planning, prevention instruction, dietary analysis, and the performance of operative procedures. Proper management of the oral patient will be stressed. GR DEVEL
109.02. Clinical Rotation. (0.2) F, W, Sp. Prerequisite: Fourth-year standing. Clinical rotation 60 hours. M. Morris and Staff

Course is broken up into two components: Mondays, Tuesdays, and Wednesdays will be spent at the Dental Annex Clinic; Thursdays and Fridays at the Mobile Dental Clinic in Stockton. GR DEVEL

130B-C. Clinical Pedodontics. (1, 2) W, Sp. Prerequisite: Operative Dentistry 125A-B-C. Lecture 1 hour W; 2 hours Sp. Leggott

Lecture course presenting dental procedures unique to, or modified to meet, the needs of the child. Examination, diagnosis, treatment planning, pain control and management, restorative procedures, preventive orodontics, diet analysis, and caries control are stressed. GR DEVEL

170.01A-B-C-D. Clinical Pedodontics. (0.5, 0.5, 0.5, 0.5) F, W, Sp, SS. Clinic variable. Staff

170.02A-B-C. Clinical Pedodontics. (0.5, 0.5, 0.5) F, W, Sp. Prerequisite: Pedodontics 170.01A-B-C-D. Clinic 0-15 hours. B. A. Smith

Continuation of Pedodontics 170.01A-B-C-D. GR DEVEL

171.01A-B-C-D-E. Pedodontic Seminar. (0.3, 0.3, 0.3, 0.3, 0.3) F, W, Sp, SS1, SS2. Seminar 1-3 hours. B. A. Smith and Staff

A variety of pedodontic patients are discussed through documented case history presentations. Current and classical literature in pedodontics and allied specialty areas is reviewed. GR DEVEL

173. Community Outreach. (0.6) SS. Prerequisite: Pedodontics 170.02A-B-C. Clinic variable. M. Morris and Staff

Students provide dental care for a non-English speaking migrant population, utilizing facilities of the mobile clinic. GR DEVEL

175. Pediatric Oral Surgery. (3) F. SFGR 90 hours. Khosla, Devlin

Hospital procedures, management of trauma and emergencies involving the primary and young succedaneous teeth. Extractions, re-implantation, pulpectomy, stabilization of luxated teeth, management of infection, and supportive therapy are emphasized. GR DEVEL

176. Pediatric General Anesthesia. (0.3) F. CHMC 90 hours. K. Schroeder and Staff

An introductory course in general anesthesia to familiarize the student with general anesthesia: the attendant problems and risks, the agents used, and methods of delivery. Clinical experience under close supervision. GR DEVEL

177. Pediatric Hospital Dentistry. (0.3) Su, F, W, Sp. Staff

Experience is provided in history-taking, admitting, laboratory tests, orders, and chart keeping. Students are assigned to an interdisciplinary health care team and provide dental care for patients on the ward or in the operating room, using a general anesthesia. GR DEVEL

178. Advanced Clerkship. (0.18) Sp. Prerequisite: Postdoctoral standing and arrangement through head, postdoctoral pedodontists, to observe the practice management of the offices. Lecture and lab variable. B. A. Smith and Staff

Course provides varied clinical experiences, skills, and competence. This advanced clerkship is available for second-year students in pedodontics who have successfully completed the requirements considered core to the program. GR DEVEL

180.01B-C. Pedodontic Seminar. (1, 1) W, Sp. Prerequisite: Completion of third-year pedodontic lecture series and approval of the Director of the Dental Annex B. A. Smith

Documented discussions on occlusion, mixed dentition analysis, malocclusions, missing incisors and premolars, hypoplasias, anomalies, injuries, and oral manifestations of systemic disease. Designed for students considering pedodontics as a specialty. Counseling is provided for postdoctoral education. GR DEVEL

185A-B-C. Advanced Appliance Laboratory. (0.3, 0.3, 0.3) F, W, Sp. Prerequisite: Postdoctoral standing or approval of Clinic Review Committee and chairperson of the division. Lecture 1 hour. Lab 5 hours. Aubuchon

Demonstrations followed by individual assistance in fabrication of projects. A reading assignment will be provided for each session. GR DEVEL

189.01. Clinical Practice. (0.9) F, W, Sp. Prerequisite: Pedodontics 130B-C and completion of clinical pedodontics and all third-year clinical and didactic courses in operative dentistry. Approval of Clinic Review Committee. Clinic variable. M. Morris and Staff

Course provides additional clinical experience in pedodontics. GR DEVEL

189.02. Community Pedodontics. (0.4) F, W. Sp. Prerequisite: Completion of clinical requirements for graduation or approval of Clinic Review Committee. Clinic 0-120 hours. M. Morris, Stark and Staff

An elective clinical course in pedodontics. Students provide care for children at selected migrant farm labor camps. Course includes preventive education, comprehensive operative procedures including pulp therapy and necessary minor dental surgery, taking and processing needed radiographs. GR DEVEL
Periodontology

Taggart, S. R. Miller

Treatment of a variety of periodontal diseases under the direct supervision of faculty. PERIODONT.

110. Introduction to Periodontics. (1) Sp. Lecture 1 hour.

Armitage

Introduction to the recognition and diagnosis of inflammatory periodontal disease. The pathogenesis of periodontal disease is discussed from clinical, histopathological, and biochemical points of view. PERIODONT

119. Intro to Periodontal Therapy. (½) Sp. Clinic five 4-hour periods. Taggart

Introduction to the techniques of supragingival scaling and root planing. PERIODONT

121. Intro to Periodontal Therapy. (1) F, Prerequisite: Periodontology 110. Lecture 1 hour.

Armitage

Introduction to the rationale and objectives of periodontal therapeutic procedures. Also considered are the recognition and treatment of periodontal disease in children, acute periodontal emergencies, and periodontal considerations in restorative dentistry. PERIODONT

Taggart

Introduction to clinical techniques in oral prophylaxis including plaque control, scaling, root planing. During fall and winter quarters, students provide dental hygiene therapy for senior patients. The spring quarter is utilized for treatment of their own patients. PERIODONT

131. Surgical Periodontics. (1) F, Prerequisite: Periodontology 121. Lecture 1 hour.

Taggart

The demonstration and rationale of surgical treatment of periodontal lesions. PERIODONT

150. Oral Hygiene. (2) Sp. Lecture and Demonstration 2 hours. Taggart

Introduction to the oral hygiene problems of the periodontal patient and the means and methods available to the dentist and auxiliaries to motivate the patient to self-care. PERIODONT

160. Periodontal Therapy. (1) F, Prerequisite: Periodontology 150. Lecture 1 hour.

Taggart

Classification of periodontal diseases and methods of their prevention. Principles of pathology are correlated with therapeutic procedures. A faculty panel discusses the role of the hygienist in dental practice. PERIODONT

Taggart

The demonstration and rationale of surgical treatment of periodontal lesions. The role of the dental hygienist in dental practice, especially related to prevention, recognition, and aid in treatment of periodontal diseases. PERIODONT

170A-B-C. Histopathology of Periodontium. (2-2-2) F, W, Sp. Lecture 1 hour. Lab 3 hours. Dienstein (F, Sp.), Ryder (W)

Dynamics of inflammation and its role in the periodontal tissues. PERIODONT

171A-B-C. Clinical Periodontics. (0-8-4) F, W, Sp. Prerequisite: Enrollment in periodontal program. Clinic 12 hours.

Shibata, E. Green and Staff

Clinical procedures in periodontal therapy. PERIODONT

172. Examination & Treatment Planning. (1) F, Prerequisite: Enrollment in postgraduate specialty program or consent of instructor.

Parr

Lectures on examination and treatment planning. PERIODONT

172.01. Hospital Anesthesiology. (6) S8. Prerequisite: Consent of instructor. Seminar 10 hours. Clinic 24 hours.

C. Chang

Practical course in operating room anesthesia. Instruction in hospital administration, physical and preanesthesia evaluation of the patient, monitoring of vital signs, administration of intravenous psychosedation, general anesthesia, and handling of resultant medical emergencies. Clinical instruction is supplemented by seminars. PERIODONT

172.02. Hospital Periodontics. (2) F, W, Sp. Prerequisite: Periodontology 171A-B-C. Lecture 4 hours given in alternate weeks.

Shibata

Clinical periodontics integrated into the regular medical and rehabilitative activities of M2. Course provides patients with quality dental care, appreciation for preventive dentistry, and concept of total health care. Students are exposed to various medical conditions. PERIODONT

173.01. Periodontal Therapy. (2) SS, Prerequisite: Periodontology 171A-B-C. Clinic 60 hours.

Shibata

Clinical procedures in periodontal therapy. This course is an enlargement on earlier clinical experience. PERIODONT

173.02A-B-C. Periodontal Therapy. (4-4-4) F, W, Sp. Prerequisite: Periodontology 171A-B-C. Clinic 12 hours.

Shibata, E. Green and Staff

Advanced clinical procedures in periodontal therapy. PERIODONT

173.03. Periodontal Therapy. (2) SS, Prerequisite: Periodontology 173.02C. Clinic and Seminar 60 hours.

Shibata, E. Green and Staff

Advanced surgical techniques in management of periodontal lesions. PERIODONT
A seminar to discuss and evaluate the problems common to the specialties of orthodontics and periodontics. PERIODONT

175A-B-C-D. Treatment Planning & Surgery. (0-3, 0-3, 0-3, 1) F, W, Sp. SS. Seminar 1 hour. 
Shibata and Staff
Students present and discuss management of their cases that are either planned for treatment or currently under treatment. They are expected to defend their treatment plan and therapeutic procedure based on relevant literature and clinical experience. PERIODONT

175.01A-B-C-D. Adt Treatment Planning & Surgery. (1-1) F, W, Sp. Seminar 1 hour. 
Shibata and Staff
Students present and discuss management of their cases that are either planned for treatment or currently under treatment. They will be responsible for defending their treatment plan and therapeutic procedures based on relevant literature and clinical experience. PERIODONT

176. Original Investigation. (1-5) F, W, Sp. Prerequisite: Enrollment in postgraduate specialty program or consent of instructor. Lab 3-15 hours. 
Armitage
Research. PERIODONT

Raut
Study in depth with literature review and seminar discussions on surgical techniques used to treat lesions involving the hard and soft tissue of the periodontium. PERIODONT

E. Green (F), W. H. Noble (Sp)
Course provides a broad concept of the principles of occlusion, upon which definitive therapeutic procedures can be based. PERIODONT

179A-B. Molec & Biochem Basis of Disease. (2-2) F, W. Prerequisite: Resident or graduate standing. Lecture 2 hours. Lab 1 hour. 
Bhatnagar
Course reintroduces students to principles of biochemistry and molecular biology in relation to current concepts of the molecular basis of major disease entities including cancer, metabolic disorders, fibrotic and degenerative disorders of connective tissues, inflammation, and wound healing. PERIODONT

180. Periodontics in General Practice. (1) W. Lecture 1 hour. 
Parr
Implementation of the skills and knowledge of periodontology in the private practice environment. PERIODONT

180.02A-B. Periodontal Literature. (1-1) F, W. Prerequisite: Periodontology 131 and consent of instructor. Seminar 1 hour. 
Taggart
Study in depth, with literature review and seminar discussions of areas of periodontology having major clinical significance. PERIODONT

180.03. Periodontal Surgical Techniques. (1) F. Prerequisite: Periodontology 131. Lecture 1 hour. 
Shibata
Surgical techniques are presented which may be used to treat lesions occurring in the hard and soft tissues of the periodontium. PERIODONT

Parr
Continuation of clinical experience beyond the level of Periodontology 109. PERIODONT

Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PERIODONT

201A-B-C. Experimental Design. (0-3, 0-3, 0-3) F, W, Sp. Lecture 0-2 hours. Lab 0-3 hours. 
Shibata (F), E. Green (W), Bhatnagar (Sp)
Elements of experimental design, statistical inference, and methods of laboratory and clinical research. PERIODONT

209. Literature Review. (2) § F, W. Seminar 1 hour. 
Staff
Seminar designed to correlate basic sciences with problems in periodontology and evaluate concepts in the direction of research, clinical application, and teaching. Selected papers in the literature are reviewed and evaluated. Other instructors are invited to participate. PERIODONT

Pharmaceutical Chemistry

120. Principles of Pharm Chem. (3) § F. Prerequisite: Chemistry 113. Lecture 3 hours. Lab 3 hours. 
Ortiz de Montellano, M. Wolff
A study of physicochemical and biological factors which contribute to drug action; in vivo and in vitro biotransformations of drugs and related organic compounds. PHARM CHEM

121. Chem & Biolog Correlation. (2) W. Prerequisite: Pharmaceutical Chemistry 120 and concurrent enrollment in Pharmacology 121. Lecture 2 hours. 
M. Wolff
A systematic survey of the chemical features of synthetic drugs, including correlations between chemical structure and biological activity. Emphasis on steroids, hormones, and drugs for metabolic disorders. PHARM CHEM

122. Autonomic & Cardiovasc Drugs. (3) Sp. Prerequisite: Pharmaceutical Chemistry 120. Lecture 3 hours. 
Brochmann-Hanssen
A systematic survey of the chemical features of synthetic drugs, including cor-
relations between chemical structure and biological activity. Emphasis on drugs affecting the autonomic nervous and cardiovascular systems as well as renal function. PHARM CHEM

132. Drugs Acting on CNS. (3) F. Prerequisite: Pharmaceutical Chemistry 120. Lecture 3 hours. Brochmann-Hanssen, Halpin
A systematic survey of the chemical features of synthetic drugs, including correlations between chemical structure and biological activity. Emphasis on drugs affecting the central nervous system. PHARM CHEM

134. Chemotherapeutic Drugs. (2) W. Prerequisite: Pharmaceutical Chemistry 120 and concurrent enrollment in Pharmacology 134. Lecture 2 hours. Oppenheimer
A systematic survey of the chemical features of synthetic drugs, including correlations between chemical structure and biological activity. Emphasis on anti-infective and anti-neoplastic drugs. PHARM CHEM

152. Radionuclides in Biol/Med/Psych. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Peng
Discussion on radionuclides in frequent use in biology and medicine including radionuclides used as pharmaceuticals, with emphasis on dosage form design, quality control, clinical application, and other related aspects. PHARM CHEM

154. Pharmaceutical Quality Control. (2) W. Prerequisite: Pharmacy 165, Pharmacy 166 or concurrent enrollment. Lecture 2 hours. Brochmann-Hanssen
General principles of total quality control applied to the manufacture of pharmaceuticals, introduction to statistical quality control, its application to process studies, and evaluation of dosage forms. Consideration given to simplified quality control systems for small-scale manufacturing and hospital pharmacy. PHARM CHEM

156. Pharmaceutical Analysis. (2) Sp. Lab 6 hours. Brochmann-Hanssen
Experiments in pharmaceutical analysis applied to drug entries, dosage forms, and samples of biological origin. PHARM CHEM

157. Bioanalytical Theory & Technique. (3) Sp. Lecture 2 hours. Lab 3 hours. Sadee
Analytical theory and techniques for determining drugs and metabolites in biological fluids. PHARM CHEM

158. Radioisotope Measurements. (1) W. Sp. Prerequisite: Pharmaceutical Chemistry 152 or consent of instructor. Lab 3 hours. Peng
Detection and measurement of radioisotopes commonly used in biology and medicine. PHARM CHEM

160. Fundamentals in Radioactivity. (2) § F, W. Lecture 2 hours. Perez-Mendez
This course will treat the principles of physical decay in radioisotopes, characteristics of nuclear emissions, interaction with matter, and related aspects in radioactivity. PHARM CHEM

162. Radioisotope Imaging. (1) § Sp. Prerequisite: Pharmaceutical Chemistry 152 or consent of instructor. Lecture 1 hour. D. Price
This course will treat the theory and methodology in the application of radionuclides to organ imaging in nuclear medicine. PHARM CHEM

170. Group Studies. (1-4) § F, W. Sp. Prerequisite: Consent of instructor and adviser. Staff
Group studies of selected topics in pharmaceutical chemistry. PHARM CHEM

198. Supervised Study. (1-5) F, W, Sp. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

199. Laboratory Project. (1-5) F, W. Sp. Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

200. Physical Chemical Properties. (1) § W. Prerequisite: Consent of instructor. Lecture 1 hour. Kollman
Lectures and conferences dealing with the relationship between physical properties and biological activity, with special emphasis on the uses of molecular orbital calculations in this connection. PHARM CHEM

201. Adv Survey of Medicinal Chem. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. M. Wolff
Basic principles of medicinal chemistry and a survey of the relationships between structure and biological action for major drug classes. PHARM CHEM

202. Macromolecular Structure. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Kunz, Langridge
A review of protein and nucleic acid structures. Emphasizes the general principles which govern secondary and tertiary structure, with an introduction to the current approaches to this problem for proteins and transfer RNA. PHARM CHEM

203. Drug Metabolism. (2-3) § Sp. Prerequisite: Consent of instructor. Lecture 2-3 hours. Castagnoli, Sadee
Study of the in vitro and in vivo biotransformation of foreign compounds with particular emphasis on drugs. When possible, detailed chemical and biochemical mechanisms are considered. PHARM CHEM

208. Advanced Survey of Pharmacuetics. (2) § F or W. Lecture 2 hours. Benet and Staff
Basic principles underlying the area of pharmaceutics directed at the needs of graduate students with limited familiarity with pharmaceutical sciences. PHARM CHEM

212A-B-C. Computer Prog-Biological Models. (1-1-1) § F, W, Sp. Prerequisite: Consent of instructor. Lab 1 hour. Conference 1 hour. **Holford, Upton, Benet, C. Hunt**

A three-quarter sequence of courses in computer programming with emphasis on applications to biological modeling. PHARM CHEM

213. Kinetics of Drug Absorp & Disposer. (3) § F. Prerequisite: Chemistry 115. Calculus background is recommended. Lecture 2 hours. Lab 3 hours. **Gle, C. Hunt**

A basic study of the concentration-time course of drugs and their metabolites, methods of pharmacokinetic analysis, and the design of dosage regimen. Laboratory emphasizes the application of electronic calculators and analog computers. PHARM CHEM

214. Adv Kinetics of Absorp & Disposer. (3) § W. Prerequisite: Pharmaceutical Chemistry 213 and Biochemistry 202 or equivalents. Lecture 2 hours. Lab 3 hours. **Benet and Staff**

Advanced consideration of pharmacokinetics including multicompartiment models, assessment of intrinsic absorption and disposition parameters, and correlation of pharmacological response with the concentration-time course of a drug. Laboratory will include analog and digital computational methods. PHARM CHEM

217A-B-C. Advanced Pharmaceutics. (2.3, 2.3, 2.3) § F, W, Sp. Prerequisite: Physical chemistry or consent of instructor. Lecture 2-3 hours. **Staff**

Advanced topics in pharmaceutics. PHARM CHEM

219. Enzyme Mechanisms. (2.3) § F or Sp. Lecture 2-3 hours. **Kenyon, Santi**

Selected topics on enzyme mechanisms. General survey of enzyme catalysis; general acid-base catalysis, propinquity effects, strain and conformational change. Covalent intermediates in enzyme catalysis. The role of cofactors in enzyme catalysis. Phosphate transfer reactions. PHARM CHEM

220. Research Conf in Pharmaceutics. (1) § F, W, Sp. Lecture 1 hour. **Staff**

A program involving the presentation of core material in pharmaceutical chemistry in the pharmacetics pathway. The presentations are made by graduate students and examination is by a series of cumulative examinations. PHARM CHEM

221. Research Conf in Pharm Chem. (1) § F, W. Prerequisite: Graduate standing in the Department of Pharmaceutical Chemistry. Lecture 1 hour. **M. Wolff**

A series of weekly research conferences in medicinal chemistry given by visiting lecturers, faculty, and advanced graduate students. PHARM CHEM

222. Physical Chemistry-Seminar. (1) § F, W. Prerequisite: Consent of instructor. Lecture 1 hour. **Kuntz and Staff**

Topics of current research interest in physical and biophysical chemistry. PHARM CHEM

230A. Spectroscopy. (3) § Sp. Prerequisite: Chemistry 162 or equivalent. Lecture 3 hours. **Staff**

The theory and application of molecular electronic and vibrational spectroscopy; optical rotatory dispersion and circular dichroism. PHARM CHEM

230B. Spectroscopy. (3) § W or Sp. Prerequisite: Chemistry 162 recommended. Lecture 3 hours. **T. James**

Theory and application of nuclear magnetic resonance and electron-spin resonance; mass spectrometry. PHARM CHEM

230C. Spectroscopy. (1-4) § W. Prerequisite: Pharmaceutical Chemistry 230B. Lecture 1-4 hours. **Goux**

Selected topics in spectroscopy and related areas. Content of the course changes, as in the case of seminars. Course may be repeated for credit. PHARM CHEM

235. Mass Spectrometry in Life Sci. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. **Burlingame, Straub**

Elucidation of molecular structure, characterizations of mixtures, and quantitative measurements. Presentation of basic tools, concepts, and strategies in the complementary usage of currently available techniques in present biochemical and biomedical research. PHARM CHEM

240. Radiochemical Synthesis. (1-2) § F, W. Sp. Prerequisite: Consent of instructor. Lab 3-6 hours. **Peng**

Theory and techniques related to the synthesis of isotopically labeled organic compounds. Course may be repeated for credit. PHARM CHEM

241. Radiobiochemical Analysis. (1) § W. Prerequisite: Consent of instructor. Lab 3 hours. **Peng**

Experimental techniques related to various aspects of radioassay of biological specimens, biochemical compounds, and drugs isotopically labeled with tritium and/or radiocarbon. PHARM CHEM

242. Radiotracer Methodology. (1) § W. Prerequisite: Pharmaceutical Chemistry 152
or 160, or consent of instructor. Lecture 1 hour.

Peng, Benet, Licko
Discussions on the theory and principles in the use of radionuclides as tracers in biological systems. Emphasis is on the design of experiments and data evaluation. PHARM CHEM

248. Effects of Ionizing Radiation. (1) §
Sp. Prerequisite: Pharmaceutical Chemistry 152 or 160, or consent of instructor. Lecture 1 hour.

Peng, J. W. Harris, Painter
Effects of ionizing radiation on chemical and biological systems will be discussed. PHARM CHEM

PHARM CHEM

Prerequisite: Experience in programming and consent of instructor. Lecture 2 hours. Lab 3 hours.

Langridge, Ferrin
Application of interactive three-dimensional computer graphics to modeling complex biological systems, particularly large molecules and their interactions. Elements of hardware and a detailed discussion of software. Demonstration and self-scheduled projects using the computer graphics laboratory. PHARM CHEM

266. Research Planning Conference.
(1) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Staff
Discussion and practice in research problem formulation and design selection. Core classes and small group sessions are organized around students' interests by faculty within the area of specialization. PHARM CHEM

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the thesis for the master's degree. PHARM CHEM

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. PHARM CHEM

Pharmacognosy

Brochmann-Hansen
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACY

Brochmann-Hansen
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARMACY

Pharmacology

100A-B. Medical Pharmacology. (3, 5) W.
Sp. Prerequisite: Biochemistry 100A-B and Physiology 120 and 125 or equivalents. Lecture 3 hours W; 5 hours Sp.

Katzung (W), Trevor (Sp)
A systematic presentation of pharmacologic agents based on drug group classification. Major emphasis is on clinically significant aspects of therapeutic effects, toxic effects, and evaluation of drugs. PHARMACOL

121. Pharmacology. (1) W. Prerequisite: Concurrent enrollment in Pharmaceutical Chemistry 121. Lecture 1 hour. Burkhalter
Systematic survey of action and uses of drugs with emphasis on steroids, hormones, and drugs for metabolic disorders. PHARMACOL

125. Pharmacology. (4) Sp. Prerequisite: Biochemistry 120A-B and Physiology 120 and 125. Lecture 3 hours. Lab 3 hours.

Hondeghem, Burkhalter
Systematic survey of action and uses of drugs acting on the autonomic nervous and cardiovascular systems and the kidneys. PHARMACOL

126B-C. Dental Pharmacology. (2, 4) §
W, Sp. Prerequisite: Physiology 110. Lecture 2 hours W; 3 hours Sp. Lab 3 hours Sp.

F. Meyers
Objective of the course is to acquaint dental and dental hygiene students with the fundamentals of pharmacology. Various classes of drugs are examined in regard to actions, absorption, fate, excretion, and toxicity. Agents useful in dentistry are emphasized. PHARMACOL

130. Clinical Toxicology. (2) W. Prerequisite: Pharmacology 125 and 136. Lecture 2 hours.

Tong, Burkhalter, Benowitz, Correia
The occurrence, mode of action, recognition, and treatment of poisoning by environmental chemicals and therapeutic agents. PHARMACOL

134. Pharmacology. (1) W. Prerequisite: Concurrent enrollment in Pharmaceutical Chemistry 134. Lecture 1 hour.

Trevor, Taber, Barriere
Systematic survey of action and uses of anti-infective and anti-neoplastic drugs. PHARMACOL

136. Pharmacology. (4) F. Prerequisite: Pharmacology 125. Lecture 3 hours. Lab 3 hours.

Burkhalter, E. Way
Systematic survey of action and uses of drugs acting on the central nervous system. PHARMACOL

150.01. Pharmacology Research. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture and lab to be arranged. Staff
Students perform individual research in a field of their choice under the guidance and supervision of a member of the faculty. PHARMACOL

170. Group Studies. (1-4) F, W, Sp. Prerequisite: Consent of instructor. Staff
Group studies of selected topics in pharmacology. PHARMACOL

193. Special Seminar. (1-3) F, W, Sp. Prerequisite: Consent of instructor. Seminar 1-3 hours. Burkharter
A seminar course covering various aspects of pharmacology and toxicology. PHARMACOL

198. Supervised Study. (1-5) F, W, Sp. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACOL

199. Laboratory Project. (1-5) F, W, Sp. Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARMACOL

206A-B-C. General Pharmacology. (3-3-3) F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Trevor, Bourne, Katzung, Loh
Lecture-conference dealing with fundamental aspects of interactions between chemical compounds and the components of biological systems. Mechanisms of drug action at molecular, biochemical, membrane, tissue, and organ levels of the cardiovascular, muscular, and central nervous systems are considered. PHARMACOL

208. Oxidative Drug Metabolism. (2) F. Prerequisite: Consent of instructor. Lecture 2 hours. Correia, Ortiz de Montellano
The biochemical, regulatory, and chemical aspects of mixed function oxidases with particular emphasis on cytochrome P-450. PHARMACOL

209. Molecular Mechanisms. (3) F, W or Sp. Prerequisite: Consent of instructor. Kun
Advanced biochemical experiment and theories concerning the mechanism of action of biologically active substances on a macromolecular level. The content of the course, beyond certain theoretical material, varies with each participant and consists of guided experiments in novel subjects. PHARMACOL

210A-B-C. Introductory Toxicology. (1-2, 1-2, 1-2) F or W or Sp. Prerequisite: Consent of instructor. Lecture 1-2 hours. Sequence of course may be given in any quarter. Course must be taken in sequential order. Meyers, Hodge, Correia, Hine
Introductory toxicology divided into the following three components: toxicity testing procedures; environmental toxicology, selected topics; and clinical toxicology, current developments. PHARMACOL

211A-B-C. Advanced Toxicology. (1-2, 1-2, 1-2) F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-2 hours. Correia, Hodge, Meyers, Hine
A detailed examination of the field of toxicology as it relates to agricultural, environmental, forensic, industrial, military, regulatory and therapeutic problems. Emphasis is placed on mechanism of action of toxic substances. Current advances and classical concepts of toxicology are presented. PHARMACOL

220. Seminar. (0-1) F, W, Sp. Staff
Seminars to discuss present methods and problems in current teaching and research in pharmacology and toxicology. PHARMACOL

PHARMACOL

292. Physiological Techniques. (3) F, W or Sp. Prerequisite: Survey course in pharmacology or consent of instructor. Lab 9 hours. Hondeghem
Principles and applications of physiological techniques used in the study of drugs. Emphasis is on the study of cardiovascular and autonomic agents. PHARMACOL

296. Lab Techniques in Toxicology. (2) F, W or Sp. Lab 6 hours. Meyers, Hodge, Hine
Principles and application of experimental techniques in the evaluation of the toxicologic hazards of drugs and environmental chemicals: techniques for testing acute and chronic toxicity, skin irritation and sensitization, mutagenesis and carcinogenesis will be covered. PHARMACOL

298. Thesis. (0) F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the thesis for the master's degree. PHARMACOL

299. Dissertation. (0) F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. PHARMACOL

300A-B-C. Teaching Practicum. (1-3, 1-3, 1-3) F, W, Sp. Prerequisite: Advancement to candidacy for the Ph.D. degree. Staff
Opportunity is provided to participate in a formalized way in the teaching of pharmacology under the direction of the faculty. PHARMACOL

Pharmacy

111. Non-Prescription Products. (1) F. Conference 2 hours. Yee
112. Non-Prescription Products. (1) W. Prerequisite: Pharmacy 111. Conference 2 hours.

Yee

Continuation of Pharmacy 111. PHARMACY

Lem and Staff

Continuation of Pharmacy 112. PHARMACY

114. Biopharmaceutics & Phys Pharmacy. (3) F. Prerequisite: Concurrent enrollment in Chemistry 115. Lecture 3 hours.

Guy

A study of the physical, chemical, and biological factors which interact and dominate the design of dosage forms as drug delivery systems, including an introduction to the analysis of clinical data. PHARMACY

115. Biopharmaceutics & Phys Pharmacy. (4) W. Prerequisite: Pharmacy 114 and concurrent enrollment in Chemistry 116. Lecture 3 hours. Lab 3 hours.

C. Hunt, Shell, R. Day

Continuation of Pharmacy 114 with the addition of laboratory preparation of basic drug delivery systems. PHARMACY

Szoka, Hoener, J. Hunt, R. Gibson, Benet

Continuation of Pharmacy 115. PHARMACY

127. Biopharmaceutics & Dispensing. (4) F. Prerequisite: Pharmacy 116 and Pharmacy Administration 112. Lecture 2 hours. Lab 6 hours.

R. Day, C. Jackson, Hoener

Continuation of Pharmacy 116 with the addition of training in the professional and dispensing aspects of pharmacy. PHARMACY

128. Pharmacokinetics. (3) W. Prerequisite: Pharmacy 116. Lecture 3 hours. Conference 1-2 hours.

Ole, Tozer

Course covers the pharmacokinetic basis of variability in the therapeutic, pharmacologic, and toxicologic effects of drugs. PHARMACY

129. Pharmacokinetics. (3) Sp. Prerequisite: Pharmacy 128. Lecture 3 hours. Conference 1-2 hours.

Giacomin, Ole

Continuation of Pharmacy 128. PHARMACY

151. Community Health Education. (2) Sp. Lecture and Discussion 2 hours. Participation in at least four community health education programs.

R. Gibson

Course is designed to train students for participation in community health programs dealing with drug abuse education and other drug-related health issues such as poison prevention, venereal disease, and birth control. Course may be repeated for credit. PHARMACY

152. Special Topics in Pharmaceutics. (2) Sp. Prerequisite: Pharmacy 116 or concurrent enrollment. Lecture 2 hours.

Szoka

An intermediate course offering an opportunity to explore, in greater depth, special drug delivery systems and some fundamental relationships involved in their design or action. PHARMACY

Hoener, Tozer

Preparation, presentation, and evaluation of research seminars. PHARMACY

155. External Drug Products. (3-4) W. Sp. Prerequisite: Pharmacy 127. Lecture 2-3 hours. Lab 3-6 hours.

Blake, C. Jackson

Discussion and laboratory exercises on the formulation of products for external use including drugs and cosmetics. The course deals with the properties and ingredients of such products. PHARMACY

156. Parenteral Products. (3) F, W, Sp. Prerequisite: Pharmacy 127. Lecture 2 hours. Lab 3 hours.

C. Jackson, Blake

Introduction to the formulation and technology of parenteral preparations. Laboratory includes participation in hospital activities in which parenterals are made and administered. PHARMACY

164. Veterinary Products. (3) Sp. Prerequisite: Microbiology 120, 127, Pathology 135, Pharmacology 136 and Pharmacy 116. Lecture 3 hours.

Course is designed to familiarize the student with common ailments of domestic animals and livestock, products used for the prevention and treatment of such diseases, the interrelationship of pharmacist, veterinarian, and animal owner, and legal limitations on veterinary dispensing. PHARMACY

165. Pharmaceutical Technology. (3) F. Prerequisite: Pharmacy 116. Lecture 1 hour. Lab 6 hours.

R. Gibson, Cooper, Blake

An introduction to the technology of liquid and semisolid pharmaceuticals. Special emphasis is given to the problems encountered and the materials used in pharmaceutical manufacturing. PHARMACY

166. Pharmaceutical Techniques. (3) W. Prerequisite: Pharmacy 165. Lecture 1 hour. Lab 6 hours.

R. Gibson, Cooper, Blake

An introduction to the technology of solid dosage forms, especially tablets and capsules. Emphasis is placed on problems encountered in preparation of this type of medication. PHARMACY

167. Pharmaceutical Technology. (3) Sp. Prerequisite: Pharmacy 166. Lecture 1 hour. Lab 6 hours.

R. Gibson, Cooper, Blake

An advanced study of the relationship of the art and science of pharmaceutical technology to solid dosage forms. PHARMACY
168. Clinical Pharmacokinetics Sem. (2) F, W, Sp. Prerequisite: Fourth-year standing or consent of instructor. Reports and Conferences 6 hours. Enrollment limited. Tozer
Discussion and review of the literature on the clinical application of pharmacokinetic principles in drug therapy. PHARMACY

170. Group Studies. (1-4) F, W, Sp. Prerequisite: Consent of instructor. Staff
Group studies of selected topics in pharmacy. PHARMACY

198. Supervised Study. (1-5) F, W, Sp. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACY

199. Laboratory Project. (1-5) F, W, Sp. Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARMACY

Pharmacy Administration

111. Pharmacy Laws. (2) F. Lecture 2 hours. J. R. Nielsen
Introduction to court systems and administration boards and their relationship to the health professions. Discussion of basic principles of criminal law, negligence, and business law with particular emphasis on the legal relationship and responsibility of the practitioner to the patient. PHARMACY

112. Pharmacy Laws. (2) W. Lecture 2 hours. J. R. Nielsen
A detailed examination of federal and state drug, cosmetic, and narcotic laws; their promulgation, enforcement, and effect upon the practice of pharmacy. Course involves some administrative work. PHARMACY

150. Marketing. (4) W. Lecture 4 hours. Staff
An analysis of the marketing functions that facilitate the flow of pharmaceutical products from production to consumption, and of the decision-making processes of marketing institutions. Emphasis is given to the environmental factors affecting marketing decisions. PHARMACY

154. Community Pharmacy Management. (4) Sp. Prerequisite: Basic economics or consent of instructor. Lecture 4 hours. Staff
Principles of management, specially directed toward developing familiarity with current problems peculiar to community pharmacy operation. Emphasis is given to elements in locating, organizing, operating, and adapting a pharmacy. PHARMACY

155. Accounting. (3) F. Lecture 1 hour. Discussion 2 hours. Staff
Consideration of the fundamental concepts of accounting and its applied uses, with special emphasis on the accounting requirements of the community pharmacy. Problem cases and demonstrations are presented. PHARMACY

A survey of laws relating to landlord-tenant dissolution, property division, support payments, probate and decedent's estates, with particular emphasis on how pharmacists may expect their practice to be affected by these laws, and some practical preventive legal techniques. PHARMACY

170. Group Studies. (1-4) F, W, Sp. Prerequisite: Consent of instructor. Staff
Group studies of selected topics in pharmacy administration. PHARMACY

180A-B-C. Legal Problems in Health Care. (2-2-2) F, W, Sp. Prerequisite: Third-year standing. Pharmacy Administration 180A is prerequisite to 180B, and 180B to 180C. Staff
but completion of entire sequence is not required.
J. R. Nielsen
Conducted in cooperation with law students who are teamed with students from professional schools on this campus to investigate assigned problems of their respective disciplines, with particular emphasis upon the legal implications arising therefrom. PHARMACY

198. Supervised Study. (1-5) F, W, Sp. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACY

Physical Therapy

100. Gross Anatomy. (6) Su. Prerequisite: Completion of course prerequisites for admission to the University and the Curriculum in Physical Therapy. Open only to students enrolled in the Curriculum or consent of program director. Lecture 3 hours. Lab 9 hours. DeWeese
A fundamental building block of physical therapy; this course presents the gross structure of the human body studied through regional and systemic correlation by means of dissection, demonstration, surface and cross-sectional anatomy. PHYS THER

101. Pathology. (3) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum or consent of program director. Lecture 3 hours. Blava
Mechanisms and language of diseases are discussed with emphasis on the dynamic nature of fundamental disease processes such as cell injury, immunopathology, inflammation, response to infectious agents, repair and regeneration, hemodynamic arrangements, genetic disorders, disturbances of cell growth and neoplasia. PHYS THER
102. **Physiology.** (3) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum or consent of program director. Lecture 3 hours.

DeWeese

Presentation of in-depth physiological function of cardiovascular, renal and respiratory systems which have become special emphases in acute and chronic rehabilitation. Introduction to the endocrine and digestive systems with particular focus on interaction with the neuromusculoskeletal systems. PHYS THER

103. **Neuroanatomy.** (2) Su. Prerequisite: Completion of course prerequisites for admission to the University and the Curriculum in Physical Therapy. Open only to students enrolled in the Curriculum or consent of program director. Lecture 1 hour. Lab 3 hours.

Garoutte

The structural organization and function of the central nervous system are presented through lecture and laboratory study of models, wet and dry demonstration. Special emphasis accorded to clinical functional correlations. PHYS THER

104A. **Physical Therapy Procedures.** (3) Su. Prerequisite: Completion of course prerequisites for admission to the University and the Curriculum in Physical Therapy. Open only to students enrolled in the Curriculum or consent of program director. Lecture 2 hours. Lab 3 hours. M. Snyder, Asturias

This course begins a four-quarter series presenting theory, skills and application of physical therapy procedures in patient care. Course addresses surface anatomy, kinesiology, tests and measurements for evaluation of normal integrity of neuromusculoskeletal function. PHYS THER

104B. **Physical Therapy Procedures.** (5) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum or consent of program director. Lecture 2 hours. Lab 8 hours. M. Snyder, Asturias

Continuation of Physical Therapy 104A. Theory, physics and indications and contraindications of physical therapy procedures. Electro-, hydro-, cryo- and thermotherapies, massage and exercise. Problem solving approach to treatment planning and evaluation of neuromusculoskeletal pathologies. PHYS THER

104C. **Physical Therapy Procedures.** (5) W. Prerequisite: Completion of course work in summer term and fall quarter. Open only to students enrolled in the Curriculum or consent of program director. Lecture 2 hours. Lab 8 hours. M. Snyder, Asturias

Continuation of Physical Therapy 104B. Advanced neuromuscular, physiological, biomechanical principles related to musculoskeletal dysfunction. Theory, physiological and functional ramifications of pathology, patient evaluation and treatment of dysfunction of the cardiopulmonary, vascular and integumentary systems. PHYS THER

104D. **Physical Therapy Procedures.** (3) Sp. Prerequisite: Completion of course work in summer term, fall and winter quarters. Open only to students enrolled in the Curriculum or consent of program director. Lecture 1 hour. Lab 8 hours. M. Snyder, Asturias

Continuation of Physical Therapy 104C. Basic neurophysiological and neuroanatomical principles of normal and pathological motor function. Various neurophysiological therapeutic concepts of evaluation and treatment planning, and implementation of treatment for the patient with neurological dysfunction. Projects and field work are included. PHYS THER

105. **Physical Med & Rehabilitation.** (3) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum or consent of program director. Lecture 3 hours. Sine

Course presents the philosophy of rehabilitation and medical management of chronic diseases and the multiple handicapped person. Particular emphasis is on brain damage, spinal cord injuries and cerebrovascular accidents. PHYS THER

106A. **Specialty Med Mgmt of Disease.** (3) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum or consent of program director. Lecture 3 hours.

F. Schiller, S. Kaufman

Medical management of problems concerning specialties of pediatrics and neurology. In-depth presentation of the more common medical concerns which guide the specialists' decisions and establish the sound basis for teamwork treatment between these specialties and physical therapy. Patient presentation. PHYS THER

106B. **Specialty Med Mgmt of Disease.** (7) W. Prerequisite: Completion of course work in summer term and fall quarter. Open only to students enrolled in the Curriculum or consent of program director. Lecture 7 hours. Hoaglund, Roost, D. Adams

Medical management of problems concerning the specialties of internal medicine, orthopaedics and psychiatry. In-depth presentation of the more common medical and surgical concerns which guide the specialists' decisions and establish the sound basis for teamwork treatment between these specialties and physical therapy. PHYS THER

107. **Neuromuscular Physiology.** (2) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum or consent of program director. Lecture 2 hours.

Garoutte

A study of the physiology of striated muscle and peripheral nerve in relationship to controlling mechanisms within the central nervous system. PHYS THER
108. Basic Medical Procedures. (2) Sp. Prerequisite: Completion of course work in summer term, fall and winter quarters. Lecture 1 hour. Lab 2 hours.

I. Gilbert

Presentation of basic procedures for total and emergency care of the patient. Emphasis on interpretations of vital signs, temporary emergency intervention, sterile techniques and therapist-patient interaction concerned with confidential matters. PHYS THER

109A. Prof Practice & Administration. (4) W. Prerequisite: Completion of course work in summer term and fall quarter. Open only to students enrolled in the Curriculum or consent of program director. Lecture 4 hours.

I. Gilbert

Study of attitudes and obligations of the profession of physical therapy presented through lecture and seminars. Emphasis on ethics, medicolegal aspects of treatment and records, methods of communication and research. Students will participate in seminar presentation and begin a library research project. PHYS THER

109B. Prof Practice & Administration. (4) Sp. Prerequisite: Completion of course work in summer term and fall quarter. Open only to students enrolled in the Curriculum or consent of program director. Lecture 4 hours.

I. Gilbert

Study of attitudes and obligations of the profession of physical therapy presented through lecture and seminars. Emphasis on growth of the profession and organization and administration of a clinical physical therapy department. Students will complete library research project begun in Physical Therapy 109A. PHYS THER

170.02. Congenital Defects. (2) W. Prerequisite: Gross anatomy course and consent of instructor. Monie

This elective course is designed to provide physical therapists with information on the more common human congenital defects. Environmental and genetic factors that produce malformations are considered and possible mechanisms discussed. ANATOMY

140A. Clinical Clerkship. (7) Sp. Prerequisite: Completion of course work in summer term, fall and winter quarters.

I. Gilbert

Students begin clinical clerkship in clinical facilities. Under close supervision, appropriate and indicated procedures of total patient treatment are performed. Gradually, full responsibility for a full patient load for particular facility is assumed. Students present in-services and write case reports. PHYS THER

140B. Clinical Clerkship. (15) Su. Prerequisite: Completion of course work in preceding summer term, fall, winter and spring quarters. Open only to students enrolled in the Curriculum or consent of program director. I. Gilbert

Course is required for and permitted to graduate students only. Students provide patient care under decreasing supervision in associated clinics. Students also submit case reports, present in-services and attend scheduled campus seminars. PHYS THER

Physiology

100. Organ System Physiology. (6) W. Prerequisite: Anatomy 100 and 102, and concurrent enrollment in Biochemistry 100A-B, or consent of instructor. Lecture 4 hours. Lab 4 hours. Conference 2 hours.

Ramsay, Goerke, Kellogg

Normal function of the cardiovascular, respiratory, renal, and gastrointestinal systems and the metabolic functions of the body as a whole are studied in lectures, conferences, laboratory exercises, demonstrations, and clinical illustrations. PHYSIOLOGY

101. Endocrinology. (4) Sp. Prerequisite: Anatomy 100 and Biochemistry 100A-B, or consent of instructor. Lecture 3 hours. Lab 3 hours.

Reid

The structure and function of the endocrine glands and selected aspects of endocrine pharmacology and pathology are studied in lectures, demonstrations, and clinical conferences. PHYSIOLOGY

110. Integrative & Nutritive Systems. (6) § W. Prerequisite: College level biology, physics, and chemistry, or consent of instructor. Lecture 5 hours. Conference 3 hours.

S. Rothman

Introduction to organ systems with emphasis on nervous, endocrine, circulatory, respiratory, and alimentary function in vertebrates. Importance of organ systems for the success of multicellular forms serves as focus. Fundamental cell processes are also discussed, emphasizing differential function. PHYSIOLOGY

120. Mammalian Physiology. (2½) W. Prerequisite: Physiology 125 required for students in School of Pharmacy; may be taken separately by graduate students with consent of instructor only. Lecture 2 hours.

J. A. Williams, Goldfine, Monroe

Study of the integrative systems of the mammalian organism, particularly the gastrointestinal and endocrine systems. PHYSIOLOGY

125. Mammalian Physiology. (6) F. Prerequisite: Consent of instructor. Lecture 4 hours. Lab 4 hours. Conference 2 hours.

Mines, Goerke, Kellogg

Physiology of the human cardiovascular, respiratory and renal systems is stressed, with special attention to developing problem solving skills using the material. PHYSIOLOGY

126. Neuroscience for Pharmacy. (4) W. Prerequisite: Physiology 125 or consent of instructor. Lecture 3 hours. Lab 1½ hours. Conference 1 hour.

Korenbrodt, A. Kelly, Copenhagen, R. Snyder and Staff

Course is designed primarily for students in the School of Pharmacy. The course will
150.1 Research in Physiology. (1½ per week) Su. F. W. Sp. Prerequisite: Consent of instructor. Lecture and Lab to be arranged.

Staff

Individual research in endocrinology, respiratory physiology, neurophysiology, cardiovascular physiology, cell physiology, or other areas offered by individual staff members. PHYSIOLOGY

198. Supervised Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor.

Ganong and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHYSIOLOGY

199. Laboratory Project. (1-5) § F, W, Sp. Prerequisite: Consent of instructor.

Ganong and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHYSIOLOGY

200. Directed Reading Seminar. (0) § F, W, Sp. Prerequisite: Consent of instructor.

Ganong and Staff

Directed reading organized in seminar or tutorial fashion to review aspects of physiology under supervision of a member of the faculty. PHYSIOLOGY

201. Physiology of Vision. (2) § Sp. Prerequisite: Anatomy 103 or Physiology 110 or equivalent, or consent of instructor. Lecture 2 hours. Course will not be offered for fewer than four students.

K. Brown

Study of mechanisms underlying vision. Consideration is given to chemistry and anatomy of the visual system, but the emphasis is on neurophysiology, with coverage of the visual system from the photoreceptors to the visual cortex. PHYSIOLOGY

204. Topics in Physiology. (1) § W. Prerequisite: A minimum of six units of introductory physiology. Seminar 1 hour.

Rothman

This seminar discusses selected topics in cellular and integrative physiology. Readings are drawn from primary and secondary sources. PHYSIOLOGY

206. Adv Kidney & Electrolyte Physiol. (2-3) § Sp. Prerequisite: Physiology 100 or 125 and consent of instructor. Lecture 2-3 hours. Offered in alternate years. Not offered 1982-83.

C. Berry

Current theories regarding renal hemodynamics and regulation of whole body acid-base, electrolyte and fluid balance will be discussed. Emphasis will be placed on the transport mechanisms operating across renal tubular membranes. PHYSIOLOGY

209. Sensory Systems. (2) § F. Prerequisite: Anatomy 103 or equivalent. Lecture 2 hours.

Merzenich

Ganong

Lectures and demonstrations provide basic information on the physiology of the auditory system, vestibular system, chemical senses, and somatosensory system. Material includes historical and current concepts derived from relevant psychophysics, neuroanatomy, and neurophysiology. PHYSIOLOGY

210. Hormone Secretion Mechanisms. (2) § Sp. Prerequisite: Physiology 101 or consent of instructor. Lecture 2 hours. Offered in alternate years. Offered 1982-83.

J. A. Williams

Ganong and Staff

Discussion of current literature pertaining to the mechanism of hormone synthesis, packaging, and release. PHYSIOLOGY

211. Membrane Physiology. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

J. A. Williams and Staff

Introduction to mechanisms by which ions and small molecules cross biological membranes in response to both physical forces and cellular metabolism. PHYSIOLOGY

221. Cardiovasc-Renal-Pulmonary Sys. (2) § F, W, Sp. Prerequisite: Physiology 100 or equivalent. Lecture 2 hours.

Staff

Course includes critical reviews of topics of current importance, presentation of unsolved problems of staff, and critical evaluation of published articles by the group. The total program is presented over six successive quarters. PHYSIOLOGY

222. Endocrinology Seminar. (1) § F, W, Sp. Seminar 1 hour. Course may be repeated for credit.

Ganong

Guest lectures alternating with reports of research in progress by members of the graduate group in endocrinology. A different topic of endocrinological interest is the subject of guest presentations each quarter. PHYSIOLOGY

223. Physiology Research Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Course may be repeated for credit.

Ganong

Seminar presentations by guest lecturers, alternating with discussion by Physiology staff members of their current research. Each quarter, a different topic of physiological interest is the subject of guest presentations. PHYSIOLOGY

Ganong and Staff

PHYSIOLOGY

298. Thesis. (0) § Su, F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

Ganong and Staff

For graduate students engaged in writing the thesis for the master's degree. PHYSIOLOGY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

Ganong and Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. PHYSIOLOGY
300. Teaching Practicum. (0) § F, W, Sp.
Prerequisite: Previous training in physiology and consent of instructor. Lecture and lab variable.
Ganong and Staff
Practice in teaching physiology under faculty supervision. Students supervise laboratory work, conduct conferences, deliver lectures, and assist in preparing and grading examinations. Responsibilities are assigned according to the individual's stage of development. PHYSIOLOGY

301. Scientific Writing. (0) § Su, W.
Prerequisite: Consent of instructor. Seminar 4 hours.

A seminar designed to teach postdoctoral fellows and graduate students how to best put into words, tables and figures work done in the laboratory, and how to do so clearly, simply, precisely, convincingly, and briefly, so that others may understand. PHYSIOLOGY

302. Teaching Techniques. (0) § F, W.
Prerequisite: Consent of instructor. Lecture 1½ hours, Enrollment limited. Staub, Comroe
A course in teaching techniques. Students present short lectures, and video-tapes of these presentations are analyzed by self and group-criticism. PHYSIOLOGY

Preventive Dentistry and Community Health

Prerequisite: Consent of instructor.
Wycuff, Silverstein
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. GEN DENT

Psychiatry

First-year Coordinated Instruction—
Medicine 131B, The Communication Skills and Patient Interviewing course provides the first opportunity for students to interview medical patients in small group settings, guided by an experienced clinician. Issues addressed include: How a professional interchange differs from a social one, and how one's identity as a physician emerges.

100A. Psychological Basis of Medicine. (2) Lecture 1 hour. Horowitz
Introduction to the basic psychological principles underlying response to the stress of illness and its treatment with emphasis on mental mechanisms, development, death and dying, and various types of doctor-patient relationships. PSYCHIATRY

100B. Illness Behavior. (1) W. Seminar 2 hours. Brodsky, F. Cohen
Introduction to psychological principles influencing health behaviors and the physician-patient relationship. Presentation of the social and cultural factors that affect patients' health and illness behavior when well, when they fear illness, when ill, during rehabilitation and after recovery. PSYCHIATRY

110. Psychiatry Core Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C, Psychiatry 100A, 100B and 131A-B.
Open to UCSF students only.

Four-week assignment to a psychiatric service. Students, under supervision, are responsible for patient evaluation and participation in treatment planning. They attend seminars related to clinical work, and make field visits to other types of psychiatric facilities. PSYCHIATRY

131A-B. Intro to Clinical Psychiatry. (2-2) W, Sp. Lecture 1 hour. Seminar 2 1/2 hours. Purcell

Introduction to clinical psychiatry with particular emphasis upon knowledge important in general medical practice. Course format includes lectures, small group teaching, interviewing patients, syllabus reading, and the use of clinical videotapes and film. PSYCHIATRY

135. Psychiatric Aspects of Med Prac. (0)
Su, F, W, Sp. Prerequisite: Satisfactory completion of the first and second years in the School of Medicine as specified in the prerequisite for the 110 clerkships listed below. Clinical seminar 2 hours. D. Rosen and Staff

The Psychiatric Aspects of Medical Practice is a weekly two-hour clinical seminar, and a required part of the following clerkships: Family and Community Medicine 110, Medicine 110, Neurology 110, Obstetrics, Gynecology and Reproductive Sciences 110, Pediatrics 110 and Surgery 110. PSYCHIATRY

140.01. Advanced Psychiatry Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry.
Boatman and Staff
Participation, with supervision of attending and resident staff of the Department of Psychiatry, in psychiatric assessment, treatment and/or consultation with adult or child inpatients or outpatients. Seminars, assigned reading and case presentations may be required. PSYCHIATRY

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry. Boatman
Clinical clerkship in off-campus hospitals, approved by the chairperson of the department and the Dean. PSYCHIATRY

140.04. Advanced Psychiatry Clerkship—VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry. Solomon
Clinical clerkships based in a variety of community settings. Course includes work-
ing with patients and families and emphasizes preventive, rehabilitative and consultative services, especially to underserved rural and minority populations. Housing stipends are available.

**140.05. Clinical Psychiatry.** (1½ per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.

**Boatman and Staff**

Participation, under close supervision in accordance with students’ level of experience and special interests, in clinical psychiatric treatment of adult or child inpatients or outpatients. PSYCHIATRY

**150.01. Psychiatric Research.** (1½ per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.

**Callaway and Staff**

Participation according to students’ level of experience in experimental work in areas such as neurophysiology, operant conditioning, psychophysiology, immunocellularity, and nonlexical communication. All work is under the close supervision of members of the faculty. PSYCHIATRY

**150.02. Human Development.** (1½ per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.

**Fiske and Staff**

Guided reading and research in human development. Work may focus on culture and personality studies; social psychology of human development; socialization including the role of values; adaptive processes across the adult life cycle. Refer to Human Development and Aging courses. PSYCHIATRY

**150.03. Human Sexuality.** (1½ per week) Su, Sp. Prerequisite: Psychiatry 180 and consent of Department of Psychiatry. Gendel

Effect of sex roles, self-esteem, attitudes and values of clinician on treatment of sexual problems. Case studies, role play, group discussion, film, art and music are used to develop skills in introductory sex counseling.

Special readings assigned, project is optional.

**160.01. Speech & Lang Psychopathology.** (2) F, W, Sp. Prerequisite: Consent of Department of Psychiatry. Lecture 1 hour. Lab 3 hours.

A clinical course focusing on speech and language pathology. Students’ eligibility depends on previous experience with psychiatric patients and interest in specific problems of communication. Patients with characteristic syndromes will be interviewed and suitable treatment procedures performed under supervision. PSYCHIATRY

**Ostwald**

**160.07. Outpatient Psychotherapy.** (2-7) Su, F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry. Lecture 2 hours. Lab 0-15 hours. Amini

Practical experience in psychotherapeutic work with outpatients to increase students’ understanding of psychopathology, psychodynamics, and psychotherapeutics. Students are assigned patients under supervision of a member of the faculty. Assigned reading, seminars, and chart writing. PSYCHIATRY

**160.11. Psychotherapeutic Interview Tech.** (4-5) F, W, Sp. Prerequisite: Consent of Department of Psychiatry. Lecture 4-5 hours. Ostwald

Individual and group supervision of clinical work with patients. The focus is on developing rapport, obtaining relevant information, and establishing a satisfactory therapist-patient relationship. Supplementary reading may be assigned. PSYCHIATRY

**160.14. Health Aspects of Human Sex.** (2) F. Prerequisite: Consent of Department of Psychiatry and consent of instructor. Lecture 16 hours plus seminar 6 hours total given during the quarter. Gendel

A consideration of sexuality as an integral aspect of general health. Emphasis is on accuracy of information regarding the range of human sexual behavior and the typical sexual concerns of patients. PSYCHIATRY

**160.17. Sexuality & Disability.** (1) Sp. Prerequisite: Psychiatry 180 and consent of Department of Psychiatry. Lecture 12 hours. Course is given over a weekend.

**Gendel and Staff**

Course covers the role of sexuality in rehabilitation of the physically and mentally handicapped, and principles of sexual counseling of the handicapped. Lectures, films, seminars, and community resource people will be involved. PSYCHIATRY

**170.01. Intro to Study of Suicide.** (2) F. Prerequisite: Consent of Department of Psychiatry. Lecture 2 hours. Motto

Suicide is surveyed from a multidisciplinary approach in seminars led by persons working in the field. PSYCHIATRY

**170.03. Behavioral Specialist Pathway.** (2-6) F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry. Lecture 2-6 hours.

**H. Goldman** Students in the Behavioral Specialist Pathway elect individual or group study of a topic not included in other formal courses. Supervised reading, research, field-work, and clinical assignments are given in accordance with the students’ level of interest and experience. PSYCHIATRY

**170.06. Human Sexuality Research.** (2) Su, F, W, Sp. Prerequisite: Psychiatry 160.14 or 180, and consent of Department of Psychiatry. Lecture 1 hour. Lab 3 hours. Gendel

Collaboration or directed research in various topics related to human sexuality. PSYCHIATRY

**170.07. Social-Physical Deprivation.** (2) § W. Prerequisite: Consent of Department of Psychiatry. Lecture 2 hours.

**H. Schlesinger**

Compares and contrasts influences of cultural, physical, social, and sensory deprivation on cognitive and emotional develop-
ment. Emphasis on social stigma and family response to handicapped child; nature of problems and treatment of handicapped groups; development and utilization of community resources. PSYCHIATRY

170.16. Self-Destructive Behavior. (1-3) § F, W, Sp. Prerequisite: Psychiatry 170.01 and consent of Department of Psychiatry. Lecture 1-3 hours. Lab as required.

Gendel

Continuation of the study of mortality and morbidity resulting from self-destructive behavior. Subjects to be covered and the method of study are determined by the interests of the students. PSYCHIATRY

H. Goldman, Zegans and Staff

Course is a seminar for exploring and surveying current issues in psychiatry. Each week an assigned paper will be discussed by students, seminar leaders and an occasional guest discussant. Topics will include current research, new theories, social issues and clinical innovations. PSYCHIATRY

180. Human Sexuality & Medical Prac. (2) W. Seminar 2 hours.

Gendel

Social, behavioral, and clinical aspects of human sexuality are covered in a series of lectures and seminar periods. Lectures present didactic material and seminars focus on clinical and ethical problems related to sex and medical practice. PSYCHIATRY

182. Transcultural Psychiatry. (1) § F, Sp. Prerequisite: Psychiatry 100A and 100B or equivalent psychiatry experience, and consent of Department of Psychiatry. Consent of instructor for graduate students. Seminar 1½ hours.

Hartog

Seminars explore the field of transcultural psychiatry, ranging from entering the alien community, culture shock, and epidemiology, to folk healing and cross-cultural psychotherapy. Relevance to American urban and ethnic issues discussed. Examples, problems, methodology, and possibilities of research also presented. PSYCHIATRY

198. Supervised Study. (1-5) F, W, Sp. Prerequisite: Consent of Department of Psychiatry. Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PSYCHIATRY

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Consent of Department of Psychiatry.

L. J. Epstein and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PSYCHIATRY

200A-B-C-D-E-F-G-H-I. Mental Hlth-Outpatient. (3-8 per section) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1-3 hours. Lab 6-15 hours.

J. Nichols

Supervised experience in diagnosis and treatment planning for psychiatric outpatients in community settings. Students are responsible for evaluations, psychotherapy, treatment planning, psychiatric and community consultation, and medical management. Instruction in all areas via outpatient meetings, rounds, case conferences and seminars. PSYCHIATRY

201A-B-C-D-E-F-G-H-I. Mental Hlth-Children's Serv. (1-5 per section) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 0-2 hours. Lab 3-9 hours. McClure

Supervised experience in provision of psychiatric services for children. Course includes case conferences and seminar; diagnostic evaluations, treatment planning, ongoing therapy of children and their families, and consultation to community agencies, schools and pediatricians. PSYCHIATRY

202A-B-C. Mental Hlth-Inpatient. (5-5-5) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 11 hours.

Hewitt

Under supervision, students assume responsibility for psychiatric patients on community inpatient services. Course includes individual, group, family and milieu therapy, patient advocacy, community liaison and follow-up care, administrative and staff issues in patient management and related seminars. PSYCHIATRY

203A-B-C. Mental Hlth-Emer Serv. (3-3-3) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 4½ hours.

Zlatchin

Supervised experience in community mental health emergency services. Course includes crisis evaluation, disposition and treatment planning with community agencies, instruction in community mental health systems, health needs of minorities, crisis intervention, brief psychotherapy, use of psychotropic medications and related seminars. PSYCHIATRY

204A-B-C. Mental & Psychological Issues. (3-3-3) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 4½ hours.

D. Weiss

Exploration of psychiatric and psychological issues in medical care and biomedical issues in psychiatric care. Course includes varied, supervised experiences in the general hospital, preceptorships, consultation to medical units and community agencies, and lectures and seminars on related topics. PSYCHIATRY
205. Mental Hlth Law & Social Policy. (2) 
§ F: Prerequisite: Fifth-year standing in the 
Doctor of Mental Health Program. Lecture 2 
hours.
B. Diamond

Legal aspects of mental health care reflect-
ing social, political policies towards mentally ill. Discussion of controversial issues: confiden-
tiality, responsibility of psychotherapist for patients' acts, dangerousness, involuntary 
hospitalization, right to treatment, informed 
consent, mental health ghettoes, criminal 
responsibility, other selected topics. PSYCHI-
ATRY

211. Theory of Mental Hlth Practice.
(1.5) § F, W, Sp. Prerequisite: Consent of 
instructor. Lecture 1.5 hours.
L. J. Epstein, Weinshel

Directed reading and small group seminars 
regarding models of understanding and in-
tervention in emotional disturbance. PSY-
CHIATRY

(1.5) § F, W, Sp. Prerequisite: Consent of 
instructor. Lecture 1.5 hours. Ahern

Theoretical background for trainees in psy-
chosocial diagnosis; individual and group 
therapy, family therapy, brief therapy and 
crisis intervention, cross-cultural therapy; 
work with systems and other disciplines. 
Emphasis on clinical social work with geri-
tic patients, the physically ill, and others. 
PSYCHIATRY

249. Special Studies. (1.5) § F, W, Sp. 
Prerequisite: Graduate standing in the Doctor 
of Mental Health Program. Other students may 
enroll with consent of instructor only. Lec-
ture 0.2 hours. Lab 3.9 hours.
B. Diamond

Students, with faculty approval, select par-
ticular areas of the mental health field for 
advanced or intensive study. Areas chosen 
may be primarily clinical or nonclinical, but 
in most instances will combine clinical and 
nonclinical issues. PSYCHIATRY

400. Psychiatric Grand Rounds. (1½) F, 
W, Sp. Lecture 1½ hours.
R. S. Wallerstein

Members of the Department of Psychiatry 
makes medically centered presentations re-
flecting all areas of the department's work. 
Each topic involves a two-session sequence, 
with the second week consisting of formal 
discussion of the previously presented work 
from various viewpoints. PSYCHIATRY

403. Therapeutic Process. (1½) Su, F, W, 
Sp. Ostwald

Individual consultation with psychiatric 
residents and other advanced trainees con-
cerning treatment and management prob-
lems. Diagnostic questions, indications for 
sonic and psychological interventions, the 
course of therapy, and research issues are 
emphasized. PSYCHIATRY

404. Theories of Personality. (1) F, W, 
E. Burke

Focus is on personality theories other than 
Freudian, such as Adler, Jung, and Rogers. 
Course includes an examination, study, and 
discussion of contemporary personality 
thories, their concepts, systematic applica-
tion to the behavioral sciences, and research 
possibilities. Parallel reading is required. 
PSYCHIATRY

J. Fisher, E. Burke, Steinheber

Seminar presents techniques of assessing 
personality and intellectual functions in rela-
tion to psychodiagnostic evaluations and 
study of diagnosis with psychotherapy. Dis-
cussion of development, design, and theory 
of clinical psychological methods and clinical 
applications and demonstrations with appro-
ate case material. PSYCHIATRY

407. Behavioral Science Research. (1.0) 

Course consists of supervised clinical and 
basic research in behavioral abnormalities, 
psychopathology, and experimental psychi-
ATry. Specific subjects for research are chosen 
in conjunction with members of the staff. 
PSYCHIATRY

Prerequisite: Resident in Department of 
Psychiatry or consent of instructor. Seminar 
1½ hours.
Horowitz

Course provides a framework for residents 
which will enable them to take a systematic 
and rational approach in evaluation of various 
psychotherapies, including a method of as-
suming the conceptual consistency and valid-
ity of a given approach. PSYCHIATRY

Lecture 4 hours.
Malamud

Discussion of the neuropathology of 
neurological and psychiatric disorders with 
illustrations from gross and microscopic 
material. PSYCHIATRY

412. Jungian Psychoanalytic Theory. (1) 
Brookes, F. Irvine

Ongoing review of major principles of 
Jung's analytical psychology with special ref-
ence to their application to practice of 
psychotherapy. Designed to elaborate 
dynamics of psychotherapeutic process by 
utilizing psychotherapists from widely dif-
fering theoretical backgrounds in simulta-
nous dialogue around clinical material. 
PSYCHIATRY

413. Introduction to the Computer. (2-3) 
F, W, Sp. Lecture 1 hour. Lab 3-6 hours.
Starkweather

Seminars review of digital computing and 
its applications in psychiatry. Resid-
ents explore these concepts through their 
self programmed efforts. PSYCHIATRY

414. Diagnosis & Treatment Planning. 
(1½) F, W, Lecture 1½ hours.
R. S. Wallerstein

Individual cases are presented by students 
for assessment. Goals are discussed and the 
rationale for the particular psychotherapeu-
tic approach is considered. Course is required
for first-year residents in psychiatry and students in the Doctor of Mental Health Program. PSYCHIATRY

Supervised research with computer methods for the simulation of behavior in clinical interactions. Applications of computers to the analysis of human communication. PSYCHIATRY

419. Child Development & Personality. (1/2) Su. Prerequisite: Consent of Instructor. Friedlander, D. Morrison
Seminar is focused on the most common and prevalently used methods of assessing intelligence, perceptual-motor integration, and personality in children. Actual testing materials as well as supporting research are covered. Participation is required. PSYCHIATRY

421. Cult Source West Concepts of Man. (1) F, W, Sp. Prerequisite: Third-year resident standing, or one year of clinical experience, or consent of instructor. Seminar 1 hour. E. Burke
Examination of religious, philosophical, and scientific views of man. Course objective is to broaden students' familiarity with the background of contemporary conceptualizations of human personality. Course is required for third-year residents. PSYCHIATRY

423. Intro to Clinical Research. (1) W. Prerequisite: Psychiatry Resident II standing. Seminar 1 hour. Zegans, Temoshok
Course will introduce residents to clinical research as an essential body of knowledge and skills which can be integrated into present and future clinical work. Consideration of research within four broad paradigms: intrapsychic, sociocultural, behavioral psychological, and psychobiological. PSYCHIATRY

424. Res on Human Response to Stress. (4) Su, F, W, Sp. Prerequisite: Graduate or advanced resident standing. One year of advanced psychological or psychiatric work. M. Horowitz
Guided research using experimental, field, and clinical modes of investigation into the typical and idiosyncratic human responses to external stressors. The focus is on conscious and unconscious ideational, emotional and defensive processes. PSYCHIATRY

426. Evaluation Seminar. (1½) F, W, Sp. Prerequisite: Advanced trainee standing only; interns, residents, doctoral level. Seminar 1½ hours. R. Lieberman
Evaluation seminar to promote skill in developing dynamic treatment. Trainees will become knowledgeable about philosophy and function of basic principles; are required to demonstrate and justify feasibility and desirability of plan. PSYCHIATRY

427. Advanced Psychotherapy. (2-4) Su, F, W, Sp. Prerequisite: One year of full-time experience in the conduct of outpatient psychotherapy or equivalent. Lecture 2 hours. Lab 4-10 hours. M. Horowitz
Course covers psychotherapy of selected cases with recordings of the process, supervision during treatment, and group seminars in which the therapy is reviewed in retrospect using microanalytic and macroanalytic levels of abstraction. PSYCHIATRY

428A-B-C. Sex Counseling Practicum. (7-7-7) F, W, Sp. Prerequisite: Psychiatry 180 or Psychiatry 160.14 and 160.15, or consent of instructor. Lecture 2 hours. Clinic 15 hours. Course must be taken in order and consecutively. Gendel and Staff
A nine-month (two days per week) minimum rotation in the Sex Counseling Unit involving didactic presentations, case conferences, and supervised counseling experience with couples and individuals presenting sexual dysfunctions. PSYCHIATRY

Members of the faculty and visiting professionals present clinical discussions and new developments related to the field of child and adolescent psychiatry. PSYCHIATRY

435. Psychoanalysis & Social Science. (2) F. Prerequisite: Background in psychoanalytic and sociocultural paradigms, making use of classical theoretical statements, studies of social trauma and catastrophe, political biography, organizational and institutional behavior, and cultural productions. PSYCHIATRY

Course introduces residents to various aspects of social and community psychiatry. Topics include social psychiatry prior to 1950, development of community mental health programs in the U.S., related social sciences, and current developments in the field. PSYCHIATRY

437. Psychotherapy Research Design. (1½) F. Prerequisite: Second-year standing in graduate academic or in clinical professional training in the Department of Psychiatry, or consent of instructor. Seminar ½ hours. Hargreaves
Introductory seminar on issues of research design, subject selection, treatment specification, measurement, and statistical analysis in studying the effectiveness of psychotherapy and other mental health treatment. PSYCHIATRY

Course emphasizes the effects of mental illness on the lives of artists, scientists, statesmen, and other public figures. Biographical, autobiographical, and clinical studies of exceptional people will be compared. Students will be encouraged to select individual subjects for research. PSYCHIATRY

L. J. Epstein, Moto

Residents are responsible for the study and treatment of psychiatric patients and consultation of non-psychiatric patients under the supervision of senior staff members of the faculty. Parallel reading is required. PSYCHIATRY

J. Phillips

Residents in child psychiatry are responsible for the diagnosis and treatment of children with psychiatric problems and for therapeutic work with their parents under the supervision of the senior staff. PSYCHIATRY

D. Brown

Lectures in the theory and practice of mental health consultation, program evaluation and administration, and preventive services. Supervision of related field experiences by senior faculty in seminar setting. Interdisciplinary interaction emphasized. Review of relevant literature. PSYCHIATRY

457. Dreams from the Jungian Perspec. (1) Sp. Prerequisite: Consent of instructor. Seminar 1 hour.

B. Diamond, L. J. Epstein, Terr

Seminar presenting the theoretical aspects of dreams and clinical application within the Jungian framework. PSYCHIATRY

458. Forensic Psychiatry. (1½) W. Prerequisite: Consent of instructor. Seminar 1½ hours.

D. Richman

C. Diamond, L. J. Epstein, Terr

An elective seminar discussing the major aspects of forensic psychiatry relevant to the practice of the clinician. Topics covered include competency, commitment, and criminal responsibility. PSYCHIATRY

Goodheart

An elective continuous case conference focusing on transference and countertransference from a Jungian perspective. Major theoretical concepts will be discussed in context of the cases being presented. PSYCHIATRY

460. Borderline Character Treatment. (1½) F, W, Sp. Prerequisite: Open to third-year residents only with consent of instructor. Seminar 1½ hours. Course given at San Francisco Psychoanalytic Institute Library.

Oremland

Seminar reviewing the literature pertinent to psychotherapy of the severely disturbed, predominantly borderline patient. A case will be presented and discussed. PSYCHIATRY

H. Horowitz

Discussion of issues in clinical research, focusing on questions in clinical research design in the study of psychotherapy. Course will also cover psychotherapy with various character types. PSYCHIATRY

D. Farrell

Demonstration of group therapy to be viewed on videotape. Material viewed will serve as a focus for the discussion of theory and technique in group therapy. PSYCHIATRY

Binger, I. Phillips

Seminar covers the theory and implementation of the technique of psychotherapy with children. Emphasis is placed on play therapy. The seminar will also cover psychopathol-
ogy as manifested in children, including descriptions and possible ideologies. PSYCHIATRY

Zehlin, Hatcher, L. Sachs
Seminar covering family, group, and behavior therapy. Both theoretical and technical issues will be presented with case illustrations where appropriate. PSYCHIATRY

Seminar offers instruction in the theoretical bases of psychoanalysis. PSYCHIATRY

Seminar offers instruction in the technique of psychoanalytic psychotherapy and its theoretical basis. PSYCHIATRY

The theory of an individual outpatient psychotherapy is presented. The case in treatment is followed on a weekly basis. PSYCHIATRY

468. Human Development Seminar. (3) F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Three-quarter course. Fiske and Staff
Theory and research covering adolescence to old age from sociological, psychological, psychoanalytical, and anthropological perspectives. Topics include stress, personality and cognitive change, time perspective values, socialization processes and adaptation. Reading and paper required. PSYCHIATRY

Diagnosis and treatment of psychiatric problems associated with speech, hearing or language difficulty. Supervised clinical work with selected patients according to resident's level of experience. Instruction with such alternative audiovisual communication systems as manual signing and voice printing. PSYCHIATRY

470. Neurology. (1) W. Lecture 1 hour. Required for fourth-year residents in psychiatry. Palatucci
Review of clinical neurology with emphasis on neurological disorders that may have psychiatric implications. PSYCHIATRY

471. Growth & Development II. (1) F. Seminar 1 hour. Required for third-year residents in psychiatry. A. Simon, Kefler, L. J. Epstein
This seminar follows Growth and Development I. It will cover adulthood and aging. PSYCHIATRY

Problems in psychotherapy conducted within a psychodynamic framework. Topics include: treatment indications, goals, motivation and treatability, resistance and defense, transference and countertransference, dreams in psychotherapy, third-party involvements, emergency and hospitalization, adjuvant drug management, note taking and recording, transfer and termination. PSYCHIATRY

An approach to individual psychotherapy with more severely disturbed patients is presented. Case and treatment are followed on a weekly basis. PSYCHIATRY

Instructor's psychotherapeutic sessions with the patient are videotaped and played back and discussed with second- and third-year residents and other trainees. The material is objective and repeatable; the therapist is frank and self-critical; various theoretical views are compared. PSYCHIATRY

A study of the development and changes in psychological functions from birth to senescence. Biological aspects of growth relevant to psychological functioning are considered. Emphasis is on observational data. PSYCHIATRY

Examination of neurotic and character disorders from a psychodynamic perspective. PSYCHIATRY

Exploration of biochemistry, physiology, and neuroanatomy related to mental functioning and behavior, and application of concepts to the understanding of etiology and biological treatment of psychoses. Phenomenology and psychopathology of disorders are studied and rational for various psychological interventions. PSYCHIATRY

Examination of the development and application of crisis theory and therapy. Readings, discussion, and patient interviews are also included. PSYCHIATRY

480. Intro to Clinical Psychiatry. (3) Su. Seminar 3 hours. Required for second-year residents in psychiatry. Staff
Seminar provides an introduction to the psychiatric interview and diagnosis, with emphasis on psychiatric emergencies. PSYCHIATRY

482. Beh Mod in Child Psychopathol. (1) F. Prerequisite: Consent of instructor. Lecture 12 hours for four weeks.

D. Morrison, S. Friedlander

Basic introduction to use of both operant conditioning and behavior modification techniques with children. Theoretical and applied issues are discussed and reviewed in the context of research with a broad range of psychopathological conditions of childhood. PSYCHIATRY

483. Res Methodology in Child Psychr. (1) F. Prerequisite: Consent of instructor. Lecture 12 hours for four weeks.

D. Morrison, S. Friedlander

Review of basics of experimental design and methodology such as reliability and validity of measuring techniques, statistical inference, control group designs and pre- and post-test designs. Clinical research with children provides a focus for discussion of relevant issues. PSYCHIATRY

484. Psychologies of Other Cultures. (2) F. Prerequisite: Current appointment at LPPH as resident in psychiatry, fellow in psychology, or consent of instructor. Seminar 2 hours.

Scotton

Examination of other psychologies for their basic assumptions about man and the world, the resultant psychology, resultant societal behavior, and possible applications to psychotherapy. Includes lecture, discussion, and presentation of one system by each participant. PSYCHIATRY

Lannon

Seminar explores biochemistry, physiology and neuroanatomy as related to mental functioning and behavior, and applies concepts to the understanding of etiology and biological treatment of psychoses. Phenomenology and psychopathology of disorders and rationale for various psychological interventions are studied. PSYCHIATRY

487. Brief Psychotherapy. (2) Su, F, W. Prerequisite: Graduate clinical trainee standing at SFHH, or consent of instructor. Lab 3 hours. Seminar 1 hour.

E. Burke, Zilberg

Review of the literature on psycho-dynamically oriented brief psychotherapy during the first half of the semester, and review of completed cases during the second half. PSYCHIATRY

Amin, I. Kaufman, Huntington

Course is a detailed study of development beginning with infancy. Representative theoretical models are used with emphasis on actual observation. PSYCHIATRY

Psychology

G. Stone

Patients’ cooperation with health regimens contributes significantly to outcomes of health care. This course reviews factors that affect degree of compliance achieved and examines results of attempts to improve compliance. Stress is placed on tailoring methods to specific clinical circumstances. PSYCHIATRY

170.01. Commun in Health Transactions. (2) W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 3 hours. Enrollment limited. Staff

Lectures, readings, role-playing, and video replay will be used to teach social psychological influences on participants in health transactions, communication as joint problem-solving, specific skills of listening and speaking, awareness of nonverbal aspects of communication. PSYCHIATRY

Garfield

Models for dealing with psychosocial issues involved in caring for the dying patient. Emphasis on the sequence of events encountered by the health professional and patient from diagnosis through death. Course is intended for medical, nursing and mental health students. PSYCHIATRY

Weekly discussions in which students’ clinical cases are analyzed by dynamic application of behavioral theory. GEN DENT

180.02. Psychol Aspects of Treatment Plan. (1) Sp. Seminar 1 hour. Plainfield

This course integrates students’ basic training from the specialty courses in dentistry with knowledge of the psychological considerations necessary to individualize treatment. Appropriate treatment may then be planned to the practitioners’ awareness of the unique needs of patients. GEN DENT

180.03. Adv Psychol for Dental Hygiene. (1) Sp. Seminar 1 hour. Plainfield

Seminar discussions on the emotional aspects of interpersonal transactions among office personnel, therapists, and patients. GEN DENT

180.04. Neurophysiological Mech of EEG. (3) § W. Prerequisite: Course in physiological psychology or neurobiology, or consent of instructor. Lecture 1 hour. Seminar 2 hours.

Yingling

Course will examine the neuroanatomical and neurophysiological mechanisms underlying the generation and regulation of EEG and event-related potentials, their measurement and clinical uses. Emphasis on the nature and limitations of inferences concerning brain activity obtainable from scalp recordings. PSYCHIATRY
180.05. **Stress Among High Professionals.** (2) § F, W. Seminar 2 hours. **Garfield**

Course will focus on a theoretical understanding of the origins of job stress and the nature of burnout, and on practical and programmatic methods of reducing the stress overload incurred by physicians, nurses, and other health care professionals. PSYCHIATRY

180.06. **Clinical Research Practicum.** (3) § F, W. Sp. Prerequisite: Experience and/or course work in either research methods or clinical theory and intervention. Consent of instructor. Lab 3-4 hours. Seminar 2 hours. **Temoshok**

Practicum-seminar offers students the opportunity to get “hands-on” experience in contributing to the design and execution of evolving and ongoing clinical research studies in psychological aspects of behavioral medicine. Projects and supervisors will change each quarter. PSYCHIATRY

180.07. **Medical Decision-Making.** (2) § Sp. Lecture 2 hours. **P. J. Hoffman**

Review of selected studies drawn from decision analysis and judgment research literature. Subjective probability estimates; confidence, bias, and diagnostic accuracy; Bayes optimal strategies; computer-aided diagnosis; medical schools’ admission decisions; judgments of clinical competence and administrative decision-making. PSYCHIATRY

180.08. **Brain Behavior Research Methods.** (3) § W. Prerequisite: Psychology 231 or equivalent. Lecture 2 hours. Seminar 1 hour. Not offered 1982-83. **Galin and Staff**

An extensive survey of techniques and strategies emphasizing critical appreciation of principles and range of appropriateness rather than how to do it. Topics include clinical lesion studies, microscopic anatomy, neuroradiology, neurochemistry, pharmacology, autonomic psychophysiology, scalp electrophysiology, behavioral genetics, neuropsychological assessment. PSYCHIATRY

181.02. **Cerebral Hemispheric Spec.** (2) § Sp. Prerequisite: Background in neurophysiology, anatomy, cognitive psychology; intended for advanced students. Consent of instructor. Seminar 2 hours. **Galin**

Group discussions of readings in seminar format of neuropsychology of hemispheric specialization for cognitive function, and integration of the two hemispheres; development, psychiatric, and educational implications; evaluation of data from study of brain lesions, electrophysiological recordings, and behavioral testing. PSYCHIATRY

181.05. **Changing Health Behaviors.** (2) § Sp. Seminar 1-2 hours. **J. B. Henderson**

An overview of learning theory and the principles of behavior change. Clinical and research examples of treatment approaches to obesity, smoking cessation, eating disorders, adherence to medical instructions, and other health behaviors. PSYCHIATRY

Consideration of psychological processes utilized under stress and of alternative constructive methods for coping, with practice in using these techniques. Course is designed to help students handle stress and apply such principles to management of patients. PSYCHIATRY

185. **Nonverbal Communication.** (1) § F. Lecture 8 hours given in one day, plus research project. **Ekman**

Reading messages from the face and body; what patients reveal without words about their feelings and personality, and what you are revealing to them. PSYCHIATRY

198. **Supervised Study.** (1-5) § F, W, Sp. **Staff**

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PSYCHIATRY

200. **Learning & Cognition.** (4) § W. Prerequisite: Graduate standing in Health Psychology Program, or upper division courses in learning and cognitive psychology, and consent of instructor. Seminar 4 hours. Offered in alternate years. Not offered 1982-83. **G. Stone**

Course provides a basis for continued reading of current research and theory in learning and cognition, and for designing interventions in health transactions based on readings; identifies and traces history of major issues and viewpoints. PSYCHIATRY

202A-B. **Compr Simulation of Hum Interact.** (3-3) § W. Sp. Prerequisite: Psychology 257 or equivalent. Lecture 1 hour. Lab 6 hours. **Starkweather**

The development and testing of theoretical models of personality are explored by means of computer programs. Students program the computer for simulation and symbol manipulation. PSYCHIATRY

205. **Child Development.** (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. **C. Lewis**

Course will focus on major issues, theories, and findings in child development. Topics covered will include attachment; Piagetian and other theories of cognitive development; language development; moral development; and pro-social behavior; aggression, and self-esteem and competence. PSYCHIATRY

210. **Personality Psychology.** (4) § F. Prerequisite: Consent of instructor. Lecture 4 hours. Offered in alternate years. Not offered 1982-83. **F. Cohen**

General and systematic issues in the study of personality; theoretical and methodological issues in the assessment of personality and in research on personality. PSYCHIATRY

211A-B. **Theories of Personality.** (2-2) § W. Sp. Prerequisite: Graduate standing and
221. Prog Eval in Hlth & Human Serv. (2) § W, Sp. Prerequisite: Intended for graduate and professional students. Consent of instructor. Seminar 2 hours. Atkinson
A seminar course designed to provide a basic overview of the organizational context of program evaluation; design and implementation of information systems; assessment of community needs; evaluation of program quality and effectiveness, and training of evaluators. PSYCHIATRY

230. Physl Aspects of Hlth Psychol. (4) § F. Prerequisite: Graduate standing in Health Psychology Program or consent of instructor. Lecture 4 hours. Offered in alternate years. Naifeh
An overview of major organ systems of the human body stressing psychological impacts on their functioning and psychological consequences of abnormality. Course will prepare student for reading medical literature and interacting effectively with health professionals in planning research. PSYCHIATRY

231. Basic Physiological Psychology. (3) § F. Prerequisite: Basic courses in experimental psychology and consent of instructor. Lecture 3 hours. Herning
Central nervous system mechanisms involved in sensory information processing and in the regulation of behavior will be emphasized. Elementary neurophysiology, anatomy and neurochemistry will be discussed as background material. PSYCHIATRY

232. Topics in Biological Psychology. (2) § Sp. Prerequisite: Physiological psychology, neurophysiology and neuroanatomy. Seminar 2 hours. Salamy, Halliday
A seminar course focusing on issues of current interest in biological psychology. Topics may include those such as brain electrical events, human neurodevelopment, cognitive processes. Individual presentations and discussion will be required. PSYCHIATRY

233A-B-C. Physiol/Biolg Psychiat Psychopathol Sem. (1-1-1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Callaway
An ongoing seminar devoted primarily to the research interests of the group studying human event related potentials. Course includes visiting scientists, as well as presentations by staff and postdoctoral fellows. PSYCHIATRY

(2) § F, Sp. Prerequisite: Consent of instructor. Seminar 2 hours. Ellman
Seminar and readings on subjects related to the neurochemical, neuropharmacological basis of CNS functions; cell physiology of the nervous system. PSYCHIATRY

Course considers the relationship among behavior, subjective experience, and physiological processes, including autonomic and central neural. Review of methods of achieving increased awareness and control of physiological activity. Demonstrations, laboratory. PSYCHIATRY

236A-B-C. Human Neurophysiology. (1-1-1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Yingling
A journal club format seminar which will examine the current literature in human EEG and evoked potentials, with emphasis on identification of cerebral sources. Students will make oral class presentations. PSYCHIATRY

240. Social Psychology. (4) § F. Prerequisite: Consent of instructor. Lecture 4 hours. Offered in alternate years. Not offered 1982-83. Adler
A critical review of social psychological theory and research. Topics include role theory, attribution theory, group dynamics, interpersonal relations, social influence, decision-making, attitude formation and
Function and tasks of the health system; resources available and their deployment; institutions and organizations, professional roles; constraints imposed by rules, customs, societal factors. Issues of access, utilization, outcomes, financing will be stressed. Participation by invited guest experts. 

262. Intro to Health Psychology. (4) § Sp. Prerequisite: Consent of instructor. Lecture 4 hours. Offered in alternate years. Not offered 1982-83.

F. Cohen
Examination of empirical research and theoretical perspectives in certain problem areas within the health system where psychological knowledge is of direct relevance, such as information-processing in patient and physician, compliance, coping with the stresses of illness. 

263A-B-C. Research Placement & Seminar. (4-4-4) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Lab 9 hours. Offered in alternate years. Offered 1982-83.

N. Adler, Attkisson
Students will be placed in an ongoing research project in which they will carry out an individual project. They will participate in a concurrent seminar, where research methods and strategies and problems of research will be discussed. 

265. Stress & Bodily Disease. (4) § Sp. Prerequisite: Consent of instructor. Seminar 4 hours. Offered in alternate years. Offered 1982-83.

F. Cohen
Examination of the psychological and physiological models and empirical research linking stress and other psychological factors to the development of bodily disease. 

266. Reproductive Behavior. (3) § Sp. Prerequisite: Consent of instructor. Seminar 5 hours. Offered in alternate years. Offered 1982-83.

N. Adler

Examination of the role that psychological and social factors can play in varied reproductive behaviors: pregnancy, obstetrical complications, postpartum reactions, infertility, contraceptive use and nonuse, spontaneous and induced abortion. 

270A-B. Common Skills in Health Trans. (2-2) § W, Sp. Prerequisite: Graduate standing in Health Psychology Program, or consent of instructor. Lecture 1 hour. Lab 3 hours. Offered in alternate years. Offered 1982-83.

Dienst and Staff
A two-part course that teaches a number of skills involved in face-to-face interactions and prepares the student to do research on communication, and to teach the skills to others. 

280. Intro to Clinical Psychology. (3) § F. Prerequisite: Psychology 210 or equivalent, and consent of instructor. Lecture 3 hours. Offered in alternate years. Offered 1982-83.

F. Cohen
Critical evaluation of current models of behavior pathology; issues of prevention; theory and method of clinical assessment; processes of therapeutic intervention. 

Steinheber
Seminar discussions of clinical work in clinical psychology and psychiatry, reports of research and current literature by students and staff, and lectures by faculty. Course is intended primarily for advanced clinical psychology students. 

282. Abnormal Psychology. (2) § F, W, Sp. Prerequisite: Consent of instructor. Course is intended primarily for advanced students. Seminar 2 hours.

J. Fisher
Nature, causes, development and treatment of major behavior disorders such as the brain.
syndromes, drug addictions and the functional psychoses which result in disabling disturbances of interpersonal relations. Contemporary theories of personality development and clinical study of the major disorders. PSYCHIATRY

285A-B-C-D, Intermediate Family Therapy. (1½-3-3-3) § SS2, F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours, lab 3 hours. Four-quarter course.

Hatcher

Stages in family development, communications analysis, role definitions, family myths, power and resistance systems, growth models of family therapy, and intervention techniques. Emphasis on clinical and practical issues, video tape presentations of families in treatment, clinical supervision of ongoing cases. PSYCHIATRY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. PSYCHIATRY

300. Teaching Practicum. (0) § F, W, or Sp. Prerequisite: Consent of instructor. Lecture and lab variable.

Staff

Supervised classroom or tutorial teaching experience. PSYCHIATRY

Radiation Oncology

140.01. Radiation Oncology Clerkship-UC (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C.

T. Phillips

Participation in examination of cancer patients under treatment in the Claire Zellerbach Saroni Tumor Institute at MZ. Students participate in rounds, conferences and clinics, and see demonstrations on the use of newer radiotherapeutic techniques. RADIOLOGY

150.01. Research Selective. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C.

T. Phillips

Individual research in radiation oncology by arrangement with the chairperson of the department. Students work under close supervision of a member of the staff. RADIOLOGY

T. Phillips

Rounds include presentation of problem cases with discussions of diagnosis and treatment as well as biologic implications. Frequent guest lectures are used to cover important aspects of oncology. RADIOLOGY

T. Phillips

Seminars include discussions of the diagnosis, treatment, and results of specialty oncology problems, including head and neck, gynecologic, otorhinologic, pediatric, dermatologic, lymphomatous, and general malignancies. RADIOLOGY

T. Phillips

Study of principles of radiobiology and their application to radiotherapy. Seminars deal in depth with textbooks, selected readings and prepared seminars leading to understanding of mechanisms of action of radiation in clinical radiotherapy. Oriented to radiotherapy fellows and residents. RADIOLOGY

423. Therapeutic Radiol Treatment Plan. (3) Su. Prerequisite: Residents assigned to therapeutic radiology.

V. Smith

A workshop course to provide residents in therapeutic radiology with the elements of treatment planning and dose calculations. RADIOLOGY

V. Smith

A lecture-seminar course with practical sessions to provide the resident with a basic knowledge of radiological physics with special reference to those aspects relating to therapeutic radiology. RADIOLOGY

T. Phillips

Residents, under supervision, are responsible for diagnosis, treatment, and follow-up of patients referred to radiation therapy from the wards and outpatient clinics. Radiation therapy rounds include discussion of newly referred patients; chart rounds include the discussion of patients under treatment. RADIOLOGY

Radiology

100. Intro to Clinical Radiology. (2) F, W, Sp. Prerequisite: Anatomy 100 and 103, Medicine 130, Pathology 102, and Psychiatry 130; concurrent enrollment in Medicine 131A-B-C. Lecture 1 hour. Lab 1 hour.

S. Ross

Course provides instruction in basic aspects of therapeutic and diagnostic radiology and nuclear medicine. Illustration of diagnostic and therapeutic modalities in specific disease states provides instruction in use of radiologic resources. RADIOLOGY

140.01. Advanced Roentgen Diagnosis. (1½ per week) Su, F. Prerequisite: Radiology 140.05. Consent of instructor.

Margulis, S. Ross
Advanced clinical clerkship for students interested in a career in academic radiology. Students observe clinical work, observe or participate in research, and write a term paper. Radiology

**140.02. Off-Campus Clerkship.** (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 131A-B-C.

Margulis

Clinical clerkship in approved hospital by special arrangement and approval of the chairperson of the department and the Dean. Radiology

**140.04. Nuclear Medicine.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C.

Hattner

Observation of basic nuclear medicine procedures and participation in diagnostic tests employing radioisotopic tracers. Radiology

**140.05. Diagnostic Radiology-MZ.** (1½ per week) Su, F, W, Sp. Prerequisite: Third- or fourth-year standing.

A. Davidson

Rotation through each service in the Department of Radiology on a scheduled basis: participation in film interpretation with residents and faculty; and attendance at daily conferences; tutorials available with members of the faculty; role of radiology in clinical management emphasized. Radiology

**140.08. Cardiovascular Radiology.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C.

Carlsson

Cardiovascular radiology provides an opportunity to become acquainted with the radiologic studies of the cardiovascular system through active participation in the examinations and their interpretation. Radiology

**140.09. Diagnostic Radiology-SFGH.** (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing or consent of instructor.

Minagi

Students serve a clerkship in the Diagnostic Section of the Department of Radiology. They observe performance of radiologic procedures and interpretation of films, attend conferences, and learn basic philosophy of conducting radiologic examinations and the basic rules of interpretation. Radiology

**140.13. Radiology & Medical Diagnosis.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C.

S. Ross, Margulis

A clerkship for third-year students to help acquire knowledge and attitudes that ease transition from preclinical studies to clinical medicine. Radiographs with case presentations are used to help learn mechanisms of disease and clinical judgment. Radiology

M. Jones

Acquaints students with available techniques in diagnostic radiology, including nuclear medicine, ultrasound, computed tomographic scanning, angiography, other special procedures, conventional X-ray examination, fluoroscopy, and provides an introduction to "routine" film interpretation. Students have assignments at VAF, VMC, community hospitals. Radiology

**140.15. Roentgen Diagnosis.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Surgery 110.

Margulis, S. Ross

Clerkship in radiology for fourth-year students. Observation of procedures, review of pathology, pathophysiology, diagnosis, and natural history of selected diseases through study of roentgenograms with case histories. Potentials and limitations of radiologic method included. Radiology

**170.05A-B-C-D. The Anatomy of Anatomy.** (1½, 2, 1-2, 1-2) Su, F, W, Sp. Lecture 1½ hours.

S. Ross

Course demonstrates anatomy in the living through the use of radiographs. Objectives are to show the usefulness of knowing anatomy, to begin acquiring a medical vocabulary, the elements of clinical thinking, and useful habits in learning. For freshman "Blue" group. Radiology

**170.06A-B-C-D. Pathology of Internal Organs.** (1½, 1½, 1½, 1½) Su, F, W, Sp. Lecture 1½ hours.

S. Ross

A lecture course limited to small groups, with active participation on selected aspects of pathological anatomy and its usefulness in understanding disease, its origins, development, and clinical manifestations. For sophomores. Radiology

S. Ross

Course demonstrates anatomy in the living through the use of radiographs. Objectives are to show the usefulness of knowing anatomy, to begin acquiring a medical vocabulary, the elements of clinical thinking, and useful habits in learning. For freshman "Gold" group. Radiology

**170.08. Nuclear Medicine Physics.** (3½) Su. Prerequisite: Given concurrently with Radiology 170.09. Lecture 4 hours a week for 6 weeks. Independent study 10 hours.

Perez-Mendez

Introduction to the physics of radiotracers, nuclear instrumentation and gamma-ray imaging techniques. Radiology

**170.09. Introduction to Nuclear Medicine.** (3½) Su, F, W, Sp. Prerequisite: Given concurrently with Radiology 170.08. Lecture 5 hours a week for 6 weeks. Independent study 10 hours.

D. Price

Introduction to basic nuclear medicine diagnostic procedures, both in vivo and in vitro, and therapy with radiopharmaceuticals. Radiology

Minagi, Laing
Films of interesting cases from the daily work are presented and reviewed. Roentgenograms of surgically and pathologically proved cases are correlated with the gross and microscopic pathologic findings.

Seminars require preparation and presentation of roentgen findings on patients under discussion at medical, surgical, pediatric, obstetric and gynecologic departmental conferences and seminars on congenital heart disease, disease of the gastrointestinal tract, and orthopedics.

403. Emergency Radiology. (1) F, W. Prerequisite: Required for first-year residents in radiology. Lecture 1 hour.

Role of radiologist as consultant in the emergency room; head injuries, fractures, dislocations, blunt and penetrating chest trauma, and trauma to genito-urinary system; management of contrast reactions; indications for, conductions of, interpretation of special radiologic procedures.

Numerous research projects are conducted in the department and facilities are available for new ones. Residents are encouraged to take advantage of these opportunities.

Interdepartmental seminars in which the radiological picture of problem cases either of diagnostic or therapeutic nature is presented. This course includes surgical and medical radiological rounds, consultative tumor board, clinicopathological conferences, and other department grand rounds.

Akin

Interdepartmental seminars in which the radiological picture of problem cases either of diagnostic or therapeutic nature is presented. These include medical surgical, clinicopathological, chest, medical x-ray, radiology, neurology and neurological surgery conferences, consultative tumor board, and surgical and orthopaedic grand rounds.

410. Radiat Effects on Genes & Chrom. (2) W. Prerequisite: Consent of instructor. Lecture 2 hours.

S. Wolff

Concepts and mathematics of target theory related to damage of genetic apparatus. Biophysical and biochemical studies on induction of intragenic and intergenic mutations that give insight into the structure of chromosomes and interaction of radiation with biological material.

Hinchcliffe

Course includes review of surgical pathology material and attendance at autopsy rounds.

R. Gould

Course is designed to acquaint residents with the physical principles of diagnostic radiology. Topics include generation and extraction of radiologic information, image conversion, recording methods, and special purpose equipment. CT and ultrasound physics are discussed.

419. Growth Kinetics-Cells & Tumors. (2) Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

Cleaver, Patt

An analysis of cell population growth in tissues, tumors, and cultures. Emphasis is given to radioactive tracers such as thymidine and its biochemistry, and experimental methods for studying cell proliferation in vitro and in vivo.
Hatter and Staff. Rotating assignments of topics for discussion by residents in nuclear medicine training programs in all affiliated hospitals. Critical reviews of available information in limited areas are used to provide a broad review of nuclear medicine for all trainees. RADIOLOGY

Margulis and Staff. Clinical experience in diagnostic and therapeutic nuclear medicine to satisfy requirements of American Board of Radiology for certification in diagnostic radiology and radiation therapy. RADIOLOGY

Akin. Residents, under supervision, carry out radiological examination and interpretation of X-rays of patients referred from wards and outpatient clinics. The chief resident has certain administrative duties relative to the resident training program. RADIOLOGY

SFGH Coulson. Residents, under supervision, are responsible for the diagnostic activities of the department, including diagnostic consultations and reports, history-taking, and physical examinations. In addition, the chief resident has certain administrative duties relative to the resident training program. RADIOLOGY

SFGH Coulson. Residents are responsible for the diagnostic activities of the department under the direction of staff radiologists including diagnostic consultations and reports, history-taking, and physical examinations. RADIOLOGY

Removable Prosthodontics

Prerequisite: Third-year standing and satisfactory completion of all second-year courses.
Firtell. Clinical application of principles and techniques taught over the last two years in removable prosthodontics courses. RESTOR DENT

110B-C. Elementary Denture Prosthod. (1 1/2) W, Sp. Prerequisite: Concurrent enrollment in Removable Prosthodontics 110B-C. Removable Prosthodontics 110B is a prerequisite to 110C. Lecture 1 hour.
Harman, Firtell, Brignate
Lectures on the elementary principles of complete denture prosthodontics emphasizing the biological background and clinical application of the technical steps. RESTOR DENT

110B-C. Elementary Denture Prosthod. (2 1/2) W, Sp. Prerequisite: Concurrent enrollment in Removable Prosthodontics 110B-C. Removable Prosthodontics 110B is a prerequisite to 110C. Lab 6 hours.
Harman, Firtell, Brignate
A laboratory course on the elementary principles of complete denture prosthodontics. Laboratory exercises demonstrate technical and clinical procedures. RESTOR DENT

122. Special Dentures. (1) W. Prerequisite: Removable Prosthodontics 110B-C, 116B-C and 126.01. Concurrent enrollment in Removable Prosthodontics 126.02. Lecture 1 hour.
Augsburger
Presentation of clinical procedures for immediate dentures, transitional dentures, overdentures and other special dentures. RESTOR DENT

T. Wood
Course will enable students to be able to identify the needs for variations from routine treatment to be able to handle the problems of the more senior, non-ambulatory, bedridden, and institutionalized patient. Included are physiological, psychological and clinical needs. RESTOR DENT

126.01. Partial Dentures. (3) F. Prerequisite: Removable Prosthodontics 110B-C. Lecture 1 hour. Lab 6 hours.
Firtell
Fundamentals of partial denture design and construction of the partial denture. RESTOR DENT

126.02. Special Dentures. (2) W. Prerequisite: Removable Prosthodontics 110B-C, 116B-C and 126.01. Concurrent enrollment in Removable Prosthodontics 122. Lab 6 hours.
T. Wood
Course provides experience in fabrication of immediate and other special dentures. RESTOR DENT

126.03. Complete Prosthodontics. (2) Sp. Prerequisite: Removable Prosthodontics 126.01 and 126.02. Lab 3 hours. Seminar 1 hour.
Augsburger
Course will demonstrate to preclinical students patient management and the techniques of fabricating a complete denture. They will practice independently or on student partners the techniques demonstrated. Discussion of problems encountered in practice. RESTOR DENT

130A. Treatment Planning & Prosthetics. (1) F. Prerequisite: Removable Prosthodontics 122, 123, 126.01, 126.02 and 126.03. Lecture 1 hour.
Augsburger
Treatment planning for the partially edentulous and the edentulous patient. Course is designed to relate the varying biological and physical factors with the type and design of the prosthesis: fixed partial, removable partial, or complete dentures. RESTOR DENT
130B. Adv Remov Partial Denture Design. (1) W. Prerequisite: Removable Prosthodontics 130A. Lecture 1 hour. KEKL

Principles and concepts of partial denture design in relation to clinical dentistry. Treatment planning for removable partial dentures especially as related to preventive dentistry will be emphasized. Special attention will be given to design of the extension base partial denture. RESTOR DENT

Continuation of clinical experience at the level of Removable Prosthodontics 109. RESTOR DENT

189.02. Complete Prosthodontics. (0-7%) SS2. Prerequisite: Fourth-year standing. Lab and Clinic variable. Firtell

Work is done in a clinic location remote from the school or satellite clinics, such as California Veterans Home, Israil Project. For clinical work completed, credit will be given to satisfy part of the Removable Prosthodontics 109 requirement. RESTOR DENT

Senior dental students will observe and perform maxillofacial prosthodontic services for patients in the Maxillofacial Clinic. A detailed case history will be required each quarter. Attendance at related tumor board conferences and field trips to other therapy centers. RESTOR DENT

199. Laboratory Project. (1.5) F, W, Sp. Staff

A laboratory research project under direction of a member of the faculty with approval of the chairperson of the department. RESTOR DENT

Course is designed to acquaint residents with multidisciplinary aspects of maxillofacial prosthodontics. Lectures will be given on maxillofacial prosthetic techniques, oncology, head and neck surgery, plastic surgery, oral surgery, therapeutic radiology, psychology and related oral biology. RESTOR DENT

Residents and advanced prosthodontic students will observe and perform maxillofacial prosthodontic services for patients in the Maxillofacial Clinic. A detailed case history will be required each quarter. Attendance at related tumor board conferences and field trips to other therapy centers. RESTOR DENT

Restorative Dentistry

Students elect to complete requirements in any one or more of the divisions after satisfactorily completing all requirements in Fixed Prosthodontics 109, Operative Dentistry 109, and Removable Prosthodontics 109. RESTOR DENT

170A-B-C-D-E. Prosthodontics Literature Review. (0-4, 0-4, 0-4, 0-4, 0-4) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in Postgraduate Prosthodontics Program. Seminar 1-4 hours. T. Curtis, Radke

Current and past prosthodontic literature will be studied and discussed. Students will learn to distinguish between appropriate, controversial, and inappropriate prosthodontics literature. RESTOR DENT

171A-B-C-D-E. Prosthodontic Treatment Planning. (0-2, 0-2, 0-2, 0-2, 0-2) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in Postgraduate Prosthodontics Program. Lecture 1 hour. Seminar 1 hour. T. Curtis, Radke
A treatment plan will be discussed and developed for each patient after all diagnostic aids have been gathered. Students will be responsible for establishing an initial treatment plan prior to the seminar and for justifying it before the group. RESTOR DENT

172A-B-C-D-E. Prosthodontic Procedures. (0-2, 0-2, 0-2, 0-2, 0-2) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in Postgraduate Prosthodontics Program. Lecture 1 hour. Seminar 1 hour. T. Curtis, Radke

Staff and program consultants will present lectures on various aspects of fixed and removable prosthodontics and related subjects on a graduate level. RESTOR DENT

179.01A-B-C-D-E. Removable Prosthodontics Clinic. (0-5, 0-5, 0-5, 0-5, 0-5) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in Postgraduate Prosthodontics Program. Clinic 15 hours.

Various types of removable prostheses will be fabricated using different techniques and treatment philosophies. RESTOR DENT

179.02A-B-C-D-E. Fixed Prosthodontics Clinic. (0-5, 0-5, 0-5, 0-5, 0-5) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in Postgraduate Prosthodontics Program. Clinic 0-15 hours. T. Curtis, Radke

Fixed prosthodontics clinical procedures will be performed using a variety of treatment philosophies and articulating devices. RESTOR DENT

179.03A-B-C-D-E. Prosthodontic & Oral Surgery Clinic. (0-1, 0-1, 0-1, 0-1, 0-1) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in Postgraduate Prosthodontics Program. Clinic 4 hours. T. Curtis, Beirne

Patients experiencing problems with removable prostheses will be evaluated with oral surgery staff to determine if multidisciplinary treatment is indicated. If prosthodontic surgery is suggested, patient will coordinate and participate in all phases of pre- and postsurgical care. RESTOR DENT

Social Studies

Presentation of prominent sociocultural features of dominant systems in American society. Integration and dissonance between and among these systems with emphasis on major social problems which result, such as racism, inequality, youth, disjunction between technology and humanistic values. SOC BEH SC

123. Soc Sys Theories in Nursing Pract. (2) W. Prerequisite: Fifth-quarter standing or consent of instructor. Lecture 2 hours. Schatzman

Course presents a theoretical framework from which patient care and health delivery systems can be analyzed, approached, and influenced by the professional nurse. SOC BEH SC

126. Third World Families. (3) F, W. Lecture 2 hours. Lab 3 hours. Staples

Examination of family structures and dynamics among Third World peoples. Families to be discussed include Africans and Afro-Americans, Asians, Native Americans and Latinos. Emphasis on continuities in the family life of these groups in their native land and the United States. SOC BEH SC

130. Sociocultural Variations in Hlth. (3) W. Lecture 3 hours. Schatzman

Course addresses socio-cultural variations in health with implications for nursing practice. SOC BEH SC

134. Women's Roles In Health Care. (3) § F, W or Sp. Lecture 3 hours. Olesen

Analysis of sex roles in general and women's roles in particular in health care receipt and delivery, with special emphasis on recruitment problems to health professions, images of women in therapeutic situations, and cross-cultural features of health care. SOC BEH SC

136. Management of Pain. (3) § Sp. Lecture 2 hours. Lab 3 hours. Strauss

Pain as experienced, expressed, and managed in a variety of settings by patients, staff, and family. Sociological and organizational perspectives on assessing, legitimizing, and controlling pain. SOC BEH SC

138. Sociology of Change in Hlth Care. (3) § W. Sp. Prerequisite: Open to upper division and graduate students. Lecture 3 hours. Staff

Review of social change in health care systems with particular attention to implications of change at all system levels such as patients, alternative curing practices, policies, new occupations, types of future care. Debate on and examination of key issues. SOC BEH SC

140. Introduction to Sex Roles. (2-4) F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. Olese, Lewin

Examination of current theories about biological and evolutionary bases of gender stratification systems; their universal features and range of variation they exhibit. Interfacing between gender roles and economic, political, religious, and social organizational aspects of U.S. and other cultures explored. SOC BEH SC

160. Policy & Politics of Health. (3) § F. Lecture 3 hours. Estes

Course addresses the organization of health care and its politics, with emphasis on both United States and international health issues. SOC BEH SC

198. Supervised Study. (1-5) § F, W. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. SOC BEH SC

203. Chronic Illness. (3) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Strauss
Problems faced by chronically ill persons and their families including crisis management, handling symptoms, managing regimens, social isolation, phases of the disease, temporal difficulties, normalization, dying. Some policy issues, including those confronting health care personnel as well as the general public. SOC BEH SC

204. Sociology of Psychiatry. (3) § F. Lecture 3 hours. Schatzman
Psychiatric practices, professional careers, and institutions conceptualized sociologically, as historic, symbolic systems and interactional processes. SOC BEH SC

205. Health Professions & Occupations. (4) § F. Lecture 4 hours. A. Strauss
The nature of occupations and professions; their constellation in hospitals and clinics, the medical division of labor, specialties and specialization, professional and occupational ideologies, the sociology of work relationships, careers. SOC BEH SC.

208. Social Psychol of H'th & Illness. (3) § W. Prerequisite: Required for graduate students in sociology. Lecture 2 hours. Lab 3 hours. Olsen, J. B. Wood, Schatzman
Sociological perspectives on the dimensions and properties of research in natural social settings. Focus upon developing skills in negotiating entree, in watching, listening and in recording data; emphasis upon developing conceptual schemata in preparation for analysis. SOC BEH SC.

Survey of the classical and contemporary sociological issues in theoretical and empirical work. Power; exploration of underlying assumptions and paradigms emerging and reflecting a socio-political milieu; students become familiar with literature and debates on power structure research and theory. SOC BEH SC.

212A. Sociology Theory. (2) § F, W. Lecture 2 hours. A. Strauss
An examination and evaluation of classical and recent contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SC.

212B. Sociology Theory. (4) § F. Lecture 4 hours. Staff
An examination and evaluation of classical and recent contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SC.

213. Participant Observation Studies. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Schatzman
A basic course in the logic and operations of social research in the field. Lectures, readings and discussion on research strategies; entree, watching, listening, data recording, and analyzing. SOC BEH SC.

214A. Field Research. (3) § F, Sp. Prerequisite: Doctoral level. Lecture 2 hours. Lab 3 hours. Olsen, J. B. Wood, Schatzman
Sociological perspectives on the dimensions and properties of research in natural social settings. Focus upon developing skills in negotiating entree, in watching, listening and in recording data; emphasis upon developing conceptual schemata in preparation for analysis. SOC BEH SC.

214B. Qualitative Analysis. (3) § W. Prerequisite: Doctoral level. Sociology 214A. Lecture 2 hours. Lab 3 hours. Olsen, J. B. Wood
Examination of modes of analysis applicable to qualitative data; emphasis on dimensions and properties exhibited in student-presented data. SOC BEH SC.

214C. Qualitative Analysis. (3) § F, W, Sp. Prerequisite: Doctoral level. Sociology 214A and 214B. Lecture 2 hours. Lab 3 hours. A. Strauss
Qualitative analysis; the development of substantive and formal sociological theory. Emphasis on student-presented data and their conceptualization. SOC BEH SC.

216. Comparative Organizations. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. Staff
A critical review of classical and recent contributions to the sociology of formal organizations. A variety of types of organizations will be considered, with special emphasis on service organizations. SOC BEH SC.

217. Future of the Family Seminar. (3) § F. Sp. Lecture 2 hours. Lab 3 hours. Staples
Exploration of changing dating, sexual, sex-role, marital, and familial patterns in the United States. Discussion of futurist models of family life as affected by sociocultural forces. Special emphasis given to changing sex-role behavior as affecting male-female relationships. SOC BEH SC.

218. Advanced Topics in Aging. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2-4 hours. Estes, Nevicom
The topics to be analyzed will vary each year with the instructor, but will be focused upon a specific area. SOC BEH SC.

219. Social Policy and Aging. (2-4) § W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. Estes
Critical analysis of major social, economic and political issues of growing old in America. Examination of social policy in the public and private sectors including health, income, and social services. Consideration of prospects for social change and political movements. SOC BEH SC.

220. Sociology Seminar. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Required for graduate students in Sociology. Seminar 2 hours. Lab 0-6 hours. Staff
Doctoral student seminar to discuss methods and problems in current research. Course may be repeated for credit. SOC BEH SC.

221A-B-C. Qualifying Examinations. (4-4-4) § A, F, W, Sp, B, F, W, Sp. C, F, W, Sp. Prerequisite: Preparation for qualifying examinations. Open to graduate students in Sociology only. Staff
Qualifying examinations for graduate students in sociology are given in three areas: sociological theory, medical sociology, and special interest. This course will provide for preparation in each area. SOC BEH SC.

222. Planning in Human Services. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

C. Harrington, Benjamin

Examination of trends in planning for the human services, including the role of government organizations, professionals and consumers in generating and benefiting from major human services planning reforms. Planning in the fields of health and aging is emphasized. SOC BEH SC.

223. Sociology of Public Policy. (2-4) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours.

Estes, Benjamin

Introduction to the social construction of policy. Examination of problems in design and implementation of policy; the influence of ideology, social class and interest groups, the role of planning and budgeting processes, and the sociology of expertise. SOC BEH SC.

224. Epistemological Problems. (4) § W. Sp. Prerequisite: Consent of instructor. Staff

Central epistemological problems in the social sciences and their bearing on issues of the research role, modes of conceptualization, scientific communication, and public information. SOC BEH SC.

232. Adv Problems in Social Psychol. (2-4) § F, W. Sp. Prerequisite: Consent of instructor. Seminar 2-4 hours. Staff

An advanced seminar dealing with theoretical and conceptual problems in various areas of social psychology. Recent developments in theory and concept will be reviewed. SOC BEH SC.

234. Health & Aging. (2-4) § F, W. Sp. Prerequisite: Consent of instructor. Lecture 2-4 hours.

H. Lipton

Examination of the health status of the aged in the United States in light of relevant biological, behavioral, sociocultural, environmental factors. Social, cultural, economic factors affecting organization, financing, and delivery of health care to the aging population will be examined. SOC BEH SC.

235. Family Behavior Health Factors. (3) § F, W. Sp. Prerequisite: Consent of instructor. Graduate standing. Lecture 2 hours. Lab 3 hours.

Staples

Exploration of how marital and family behavior generates mental and physical health problems. Topics to be covered are family violence, child abuse, sexually transmitted diseases, suicide, psychological problems, and the relationship of marital status to morbidity and mortality. SOC BEH SC.

236. Race/Class Factors in Hlth Care. (3) § W. Prerequisite: Consent of instructor. Graduate standing. Lecture 2 hours. Lab 3 hours. Staff

Examination of how racial and class membership impacts on access to health care services, variations in the quality of those services, how professional and subprofessional roles in the health care system are organized along racial and class lines. SOC BEH SC.

Introduction to history of sociological thought. Objective of the course is to provide perspective and vocabulary for examining major schools of thought which constitute sociological tradition. Discussion of conceptual frameworks and their relationship to theory will provide understanding of sociological work. SOC BEH SC.

Olesen

Opportunity to work with both theoretical and research questions on the subject of women's participation in health and healing systems. Critical questions on appropriate method, relationship to theory, and articulation of questions will be considered. SOC BEH SC.

239. Field Research as Eval Method. (3) § F, W. Sp. Prerequisite: Sociology 214A and 214B. Lecture 3 hours. Staff

Analysis of field work as evaluation method, as applied to health care settings and programs, contrasting this approach with quantitative methods predicated on analysis of outcomes. Conduct of such evaluative research, and relationship with audiences, such as policymakers, analyzed. SOC BEH SC.

249. Special Studies. (1-8) § F, W. Sp. Prerequisite: Consent of instructor. Staff

Students select special problems to investigate on an individual or collaborative basis. These studies may be conducted through readings, the collection or analysis of empirical data, or the development of conceptual analysis or of methodologies. SOC BEH SC.

250. Research. (1-8) § F, W. Sp. Prerequisite: Admission to doctoral study and consent of instructor. Staff

SOC BEH SC.

251. Women's Health: Socio-Cultural. (2-4) § Sp. Prerequisite: Consent of instructor. Lab 0-6 hours. Seminar 2 hours. Offered in alternate years. Not offered 1982-83.

Olesen, Lewin

Exploration of relationship between culture and health for women in non-Western societies. Effects of modernization and migration on utilization of traditional and cosmopolitan health care and on women's roles as providers will be discussed, and contemporary controversies will be analyzed. SOC BEH SC.

252. Women's Health: Socio-Historical. (2-4) § W. Prerequisite: Consent of instructor. Lab 0-6 hours. Seminar 2 hours. Offered in alternate years. Not offered 1982-83.

Olesen, Ruzek
An introductory course in sample theory, sample development, and methods of survey research. Course will include analysis of appropriateness, cost, and limitations of various methods. The course will provide rudimentary skills for those conducting research and large field surveys. SOC BEH SC

298. Thesis or Comprehensive Exam. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master's degree or taking a comprehensive examination required for the master's degree. SOC BEH SC

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. SOC BEH SC

Speech and Hearing Science

210. Fundmntl of Auditory Neurobiol. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. R. Snyder, Merzenich

Reading and critical discussion of selected original research papers on the anatomy and physiology of the auditory system. Each level of the auditory nervous system from the periphery to the cortex will be considered in turn. OTOLARYN

211. Instrumentation for Research. (4) § Sp. Prerequisite: Knowledge of one higher-level computer programming language, and consent of instructor. Lecture 2 hours. Lab 6 hours. Offered in alternate years. Offered 1982-83. Staff

Review of major instrumental approaches to study of speech and hearing, including design and operation of acoustic research equipment, use of specific computer software, preparation of tissue for histological research, and other approaches to research in speech and auditory physiology. OTOLARYN

220. Inner Ear Anatomy. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours. Staff

Consideration of the gross anatomy, histology, and fine structure of the mammalian cochlea and vestibular sense organs. Basic aspects of the phylogenetic and embryologic development of the ear will be included. Lectures, demonstrations, dissections, and student presentations. OTOLARYN

221. Electrophysiology & Audiology. (4) § Sp. Prerequisite: Anatomy 203 or equivalent and consent of instructor. Lecture 2 hours. Lab 6 hours. Offered in alternate years. Not offered 1982-83. Staff

Review of the development of various electrophysiologic approaches to studying auditory functions with particular emphasis on auditory-evoked response measurement. Lectures and laboratory exercises will stress equipment design and calibration, data collection, analysis, and interpretation. OTOLARYN

230. Speech Reception Research Sem. (3) § F. Prerequisite: Consent of instructor. Seminar 3 hours. M. White

Consideration of the significant features of the acoustic speech signal, transaction characteristics of the normal and pathological cochlea; and the neural encoding of important features of the speech signal at the eighth nerve and cochlear nucleus. OTOLARYN

231. Speech Production Research Sem. (3) § Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Staff

Review of research on respiratory function in speech, phonation physiology, and articulation processes. Measurements and recording techniques of these functions with appli-
culation to normal and pathological aspects of speech production are considered. OTOLARYN

247. Special Studies. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-2 hours. Lab 0-3 hours.

Directed reading and laboratory work in the auditory process and its disorders. OTOLARYN

249. Independent Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Students and instructor develop jointly a study plan involving tutorials, reading, and laboratory work. Students engage in intensive exploration of specific topics related to the anatomic, physiologic, psychophysical, and behavioral aspects of the speech and hearing sciences. OTOLARYN

250. Research. (1-8) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Research for the Ph.D. dissertation. OTOLARYN

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

For graduate students engaged in writing the dissertation for the Ph.D. degree. OTOLARYN

Surgery

T. Hunt, Trunkey, L. Way, V. Richards

Core general clerkship in surgery. Students assigned to wards and clinics at UC, SGH, VA and C. The application of basic sciences, pathology, radiology, and psychiatry to surgery is emphasized in ward rounds and seminars. SURGERY

T. Hunt, Hohn

Students are senior clerks on wards, in operating rooms at UC, SGH and VA. Rounds, seminars focus on physiological approach to surgery. Clinical clerkship in surgical specialties may be taken with prior approval of specialty department and Department of Surgery. SURGERY

140.01. Advanced Surgery Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111.

T. Hunt, Trunkey, L. Way, V. Richards, Heer, Peter, P. Smith

Senior clinical clerks participate in clinic, ward, and operating room with direct involvement in postoperative and preoperative care at UC, SGH, VA, C, RDMC, VMC and K SURGERY

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111.

Ebert

Clinical clerkship in approved hospitals in other universities by special arrangement and approval of the chairperson of the department and the Dean. SURGERY

Effney

Students serve as acting interns on the vascular surgery team, participating in preoperative, intraoperative, and postoperative management of patients, as well as in clinics, rounds, and conferences. SURGERY

140.05. Operable Heart Disease. (1½ per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111.

UC B. Roe, VA Ellis

Ward rounds and conferences on patients with operable, congenital or acquired heart disease. Details of selection, differential diagnosis, and results of surgery are discussed. SURGERY

140.06. Emergency Medicine—SGH. (1½ per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111.

F. Lewis

Four weeks participation on the Emergency Ward at SGH. Students will work up selected cases, perform minor procedures under supervision, and follow all surgical emergencies as time permits. SURGERY

140.07. Shock & Trauma Research. (1½ per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111.

Sheldon

Course involves clinical and laboratory investigation and a detailed study of specific patients with trauma and shock. SURGERY

V. Richards

Students work as interns on Surgical Service; they evaluate general surgical patients preoperatively; work with patients in operating room; assume graduated, increasing responsibility in postoperative management. Rounds and conferences enhance clinical experience; interaction with staff in patient care emphasized. SURGERY

140.09. Trauma Surgery—SGH. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111 and consent of instructor. Sheldon

Clinical clerkship in the Trauma Service of the Department of Surgery at SGH. The student will work at intern-klrcl level as an integral part of the service. SURGERY

140.10. Cardiothoracic Surgery. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or Surgery 110 or 111.

Ellis
As an integral member of the cardiothoracic team, the student directly and actively shares in preoperative evaluation, operative procedures, and postoperative care. Cardiac and thoracic conferences and daily ward rounds provide the didactic teaching. SURGERY

140.11. Burn Care. (1½ per week) Su, F, W. Sp. Prerequisite: Surgery 110.

Trunkey

Clinical rotation on a large Burn Center Service. Pathophysiology of thermal injury including pulmonary aspects will be stressed. Students act as integral members of the team and participate directly in patient care. SURGERY

Vasconez, Mathes, Walton

Participation in clinical activities of plastic surgery. Students work on patients and take part in operative procedures, as well as manage the post-operative patient. Exposure to patients with general reconstructive problems; trauma to head and neck, hand surgery, and congenital anomalies. SURGERY

O'Hara

Students receive broad clinical experience in general surgery at VAF and with practicing surgeons in selected community settings in the central San Joaquin Valley. Balance between VAF and community assignments is individually arranged, according to students' interests. SURGERY

160.03. Cardiopulmonary Surgery. (2) Sp. Prerequisite: Third- or fourth-year standing. Lecture 2 hours.

Ebert, B. Roe, J. Hutchinson

Seminars are conducted on a series of subjects relating to cardiopulmonary surgery, which may be attended separately or in conjunction with weekly rounds on cardiopulmonary patients. SURGERY

160.05. Advanced Surgery Reading. (2) F, Sp.

Trunkey

A weekly seminar where previously assigned papers are discussed and critiqued. Papers representing the classical and current concepts in general surgery are covered. SURGERY

160.06. Total Parenteral Nutrition. (5) Su, F, W, Sp. Prerequisite: Surgery 110 and consent of instructor. Lecture 5 hours. Lab 6 hours.

Sheldon

Course emphasizes nutritional and metabolic requirements of injured, ill, and malnourished patients. Clinical rotation involves methods of preparation, administration, and assessment of patients receiving calorie protein or amino acid support as part of specific therapy. SURGERY

170.02. Emergency Medical Care. (1) W. Prerequisite: First- or second-year standing. Lecture 1 hour.

Lim

Lectures on immediate care of trauma to head, neck, chest, abdomen, extremities, resuscitation and various procedures. Practice sessions are included as time permits. SURGERY

198. Supervised Study. (1.5) F, W, Sp. Prerequisite: Consent of instructor.

Ebert and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. SURGERY

199. Laboratory Project. (1.5) F, W, Sp. Prerequisite: Consent of instructor.

Ebert and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. SURGERY

UC Ebert, SFHG, Trunkey, V4 L Way

Conferences include presentation of case studies with reference to the literature, case records, laboratory tests, and special studies. Faculty and occasional guest lecturers discuss surgical problems. Death and complications are reviewed weekly. SURGERY

McKerrow

Seminars include case reports and presentations of the currently available gross and microscopic surgical pathological material from the operating rooms and pathology laboratories. SURGERY

RDMC Heer, SFHG, Trunkey, UC Ebert, V4 L Way

Seminar is held in the surgical wards with discussion of current problems concerning the diagnosis and management of general surgical patients. SURGERY

UC Ebert, SFHG, Trunkey, V4 L Way, RDMC Heer, C.V. Richards

Residents, under supervision, are responsible for the preparation of case records, laboratory work, preoperative patient preparation, assistance at operations, postoperative care, and attendance at follow-up clinic. Senior residents have certain additional administrative, teaching, and clinical responsibilities. SURGERY

452. Experimental Surgical Laboratory. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 450 and 452 may not be taken concurrently.

UC Ebert, SFHG, Trunkey, V4 L Way

Course includes experimental investigations of general surgical problems and the development of technical and laboratory
methods to be applied in general surgery.

Surgery

453. Clinical Experimental Surgery.

Ebert

Assistant residents in off-campus hospitals approved by the chairperson of the department and the Dean. Course includes clinical and experimental investigations of general surgical problems and the development of technical and laboratory methods to be applied in surgery. SURGERY

SFGH Trunkey

Interns rotate through the general surgical service, including the intensive care unit. Under the direction of the attending staff, experience is provided in vascular, chest, hand and plastic surgery, and surgery of maxillofacial injuries. SURGERY

UC Ebert

Interns, under supervision, are responsible for the preparation of case records, laboratory work, preoperative patient preparation, assistance at operations, postoperative care, and attendance at follow-up clinic. SURGERY

Teaching Methodology

Staff

Course provides resource information in the form of a systematic overview of educational technology. This information is introduced in conjunction with the development by the individual student of an actual microcourse, teaching a single skill. GEN DENT

Staff

Practical teaching experience in selected courses under the supervision of members of the staff. GEN DENT

186.01A-B-C. Practice Teaching. (0.3, 0.3, 0.3) F, W, Sp. Lab 3 hours.

Staff

Practical teaching experience in selected courses under the supervision of senior members of the staff. GEN DENT

Urology

Core Clerkship—Surgery 110 includes clinical clerkships in the outpatient clinics and hospital, assistance at operations, and participation in residents' seminars.

140.01. Advanced Urology Clerkship--UC. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110.

Tanagho

Students work as interns on the Urology Service at UC. They also attend rounds and scheduled seminars with residents and visiting staff. UROLOGY

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110.

Tanagho

Clinical clerkship in off-campus hospitals approved by the chairperson of the department and the Dean. UROLOGY

140.03. Advanced Urology Clerkship--VA. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110.

R. D. Williams

Students work as interns on the Urology Service at VA. They also attend rounds and scheduled seminars with residents and visiting staff. UROLOGY

McAninch

Students work as interns on the Urology Service at SFGH. They also attend rounds and scheduled seminars with residents and visiting staff. UROLOGY

170.01. Fundamentals of Urology. (2) F, W, Sp. Prerequisite: Consent of instructor.

Tanagho and Staff

Seminar and library research. UROLOGY

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Consent of instructor.

Tanagho and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. UROLOGY

Tanagho

Seminar includes study of the basic sciences and urologic roentgenology with members of the attending staff. UROLOGY

Tanagho

Course includes experimental investigation in urologic problems. UROLOGY

Tanagho

Seminar includes discussion of diagnosis and treatment of patients in the urology wards with the attending staff. UROLOGY

Tanagho

Conference includes presentation and discussion of urologic problems by the house staff and faculty. UROLOGY

UC Tanagho, SFGH McAninch, VA Meares

First-year residents care for patients in the wards and outpatient clinics. Second- and third-year residents, under supervision, perform instrumental examinations on clinic patients. Senior residents, under supervision, perform instrumental and surgical procedures and have administrative, clinical, and teaching responsibilities. UROLOGY

SFGH McAninch

Interns rotate through urological wards. Under the direction of the attending staff they are responsible for the care of patients, including history-taking, physical examination, laboratory tests, and consultation. UROLOGY
