The gross structure of the human body is studied by means of dissection, demonstration, X-ray, surface, developmental, and cross-sectional anatomy with special reference to the functional aspects of the structures examined. ANATOMY

102. Histology. (5) § F. Prerequisite: Concurrent enrollment in Biochemistry 100A-B. Lecture 3 hours. Lab 4 hours. J. Long and Staff

Course covers the microscopic organization of the structure and function. The microscopic structure and organization of the mammalian nervous system, and its organization, intended for students in the School of Medicine and for beginning graduates. ANATOMY

103. Nervous System: Form & Function. (4-6) § Sp. Prerequisite: Consent of instructor required for graduate students. Lecture 5 hours. Lab 3 hours. H. Ralston, Stryker and Staff

The structure and function of the mammalian nervous system is studied. The functional significance of the structures is emphasized. ANATOMY

103.01. Neuroanatomy. (2) Su. Prerequisite: Familiarity with the University and the Curriculum in Physical Therapy. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 1 hour. Lab 3 hours. Garoutte

The structural organization and function of the central nervous system are presented through lecture and laboratory study of models, wet and dry demonstration. Special emphasis accorded to clinical correlations. ANATOMY

107. Neuromuscular Physiology. (2) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum or consent of program director. Lecture 2 hours. Garoutte

A study of the physiology of striated muscle and peripheral nerve in relationship to controlling mechanisms within the nervous system. ANATOMY

115. Histology. (3) W. Lecture 2 hours. Lab 3 hours.

A study of the microscopic structure and function of the tissues and organs of the human body by means of lectures, demonstrations, and microscope slides. Functional aspects of the structures are stressed. Intended for students in the School of Pharmacy. ANATOMY

116. Gross Anatomy. (3) W. Lecture 2 hours. Lab 3 hours. Sutherland

A study of the macroscopic structure of the human body by means of lectures and dissections. Functional aspects of the structures are stressed. Intended for students in the School of Pharmacy. ANATOMY

117A. Gross & Regional Anatomy. (2) F. Prerequisite: Admission to the School of Dentistry. Lecture 2 hours.

The gross structure and developmental anatomy of the thorax and abdominal regions are studied by means of lectures. The functional significance of the structures is emphasized. STOMATOLOGY

117B. Head & Neck Anatomy. (4) W. Prerequisite: First-year Dentistry standing. Lecture 2 hours. Lab 6 hours.

The gross anatomy of the head and neck is studied by lectures and dissection. Clinical applications and functions of importance to the dentist are emphasized. STOMATOLOGY

117C. Neuroanatomy. (2) W. Prerequisite: First-year Dentistry standing. Lecture 1 hour. Lab 3 hours.

The gross anatomy of the head and neck is studied by lectures and dissection. Clinical applications and functions of importance to the dentist are emphasized. STOMATOLOGY
The structure and function of the nervous system studied by means of lectures, laboratory exercises, and demonstrations. STOMATOLOGY

118. General Histology. (3) § F. Lecture 2 hours. Lab 3 hours. R. H. Kramer

The microscopic structure of tissues and organs of the body is studied in relationship to their histophysiological considerations. STOMATOLOGY

150.01. Gross & Regional Anatomy. (1½ per week) § Su, F, Sp. Prerequisite: Program must be approved by department and adviser during quarter previous to enrollment. Asling

Individual or group dissection; advanced review of gross anatomy. Intended as a block elective course for advanced medical or graduate students. ANATOMY

156A. Gross & Regional Anatomy. (3) F. Prerequisite: Admission to Dental Hygiene curriculum, School of Dentistry. Lecture 1 hour. Lab 6 hours. Fisher

The gross structure of the thorax and abdominal regions studied by means of lectures and demonstration with reference to the functional aspects of the structures studied. STOMATOLOGY

156B. Head & Neck Anatomy. (3) W. Prerequisite: Dental Hygiene students. Lecture 2 hours. Lab 3 hours. Fisher

The gross anatomy of the head and neck is studied by lectures and demonstrations. Clinical applications and functions of importance to the dental hygienist are emphasized. STOMATOLOGY

156C. Neuroanatomy. (2) W. Prerequisite: Dental Hygiene standing. Lecture 1 hour. Lab 3 hours. Fisher

The structure and function of the nervous system studied by means of lectures, laboratory exercises, and demonstrations. STOMATOLOGY

170. Advanced Head & Neck Anatomy. (1-5) Sp. Prerequisite: General histology; gross anatomy of the head and neck, and oral histology. Lecture 1 hour. Lab 6-12 hours. R. D. Coleman

Designed for postgraduate specialty certificate students enrolled in the clinical specialty training programs in the School of Dentistry. Seminar presentation and demonstrations of head and neck anatomy are correlated with their application to clinical dentistry. STOMATOLOGY

170.01. Problem Areas in Clin Anatomy. (1) Su, F, W. Prerequisite: Anatomy 100 or concurrent enrollment. First-year standing in School of Medicine. Lindner

Discussion of important areas in clinical anatomy such as hernia, thyroid, perineum, and peritoneal cavity. Course is correlated with Anatomy 100. ANATOMY

170.02. Survey of Congenital Defects. (2) W. Prerequisite: Gross anatomy and consent of instructor. Lecture 2 hours. Monie

This course is designed to provide physical therapists with information on the more common human congenital defects. Environmental and genetic factors that produce malformations are considered and possible mechanisms discussed. ANATOMY

170.04. Applied Gross Neuroanatomy. (1) W. Sp. Prerequisite: Anatomy 100B or concurrent enrollment, or consent of instructor. Lecture 1 hour. deGroot

Normal and abnormal neuroanatomy will be discussed in terms of neuroradiologic images and clinical correlation. ANATOMY

170.05. Abnormal Gross/Neuroanatomy. (1) Sp. Prerequisite: Anatomy 105 or concurrent enrollment. Medical student standing. Seminar 1 hour. deGroot

Abnormal changes in gross/neuroanatomy will be discussed in terms of clinical correlation and neuroradiological diagnostic methods. ANATOMY

Living clinical anatomy is stressed; the diaphragm, complete review of the neck, and abdominal contents. Clinical congenital anomalies are discussed in detail regarding their relationship to clinical medicine. ANATOMY

170.09. Language of Anatomy. (1) § Su, F, W. Prerequisite: Concurrent enrollment in Anatomy 100. Lecture 1 hour. Asling

A three-component elective, fostering vocabulary building in anatomico-medical terminology, reflecting history of medical and cultural themes influencing development of anatomical nomenclature, and through student oral reports on eponymous terms, introducing some major figures in anatomy. ANATOMY

171. Applied Anatomy. (1½) Sp. Prerequisite: Enrollment in postgraduate specialty program. Lecture ½ hour. Lab 3 hours. Ryder

Course covers anatomy as it relates to anesthesia and periodontal surgery. STOMATOLOGY

172. Clin Anat through Cross-Section. (2) § Sp. Prerequisite: Anatomy 100. Not open to first-year medical students. Lecture 1 hour. Lab 3 hours. Asling

Clinically oriented survey of human anatomy through analysis of representative cross-sections of the body. Course provides an anatomical background for understanding computed tomograms. Student will prepare and keep an anatomy atlas usable in radiologic tomography. ANATOMY

198. Supervised Study. (1-5) § Su, F, W, Sp. Staff
204. Cytogenetic Techniques. (3) § Sp. Prerequisite: Consent of instructor. Lab 6 hours. **S. Wolff**

Course covers instruction in various methods of chromosome banding as well as cell cycle analysis by autoradiography. ANATOMY

217. Adv Head & Neck Anatomy for Dent. (2-6) § Sp. Prerequisite: Anatomy 117A-B or equivalent and consent of instructor. Lecture 2 hours. Lab 0-12 hours. **R. D. Coleman**

A critical analysis of selected topics and methods in head and neck anatomy. Topics are correlated with appropriate laboratory experience and are presented by students, staff, and guests. STOMATOLOGY

220. Anatomy Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. **Staff**

Students, staff, or guests present selected topics concerned with current research in anatomy for criticism and discussion. ANATOMY

225. Experimental Neuroanatomy. (4) § SS1, SS2. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 6 hours. Lecture and lab full time for 2 weeks. Offered in alternate years. Not offered 1986-87. **M. LaVall, Ralston, J. LaVall, Basbaum**

Lectures and laboratory projects on the principles and experimental methods of analyzing the neural organization of the central and peripheral nervous systems. Topics include neurocytology, axon transport, neural degeneration, immunocytochemistry, autoradiography, electron microscopy, quantitative data acquisition methods, and photomicrography. ANATOMY

230. Developmental Biology. (4½) § F Prerequisite: Biochemistry 245 and 246 or consent of instructor. Lecture 3 hours. Conference 1½ hours. **Ordahl, Pedersen, Martin**

Principles of development presented with an emphasis on cell and molecular research approaches. Topics to be included are early development, cell-cell interactions, and terminal differentiation. Lectures and student discussions of current and classical research approaches. ANATOMY

231. Devol of Cellular & Molec Biol. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Offered in alternate years. Offered 1986-87. **Calarco**

Molecular and cellular events relating to differentiation and development. A variety of developmental phenomena will be surveyed and related, where possible, to genetic and epigenetic control mechanisms. ANATOMY

233. Mammalian Chimeras & Mosaics. (2) § Sp. Prerequisite: Anatomy 205 or consent of instructor. Lecture 2 hours. Offered in alternate years. Offered 1986-87. **Pedersen**

Course focuses on procedures for producing mammalian chimeras and the use of chimeras in analysis of development. Topics to be covered include analysis of parthenogenesis, cell commitment, differentiation, growth control, neoplasia, germ cells, and reproduction. ANATOMY

235. Developmental Neurobiology. (1-3) § W. Prerequisite: Consent of instructor. Lecture 1-3 hours. Offered every three years. Not offered 1986-87. **J. LaVall, M. LaVall, L. Reichardt**

Principles involved in the structural and functional development of the nervous system as well as detailed consideration of the development of several specific regions of the mammalian central nervous system. Lectures, student presentations, and discussions of classical and current literature. ANATOMY

250. Research. (1-8) § F, W, Sp. **Staff**

ANATOMY

275. Biolog Scanning Electron Micros. (1) § W. Prerequisite: Consent of instructor.
Lecture 1 hour. Lab 2 hours for three sessions. Enrollment limited. **J. Long and Staff**

Principles of scanning electron microscopy including tissue preparative techniques and applications. Laboratory sessions include participation in preparing and viewing biological specimens. ANATOMY

**298. Thesis.** (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. **Staff**

For graduate students engaged in writing the thesis for the master's degree. ANATOMY

**299. Dissertation.** (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. **Staff**

For graduate students engaged in writing the dissertation for the Ph.D. degree. ANATOMY

**300. Practicum in Teaching.** (1-4) § F, W, Sp. Prerequisite: Consent of instructor. **Staff**

Training in teaching in a course offered by the Department of Anatomy under the supervision of instructor in charge. Laboratory teaching, presentation of lecture material, experience in setting up and correcting of examinations, and participation in course are included. ANATOMY

**400. Clin Anat through Cross-Section.** (2) Su, Sp. Prerequisite: Open to house staff members of UC hospitals. Lecture 1 hour. Lab 3 hours. **Asling, Ross**

Clinically oriented survey of human anatomy through analysis of representative sections of the body. Course provides an anatomical background for understanding computed tomograms. Student will prepare and keep an anatomy atlas usable in radiologic tomography. ANATOMY

**Anesthesia**

**110. Anesthesia Core Clerkship.** (3) Su, F, W, Sp. Prerequisite: Medicine 130, 131A-B, C, Physiology 100, Pharmacology 100A-B, and Psychiatry 130. **Staff**

Instruction and experience in operating room anesthesia including preoperative and postoperative evaluation and care. Cardiopulmonary resuscitation and care of the unconscious patient are stressed. The course is given at SFGH, UC, VA, C, FR, and AB hospitals. ANESTHESIA

**140.01. Advanced Anesthesia Clerkship.** (1½ per week) Su, F, W, Sp. Prerequisite: Anesthesia 110. **Bogetz**

Instruction and experience in cardiopulmonary resuscitation, care of the unconscious patient, and treatment of pain problems. Rotation through UC, SFGH, and VA. Attendance at the teaching conferences of the department. ANESTHESIA

**140.02. Off-Campus Clerkship.** (1½ per week) Su, F, W, Sp. Prerequisite: Anesthesia 110. **R. D. Miller**

Clinical clerkships in approved hospitals by special arrangement and approval of the chairperson of the department. ANESTHESIA

**140.03A. Intensive Care Clerkship—SFGH.** (1½ per week) Su, F, W, Sp. Prerequisite: Anesthesiology 110, Medicine 110, and Surgery 110. **Schlobohm, Luce, Katz, Schecter**

Clinical clerkship on techniques of intensive care with primary emphasis on respiratory, cardiovascular, and renal pathophysiology. Patient population includes adult and pediatric patients with medical and surgical illnesses, a significant percentage of which have undergone cardiac surgery. ANESTHESIA

**140.03B. Intensive Care Clerkship—UC.** (1½ per week) Su, F, W, Sp. Prerequisite: Anesthesiology 110, Medicine 110, and Surgery 110. **Cohen, Mathay**

Clinical clerkship on techniques of intensive care with primary emphasis on respiratory, cardiovascular, and renal pathophysiology. Patient population includes adult and pediatric patients with medical and surgical illnesses, a significant percentage of which have undergone cardiac surgery. ANESTHESIA

140.04. **Anesthesia Obstetrical Clerkship.** (1½ per week) Su, F, W. Prerequisite: Anesthesiology 110, Obstetrics and Gynecology 110, and consent of instructor. **Shneider**

Course covers anesthesia and analgesia for vaginal delivery and cesarean section. Emphasis is placed on effects of anesthetic techniques and drugs on normal physiologic changes in labor and delivery, placental transfer of drugs, and resuscitation of the newborn. ANESTHESIA

160.01. **Basic CPR.** (½) F, W, Sp. Lecture 1 hour. Lab 2 hours. **Cohen, Cahalan, Strong**

Two-week CPR skills course training students in basic life support skills; cardiac compression and ventilation, management of airway obstruction, and assessment of need to initiate or terminate CPR. Sessions include presentations by Anesthesiology faculty and skills practice for students. ANESTHESIA

178. **General Anesthesiology.** (6) Sp. Prerequisite: Interns and residents. **Cohen and Staff**

Course covers the systemic effects of the various muscle relaxants, sedatives, and stimulants and the administration of general anesthetic agents. ANESTHESIA

199. **Laboratory Project.** (1-5) Su, F, W, Sp. **Eger**

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. ANESTHESIA

400. **Anesthesia Staff Conference.** (2) F, W, Sp. **R. D. Miller**

Course includes didactic lectures in sciences basic to the specialty of anesthesiology, as well as case reviews, clinical discussions, and

R. D. Miller
Residents are responsible for anesthetic care and management of patients in the operating rooms and outpatient departments, under immediate supervision of the staff. Preoperative and postoperative evaluation of patients, oxygen therapy, and resuscitation are covered.

460. Special Assignment. (1½ per week) Su, F, W, Sp. Elective for residents during either second or third year.

UC Eger
Assignments include instruction in anesthesia for children, problems related to open heart surgery, cardiology, and opportunities for research in related fields.

Animal Science

165. Principles of Lab Animal Science. (2) F. Lecture 1 hour. Lab 3 hours. Spinelli
Course covers the proper use of laboratory animals in a research environment, the humane use of laboratory animals, federal and state laws, use of anesthetics, selection of biological models, zoonotic infections, and data regarding the use of common laboratory animal species.

166. Principles of Lab Animal Science. (1) W. Prerequisite: Animal Science 165. Lab 3 hours.

Lectures and laboratories on proper surgical techniques and a lecture on appropriate post-surgical care of laboratory animals.

Anthropology

200. Off-Campus Study. (0) § F, W, Sp. Prerequisite: Approval of the graduate adviser.

Open only to students enrolled in the graduate program in Medical Anthropology.

Staff
Full-time graduate study in the Medical Anthropology program through the intercampus exchange or consortium program. EPID INTL HLTH

205A-B. Intro to Sociocultural Aspects. (3-4, 3-4) § F, W. Prerequisite: Intended primarily for doctoral students in medical anthropology, and others at graduate standing with consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Required for and open only to first-year students in the UCSF Ph.D. Program in Medical Anthropology. Two-quarter course. Clark
Seminar in the history and theory of social anthropology as applied to problems of health and illness. Major concepts and problems will be illustrated through critical review of selected research literature. EPID INTL HLTH

206A-B. Intro to Biomedical Anthropology. (3-4, 3-4) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Open only to first-year students in the intercampus Program in Medical Anthropology. Required for students in the UCSF Ph.D. Program in Medical Anthropology. F. Dunn (F), Flander (W)
Survey of the biocultural areas of medical anthropology, anthropology in relationship to biomedicine and human biology. EPID INTL HLTH

211A-B-C. Research Training Seminar. (3-4, 3-4, 3-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours, plus 3 hours independent study for 4 units. Required for and open only to first-year students in the UCSF Ph.D. Program in Medical Anthropology. M. Clark, Ablon, McClain
Fundamentals of anthropological research design and methods through lectures, readings and field assignments. EPID INTL HLTH

212A-B-C. Research Apprenticeship. (2-5, 2-5, 2-5) § F, W, Sp. Prerequisite: Consent of instructor. Lab 6-15 hours.

Staff
Students work with individual faculty members in ongoing research projects. Each student will work on supervised data collection and analytical tasks, and a broader range of research activities, such as problem formulation, grant preparation, sampling, and research design and execution. EPID INTL HLTH

Review of theoretical and methodological literature on anthropological life histories and the uses of life history materials. Classic life histories and newer works will be read and examined for the methodologies and analyses utilized. EPID INTL HLTH

216. Research Design. (3) § F, W. Lecture 2 hours. Lab 3 hours.

Nyddegger
Workshop format, utilizing student research interests. Topics include model building, problem formulation; design of research strategies; evaluation of sampling methods; operationalization of concepts; special problems for qualitative data. Course is preparatory for anthropological statistics. EPID INTL HLTH

Mitteness
Introduction to statistical methods for the social sciences: measurement, selected data characteristics, probability theory, statistical models, descriptive statistics, the general linear model, analysis of qualitative data. Emphasis is on understanding fundamental assumptions and procedures of statistical methods relevant to anthropology. EPID INTL HLTH

218. Computer Methods. (3-4) § Sp. Lecture 3 hours. Lab 0-3 hours.

Staff
An introduction to data processing methods most commonly used by medical anthro-
Anthropology 49

220. Departmental Seminar. (0) § F, W. Prerequisite: Consent of instructor. Lecture 1 hour. Staff

Students, staff, or guest lecturers present selected topics based on their current work. EPID INTL HLTH

221A-B. History & Theory of Anthropology. (3-3) § F, W. Prerequisite: Consent of instructor. Generally limited to students in anthropology. Lecture 3 hours. Staff

A review of the history and development of anthropology and its major theoretical approaches. Lectures, discussion, and readings focus on major issues, trends, personalities, and present concerns in the field. EPID INTL HLTH

222A-B-C. Writing Skills. (1-3, 1-3, 1-3) § F, W. Prerequisite: Open to Medical Anthropology graduate students only. Lecture 1-3 hours. Course may be repeated for credit. Staff

Students submit papers for editorial comments and advice on style, organization, grammar, syntax, and proper scholarly form. Course includes lectures, informal group discussions on problems encountered in writing papers, and some assigned and recommended readings. EPID INTL HLTH

223. Social Network Analysis. (3) § F, W. Sp. Prerequisite: Consent of instructors. Lecture 2 hours. Independent study 3 hours. Staff

Examination of origins and development of network analysis and the uses to which it has been put, particularly in urban anthropological research; methods and measures for gathering and analyzing network data; applications of network analysis to health and illness behavior. EPID INTL HLTH

225. Contemporary Issues. (2-4) § F, W. Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units. M. Clark

Introduction to selected controversies and current issues in medical anthropology, including sociolinguistics, sociocultural impact of high technology medicine; abortion, euthanasia and the right to life; status of research on the etiology of mental disorders; advocacy, praxis and the social scientist. EPID INTL HLTH

Examination of social attributes of stigma to such conditions as deafness, alcoholism, obesity, dwarfism, mental and physical disabilities. Self-help groups organized around such conditions will be examined. Guest speakers who have experienced these conditions will contribute to the course. EPID INTL HLTH

227. Community Resources for Health & Mental Health. (3-4) § Sp. Seminar 2-3 hours. Variable field observations. Ablon

This course will survey the range and categories of indigenous community resources for health and mental health. Informal and formal community organizations, therapeutic self-help groups, voluntary associations, and alternative healing modalities will be analyzed for their functions as health and mental health resources. EPID INTL HLTH

230. Culture & Personality. (2-3) § F. Prerequisite: Anthropology 230A or equivalent, or consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units. Staff

Exploration of the relationship between culturally conditioned ways of perceiving, thinking, and communicating, and individual behavior and personality development. Application of cultural and personality findings in medical and nursing settings. EPID INTL HLTH

231. Ethnopsychiatry. (2-3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units. M. Clark, Hartog, Maduro

Course examines principles of healing systems in the treatment of mental disorder including folk healing, cross-cultural comparisons, research methods, and implications for community psychiatry. Students study local examples of folk healers or folk healing institutions. EPID INTL HLTH

233. Anthropology of Aging. (2-3) § F, W. Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus research project for 3 units. J. Kaufman

Cross-cultural approaches to roles, statuses, and problems of aged populations. Cultural factors influencing the condition and adaptation of the aged in American society. Topics to be covered include cultural attitudes and values, social relationships, and health problems. EPID INTL HLTH

234. Culture & Symbolic Systems. (2-3) § F. Prerequisite: Anthropology 230A or equivalent, or consent of instructor. Lecture 2 hours, plus 3 hours independent study for 3 units. Staff

Symbolic expressive behavior is considered from psychocultural life-cycle and psychosocial perspectives. Various projective systems are analyzed: psychological tests, dreams, folklore, myths, religious rituals, altered states of consciousness, and healing procedures. EPID INTL HLTH

235. Transcult Aspects of Childhood. (2) § F. Prerequisite: Consent of instructor. Open to students in medicine, nursing and graduate departments. Lecture 2 hours, plus research paper. M. Kieser

Mentality
Review of child development, child rearing and family dynamics in various non-Western...
234. Shamanism & Related Phenomena. (3) § F, W. Prerequisite: Consent of instructor. Lecture 4 hours. Staff

A cross-cultural survey of the practice of shamanism with emphasis on management of disease. Beliefs and practices concerning disease causation, diagnosis, and therapy will be compared with approaches used in other medical systems. Comparison of shamanistic use of trance. EPID INTL. HLTH

235. Comparative Medical Systems. (2-3) § Sp. Prerequisite: Consent of instructor. Lecture 2-3 hours. McAlin

Popular medicine in the Third World with emphasis on how people use indigenous and biomedical health care resources. Theories of health and disease, social and symbolic dimensions of healing, and relevance of traditional medicine for health maintenance and primary health care. EPID INTL. HLTH

236. Development in Late Adulthood. (3) § F, W, Sp. Lecture 2 hours. Lab 3 hours. Kayser-Jones

Course covers developmental theory and research in aging. Emphasis is on anthropological and sociological studies, but biological and psychological perspectives are included. Current issues in aging with emphasis on implications for health care are discussed. EPID INTL. HLTH

240. Urban Anthropology. (2-3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 hours independent study for 5 units. Abson

The culture of modern cities. Evaluation of theories and methods for understanding urban behavior. Ethnic, racial, and subspecialized in modern cities. The relevance of anthropological concepts for health planning. EPID INTL. HLTH

245. Research. (1-8) § F, W. Prerequisite: Consent of instructor. Staff

Research in anthropology. EPID INTL. HLTH

250. Sociology of Health & Illness. (2-4) § W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus 3 or 6 hours independent study for 3 or 4 units. Johnson

An overview of the sociological, empirical, and applied literature on the social processes of aging in this country. Special emphasis on health-related problems and the delivery of services to the elderly. EPID INTL. HLTH

252. Class, Culture & Health Policy. (3) § W. Seminar 3 hours. Mitchell

Combining the perspectives of anthropology and health policy, the course will examine the effect of culturally-linked beliefs and values on utilization of health services and the impact of health policies on medical care for low-income populations in the United States. EPID INTL. HLTH

260. Biocultural Perspectives on Growth & Development. (1) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours. Forsyth

Examination of the human growth process with emphasis on cellular growth and differentiation; biochemical basis of the growth process; critical periods of growth—fertilization, implantation, prenatal development, birth, early postnatal development, adolescence, senescence; and developmental adaptation and racial differences in growth. EPID INTL. HLTH
267. Nutritional Anthropology. (2-3) § F, W or Sp. Prerequisite: Consent of instructor. Lecture 2 hours, plus research paper for 3 units.
C. S. Wilson
Survey of past and current research on sociocultural and biocultural aspects of diet and nutrition in developed and developing countries in lecture-seminar format. Methodology for nutritional anthropology field studies will be presented. EPID INTL HLTH

297. Special Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor.
Independent study. EPID INTL HLTH

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.
For graduate students engaged in writing the dissertation for the Ph.D. degree. EPID INTL HLTH

Biochemistry

100A-B. Cellular Structure & Function. (5-5) § F, W. Prerequisite: Consent of instructor.
Lectures and conferences in biochemistry and molecular biology presenting fundamental knowledge and illustrating its applicability to medicine. Primarily for medical students. BIOCHEM

Lectures in biochemistry include aspects of cell physiology and cellular ultrastructure, with emphasis in the area of connective and mineralizing tissues. Fundamental knowledge is presented in the contest of its applicability to clinical health sciences. Primarily for dental students. BIOCHEM

Lectures and conferences in biochemistry including aspects of cell physiology and cellular ultrastructure, with some emphasis in the area of drug metabolism. BIOCHEM

150.01. Research in Biochemistry. (1½ per week) § F, W, Sp. Prerequisite: Consent of instructor.
Research in biochemistry. BIOCHEM

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. BIOCHEM

199. Laboratory Project. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor.
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. BIOCHEM

200A. Structure of Macromolecules. (3) § Sp. Prerequisite: Calculus, physical chemistry, organic chemistry, and an advanced course in biology. Lecture 3 hours. Stroud and Staff
Fundamental principles governing the behavior of, and modern techniques for study of biological macromolecules. Topics covered include thermodynamics (entropy, equilibrium, cooperative interactions). Kinetics and catalysis: structure and function of macromolecules—DNA, membranes, proteins by X-ray and electron optics. Kinetics and structure of cooperative enzymes and systems of biological control. BIOCHEM

200B. Light & Electron Microscopy. (1½) § Sp. Prerequisite: Calculus, physical chemistry, organic chemistry; and an advanced course in biology are highly desirable. Lecture 2 hours. Lab 3 hours. Offered in alternate years. Sedat, Agard

BIOCHEM

200C. Chromosome Structure & Function. (1½) § Sp. Prerequisite: Calculus, physical chemistry, organic chemistry, and an advanced course in biology are recommended. Lecture 3 hours for one-half quarter. Sedat
Structure and function of chromosomes in eukaryotes will be discussed in depth, beginning with basic underlying experiments and leading to the most recent proposals for structure. Emphasizes both theoretical and experimental approaches to this area of cell and molecular biology. BIOCHEM

200E. Enzymology. (3) § F. Prerequisite: Calculus, physical chemistry, organic chemistry, introductory biochemistry, and an advanced course in biology, or consent of instructor. Lecture 3 hours. Offered in alternate years. Offered 1986-87. Santi, Kenyon
Biochemically important chemical transformations from the physical organic point of view, emphasizing catalytic mechanisms pertinent to enzyme reactions, and to the development of enzyme model systems. Intermolecular forces and enzyme substrate interactions. Techniques of investigating enzyme mechanisms and kinetics. BIOCHEM

201A-B. Biological Regulatory Mechanisms. (1½, 3) § F, W. Prerequisite: Calculus, physical chemistry, organic chemistry, introductory biochemistry and an advanced course in biology. Lecture 3 hours. O’Farrell and Staff
Discussion of the discovery of principles forming the foundation of molecular biology and recent advances in rapidly developing areas of the field. Topics covered include RNA transcription, protein translation, DNA
Presentations of selected topics in biochemistry by graduate students in the Department of Biochemistry. BIOCHEM

240. Macromolecule Struct & Dynamics. (2) § W Prerequisite: Consent of instructor. Lecture 2 hours. Offered in alternate years. Offered 1986-87. A. R. Cooke, Stroud

Consideration of the structure, dynamics and function of macromolecules along with a treatment of the methods used to probe aspects of molecular organization and dynamics. Emphasis will be on modern E.M., X-ray and fluorescence, and magnetic resonance methods. BIOCHEM

242. Protein Crystallography. (3) § W Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Offered in alternate years. Offered 1986-87. Stroud

Principles of X-ray crystallography applicable to protein structure analysis will be presented in a course oriented toward research level understanding of the field. Course will involve group participation and some experimental work. BIOCHEM

245. Cell & Developmental Biology. (3) § W Prerequisite: Calculus, physical chemistry, organic chemistry, and an advanced course in biology are recommended. Lecture 3 hours.

Modern aspects of the biochemical basis of cell biology and development will be examined with emphasis on spatial organization and morphogenesis. BIOCHEM

246. Cell & Developmental Biology. (3) § Sp Prerequisite: Calculus, physical chemistry, organic chemistry, and an advanced course in biology are recommended. Lecture 3 hours. Kirschner, Werb and Staff

Modern aspects of cell biology and development with emphasis on structure-function relationships and multicellular organization. BIOCHEM

Bioengineering

190. Diff Equations for Biomed Use. (3) § F Prerequisite: Introductory calculus. Lecture 3 hours. Glantz

Course covers description of biomedical processes such as cardiovascular physiology, pharmacokinetics, instrumentation with ordinary differential equations, direct methods to solve equations and interpret the results; linearity of exponential, natural logarithm, sine and cosine functions; eigenvalues, time constants, and half-times.

192. Laplace & Fourier Transforms. (3) § W Prerequisite: Bioengineering 190 or equivalent. Lecture 3 hours. Glantz

Course covers Laplace transform and numerical solutions of differential equations; Fourier transform and spectral analysis of biological signals; impulse, step, and frequency response; introduction to curve fitting; examples from pharmacokinetics and common laboratory instrumentation.

198. Supervised Study. (1-5) § F, W. Prerequisite: Consent of instructor and academic adviser. Staff
200. Off-Campus Study. (0) § F, W. Sp. Glantz

Full-time study in bioengineering at another location through the UCSF/UCB Graduate Group in Bioengineering.

210. Radioactivity Applications. (3) § Sp. Lecture 3 hours. Perez-Mendez

Basic physics of radioactivity and alpha, beta, gamma, and fission processes. Interactions of radiation with matter; basic radiation detectors for counting and determining energies of charged particles, neutrons, and gammas. Counting statistics and radiation protection. Applications in biology, chemistry, engineering.

221. Orthopaedic Mechanics & Materials. (2) § W. Lecture 2 hours. Skinner

This course is intended to introduce the student to the mechanics of several joints in the human body; to acquaint the student with common biomaterials (and their properties) used in orthopaedics, and to discuss these uses with respect to joint mechanics and joint displacement.

249. Group Studies. (1-8) § F, W, Sp. Prerequisite: Graduate standing. Staff

Advanced study in various subjects through seminars on topics to be selected each year, informal group studies of special problems, group participation in comprehensive design problems, or group research on complex problems for analysis and experimentation.

250. Research. (1-8) § F, W, Sp. Prerequisite: Graduate standing. Staff

280. Clin Aspects of Bioengineering. (2) § Sp. Prerequisite: Consent of instructor. Lecture 1½ hours. Lab 1½ hours. Litt

Aspects of bioengineering will be explored within the context of clinical realities. Important clinical issues relevant to bioengineering will be reviewed to help the student appreciate the potentials and pitfalls of contemporary technologies. The course will convene each week for one and one-half hours of lecture, and one and one-half hours of clinical and laboratory experience. Throughout the course there will be contact with scientists, physicians, nurses, technicians, and patients. The course will familiarize bioengineering students with clinical activities at UCSF and teach them to rapidly identify important medical issues that require advanced bioengineering support.

297. Special Study. (1-8) § S, F, W, Sp. Staff

Reading and conferences for properly qualified students under the direction of a member of the staff.

298. Thesis. (0) § S, F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the thesis for the master’s degree.

299. Dissertation. (0) § S, F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree.

Biomaterials

156. Dental Materials Survey. (1) Sp. Lecture 1 hour. Lab 1 hour. Bertolotti

An introduction for the dental hygienist to the basic concepts associated with selected dental materials. Emphasis is placed on the use and manipulation of materials commonly used in the practice of dentistry. RESTOR DENT

180. Algebra & Calculus for Biomed. (3) § Su. Prerequisite: Consent of instructor. Licko

Mathematical concepts and processes for planning, representation, and analysis in biomedical research. Review of algebraic operations, equations, matrices, and graphs. Introduction to functions, sequences, convergence, derivatives, integrals, and infinite series. Applications to growth, binding, enzyme kinetics, tracer studies, population dynamics. BIOCHEM

190. Biolog Modeling through Diff Eqn. (3) § F Prerequisite: Biomathematics 180 or equivalent. Lecture 2 hours. Lab 5 hours. Licko

Development of intuitive notions regarding differential equations. Quantitative and qualitative aspects of differential equations are explored by analog, digital, and analytic techniques. Applications to selected problems in compartmental analysis, enzyme and drug kinetics, and metabolic and biological control dynamics. BIOCHEM

193A-B. Adv Calculus & Diff Equations. (3-3-3) § F, W. Lecture 3 hours. Martinez

198. Supervised Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Martinez and Staff

Library research and directed reading under supervision of a member of the faculty with

1See Biochemistry 202 and 203.
Biophysics

200. Off-Campus Study. (0) § W. Prerequisite: Approval of the graduate advisor. Open only to students enrolled in the graduate program in Biophysics.

203. Mending Human Genes. (2) § W. Prerequisite: Admission to Biophysics group graduate program or other UC graduate program. Also open to postdoctoral students and other auditors. Lecture 2 hours.

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate advisor.

Biomathematics/Biophysics/Biostatistics

For graduate students engaged in writing the dissertation for the Ph.D. degree.

Biostatistics

183. Intro to Statistical Methods. (4) § Su, Sp. Lecture 4 hours. Hoffman, Glantz
Course stresses application of methods, including analysis of variance, simple linear regression, and simple chi-square tests. Intended for those who may need to use elementary statistics in their work; not as preparation for more advanced courses. EPID INTL HLTH

185A. Probability & Statistics. (4) F. Prerequisite: Working knowledge of algebra. Lecture 4 hours. Staff
Biostatistics 185A and 185B are conceptually oriented introduction and preparation course for more advanced work. Topics covered include roles of statistical ideas and methods, descriptive statistics, probability, random variables, sampling, estimation, confidence intervals, and hypothesis testing, primarily concerning population means. EPID INTL HLTH

185B. Probability & Statistics. (4) W. Lecture 4 hours. Staff
Continuation of Biostatistics 185A. Course covers one- and two-factor analysis of variance, linear regression analysis with one and two independent variables, elementary nonparametric methods, simple chi-square tests, and other topics. EPID INTL HLTH

198. Supervised Study. (1-5) Su, F, W, Sp. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. EPID INTL HLTH

201. Analysis of Qualitative Data. (3) § Sp. Prerequisite: Biostatistics 185A-B or equivalent. Lecture 3 hours. G. Fein
Course will focus on data analysis of studies in which summary statistics are rates and proportions. Topics include sample size, cross-sectional study design and analysis, prospective samples and misclassification errors. EPID INTL HLTH

210A. Regression Analysis & ANOVA. (4) § F. Prerequisite: Biostatistics 185A-B or equivalent. Lecture 3 hours. Lab 3 hours. Heilbron (even years), Hargreaves (odd years)
Course covers the uses of multivariable regression techniques, focusing on the choice of technique and interpretation of results rather than on mathematical development of the methods. Design of experiments is stressed with appropriate emphasis on power analysis. EPID INTL HLTH

210B. Regression Analysis & ANOVA. (4) § W. Lecture 3 hours. Lab 3 hours. Heilbron (odd years), Hargreaves (even years)
This course continues the material and approach of Biostatistics 210A. Topics include analysis of variance and covariance (primarily from a regression standpoint), repeated measures analysis of variance. EPID INTL HLTH

213. Multivariate Methods. (3) § Sp. Prerequisite: Biostatistics 210A and 210B or equivalent. Lecture 3 hours. Heilbron
Course covers classical multivariate methods such as canonical correlation, multivariate analysis of variance, principal components, and discriminant analysis. Emphasis is on application and interpretation of these procedures with real data. EPID INTL HLTH

220. Selected Topics. (2 or 3) § F, W, Sp. Lecture 2 or 3 hours. Staff
Course will cover topics such as statistical methods for failure time data; statistical epidemiology; logic and practice of scientific inquiry. EPID INTL HLTH
EPID INTL HLTH

270. Nonlinear Regression. (2) § Sp. Prerequisite: Biostatistics 210A or equivalent. Offered in alternate years. Offered 1985-86. Lecture 2 hours.
Beal
Nonlinear regression models. Maximum likelihood, least squares and robust parameter estimation methods. Numerical iterative techniques for implementation of these methods. Confidence sets and hypothesis tests. Examination of statistical asymptotic theory. Practice with analyzing actual data with computer programs. EPID INTL HLTH

Staff
Reading and conferences for qualified students under the direction of a member of the staff. EPID INTL HLTH

Chemistry

112. Intro to Organic Chemistry. (3) F, Sp. Prerequisite: Completion of 8 units of organic chemistry. Lecture 3 hours. Craig
Survey of basic organic chemistry—structure and reactivity; an introductory study of the nomenclature, stereochemistry, spectroscopy and reactions of the major organic compounds of carbon, including aromatic compounds. PHARM CHEM

113. Organic Chemistry. (3) F, Sp. Prerequisite: Chemistry 112 or passing grade in the Chemistry 112 equivalency examination. Lecture 3 hours.
Ketcham, Castagnoli
A continuation of the study of compounds of carbon including some aromatic, hydroaromatic, and heterocyclic compounds. PHARM CHEM

115. Physical Chemistry. (5) F Prerequisite: Chemistry 5 or equivalent laboratory course in quantitative analysis and differential and integral calculus. Lecture 4 hours. Conference and demonstration 3 hours. Shetlar
Elementary physical chemistry with emphasis on thermodynamics. PHARM CHEM

116. Physical Chemistry. (2) W. Prerequisite: Chemistry 115 or equivalent. Lecture 1½ hours. Conference and demonstration 1½ hours. T. James
Elementary physical chemistry with emphasis on chemical kinetics. PHARM CHEM

117. Organic Chemistry Laboratory. (2) F, Sp. Prerequisite: Chemistry 12, 16 and concurrent enrollment in Chemistry 113, or consent of instructor. Conference 1 hour. Lab 4 hours. Ketcham
Laboratory experiments in identification and quantification of organic substances. PHARM CHEM

151. Physical Chemistry. (1-3) Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Kutz
Selected topics at an introductory level, which vary from year to year. Past topics included structure of nucleic acid and proteins, quantum chemistry, and spectroscopy. PHARM CHEM

158. Physical Chemistry Laboratory. (1) Sp. Prerequisite: Chemistry 115 and 116. Lab 3 hours. Kutz
Laboratory exercises in spectroscopy. PHARM CHEM

160. Advanced Physical Chemistry. (3) § W. Prerequisite: Two quarters of physical chemistry or consent of instructor. Lecture 3 hours. Dill
Chemical thermodynamics. PHARM CHEM

161. Advanced Physical Chemistry. (3) § Sp. Prerequisite: Chemistry 116 or equivalent. Lecture 3 hours. Dill
Theory and applications of chemical kinetics. PHARM CHEM

162. Advanced Physical Chemistry. (4) § F Prerequisite: Chemistry 151 or equivalent. Knowledge of differential equations recommended. Lecture 4 hours. Dill
Quantum mechanics and applications to molecular problems. PHARM CHEM

165. Organic Chem-Analytical Meth. (4) § F. Prerequisite: Chemistry 113. Lecture 1 hour. Lab 9 hours. Ketcham
A study of the reactions of organic compounds by applying a system of qualitative analyses to the determination of characteristic groups. PHARM CHEM

198. Supervised Study. (1-5) F, W, Sp. Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

199. Laboratory Project. (1-5) F, W, Sp. Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARM CHEM

202. Advanced Organic Chemistry. (3) § F, Sp. Prerequisite: Chemistry 113, 116, and 165 or equivalent. Lecture 3 hours. Oppenheimer
A study of the detailed processes associated with organic reactions. PHARM CHEM

203. Advanced Organic Chemistry. (3) § W. Prerequisite: Chemistry 113, 115, and 165 recommended. Lecture 3 hours. Ortiz de Montellano
Physical organic chemistry; the structure of molecules and its relationship to mechanisms of reaction. PHARM CHEM

205. Advances in Synthetic Methods. (2) § F. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 2 hours. J. Craig
Recent advances in synthetic methods, comprising specific oxidizing agents, specific reducing agents, and other specific reagents. PHARM CHEM
208. Advanced Organic Chemistry. (3) §
Sp. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 3 hours.
Craig, Whitney
Terpenes and steroids. Occurrence, chemistry, stereochemistry and structure function relationships of natural products such as carotenoids, fat-soluble vitamins and steroids, and their precursors. PHARM CHEM

209. Chemistry of Heterocyclics. (3) §
Sp. Prerequisite: Chemistry 113 and 165 or equivalent. Lecture 3 hours.
J. Craig, Kenyon
A survey of the main nitrogen, oxygen, and sulfur-containing heterocycles. PHARM CHEM

Clinical Dentistry

Staff
Responsibility for patient dental care in the wards and comprehensive clinic under the direction of the attending staff. Dental consultations and treatment are coordinated with medical care. Residents take histories and perform physical examinations, laboratory tests, and dental treatment. STOMATOLOGY

Clinical Laboratory Science

200. Off-Campus Study. (0) § W. Prerequisite: Approval of the graduate adviser. Open only to students enrolled in the graduate program in Clinical Laboratory Science.
Staff
Full-time graduate study in the Clinical Laboratory Science program through the intercampus exchange or consortium program. LAB MED

201A-B-C. Clinical Chemistry. (2-2-2) § F, W, Sp. Prerequisite: Degree in Chemistry or Medical Technology license. Lecture 2 hours.
Nussbaum
Principles and evaluation of chemical laboratory methods used to diagnose abnormalities in metabolism and organ function. LAB MED

207. Enzymology. (2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours.
Staff
The fundamental concepts of enzyme kinetics are reviewed; enzyme measurement and automation; enzyme profiles in various diseases and specific enzyme methodology are presented. LAB MED

209. Quality Control. (2) § F, W, Sp. Prerequisite: Enrollment in Clinical Laboratory Science master's program.
Barr
A review of principles of statistics and their application to quality control in the clinical laboratory; legal aspects of quality control, preventive maintenance. LAB MED

210A-B. Clinical Pathology Seminar. (1-1) § F, W. Prerequisite: Consent of instructor. Seminar 1 hour.
Staff
Specialists on various established and proposed laboratory tests will present interpretation and evaluation of tests as related to pathophysiology. LAB MED

211. Laboratory Computer Applications. (2) § F, W, Sp. Prerequisite: Enrollment in Clinical Laboratory Science master's program. Lecture 2 hours.
Barr
Applications of computer science in collecting, storing, analyzing, and reporting data in a clinical laboratory. Statistical quality control methods will be discussed. Practical computer programming instruction and experience, using FORTRAN, will be stressed. LAB MED

215. Clinical Toxicology. (2) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours.
P. Reynolds, McKnie
Course introduces students to the implications as well as the systematic schemes and specific techniques of volatiles, acidic, neutral, and basic drugs, metals, and miscellaneous drugs and toxic agents encountered in clinical and forensic laboratories. LAB MED

216. Clinical Toxicology. (2) § F, W, Sp.
Prerequisite: Consent of instructor.
Nussbaum
Course is given as a three-week traineeship program in one of the most active toxicology laboratories in the Bay Area. LAB MED

Prerequisite: California Medical Technology license or the qualifications necessary to obtain that license. Lecture 2 hours.
Casavant
Course devoted to clinical immunology including testing and interpreting results leading to diagnosis of immunologic diseases; currently part of core curriculum offered to residents in Laboratory Medicine. Graduate students will be given lecture material, assigned reading, examination on immunologic testing. LAB MED

Prerequisite: Clinical Laboratory Science 209. Lecture 2 hours.
Beal
Course devoted to theoretical and practical aspects of quality assurance. The following topics will be discussed, in addition to a review of basic statistics: reference range computation, assay comparison, quality control methods, calibration. Current laboratory practices will be considered throughout. LAB MED

230A-B. Clinical Microbiology. (2-2) § A-
Hadley
Principles of clinical laboratory methods for diagnosis of infectious disease will be reviewed. Newer detection methods such as immunofluorescence, radioimmunoassay, gas chromatography will be examined. In vitro methods of susceptibility testing and assay of antimicrobials will be discussed. LAB MED
Clinical Pharmacy

110. Orientation. (2) F Conference and field observation 3-4 hours. 
   R. Levin
   An introduction to the scope of pharmaceutical practice including field trips to and participation in various settings where the pharmacist and patient interact. CL PHARM

130. Therapeutics. (6) F Prerequisite: Successful completion of all required first- and second-year courses or consent of instructor. Lecture 5 hours. Conference 2 hours.
   Koo, Kapusnik
   Orientation to selected areas of medical practice, the clinical evaluation and comparison of drugs used in these areas, and the bio-pharmaceutics of drug combinations and products. CL PHARM

131. Therapeutics. (6) W Prerequisite: Clinical Pharmacy 130 or consent of instructor. Lecture 5 hours. Conference 2 hours.
   L. J. Davis, L. Hart
   Continuation of Clinical Pharmacy 130. CL PHARM

132. Therapeutics. (7) Sp Prerequisite: Clinical Pharmacy 131 or consent of instructor. Lecture 6 hours. Conference 2 hours.
   Dong, Stagg
   Continuation of Clinical Pharmacy 131. CL PHARM

133. Nutrition. (3) Sp Prerequisite: Third-year standing. Lecture 3 hours.
   McSweeney
   Clinical aspects of nutrition in ambulatory and institutional practice with emphasis on special needs of different populations. Nutritional supplements, enteral and parenteral products will be discussed as they apply to these populations. CL PHARM

134. Topics in Pharmacy Administration. (2) Sp Prerequisite: Third- or fourth-year standing. Lecture 2 hours. 
   Kishi
   Survey of major world health problems, and programs and agencies concerned with their control. Relationships of pharmacy to topics such as emergency medical services, communicable diseases, nutrition, sanitation, occupational health, maternal and child hygiene, mental health, and public health administration. CL PHARM

135A. Drug Information Orientation. (1½) F, W, Sp. Prerequisite: Third-year standing. Concurrent or subsequent enrollment in Clinical Pharmacy 130, 131 or 132. L. Hart, L. J. Davis
   Orientation to clinical services including patient interview techniques and monitoring; training and actual experience in literature retrieval, analysis and dissemination of drug information. CL PHARM

   Continuation of Clinical Pharmacy 135A. CL PHARM

148A. Inpatient Clinical Clerkship. (9) F, W, Sp. Prerequisite: Successful completion of all first-, second-, and third-year courses and Clinical Pharmacy 130 series comprehensive examination. Clinic 40 hours per week for six weeks.
   Kayser and Staff
   Supervised clinical pharmacy experience in an inpatient setting. Students develop and explore their roles in an interdisciplinary health care team, take medication histories, monitor drug therapy, provide patient education, and research patients' specific drug information questions. CL PHARM

148B. Inpatient Clinical Clerkship. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 148A. Clinic 40 hours per week for six weeks.
   Kayser and Staff
   Continuation of Clinical Pharmacy 148A. CL PHARM

148.01A. Inpatient Clerkship—UCSD. (9) F, W, Sp. Prerequisite: Successful completion of all first-, second-, and third-year courses and Clinical Pharmacy 130 series comprehensive examination. Clinic 40 hours per week for six weeks.
   Adler and Staff
   Supervised clinical pharmacy experience in an inpatient setting. Students develop and explore their roles in an interdisciplinary health care team, take medication histories, monitor drug therapy, provide patient education, and research patients' specific drug information questions. CL PHARM

148.01B. Inpatient Clerkship—UCSD. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 148A. Clinic 40 hours per week for six weeks.
   Adler and Staff
   Continuation of Clinical Pharmacy 148.01A or Clinical Pharmacy 148A. CL PHARM

148.02A. Inpatient Clerkship—UC & MHLB. (9) F, W, Sp. Prerequisite: Successful completion of all first-, second-, and third-year courses and Clinical Pharmacy 130 series comprehensive examination. Shimomura and Staff
   Supervised clinical pharmacy experience in an inpatient setting. Students develop and explore their roles in an interdisciplinary health care team, take medication histories, monitor drug therapy, provide patient education, and research patients' specific drug information questions. CL PHARM

148.02B. Inpatient Clerkship—UC & MHLB. (9) F, W, Sp. Prerequisite: Clinical Pharmacy 148.02A. Shimomura and Staff
Continuation of Clinical Pharmacy 148.02A. CL PHARM

148.03A. Inpatient Clinical Clerkship–UCD. (9) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, 3rd year coursework and the comprehensive examination. Clinical 40 hours per week for 6 weeks. Sauer and Staff

Supervised clinical pharmacy experience in an inpatient setting. Students will develop and explore their roles in an interdisciplinary health care team, take medication histories, monitor drug therapy, provide patient education, and research patient-specific drug information questions. CL PHARM

148.03B. Inpatient Clinical Clerkship–UCD. (9) S, F, W, Sp. Prerequisite: Clinical Pharmacy 148.03A. Clinical 40 hours per week for 6 weeks. Sauer and Staff

A continuation of Clinical Pharmacy 148.03A. CL PHARM

149.01. Ambulatory Externship/Clerkship–UCSD. (13) F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd-year courses and Clinical Pharmacy 130 series comprehensive examination. Weibert and Staff

Supervised clinical experience in an outpatient setting. Students will develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy, and provide patient education. Experience in community pharmacies. CL PHARM

149.02A. Amb Externship/Clerkship–UC I & MHLB. (6½) F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd-, and 3rd-year courses and Clinical Pharmacy 130 series comprehensive examination. Shimomura and Staff

Supervised clinical experience in an outpatient setting. Students develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy, and provide patient education. Experience in community pharmacies. CL PHARM

149.02B. Amb Externship/Clerkship–UC I & MHLB. (6½) F, W, Sp. Prerequisite: Clinical Pharmacy 149.02A. Shimomura and Staff

Continuation of Clinical Pharmacy 149.02A. CL PHARM

149.03. Ambulatory Externship/Clerkship. (13) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd-year courses and comprehensive exam. Clinical 40 hours per week for 12 weeks. Sauer and Staff

Supervised clinical experience in an ambulatory care setting. Students develop and explore their roles in an interdisciplinary health team, take medication histories, monitor drug therapy and provide patient education. Experience in community pharmacies. CL PHARM

155.10. Pharmacy Systems. (3) F, W, Sp. Prerequisite: Third-year standing or higher. Lecture 1 hour. Conference and special project 6 hours. Herfindal

Orientation to inpatient and outpatient pharmacy systems. Projects in design, justification and implementation of distribution systems, such as unit dose, intravenous additive systems, computer applications, will be the major grading criteria. CL PHARM

155.20. Drug-Induced Disease Problems. (3) F, W, Sp. Prerequisite: Pathology 135. Third-year standing or higher. Lecture 2 hours. Special project 4 hours. Tong

The phenomena of iatrogenic diseases will be studied with major emphasis on their significance, pathology and management. Assessment of collection and analytic methods of adverse drug reaction information and evaluation of literature will be considered. Special projects will be assigned. CL PHARM

155.30. Infectious Diseases Topics. (3) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. Lecture and seminar 3 hours. Guglielmo

Course provides students with intensive, systematic approaches to management of patients with selected infectious diseases. Emphasis is on controversies in management. Infectious diseases in specialized circumstances also included. CL PHARM

Preceptorship for Clinical Pharmacy 110 conferences. One sophomore and one junior preceptor per conference will be responsible for conducting oral presentations. One senior per conference will be responsible for taking students on tours of clerkship sites. CL PHARM

155.50. Oncology Seminar. (2) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. Seminar 2 hours. Ignoffo

Discussion in detail of topics in oncology that focus upon the pharmacologic management of various neoplastic disorders or cancer-induced problems. CL PHARM

Course provides students with an overview of management and increases their awareness of major components of pharmacy services administration. CL PHARM

170. Group Studies. (1-4) F, W, Sp. Prerequisite: Consent of instructor. Staff
Group studies of selected topics in clinical pharmacy. CL PHARM

170.01. Geriatric Pharmacy. (2) F, W, Sp. Lecture 2 hours. Lipton
The medical and social problems associated with the geriatric population will be reviewed, with emphasis on the use of medications and the role of the pharmacist in providing care for this patient population. CL PHARM

170.08. Current Topics in Cancer. (2) Sp. Lecture 2 hours. Ignoffo
This interdisciplinary course is designed to provide a framework of concepts and skills about preventive medicine, focusing on cancer prevention. CL PHARM

170.60. Pharmacist & Critical Care. (1½) Sp. Prerequisite: 4th year standing and basic life support certification. Lecture 1 hour plus project. Kayser
This course provides an introduction to the basic principles of critical care pharmacology and therapeutics. CL PHARM

175.01. Inpatient Pediatrics—UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Bolinger
Students participate in the activities of the Inpatient Pediatric Service. Activities include routine review of patients' charts, monitoring patients' response to drug therapy; attendance at conferences, seminars and rounds; and participation in selected therapeutic consultations. CL PHARM

175.02. Renal Medicine—UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Gambertoglio
Students participate in the activities of the Renal Medicine Service, including patient monitoring, attendance at conferences, seminars and rounds, and application of pharmacokinetics to drug therapy. Where appropriate, students prepare detailed consultations regarding individual patient therapy. CL PHARM

175.03. Infectious Diseases—UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Guglielmo
Students review Infectious Disease Service therapeutic consultations and evaluate patients' response to recommended therapy by following chart records and by direct interviews. Students attend conferences, seminars and rounds. Special projects assigned. CL PHARM

Students participate in the clinical service of the Clinical Pharmacokinetics Laboratory. Course includes reviewing drug levels, selecting patients to be monitored, preparation and presentation of reports, attendance at seminars, and experience in leading one. CL PHARM

Students participate with pediatric staff dealing with problems frequently encountered in general pediatric medicine, in addition to those which affect children from low income, overcrowded and substandard conditions. Activities include rounds, conferences and participation in special projects. CL PHARM

175.22. Infectious Diseases—VA. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Winter, Damato, Jansen
Students gain experience on the Infectious Disease Consult Service. Activities include rounds, medication consultations and provision of pharmacokinetic monitoring. CL PHARM

Students observe, interview, evaluate drug therapy, interact with patients in acute phases of psychiatric disorders, accompany unit physicians to court, attend interdisciplinary team conferences, and make specific comments on drug therapy. CL PHARM

175.25. Inpatient Medicine—VA. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Winter, Nagata and Staff
Experience in various medical services at VA. Activities include interviewing patients, monitoring drug therapy, consultation with house staff, and participation in conferences, seminars and rounds. Special projects assigned. CL PHARM

175.26. Infectious Diseases—SFGH. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149 and consent of instructor. Kapusnik, Barriere, Mills
Students round with SFGH Infectious Diseases Consultation Service; evaluate antibiotic selection and monitor patients' therapy for efficacy and toxicity; serve as drug consultants to the medical staff on the service. (A special project relating to some aspect of infectious diseases and its therapy will be completed.) CL PHARM

175.27. Burn Unit—SFH. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132 and consent of instructor. Winter, Damato, Jansen
Students work in Burn Unit Satellite, monitoring patients' wound cultures, antibiotic therapy and drug serum levels, renal function, nutritional status and pain management. Student is involved with patient from surgical intervention through rehabilitation. CL PHARM 175.28. Inpatient Medicine—MM. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Winter, Chann

Experience in various medical services at a private community hospital. Students interview patients, monitor drug therapy, consult with house staff and nursing service, and prepare drug information reports appropriate to patient care. CL PHARM 175.30. Clinical Pharmacology—SFGH. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Olson

Students, in an interdisciplinary setting, assess problems relating to the selection, pharmacodynamics and therapeutic merits of drugs and drug products. Activities include participation in rounds and conferences, collaboration on selected consultations, and retrieval and evaluation of drug literature. CL PHARM 175.31. Clinical Pharmacology—S. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor.

Winter, Kondo

Students participate in the activities of the Division of Clinical Pharmacology. Activities include utilization of computerized patient drug profiles to monitor adverse drug reactions, and participation in conferences and seminars. Special projects assigned. CL PHARM 175.33. Inpatient Family Practice—SFGH. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A. Consent of instructor. Dong

Students participate in the activities of the Family Practice Inpatient Service. Students will be responsible for drug surveillance, drug monitoring, management consultations, and patient education. A minimum of two patient-specific drug consultations is required. CL PHARM 175.34. Psychopharmacology—AS. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and consent of instructor. Winter, Raleigh, O'Brien

Provides student opportunity to follow patients from admission until housed on treatment unit. Initial reasons for prescribing medication, acute illness, and in some cases, resolution of psychiatric symptoms will be observed by student. CL PHARM 175.37. Inpatient Psychiatry—VA. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A. Consent of instructor. Winter, Buffum, Liesenberg, Stefani

Students participate on the inpatient acute care psychiatric ward. Activities include monitoring and interviewing patients, participation in team meetings, conferences, and pharmacy medication classes, presenting in-service programs to psychiatric staff. CL PHARM 175.39. Oncology/Nutrition—STP. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and consent of instructor. Winter, Deans, Honda

Work on oncology unit monitoring patients on chemotherapy, nutrition support, pain control, and antibiotic therapy. Gain in-depth knowledge of role of clinical pharmacist in a private hospital oncology unit. CL PHARM 175.40. Thyroid—UC. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Dong

Students participate in the activities of the Thyroid Clinic, including patient monitoring, attendance at conferences and seminars. Work under supervision of the clinical pharmacists and physicians in the chronic management of selected patients. CL PHARM 175.41. Dermatology—UC. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132, and Pharmacy 155. Consent of instructor. McCart

Experience in various subspecialty areas in the Dermatology Clinic. Students take medication histories, and instruct patients on proper medication usage. They participate in conferences, seminars and rounds, and provide therapeutic consultations where appropriate. Special projects assigned. CL PHARM 175.42. Ob-Gyn—UC. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Winter, Ruggiero

Experience in various subspecialty areas in the Obstetrics and Gynecology Clinic. Students work with other health professionals and students in the clinic, participating in conferences and seminars. Prepare detailed consultations regarding drug therapy where appropriate. CL PHARM 175.43. Diabetes—UC. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. M. Kimble

Students participate in the activities of the Diabetes Clinic, including patient education, drug therapy consultation and management, and attendance at conferences and seminars. At option of student, a special project may be undertaken in addition to regular clinic activities. CL PHARM 175.44. Tropical Medicine—UC. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Koo

Students participate in the activities of the Tropical Medicine Clinic. Emphasis is placed on patient interviews and rational treatment of parasitic diseases. Special project is optional. CL PHARM 175.45. Anticoagulation—UC. (1-8) F, W. Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Kayser
Students participate in the activities of the Anticoagulation Clinic. Special project is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

175.46. Hematology/Oncology—UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Ignoffo

Students participate in the daily activities of the Hematology-Oncology and Oncology Clinics. Special project is required. CL PHARM

175.47. Rheumatology—UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. A. L. Leeds

Students participate in the activities of the Rheumatic Disease and/or Arthritis Clinics. Special project is required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

175.60. Ross Valley Pharmacy Clerkship. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor. Winter, Lofholm

Students interview patients, maintain medication records, explain medication usage to patients, and answer drug therapy questions generated by physicians, pharmacists and patients in a pharmacy located within a group medical practice. CL PHARM

175.61. Co-op Pharmacy Clerkship. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. Winter, Kamil, Olayos

Students take patient medication interviews, explain medication usage to patients, and answer drug therapy questions generated by physicians, pharmacists and patients in a community pharmacy setting. CL PHARM

Students work with the clinical pharmacist to evaluate psychiatric patients’ response to drug therapy, and present consultations reviewing overall patient therapeutic management in weekly seminars. CL PHARM

175.64. Haignt Heroin Detox Unit Clerksp. (1-8) F, W, Sp. Prerequisite: Consent of instructor. Winter, Inaba

Students work as cotherapists under the supervision of the clinical pharmacist and physicians to develop individual therapy plans for drug detoxification. Where needed, students develop detailed drug information reports appropriate to specific patient care. CL PHARM

Practical experience in a hospital-owned community pharmacy offering progressive patient-oriented services, including drug monitoring, establishment and maintenance of medical profiles, patient counseling, drug information and in-service education. CL PHARM

Students provide patient education and consultation to seniors and senior providers. Students will be able to utilize their skills, knowledge, and on-site training to prevent and intervene in geriatric drug misuse problems. CL PHARM

175.70. Skilled Nursing Facility Clerksp. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Winter, Nico, Rhoades

Students gain experience in both the skilled nursing facility and Pharmaceutical Services Pharmacy. Activities include evaluating drug therapy and other consultant roles in skilled nursing facility service, participation in unit dose medication system, and researching drug information. Special project required. CL PHARM

Students participate in IV fluid therapy selection and preparation, and monitor patients receiving intravenous medications. Conferences are held on topics related to problems in the use of intravenous fluid therapy in various disease states. CL PHARM

175.82. IV Additives Clerkship—VA. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. Winter, Kikutagawa

An introduction to the administrative, professional and technical aspects of establishing and maintaining IV additive service. Students will participate in workshops and conferences. CL PHARM

175.83. IV Additives & Unit Dose—VAM. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. Winter, Woo, J. Gee

Students participate in centralized IV admixture and unit dose systems of distribution, with involvement in the decentralized clinical activities, including patient profile reviews. CL PHARM

175.84. Drug Utilization Review—VAM. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Winter, Woo, J. Gee

Students participate in establishing and presenting the protocol for a drug utilization review. Students will complete the study dur-
ing the rotation, and present results to the physician and other disciplines involved. CL PHARM

175.87. Drug Utilization Review—UC (1-8) F, W. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor. WINTER, Hirschman, Forni Students observe and participate in a business professional environment to understand the role of such an organization in delivery of optimal, cost-effective health care. Special emphasis on delivery of pharmaceutical services. CL PHARM

175.94. Drug Information—UC (1-8) F, W. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor. WINTER, Tatro Participate in activities of drug information services, including answering drug-related questions, writing a newsletter and drug review. Work under supervision of the director for drug information. CL PHARM

176.01. Nephrology—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the Renal Consult Service, Hemodialysis Unit and in the Renal Clinic with the medical and nursing staff. A special project selected by the student will be required. CL PHARM

176.02. Pulmonary Medicine—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the activities of the Pulmonary Medicine Consult Service, Chest Clinic and Asthma Clinic associated with the Pulmonary Division at University Hospital. CL PHARM

176.03. Neonatal Care—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the nursery's morning work rounds, attending high risk infant transportation and delivery. Students will read and evaluate current neonatal literature, and provide drug-related information to medical staff and parents. CL PHARM

176.04. Pediatrics—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the activities of the Inpatient Pediatric Service. Activities include routine review of patients' charts, monitoring patients' response to drug therapy, attendance at conferences, seminars and rounds, and participation in selected therapeutic consultations. CL PHARM

176.05. Psychiatry—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the Inpatient Psychiatric Service. A special project will be required, the subject of which will be chosen by the student, with the consent of the preceptor. CL PHARM

176.40. Anticoagulation—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the services of the anticoagulation clinic at University Hospital under the guidance of a clinical pharmacist. CL PHARM

176.41. Hematology/Oncology—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the activities of the Hematology/Oncology Consultation Service. Activities include review of patients' charts, monitoring patients' response to drug therapy, attendance at conferences, seminars, rounds and clinics, participation in therapeutic consultations and a special project. CL PHARM

176.42. Hypertension—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the hypertension kiosk at an outpatient, six-week elective requiring students to become actively involved in one clinic day per week, as well as in one student-preceptor conference per week. CL PHARM

176.80. IV Additives & Fluid Ther—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER AND STAFF Students participate in the activities of the Intravenous Additive Service at University Hospital. A special project will be required, the subject of which will be chosen by the student, with the consent of the preceptor. CL PHARM

176.81. Poison Information—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. Manoguerra and STAFF Students participate in the services provided by the Poison Information Center for San Diego County, including receiving calls concerning ingestion of medicines, and seminars on the public and various school groups. CL PHARM

176.82. Anticoagulation—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER AND STAFF Students participate in the activities of the anticoagulation clinic at University Hospital. A special project will be required, the subject of which will be chosen by the student, with the consent of the preceptor. CL PHARM

176.83. Drug Information—UCSD (1-8) F, W. Prerequisite: Clinical Pharmacy 148A1A or 149A. D. ADLER, AND STAFF Students participate in the services provided by the Drug Information Service including Pro receiving drug information requests, reviewing and writing formal responses. CL PHARM

178.69. Skilled Patient Facility—Pharmacy (1-8) F, W. Prerequisite: Clinical Pharmacy 130, 131, and 132. Consent of instructor. Esparza, Menet Student participates in clinical and dispensing activities of pharmacy practice concerned with long-term care patients located within skilled nursing facilities throughout Sacrament area. CL PHARM

S. McCARTY 175.88. Unit Dose Systems—SMC (1-8) F, W. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. WINTER, Scarpone, Kahl Practical experience in a community hospital pharmacy unit dose system. Conferences are held on topics related to the principles and theory of the unit dose system, drug therapy problems encountered in monitoring and interprofessional relationships. CL PHARM

175.90. Drug Information Clerkship—UC (1-8) F, W. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. L. HART Advanced experience in drug information retrieval and analysis. Activities include participation in conferences, seminars and selecting teaching assignments in Clinical Pharmacy 135. Special projects assigned. CL PHARM

175.91. Drug Information Clerkship—All (1-8) F, W. Prerequisite: Clinical Pharmacy 130, 131, 132 and 135. Consent of instructor. WINTER, W. Lee AND STAFF Experience in collection, evaluation and dissemination of drug information in a community-based drug information service. Activities include answering drug information requests from community practitioners. CL PHARM
week, as well as in one student-preceptor conference per week. CL PHARM

176.80. IV Additives & Fluid Ther—UCSD. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01. D. Adler and Staff

Students participate in the activities of the Intravenous Additive Service at University Hospital. A special project will be required, the subject of which shall be chosen by the student, with the consent of the preceptor. CL PHARM

176.81. Poison Information—UCSD. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01. Manoguerra and Staff

Students participate in the services provided by the Poison Information Center for San Diego County, including receiving calls concerning ingestions and treatments, and seminars for the public and various school groups. CL PHARM

176.82. Anticoagulation—VAD. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01. D. Adler and Staff

Students participate in the services of the Anticoagulation Clinic under the guidance of a clinical pharmacist. CL PHARM

176.83. Drug Information—UCSD. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148.01A or 149.01. P. Anderson

Students participate in the services provided by the Drug Information Service including receiving drug information requests, researching and writing formal responses. CL PHARM

178.69. Skilled Nurs Facility—Pharmcare. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132 and consent of instructor. Sauer, Menet

Student participates in clinical and dispensing activities of pharmacy practice concerned with long-term care patients located within skilled nursing facilities throughout Sacramento area. CL PHARM

185.01. Clinical Pharmacy Practice. (0) S, F, W, Sp. Winter and Staff

Supervised clinical pharmacy experience. Students develop and explore their roles in an interdisciplinary health care team, take medication histories, monitor drug therapy, provide patient drug education, and research patients' specific drug information questions. CL PHARM

185.05. Oncology—UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. Ignoffo

Students attend work rounds, house staff management rounds and teaching conferences, learn techniques utilized in caring for patients with hematologic or solid tumors. Emphasis on acute care of cancer patient: anti-emetic and pain control; hyperalimentation; treatment of hypercalcemia and infections. Project. CL PHARM

185.06. Cardiothoracic Surgery—UC. (1-8) F, W, Sp. Prerequisite: Fourth-year standing and consent of instructor. Guglielmo

Students are responsible for patient interviewing, monitoring, rounds, and drug consultation. Patients are primarily pediatric with congenital heart defects and adults undergoing aorta-coronary bypass grafts and cardiac valve replacement. CL PHARM

185.07. Neonatal ICU—UC. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132 and consent of instructor. A. Wong

Participate in activities of Neonatal ICU, including patient monitoring, rounds, drug consultation, and utilization. Patients are primarily premature and newborn infants with congenital heart defects. Work under supervision of clinical pharmacist in management of these patients. CL PHARM

185.20. Vallejo General Hospital Clerkship. (1-8) S, F, W, Sp. Prerequisite: 4th year standing and CP 148 or 149. Hazlet and Winter

The clerkship stresses the integration of dispensing and clinical practice in a prime community hospital. Students will make daily didactic and/or patient presentations to pharmacy staff members. A project is required. CL PHARM

185.22. Pediatrics—CHMC. (1-8) S, F, W, Sp. Prerequisite: Completion of all 1st, 2nd, and 3rd year course work and consent of instructor. Winter, Lundergan, Rockwood

Students will participate in the activities of the In-Patient Pediatric Service at Children's Hospital, Oakland. Emphasis will be placed on the development of clinical skills in pediatric pharmacy, with a limited exposure to the development of essential administrative skills. CL PHARM

Students attend rounds, interview patients and take medical histories, monitor and evaluate drug therapy; anticipate and identify drug therapy problems, provide patient with specific information to health team members, provide drug and health information to patients, document clinical services. CL PHARM

Students work with clinical pharmacist in ICU, monitoring patient drug therapies throughout intensive illness course. Diseases of patients include acute failure of any physiologic system including cardiovascular, renal, hepatic, neurologic, and pulmonary. CL PHARM

185.32. Intensive Care—VAM. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A and/or consent of instructor. Winter, Woo, J. Gee
Attendance and participation in clinical activities in the Intensive Care Unit. Activities may include rounds with pulmonary, cardiology or surgical ICU teams, monitoring drug therapy, pharmacokinetic monitoring of selected medicines, and working with various health care professionals regarding medicine use and misuse. CL PHARM

185.35. Inpatient Psychiatry—VAM. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149A and 149B. Consent of instructor. Winter, Woo, J. Gee

Students participate in the activities of the Inpatient Psychiatry Service. Upon completion, students shall demonstrate the ability to function as a clinical pharmacist in an inpatient psychiatric setting. CL PHARM

Detoxification and management of alcoholism and poly-drug abuse. Emphasis on methods of acute detoxification and support services in rehabilitation of patients, including responsibilities of health care team members and consideration of physical and psychological consequences. CL PHARM

Participation in activities of the family planning clinic, including patient screening, education, evaluation, and dispensing of contraceptive methods and treatment therapies. Student will prepare a minimum of two patient education handouts. CL PHARM

185.66. Women's Health Center. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132 and consent of instructor. Winter, Inaba, Fox, Dillon

Students participate in functions of family planning gynecological clinic, including management and handling of pharmaceuticals, monitoring BCP users under NP supervision, and participating in special projects. CL PHARM

Students interview patients, monitor drug therapy, provide nursing inservice education, provide drug information consultations to physicians, and conduct drug utilization and adverse drug reaction studies. Students continuously document activities and findings and submit a written report. CL PHARM

Students gain experience managing medical problems of adult and adolescent patients at three jail sites; participate in daily clinic, medical screening, patient monitoring, conferences. Optional administrative or clinical project. CL PHARM

185.72. Center for Special Problems. (1-8) F, W, Sp. Prerequisite: Completion of Clinical Pharmacy 130, 131, 132 and consent of instructor. Winter, Leung

Students participate in the activities of an outpatient forensic mental health clinic including drug therapy monitoring, patient education and counseling, drug utilization reviews, medication clinics, medication groups, and inservice conferences. They will work under the supervision of faculty in the ongoing management of selected mentally disturbed criminal-justice patients. CL PHARM

185.73. SNF & Compu Science—Caron Corp. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. Winter, Caron

Students work under direct supervision of consultant pharmacist in skilled nursing facility patient care. Experience in computer science fundamentals relating to data screening, processing, and computer programming is also included. CL PHARM

185.79. ASCO Home Care Services. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132 and consent of instructor. Winter, Curtis

Students participate in home health care services, including fluid compounding, patient monitoring, multi-disciplinary meeting, interacting with nurses in the home setting, patients both pre and post discharge and with physicians in their office setting to become familiar with all aspects of home specialty care. CL PHARM

Students participate in selected areas of a home health care pharmacy, developing skills in the areas of TPN, enteral nutrition, and diabetic training. Opportunity for experience with drug requirements for spinal cord patients also available. CL PHARM

186.06. Clinical Pharmacokinetics—UCSD. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149 and/or consent of instructor. D. Adler, J. Lane

Discussion and review of pharmacokinetic principles in drug therapy relating to clinical cases at UCSD, including computer modeling, specific case studies, and lectures to medical and nursing staff. A special project is assigned. CL PHARM

186.07. Burn and Trauma Center—UCSD. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149 and/or consent of instructor. D. Adler, P. Anderson

Participation in activities of Burn Unit including patient drug therapy monitoring, developing antibiotic therapy dosing recom-
Medical Specialties—UCSD (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149. Consent of instructor.

D. Adler and Staff

Exploration of the potential service roles of clinical pharmacists in various medical specialty settings. CL PHARM

187.01. Oncology—MHLB. (1-8) W, Sp. Prerequisite: Clinical Pharmacy 148A or 149. Consent of instructor.

Shimomura, Diamant, Towne

General orientation to the most frequently occurring diseases of oncology and hematology. Emphasis on developing working knowledge of chemotherapeutic agents. Emphasis on application of chemotherapy to oncologic diseases, preparation and administration of agents, side effects and toxicity, applicable pharmacokinetic calculations. CL PHARM

187.02. Pharmacokinetics—MHLB. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 148A or 149. Consent of instructor. Shimomura, Harralson

Participation in all aspects of clinical pharmacokinetics service including information, consultations, and drug dosing regulations, under approved protocols. Involvement in analysis and evaluation of serum drug levels, particularly in patients with altered drug disposition. CL PHARM

187.03. Anticoagulation—MHLB. (1-8) W, Sp. Prerequisite: Clinical Pharmacy 148A and consent of instructor. Shimomura, R. Cook

Participation in application of heparin and warfarin guidelines, which involve dosage adjustment, clinical assessment, data collection, medical audit. Students learn about management of patients with thromboembolic diseases through conferences, selected readings and clinical participation. CL PHARM

Participation in patient care rounds, monitoring case presentations, pharmacokinetic evaluations, literature research, and CPR's in neonatal and pediatric patients. Major pediatric disease states and appropriate drug therapy will be reviewed daily. Six to ten hours of medical seminars each week. CL PHARM

187.05. Psychiatry—UCI. (1-8) W, Sp. Prerequisite: Fourth-year standing and consent of instructor. Shimomura, Plon

Active involvement with patients and staff in acute care mental health facility. Students interview, interact with, and monitor patients. Thorough background into various forms of mental disorders, treatment and role of pharmacist will be presented. CL PHARM

Students participate in activities of neonatal intensive care unit and inpatient pediatric services, monitoring patients, attending rounds and conferences. Emphasis will be on acute inpatient pediatric medicine and neonatology under supervision of pediatric clinical pharmacist and pediatricians. CL PHARM

Students participate in the activities of the Jules Stein Eye Institute, which include patient monitoring, attendance at conferences and seminars, and dispensing of ocular medications. Students work under the supervision of the pharmacist preceptor in learning the management of common diseases of the eye. CL PHARM

Students participate in activities of the emergency room and become familiar with the role of the pharmacist in this setting. Emphasis is on managing emergency conditions such as drug overdose, diabetic ketoacidosis, trauma, and cardiac arrhythmia. CL PHARM

Students observe and participate in activities of the pharmacy and developmental services at the hospital. Emphasis is on diagnosis and management of neurological and genetic diseases such as seizure disorders and mental retardation. CL PHARM

187.10. Long-Term Care Facilities. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131 and 132. Consent of instructor. Shimomura, Tobias

Students observe and participate in monitoring geriatric patients in several long-term care facilities. Students will gain appreciation of the role of the consultant pharmacist and learn how to adjust drug therapy and dosages for geriatric patients. CL PHARM

Students participate in rounds with clinical pharmacists. They are involved in monitoring TPN solutions, screening patients with positive culture results to assure appropriate antimicrobial selection and dosage, adjusting serum levels of selected agents. CL PHARM

Shimomura, Luna

Students exposed to psychopharmacology and participate in clinical pharmacy activities of a state psychiatric hospital, become familiar with federal and state regulations affecting pharmacy practice in skilled nursing, intermediate care, and acute psychiatric care facilities. CL PHARM

187.60. Home Care—Pharm Enterprises Inc. (1-8) F, W, Sp. Prerequisite: Clinical Pharmacy 130, 131, 132 and consent of instructor. Shimomura, Martinez, Henry

Students work with lake health care team in hospital, extended care facilities, and homes. Involved with monitoring total parenteral nutrition, chemotherapy, pain management, antibiotic therapy, and related services for home care patient. CL PHARM

Students will be provided the opportunity to develop the skills required to work in a drug information service, which includes organization and retrieval of drug information, drug literature evaluation, and effective verbal and written communication. CL PHARM

187.81. IV Additives—UCI. (1-8) F, W, Sp. Prerequisite: Fourth-year standing and consent of instructor. Shimomura, Ming

Students participate in the activities of an intravenous additive service in a large university teaching hospital. Students will learn about aseptic technique, compatibility and stability of drugs in intravenous solution, total parenteral nutrition, prefilled syringe programs, home hyperalimentation and piggybacks. CL PHARM

187.82. Drug Information—UCLA. (1-8) W, Sp. Prerequisite: Fourth-year standing and consent of instructor. Shimomura, Vrabel

An on-line experience in a drug information center serving a large multidisciplinary teaching hospital. Through a series of experience modules, in addition to day-to-day information requests received by the center, students will be expected to demonstrate competence in drug literature evaluation and drug information retrieval skills. CL PHARM

187.83. IV Additives—UCLA. (1-8) W, Sp. Prerequisite: Fourth-year standing and consent of instructor. Shimomura, Casselman

Clerkship provides an opportunity for students to develop and use skills relating to all areas of a centralized IV additive service. Students will make routine case presentations regarding patients receiving different types of intravenous therapy, including parenteral nutrition. CL PHARM

188.01. Oncology—UCD. (1-8) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd year course work and consent of instructor. Sauer and Staff

A supervised clinical pharmacy experience in inpatient and outpatient settings will allow students to develop skills in clinical pharmacy settings involved with oncology practice. Through observation and performance, students will develop and explore their roles as clinical pharmacists. CL PHARM

188.02. Psychiatric Medicine—UCD. (1-8) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd year course work. CP 148 or 149 and consent of instructor. Sauer and Staff

Students participate on the UCDMC Inpatient acute care psychiatric ward. Activities include monitoring and interviewing patients, participation in team medical rounding, conferences, and pharmacy medication classes. Students will also present inservice program(s) to the psychiatric staff and pharmacy staff. CL PHARM

188.03. Poison Information—UCD. (1-8) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd year course work, CP 148 or 149 and consent of instructor. Sauer and Staff

Students participate in poison control center activities, e.g., answering phone, poison histories, monitoring patients, and giving poison prevention talks for the public and health care professionals. CL PHARM

188.04. Neonatal Intensive Care—UCD. (1-8) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd year classes and consent of instructor. Sauer and Staff

Students will become members of Neonatal Intensive Care Team, attend rounds, conferences, monitor and evaluate drug therapy, and provide drug therapy-related consultation. CL PHARM

188.05. Medical Intensive Care—UCD. (1-8) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd year course work, CP 148, and consent of instructor. Sauer and Staff

The student will work with pharmacist in the Medical Intensive Care Unit (MICU) and satellite pharmacy providing both clinical and distributive pharmacy services. Students will be exposed to drug therapy as it relates to different disease states seen in the unit. CL PHARM

188.06. Surgical Intensive Care—UCD. (1-8) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd year course work, CP 148 or 149 and consent of instructor. Sauer and Staff

The student will be placed as a liaison from the Department of Pharmacy to the Surgical Intensive Care Unit. He/she, under the supervision of a pharmacist, will assume responsibility for the pharmacologic management of critically ill patients. CL PHARM
188.06. Gastroenterology/Clinical Nutrition—UCD. (1-8) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd year course work, CP 148 and consent of instructor. **Sauer and Staff.**

The clerkship affords the student an extensive experience in clinical pharmacy services to the Gastroenterology and Clinical Nutrition services at UCDMC. The student will manage patients requiring parenteral nutrition and become an integral member of the Gastroenterology Consult Team. CL PHARM

188.08. Microcomputer Applications in Pharmacy Practice—UCD. (1-8) S, F, W, Sp. Prerequisite: Successful completion of all 1st, 2nd, and 3rd year course work and consent of instructor. **Sauer and Staff.**

The student will identify and develop a solution for a problem in pharmacy practice that can be resolved by the use of microcomputers. In addition the student will review the utility of various software used in pharmacy practice. CL PHARM

188.09. Drug Utilization Review—UCD. (1-8) S, F, W, Sp. Prerequisite: Fourth-year standing, completion of CP 148 or CP 149. **Sauer and Staff.**

Upon familiarization with the literature, the student will design and conduct a drug utilization review and present the results to the Hospital Pharmacy and Therapeutics Committee. CL PHARM

188.20. Oncology/Sutter Community Hospitals. (4-8) F, W, Sp. Prerequisite: Fourth-year standing only. **Sauer, Spencer, Jue.**

A supervised clinical pharmacy experience in inpatient and outpatient settings which allows students to develop clinical skills involved with oncology, nutritional support, and hospice. Through observation and performance, the students will develop and explore their roles as clinical pharmacists. CL PHARM

198. Supervised Study. (1-5) F, W, Sp. **Staff.**

Librarians and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. CL PHARM

450. Pharmacy Clinical Work. (8-12) F, W, Sp. Prerequisite: Resident standing. **Herfindal, Kishi and Staff.**

Residents provide pharmacy service to inpatients in the wards and outpatient clinics including taking drug use histories, preparing and monitoring medication profiles, providing drug use information and consultation, and related activities. In addition, there are administrative and teaching responsibilities. CL PHARM

451. Drug Information. (5) Su, F, W, Sp. Prerequisite: Resident standing and approval of program director. **Herfindal, Hart.**

Residents provide drug information and related services on request. Activities include literature searches, preparing reports and other communications, and teaching and administrative responsibilities involving the Drug Information Analysis Service. CL PHARM

452. Administration. (5) Su, F, W, Sp. Prerequisite: Resident standing and approval of program director. **Herfindal, Kishi and Staff.**

Residents are responsible for carrying out assignments related to the administration of a modern hospital pharmacy service. Activities include preparation of budgets, supervision and development of staff, program planning and related administrative assignments. CL PHARM

453. Research. (1-5) Su, F, W, Sp. Prerequisite: Resident standing and approval of program director. **Herfindal, Kishi and Staff.**

Research programs are arranged with appropriate faculty members on an individual basis. CL PHARM

Community Dentistry

168. Community Health Methods. (2) W. Lecture 1 hour. Lab 3 hours. **Silverstein.**

Dental hygiene students work in the North Oakland community with the Children and Youth Project staff. Students are assigned to area schools where oral screening is done. Students also make home visits. DENT PUB HUTH

Craniofacial Anomalies

170.21. Craniofacial Function. (2) F. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry programs or consent of instructor. Lecture 2 hours. **A. Miller.**

This course emphasizes the properties of the neuromuscular system that modify the craniofacial morphology and structure. GR DEVEL

171. Diagnosis & Treatment. (2) F, W, Sp. Lecture 1 hour. Seminar and clinic 3 hours. **Cheleri, Vargervik.**

Diagnostic, preventive, and corrective methods relative to patients with congenital malformations of the orofacial region are discussed. GR DEVEL

171.22. Craniofacial Anomalies. (2) W, Sp. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry programs or consent of instructor. Lecture 2 hours. **Vargervik.**

Demonstration of various types of craniofacial anomalies, assessment of growth and development of abnormal and normal craniofacial structures, diagnosis and evaluation of the more common anomalies and associated impaired functions and therapeutic needs of the individual patient. GR DEVEL

186.01. Abnormal Orofacial Development. (1) F, W, Sp. Prerequisite: Fourth-year
standing or consent of instructor. Seminar and clinic 3 hours. Chiariči, Vargervik
The pathogenesis of jaw deformities, dental malocclusions, and speech disorders associated with congenital malformation is discussed. Instruction in diagnosis and preventive and corrective treatment methods is given in the clinic. GR DEVEL.

**Dental Auxiliary Utilization**

120. Use of Dental Auxiliaries. (1/2) Sp. Prerequisite: General Dentistry 111. Lecture 1 hour for one-half of quarter. Ino
Classroom instruction and demonstrations in the effective use of the dental assistant. DENT PUB HLTH

180B. Advanced Concepts. (1) W. Prerequisite: Dental 4 and Dental Hygiene 2 students. Lecture 1 hour. Weitzel
Advanced management of resources in the dental practice will be presented. The resources to be discussed are primarily auxiliary personnel, time and directed effort. DENT PUB HLTH

180C. Practice Management. (1/2) Sp. Prerequisite: Dental 4 and Dental Hygiene 2 students. Lecture 5 hours. Weitzel
A five-lecture course concentrating on business problems which immediately impact on the practitioner entering private practice. It will focus on efficient and effective strategies in allocation of time, money, clinical effort, business effort (front office), and outside consultant effort. DENT PUB HLTH

**Dental Health Education**

150. Intro to Dental Health Education. (2) F. Lecture 2 hours. Poupard
An introduction to theories of learning and educational methodology as applied to clinical practice of dental hygiene. Development and implementation of individualized preventive programs for dental patients are emphasized. DENT PUB HLTH

160. Community Dental Health. (2) W. Prerequisite: Dental Health Education 150A. Lecture 2 hours. Francisco
Explores alternative, non-clinical roles for dental hygienists while introducing the student to program planning, implementation, evaluation, and financing theories. Students are given the opportunity to develop program planning and evaluation skills with a selected community dental health education field project. DENT PUB HLTH

161. Curriculum Planning & Design. (3) F. Lecture 3 hours. M. Walsh
Analysis of theories and research in education emphasizing teaching strategies, evaluation methods, and principles of curriculum development for use in planning educational programs in schools of dental hygiene. Includes a field study for application and evaluation of selected teaching interactions. DENT PUB HLTH

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. DENT PUB HLTH

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Dental Health Education 150A-B and 160A-B. Lecture 1 hour. Lab 0-12 hours. Francisco
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. DENT PUB HLTH

**Dental Hygiene**

109. Clinical Dental Hygiene. (1-2) SS. Prerequisite: Dental Hygiene 155A-B, 159, and approval of the chairperson of the division. Clinic 3-6 hours. Staff
Course provides additional clinical dental hygiene experience before entry into the second-year clinic. DENT PUB HLTH

150A-B-C. Introduction to Dental Hygiene. (2-2-2) F, W, Sp. Lecture 2 hours. Heckman
Role of dental hygienist in dentistry studied; emphasis on objectives and principles of preventive periodontal treatment procedures. Various procedures and their rationale are integrated as related to clinical skills. Introduction to anatomy, physiology and pathology of oral cavity is included. DENT PUB HLTH

152. Introduction to Research. (1) Sp. Prerequisite: To be taken concurrently with Dental Public Health and Hygiene 121. Lecture 1 hour. Poupard
Concurrent with Dental Public Health and Hygiene 121, each student will prepare an annotated bibliography on a research topic of choice. DENT PUB HLTH

155A-B. Intro to Clinical Dental Hygiene. (2-2) F, W, F: Lab 3 hours. Clinic 3 hours. W: Lab 6 hours. Heckman
Laboratory and clinical experiences in patient evaluation, record keeping, case presentation and instrumentation techniques for providing prevention-oriented dental hygiene treatment. DENT PUB HLTH

155.01A-B. Clinical Dental Hygiene Seminar. (0-2-0) F, W. Francisco and Staff
Clinical laboratory seminar to discuss clinical procedures and patient management following Dental Hygiene 155A-B. DENT PUB HLTH

159. Clinical Oral Prophylaxes. (2) Sp. Prerequisite: Dental Hygiene 155A-B. Clinic 6 hours. Heckman
Continuation of clinical experiences from Dental Hygiene 155A-B with emphasis on
improved proficiency in all areas. DENT PUB HLTH

159.01. Clinical Dental Hygiene Seminar. (½) Sp. Seminar 1 hour given in alternate weeks. Francisco

Clinical seminar to discuss patient management and clinical procedures. DENT PUB HLTH

160B-C. Jurisprudence & Office Mgmnt. (1, 2) W. Sp. Lecture 1 hour W; 2 hours Sp. Hannebrink

Introduction to the ethical, legal and professional responsibilities of the dental hygienist. Emphasis on the California Dental Practice Act, malpractice prevention and professional organizations. Integrated topics include practice management and career planning. DENT PUB HLTH

161. Orientation to Dentistry. (2) W. Prerequisite: Dental Hygiene 151. Lecture 2 hours. Pouillard

Continuation of Dental Hygiene 151. Course includes tooth transplantation and implantation, orthodontics, oral surgery, craniofacial anomalies, maxillofacial rehabilitation, and removable and fixed prosthodontics. DENT PUB HLTH

162. Research Design. (2) F. Prerequisite: Dental Public Health and Hygiene 121. Lecture 2 hours. Pouillard

Fundamentals of research design and the scientific method. Each student will expand her/his experiences from Dental Hygiene 152 and prepare a research protocol. DENT PUB HLTH

169A-B-C. Adv Clinical Dental Hygiene. (3-5-5) F, W, Sp. Prerequisite: Dental Hygiene 155A-B, 155.01A-B and 159. Concurrent enrollment in Dental Hygiene 169.01A-B-C. Clinic 9 hours F; 15 hours W; Sp. Francisco

Advanced clinical dental hygiene techniques including periodontal maintenance therapy, pain control, and soft tissue curetage in cases of moderate to advanced stages of periodontal disease. DENT PUB HLTH

169.01A-B-C. Clinical Seminar. (0-1, 0-1, 0-1) F, W, Sp. Prerequisite: Concurrent enrollment in Dental Hygiene 169A-B-C. Lecture variable. Francisco

Lecture and seminar in clinical policies and procedures, dental hygiene treatment planning, periodontal maintenance therapy, clinical photography and related topics. Students will give case presentations during winter and spring quarters. DENT PUB HLTH

188. Advanced Clinical Functions. (2) F. Lecture 1 hour; Lab 3 hours. Hannebrink

Study of the anatomical, physiological, pharmacological, and periodontal aspects of the administration of local anesthetics, nitrous oxide-oxygen sedation, and performance of soft-tissue curetage. Students obtain didactic and clinical experiences in these functions. DENT PUB HLTH

189. Independent Study. (0-4) F, W, Sp. Prerequisite: Second-year standing in dental hygiene and consent of instructor. Pouillard

Students select an area of interest for independent study or research. These may include clinical, community, educational, institutional, or other areas. DENT PUB HLTH

189.01. Mobile Clinic. (0-3) SS. Clinic variable. R. Miller

Clinical experience in mobile dental clinics. DENT PUB HLTH

189.02. Community Health Clinic. (0-2) F, W, Sp. Prerequisite: Winter or spring quarter standing of first-year dental hygiene curriculum; or fall, winter or spring quarter standing of second-year dental hygiene curriculum. Francisco

One-half unit of credit for every five hour three quarter visits made to off-campus clinics or institutions. Objective is to secure community experience and involvement. This elective is above the required eight visits to off-campus clinics and institutions. DENT PUB HLTH

195. Laboratory Project. (1-5) F, W, Sp. Lecture 1 hour. Lab 0-12 hours. Francisco

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. DENT PUB HLTH

Dental Jurisprudence

180. Dental Practice Problems. (½) W. Lecture 1 hour for five sessions. F. Bradley

The course broadens student insight into the legal problems and obligations of dental practice. DENT PUB HLTH

Dental Public Health and Hygiene

110. Research Design. (1) Sp. Prerequisite: Dental Public Health and Hygiene 111. Lecture 1 hour. Wycoff and Staff

Basic principles of biostatistics. Introduction to concept of experimental reliability. Sampling techniques, indexes, independent and dependent variables. Critical review of research papers in preventive dentistry. DENT PUB HLTH

111. Problems in Dental Practice. (1) E Lecture 1 hour. Wycoff and Staff

Survey course designed to introduce the student to current social and professional problems in dentistry. Topics include identifying patient, community, national, and professional needs and how they are met. DENT PUB HLTH

112. Ethics in Dentistry. (1) Sp. Prerequisite: Dental Public Health and Hygiene 110 and concurrent enrollment in Dental Public Health and Hygiene 110. Lecture 1 hour. Pollick and Staff
Basic principles of bioethics. Issues of informed consent, refusal, withholding, withdrawing treatment, costs and benefits, confidentiality, veracity, paternalism in the professional/client relationship. Codes of ethics, peer review, ethical dilemmas. Ethics in dental school. DENT PUB HLTH

116. Epidemiology & Preventive Dentistry. (1½) F Lecture 1 hour. Lab 2 hours. 

Pollick and Staff

Lectures and lab in preventive dentistry: plaque control; diet analysis, fluoride history; evaluation indices; dental health and disease in children; data analysis; dental screening in San Francisco schools; dental health education. DENT PUB HLTH

120. Behavioral Sciences. (1) W. Lecture 1 hour. Fine

Introduction to the basic concepts, theories, and findings of the social sciences. Emphasis is on the application of these concepts and modes of reasoning to pressing social problems and the delivery of health services. DENT PUB HLTH

Pollick and Staff

Dental practice management and the influence of non-dental activities on dental care. Basic principles of practice management. Role of dental auxiliaries. Financial arrangements, legal responsibilities, internal marketing. Emphasis will be placed on objective methods of system analysis and using the dental school environment as a case study. DENT PUB HLTH

150. Dental Morphology. (2) F. Prerequisite: Concurrent enrollment in Dental Hygiene 150A. Lecture 2 hours. Hartman

The development and form of deciduous and permanent dentition and occlusion. Study of individual tooth and arch form to interarch relationships as well as endodontic morphology. DENT PUB HLTH

175. Dental Public Health Practice & Clinic. (1 ½) S, F, W. Sp. Prerequisite: Postgraduate standing and permission of instructor. Silverstein, Staff

To provide the dental public health residents with the opportunity to participate in the Family and Preventive Dental Service. They will learn about marketing strategies, computer billing services, office management, expanded function dental auxiliaries, and the delivery of preventive dental services. DENT PUB HLTH

Dental Technics

185. Intro to Basic Dental Technics. (2) SS. Lab 18 hours for three weeks. Hoskins

Technical orientation to the basic technics taught in the first year of dentistry such as morphology, prosthodontics, biomaterials, operative dentistry. RESTOR DENT

Dermatology

First-Year Coordinated Instruction—Medicine 131A-B-C. Lecture demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship—Family and Community Medicine 110 includes lectures and case demonstrations on the examination and diagnosis of dermatological diseases. This includes instruction in history-taking, physical diagnosis, and diagnostic and therapeutic procedures.

140.01. Advanced Dermatology Clerkship. (1½ per week) Su, F, W. Sp. Prerequisite: Consent of instructor. Wintroub

Clinical clerkship in approved hospitals by special arrangement of the dean and chairperson of the department. DERMATOL

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W. Sp. Prerequisite: Consent of instructor. Wintroub

Clinical clerkship in approved hospitals by special arrangement of the dean and chairperson of the department. DERMATOL

150.01. Dermatology Research. (½ per week) Su, F, W. Sp. Prerequisite: Consent of instructor. Hamlin

A research project under the direction of a member of the faculty. DERMATOL

160.01. Clinical & Research Clerkship. (1½) Su, F, W. Sp. Prerequisite: Consent of instructor. Wintroub

A research project under the direction of a member of the faculty. DERMATOL

199. Laboratory Project. (1½) F, W. Sp. Prerequisite: Consent of instructor. Wintroub

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. DERMATOL

400. Staff Conference. (2) F, W. Sp. Wintroub and Staff

Residents prepare and present case histories of patients at conferences, making reference to appropriate literature, special studies and laboratory work. Conferences include discussions of new developments and research investigation by staff members and faculty
from other UC departments and other universities. DERMATOL.

Lectures and demonstrations of the histopathology of skin diseases with special emphasis on correlation with clinical findings. Activities include the study of microscopic sections and discussions of material presented. DERMATOL.

Seminar covers recent literature in dermatology. Included is assigned reading with required reports which are evaluated by members of the faculty. DERMATOL.

403. Specialty Seminar. (2) F, W, Sp. Seminar 2 hours. Wintrob and Staff
Seminar includes discussions, required reading, and reports on dermatology and related basic sciences such as embryology, mycology, histopathology, and parasitology in relation to dermatologic conditions; and oncology as it relates to the skin. DERMATOL.

Seminar involves the evaluation of recent clinical cases of special interest. Cases are presented by the faculty and resident staff. DERMATOL.

Instruction in the conduct of research projects dealing with electron microscopy, biology, biochemistry, and immunology of the skin under normal and pathological conditions. DERMATOL.

In-depth discussion of the sciences basic to an understanding of the function and dysfunction of skin, including anatomy, physiology, microbiology, pharmacology, biochemistry, genetics, and pathology. Over a three-year period, course covers all aspects of basic sciences relevant to dermatology. DERMATOL.

407. Cutaneous Microbiology. (2) Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Alye
Course is designed to familiarize dermatology residents with the techniques of isolation and identification of dermatophytes, skin bacteria, and viruses. Occasional lectures on specialized topics are given. DERMATOL.

Residents, under supervision, are responsible for patient care in the wards and outpatient clinic. Duties include history-taking, physical examinations, and consultations. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. DERMATOL.

Residents, under supervision, are responsible for patient care in the wards and outpatient clinic. Duties include history-taking, physical examinations, and consultation. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. DERMATOL.

452. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Wintrob
Assistant residents work at off-campus hospitals, in the United States and other countries, approved by the dean and the chairperson of the department. Course includes training in clinical and investigative dermatology. DERMATOL.

Endocrinology (150.01). Research. (1½ per week) F, W, Sp. Prerequisite: Consent of instructor. R. Weiner
Individual research in endocrinology supervised by members of the faculty in the Interdisciplinary Group in Endocrinology.

198. Supervised Study. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Ganong and Staff
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department.

199. Laboratory Project. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Ganong
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department.

201. Hormone Structure & Function. (3) § Sp. Prerequisite: Basic course in biochemistry recommended. Consent of instructor. Lecture 3 hours. Papkoff, Ramachandran, Bewley
Examination of the chemical nature of the endocrines: the methods employed for purification, characterization, structural determination and synthesis. The relationship of molecular structure to biological activity will be studied, as well as comparative and evolutionary aspects.

202. Mechanisms of Hormone Action. (3) § F Prerequisite: Physiology 101 and/or Human Biology 200a and 200b, or Biochem-

---

*Courses in Endocrinology are offered through various departments. For further information regarding any of them, contact instructor in charge or Dr. William P. Ganong, Chairperson, Department of Physiology, Interdisciplinary Program in Endocrinology.
istry 100A-B, or consent of instructor. Lecture 2 hours plus independent study.

R. H. Roth, Nissenson

Reading and discussion of classical and current literature concerning known and speculative mechanisms of hormone action. Major hormones covered are insulin, glucagon, thyroid, and steroid. PHYSIOLOGY.

209. Molecular Endocrinology. (4) § W. Prerequisite: Knowledge of biochemistry. Will not be given for less than 5 students. Offered in alternate years. Offered 1985-86. Lecture 4 hours.

Eberhardt, W. Miller

Application of recombinant DNA to study endocrine systems. Topics include basic molecular biology, cloning methods, RNA and DNA analysis, gene structure, and experimental design. Objective is to provide a working knowledge of molecular approaches to endocrine problems. PHYSIOLOGY.

217. Communication of Research. (1) § W. Nissenson, Arnaud

Objective of the course is to enhance students’ abilities to effectively present results of their research findings. Students will have the opportunity to strengthen their written and oral communication skills by presenting abstracts as well as formal seminars. PHYSIOLOGY.

220. Topics in Experimental Endo. (1) § W. F. W. Sp. Seminar 2 hours, given in alternate weeks.

Papkoff, Ramachandran

Students will attend and participate in a seminar series devoted to topics of current interest in endocrinology. PHYSIOLOGY.

224. Neuroendocrinology. (4) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Seminar 1 hour. Conference 1 hour. Course will not be offered for fewer than four students.

R. Weiner, P. Goldsmith, Dallman

Mechanisms for regulation of endocrine function by the central nervous system and the influence of hormones on the nervous system are considered in view of anatomical, biochemical, physiological, and behavioral data. PHYSIOLOGY.

PHYSIOLOGY

Epidemiology and International Health

100. Medical Parasitology. (2) Sp. Prerequisite: Microbiology 100 (without parasitology) or equivalent, or concurrent enrollment. Lecture 2 hours.

An introduction to protozoa and helminths and human diseases they produce. Parasite epidemiology and life cycles, diagnosis, clinical aspects, treatment, and control are considered in lectures, films, and Kodachrome slides. Laboratory demonstrations keyed to lectures are displayed throughout the week. EPID INTL HLTH.

Ernstner, Sacks, Petrakis

Basic epidemiological principles and methods for investigating the distribution and determinants of disease in the population. Emphasis is on research design, evaluation of medical literature and diagnostic tests, and assessment of patient risk factors for use in diagnosis and treatment. EPID INTL HLTH.

140.02A. Clinical Clerkship Abroad. (1½ per week) Su, F, W. Sp. Prerequisite: Nine months of clinical work and Epidemiology and International Health 150.01, or consent of instructor.

R. Goldsmith, Halde

Clinical clerkship elective in a developing country. Students provide patient care at a medical school, provincial hospital, or rural health clinic for eight to twelve weeks. Arrangements may be made to participate in a public health or research program abroad. EPID INTL HLTH.

140.02B. Off-Campus Clerkship. (1½ per week) Su, F, W. Sp. Prerequisite: Consent of chairperson of department. Petrakis and Staff

Clerkships in clinical epidemiology in off-campus settings. EPID INTL HLTH.

140.03. Leprosy. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110 and consent of instructor.

Gelber

An introductory course in the diagnosis and care of leprosy patients. Selected readings will be discussed on the clinical presentation, therapy, and immunology of leprosy. Additional time on the service, with increasing clinical responsibility, may be arranged. EPID INTL HLTH.

140.04. Refugee Screening Clinic—SFCH. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110, Pediatrics 110, and consent of instructor.

De Lay

Diagnosis and treatment of refugees from culturally diverse populations. Clinical experience with variety of tropical diseases and medical problems in family practice associated with these cultures. Guided reading and possible attendance at Tropical Medicine-Diseases Clinics, UCSF, and Leprosy Clinic, SMC. EPID INTL HLTH.

150.01. Medicine in Developing Countries. (1½ per week) W. Prerequisite: Epidemiology and International Health 100 or consent of instructor.

R. Goldsmith

Two-week block elective on the recognition and treatment of diseases of tropical and developing countries. The course is designed to prepare students for clerkships abroad in developing countries. Presentation format includes lectures, seminars, films, laboratory sessions, and supervised independent study. EPID INTL HLTH.
150.02. Field & Laboratory Research. (112 per week) Su, F, W, Sp. Prerequisite: Consent of instructor.

Staff

Research under faculty supervision in the United States or abroad. Research may be in public health, clinical or preventive medicine, or basic medical sciences. EPID INTL HLTH

160.01. Cancer Epidemiology. (1-2) W, Prerequisite: Epidemiology and International Health 101 or consent of instructor. Lecture 1 hour. Optional term paper for 2 units.

Petralis and Staff

Survey and discussion of milestone papers in the knowledge of the epidemiology of the major sites of cancer. Emphasis is on etiological and methodological aspects and applications to prevention. EPID INTL HLTH

170.04. Host-Parasite Interactions. (1) W. Prerequisite: Epidemiology and International Health 100 or equivalent. Lecture and discussion 1 hour. Heyneman

Lectures and discussions to review the patterns of host-parasite interactions involving protozoan and helminth infective agents of man. Topics selected will explore current views of immune and other types of response and their disorders that may result in human disease. EPID INTL HLTH

170.05. Intro to International Health. (2) W. Lecture 2 hours. F. Dunn and Staff

Lectures and discussion to survey the history, organizational structure, major activities and topics that comprise the field of international health. EPID INTL HLTH

170.06. Human Health Geography. (3-5) F. Prerequisite: Preregistration required. Course is offered and meets jointly with Geography 188 given at UC Berkeley. Lecture 3 hours. Optional term paper for 5 units. F. Dunn and Staff

Course covers principles of medical geography and landscape epidemiology, including changing patterns of human health and disease in the contexts of physical, biotic, and sociocultural environments, and in relation to human settlements. Analysis of selected specific diseases of global importance.

EPID INTL HLTH

170.07. Leprosy Laboratory Project. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Gelber

A laboratory research problem on leprosy under the guidance of a member of the staff of the Leprosy Research Unit at Seton Medical Center. The Unit's major research areas are the pharmacology, immunology, and chemotherapy of leprosy in animals and man. EPID INTL HLTH

170.08. International Health Policy. (2) Sp. Lecture 2 hours. P. Lee, F. Dunn, J. Justice

Lectures and discussions to examine topics and issues in international health at the level of policy. EPID INTL HLTH

170.10. Occupational Epidemiology. (1-2) W. Prerequisite: Epidemiology and International Health 101 or 190. Seminar 1 hour. Optional term paper for 2 units. Mustacchi

Seminars on selected topics in occupationally-related diseases with specific emphasis on their epidemiologic, preventive, and compensation aspects. Discussion, with examples, of the concept of disability and of the physician's basic role and responsibilities in determining its level. EPID INTL HLTH

180.01. Tropical Medicine Clinics. (1-2) § Su, F, W, Sp. Prerequisite: Epidemiology and International Health 100 and six months of clinical experience. Clinic 4-8 hours.

R. Goldsmith, Frierson and Staff

Examination and treatment of patients in the Tropical Medicine Clinics under staff supervision. The clinic operates in conjunction with the Infectious Diseases Service; patients seen have both parasitic and other infectious disease. EPID INTL HLTH

Primary readings on diverse clinical topics from the recent literature will be discussed. The objective is to enhance skills in interpreting and designing clinical research. Major themes are the difficulty of demonstrating cause and effect, and the challenge of guiding health policy. EPID INTL HLTH

180.05. Maternal & Child Hlth-Devel Cntr. (1-2) § Sp. Lecture and discussion 1 hour. Optional term paper for 2 units. Arnhold

Lectures and discussion to review major factors affecting maternal and child health in developing countries, including the impact of poverty, nutrition, infectious diseases, immunization, organization of ambulatory care, setting of priorities, and utilization of local people as health auxiliaries. EPID INTL HLTH

180.07. Environmentally Induced Disease. (1) Sp. Lecture 1 hour. Tarcher

A lecture series on the cause, diagnosis, treatment and prevention of environmentally induced diseases. Topics include pesticides, hazardous wastes, indoor and outdoor air pollution, water pollution, susceptible populations, and the relationship of nutrition to environmentally induced disease. EPID INTL HLTH

180.08. Epidemiology. (2) § Sp. Seminar 2 hours, plus student presentation. A. R. Moss

Topics in epidemiology and epidemiological methods from the public policy point of view, including risks associated with low level radiation, and environmental and occupational carcinogenesis. Other topics may include the decline of heart disease and the political implications of environmental epidemiology. EPID INTL HLTH

186. Tropical Medicine Lectures. (1) § Sp. Lecture 1 hour. R. Goldsmith
401. Clinical Diagnostic Cytology. (14) Su. Prerequisite: Satisfactory completion of Exfoliative Cytology 101A-B-C. E. King, T. Miller and Staff

Clinical internship in cytochemistry—students are rotated to affiliated laboratories for routine screening of slides, cytoreparation, and staining of slides; development of speed and accuracy in microscopic examination during the rotation. PATHOLOGY

Family and Community Medicine

110. FM Core Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Completion of 20 weeks of clinical clerkship including Medicine 110. Werdegar, Rodnick, D. Mitchell

Students function as family/primary physicians in ambulatory settings at affiliated residency programs. Family Practice at SFHG, CHS in Santa Rosa, NAT in Salinas, VMAC in Fresno, and SFH at Fort Ord. Primary Care Internal Medicine: at UC, SFHG, and MZ. FAM CM MED

140.01A-B-C-D. Advanced Family Practice. (1½ per week) A, B, C, and D are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Werdegar, Comelli, Patinkin, Dervin

140.02. Community Health Programs. (1½ per week) Su, F, W, Sp. Prerequisite: Determined by student's clinical experience. Consent of instructor. Barbaccia and Staff

Exfoliative Cytology

101A-B-C. Clinical Diagnostic Cytology. (8.1-14) F, W, Sp. Prerequisite: Two years of college work (60 semester or 90 quarter units) with major emphasis on biological sciences (20 semester or 30 quarter units) at an accredited institution. E. King, T. Miller and Staff

Lectures in cytology include normal, malignant, and abnormal non-malignant cells from all body sites. Instruction covers method of specimen collection, preparation, staining, and microscopic examination of specimens; development of speed and accuracy in microscopic examination; and correlation of cellular and tissue pathology. PATHOLOGY

140.03. Preventive Medicine Field Work. (1½ per week) Su, F, W, Sp. Petitti

The student will be assigned to participate four days a week in patient care with a physician who emphasizes the integration of preventive medicine into clinical practice. One day of directed reading supervised by a member of the faculty. FAM CM MED

140.04. Family Practice Preceptorship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Rodnick

Students work with a family physician, alternately general internist or general pediatrician, in the office, observing the practice and performing duties as training permits. Experience will teach common health problems and primary care in a community. Rural preceptorships are encouraged. FAM CM MED

140.05A-B-C-D. Social Medicine. (1½ per week) F, W, Sp. Prerequisite: Consent of instructor. Barbaccia

Field work experience or research germane to social medicine individually arranged with consideration to student's major area of interest. FAM CM MED

140.06A-B-C. Rehabilitation Medicine. (1½ per week) A, B, and C are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Consent of instructor. L. Crain

A = San Francisco Bay Area; B = Fresno; C = other sites. Students are assigned to rehabilitation facilities for two to four weeks. Emphasis will be on the selection of patients who are suitable for rehabilitation and the interprofessional approach to rehabilitation. FAM CM MED

140.07. Adv Family Prac Preceptorship. (1½ per week) Su, F, W, Sp. Prerequisite:
Advanced medical school standing and consent of instructor. Rodnick

Students select from several urban or rural sites. Experience provides students the opportunity to participate in the care of patients and their families at the physician’s practice, local hospital, and emergency room. FAM CM MED

140.50A-B-C. Family Practice Clerkship. (1½ per week) A, B, and C are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Patinkin

A = NAT in Salinas; B = SHI at Fort Ord; C = other sites. Course strengthens students’ clinical skills and exposes them to hospitals with family practice residency programs. Provides opportunity to participate in health care in rural and/or underserved areas. FAM CM MED

140.40. Adv Inpatient Fam Med Clkshp. (1½ per week) Su, F, W, Sp. Prerequisite: Senior medicine clerkship. R. Goldschmidt, M. Johnson

The Family Practice Inpatient Service at SPGH employs the family practice approach to hospitalized adult patients with diverse medical problems. Students function as members of the multidisciplinary inpatient team at a junior intern level. Attending rounds are held daily. FAM CM MED

140.50A-B-C-D. Com Clkshp-San Joaquin Valley. (1½ per week) A, B, C, and D are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Consent of instructor. Corbus

A = St. Agnes’ Hospital; B = Visalia Hospital; C = Fresno Community Hospital; D = other sites. Family practice clerkships in community practices in Valley communities. Students are introduced to the varied medical and surgical problems commonly found. Provides opportunity to assess health re-

sources in a semi-rural area of California. FAM CM MED

Students receive practical training in emergency medicine, in emergency prehospital care, and also in the care of the critically ill and injured patient in the emergency room. Daily emergency medicine case conferences and weekly conferences augment clinical experience. FAM CM MED

140.60A-B-C-D. Clinical Geriatrics. (1½ per week) F, W, Sp. Prerequisite: Medicine 110 and Neurology 110 and consent of instructor. Barbaccia, Werdegard and Staff

A = San Francisco; B = Fresno; C = St. Mary’s; D = Other. Students supervised by attending staff are assigned patients in clinical settings, outpatient departments, adult day centers, nursing homes, acute hospital; also home care. Students will attend multidisciplinary case conferences, didactic sessions, geriatrics consultation rounds. FAM CM MED

140.70. Primary Care Clerkships Abroad. (1½ per week) F, W, Sp. Prerequisite: Conversational command of language of country of placement and consent of instructor. Braveman, Drickey, Goldsmith, Petitti

A 4-12 week elective involving placement at a supervised primary care training and/or service site abroad. Placements will be made according to student interest and language capability, and according to availability of appropriately supervised sites, mainly in Latin America. FAM CM MED

150.01. Research. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Werdegard, Barbaccia and Staff

Clinical epidemiology, health services, or behavioral science research approaches are applied in the study of selected areas in family medicine or community health. FAM CM MED

160.01. Community Medicine Field Work. (1½-3) Su, F, W, Sp. Prerequisite: Medical student standing. Consent of instructor. Field work 4-8 hours. Barbaccia

Non-block assignments to community health agencies where students have patient contact. Students choose an aspect of the agency’s program for analysis. FAM CM MED

160.02. Family Practice Continuity. (2) Su, F, W, Sp. Prerequisite: Consent of instructor. Course must be taken for one full academic year. R. Goldschmidt

Course will provide students the opportunity to follow a small number of patients and families over the entire year during their non-scheduled time in coordination with the instructor. Continuing the experience for four years is encouraged. FAM CM MED

160.03. Family Practice Preceptorship. (1-3) Su, F, W, Sp. Prerequisite: Medical student standing. Consent of instructor. Field work 4-12 hours. Rodnick

Non-block assignment with a family physician in a private office or community clinic for a minimum of four hours a week. Preclinical students observe their preceptors in order to gain an introduction to family care. FAM CM MED

160.04A. Introduction to Sports Medicine. (2-3) F. Prerequisite: Consent of instructor. Lecture 2 hours. Clinic optional 4 hours. Renner

Athletic medicine ranging from youth athletics to senior participation. Emphasizes evaluation and prevention of injury, conditioning, and rehabilitation, directed at the community. Course consists of lectures and optional field work. FAM CM MED

160.04B. Advanced Sports Medicine. (2) Prerequisite: Family and Community Medicine
160.04A. Lecture 2 hours. Lab optional 1 hour.
Renner
Diagnosis, treatment, and rehabilitation of specific athletic injuries organized by anatomical areas, basically of the non-elite athlete. Emphasis on non-surgical treatment per European and American techniques using community resources and prompt surgical referral when necessary. FAM CM MED

160.05. Mission Community Hlth Elective. (1-3) Su, F, W, Sp. Prerequisite: Consent of instructor. Lab 2-6 hours. Field work 2-8 hours.
D. Sanchez, D. Fink
Explores health care attitudes, health problems and health care resources in the multi-ethnic Mission Area of San Francisco. Students receive clinical assignments in one or more community health and social service agencies. Field experience is analyzed in seminars and tutorials. FAM CM MED

160.07. Family Health & Care. (2) F Seminar 2 hours.
Ransom, Braveman, Segal
Introductory principles of family medicine are discussed in class and discussion groups led by family physicians and family psychologists. Preceptorships with family physicians in private offices and community clinics. Each student will interview a family and present a case report. FAM CM MED

170.01A-B-C. Special Issues in Health Care. (0-3) A, B, and C are offered in all of the following quarters: Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture and reading 1-3 hours.
Wedgear and Staff
Explores in systematic (lecture/readings/discussion) format new issues in health care or special content areas related to family and community health. Topics are developed and prepared according to faculty student interests. FAM CM MED

170.02. Elderly Community Programs. (2) W. Lecture 1 hour. Conference 2 hours. Enrollment limited.
Barbaccia, Robinson, Weiss
This course offers the student a survey of the aged in San Francisco. Lectures cover the socio-demographic, cultural, and health status factors of the city's aged. On-site conferences are held at representative programs and facilities serving the aged. FAM CM MED

170.03. Developmental Disabilities. (2-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Field work 4-8 hours.
L. Crain
Resource overview with reading assignments correlated with field observations of the spectrum of community and institutional services, including comprehensive diagnostic, therapeutic, and counseling services for children and adults with developmental disabilities. FAM CM MED

170.04. Rehabilitation in Primary Care. (2) S, F, W, Sp. Prerequisite: Consent of instructor. Seminar 2 hours.
Byl, Berrol
Course exposes medical and other health science students to the principles of rehabilitation and common therapeutic strategies. Emphasis will be on the development of a basic theoretical foundation on which the student can build clinical rehabilitation skills in practice. FAM CM MED

170.05. Rehabilitation Medicine. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Field work 4-8 hours.
L. Crain
Through individualized arrangements, course provides an introduction to the broad spectrum of rehabilitation services for children and/or adults with chronic or disabling diseases. FAM CM MED

170.06. Nutrition in Prev Health Care. (1) W. Prerequisite: Biochemistry 100B, 110B, or 120B. Lecture 1 hour.
Nestle
Emphasizes critical examination and analysis of the experimental evidence that relates dietary components to health promotion and prevention of specific disease conditions. FAM CM MED

171. Comptr Applications in Hlth Care. (3) F. Lecture 3 hours.
M. Tuttle
The nature of information processing; concepts of problem solving with the digital computer; representation of information within a computer system; introduction to programming and systematic programming methodology; examples of present and potential applications of computer systems to the medical environment. FAM CM MED

172A. Legal Medicine--Basic Concepts. (2) F. Lecture 2 hours.
Tennahouse
Fundamental legal principles and procedures affecting medical practice, with emphasis on medical negligence; the physician's role in the litigation process; the areas of medical practice which most frequently involve litigation; and practical measures to minimize the risk of lawsuit. FAM CM MED

172B. Legal Medicine--Practical Aspects. (2) W Lecture 2 hours.
Tennahouse
Fundamental legal principles and procedures affecting medical practice, with emphasis on medical negligence; the physician's role in the litigation process; the areas of medical practice which most frequently involve litigation; and practical measures to minimize the risk of lawsuit. FAM CM MED

J. Cook
Exploration of various aspects of primary care as related to family medicine. A practicing family physician leads discussion of topics developed by the students. Introduction to the practical aspects as well as the issues and demands of family practice. FAM CM MED

Flinders, Richard
An exploration of the comprehensive role of the family physician in providing longitudinal health care. Students will learn to recognize priorities in patient care, with an
175.01. Meaning of Being a Physician. (1-3) F, W, Sp. Prerequisite: Consent of instructor. Seminar 1-3 hours. Guttenberg

Exploration of the theoretical premises of Western physicianhood, relationship to other disciplines, such as theology and man's spiritual dimension, and other cultural attitudes; trendiness of the holistic approach; dynamics of patient-physician relationship; operational concepts such as the clinical entity. FAM CM MED

175.02. Theoretical Problems of Medicine. (1-3) F, W, Sp. Prerequisite: Consent of instructor. Seminar 1-3 hours. Guttenberg

Seminar on selected writings and topics discussed in Family and Community Medicine 175.01. FAM CM MED

180. Intro to Social & Preventive Med. (1-2) F. Lecture and seminar 1-2 hours. Barbaccia

Lectures and seminars introduce entering students to social, political, economic and environmental factors influencing health of the community and provision of care. Topics include preventive health care, health behavior and formulation of policy. FAM CM MED

181. Clinical Preventive Medicine. (2) W. Prerequisite: Second-year standing in School of Medicine. Lecture hour. Seminar 1 hour. Petitti

Lecture-seminar on the basic concepts of preventive medicine, the integration of preventive medicine into clinical practice, the evaluation of preventive strategies in medical care, and the role of the practicing physician in influencing policies on prevention. FAM CM MED

184. Contemporary Latino Subcultures. (2) F, Sp. Prerequisite: Consent of instructor. Seminar 2 hours. Sanchez

Review and investigation of theories of migration and urbanization of diverse Latino populations. Major focus will be on patterns of assimilation, conflict, and alienation within institutional parameters of health services, education, immigration, law enforcement, and related services. FAM CM MED

Lecture-seminar format is used to cover most aspects of the organization and function of the health care system and its subsystems, including manpower, hospitals, ambulatory care, planning regulation and control, economics, government programs and health services research. FAM CM MED

198. Supervised Study. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Werdegar and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. FAM CM MED

475.01. Western Medical Attitude. (1) F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Guttenberg

An exploration of the theoretical premises on which Western medicine rests: its relationship to other disciplines, the structure of patient-physician relationships, its operational concepts, such as optimal versus inadequate or superfluous examination, the concept of the clinical entity. FAM CM MED

Seminar on selected writings and topics discussed in Family and Community Medicine 475.01. FAM CM MED

General Dentistry

109.01. Community Dentistry Rotation. (0-9) F, W. Prerequisite: Certification of competency by the various departments in the school. Seminar 3 hours. Clinic 24 hours. Wycoff, Sinclair, M. Garcia

Multi-component rotation including seminars, patient group presentations, specialty grand rounds and comprehensive patient care. Supervised clinic and seminar experience in community setting. Students develop and explore their roles as members of the health care team and learn to meet community needs.

Dent Pub Health

Genetics

200A. Principles of Genetics. (3) § F. Lecture 3 hours. Kornberg, Herskowitz

In-depth analysis of genetic mechanisms in selected procyanines, eucaryotes. Topics include genetic exchange (conjugation, generalized and specialized transduction, transformation), recombination (general, site-specific, "illegalimate"), mapping, mutation (inclusion and consequences), mobile genetic elements, gene expression, meiotic and mitotic segregation, allelism, position effects. BIOCHEM

215. Laboratory Rotation. (3) § F, W, Sp. Lab 9 hours. Guthrie

A laboratory rotation course to familiarize first-year students with various approaches to research. Students are required to rotate through three different laboratories in at least two subject areas, and give an open seminar at the end of each quarter. BIOCHEM

220. Current Topics. (9) § F, W, Sp. Prerequisite: Consent of graduate advisor in genetics. Seminar. Herskowitz and Staff

Students will lead a discussion on a topic of special interest in genetics. A different faculty member will act as advisor each week. This is a required course each quarter for genetics majors.

¹See also Biochemistry course offerings.
first- and second-year students in genetics.

**224. Advanced Human Genetics.** (1½) §
Sp. Lecture 1½ hours. Offered in alternate years. Not offered 1986-87. **Epstein, Kan, Cox, Gitschier, Packman, Wolff**

Course covers topics in current human genetics research, including molecular approaches to the mapping of human chromosomes, molecular analysis of human genes, use of restriction fragment length polymorphisms for linkage analysis and diagnosis, effects of chromosome imbalance, gene therapy, and environmental mutagenesis. BIOCHEM

**250. Research.** (1-8) § Su, F, W, Sp. **Staff**

**Health Sciences Education**

**200. Intro to Teaching Health Science.**
(1) § F. Prerequisite: Consent of instructor. Lecture 2 hours. **Lem**

The course focuses on instructional techniques and strategies useful for the beginning instructor. Emphasis is placed on teaching professional students in the School of Pharmacy. Open to graduate students, residents and new faculty. PHARMACY

**220A-B. Selected Topics.** (2-2) § F, W. Prerequisite: Consent of instructor. Seminar 2 hours. **Rosinski**

Consideration of principles of learning, including individual student differences, techniques of instruction, and approaches to evaluation of student progress. Individual teaching plans are developed and critiqued. Emphasis is placed on the graduate and professional school student as a learner. MEDICINE

**221. Teaching Allied Health.** (2) § F, W. Sp. Seminar 2 hours. **Rosinski**

Graduate seminar integrating clinical experiences and academic course work of students enrolled in Kellogg Education Project. Relationships of course work experiences to future roles as allied health teachers are considered. Individual professional problems are analyzed. MEDICINE

**310. Eval of Clinical Performance.** (2) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 3 hours. **Rosinski**

A seminar to review and develop objective techniques in assessing the clinical performance and competence of students and practitioners. Techniques will be developed and validated for a number of clinical disciplines. MEDICINE

**170.01 Historical Perspectives in Medicine.** (1-3) F, W, or Sp. Lecture 1 hour. Optional additional study for additional units. **Risse**

Course intends to develop a sense of historical perspective and the ability to assess present issues in the light of past experience. Readings and visual aids will focus on the scientific and social aspects of the health sciences. HIST HL SC

**198. Supervised Study.** (1-5) § F, W, Sp. Prerequisite: Consent of instructor. **Risse and Staff**

Historical research and/or directed reading under supervision of a faculty member with approval of the department chairperson. HIST HL SC

**200A. Introduction to Medical History.**
(3) § F. Prerequisite: Consent of instructor. Lecture and seminar 3 hours. **Risse**

General survey chronologically arranged from prehistory to the Renaissance. This course examines the changing burden of disease across cultural and geographic boundaries and presents broad conceptual developments that in each period influenced the evolution of medical knowledge and professional activities. HIST HL SC

**200B. Introduction to Medical History.**
(3) § W. Prerequisite: Consent of instructor. Lecture and seminar 3 hours. **Risse**

Continuation of the general survey from the Renaissance to the end of the eighteenth century with special emphasis on the mechanical revolution in medical thought and the medicalization of European society. HIST HL SC

**200C. Introduction to Medical History.**
(3) § Sp. Prerequisite: Consent of instructor. Lecture and seminar 3 hours. **Risse**

Continuation of the general survey from the nineteenth century to the present, examining in detail the emergence of scientific medicine, germ theory, medical technology,
201. Clinical Medicine Since 1750. (3) § Sp. Prerequisite: Consent of instructor. Lecture and seminar 3 hours. Bissc
Clinical developments in Europe and America with emphasis on diagnostic and therapeutic procedures. The course examines both patients and professionals within the scientific, behavioral, and social contexts of medical practice. HIST HL SC

203. Brain/Mind in Medical History. (1-2) § W, Sp. Lecture 1-2 hours. F. Schiller
Introduction to the history of neurological concepts. HIST HL SC

205A How To Be a Physician. (1-3) § F, W, Sp. Lecture 1-3 hours. Gutten tag
Exploration of the theoretical premises of Western physicianship: relationship to other disciplines such as theology, and man's spiritual dimension and other cultural dynamics of patient-physician relationship: operational concepts such as the clinical entity. HIST HL SC

205B. How To Be A Physician. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-3 hours. Gutten tag
Extended reading and conferences of History of Health Sciences 205A. HIST HL SC

206. History of Nursing. (1-3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Staff
For nursing instructors and graduate students. Generalized history of nursing with special emphasis on professional activities since the time of Florence Nightingale, both in Europe and America. HIST HL SC

207. Historical Meth & Bibliography. (4) § W or Sp. Prerequisite: Consent of instructor. Seminar 4 hours. Risce, Zinn
Historical methods and survey of health sciences literature. Includes an introduction to medical historiography, modern reference works, and bibliographical methods. Required for all incoming history graduate students. HIST HL SC

211. Philosophical and Historical Problems in Science and Health Care. (3) § Sp. Prerequisite: Graduate status or permission of instructor. Seminar 3 hours. Jonsen, Juengst
This graduate-level course will address conceptual and epistemological issues underlying scientific theory and method and the provision of health care. Different subjects will be selected annually. HIST HL SC

220. Selected Topics. (1-2) § F, W, or Sp. Prerequisite: Consent of instructor. Seminar 1-2 hours.
Seminar allowing individual staff or guest lecturers to present selected topics in the history of the health sciences based on their current research and publications. HIST HL SC

250. Research. (1-8) § F, W, Sp. Prerequisite: Consent of instructor. Staff
Supervised independent research, including presentations and criticism of research sources, methods, and papers. HIST HL SC

297. Special Study. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Staff
Supervised independent study intended to provide directed reading in subject matter not covered in scheduled seminar offerings. HIST HL SC

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the thesis for the master's degree. HIST HL SC

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. HIST HL SC

Hospital Dentistry

170. Emergency Medical Care. (1) W. Prerequisite: Postdoctoral or fourth-year standing. Seminar 2 hours. Lim
The course is designed to stimulate group discussion on the principles of emergency medical care. Topics include transportation, disaster planning, triage, cardiopulmonary resuscitation, management of shock, head and neck injuries, as well as special problems related to dentistry. STOMATOLOGY

171. Physical Diagnosis. (2) Su. Prerequisite: Enrollment in a postgraduate specialty program or consent of instructor. Lecture 2 hours. Zier
Designed to prepare the oral surgeon to conduct a physical examination as a preliminary evaluation before performing oral surgical procedures. Techniques of examination are demonstrated and practiced in the classroom; examination of pathologic conditions is conducted at bedside. STOMATOLOGY

172. Oral Biology Conferences. (1) W. Prerequisite: Postdoctoral standing. Silverman, Ware and Staff
Conferences include case presentations by interns and residents, and seminars covering selected subjects in oral biology relevant to clinical and preventive dentistry. STOMATOLOGY

Human Development and Aging

200. Off-Campus Study. (0) § F, W, Sp. Prerequisite: Approval of graduate adviser. Staff
Full-time graduate study in the Human Development and Aging program through the
201A-B-C. Fundamental Theories & Methods. (1-4) § F; W, Sp. Prerequisite: Consent of instructor. Seminar 2 hours. **Bliwise, Lieberman, Rosow, Kiefer**

Psychological and sociological theories and methods in the study of the human life cycle. Topics include models of development, life course, adult socialization, age stratification, intergenerational issues, cognition, historical and demographic perspectives, personality, stress, transitions, age-comparative coping, and psychopathology. PSYCHIATRY

202A-B-C. Res Meth in Adult Devel & Aging. (4) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 2 hours. **Bliwise, Rosow, Kiefer**

A three-quarter course covering major methods and techniques of life course and life span research including surveys, field observations, analysis of quantitative and qualitative data, and longitudinal research. PSYCHIATRY

Students work on their own research interests in terms of problem formulation, research design, and/or operationalization. Emphasis depends upon individual student needs. PSYCHIATRY

204. Personal Development. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. **Kiefer**

Representative works from behavioral science literature and world poetry and prose are brought together in the study of personality development in adult life. Compares insights from the two fields on how the developing person copes with social, historical, and psychological challenges. PSYCHIATRY

205. Data Analysis. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. **Rosow**

Students either provide their own or use accessible data from ongoing research projects. Emphasis is on training in data organization, analysis, and research report writing. PSYCHIATRY

207. Methods of Survey Research. (3) § F, W. Prerequisite: Consent of instructor. Lecture 3 hours, plus field work. **Pearlin**

Course covers the major tasks of survey research. Topics such as conceptual specification, the development of indicators and measures, the construction of questionnaires, sampling, field testing, interviewing, and analysis are covered. PSYCHIATRY

208. Psychosocial Change in Adulthood. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. **Fiske**

An advanced course for students familiar with social sciences and clinical studies of adult change. Emphasis will be on in-depth critiques of stage, process, stress, adaptation, and other conceptual models. PSYCHIATRY

210. Socialization to Old Age. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. **Rosow**

A seminar on adult socialization theory, with prospective socialization to an aged role as a special concern. Major issues involve norms for older people, the structure of socialization situations, and the pressure of variables normally affecting socialization in earlier status transitions. PSYCHIATRY

220. Pro-Seminar. (1) § F, W; Sp. Prerequisite: Consent of instructor. Lecture 2 hours, given in alternate weeks. **Staff**

Students, staff, or guest lecturers present selected topics, based on their current research. PSYCHIATRY

222. Sources & Mediators of Stress. (2) § F, W. Sp. Prerequisite: Consent of instructor.

Seminar 2 hours. Enrollment limited. **Pearlin**

Course presents current theories and research dealing with sources of stress and its mediation. It will examine the conditions and experiences that act as stressors in people's lives, the behaviors used to cope with stressors, the nature and functions of social support systems, and the health consequences of these factors. PSYCHIATRY

227. Biological Aspects of Aging. (2-3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Independent study 3-4 hours. **Ellman**

Physiological, biochemical, neurological, and anatomical changes occurring with aging are discussed. Important questions include the possible relationships to behavioral changes in humans and the relevance of internal changes to psychological states. PSYCHIATRY

230. Research Project Seminar. (6) § F, W, Sp. Prerequisite: Graduate standing in Human Development and Aging Program, or consent of instructor. Seminar 4 hours. 6 hours additional research work. Offered in alternate years. Offered 1985-86. **Bliwise, Rosow and Staff**

Students are required to conduct individual research project. Seminar is organized around methodological issues including reliability, validity and development of scales and measures, and specific problems related to formulation of goals of the studies and collection and analyses of data. PSYCHIATRY

249. Special Studies. (2-8) § F, W. Sp. Prerequisite: Consent of instructor. **Staff**

Students select special problems to investigate on an individual or collaborative basis. These studies may be conducted through readings, the collection and analysis of empirical data, or the development of conceptual analyses or methodologies. PSYCHIATRY
250. Research. (1-8) § F, W. Sp. Staff
PSYCHIATRY

299. Dissertation. (0) § F, W. Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. PSYCHIATRY

Human Sexuality

Social, behavioral, and clinical aspects of human sexuality are covered in a series of lectures. Lectures will present didactic material. PHARMACY

Interdepartmental Studies

135. Reproduction Growth & Devel. (3) F. Lecture 3 hours. Ballard, Parer
Course is designed to trace the biological mechanisms concerned with conception, development of the fertilized ovum through embryonic and fetal life, and postnatally to the mature individual. OB GYN RS

Laboratory Medicine

140.01. Clinical Pathology. (1½ per week) Su, F, W, Sp. Prerequisite: One year of medical school and consent of instructor. Gottfried
Laboratory sessions and seminars on aspects of clinical chemistry, hematology, microbiology, blood banking, and radioisotopes are held in the clinical laboratories at UC and SFGH. LAB MED

140.03. Hematology Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Second year of hematology or equivalent. Recommendation from one faculty member. Shohet and Staff
Clerkship primarily in the clinical evaluation of hematologic patients. As interesting clinical problems arise, time will be available for laboratory projects relevant to those problems. Students will act as primary consultants under close supervision of hematologic residents and fellows. LAB MED

140.05. Clinical Pathology—VMC. (1½ per week) F, W, Sp. Prerequisite: Medicine 110 and consent of instructor. M. Fisher, Sobenes
Clerkship in laboratory medicine including indications for tests, problems of collection and performance, interpretation of data to assist clinicians in rendering diagnoses and following therapy. Topics include clinical chemistry, radioisotopic pathology, hematology, immunology and serology, blood banking, microbiology, mycology, parasitology. LAB MED

140.06. Laboratory Medicine in Fresno. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Beland, L. Mann
Utilization of different laboratory settings, organizations, and approaches by pathologists in hospitals throughout the Fresno community. Included is coverage of traditional areas of clinical pathology in addition to such specialized areas as cytogenetics and therapeutic drug monitoring. LAB MED

150.01. Laboratory Medicine—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Townsend
An intensive four-week seminar series, using patient data, designed to increase the student’s ability to choose and interpret laboratory tests in a variety of clinical settings. The scope of tests discussed includes hematology, blood banking, clinical chemistry, and microbiology. LAB MED

160.01. Radionuclides. (2) Su, F, W, Sp. Prerequisite: One year of medical school. Lecture 1 hour. Clinic 4 hours. Pollycove
Basic laboratory course in nuclear medicine. Clinical participation in the diagnosis of patients receiving radionuclides in the outpatient clinics and in the wards. LAB MED

160.02. Sexually Transmitted Diseases. (2) W. Prerequisite: One year of medical school. Lecture 2 hours. G. Brooks
Course covers biological and clinical aspects of the syndromes and agents of sexually transmitted diseases, including herpes, chlamydia, gonorrhea, syphilis, salpingitis, vaginitis, and others. This is an elective course for second-year medical students. LAB MED

170.01. Clinical Pathology—UC & SFGH. (2) Su, F, W, Sp. Gottfried
Laboratory sessions and seminars on aspects of clinical chemistry, hematology, microbiology, blood banking, and radioisotopes are held in the clinical laboratories at UC and SFGH. LAB MED

Residents prepare summaries of selected clinical cases which present problems in correlation of clinical and laboratory data. Residents and faculty discuss relevant literature with special reference to technical aspects of laboratory procedures and interpretation of results. LAB MED

Review of current laboratory procedures and problems in hematology, microbiology, immunology, blood banking, chemistry, and application of isotopes. Library research and occasional formal reports are required. LAB MED

Research programs are arranged with appropriate faculty members on an individual basis. LAB MED

Seminars in clinical pathology, including clinical chemistry, hematology, immunohematology, microbiology, pathology, serology, and surgery conducted by faculty whose major interest is that under discussion. Residents do colloquial reading for discussion of problems of interpretation, diagnosis, techniques, and research approaches. LAB MED

Marton, Gottfried, Nicoll

Principles of laboratory tests in hematology, clinical chemistry, microbiology, and blood banking as well as interpretation of results and correlation of clinical and laboratory data. Residents participate in performance of tests and certain administrative duties related to operation of clinical laboratories. LAB MED

Marton, Gottfried, Nicoll

Theory and methodology of clinical chemistry, serology, blood banking, hematology, microbiology, pathology, and clinical microscopy. Emphasis is on interpretation and correlation of data and study of literature. LAB MED

452. Cytometry and Cell Analysis. (3) W

Lecture 3 hours.

Mayall, Fulwyler

Course introduces the theory and techniques of image cytometry, flow cytometry, and flow sorting, and surveys the research and clinical applications of these powerful techniques for the analysis of individual cells. LAB MED

Medical and Biological Illustration

200A-B-C. Introduction to Graduate Study. (2-2-2) § F, W, Sp. Lecture 2 hours.

Three-quarter course. Wakerlin, Beindorf

Overview of theory in instructional development. Review and development of writing, style and form for reports, essays and theses. Study of scriptwriting for media as a special form and style of literary expression and language usage. MED ILLUS

201A-B-C. Illustration Theory. (3-6, 3-6, 3-6) § F, W, Sp. Lecture 2 hours. Lab 3 hours.

Wakerlin

Theoretical and practical considerations in illustration design for publication, slides and motion media; introduction to two-dimensional illustration such as procedures, roles, observation, design technology and introduction to graphic arts and printing technologies; introduction to biological illustration, statistical graphics. MED ILLUS

204A-B-C. Advanced Illustration. (3-6, 3-6, 3-6) § F, W, Sp. Prerequisite: Medical and Biological Illustration 201A-B-C. Wakerlin, Dohrmann

Theory and practice in visual information design. Surgical illustration for publication and for projected media; publication design, layout, typography, paste-up and print technology. MED ILLUS

Wakerlin, Beindorf, B. Morris, Dohrmann

Review of anatomy and observation of the eye and eye through oto-scope, ophthalmostroscope and slit lamp. Ophthalmological illustration, endoscopic drawing, finished illustrations of a retinal field, slit lamp view and a microsurgical procedure. MED ILLUS

210. Teaching Styles & Strategies. (2) § Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture and lab 40 hours given as one week of workshops.

Wakerlin, Beindorf

Introduction for prospective teaching assistants to instructional techniques and strategies, learning-teaching, organizing study plans, presentation of information, student-teacher interactions, evaluation of learning and teaching, theories of learning and communication, planning audiovisual support materials. MED ILLUS

Beindorf

Ongoing seminar periodically throughout the program. Analyses of productions in all media. Readings and discussions of instructional design, communication and learning theory, and methods of evaluation. Participation by guest lecturers. MED ILLUS

230A-B-C. Intro to Communication Media. (3-6, 3-6, 3-6) § F, W, Sp. Lecture 1 hour. Lab 6 hours.

Beindorf

Survey of media production technology and formats. Still photography methods; black and white and color. Theory of media production in film, television and slide-tape augmented by consideration of techniques in storyboard, scriptwriting, sound and picture editing and animation. MED ILLUS

231. Advanced Media I. (3-6) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours.

Beindorf

Theory of motion media and practice in film and electronic camera techniques, editing, sound production and mixing, and project management. MED ILLUS

232. Advanced Media II. (3-6) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 6 hours.

Beindorf

Theory of production design. Roles of production personnel and task definition. Practice in preproduction plan of actual production to be selected for later production in slide-tape, film and television. Production subject to faculty approval and identification of funding. MED ILLUS

233A. Advanced Media III. (3-6) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 9 hours.

Beindorf
Theory and techniques of motion picture animation. Design and production of short full animation sequence with sound. Longer animated segment may be designed for completion in Medical and Biological Illustration 233B with consent of instructor. MED ILLUS 233B. Advanced Film Animation. (3-6) § F, W. Sp. Prerequisite: Medical and Biological Illustration 233A and consent of instructor. Lecture 2 hours. Lab 9 hours.

Beindorf

E lective continuation of Medical and Biological Illustration 233A, in motion picture film animation. MED ILLUS 298. Thesis. (0) § F, W. Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in the thesis project for the master's degree. MED ILLUS 421. Motion Media. (4) F. Lecture 2 hours. Lab 6 hours.

Beindorf, Banks

Film and television. Videotape production in a studio setting with inserts of student-produced motion pictures. Theories of motion dynamics of balance, subjective camera motion. Basic cinematography; TV technology; production economics. MED ILLUS 423. Graphics for Publication. (4) F, W. Sp. Prerequisite: Medical and Biological Illustration 201A-B-C and consent of instructor. Lecture 2 hours. Lab 6 hours. Wackerlin

Brochure design and production; photography in graphic design; layout; copy fitting; camera-ready mechanicals; typography; printing; photogravure; specifications for printing; paper stocks, inks, etc. MED ILLUS 431A. Project 1. (5) F, W. Sp. Prerequisite: Medical and Biological Illustration 201A-B-C and 250A-B-C. Lecture 2 hours. Lab 9 hours. Staff

Students work on an actual instructional unit in medium of their choice determined by teaching needs, and developed through instructional design concepts, storyboard, script, production planning and budget. MED ILLUS 431B. Project II. (5) F, W. Sp. Prerequisite: Medical and Biological Illustration 431A and consent of instructor. Lecture 2 hours. Lab 9 hours. Staff

Completion of project. MED ILLUS 431C. Project III. (5) F, W. Sp. Prerequisite: Medical and Biological Illustration 431A and 431B and consent of instructor. Lecture 2 hours. Lab 9 hours. Staff

Additional for special study in area of choice. MED ILLUS 436A-B-C. Portfolio & Graduate Show. (4-4-4) F, W. Sp. Lecture 1 hour. Lab 9 hours. Wackerlin, Beindorf

Portfolio design and assembly; design and production of graduate show including budget and arrangements for space, guest lists, invitations, food and beverages for reception. MED ILLUS 172. Programming Style. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Wasserman

A systematic approach to the design and construction of computer programs. Development of clear, reliable, efficient and easily modifiable programs; introduction and use of Pascal; use of software tools; programming exercises involving advanced programming techniques. MED INF SC 173. Intro to Microcomputer Systems. (2) § F. Lecture 1 hour. Lab 2 hours. Staff

A survey of microcomputer systems providing basic conceptual models of computing in a health care environment. Introduction to computer terminology, hardware, operating systems, programming languages, and software tools. Overview of applications software: word processing, data-base management systems, and electronic spreadsheets. MED INF SC 190. Information Structures. (4) § Sp. Prerequisite: Knowledge of one higher level programming language. Lecture 3 hours. Lab 3 hours. Staff

Course covers elementary and high level information structures, data models, file organization techniques and searching, and sorting. Special topics in non-numerical information handling are also included. MED INF SC 199. Laboratory Project. (1-5) § F, W. Sp. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. MED INF SC 200. Off-Campus Study. (0) § W. Prerequisite: Approval of the graduate adviser. Open only to students enrolled in the graduate program in Medical Information Science. Blois and Staff

Full-time graduate study in the Medical Information Science program through the intercampus exchange or consortium program. MED INF SC 201. Content & Format of Information. (2) § Sp. Prerequisite: Medical Information Science 290 or equivalent. Lecture 2 hours. Whiting-O'Keefe

Consideration of the uses of medical information and its content, organization, and format to serve these uses. Particular emphasis is on the medical record systems (both computerized and manual) as a medium of med-
210A. **Computer Systems I.** (4) § F Prerequisite: Medical Information Science 190 or equivalent, or consent of instructor. Lecture 3 hours. Lab 3 hours. Wasserma

Introduction to computer system architecture and organization; operating systems; programming languages and their design. MED INF SC

210B. **Computer Systems II.** (4) § W Prerequisite: Medical Information Science 210A or equivalent, or consent of instructor. Lecture 3 hours. Lab 3 hours. Wasserma

Language processors; software engineering concepts; specification and design of software systems; and software reliability. MED INF SC

222. **Systems Analysis of Medical Care.** (4) § W Lecture 4 hours. Stimson

Introduction to use of operations research and systems analysis as aids to design, management or evaluation of medical care systems. Application of operations research techniques to hospitals and other health care facilities is studied within a systems framework. MED INF SC

225. **Design of Systems.** (2) § W Prerequisite: Consent of instructor. Lecture 2 hours. Briscoe

The design of previous medical information systems is examined. Successful components of the systems will be studied in depth, with respect to cost, performance, and acceptability. Field trips to existing systems will be made. MED INF SC

240. **Data Base Management.** (3) § Sp Prerequisite: Medical Information Science 210B or equivalent, or consent of instructor. Lecture 5 hours. Course covers techniques for logical and physical data base organization, data independence, models of data, approaches to large scale data base management, security and privacy, data description languages, and query languages. MED INF SC

Course covers the treatment of a number of fundamental concepts which form the basis of information science, such as the nature of information and communication, and the problem of representation of knowledge. MED INF SC

250. **Research.** (1-8) § F, W, Sp. Staff MED INF SC

290. **Selected Topics.** (1-6) § F, W, Sp. Lecture 1 hour. Lab 0-15 hours. Staff

Selected topics in medical information science. Subjects chosen will range from special topics in information science to hardware, software, and systems studies. MED INF SC

299. **Dissertation.** (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. MED INF SC

**Medicine**

110. **Medicine Core Clerkship.** (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and 132A-B-C. Open to UCSF students only. Jessop, Tierney, R. Haber, Woebner

Students are part of the ward team with the house staff and faculty. Bedside instruction in history-taking, physical diagnosis, selected seminars in general medicine including the psychiatric aspects of medicine, and presentations and demonstrations of relevant cases. MEDICINE

111. **Mechanisms of Disease.** (1½ per week) Sp. Prerequisite: Fourth-year standing in the medical school. Kane

An in-depth study of the mechanisms involved in serious disease processes. Emphasis on acquisition of basic science information by physicians and on the logical development of nosology and planning of intervention based on principles drawn from basic science. MEDICINE

112. **Responsibilities of Med Prac.** (1½ per week) F, W, Sp. Prerequisite: Medicine 110 and Surgery 110. Jonsen

Course will discuss economic forces, ethical and legal issues, social and cultural factors, and governmental policies affecting medical practice. It will define professional responsibilities in the context of these influences and the resulting forms and trends in medical practice. MEDICINE

131A-B-C. **Intro to Clinical Medicine.** (1-2-3) F, W, Sp. Prerequisite: First-year standing or consent of instructor. Lecture 1 hour Sp. Section work 2 hours F, W; 4 hours Sp. Jessop

Interdepartmental instruction in: interviewing skills and techniques; basic physical examination and interpretation of symptoms relating to locomotor system, eye, ear, upper respiratory tract, and skin; and social responsibilities of medical practice. Lectures, clinical demonstrations, conferences, preceptorship in ambulatory care setting. MEDICINE

132A-B-C. **Intro to Clinical Medicine.** (8-8-3) F, W, Sp. Prerequisite: Anatomy 100, 102, and 103; Biochemistry 100A-B; Medicine 131A-B-C; Microbiology 100A and 100B (may be taken concurrently); Pathology 101, 102, and 103 (may be taken concurrently); Physiology 100 and 101; or consent of instructor. Lecture 5 hours, F, W; 1 hour Sp. Lab 2 hours F; Section work 4 hours F, Sp; 5 hours W. Staff

Continuation of interdepartmental course on pathophysiology of disease and techniques of collecting and assessing clinical data, including history-taking, examination of the...
140.05. Cardiology—PMC. (1 1/2 per week) Su, F, W. Prerequisite: Medicine 110 or consent of instructor. **Gregoratos**

Students participate in various clinical cardiological activities and attend related teaching conferences and patient rounds. They are instructed in electrocardiographic interpretation and participate in daily ECG teaching sessions. MEDICINE

140.07. Oncology—SPGH. (1 1/2 per week) F, W. Sp. Prerequisite: Medicine 110. **Volberding**

Students will evaluate patients with malignant diseases under the supervision of oncology fellows and attending physicians. Students will see oncology patients in outpatient clinic and on the inpatient consultation service. In addition to a broad exposure to a wide range of malignant diseases, the students will be allowed to participate in the outpatient evaluation of patients with AIDS and Kaposi’s sarcoma. MEDICINE

140.08. Gastroenterology—UC. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110. **Ockner**

Students examine hospitalized and ambulatory patients, participate in their care, and present case summaries to supervising gastroenterology fellows and attending physicians. They attend all rounds and teaching conferences and may observe performance of various diagnostic and therapeutic procedures. MEDICINE

140.09. Cardiology—MZ. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110 and 140.01 or equivalent senior ward medicine experience. Consent of instructor. **Mailhot, E. Cohen, Paley**

Students work up patients, follow through diagnostic procedures, phonoangiograms, echocardiograms, stress electrocardiograms, nuclear cardiology, and angiographic studies. Instruction in diagnosis of heart disease, pathophysiology of heart disease, heart sounds and therapy. Attendance at departmental conferences. Reading assigned. MEDICINE

140.10. Pulmonary Medicine—MZ. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110 and 140.01 or equivalent senior ward medicine experience. Consent of instructor. **Addison**

Consultative service including diagnostic pulmonary problems. Intensive Care Unit consultations. Fiberoptic bronchoscopy and physiologic evaluation. Students will work up patients and follow them on a daily basis, discussing all aspects of their care with pulmonary residents and attending physician. MEDICINE

140.11. Hematology/Oncology—C. (1 1/2 per week) S, F, W. Sp. Prerequisite: Medicine 110. **R. Cohen**

Under supervision of attending and house staff, students review pathologic and relevant clinical laboratory data, interpret bone marrow slides, and work up and present patients on the wards and outpatient clinics. Participate in conferences and seminars. MEDICINE

140.16. Hematology—SPGH. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110. **Embry**

Students work under supervision of fellows and faculty; review relevant clinical laboratory data; interpret bone marrow slides; see hematology patients in the outpatient clinic and the inpatient consultation service. Emphasis is on sickle cell disease, other hemoglobinopathies, and coagulation problems. MEDICINE

140.18. Gastroenterology—VA. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110 and fourth-year standing. **T. Boyer**

Students share consultations with GI fellows; work up patients on wards; see patients in outpatient; attend endoscopies; attend rounds and conferences. MEDICINE

140.19. Cardiology—VA. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110. **Karliner**

Students share consultations and on-call with cardiology fellows; work up patients on wards; interpret electrocardiograms and Holter monitor studies; attend rounds and conferences. MEDICINE
140.20. Infectious Disease-UC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110. 
J. Conte
Students work up and present patients under the direct supervision of the infectious disease resident. Patients are presented at attending rounds and infectious disease conferences. MEDICINE

Josse
Working experience with an internist on clinical faculty as he/she makes rounds in various private hospitals and at UC, sees patients in private office and on house calls, does follow-up studies, and reads electrocardiograms. MEDICINE

140.22A. Pathophysiology-Cardiovascular. (6) W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited. 
Sebastian, Sleisenger, Dohrmann
Overall emphasis on prototypes of cardiovascular disease demonstrating fundamental physiological defects. Lectures cover background material and general concepts. Students participate in discussions, attend laboratory demonstrations, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

Siperstein, Sleisenger, Dallman, Ries
Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22C. Pathophysiology-Renal Disease. (6) F, Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited. 
Sebastian, Sleisenger
Intensive review of renal physiology and pathophysiology. Two seminars per day. Two-volume syllabus of journal articles provided. Students participate in discussions and learn to evaluate literature critically. MEDICINE

Siperstein, Sleisenger, Epstein
Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22E. Pathophysiology-Derm/Inf Disease. (6) F. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. 
Siperstein, Sleisenger
Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22F. Pathophysiology-Therapeutics. (6) F. Prerequisite: Medicine 110 or Pediatrics 110 or Surgery 110. Enrollment limited. 
Sebastian, Benowitz
Emphasis on applied pathophysiology and clinical therapeutics. Lectures and case-oriented workshops presenting the principles of therapeutics with application to specific therapy of common cardiovascular, respiratory, gastrointestinal, and infectious diseases as well as diabetes. MEDICINE

140.22G. Pathophysiology-Immunology. (6) W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sebastian, Sleisenger, Stobo
Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

Siperstein, Sleisenger, Diamond
Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22I. Pathophysiology-Endocrine Metabolism. (6) F. Sp. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Sebastian, Strewler
Overall emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22J. Pathophys-Gastroenterology. (6) W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited. 
Sebastian, Boyer, Sleisenger
Overall emphasis on prototypes of disease in organ systems demonstrating fundamental bio-chemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. MEDICINE

140.22K. Pathophysiology-Pulmonary. (6) F, W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sebastian, Sleisenger, Golden

Emphasis on prototypes of disease in organ systems demonstrating fundamental biochemical or physiological defects. Lectures cover background material and general concepts. Students participate in discussions, workshops, seminars; are assigned topics for presentation, and are encouraged to develop ability to evaluate literature critically. Reading lists. MEDICINE

140.22L. Pathophysiology-Nutrition. (6) W. Prerequisite: Medicine 110, Pediatrics 110 or Surgery 110. Enrollment limited.

Sebastian, Sleisenger, Baron

Emphasizes biochemical and physiological concepts that determine nutritional management of problems in clinical medicine. Students attend lectures, participate in discussions and develop an independent ability to critically evaluate research literature in nutrition and apply information to management of specific clinical problems. MEDICINE

140.23. Endocrine Metabolism—UC. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110. Baxter, Karam

Students based at Moffit Hospital, twelfth floor south. Act as assistants to residents and to endocrine fellows for consultations as well as for hospitalized endocrine patients; attend endocrine and metabolic clinics and seminars, and teaching exercises of endocrinology and metabolism, including Medicine Grand Rounds. MEDICINE

140.24. Rheumatology & Immunology—UC. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110.

Familiarization with clinical manifestations, rheumatic disease therapy, immunologic disorders. Participation in inpatient and outpatient clinics. Basic immunologic principles as related to clinically apparent immunologic dysfunction. Assignment of pertinent literature, lectures, and introduction to principles and practice of various immunologic testing. MEDICINE

140.25. Renal Disease—SFUH. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110 and fourth-year standing. Humphreys

Students work up and follow up patients with a wide variety of renal and electrolyte disturbances, and see outpatient in a weekly Renal Clinic. Cases are discussed with attending physicians daily. Students also attend weekly Journal Club, Renal Grand Rounds, and Chief of Service Rounds. MEDICINE

Primary emphasis is on the management of critically ill patients in Coronary Care Unit and Intensive Care Unit. Includes teaching in the use of monitoring equipment, cardioversion, and related aspects of critical care medicine. MEDICINE

140.27. Cardiopulmonary—C. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110. Kercher

Students attend rounds in the Coronary Care Unit; receive instruction in cardiology, stressing electrocardiography; may work in the pulmonary function laboratory; and attend all regular teaching conferences and seminars. MEDICINE

140.28. Infectious Disease—SFUH. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110. J. Mills

Course includes active consultation service, averaging three new consults per day. Daily patient rounds; weekly combined infectious diseases/pediatrics mini-rounds and infectious diseases integrity rounds. Two half-day infectious diseases clinics per week. Reading and library research. MEDICINE

140.29. Hematology—UC. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110. Shuman

Students work up and present patients in the wards and outpatient clinics, participate in conferences and seminars, and learn the laboratory procedures applicable to their patients. MEDICINE

140.30. Endocrine Metabolism—SFUH. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110 and fourth-year standing. Bigleri, Schambelan

The Endocrine-Metabolic Service provides daily house staff fellow-supervised consultations, three weekly clinics, biweekly rounds with senior staff, conferences on current research. Emphasis on clinical investigation of endocrine disorders in the General Clinical Research Center. MEDICINE

Students function as clinical clerks, working up patients under supervision of interns and residents. They assist in such specialized procedures as sigmoidoscopies per oral endoscopies. They attend radiology and pathology conferences and seminars with visiting consultants. MEDICINE

140.32. Coronary Care—SFUH. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 110. Fourth-year standing or consent of instructor. A four-week cardiology elective or Medicine 140.01 is recommended.

N. Goldschlager
Students work as interns in the Coronary Care Unit and attend all regular teaching conferences and seminars. MEDICINE

140.34. Renal Disease—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Rector

The student will join the renal team and participate under supervision in evaluation and treatment of patients with renal disease or disorders of fluid, acid-base, or electrolyte balance. Emphasis is placed on pathophysiology, history-taking, physical examination, and treatment. MEDICINE

140.35. Cardiology—SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Cheitlin, Rapaport, N. Goldschlager, Morelli, Dohrmann, Sung

Students see patients in consultation on wards and clinics, read electrocardiograms, review cases with cardiac consultant, and attend all seminars and conferences. MEDICINE

140.36. Emergency Medicine—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing. Schumaker

Students serve 40 hours per week as externs working and sharing responsibilities with residents and interns. Lectures and emergency medicine conferences are held daily. Emphasis is on bedside instruction. MEDICINE

Students serve 40 hours per week as externs working and sharing responsibilities with residents and interns. Lectures and emergency medicine conferences are held daily. Emphasis is on bedside instruction. MEDICINE

Boushey

Students examine patients in Chest Clinic, on the wards and in RCU, and present them at ward rounds, pulmonary function and radiology conferences. They participate in pulmonary function testing and do assigned reading. MEDICINE

140.41. Gastroenterology—SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Limited to fourth-year students. Cello

Students are responsible for evaluation and presentation of gastrointestinal patients on medical and surgical wards. Work-ups are thoroughly discussed with gastroenterology staff. Students may also observe GI techniques including sigmoidoscopy, colonoscopy, endoscopy, liver biopsy. Conferences held weekly in conjunction with Surgery, Pathology and Radiology. MEDICINE

140.42. Toxicology & Occup Med—SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing. C. Becker

Students evaluate patients in hospital and clinic settings, as well as consultations from SF Bay Area Poison Control Center. Students participate in patient-oriented rounds with special emphasis on toxicology, occupational medicine, drug overdose, drug abuse, and alcoholism, as well as treatment of cardiovascular and gastrointestinal diseases. MEDICINE

140.43. Rheumatology & Immunology—VA. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Seaman

A four-to-twelve-week introduction to rheumatology and immunology, offering both clinical and laboratory experience. The student will participate in inpatient and outpatient care and take part in didactic and practical aspects of the research program. MEDICINE

140.45. Endocrine Metabolism—VA. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and consent of instructor. Enrollment limited. Priority given to UCSF students. Siperstein, Arnaud

An introduction to the diagnosis and treatment of endocrine-metabolism diseases. Areas covered are those endocrinopathies involving the major endocrine glands, as well as diabetes mellitus and hyperlipemias. Patients will be examined and treated in both the inpatient and outpatient services. MEDICINE

140.46. Pulmonary Medicine—SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year medical student in good standing. J. Murray, Hopewell, Sheppard

Pulmonary disease, including clinical manifestations, basic pathophysiology, use and limitations of diagnostic studies and treatment. Experience will be gained by seeing patients on wards and through a series of ongoing conferences, ward rounds and review sessions under close faculty supervision. MEDICINE

140.52. Renal Disease—VA. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.

Arieff

Clerkship in clinical nephrology. Lectures, rounds, conferences, renal biopsy review. Patients with acute and chronic renal disease, acute and chronic dialysis patients, patients with fluid and electrolyte problems. Renal grand rounds, journal club, nephrology research, and renal pathophysiology conferences weekly. MEDICINE

140.53. Infectious Disease—MZ. (1½ per week) F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing. L. Drew, Mintz

Clinical and laboratory experience providing integrated approach to infectious diseases. Emphasis on learning techniques in diagnostic microbiology (e.g., Gram stains, bacterial & viral cultures), and correlating these findings with clinical diagnosis and patient management. Clinical and laboratory experience available. MEDICINE

Students, teamed with a resident, will evaluate and share in the care of patients admitted to an intensive care unit, observing and participating in care and in teaching conferences. MEDICINE
to an acute care hospital. Experience includes history-taking, physical examination, therapeutic plan, and progress notes. Attendance at daily teaching rounds and conferences. MEDICINE

140.56. Geriatric Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing. Feigenbaum, H. Brownstein

Offers the opportunity for participation in various medically-oriented geriatric programs. Assignment to health care teams seeing patients at home, at MZ Geriatric Day Care Center, Geriatric Inpatient Assessment and Rehabilitation Unit, in-hospital consultations, and participation in multidisciplinary geriatric assessment. Supervision under MZ faculty and fellows in geriatric medicine. MEDICINE

140.57. Cardiology--VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. Deedwania

Students see patients in the coronary care unit, wards and clinics at the University of California Teaching Facility at Fresno. They will develop and implement treatment plans with the consultant, read electrocardiograms, and attend all seminars and conferences. MEDICINE

140.58. Pulmonary Disease--VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor. P. Baylor

Students on Chest Service will have primary care responsibilities for medical inpatients under supervision of the Physician Director of the Respiratory Care Service. Instruction on topics such as the use of respirators, arterial blood gas sampling and techniques. MEDICINE

Rotation through an active renal transplant service including clinical immunology, clinical renal pathophysicsology, renal diagnosis such as X-ray, biopsy, scan. The student’s experience in the care of inpatients and outpatients will encompass other internal medical problems as well. MEDICINE

140.60. Rheumatology--VMC & VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. Beriken

Experience with rheumatic diseases and chronic musculoskeletal pain including arthritides and collagen-vascular disorders as seen in clinics. Develop skills in history-taking, physical examination, selection and interpretation of diagnostic procedures, approaches to management, including drug therapy. Supervision by division chief and faculty. MEDICINE

140.61. Advanced Medicine Clerkship--VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. B. Murray

Assignment to teams with first- and second-year resident, rounds with attending faculty four to five times weekly; attend daily noon conferences; increase skills in history-taking, physical examination, write-ups, and oral presentation. Experience in writing orders countersigned by resident. MEDICINE

140.62. Emergency Medicine--MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing. Savitsky

Emergency room experience providing acute care to a mixed inner city and middle class population. Students see medical emergencies, minor trauma, and acute problems in a variety of disciplines including gynecology, ophthalmology, ENT, and orthopaedics. Attendance at specialty conferences encouraged. MEDICINE

140.63. Advanced Medicine Clerkship--KP. (1½ per week) Su, F, W, Sp. Wagner

Fourth-year elective rotation for one month on medical wards at Kaiser Foundation Hospital in Oakland. Students will be integrated into the residency training program and will be involved in the care of hospitalized patients in an urban community prepaid health plan hospital. MEDICINE

140.64. Cardiology--UC. (1½ per week) F, W, Sp. Prerequisite: Medicine 110. D. Perloff, Scheiman

Instruction in interpreting electrocardiograms as well as other diagnostic procedures used in cardiology; such as echocardiography, exercise testing, use of radioisotopes, electrophysiologic, hemodynamic, and radiologic studies. Students regularly attend cardiac and hypertension clinics, cardiology conferences and rounds. MEDICINE

140.65. Oncology--UC. (1½ per week) W. Prerequisite: Medicine 110 or Pediatrics 110 or Surgery 110. L. B. Epstein

Four one-week clinical rotations taught by faculty in inpatient medical, pediatric, radiation, and surgical oncology. Daily noon lectures on diagnosis, management, therapy of patients with malignancy by faculty and guest oncologists. Syllabus of pertinent references from current oncology literature. MEDICINE

140.66. Internal Medicine--VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing. Libke

Students assigned to teams with first- and second-year residents, rounds with attending faculty, participation in daily conferences. Emphasis on pathophysiology of disease processes, management of acute medical problems. Refine skills in history-taking, physical examination, write-ups, presentations, techniques of diagnostic procedures. MEDICINE

140.68. Infectious Disease--VMC & VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110. Libke

Management of common and unusual infectious diseases. May include use of antimicrobials in presence of impaired renal or
hepatic function, treatment of infection in immunologically compromised host, etc. Participation in patient evaluation, treatment follow-up, ward rounds, conferences. Microbiology laboratory can be arranged. MEDICINE

140.69. Cardiology—VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor.
Grayson
Participation with house staff in patient care on CCU, ICU, medical wards, outpatient clinics. Introduction to invasive and non-invasive diagnostic procedures, techniques of management in care of hospitalized and ambulatory patients. Attend ECG interpretations, CCU rounds, consults, and teaching conferences. MEDICINE

140.70. Hematology, Oncology—VMC & VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing and Medicine 110.
Stolberg
Students participate in the work-up of hospitalized patients and follow up progress of patients in specialty clinics seen in consultation by hematology oncology staff. Clinical experience is augmented by reading program, slide review sessions, tumor board meetings and specialty conferences. MEDICINE

140.71. Pulmonary Disease—VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or consent of instructor.
Lohne, Hirasuna
Evaluation and management of adult patients with respiratory diseases, supervised by house staff and faculty. Pulmonary Medicine section. Emphasis on physical examination of chest, interpretation of X-ray, arterial blood gases, pulmonary function studies. Gain familiarity with respirators and other aspects of respiratory care. MEDICINE

140.72. Gastroenterology—VAF. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing and Medicine 110. Gitlin, Quint
Participation in evaluation of patients with gastrointestinal problems (gastroscopies, ERCP, colonoscopies, liver biopsies, peritoneal biopses, bowel biopsies) on wards and in outpatient clinic. Experience includes demonstration of investigation (acid perfusion and others), weekly clinical conference, liver histology, and tutorial discussion sessions. MEDICINE

140.73. Rheumatology & Immunology—SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110.
1. Goldstein, H. D. Perez
Students will be assigned inpatients and outpatients for work-up and management under the supervision of fellows and attending physicians. Students will also participate in clinical rounds, clinical conferences, research seminars and journal clubs. MEDICINE

140.74. Medical Consultation—SFH. (1½ per week) F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing.
Cooke
Clerkship in Medical Consultation at SFH. Also includes a half-day clinic in which pre-operative medical evaluations are performed for patients about to undergo elective surgery. MEDICINE

140.75. Inpatient Medicine—K. (1½ per week) S, F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing.
Fessel
Students based at Kaiser Foundation Hospital serve as clinical clerks. They examine patients, participate in ward rounds, and attend teaching seminars and conferences of the Department of Medicine. MEDICINE

140.76. Cardiology—KP. (1½ per week) S, F, W, Sp. Prerequisite: Medicine 110 and fourth-year standing.
Killebrew
Exposure in Coronary Care Unit with numerous acutely ill patients offering non-invasive training in echocardiography and electrocardiography, Holter monitoring, and a good exposure to nuclear cardiology. MEDICINE

Snyder, Shipp
Students gain an extensive experience in care of patients with diabetes and other endocrine disease through active participation in special diabetes inpatient units, ward consultations, diabetes and endocrine clinics, and patient educational programs located at Valley Medical Center and in the community. MEDICINE

150.01. Research in Medicine. (1½ per week) S, F, W, Sp. Prerequisite: Consent of faculty member in charge of student’s research project and approval of third- and fourth-year coordinator.
Jessop
Students continue previously initiated research projects under the guidance of faculty members. MEDICINE

150.03. Cancer Viruses. (1½ per week) S, F, W, Sp. Prerequisite: Basic course in microbiology.
J. A. Levy
Tissue culture techniques and animal experimentation will be used to demonstrate the role of viruses in animal malignancies and autoimmune disease. Research serves as a model system for studying similar disorders in man. MEDICINE

160.03. Clinical Skills Seminar. (2) W, Sp. Prerequisite: Second-year standing or consent of instructor. Seminar 1 hour. Lab 3 hours.
Fitz, K. Fitzgerald, Veatch
Skills laboratory seminar designed to create a working relationship between medical and nursing students, using teaching and acquisition of clinical and communication skills as the interactive mode. Bedside skills for direct patient care will be taught and practiced. MEDICINE

D. Cox
170.05. Clinical Occupational Medicine. (1-5) F, W, Sp. La Dou, Garb

Clinical demonstrations and case presentations representative of occupational and environmental disease. MEDICINE

170.03. High Professional & Nuclear War. (2) F Lecture 2 hours. Hulley, Kief er

Designed to give a working knowledge of: (a) medical, sociopsychological, and ecological effects of nuclear war; (b) nuclear weapons technology and strategy; (c) the bearing of the threat of nuclear war on the role of the health professional in today's society. MEDICINE

Instruction in basic electrophysiologic principles and interpretation of electrocardiograms. MEDICINE

170.05. EKG Interpretation. (1) W Pre-requisite: Medicine 131A. Lecture 1 hour. Rapaport

Review of physical principles of electrocardiography and clinical application of electrocardiographic interpretation. MEDICINE

A journal club through which all medical students interested in basic research can maintain contact with investigative medicine. Students research and present 2-3 journal articles in a subject of their choice. Critical group discussion with interested faculty follows. MEDICINE

170.07. Non-Invasive Cardiology. (1) Sp. Prerequisite: Medicine 170.05. Rapaport

Fundamentals of non-invasive laboratory and cardiology procedures will be discussed. Techniques and role of echocardiography, stress electrocardiography, Holter monitoring, phonocardiography, systolic time intervals, vectorcardiography, apexcardiography and other areas will be covered. MEDICINE

Focus on research interests of UCSF faculty. Provides broad introduction to campus research, practice in reading and analyzing research publications. Speakers talk includes discussion of their background, present research, background description on research area, and discussion of future research plans. MEDICINE

170.10. Intro to Occupational Medicine. (1) W Lecture 1 hour. La Dou

Practice of occupational medicine as related to the prevention, recognition, and treatment of disease and injuries resulting from employment. Interaction of economic, political, and social forces bearing on worker health problems. Effects of the enterprise on the community and consumer. MEDICINE

170.11. Environmental Medicine. (1-5) F, W Seminar 1-5 hours. La Dou

Tutorial concerned with environmental medical problems. MEDICINE

Course covers the physiology and psychology of normal aging, health care problems of the elderly, including confusional states, techniques of rehabilitation medicine, use of medications, and sexuality in old age are reviewed. Site visits to a nursing home and an adult day health care program are optional. MEDICINE

180. Industrial Toxicology. (2) § Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. C. Becker

To provide understanding of basic principles of toxicology as related to work environment and workers' health. Emphasis is on chemicals including heavy metals and pesticides, methods of surveillance, principles of acute and chronic toxicity testing. Includes lectures, student presentations, and discussion. MEDICINE

188.01. Nation's Health. (2) § F, W, or Sp. Lecture 2 hours. P. Lee and Staff

Course will address health policy issues related to the health status of the population, the determinants of health, and health care. Jointly offered with Sociology 160 and Sociology 220. MEDICINE

188.02. Health Policy Research Seminar. (2) § F, W, or Sp. Prerequisite: Consent of instructor. Lecture 1-2 hours. Seminar 1-2 hours. P. Lee and Staff

An introduction to the application of policy research methods to current policy issues, an interdisciplinary seminar. MEDICINE

188.03. Economics of Health. (2) § F, W, or Sp. Lecture 2 hours. P. Lee, Luft

This course will demonstrate how basic economic concepts and tools can be applied to problems in the health care system. Specifically: measurement of output; demand for care, insurance, and incentives; supply of physicians' services; health sector planning; and an alternative view of the system. MEDICINE

188.08. Health & Human Rights. (3) § Sp. Lecture 1½ hours. Seminar 1½ hours. Jonsen

The problems of allocation of health care and equity of access are analyzed as ethical considerations. Alternative systems of distribution
of care and technologies such as organ transplan-
tation are studied. MEDICINE

189. Bioethics. (1) § E Lecture 12 hours.
Course is given as a two-day workshop.

Jonsen

Four cases illustrating typical ethical issues:
patients' rights to treatment, to refuse treat-
ment, to choose one's own treatment, and
to equal treatment, are presented and ana-
lyzed. Formation of personal ethical position
in light of current law and ethics is stressed.
MEDICINE

189.01. Ethics in Health Care. (1) § W
Lecture 12 hours. Course is given as a two-
day workshop.

Jonsen

Lecture and workshop discussion of several
medical care situations in the light of their
ethical and policy dimensions: care of en-
dangered and defective newborns, experi-
mentation using normal children, public
funding of sterilization programs, and chronic
disease and quality of life. MEDICINE

189.02. Biomedical Ethics. (1) § Sp.
Lecture 12 hours. Course is given as a two-
day workshop.

Jonsen

Lecture and workshop discussion of ethical
and policy dimensions of several current
biomedical issues: aging and health care, fetal
research, behavior technology, and the role
of the pharmaceutical industry in health care.
MEDICINE

Prerequisite: Consent of instructor preceptor
and approval of third- and fourth-year
coordinator.

Jesp

Library research and directed reading under
supervision of a member of the faculty with
the approval of the chairperson of the de-
partment. MEDICINE

Prerequisite: Consent of instructor preceptor
and approval of third- and fourth-year
coordinator.

Jesp

A laboratory research project under di-
rection of a member of the faculty with the
approval of the chairperson of the depart-
ment. MEDICINE

Prerequisite: Graduate standing. Consent of in-
structor. Lecture 2-4 hours.

P. Lee, H. Lipton

Examines the health status of the aged in
the U.S. in light of relevant biological, be-
havioral, sociocultural and environmental
factors. Social, cultural and economic factors
affecting the organization, financing, and de-

delivery of health care to the aging population
are examined. MEDICINE

400. Medical Staff Conferences. (2) F, W,
Sp. UC L. H. Smith, SFCHI Rapaport,
VA Sleigher

VA Sleigher

Interns and residents prepare and present
case histories of patients at medical staff con-
ferences including references to the literature,
laboratory work, and special studies. Faculty
members and visiting professors discuss the
cases and present new developments to their
respective fields. MEDICINE

401. Interdept Clinical Correlation. (4)

L. H. Smith

A series of discussions is conducted in the
various subspecialties of internal medicine.
Students take an active part in the presenta-
tion and discussion of the problems involved,
including reference to the literature, clinical
demonstrations, and directed student partic-
ipation. MEDICINE

402. Medical Literature Seminar. (1½) F,
W, Sp.

VA Sleigher

VA Sleigher

Seminars on recent literature in internal
medicine, with assigned reading, required
reports, and evaluation of presented material
by interns, residents, and faculty. MEDICINE

L. H. Smith

Seminars are conducted in the fields of

gastroenterology, hematology, cardiology,
electrocardiology, endocrinology, chest dis-
eases, psychosomatic medicine, arthritis and
rheumatic diseases, infectious diseases, and
radiology. Library research, occasional formal
reports and patient presentations are required.
MEDICINE

SFGH H. Williams and Staff

Seminars are conducted in cardiology,

gastroenterology, infectious
diseases, metabolic diseases, and pathology, in-
volving discussions, required reading, and
reports. MEDICINE

VA Sleigher

Seminars are conducted in cardiology,
electrocardiology, hematology, gastroenter-
ology, radiology, fluid and electrolyte balance,
endocrinology and pathology, involving dis-
cussions, required reading, and reports. Elec-
tive seminars include a chest disease con-
fERENCE, joint medical and surgical con-
fERENCE, tumor board, dermatology confer-
ence, and neuropsychiatry conference. MED-
ICINE

406. Research Elective. (1-10) Su, F, W,
Sp. UC L. H. Smith, SFCHI H. Williams,
VA Sleigher

VA Sleigher

Research programs are arranged with ap-
propriate faculty members on an individual
basis. MEDICINE

407. Clinicopathological Conference. (1)
F, W, Sp. SFCHI H. Williams,
VA Sleigher

Residents take an active part in the pre-
sentation and discussion of problems con-
ected with the correlation of clinical mani-
festations of disease with postmortem studies.
Conferences include reference to the liter-
ature, clinical demonstrations, and laboratory
work. MEDICINE

408. **EKG Interpretation.** (2) Su, F, W, Sp.  
Sokolow  
Seminars (individual instruction) for residents in medicine and trainees in cardiology by cardiac consultants in the interpretation of all electrocardiograms and phonocardiograms taken at UC Medicine.

*SGH/H. Williams, UC L. H. Smith*  
Residents are responsible for the care of patients under the direction of the attending staff, and participate in student teaching. Third-year, senior and chief residents provide teaching and consultation service in the hospitals and outpatient clinics. MEDICINE

*Weber*  
Residents are responsible for the care of patients under the direction of the attending staff, and participate in student teaching. Senior residents provide teaching and consultation service in the hospital and outpatient clinics. MEDICINE

452. **Clinical Medicine.** (1 1/4 per week) Su, F, W, Sp.  
*VAF Rosenstiel*  
Residents are responsible for patient care under the direction of the attending staff, including history-taking, physical examination, laboratory tests, and consultations. The chief resident, in addition, has certain responsibilities involving the residents, and consults for all other hospital services. MEDICINE

460. **Clinical Primary Care.** (1 1/2 per week) Su, F, W, Sp.  
*Crede and Staff*  
Interns in the Primary Care Track of Internal Medicine are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Medicine Internship Program as well as related clinical services such as Dermatology, Neurology. MEDICINE

461. **Clinical Primary Care.** (1 1/2 per week) Su, F, W, Sp.  
*Crede and Staff*  
Residents in the Primary Care Track of Internal Medicine are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Medicine Internship Program as well as related clinical services such as Dermatology, Neurology. MEDICINE

490. **Clinical Medicine.** (1 1/2 per week) Su, F, W, Sp.  
*SGH/H. Williams*  
Interns rotate through medical wards and emergency hospital. Under the supervision of the attending staff, they are responsible for the care of patients, including history-taking, medical work-ups, laboratory tests, and consultation. MEDICINE

491. **Clinical Medicine.** (1 1/4 per week) Su, F, W, Sp.  
*SGH/H. Williams*  
A modified “straight” medical internship consisting of eight to nine months service in general medicine, chest, and the emergency room, with three to four months spent in other hospital services. MEDICINE

495. **Clinical Medicine.** (1 1/4 per week) Su, F, W, Sp.  
*UC L. H. Smith*  
Interns are responsible for the care of patients under the direction of the attending staff, and participate in student teaching. MEDICINE

**Microbiology and Immunology**

100A. **Medical Immunology.** (1 1/2) Sp.  
Prerequisite: Biochemistry 100A-B. Lecture 4 hours. Equivalent to Microbiology 121 and 190A.  
Lectures on the fundamentals of immunology. Small group seminars on patient-related problems in this field. MICROBIOL

100B. **Medical Microbiology.** (6 1/2) F  
Prerequisite: Biochemistry 100A-B. Lecture 4 1/2 hours. Lab 3 hours. Conference 1 hour. Equivalent to Microbiology 190B.

W. Levinson  
Pathogenesis of infection by bacteria, fungi and viruses. Essentials of diagnosis, treatment, and epidemiology of diseases. Laboratory demonstrations and exercises of essential medical skills. Problem-solving exercises and small group seminars involving clinical cases. MICROBIOL

120. **Microbiology in Pharmacy.** (3) Sp.  
Lecture 3 hours.  
Halde  
Fundamentals of microbiology for pharmacy students with emphasis on mechanisms of disease production by bacteria, fungi and viruses. Antibiotics, mode of action and genetics, toxins, indigenous flora, hospital infections, immunization. MICROBIOL

121. **Immunology.** (2) Sp.  
Prerequisite: Biochemistry 120A-B. Required course for students in the School of Pharmacy. Lecture 2 hours.  
Halde  
Lectures on the fundamentals of immunology, drugs in hypersensitivity and immunosuppression. MICROBIOL

126A. **Immunology in Dentistry.** (1) Sp.  
Lecture 1 hour.  
R. Speck  
Introduction to general immunology. MICROBIOL

126B. **Microbiology in Dentistry.** (5) W  
Lecture 3 hours. Lab and conference 6 hours.  
R. Speck  
Comprehensive presentation of microorganisms including bacteria, fungi, viruses; fundamentals of infection and resistance, disinfection, sterilization, and antimicrobial agents. Laboratory studies and demonstrations on indigenous oral flora and applications of microbiology to dentistry. MICROBIOL

127. **Microbiology Laboratory.** (2)  
Prerequisite: Concurrent enrollment in Microbiology 120. Lab and conference 4 hours.  
Halde
Morphology, physiology, and immunology techniques used in laboratory diagnosis of selected bacterial diseases. Antibiotic susceptibility, disinfection, and sterility exercises. Demonstration on virology. MICROBIOL.

150.01. Microbiology Research. (1½ per week) Su, F, W, Sp. Prerequisite: Microbiology 100A and 100B and consent of instructor. Staff Research in microbiology; block elective for fourth-year students. MICROBIOL.

170.01. Medical Problem-Solving. (2) F, W, Sp. First-year medical students only. Conference 2 hours. Library research 2 hours. Levinson Small-group medical problem-solving conference using real clinical cases as a springboard for exploration of underlying issues in basic and clinical sciences. The emphasis is on pathophysiological reasoning, independent learning, and working in a group. Teaching is Socratic and minimally directive. MEDICINE

190A. Med Immunology-Grad Stds. (1½) § Sp. Prerequisite: Biochemistry 100A-B. Lecture 2 hours for nine weeks. Equivalent to Microbiology 100A and 121. Linscott Lectures on the fundamentals of immunology: Small group seminars on patient-related problems in this field. MICROBIOL.

190B. Graduate Medical Microbiology. (6½) § F. Prerequisite: Biochemistry 100A-B. Lecture 4½ hours. Lab 3 hours. Conference 1 hour. Equivalent to Microbiology 100B. W. Levinson Pathogenesis of infection by bacteria, fungi, and viruses. Essentials of diagnosis, treatment, and epidemiology of diseases. Laboratory demonstrations and exercises of essential medical skills. Problem-solving exercises and small group seminars involving clinical cases. MICROBIOL.

198. Supervised Study. (1-5) § Su, F, W, Sp. Prerequisite: Consent of instructor. Staff Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. MICROBIOL.

199. Laboratory Project. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. MICROBIOL.

203. Cellular Immunology. (3) F. Prerequisite: General knowledge of immunology and biochemistry. Lecture 3 hours. Offered in alternate years. Not offered 1986-87. Defranco, J. W. Goodman Course covers chemical and genetic basis of immunogenicity, properties of immunocompetent cells, cell interactions in the immune system, and regulatory circuits. MICROBIOL.

204. Molecular Immunology. (3) F. Prerequisite: General knowledge of immunology, protein structure, and nucleic acid structure. Lecture 3 hours. Offered in alternate years. Offered 1986-87. Peterlin, Wabl, A. Weiss Course will cover the molecular biology of immunoglobulins, lymphocyte antigen receptors, the major histocompatibility complex, and the complement system. MICROBIOL.

206. Pathogenic Fungi. (2) § F. Prerequisite: Microbiology 100A and 100B or equivalent. Halde A systematic review of the fungi responsible for human disease, emphasizing pathogenesis, epidemiology, and diagnostic laboratory procedures. MICROBIOL.

209. Special Topics in Immunology. (1-3) § F, W, Sp. Conference 1 hour. J. W. Goodman and Staff Small group tutorial in which topics and correlated reading will be selected by students for discussion with individual faculty members. MICROBIOL.

210. Research Problems in Mycology. (1-5) § F. Prerequisite: Microbiology 100A, 100B and 206. Lab and conference. Halde Participation in research problems in a mycology laboratory. This is not a structured laboratory methods course, but rather a practical research experience involving basic research with pathogenic fungi. MICROBIOL.

215. Laboratory Rotation. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Lab 6-12 hours. Defranco, Ganem Laboratory research for one quarter with a departmental faculty member to familiarize new graduate students with experimental approaches to microbiological or immunological problems of current interest. MICROBIOL.

220. Selected Topics Seminar. (1) § F, W, Sp. Seminar 1 hour. Staff General microbiology; individual research of advanced graduate students, invited speakers and staff members. Reviews of special topics and journal articles by advanced students. MICROBIOL.

221. Graduate Research Seminar. (1) § Sp. Seminar 1 hour. Craig, Defranco Seminar series in which graduate students present their thesis research. MICROBIOL.
Neurological Surgery

Core Clerkship—Neurology 110. Students serve as clinical clerks in the inpatient and outpatient clinics.

C. B. Wilson

The student will become a member of the house staff, attending ward rounds, working up patients, assisting at operations, and taking night call on rotation with a resident. Limited to one student per hospital. NEURO SURG

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110.

Pitts, P. Weinstein

Clinical clerkship in approved hospitals by special arrangement, and approval of the dean and chairperson of the department. NEURO SURG

198. Supervised Study. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. NEURO SURG

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Pitts

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. NEURO SURG

C. B. Wilson

Residents, under supervision, prepare and present case histories of ward patients including laboratory work, X-ray studies, special investigation and reference to the literature. Discussion is led by the faculty with participation by visitors. NEURO SURG

R. Davis, C. B. Wilson

Residents discuss clinicopathological aspects of cases, and their correlation with the literature and special studies. Faculty and visitors discuss developments in related fields. Second-year residents organize conferences and participate in autopsy sessions on patients from the Neurological Surgery Service. NEURO SURG

Pitts

Recent literature in neurology and neurological surgery is presented. Discussion by members of the faculty in attendance and by visitors from other schools interested in this and related fields. NEURO SURG

C. B. Wilson

Residents, under supervision, are responsible for patient care in the wards and outpatient clinics including history-taking, physical examinations, laboratory tests, and consultations. In addition, the senior resident has certain administrative, teaching, and clinical responsibilities. NEURO SURG

Pitts

Residents are responsible for the care of patients, under the direction of the attending staff, including history-taking, physical examinations, laboratory tests, and consultations. NEURO SURG

P. Weinstein

Residents are responsible for diagnosis and care of patients in wards and clinics and performance of studies and selected neurosurgical procedures under supervision of the attending staff. They also present patients at conferences and attend seminars and rounds at UC. NEURO SURG

Pitts, P. Weinstein

Interns rotate through neurological surgery wards. Under the supervision of the attending staff, they are responsible for the care of patients, including history-taking, neurologic examinations, laboratory tests, diagnostic procedures, and consultation. NEURO SURG

Neurology

Second-Year Coordinated Instruction—Medicine 132A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Layzer

Students are assigned patients for study under supervision of attending and resident staffs. They attend work rounds, attending rounds, grand rounds, conferences and lecture-seminars, emphasizing diagnosis and management of common clinical problems and psychiatric aspects of neurology.

140.01. Acting Internship Neurology. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110. Approval of the chairperson of the department. R. Fishman

Students serve as acting interns on the inpatient services. Attendance at departmental
clinical rounds, seminars, and conferences is required. NEUROLOGY

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110. 
R. Fishman

Clinical clerkship in approved hospitals by special arrangement and approval of the dean and the chairperson of the department. NEUROLOGY

140.03. Neurology Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor. R. Fishman, Goodin

Students serve as clinical clerks in the outpatient clinics. Attendance at departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY

Participation in child neurology activities, both inpatient and outpatient, and all regularly scheduled conferences of the Child Neurology Division. Study of the developing nervous system and diseases of the nervous system affecting infants, children and adolescents. NEUROLOGY

140.05. Advanced Neurology Clerkship—SPGH. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor. R. Fishman, R. Simon

Students serve as clinical clerks in the outpatient clinics and on the consultation service. Attendance at all departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY

140.06. Advanced Neurology Clerkship—VA. (1½ per week) Su, F, W, Sp. Prerequisite: Neurology 110 and consent of instructor. Faden

Students serve as clinical clerks in the outpatient clinics and on the consultation service. Attendance at departmental clinical rounds, seminars, and conferences is required. Prior arrangements must be made. NEUROLOGY

Advanced students will have the opportunity to broaden and enrich their clinical neurology experience and expertise. Opportunity will be given to participate in didactic and case conference presentations. The opportunity exists for subspecialty clinical experience (e.g., behavioral neurology, neuromuscular disease). NEUROLOGY

Opportunities for research in one of the departmental laboratories by arrangement with the chairperson of the department. NEUROLOGY

150.02. Neuropathology. (1½ per week) F, W, Sp. Prerequisite: Anatomy 103 and Pathology 102. R. L. Davis, Baringer

Tissue pathology of diseases of the nervous system will be explored in greater depth in the postmortem room and by gross and microscopic techniques. NEUROLOGY

150.03. Medical Aspects of Disability (2) F, Seminar 2 hours. Berrol, Byl

Diagnosis, medical management, and psychosocial sequelae of the major disabling conditions including spinal cord injury, closed head injury, cerebral palsy, multiple sclerosis, chronic pain, muscular dystrophy, congenital pediatric problems. Emphasis on disabling conditions and issues with a review of sexual issues and therapeutic interventions. NEUROLOGY

198. Supervised Study. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. R. Fishman and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. NEUROLOGY

199. Laboratory Project. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. R. Fishman and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. NEUROLOGY

Seminars covering selected subjects in the basic sciences relevant to neurology including neuroanatomy, neurochemistry, neurophysiology, and neuropathology. NEUROLOGY

Conference includes resident preparation and presentation of patient case histories including reference to the literature, laboratory work, and special studies. Faculty members and visiting professors from other universities discuss new developments in their respective fields. NEUROLOGY

Course involves the presentation and discussion of clinical histories and pathologic findings in selected cases of neurologic interest and histopathologic study and discussion of surgical and postmortem specimens from neurological and neurosurgical patients. NEUROLOGY

Course involves pathologic and clinicopathologic research into various aspects of neuropathology. Specific subjects of research are chosen in conjunction with members of the staff. NEUROLOGY
T. Newton, D. Norman
Neuroradiologic techniques and interpretations are reviewed in detail with particular emphasis on X-rays of the skull and spine, pneumoencephalography, myography and arteriography. NEUROLOGY

R. Fishman
Clinical and basic research in neurological disease. After consultation, assignments to one of the several departmental laboratories will be possible. NEUROLOGY

VA Faden
Specific projects in experimental pathology of the nervous system may be undertaken by direct arrangement. Techniques include neurohistology, histologic autoradiography, and electron microscopy. NEUROLOGY

R. Fishman
Residents are responsible for the care of patients under the direction of the attending staff, and participate in student teaching. They serve on the inpatient, outpatient and consultation services. NEUROLOGY

Aminoff
Residents learn interpretation of electroencephalograms under the supervision of experienced electroencephalographers. They interpret electroencephalograms on patients they have seen clinically, with individual instruction as required. Instruction is accredited by the Board of Qualification of the American Electroencephalographic Society. NEUROLOGY

Aminoff
Students learn the application of electromyography in the diagnosis of patients seen in the wards and in the outpatient clinic, with individual instruction as required. NEUROLOGY

Malamud
Residents spend three months or more performing supervised autopsies and pathologic studies of brain, nerve and muscle. NEUROLOGY

Berg
Course offers experience in the diagnosis and management of children with acute and chronic neurological disorders. Outpatient clinics are held weekly for pediatric convulsive disorders and behavioral and learning problems of the schoolchild. NEUROLOGY

Hoyt
Residents participate in clinical evaluation of patients in preparation for rounds. Clinical teaching in neuro-ophthalmology. NEUROLOGY

Neuroscience

201. Principles of Neuroscience. (4) § F.
Prerequisite: Admission to Neuroscience Program or permission of instructor. Lecture 2 hours. Conference 2 hours.

Hall and Staff
A one-quarter introductory course emphasizing the basic principles of cellular, molecular, and integrative neuroscience. The course will provide a general background in neuroscience by intensively treating selected topics that illustrate the questions and methods of modern neurobiology. PHYSIOLOGY

Prerequisite: Consent of instructor. Seminar 1 hour.

Hall
Topic in neurobiology is selected such as development, anatomy and physiology of the visual system, biochemistry of membranes.

Pertinent papers from the recent literature are read and discussed. Each student must participate regularly and present one seminar per quarter. PHYSIOLOGY

222. Advanced Cellular Neurobiology. (3) § Sp. Prerequisite: Neuroscience 201A-B-C and consent of instructor. Seminar 3 hours.

Hall and Staff
Given each year in the spring quarter on a rotating basis. Representative topics include neurobiology of peptides, ion channels, sensory transduction. Seminar format with students reading and presenting papers from the current literature. PHYSIOLOGY

224. Advanced Neurochemistry. (3) § W.
Prerequisite: Neuroscience 201A-B-C and consent of instructor. Seminar 3 hours.

Hall and Staff
Given each year in the winter quarter on a rotating basis. Representative topics include neuroimmunology, molecular neurobiology, cell surface in development. Seminar format with students reading and presenting papers from the current literature. PHYSIOLOGY

226. Advanced Integrative Neurobiology. (3) § F.
Prerequisite: Neuroscience 201A-B-C and consent of instructor. Seminar 3 hours.

Hall and Staff
Given each year in the fall quarter on a rotating basis. Representative topics include the visual system, pain, the auditory system, higher functions of the nervous system. Seminar format with students reading and presenting papers from the current literature. PHYSIOLOGY

227. Neurobiology of Pain. (3) § S.
Prerequisite: Neuroscience 201A-B-C or Anatomy 103. Seminar 3 hours.

Fields, Basbaum, Levine, Ralston, N. Lee
A seminar course which will cover the primary literature relating to the anatomy, physiology, pharmacology, and clinical aspects of pain. Transduction, modulation, and the role
of peptides will be specifically covered.  
PHYSIOLOGY  
230. Experimental Neurobiology. (5) § SS. Prerequisite: Consent of instructor. Lecture and lab.  
Y-N Jan  
Laboratory course designed to acquaint students with electrophysiology and anatomical methods used in studying peripheral and central nervous systems. Techniques included are extra- and intracellular recordings, iontophoresis, dye injection, tracing of neuronal pathways. PHYSIOLOGY  
250. Research. (1-8) § Su, F, W, Sp. Prerequisite: Consent of instructor. Laboratory.  
Staff  
PHYSIOLOGY  
299. Dissertation. (0) § Su, F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.  
Staff  
For graduate students engaged in writing the dissertation for the Ph.D. degree. PHYSIOLOGY

Nursing

103. Introduction to Nursing. (7) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 2 hours. Lab 15 hours.  
C. West  
Introduction to nursing and nursing process: fundamental nursing, terminology, facts, trends, and their application in nursing practice. PHYSIOLOG NURS

104. Nursing of Adults. (9) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 2 hours. Lab 21 hours.  
C. West  
Application of the nursing process to the physiological, psychological and sociological aspects of regulating response mechanisms to stress. PHYSIOLOG NURS

105. Maternal-Child Nursing. (9) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 2 hours. Lab 21 hours.  
Savedra  
Application of principles and theories to nursing care given during the life processes of reproduction, nurturance and development, and alterations due to stressors during pregnancy and child development from birth to adolescence. FAM HLTH

106. Psychiatric Mental Health Nursing. (9) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 2 hours. Lab 21 hours.  
J. G. Lipson  
Principles and dynamics of personality and family development. Application of the nursing process with clients who have coping problems resulting from stressors in selected developmental or situational crises. MENT HLTH

122. Physiol Processes-The Life Span (3-5) § F. Lecture 3-5 hours. Precisig, Janson-Bjerkle  
Examines content in regulation, sensation, protection, and motion as they relate to adaptive mechanisms in man at the cellular level. PHYSIOLOG NURS

124. Professional Nursing Practice. (1) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Lecture 1 hour.  
K. Moore  
Course provides an introduction to the basis for professional practice and problems related to role change and reorganization in academia. Emphasis will be on use of theoretical approaches as the basis for providing nursing care. MENT HLTH

127. Acute Illness Adaptation. (5) F. Prerequisite: Admission to Articulated B.S./M.S. Program. Nursing 129 or concurrent enrollment. Lecture 2 hours. Lab 3 hours. Seminar 2 hours.  
C. West  
Course describes and explores concepts related to the nursing care of the acutely ill patient. Description of behaviors, measurements and nursing actions appropriate to the concepts will be compared and contrasted across a variety of acute illnesses. PHYSIOLOG NURS

128. Intro to Research & Theory. (3) W. Lecture 2 hours. Seminar 1 hour.  
H. Wilson  
Introduces basic research concepts, language, process, logic, and methods for various types of research as well as the meaning and use of nursing theory. Engages students in skills of intellectual craftsmanship including effective reading, thinking, and writing to improve research consumership. MENT HLTH

129. Health Assessment. (3) F. Lecture 2 hours. Lab 3 hours.  
Trincisti  
Course presents a basis for health assessment of clients within an adaptation-developmental model of nursing. Emphasizes data collection through history, physical examination, clinical studies, and identification of stressors altering health status. Laboratory for integration of theory and skill mastery. FAM HLTH

131. Psychosocial Adaptation. (4) W. Lecture 2 hours. Lab 4 hours. Conference 2 hours.  
Course presents a knowledge base for understanding assessment of intervention with persons demonstrating psychosocial responses to actual or potential health problems. Interviewing and communication techniques are presented as an integral part of both assessment and intervention. MENT HLTH

132. Care of Aged & Chronically Ill. (3) § W. Lecture 3 hours.  
Harrington  
Nurse's role in health promotion and meeting special needs of the elderly and chronically ill. Demographic issues, functional assessment, alternatives for providing long-term care, and case management in acute, long-term, and community care settings will be covered. FAM HLTH
135. Family Health Care. (3) W Prerequisite: Nursing 129. Lecture 2 hours. Lab 1 hour. Conference 2 hours. Ventura
Course deals with the healthy family as the primary unit of health care management. Nursing process applied to promoting family health is emphasized, utilizing the adaptational-developmental framework. Community involvement with a family is an integral part of the course. FAM HLTH

137. Community Health Nursing. (8) Sp. Prerequisite: Nursing 124. Lecture 3 hours. Lab 15 hours. M. Duffy
Application of nursing, family, and community health theory to community health settings, focusing on assessing, planning, implementing, and evaluating nursing care with families, groups, and the community. Health planning and public policy will be examined. MENT HLTH COM

Course will prepare students to write and review scientific papers. The scientific style of writing outlined in the APA Manual will be followed. Students will make presentations and participate in group and individual conferences. PHYSIOL NURS

Theories and concepts of femininity, masculinity, and sexuality throughout the life cycle. Exploration of the wide range of human sexual behavior. Content includes sexual response, common sexual dysfunction and therapy, masturbation, homosexuality, and sexuality in some health conditions. FAM HLTH

147. Group Independent Study. (1-5) F, W, Sp. Lecture and lab variable. Staff
Groups of two or more collaborate in clinical investigation and studies of special problems related to nursing and health sciences, under the direction of faculty. Students may select study topics related to areas of interest. MENT HLTH COM

Course deals with commonly used drugs, with emphasis on classification, use, rationale for choice, mode of action, and significant side effects. PHYSIOL NURS

181. Law & Nursing Practice. (2) § Sp. Lecture 2 hours. Tennenhouse
Course surveys fundamental and critical current issues in law with respect to the theory and practice of nursing. Emphasis is on legal contingencies encountered in the everyday practice of nursing in both hospital and community settings. PHYSIOL NURS

201. Curriculum & Program Development. (3) § F. Prerequisite: M.S. standing or consent of instructor. Lecture 1 hour. Seminar 2 hours. Okamoto
Course reviews educational principles, nursing models, and conceptual framework for curriculum and program development to enable students to analyze, critique, and develop curricula and programs for schools of nursing and health delivery systems. PHYSIOL NURS

202A. Theory Development. (3-4) § F. Prerequisite: Doctoral standing. Lecture 3 hours. Meleis
Examines philosophically and analytically the nature of theory and relationship between philosophy, theory, and science. Provides knowledge and experience in all stages of theory development, exploration and critique of epistemological and historical ideas in nursing; scholarly exchange toward independent discovery. MENT HLTH COM

202B. Prototype Theories. (3-4) § W. Lecture 3 hours. Meleis
Comparative study and critical analysis of major prototype theories from which conceptions of nursing are derived. Emphasis is placed on systems, symbolic interaction, developmental exchange, and adaptation level theories. MENT HLTH COM

202C. Theories & Conceptual Framework. (3-4) § Sp. Prerequisite: Doctoral standing. Lecture 3 hours. Meleis
Comparative study and critical analysis of major conceptual models and theories in nursing. Considers relationship congruency of models to prototype theories; system, interaction, developmental, adaptation level theories. Examines the implication of nursing theories and models for practice and research. MENT HLTH COM
Oda
Course provides a study of theories and concepts of consultation as a facilitating process relevant to nurses working in primary, secondary, and tertiary prevention services. Emphasis will be on consultation strategies. Optional laboratory for theory testing. MENT HLTH COM

204. Hospice: Implications for Nursing. (3) § F. Prerequisite: Consent of instructor. Seminar 3 hours. Martinson, Doyle, Lillard
Course provides overview of history, function, and models of hospice care. Explores principles of physical and psychosocial interventions that promote patient and family integrity during the end stage of life. Reviews selected research, legal, ethical, personal, professional issues in hospice care. MENT HLTH COM

205. Management for Health Providers. (3) § F, W, Sp. Prerequisite: Second-year graduate students, non-administrative majors. Seminar 3 hours. Staff
A study is provided of the management process, the role of the manager, the development of staff, and the principles and practices of management in health services. MENT HLTH COM

206. Nsg Mgt of Adult Psych Cond. (3) § W, Sp. Prerequisite: Nursing 227 and 219 or equivalent, and consent of instructor. Lab 3 hours. Seminar 2 hours. Underwood
Seminar is designed for graduate psychiatric nursing students to examine and discuss various theories and practice approaches to the nursing management of psychiatric conditions in adults. MENT HLTH COM

Advanced study of the theory and research in the care of patients with physiological disruption and/or illness. In-depth examination of patient problems, assessment and management in the student's selected specialty area. Seminar with clinical laboratory. PHYSIOL NURS

208A. Nsg Concept Description. (3) § F. Prerequisite: Doctoral standing. Seminar 3 hours. Carrieri
Using clinical rounds and seminar approaches, concepts related to major biological phenomena are examined and described from theoretical, clinical, and empirical perspectives. Concepts of interest to nursing are selected from health-illness states observed in patients in acute care setting. PHYSIOL NURS

208B. Nsg Concept Measurement. (3) § W. Prerequisite: Doctoral standing. NURS 208A or consent of instructor. Seminar 3 hours. Carrieri, Lindsey
Seminar focuses on the measurement of concepts relevant to physiological processes. Students critically analyze existing quantitative and qualitative instruments used to measure the concepts. Exemplary concepts may include sleep, dyspnea, pain, immobility, cachexia. PHYSIOL NURS

208C. Nsg Concept Testing. (3) § Sp. Prerequisite: Doctoral standing. NURS 208A and 208B or consent of instructor. Seminar 3 hours. Carrieri, Lindsey
Seminar focuses on the development and testing of instruments used to measure the concept selected by the student for study. The student will conduct a pilot study to determine the validity, reliability and utility of the instruments. PHYSIOL NURS

209. Social Support: Theory, Res & Meth. (2-4) § W, Sp. Prerequisite: Doctoral standing. Seminar 2 hours. Independent study optional 3 or 6 hours for 3 or 4 units. Norbeck
Analysis of the literature relating social support to various health and adjustment outcomes with emphasis on conceptual and methodological issues. Students will develop a focused review of the social support literature relevant to their research and/ or clinical interests. MENT HLTH COM

210A. Psychosocial Environments (3) § W. Lecture 3 hours. Weiss
Course will examine theory and research regarding psychosocial environments and their influence on psychobiological wellbeing. General environmental theory and theories specific to family, social support systems, and organizational climates will be discussed. MENT HLTH COM

210B. Environmental Therapeutics (3) § Sp. Prerequisite: N210A; enrollment in Psychiatric Nursing Specialty or consent of instructor. Lecture 3 hours. Weiss
Assessment and intervention within selected environmental contexts will be studied in light of their clinical significance for individual mental health. Family/home environment, support networks, and institutional settings will be emphasized. MENT HLTH COM

211A. Introduction to Research. (3) § F. Prerequisite: Elementary statistics or equivalent. Lecture 2 hours. Lab 3 hours. Relf
Lectures and small group sections present an overview of the research process including the styles of researchers, the research attitude, logic, ethics, philosophy, and tools of science. FAM HLTH

211B. Patient-Family Teaching Critique. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Halburg
Course critiques studies in patient-family teaching with the intent to develop research consumerism. Focuses on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH
211.02B. Maternal-Child Nursing Critique. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Savadra
Critique of studies in maternal-child nursing with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.03B. Survey of Health Status Research. (2-5) § F, W. Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Enrolment limited. Preference given to community health nursing specialist students. Laffrey
Presentation of the scholarly process of critiquing published research in oncology nursing. Emphasis will be on evaluation of the research processes utilized by investigators, and the implications of empirical findings for oncology nursing practice. PHYSIOL NURS

211.04B. Death in Childhood Res Critique. (3) § W. Prerequisite: Nursing 211A and consent of instructor. Seminar 3 hours. Martinson
Critique of studies related to the professional management of death, childhood development of the concept of death, children's response to death in the family, death anxiety in fatally ill children, and impact of death of a child on the family. FAM HLTH

211.05B. Critique of Aging Studies. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Harrington
Critique of studies in the field of aging with the intent to develop research consumerism. Emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. FAM HLTH

211.06B. Neuroscience Research Critique. (3) § Sp. Seminar 3 hours. Sisson
This course presents the scholarly process of critiquing research in neuroscience nursing. The foci are: evaluation of the research process, assimilation of the scientific basis for this specialty, and examination of implications of empirical findings for neuroscience nursing. PHYSIOL NURS

211.07. Crit of Onc Nursing Studies. (3) § Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Dodd
Presentation of the scholarly process of critiquing published research in oncology nursing. Emphasis will be on evaluation of the research processes utilized by investigators, and the implications of empirical findings for oncology nursing practice. PHYSIOL NURS

211.08B. Critique of Management Research. (3) § W, Sp. Prerequisite: N211A or consent of instructor. Lecture 3 hours. O'Rourke
The course provides a critical analysis of studies which examine organizational behavior and administrative practice. The emphasis is on attitudes, insights, and abilities crucial to appreciation, appraisal, and utilization of research in management. MENT HLTH COM

211.09B. Research Critique: Critical Care. (3) § Sp. Prerequisite: N211A. Seminar 3 hours. Carrieri
Course critiques research studies related to the nursing assessment, its plan, and therapy of acutely ill patients with multi-system failure. Students will learn to appreciate, evaluate, and integrate research findings into their clinical practice. PHYSIOL NURS

211.12B. Occup Hlth Res-Critical Review. (3) § W, Sp. Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3 hours. Staff
Critical analysis of studies exploring the relationship of the workplace to health of the worker. Emphasis is on appraisal of relevant scientific literature, identification of research methods, and development of research proposals in occupational health nursing. MENT HLTH COM

211.14B. Psychiatric Helpseeking Critique. (3) § F, W, Sp. Prerequisite: N211A or instructor's consent. Lab 3 hours. Seminar 2 hours. Chafetz
This course will critique research in psychiatric illness behavior and helpseeking. It will focus on developing research consumerism with emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. MENT HLTH COM

211.20. Critique—Perinatal & Pediatric. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Feerketich, Affonso
Critique of studies reflects physiological or situational stressors in the high-risk perinatal and pediatric patient. Course will facilitate the appreciation, appraisal, and integration of research findings into clinical practice. PHYSIOL NURS

211.21B. Cardiopulmonary Res Critique. (3) § W, Sp. Prerequisite: Nursing 211A or consent of instructor. Lecture 2 hours. Lab 3 hours. Gots
Critique of cardiopulmonary research with the intent to develop research consumerism, with emphasis on attitudes, insights, and abilities crucial to the appreciation, appraisal, and utilization of research in the health sciences. PHYSIOL NURS

211.22B. Qty Patient Care Res Eval. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Carrieri
Course critiques research studies in quality of patient care, emphasizing the utilization of a systematic critique process, methodologies employed in evaluation programs, and
identification of major problems in patient care evaluation research. PHYSIOL NURS.

211.51C. Clinical Research Methodologies. (3) § W. Prerequisite: Nursing 276 or consent of instructor. Lecture 2 hours. Lab 3 hours.

Lovejoy, Janson-Bjerklie

Course applies research methodology to clinical nursing questions: formulation of clinical questions, experimental and quasi-experimental design, instrumentation, introduction to data analysis, including statistical methods and computer usage. PHYSIOL NURS.

211.52C. Visual Data Study of Human Behav. (3) § Sp. Prerequisite: One course in research methods. Graduate standing and consent of instructor. Lab 3 hours. Seminar 2 hours.

Highley

The use of still photography in the study of human behavior as it relates to health care includes the history of photography’s impact on social and health policy, and explores issues related to design, sampling, and content analysis. FAM HLTH.

211.53C. Illness Management Research. (3) § F, W, Sp. Prerequisite: Nursing 211A, or graduate course in research methods in social science, or consent of instructor. Lecture 2 hours. Lab 3 hours. Course may be repeated for credit.

Reif

Methods for conducting exploratory studies on social-psychological and organizational factors which affect the management of illness and delivery of health services. Problem identification, collection and analysis of data, and presentation of findings and policy implications of research are included. FAM HLTH.

211.54C. Data-Gathering Methods. (3) § W, Sp. Prerequisite: One course in research design. Seminar 3 hours.

Holzemer

Course will focus on selection and construction of data-gathering tools in nursing research. Validity, reliability and utility are discussed. Computer coding and conducting a pilot study are included. PHYSIOL NURS.

212A. Evol of Psychoanalytic Theory. (2) § F, Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

Underwood

This advanced seminar, open to graduate students, focuses on theory as an approach to understanding human behavior rather than as an approach to treatment. Emphasis is on evolution of theory and use of psychoanalytical concepts in nursing research. MENT HLTH.

212B. Social Issues in Psychr Nursing. (2) § W, Sp. Prerequisite: M.S. students may take this course if they have completed 227A. Lecture 2 hours.

Chafetz

This course will examine historical and current literature, focusing on social factors and mental illness related to the severely ill in urban environments and public psychiatric treatment settings. The emphasis is on implications for nursing research and practice. MENT HLTH.

213.01. Topics in Physiology–Sleep. (2) § W, Sp. Prerequisite: Consent of instructor. Lab 1½ hours. Seminar 1½ hours. Course may be repeated for credit.

Robinson

Course explores knowledge of sleep-wake cycles, physiology in and out of sleep, sleep disorders, biological rhythms, and methods in polysomnography. Applications to nursing will be made. PHYSIOL NURS.

214. Community-Based Long-Term Care. (3) § W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Reif

Course analyzes empirical research and theory dealing with noninstitutional approaches to long-term care. Examination of patient characteristics and needs, models of service delivery, factors affecting service utilization, and nurses’ roles in provision and management of community-based long-term care. FAM HLTH.

215A. Community Health. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab optional 3 hours.

Oda

Course explores theories, concepts and principles pertaining to the practice of community health nursing with focus on positive health factors and interaction within families, groups and communities. MENT HLTH.

215B. Community Health Planning. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

M. Duffy

Exploration of analytic planning models applicable to community health services. Utilization of the community as a basis for planning and delivery of health care. Emphasis is on the role of the community nurse in health planning. MENT HLTH.

216. Interventions–Nurs Work Stress. (2) § F. Prerequisite: Graduate standing. Seminar 2 hours.

Baldwin

Course will help to enable students to evaluate the recent research and current models of nursing work stress. From this base, students will critically select strategies for assisting and intervening in nursing stress situations. PHYSIOL NURS.

217. Psychosocial Care of Hospitalized Children. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Tesler

Course explores theory related to the psychosocial experiences of illness and hospitalization for children and their families. Focus is directed to minimizing trauma and promoting growth. Concurrent practicum recommended. PHYSIOL NURS/FAM HLTH.

218A. Care of Ill or Injured. (3-4) § F. Prerequisite: Nursing 276. Prior or concurrent enrollment in physiology or consent of instructor. Lecture 1 hour. Seminar 2 hours. Lab optional 3 hours for 4 units.

Stotts, Dodd
Knowledge is organized around phenomena common to ill or injured individuals across the life span. Concepts such as stress, healing, clotting, infection, consciousness, pain and coping will be examined from a theoretical and clinical perspective. PHYSIOL NURS

218C. Current Therapeutics. (1-5) § F. Prerequisite: Physiology, Nursing 218A and 218B. Seminar 1-5 hours. Stotts, C. West

Course investigates the theoretical basis of selected therapies commonly used with the ill or injured. Therapeutic aspects of interventions as well as side effects will be explored. Recent research will be used as the basis for discussion. PHYSIOL NURS

218D. Illness or Injury Rehabilitation. (2-3) § W. Prerequisite: Graduate standing. Nursing 218A. Seminar 2 hours. Lab optional 3 hours. C. West

Examines the theoretical basis for rehabilitation of patients following physical illness or injury. Nursing therapies which promote optimal adaptation and development are evaluated utilizing relevant research as a base. Clinical laboratory optional. PHYSIOL NURS

218.01B. Concepts in Cardiac Surgical Nsg. (3) F, W. Prerequisite: Consent of instructor. Cardiac physiology and pathophysiology. Seminar 3 hours. Skov

Course analyzes the needs of cardiovascular surgical patients. Physiologic and pathophysiological mechanisms and surgical interventions are explored. Issues in clinical management are discussed from the theoretical perspective, and compared and contrasted with clinical practice. PHYSIOL NURS

218.02B. Concepts in Neuroscience Nursing. (3) § W. Prerequisite: N218A. Lecture 3 hours. Sissons, Muwasees

Course explores phenomena which are commonly experienced by patients with a neurological diagnosis from a theoretical, scientific, and clinical practice perspective.

Emphasis is on nursing interventions. PHYSIOL NURS

218.03B. Concepts in Acute Peds Nursing. (3) § F, W. Prerequisite: Pediatric pathophysiology and N218A. Seminar 3 hours. Ferketich, Tesler

Course analyzes concepts related to the management of acutely ill pediatric patients. The theoretical basis of management is evaluated, compared, and contrasted with clinical practice. PHYSIOL NURS

219. Psychosocial Assessment. (3) § W. Lecture 2 hours. Conference 1 hour. Wilson

This course critically examines diagnosis of the psychosocial human responses and standard psychiatric disorders. Emphasis is on the use of assessment tools (i.e., Mental Status Examination, Psychiatric History, DSM-III-R, and PND-I) across diverse clinical areas and with clients throughout the life span. MENT HLTH COM

220.01. Adv Sem in Nursing Research. (3) § F, W. Sp. Prerequisite: Successful completion of the qualifying examination and/or consent of instructor. Course may be repeated for credit. Seminar 3 hours. Norbeck

This seminar guides doctoral students in the design and conduct of research in specialty areas in cross-cultural and international nursing and mental health and community nursing. MENT HLTH COM

220.02. Adv Sem in Nursing Research. (3) § F, W, Sp. Prerequisite: Successful completion of the qualifying examination. Course may be repeated for credit. Seminar 3 hours. Gotterman, Mercer

A seminar which guides students in the design and conduct of research in specialty areas in family health care nursing. FAM HLTH

220.03. Adv Sem in Nursing Research. (3) § F, W. Sp. Prerequisite: Successful completion of the qualifying examination. Seminar 3 hours. Carried

A seminar which guides students in the design and conduct of research in specialty areas in physiological nursing. PHYSIOL NURS

221. Pathophysiology of Cancer. (3) § Sp. Prerequisite: Admission to graduate program and graduate-level physiology of the cell. Audits by permission only. Lecture 2 hours. Seminar 1 hour. Lovejoy

Theories of carcinogenesis, the natural history of representative cancers and the mechanisms of action of certain therapeutic agents will be discussed. The clinical relevance for nursing of the associated pathophysiological changes will be emphasized. PHYSIOL NURS

222A. Principles of Nurse-Midwifery. (4) § F. Prerequisite: Enrollment in Nurse-Midwifery specialty. Lecture 3 hours. Lab 3 hours. Barger

Course critically analyzes scientific principles underlying selected obstetric and gynecologic diagnostic and therapeutic procedures in the management of health care of women throughout the childbearing cycle. FAM HLTH—UCSD

222B. Nurse-Midwifery Management. (4) § W. Prerequisite: Enrollment in Nurse-Midwifery specialty. Lecture 4 hours. Lops

Course expands the theoretical knowledge base of the normal physiology of pregnancy. Emphasis is placed on the intrapartum period with facilitation of normal processes and patient teaching. FAM HLTH—UCSD

222C. Complex Probs in Nurse-Midwifery. (4) § Sp. Prerequisite: Enrollment in Nurse-Midwifery specialty. Lecture 4 hours. Lops

Course explores the theoretical concepts and principles applied to the management of pathophysiological and psychosocial issues complicating the birthing process. Issues of professional practice, adjustment to primary
care role, and medical collaboration and consultation are considered. FAM HLTH—UCSD

223. Mental Health and Aging. (3) § F. W. Sp. Prerequisite: Consent of instructor. Lecture 3 hours.  Deitrich
Course focuses on assessment and management of common mental health problems of the older adult. Factors contributing to mental health or illness, adaptive behaviors, specific psychopathologies, and the similarity of presenting features of physical and mental illness are explored. MENT HLTH COM

224. Behavioral Theory in Practice. (3) § W, Sp. Prerequisite: Graduate standing. Lecture 2 hours. Lab 3 hours.  Pothier
Behavioral theory will be presented, and research related to the theory will be reviewed. Behavioral theory will be used to predict and plan nursing interventions. MENT HLTH COM

225. Behavioral Issues in Fam HLth. (1) § Sp. Prerequisite: Consent of instructor. Seminar 2 hours every other week. Nilsen
Seminar deals with advanced critical analysis and application of family, cultural and behavioral theories leading to clinical intervention in family primary care. FAM HLTH

226A. Chronic Illness & Nursing. (3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.  Hallburg
Course offers a study of problems related to long-term illness. Explores the interrelationship of various cultural, psychosocial, and pathophysiological factors involved in chronic illness. Field experience included. FAM HLTH

226B. Chronic Illness & Nursing. (3) § W. Prerequisite: Nursing 226A or consent of instructor. Lecture 2 hours. Lab 3 hours.  Hallburg
Course further explores the complexities involved in the illness careers of patients with chronic illness and their families, including the implications for nursing. Course analyzes the interrelationship of various cultural, psychosocial, and pathophysiological factors involved in long-term illness. Field experience included. FAM HLTH

227A. Theories of Psych Conditions. (2) § F: Lecture 2 hours.  Lipson
This lecture-seminar will emphasize the comparative study and analysis of selected psychological and sociological theories of major psychiatric conditions. Both research findings and clinical data will be reviewed. MENT HLTH COM

227B. Theories of Psych Conditions. (2) § Sp. Prerequisite: Consent of instructor or enrollment in the psychiatric/mental health specialty area. Lecture 2 hours.  Staff
This lecture-seminar will emphasize the comparative study and analysis of selected biological theories of major psychiatric conditions. Both research findings and clinical data will be reviewed. MENT HLTH COM

228. Statistical Analysis Critique. (3) § F. Prerequisite: Basic statistics course. Open to doctoral students only, others by permission of instructor. Lecture 3 hours.  Ferkeich
The course emphasizes the critique of the statistical analysis of nursing research. Statistical tests are evaluated by using the criteria of logical consistency between research question, design, statistical method, and conclusions; power of the test; and underlying mathematical assumptions. PHYSIOL NURS

229. Comparative Research Methods. (2) § W. Prerequisite: Admission to the doctoral program or consent of instructor. One quarter of theory (N 202 or N 290) and research (N 278) desirable. One quarter of theory, Nursing 202A, 202B, 202C or 290.01, 290.02, 290.03 and research. Nursing 278 recommended. Seminar 2 hours.  Gortner
Underlying assumptions as well as design, measurement, and analytic issues pertinent to nursing research will be compared for various research methods. The advantages and disadvantages of approaches such as historical, descriptive, correlational, epidemiological, experimental, and action research will be examined. FAM HLTH

230. Legislative Processes. (2-4) § W. Sp. Prerequisite: Consent of instructor. Course may be repeated for credit. Lecture 2 hours. Lab 0-6 hours.  Staff
Exploration of legislative processes which affect professional practice. Analysis of strategies for proposal, passage, implementation, and evaluation of legislation. Examines concepts and principles of professional lobbying, systems management of governmental relations, role of research and expertise in policymaking. MENT HLTH COM

231. Cardiac-Pulm-Renal Pathophysiol. (4) § Sp. Prerequisite: Three units graduate-level organ system physiology or consent of instructor. Lecture 4 hours.  Wold
A study of cardiac, pulmonary, and renal pathophysiology applicable to nursing care of the critically ill adult patient. PHYSIOL NURS

232. Adult Pharmacology. (3) § F. W. Sp. Lecture 3 hours.  Lofholm
In-depth course in pharmacology is designed to allow the nurse clinician to manage drug therapy in selected chronic diseases. MENT HLTH COM

233B. Visual Data Analysis. (1-2) § F. Prerequisite: Nursing 233A and students using photographs in their research. Lecture 2 hours.  Highley
Emphasis is placed on the content analysis of photographs used as data source in research. Criteria measures for analysis will be explicated through student's own data. FAM HLTH

234. Physiological Research Seminar. (3) § Sp. Seminar 3 hours.  Carrieri
236. Expectant Parent Group Education. (2-5) § Sp. Prerequisite: Consent of instructor. Lab 5 hours. Seminar 2 hours.

May
Theoretical sessions are related to methodology and techniques of conducting expectant parent education groups. Exploration of content relevant to concerns of expectant parents encompassing childbearing and early child rearing experiences. Concurrent practice recommended, but not required. FAM HLTH

237. Health Assessment through Life. (3-4) § Sp. Prerequisite: Department of Family Health Care Nursing students. Approval by F.O.R. Concurrent practice required. Lecture 2-3 hours. Lab 3 hours.

Goldman
Course presents theoretical principles of health assessment throughout the life cycle. Areas to be covered include methodologies of data gathering and data analysis essential to comprehensive health assessment of all groups. Laboratory experience provides application and integration of theory. FAM HLTH

238A. Infant & Child Development. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours.

Holaday
Course covers major theories and research findings dealing with the physical, intellectual, and emotional development of the child from birth through school age. FAM HLTH

238B. Adolescent Development. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours.

Savedra
Course explores relevant theory, literature, and research findings dealing with normal development during the adolescent period. FAM HLTH

239. Young & Middle Adult Development. (3) § Sp. Prerequisite: Graduate standing, Child Development, and consent of instructor. Lab 3 hours. Seminar 2 hours.

Mercer
This seminar, using an anthropological, sociological, and psychological perspective, will cover developmental theory and research from young adulthood through the middle adult years. Current issues in young and middle adulthood will be discussed with an emphasis on implications for health care. FAM HLTH

240A. Family Primary Care I. (5) § F. Prerequisite: Enrollment in Family Nurse Practitioner Program and Nursing 237. Lecture 5 hours.

McLain
Theories, concepts, and knowledge for comprehensive assessment and management of common health and illness conditions throughout the life cycle will be presented. Emphasis will be on primary care of the family unit. FAM HLTH

240B. Family Primary Care II. (5) § W. Prerequisite: Nursing 240A. Lecture 5 hours.

Carroll
Theories, concepts, and knowledge for comprehensive assessment and management of selected episodic, stable chronic illness and related health conditions throughout the life cycle will be presented. Emphasis will be on primary care of the family unit. FAM HLTH

240C. Family Primary Care III. (5) § Sp. Prerequisite: Nursing 240A and 240B. Lecture 5 hours.

Carroll
Theories, concepts, and knowledge for comprehensive assessment and management of special problems in family primary care will be presented. Emphasis will be on primary care of the family unit. FAM HLTH

241A. Collaborative Role Development. (2) § F. Prerequisite: Consent of instructor and concurrent enrollment in primary care clinical residency. Seminar 2 hours. Nilsen, Medical Faculty

Nursing deals with critical analysis of issues and research related to the collaboration in primary care. Emphasis on philosophy, interaction and role negotiation, joint decision-making, conflict resolution, and effective interface within the health care system. FAM HLTH

241B. Collaborative Role Development. (1) § Sp. Prerequisite: Consent of instructor and concurrent enrollment in primary care clinical residency. Seminar 1 hour. Nilsen

Nursing deals with critical analysis of issues and research related to collaboration in primary care. Emphasis on team management skills, health care system issues, and economic and social considerations. FAM HLTH

242. Individual Psychotherapeutic Modalities. (2) § F, W. Sp. Prerequisite: Consent of instructor. Seminar 2 hours. Staff

Nursing is designed for graduate students in psychiatric nursing to examine and discuss theories and practice approaches of individual psychotherapeutic modalities in current use. MENT HLTH COM

243. Group Psychotherapeutic Modalities. (2) § F, W. Sp. Prerequisite: Consent of instructor. Seminar 2 hours. Furuta

Nursing is designed for graduate students of psychiatric nursing to examine and discuss theories and practice of various group modalities in current use. MENT HLTH COM

244A. Res Sem: Indiv, Fam, or Comm. (2-4) § F. Prerequisite: Completion of first-year requirements for the Ph.D. program in nursing or consent of instructor. Lecture 2 hours. Chafetz, Gilliss, C. Robinson

Nursing 244A-B-C prepares students for original research through consideration of content methods and issues in an area of specialization. Nursing 244A focuses on eval-
A seminar on the issues and trends in legislation and politics of health and long-term care. A discussion of nurses' roles in developing strategies to influence legislative and political processes that affect the planning and delivery of care. FAM HLTH

248. Group Independent Study. (1-6) § E, W, Sp. Prerequisite: Consent of instructor. Lecture 1-6 hours. Staff

Groups of two or more collaborate in clinical investigations and other studies of special problems in nursing and health sciences under the direction of faculty. Students may select areas related to their long-term interests and future research or clinical program.

249. Independent Study. (1-5) § E, W, Sp. Prerequisite: Consent of instructor. Staff

Individual study with emphasis on special problems in nursing. Students may select areas of study which are related to their area of interest or future goals.

250. Research. (1-8) § E, W, Sp. Prerequisite: Admission to doctoral study and consent of instructor. Course offers students an opportunity to engage in research with selected faculty.

250.01. Research Rotation. (1-6) § S, E, W. Sp. Prerequisite: Completion of first year of doctoral study and consent of advisor. Lab 3-18 hours. Staff

The student will participate in faculty research. This project may build toward the dissertation or contribute to methodological or substantive expertise. The quality of this project will be sufficient for presentation and/or publication.

250.02 Clinical Research Program (1-6) § S, E, W. Sp. Prerequisite: Completion of first year of doctoral study and consent of advisor. Lab 3-18 hours. Staff

The student will participate in a faculty clinical research project. This project may build toward the dissertation or contribute to methodological or substantive expertise. The quality of this project will be sufficient for presentation and/or publication.

251. Int/Cross-Cultural Nsg Research. (3) § F, W. Prerequisite: Nursing 211A or equivalent and consent of instructor. Seminar 3 hours.

Seminars focus on theory and research in selected international health nursing problems. Emphasizes working with high-risk groups, examining situational stressors, adaptation, and coping strategies in transition, allocating scarce resources, and utilizing appropriate technology.

253. Assessment of the Ill or Injured. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Enrollment limited.

254. Fetal-Newborn Development. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours.

Course is a study of body system development during embryonic, fetal, and postnatal growth. Emphasis is on normal anatomical and physiologic development, critical periods of development alterations, and transitions for extra-uterine adaptation. Implications for nursing practice are explored.

255.02. Child Health Maintenance. (2-3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-3 hours.
Course provides exploration of theories, concepts and knowledge for comprehensive child health maintenance, encompassing prevention and promotion. Emphasis is on parents as participants in assessment, decision-making, and management of common health problems and normal developmental stresses in infancy and childhood. FAM HLTH

255.03. Common Pediatric Illness Mgmt. (4) § W. Prerequisite: Consent of instructor. Lecture 4 hours. J. Lovett

Covers theoretical basis of physiological and psychological principles necessary for understanding management of common pediatric illnesses. Provides format for integrating material with clinical findings, utilizing developmental and communication concepts in assessment and management. Collaborative roles between nurse, family, and physician emphasized. FAM HLTH

256. Transitions & Health. (3) § W. Sp. Lecture 3 hours. Course may be repeated for credit. Meleis

Critical and analytical review of theories and research that links health of the individual and families to relocations and transitions. Emphasis on responses and coping with situational, developmental, health-illness, and sociocultural transitions. Nursing therapeutic theories will also be explored. MENT HLTH COM

257. Health of Aging Family Member. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. G. Doyle

Course focuses on health promotion and maintenance of the older person within the family context. Exploration of applicable theories, concepts and principles. Special emphasis on physical, emotional and social resources for the frail elderly. FAM HLTH

258. Family/Childbearing: Theory. (3) § F. Lecture 2 hours. Lab 3 hours. May Critical analysis of psychosocial and physiological factors as they impact on the family during pregnancy and childbirth. Emphasis on evolving maternal/ paternal roles and tasks related to pregnancy, body image, sexuality, childbirth and parenting. FAM HLTH

258B. Family/Childbearing: Theory. (3) § W. Lecture 2 hours. Lab 3 hours. May Critical analysis of psychosocial and physiological factors as they impact on the family during childbirth and early parenting. Emphasis on transition to parenthood, parental and couple concerns, and issues in affecting change to provide optimal nursing care. FAM HLTH

258C. Family & Childbearing. (2) § Sp. Prerequisite: Nursing 258A and 258B. Seminar 2 hours. Gershwin

This clinically-focused seminar addresses the psychosocial and psychophysiological issues of pregnancy, childbirth, parenting, and family/ marital relationships during the childbearing period. Emphasis is on the role of midwife as facilitator of health adaptation. FAM HLTH

259. Women's Health-Theory & Mgmt. (1-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-4 hours. Seminar optional 1 hour. Shannon, Star

Provides exploration of theories, concepts and knowledge necessary to maintain and promote women's health. Emphasis on application of current research: decision-making and management of pregnancy, the interconceptional period, and the climacteric, including collaboration with health team members. FAM HLTH

259.01. Women's Health-Theory & Mgmt. (1-4) F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-4 hours. Seminar optional 1 hour. Shannon, Star

Provides exploration of theories, concepts and knowledge necessary to maintain and promote women's health. Emphasis on application of current research: decision-making and management of pregnancy, the interconceptional period, and the climacteric, including collaboration with health team members. FAM HLTH

Course introduces basic concepts and issues in medical anthropology and transcultural nursing. Provides opportunity to critically review research literature and discuss implications for nurses and other health care professionals. MENT HLTH COM

260B. Intl & Cross-Cultural Theories. (2) § F, W, Sp. Prerequisite: Nursing 251 and 260A. Seminar 2 hours. Meleis

Course explores theoretical and conceptual aspects of international and cross-cultural nursing. Topic areas covered include culture and ethnicity; social policy and international development; health planning; ethics; and cross-cultural communication. MENT HLTH COM

262. Health Care Economics (3) § F. Lecture 2 hours. Lab 3 hours. Harrington

Course is a critical analysis of economic theories and public and private financing health care. Focuses on the effects of financing and reimbursement on health care delivery systems, nursing and professional practice, and individuals and families. FAM HLTH

263A. Gerontological Long-Term Care. (3) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Seminar 1 hour. G. Doyle

Course focus is on gerontological and chronic care nursing. Emphasis on selected
Frameworks used to assess and analyze relevant data. Impact of transitions within the continuum of care upon clients and patients in institutional and community settings. Concurrent practicum is required. FAM HLTH

**263B. Restorative Care: Geron/LTC.** (3) § W, Sp. Prerequisite: Nursing 263A. Consent of instructor. Lecture 2 hours. Seminar 1 hour.

G. Doyle, Willis

Examines restorative nursing care, including supporting principles, concepts, and theories. Explores prescribed nursing care, outcomes and evaluations for various institutional and community settings. Emphasis is on goal achievement and independence of each individual. Concurrent practicum is required. FAM HLTH

**265. Clin Epidem of Occup Hlth.** (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours.

Course explores management of occupational health clinical problems. Medical, nursing, industrial hygiene, and public health approaches are used to diagnose, evaluate, and control clinical problems. Emphasis is placed upon clinical diagnostic strategies and epidemiological methods. MENT HLTH COM

**266. Leadership in Long-Term Care.** (3) § W, Sp. Prerequisite: Consent of instructor. Seminar 3 hours. Harrington

Seminar examines leadership and administration in long-term care settings. Focuses on organization, budgeting, program planning, management, educational programs, and service delivery with emphasis on creative approaches and testing new models and theories. FAM HLTH

**267. Ethical Dilemmas & Nursing Prac.** (2) § F, W. Prerequisite: Graduate standing. Lecture 2 hours.

Davis

Exploration of selected ethical theories and dilemmas in health care and nursing practice. Focus is on selected case studies depicting ethical dilemmas in nursing practice, nursing research, and health policy. MENT HLTH COM

**268. Psychiatric Liaison Nursing.** (2) § F, W, Sp. Prerequisite: Nursing 211A and enrollment in the child or adult psychiatric nursing specialty tracks, Department of Mental Health and Community Nursing, or consent of instructor. Lecture 2 hours. Chafetz

Course reviews the emerging literature on psychiatric liaison nursing. Reports on roles of psychiatric nurses in medical settings will be critically analyzed, as well as clinical studies from the area of general hospital psychiatry. Comparative models of practice are discussed. MENT HLTH COM

**269. Historical & Contemporary Issues.** (2-3) § F, W. Lecture 2 hours. Seminar optional 1 hour. Styles

This course is designed to explore major issues and trends in contemporary nursing and health care delivery as they relate to nursing practice, education and research. MENT HLTH COM

**270. Adult Health Assessment.** (4) § SS2. Prerequisite: Consent of instructor. Lecture 6 hours. Hess

Course introduces assessment techniques for determining health status of adults. Focuses upon collection and interpretation of clinical data derived from the history and physical examination. Emphasizes identification of actual and potential stressors as well as adequate responses. MENT HLTH COM

**271A. Adult Primary Care Clin Mgt.** (1-4) § F. Prerequisite: Nursing 270 or consent of instructor. Lecture 1-4 hours. Burgel, Fugaro

Introduces primary health care concepts essential to management of common physical illness in adults. Emphasis is on promotion of optimum client adaptation, selection of clinical interventions congruent with clients’ adaptive potential, and incorporation of the nursing process into clinical decision-making. MENT HLTH COM

**271B. Adult Primary Care Clin Mgt.** (1-4) § W. Prerequisite: Consent of instructor. Lecture 1-4 hours. Hess, Bauer

Introduces primary health care concepts essential to management of common physical illness in adults. Emphasis is on promotion of optimum client adaptation, selection of clinical interventions congruent with clients’ adaptive potential, and incorporation of the nursing process into clinical decision-making. MENT HLTH COM

**271C. Adult Primary Care Clin Mgt.** (2-4) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Independent projects optional for 3-4 units. Burge

Introduces primary health care concepts essential to management of common physical illness in adults. Emphasis is on promotion of optimum client adaptation, selection of clinical interventions congruent with clients’ adaptive potential, and incorporation of the nursing process into clinical decision-making. MENT HLTH COM

**272. Chronic Illness: Child & Family.** (3) § Sp. Prerequisite: Nursing 258A, Anthropology 255, Psychology 205, or consent of instructor. Lecture 3 hours. Holiday

Course offers study of chronic illness in childhood and its effects upon the individual and his/her family. The presentation of content is based upon developmental and interactional models. Clinical content considers systematic assessment and intervention. FAM HLTH

**273. Curr Concepts in Occup Health.** (3) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Seminar 1 hour. Resnik

The structure and organization of the occupational health system, including regulatory control mechanisms for worker protection, labor management relations, and costs are analyzed. Emphasis is on planning, devel-
opment, and evaluation of occupational health programs. MENT HLTH COM

274. Health Hazards of Workplace. (3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours.
This is a prevention-focused course for nurses and other health professionals emphasizing recognition of chemical, physical, biologic and ergonomic hazards of work, identification of appropriate environmental monitoring methods, selection of health surveillance measures, and use of health promotion techniques. MENT HLTH COM

275A. Physiological Basis for Nursing. (1-3) § F, W. Lecture 1-3 hours. Preissig
Study of physiological theories applicable to nursing. Focus is on normal cell functions and nervous and endocrine systems functions which serve as a basis for nursing practice. PHYSIOL NURS

275B. Physiological Basis for Nursing. (1-3) § W, Sp. Lecture 1-3 hours. Preissig, Janson-Bjerkie
Study of physiological theories applicable to nursing. Focus is on normal function of gastrointestinal, cardiovascular, renal and pulmonary systems which serve as a basis for nursing practice. PHYSIOL NURS

275C. Neonatal Pathophysiology. (2) § Sp. Lecture 2 hours. Affonso, Lynch
Provides a study of the major disease processes encountered in the neonate and their relevance to nursing practice. The course will address etiology, manifestations and treatment during the acute phase of illness. PHYSIOL NURS

276. Theoretical Perspectives in Nsg Practice. (3-4) § F, W, Sp. Prerequisite: Consent of instructor. Lab 3 hours. Seminar 3 hours. Miller, Lovejoy
Comparative study of selected nursing conceptions and theories and their implications for nursing practice, curriculum development and research. Critique of theories will address key questions relevant to nursing goals, intervention focus and outcomes, repertoire of nursing, and social significance. PHYSIOL NURS

277. Critical Care Pathophysiology (3) § Sp. Lecture 3 hours. Sisson
Course offers study of the multi-system effects of frequently occurring pathologic states in the critically ill. Emphasis is on major mechanisms and consequences of the disorders which provide the basis for nursing assessment. PHYSIOL NURS

278. Nursing Science History & Philos. (4) § F. Prerequisite: Doctoral standing and consent of instructor. Lecture 2 hours. Seminar 2 hours. Gortner
Course provides an analysis of the history and development of nursing science and research in the United States, addressing the origins of scientific questions and methods in nursing, and the debates currently ongoing regarding definition, credibility, design, conduct, and outcomes of research. FAM HLTH

279A. Family Nursing—Theory Perspectives. (3) § F. Lecture 2 hours. Seminar 1 hour. Gilliss
Course investigates family models and family dynamics as they relate to nursing practice and research. Lectures explore family issues associated with health and illness behavior during family transition and stressful events. Seminars focus on applying concepts to interactions with families. FAM HLTH

279B. Family Nursing—Research Methodology. (3) § W. Prerequisite: Consent of instructor. Seminar 3 hours. Gilliss
Seminar in family methodology which critiques research studies and instruments that measure individual and family characteristics. FAM HLTH

279C. Family Therapeutics. (2) § W. Prerequisite: Consent of instructor. Seminar 2 hours. Nilsen
Seminar integrates family theory and therapeutic modalities. The focus will be on family structural and developmental models of assessment and intervention for identified family problems. FAM HLTH

Course introduces principles of older adult health maintenance care and problem identification. Focuses on health risks according to age, sex, illness history, and health habits. Emphasizes health promotion, illness prevention, and rehabilitation facilities within context of older adult’s environment. MENT HLTH COM

281A. Res Sem: Hlth & Its Correlates. (2) § W. Prerequisite: Enrollment in Ph.D. program in nursing or consent of instructors. Seminar 2 hours. Weiss
Course critically examines nursing research involving personal and environmental factors as they influence health and illness. MENT HLTH COM

281B. Hlth & Its Correlates. (4) § Sp. Prerequisite: N281A and enrollment in Ph.D. program in Nursing, or consent of instructors. Lab 3 hours. Seminar 3 hours. Dodd
Course critically examines faculty research investigating nursing science from the perspective of person, environment and health. PHYSIOL NURS

282. Pregnancy & Early Motherhood. (3-4) § W, Sp. Prerequisite: Enrollment in doctoral program. Lecture 2 hours. Field work 3-6 hours. Mercer
Course analyzes pregnancy and early motherhood including the relationship of physiological and developmental to psychological and social phenomena. Students will develop a model to explain a phenomenon occurring during pregnancy or early motherhood. FAM HLTH
283. Institutional Care of the Aged. (3) § F, W, S. Prerequisite: Nursing 211 or equivalent. Seminar 3 hours. Kayser-Jones
Using a theoretical, historical, and cross-cultural approach, the seminar focuses on issues, problems, and trends in institutional care of the elderly. Research studies will be discussed and analyzed, and the health professional's role in providing care will be explored. MENT HLTH

284. Adolescent Health Care. (2) § F, W. Prerequisite: Consent of instructor. Seminar 2 hours. Savedra
Examination and analysis of theory and research related to health care of adolescents and their families in a variety of settings. Emphasis will be on adaptation to selected stresses including trauma, chronicity, hospitalization, terminal illness and disability. FAM HLTH

285. Topics in Physio Nsg: ECG. (3) § F, W. Prerequisite: Graduate standing or consent of instructor. Lecture 3 hours. Wold
Course will focus on electrophysiological events present in normal and pathological states. A theoretical and research base in 12-lead ECG will provide the foundation for bedside arrhythmia interpretation, intervention, and evaluation. PHYSIOL NURS

286A. Research in Stress & Coping. (3-4) § F. Prerequisite: Consent of instructor or doctoral-level theory development. Lecture 3 hours. Proposal development optional one unit. Benner
Course critically analyzes the relationship of stress and coping to health and illness. Examines theoretical and empirical links between coping strategies and therapeutic interventions. Emphasis is on research programs. PHYSIOL NURS

286.01B. Stress & Coping—Cardiopulmonary. (3-4) § W. Prerequisite: Nursing 286A. Lecture 3 hours. Proposal development optional one unit. Benner
Course examines the current nursing, behavioral, medicine, and epidemiological research relating stress and coping to the etiology and course of cardiopulmonary disease. Theoretical and empirical links between coping resources, strategies, and helping interventions are also included. PHYSIOL NURS

288A. Executive Nursing Administration. (3) § F, W. Prerequisite: Consent of instructor. Seminar 3 hours. Styles
Seminar offered to doctoral students, analyzing theories and research related to executive nursing roles in academic and service settings. Course examines administrative concepts pertaining to governance, use of power, corporate designs, and executive scholarship. MENT HLTH COM

288B. Decision Theory Seminar. (3-4) § W. Prerequisite: Consent of instructor. Seminar 2 hours. Conference 1-2 hours. Styles
Seminar offered to doctoral students in nursing administration, which synthesizes and evaluates major decision theories and approaches to decision analysis relative to roles of the nurse administrator. MENT HLTH COM

289. Labor Relations. (3) § W, S. Prerequisite: Consent of instructor. Lecture 3 hours. Neff
Course critically analyzes organization and exchange theories relative to managing employer-employee relations in health care and educational settings. Emphasis is on labor movement, labor legislation and regulation, contract negotiations and grievance procedures. MENT HLTH COM

290.01. Family Health Nursing Theory. (3-4) § W. Prerequisite: Enrollment in doctoral
program. Lab 0-3 hours. Seminar 3 hours.

Sav德拉
Comparative analysis of classical theories and methodologies deriving a theory base for family health nursing. Emphasis is on interactional, role, structural-functional, and systems theories. FAM HLTH

290.02. Family Health Nursing Theory. (3-4) § W. Prerequisite: Nursing 290.01 or consent of instructor. Enrollment in doctoral program. Seminar 3 hours. Sav德拉
Comparative analysis of classical theories and methodologies deriving a theory base for family health nursing. Emphasis is on developmental, psychoanalytic, exchange, cognitive, and field theories. FAM HLTH

290.03. Family Health Nsg Theory. (3-4) § W. Prerequisite: Nursing 290.01 and 290.02 or consent of instructor. Enrollment in doctoral program. Seminar 3 hours. Sav德拉
Individual development of a framework or model for study of a specific problem in family nursing. Emphasis is on critique of models generated by students and their applicability to research problems. FAM HLTH

291A. Pediatric Pathophysiology. (1-2) § W. Lecture 1-2 hours. FerKetch
A study of pathophysiology applicable to pediatric nursing. Emphasis is on fluid and electrolyte imbalance, and hemopoietic, nervous, and endocrine system dysfunctions and their implications for nursing care. PHYSIOL NURS

291B. Pediatric Pathophysiology. (3) § W. Prerequisite: Lecture 3 hours. I. Moore
A study of pathophysiological theories applying to pediatric nursing. The focus is on body system dysfunctions and their implications for nursing care. PHYSIOL NURS

292. Physiology of Pregnancy. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Affonso, Mayberry
Course reviews and analyzes advanced physiology and pathophysiology of pregnancy and their impact on the maternal-fetal unit as a basis for nursing practice and research. Emphasis is on reproductive and endocrine systems affecting adaptation and development during pregnancy. PHYSIOL NURS

292B. Physiology of Pregnancy. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Affonso, Mayberry
Course reviews and analyzes advanced physiology and pathophysiology of pregnancy as a basis for practice and research. Emphasis is on cardiovascular, hematologic, neuroendocrine, and renal systems affecting adaptation and development during pregnancy. PHYSIOL NURS

293. Nursing Serv & Educ Evaluation. (3) § W. Prerequisite: Consent of instructor. Seminar 3 hours. Holzemer
Case studies are utilized to demonstrate the activity of program evaluation in nursing service and education. JCAH and NLN criteria are examined. Evaluation designs, instrumentation, data utilization, and political components of evaluation for policy decision-making are critically analyzed. PHYSIOL NURS

294. Computer Management & Clinical Data. (3) § W. Prerequisite: Preference given to students in critical care specialty. Others admitted with consent of instructor. Lecture 3 hours. Lab 3 hours. Miller, Stotts
Course is an analysis of critical care patient data using the computer. Emphasis is on conceptualizing the set of data needed for decision making and using the computer to aid in clinical decision making. PHYSIOL NURS

295. Quasi-Experimentation in Nsg Res. (3) § W. Prerequisite: Consent of instructor. Seminar 3 hours. Holzemer
Seminar addresses validity issues of quasi-experimentation in nursing research. Designs examined in nursing literature include non-equivalent control group designs, interrupted time-series designs, passive observation, and randomized experiments. PHYSIOL NURS

296. Teaching Theories & Evaluation. (4) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Seminar 2 hours. Okamoto
Analysis of principles, theories, and research in the field of teaching with emphasis on teaching strategies and evaluation methods applicable to clinical and educational settings. A metacognitive teaching format is incorporated for application and evaluation of selected teaching interactions. PHYSIOL NURS

297A. Financial Management. (2) § W. Sp. Prerequisite: Major in Nursing Administration or consent of instructor. Lecture 2 hours. Cleland
Course offers an introduction to financial theories and accounting principles as they relate to financial management in health care settings. Emphasis is on managerial responsibilities in financial planning and accounting. MENT HLTH COM

297B. Financial Management. (2) § W. Sp. Prerequisite: Nursing 297A. Lecture 2 hours. Cleland
Course offers an advanced critical analysis and synthesis of economic and financial theories as they relate to financial management in health care settings. Emphasis is on the nurse manager’s role and responsibilities in budgeting, monitoring, and control. MENT HLTH COM

298. Thesis or Comprehensive Exam. (0) § W. W. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the thesis for the master’s degree or taking a comprehensive examination required for the master’s degree.
299. Dissertation. (0) F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

Staff

For graduate students engaged in writing the dissertation for the Doctor of Nursing Science (D.N.S.) or Doctor of Philosophy in Nursing degree.

401. Teaching Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours.

Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor.

402. Administration Residency. (4-12) F, W, Sp. Prerequisite: Completion of Nursing 287A-B-C and 297, each with a grade of 'B' or higher, and consent of instructor. Lab 12-36 hours.

Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor.

403. Consultation Residency. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours.

Staff

Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor.

404. Clinical Residency (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours.

Staff

Student has opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. INTERDEPARTMENTAL.

404.01. Adult Primary Care Nursing—Clinical Preceptorship. (4-12) F, W, Sp. Prerequisite: Consent of instructor. Lab 12-36 hours.

Staff

Course provides an opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. MENT HLTH COM

404.06A. Ped Clin Residency. (5) F. Prerequisite: Consent of instructor. Lab 12 hours. Seminar 2 hours. Conference 1 hour.

Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

404.06B. Ped Clin Residency. (5) W. Prerequisite: Consent of instructor. Lab 12 hours. Seminar 2 hours. Conference 1 hour.

Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

404.06C. Ped Clin Residency. (5) Sp. Prerequisite: Consent of instructor. Lab 12 hours. Seminar 2 hours. Conference 1 hour.

Durand

Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory child health care. FAM HLTH

Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of mental health and community nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. MENT HLTH COM

405.01. Health Assessment of the Adult Clinical Practicum (3) SSII. Prerequisite: Must be taken concurrently with N 270. Lab 4 hours. Clinical 5 hours/week.

Staff

Application of health assessment concepts and skills under supervision of clinical preceptors. Performance of systematic health assessment of adults leading to a growing ability to differentiate between normal and abnormal findings to identify stressors that arise from physical, social, and developmental services, and to formulate an initial problem list that reflects the above. FAM HLTH

Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of family health care nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. FAM HLTH

Staff

Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of physiological nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. PHYSIOL NURS

Staff

Supervised practice in selected components of the teaching role in nursing.

411A. Introduction to Computers. (2) § F, W, Sp. Lecture 2 hours. Slaughter

Course presents overview of the impact of computer technology upon nursing. Focus is upon hardware and software for nursing in the mainframe to micro environment. Word processing for scientific writing using IBM PC is an integral part of the class. PHYSIOL NURS

411B. Fiscal Modeling. (2) § W. Prerequisite: Nursing 411A. Priority of space available to
300. Maternal & Infant Nutrition. (2-4) W. Prerequisite: Consent of instructor. Lecture 2-4 hours. Gutierrez
Application of current maternal nutrition research to train students in working with other health professionals to offer interdisciplinary maternal nutrition counseling in the prevention of low birth weight. Emphasis will be on cross-cultural factors in assessment and counseling. FAM HLTH

201. Principles of Diet Therapy. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Gutierrez
Concepts of dietary modifications as required in the prevention and treatment of major disease entities. Emphasis will be on current diet therapy research and on clinical approaches useful in practice. FAM HLTH

130. Nutrition & Health. (2) W. Lecture 2 hours. Silverstein
An introduction to the basic principles of human nutrition. Subject material is related to the maintenance of normal nutrition throughout one’s life span, and emphasis is on normal nutrition and its preventive role in maintaining general health, specifically oral health. DENT PUB HLTH

160. Nutrition in Dental Hygiene. (2) F Lecture 2 hours. Levine
Review of biochemical principles of nutrition related to development and maintenance of oral tissue, and the interrelationship of foodstuffs. Emphasis will be on practical application of nutritional assessment and counseling for dietary/behavioral change. DENT PUB HLTH

Supervised practicum in nutrition counseling with dental clinic patients. Students will apply techniques of diet analysis, preventive program planning, and patient counseling. DENT PUB HLTH

110. Ob Gyn Core Clerkship. (1½ per week) Su, F, W. Sp. Prerequisite: Medicine 132A-B-C. Jaffe and Staff
Basic principles and fundamental techniques in obstetrics and gynecology, including the psychiatric aspects of obstetrics and gynecology, are discussed in a series of seminars, case discussions, and teaching clinics. Students gain practical experience in clinics, wards, delivery room, and operating room under direct supervision. OB GYN R S

140.01. Advanced Ob Gyn Clerkship—C. (1½ per week) Su, F, W. Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110 and Medicine 110 or Surgery 110, or consent of instructor. C. Levinson
Students will have responsibilities of full-time acting residents on both the obstetrical and gynecological services. OB GYN R S

140.02. Advanced Clinical Clerkships. (1½ per week) Su, F, W. Sp. Prerequisite: Obstetrics and Gynecology 110, consent of instructor, and approval of department at off-campu hospital. Braga, R. Glass
Advanced clinical clerkship. Senior clerkship in both inpatient and outpatient obstetrics and gynecology are available at K and other hospitals by arrangement. OB GYN R S

140.05. Advanced Clerkship—VMC (1½ per week) Su, F, W. Sp. Prerequisite: Satisfactory completion of Ob/Gyn 110, Pediatrics 110, and Medicine 110 or Surgery 110. Open only to 4th year medical students of schools in U.S.A. and Canada. Reyes, Cooke, Suelo
Practical clinical training in Ob/Gyn at Valley Medical Center of Fresno. Time is divided between labor and delivery experience, gynecology ward, and Ob/Gyn outpatient clinic. Students will have the opportunity to see normal, high risk, and adolescent pregnancies. OB GYN R S

140.06. Advanced Ob/Gyn Clerkship—SPGH. (1½ per week) Su, F, W. Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110, and either Medicine 110 or Surgery 110, or consent of instructor. R. Sweet and Staff
The clerk will function as an acting intern on the gynecology inpatient service. Some gynecologic outpatient and emergency room experience will be possible as well as inpatient and surgical gynecology. OB GYN R S

140.07. Advanced Gyn Clerkship—UC. (1½ per week) Su, F, W. Sp. Prerequisite: Obstetrics and Gynecology 110, Pediatrics 110 and Medicine 110 or Surgery 110, or consent of instructor. Braga, R. Glass
The clerk functions in the role of an acting resident on the gynecology service. Responsibilities are primarily on the inpatient service and will include both surgical and nonsurgical aspects of gynecologic oncology, endocrinology, infertility, and general gynecology. OB GYN R S

140.08. Ob Gyn Preceptorship. (1½ per week) Su, F, W, Sp. Prerequisite: Obstetrics and Gynecology 110 and consent of instructor and chairperson of the department. Staff

Clinical experience in a subspecialty area or general obstetrics and gynecology under the direction of a member of the faculty. OB GYN R S

150.01. Research in Ob Gyn & Repro Sci. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department. Staff

A nonclinical research project under the direction of a member of the faculty. OB GYN R S

170.01. Sociocultural Aspects of Nutr. (1) Sp. Seminar 1 hour. Abrams

A survey of the social, cultural, and psychological factors that determine food behavior in the individual. Lectures, discussions, and readings will identify barriers to healthy food patterns. Brief written assignments and class discussions will develop practical approaches to the provision of nutritional care. OB GYN R S

198. Supervised Study. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. OB GYN R S

199. Laboratory Project. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. OB GYN R S

222. Reproductive Endocrinology Sem. (1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Kuhn

Seminar presentations in areas of current interest in reproductive endocrinology by guest speakers and members of the Reproductive Endocrinology Center. Students will be required to submit a term paper. Course may be repeated for credit. OB GYN R S

230. Reproductive Endocrinology. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Minimum of 4 students. R. Weiner

Lectures and assigned readings on the reproductive endocrinology of the male and female. Topics include structure, function, and regulation of the hypothalamic, pituitary, and gonadal hormones, with special emphasis on the human. OB GYN R S

231. Hormone Receptor Binding. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. J. Roberts

An in-depth assessment of the characterization of hormone receptor interactions by ligand binding methods. Lectures, assigned readings, and problems will focus on theoretical and practical aspects of techniques and data analysis. OB GYN R S

400. Staff Conferences. (1) Su, F, W, Sp. Staff

Conferences comprised of formal discussions by staff, faculty, and visiting lecturers. OB GYN R S

Seminar includes the presentation of pathologic material from the obstetric and gynecologic services with formal instruction and discussions. OB GYN R S

Seminars include presentations of special topics, literature reviews, and discussions. Discussions of resident staff functions also are held. OB GYN R S

Residents are responsible for the care of patients in the hospital and outpatient clinic. Formal and individual instruction is conducted. OB GYN R S

Ophthalmology

First-Year Coordinated Instruction—

Medicine 131A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship—Surgery 110 and 111 include lectures and clinical experience in the diagnosis and care of eye diseases.

140.01A. Advanced Ophthalmology Clkshp—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Surgery 110 or consent of instructor. Drake

Students will serve as subinterns on the ophthalmology wards. They will work up and present patients, and attend surgery and postoperative clinics. This is an intensive clerkship where students will be on twenty-four hour call the entire time. OPHTHALMOL

140.01B. Advanced Ophthalmology Clkshp—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. O'Donnell

Students will observe, work up and present ophthalmology outpatients at the Eye Clinic. They will attend department rounds and conferences. OPHTHALMOL

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. O'Donnell and Staff
Clinical clerkship in approved hospitals by special arrangement and approval by the dean and the chairperson of the department. OPHTHALMOL.

140.03. Adv Ophthalmology Clerkship—SFGH (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Goodner and Staff
Clinical observation of patients in the clinics, wards, and surgery at SFGH. OPHTHALMOL.

Clinical observation of patients in the clinics, wards, and surgery at L. OPHTHALMOL.

140.05. Adv Ophthalmology Clerkship—VMC (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Whitten
Under close supervision, students are involved in the clinical observation of patients in the Eye Clinic, on the wards and in surgery, and participate in departmental conferences. Main objective of the course is to enable students to perform a complete eye examination. OPHTHALMOL.

140.06. Adv Ophthalmology Clerkship—VA (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Stanley
Clinical observation of patients in clinics, wards and surgery. OPHTHALMOL.

150.02. Ophthalmology Research. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department. S. Kramer
A research project under the direction of a member of the faculty carried out in the Department of Ophthalmology. OPHTHALMOL.

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. OPHTHALMOL.

199. Laboratory Project. (1-5) F, W, Sp. S. Kramer
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. OPHTHALMOL.

400. Staff Conference. (1) F, W, Sp. S. Kramer
Residents present and present diagnostic and therapeutic problem cases. Discussion by faculty and visitors follows. Residents also present papers on various aspects of medicine and ophthalmology, which are discussed by faculty members. OPHTHALMOL.

401. Staff Conference. (1) F, W, Sp. Prerequisite: First- and third-year residents. S. Kramer
Conferences include grand rounds and case presentations of hospital patients, review of recent literature in ophthalmology, and assigned reading with required reports. OPHTHALMOL.

Seminars include didactic lectures in practical work covering pathology, neuro-ophthalmology, uveitis, physiological optics, refractive, ocular motility, glaucoma, and microbiology. OPHTHALMOL.

Didactic lectures and demonstrations cover the basic sciences as applied to ophthalmology. These include anatomy, histology, biochemistry, physiology, and pharmacology. OPHTHALMOL.

Residents, under supervision, are responsible for patients in the Eye Clinic. First-year residents assist in eye surgery and the Eye Bank program. Specially clinics include external diseases, extracocular muscles, medical ophthalmology, ophthalmoscopy, refraction, cataract, glaucoma, neuro-ophthalmology, plastic surgery, and tumor. OPHTHALMOL.

Residents, under supervision, are responsible for patient care including diagnostic studies and treatment of medical eye care, diagnosis, surgery, and follow-up treatment of surgical eye cases. Residents consult for other hospital services. OPHTHALMOL.

Fourth-year residency taken at UC or at any approved institution subject to the approval of the chairperson of the department and the dean. OPHTHALMOL.

Residents or fellows, under supervision, are responsible for patient care, including diagnostic studies and treatment of medical eye care, diagnosis, surgery, and follow-up treatment of surgical eye cases. OPHTHALMOL.

Residents, under supervision of the attending staff, are responsible for patient care on wards and in the follow-up clinic, including diagnostic studies and consultation. Rotation is combined with patient-care assignments in the Otolaryngology Service. OPHTHALMOL.

Oral Biology

111. First Year Special Study. (2) F. Prerequisite: Passing placement examination and
consent of instructor. Lecture 2 hours.

Newbrun, Beirne, Bhatnagar
Discussion of biological problems of interest in dentistry including saliva, mineral metabolism, hydroxyapatite crystal structure, connective tissue, bacterial cell walls, oral bacterial metabolism, and blood coagulation. STOMATOLOGY.

126. Introduction to Oral Biology. (2½) F. Prerequisite: Anatomy 118. Lecture 2½ hours. Lab 4 hours.

Christie
Introduction to oral biology correlating morphology, chemistry, function of dental and parodental tissues. Topics include head and neck embryology, enamel, dentin, cementum, pulp and pulpal disease, dental caries, dental anomalies, tooth eruption, periodontium and periodontal disease, oral nucous membranes. STOMATOLOGY.

128A. Intro to Caries & Perio. (1) F. Prerequisite: Biochemistry 110A-B, Microbiology 126A. Lecture 1 hour.

Robertson, Newbrun, Armitage
Introduction to the etiology, pathogenesis, and diagnosis of dental caries and periodontal disease. STOMATOLOGY.

128B. Microbiology of Caries & Perio. (1) W. Prerequisite: Oral Biology 128A. Lecture 1 hour.

P. Murray
Introduction to the microbiology of caries and periodontal disease. The formation and pathogenetic potential of dental plaques are discussed. STOMATOLOGY.

Newbrun, Robertson, Armitage
Principles in the prevention and treatment of caries and periodontal disease. Dietary factors in the pathogenesis of caries and periodontal disease are covered and the role of fluorides in caries prevention is discussed. Practical experience in the diagnosis/treatment of periodontal diseases will be provided.

STOMATOLOGY.

175A-B-C. Oral Immunology and Immunopathology. (2-2-2) F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

Greenspan
Lectures and seminars on immunological mechanisms and their contribution to oral diseases. Topics covered include the immunology of periodontal disease, oral microbial diseases, oral autoimmune disease, and discussions of the interface of immunopathology and inflammation. STOMATOLOGY.

186. Introduction to Biological Sciences. (1) Su. Lecture, Laboratory, Demonstration: 9 hours for 3 weeks.

Christie
Introduction to the biological sciences taught in the first year in dentistry (Anatomy, Biochemistry, Physiology). This course includes one half-day per week orientation to the campus community. STOMATOLOGY.

Newbrun and Staff
Principles and methods employed in oral biology such as radioisotope techniques, spectroscopy, chromatographic techniques, use of animal models, cell fractionation and enzyme purification, methods in cell mediated immunology, antibody quantitation, immunomorphology, antibiotic sensitivity testing, and indices for quantitating dental diseases. ORAL MED.

Silverman and Staff
A wide spectrum of selected topics related to oral biology is presented with emphasis on basic and applied research methodology, pertinence of problems, significance of findings, and critical evaluations of data. STOMATOLOGY.

208A-B-C. Oral Immunology and Immunopathology. (2-2-2) F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours.

Greenspan
Lectures and seminars on immunological mechanisms and their contribution to oral diseases. Topics covered include the immunology of periodontal disease, oral microbial diseases, oral autoimmune disease, and discussions of the interface of immunopathology and inflammation. STOMATOLOGY.

Staff
A course in connective tissue biology concerned mainly with the development, differentiation, and pathology of connective tissues, including topics such as regulatory controls of connective tissue macromolecules, fibrosis, wound healing, inflammation, tissue destruction, and selected genetic disorders. STOMATOLOGY.

Staff
A seminar series covering current advances in research in oral biology in a systematic manner. Current literature will be critically reviewed by students under faculty supervision, or by faculty or guest lecturers. STOMATOLOGY.

Staff
STOMATOLOGY.

Staff
Reading and conferences under the direction of a member of the staff. STOMATOLOGY.

298. Thesis. (0) F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

Staff
For graduate students engaged in writing the thesis for the master's degree. STOMATOLOGY.
300A-B-C. Teaching Practicum. (1-4, 1-4, 1-4, 1-4) § W, S, SS. Prerequisite: Consent of instructor. Staff

Practice in teaching in a course in oral biology under the supervision of the instructor in charge. STOMATOLOGY

406A-B-C. Selected Topics. (1-1-1) F, W, Sp. Seminar 1 hour. Staff

A wide spectrum of selected topics related to oral biology is presented with emphasis on basic and applied research methodology, pertinence of problems, significance of findings, and critical evaluation of data. STOMATOLOGY

Oral Medicine and Hospital Dentistry

Chinn, Caswell and Staff

Group rotation through two five-week sections: clinical diagnosis—patient presentation entailing history-taking, examination, diagnosis, treatment, and follow-up; and medicine—introduction to internal medicine and physical diagnosis. STOMATOLOGY

120. Oral Medicine. (3) Sp. Prerequisite: Oral Medicine and Hospital Dentistry 126 and 127. Lecture 3 hours. T. E. Daniels

Handling of patients is introduced by emphasizing history-taking, differential diagnosis, medical implications, clinical pathology laboratory in dental practice, and fundamentals of treatment. Classification, etiology, pathogenesis, diagnosis, and treatment of some benign lesions occurring in the oral cavity are covered. STOMATOLOGY

Introduction to clinical medicine for dental students. Pathophysiology and differential diagnosis of disease will be discussed. Emphasis will be placed on ways that medical diseases influence clinical care of dental patients. STOMATOLOGY

139. Clinical Acute Dental Care. (0-1) W, Sp. Clinic 6 hours per quarter. Rosenquist, Danford

Clinical experience and small group seminar discussion on topics including diagnosis, treatment, and pain and infection control of acute dental problems. STOMATOLOGY

149. Acute Dental Care Clinic. (0-1) SS. F. Clinic 6 hours per quarter. Rosenquist, Danford

Expanded clinical experience in the diagnosis and treatment of acute dental conditions. STOMATOLOGY

Clinical oral pathology for the dental hygienist. Diagnosis and management of some common oral lesions are covered. Use of diagnostic aids and methods of treatment are emphasized. STOMATOLOGY

Advanced study of the oral tissues, with emphasis on their histophysiological aspects. STOMATOLOGY

180A-B-C. Clinical Pathology Conference. (1-1-1) F, W, Sp. Prerequisite: Fourth-year standing. Lecture 1½ hours. S. Silverman and Staff

Clinical pathology conference; biology, diagnosis, and treatment of various oral lesions and associated patient problems. Some oral conditions are critically re-evaluated in the light of current research advances. Specific medical knowledge is related to patient care. STOMATOLOGY

189. Acute Dental Care Clerkship. (1-10) F, W, Sp. Clinic 30 hours per week. Rosenquist, Danford

Advanced instruction and clinical experience in the diagnosis and treatment of acute dental problems. STOMATOLOGY

189.01. Clinical Oral Dentist. (1) F, W, Sp. Prerequisite: Oral Biology 109.01 and consent of instructor. Clinic 3 hours. S. Silverman

Participation in the Oral Medicine Clinic: apply knowledge of history-taking and differential diagnosis; utilize various diagnostic techniques such as biopsy, cytology; and certain clinical pathology laboratory tests; interpret results, prescribe treatment and follow-up; hospital rounds and weekly seminar. STOMATOLOGY

189.03. Adv General Dentistry Clerkship. (1½ per week) F, W, Sp. Prerequisite: Fourth-year standing and approval of Clinic Review Committee. S. Silverman, Ware

Students provide comprehensive dental care to patients assigned to them, under supervision of staff in the medical and hospital environment. Students also attend seminars and conferences. STOMATOLOGY

Review of oral diseases most relevant to physicians. Etiology, diagnosis, management and prevention are covered. Subjects include introduction to dentistry, caries, fluoride, periodontal disease, precancerous lesions, oral cancer, saliva, salivary gland disease, oral aphthae, herpes, smoking, diseases of the tongue. STOMATOLOGY
199. Laboratory Project. (1-5) F, W, Sp. Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department.

STOMATOLOGY

Advanced considerations in the field of histopathology. Applications of newer techniques and concepts are presented to increase understanding of the oral cavity in health and disease. Etiology, diagnosis, and therapeutics are discussed. STOMATOLOGY

400. Maxillofacial Prosthodontics. (0-1) F, W. Lecture 1 hour. Zlotolow
Course is designed to acquaint residents and fellows with the multidisciplinary aspects of maxillofacial prosthetics. Lectures will be given on maxillofacial prosthetic techniques, oncology, head and neck surgery, plastic surgery, oral surgery, therapeutic radiology, psychology, and related oral biology. STOMATOLOGY

Participation in the Oral Medicine Clinic applying knowledge of history-taking and differential diagnosis; utilizes various diagnostic techniques such as biopsy, cytology, and certain clinical pathology laboratory tests; interprets results, prescribes treatment, and follows up; hospital rounds; and weekly seminars. STOMATOLOGY

489.02. Oral Medicine. (1) F, W, Sp. Prerequisite: D.D.S. degree and consent of instructor. Clinic 3 hours. Staff
Participation in the Temporomandibular Joint Clinic applying knowledge of history-taking and differential diagnosis; utilizes such diagnostic techniques as laminographic X rays, occlusal analysis, and other specific joint tests; interprets results, prescribes treatment, and follows up with patient reviews. STOMATOLOGY

Oral Pathology

127A-B. Introduction to Oral Pathology. (0-5)§ F, W. Prerequisite: Oral Biology 126. Lecture 4½ hours. Lab 3 hours. J. Greenspan, T. L. Green
Course correlates clinical oral pathology with histologic changes. Emphasis is placed on the microscopic and laboratory interpretation of cellular, tissue, and chemical alterations. Laboratory sessions concentrate on clinical presentation of oral diseases. STOMATOLOGY

172. Current Oral Pathology. (1-2) Sp. Prerequisite: Registration in postgraduate specialty program. Seminar 1-2 hours. L. Hansen and Staff
A seminar designed to acquaint postdoctoral students with current advances, techniques, trends, and developments in the field of oral pathology. STOMATOLOGY

Lectures and seminars on diseases of the oral regions. Disease entities are studied from a clinical and histomorphological standpoint with emphasis on etiology and pathogenesis. STOMATOLOGY

181. Forensic Odontology. (1) F. Lecture 1 hour. T. L. Green
Identification by means of dental evidence is known as forensic odontology. Course includes identification procedures in single and multiple deaths including homicides and mass disasters; forensic dental radiology; bite-marks and bite injury, the medicolegal autopsy; fire research, and forensic anthropology. STOMATOLOGY

Lectures and seminars on diseases of the oral regions. Disease entities are studied from a clinical and histomorphological standpoint with emphasis on etiology and pathogenesis. STOMATOLOGY

Oral Radiology

109.01. Intro to Clinical Radiology. (0-1) W. Prerequisite: Oral Diagnosis 129 and Oral Radiology 121. Lab rotation 24 hours. Rosenquist
Clinical experience in full-mouth radiography, emergency radiography, laminography, panoramic radiography, darkroom technique, and quality control. Application of anatomy, pathology and previous didactic experience in radiology in interpreting radiographs and in establishing differential diagnosis. STOMATOLOGY

109.02. Clinical Rotation in Radiology. (0-1) S. F. Prerequisite: Oral Radiology 121 and 109.01. Clinic and seminar. Rosenquist
Clinical experience and small group instruction is provided in oral radiology at the advanced postdoctoral level. Course will provide advanced experience in intraoral and extraoral radiographic techniques and introduce students to the full range of X-ray imaging techniques. STOMATOLOGY

Introduction to principles of diagnostic radiology with foundations in physical and biologic sciences. Includes historical contributions to radiology, production of X-radiation, interactions of X-rays with matter, biological effects of ionizing radiation, applications of radiological health, radiographic
image formation, and photochemistry. STOMATOLOGY

121. Radiographic Interpretation. (1) F. Lecture 1 hour. Kircos
An introduction to the fundamentals of radiographic interpretation, some of the basic physics of X-ray generation, and radiation biology. STOMATOLOGY

131. Radiographic Interpretation. (1) Sp. Prerequisite: Oral Radiology 121. Lecture 1 hour. Kircos
Course is a continuation of Oral Radiology 121 and is intended to broaden the scope of radiographic interpretation. Additional aspects concerning radiation biology are also included. STOMATOLOGY

139. Intro to Clinical Radiology. (½) S. Prerequisite: Oral Radiology 111 and 121. Clinic 15 hours Rosenquist
Introduction to intraoral radiographic technique where the student demonstrates radiographic competence on mannequins and patients as well as compliance with the California Board of Dental Examiners examination on radiation safety. Provides radiographic experience necessary for transition to the clinic. STOMATOLOGY

159. X-Ray Technique. (1) W. Lab 3 hours. Rosenquist
A course in intraoral X-ray technique including instruction in the long cone paralleling method and practice on mannequins and skulls. STOMATOLOGY

169. Intraoral & Panoramic Radiography. (1) F, W. Sp. Prerequisite: Oral Radiology 150 and 159. Clinic 3 hours. Rosenquist and Staff
Clinical instruction and experience in intraoral and extraoral radiography. STOMATOLOGY

Approval of Clinic Review Committee: Seminar 1-2 hours. Clinic 0-6 hours. Parks
Continuation of Oral Radiology 121 and 131 in a seminar teaching format. STOMATOLOGY

199. Laboratory Project. (1-5) F, W. Sp. Staff
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. STOMATOLOGY

Oral Surgery

109. Clinical Oral Surgery. (0-7½) SS, F, W. Sp. Prerequisite: Third-year standing. For senior rotation, student must have passed Oral Surgery 120, 130A, 130B, 130C, 131 and 132 or have consent from the division chairperson. Clinic variable. R. Smith
Students learn to recognize and treat common dental and medical emergencies, perform routine exodontia and minor oral surgical procedures; assist on major procedures in operating room setting; utilize common techniques of pain and anxiety control; assist with admission, work-up and discharge of hospital patients. STOMATOLOGY

120. Local Anesthesia. (½) Sp. R. Smith, Gordon
Course covers local anesthetics and techniques as they pertain to dentistry and oral cavity. STOMATOLOGY

130A. Dentoalveolar Surgery. (1) SS. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture and seminar. Gordon, R. Smith
An introduction to the basic principles of exodontia, dentoalveolar surgery, postoperative care, hemorrhage control, and management of common complications. STOMATOLOGY

130B. Pain & Anxiety Control. (1) F. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture 1 hour. Gordon, R. Smith
A didactic course outlining the basic principles and techniques of pain and anxiety control in the dental office. Emphasis is on nitrous oxide and oxygen and intravenous sedation. STOMATOLOGY

130C. Diagnosis & Treatment of Pain. (1) W. Prerequisite: Anatomy 117A-B and Microbiology 126A-B. Lecture 1 hour. Gordon, R. Smith
A didactic course covering current advances in the field of pain and a variety of topics such as physical evaluation of the pain patient, temporomandibular joint dysfunction, myofacial pain, and neuralgic pain. STOMATOLOGY

Procedural skills and academic knowledge the general dentist should be familiar with: includes the treatment of developmental deformities of the jaws, infections, temporomandibular joint, fractures of the jaws and contiguous structures, preprosthetic surgery, and osteomyelitis. STOMATOLOGY

Medical evaluation of dental patients and in-depth evaluation and treatment of patients with medical problems. Evaluation and treatment of cardiac arrest. Discussion of emergency drugs and development of an office emergency kit. Demonstrations of parenteral administration of drugs. STOMATOLOGY

171. Applied Surgical Anatomy. (1) F, W. Sp. Prerequisite: Limited to interns and residents. Lab 3 hours. Pogrel
Relationships of gross anatomical structures of the head and neck are studied during lab-
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. STOMATOLOGY

Residents will participate in evaluation and defining treatment options for patients with facial and dental deformities. STOMATOLOGY

Seminar includes presentation of case studies, literature review, clinical pathology presentations, and occasional guest lectures. STOMATOLOGY

175. Advanced Clinical Oral Surgery. (1 1/2 per week) Su. Prerequisite: Limited to oral surgery interns. Hospital and clinic 40 hours. R. Boyd

Interns and residents, under supervision, are responsible for preparation of case records, laboratory work, preoperative patient preparation, attendance at surgery, postoperative care, and attendance at follow-up clinics. In addition, senior residents have certain administrative, teaching and clinical responsibilities. STOMATOLOGY

Clerkships may be at UC, SFGH, MZ, VA, or at another affiliated institution. Students participate in oral surgery care of hospital inpatients and outpatients, attend seminars and lectures. STOMATOLOGY

199. Laboratory Project. (1-5) F, W, Sp. Kaban

A discussion of recognition, etiology, and principles of orthodontics for the dental hygienist. GR DEVEL

170A-B-D-E. Orthodontic Diagnosis. (1-1-1-1) SS1, SS2, F, W. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 1 hour. E. West

Classification, etiology, and diagnosis of malocclusion. The various diagnostic modalities used in patient evaluation and treatment planning will be presented. GR DEVEL

170.01A-B-C. Journal Club. (1-1-1) F, W, Sp. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Seminar 1 hour. T. Grove

A participation course in the review, analysis, and critical evaluation of the professional literature dealing with orthodontics and its related fields. GR DEVEL

171. Orthodontics in Periodontic Pract. (1) W. Prerequisite: Consent of instructor and enrollment in a postdoctoral specialty program. Lecture 1 hour. E. West

Course includes orthodontic principles and techniques that are applicable in a periodontic practice. GR DEVEL

171.01D. Concepts of Occlusion. (1) SS1. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 1 hour. I. Nielsen

Various concepts of occlusion and its biological determinants will be discussed as they affect functional problems of the temporomandibular joint. GR DEVEL

171.02A-B-C. Practice Management. (2-2-2) F, W, Sp. Prerequisite: Enrollment in postdoctoral orthodontics or pediatric dentistry program or consent of instructor. Lecture 2 hours. R. Meyer
A survey course intended to prepare the student to deal with the realities of managing an orthodontic practice. Thirty-six topics are explored and discussed by students and faculty. Several visitors representing different areas are invited to present guest seminars. GR DEVEL.

171.03. Functional Appliance Therapy. (2) SS1, SS2. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 2 hours.

This course is designed to provide the skills necessary to select the appropriate functional appliance, design the appliance, instruct the laboratory in the making of the appliance, and manage the patient’s treatment to a successful conclusion. GR DEVEL.

172A-B-C-D-E. Evaluation of Facial Form II. (2-2-2-2-2) F, W, Sp. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 2 hours. Nielsen, Quinn

Use of diagnostic radiography in the evaluation of dental and facial morphology is presented. Evaluation of morphological relationships, facial growth and development, skeletal maturation, the biological response to treatment modalities, and the complex interrelationship of these factors will be discussed. GR DEVEL.

172.01A-B-C. Research Design. (1-1-1) F, W, Sp. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 1 hour.

Word, Baumrind

Principles of statistics and research design will be explored. Topics include statistical inference, hypothesis testing, analysis of variance, correlation, and multiple regression. The design of experimental and quasi-experimental research will be discussed and experience in computer software usage provided. GR DEVEL.

172.02. Independent Research. (0-3) SS1, SS2. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Litt, Baumrind

Independent research experience. GR DEVEL.

172.03A-B-C. Evaluation of Facial Form IV. (2-2-2) F, W, Sp. Prerequisite: Enrollment in postdoctoral orthodontics or pediatric dentistry program or consent of instructor. Lecture 2 hours. Nielsen

Course teaches diagnosis, treatment planning, and treatment of all types of malocclusions on a systematic basis. The biologic basis for orthodontic treatment with respect to facial growth and development and the application of differential diagnosis is presented. GR DEVEL.

173A-B-C. Orthognathic Surgery Conference. (1-1-1) F, W, Sp. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 1 hour. Litt

Postdoctoral students in orthodontics, prosthodontics, and oral and maxillofacial surgery will participate in evaluating and planning treatment for patients with facial and occlusal deformities requiring combined multidisciplinary therapy. Periodic review and presentation of previously treated patients will be included. GR DEVEL.

173.02. Private Practice Seminar. (0-3) F, W, Sp. Prerequisite: First year postdoctoral Orthodontic program. Seminar 1 hour. Righellis

This seminar is designed to integrate the second-year residents’ postdoctoral orthodontic education with the private practice of orthodontics. GR DEVEL.

174. Biomechanics & Tooth Movement. (2) W, SS1, SS2. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 2 hours.

Yoshikawa

Fundamental concepts of force systems will be presented. Included are equilibrium, force equivalency, and free-body analysis. Concepts will be related to orthodontic tooth movement, appliance design, and biological response to force application. GR DEVEL.

174.01. Periodontics & Orthodontics. (1-2) F, Sp. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 1-2 hours.

Current literature in periodontics and orthodontics is reviewed and discussed. Case presentations involving treatment between the two specialists are discussed and evaluated by students and faculty. Emphasis is placed on the advances in preventive procedures and their impact on orthodontic practice. GR DEVEL.

174.02. Orthodontic Techniques. (1) SS1, SS2. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lecture 1 hour. Nielsen

A lecture and participation course designed to familiarize the postdoctoral student with orthodontic appliances, their fabrication, and adjustment. GR DEVEL.

This course will provide the resident with the basic cognitive skills for recognizing, diagnosing, and treating patients with TMJ pain, TMJ dysfunction, and craniofacial pain in a “team environment” (i.e., prosthodontist, orthodontist, oral surgeon, psychologist, neurologist, ENT, physical therapist, etc.). GR DEVEL.

176A-B-C. TMJ Pain & Dysfunction Clinic. (0-3) F, W, Sp. Prerequisite: Resident standing in Orthodontics. Clinic 3 hours. Grove, Nielsen, McNeill
This course will provide the resident with the basic clinical skills for recognizing, diagnosing, and treating patients with TMJ pain, TMJ dysfunction, and craniofacial pain in a "team environment" (i.e., prosthodontist, orthodontist, oral surgeon, psychologist, neurologist, ENT, physical therapist, etc.). GR DEVEL.

179.01A-B-C-D-E. Clinical Orthodontics I, (0-7) SS1, SS2, F, W, Sp. Prerequisite: Enrollment in postdoctoral orthodontics or pediatric dentistry program or consent of instructor. Lab variable. Clinic 0-21 hours.

Grove
Diagnosis, treatment, and evaluation of clinical postdoctoral orthodontic problems as experienced in modern orthodontic practice. Students will treat patients with a broad spectrum of orthodontic problems. Students will work with other specialists in the management of complex orthodontic problems. GR DEVEL.

179.03A-B-C-D-E. Clinical Orthodontics II, (0-7) SS1, SS2, F, W, Sp. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Lab variable. Clinic 0-21 hours.

Grove
Diagnosis, treatment, and evaluation of clinical postdoctoral orthodontic problems as experienced in modern orthodontic practice. Students will treat patients with a broad spectrum of orthodontic problems. Students will work with other specialists in the management of complex orthodontic problems. GR DEVEL.

179.05A-B-C-D-E. Ortho General Interaction, (1-1-1-1-1) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in postdoctoral orthodontic or pediatric dentistry program or consent of instructor. Clinic 3 hours.

R. Boyd
Evaluation and treatment of clinical orthodontic problems, as experienced in general dental practice. Postdoctoral students will assist and supervise general dental students in the diagnosis, evaluation, and treatment of orthodontic problems. Emphasis is on the relationship between generalist and specialist. GR DEVEL.

181. Adv Orthodontics in Gen Practice. (0-3) F, W, Sp. Prerequisite: Orthodontics 131B Seminar: 1 hour. R. Boyd and Staff
Third- and fourth-year dental students will participate in weekly one-hour discussions of clinical aspects of orthodontic therapy using patient records as a basis of discussion. Students may elect to participate two hours per week in off-campus seminars. GR DEVEL.

Orthopaedic Surgery

First-Year Coordinated Instruction—Medicine 131A-B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship—Surgery 110 and 111 include seven to eight orthopaedic lectures, case presentations, and outpatient clinic assignments. Students are given instruction in methods of examination of patients with musculoskeletal disorders with emphasis on diagnosis and principles of treatment.

140.01A-B-C-D. Clin Ckship—UC-SFGH. SFGH ER-VA. (1½ per week) S, F, W, Sp. Prerequisite: Surgery 110 and 111. Must be a senior.

W. Murray, Day, Maurer
Students, assigned to inpatient and outpatient services, receive instruction and experience in examination and treatment of patients. Assistance in surgery and in use of treatment modalities is required. Clinical demonstrations, seminars, and conferences form the basis for didactic instruction. ORTHO SURG.

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111. W. Murray
Orthopaedic surgery clinical clerkships are offered in off-campus hospitals approved by the chairperson of the department and the dean. ORTHO SURG.

140.03. Rehabilitation Medicine—S & VA. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or Pediatrics 110.

Carpendale
Course will provide knowledge and skills in electrodiagnosis, neurologic rehabilitation, spinal cord injury, closed head trauma, the rheumatoid patient, orthopaedic rehabilitation, hazards of bed rest, and acute and chronic low back pain. ORTHO SURG.

150.01. Research in Orthopaedic Surgery. (1½ per week) Su, F, W, Sp. Prerequisite: Third- and fourth-year residents. U. C. J. Johnston
Research project under direction of a member of the faculty. ORTHO SURG.

A lecture series covering tumors and infections of the musculoskeletal system, illustrated by microscopic slides and photographs of gross specimens. ORTHO SURG.

Seminars cover connective tissue metabolism; muscle, bone, and joint physiology; preoperative and postoperative management of patients; wound infections; microbiology; and surgical principles. ORTHO SURG.

Course includes lectures by students and faculty on gross and functional anatomy, laboratory dissections of cadaver material and
demonstrations of surgical approaches. ORTHO SURG

Seminars are student presentations of selected orthopaedic surgery subjects featuring historical review complete with bibliography. They are moderated by an assigned faculty member. ORTHO SURG

406. Orthopaedic Medical Staff Conf. (1) Su, F, W, Sp. UC W. Murray

Clinical instruction in the care and management of orthopaedic problems in rheumatoid arthritis and allied diseases. Cases are presented by residents to attending staff and rheumatology consultants. ORTHO SURG

Seminars include presentation of problem cases by residents for consideration of diagnosis, treatment, and discussion by the attending staff. ORTHO SURG

408. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. SPGH L. Day

Selected problems are illustrated by cases treated or under treatment. Cases are presented by the resident staff and discussed by members of the attending staff. ORTHO SURG

409. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. SSF Ashley

Conference with emphasis on children's problems in which residents make case presentations of inpatients for review and of new patients for consideration of diagnosis and therapeutic plan. ORTHO SURG

411. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. VA Maurer

Conference includes review of admissions and discharges of hospitalized patients by the attending and consulting staffs. Cases are presented by the residents. ORTHO SURG

CHMC Debenham, C. Slabaugh, S. Jensen

Seminars are held in rotation at each of these hospitals with residents from all three hospitals attending. They include literature review and demonstrations related to surgical approaches, anatomical dissections, diagnosis and treatment. ORTHO SURG

413. Orthopaedic Surgical Conference. (1) Su, F, W, Sp. UC W. Murray

Residents prepare and present case histories of inpatients and selected outpatients. Course includes discussions on diagnostic procedures, indications for surgery, immediate postoperative follow-up, and problem cases (consultations). ORTHO SURG

L. Gordon

Conference includes presentation of case studies in hand surgery with central subject for each session. ORTHO SURG

450. Clinical Adult Orthopaedics. (1½ per week) Su, F, W, Sp. RDMC Bloom, PMC Mccarroll, KP J. Johnston, MZ Glick, UC W. Murray

Residents are responsible for patient care in the wards and outpatient clinics including history-taking, physical examinations, laboratory tests, elective surgery, fracture treatment, plaster techniques, and consultations. ORTHO SURG

Residents are responsible for patient care in the wards and outpatient clinics including history-taking, physical examinations, laboratory tests, elective surgery, fracture treatment, plaster techniques and consultations. ORTHO SURG

Residents are responsible for patient care in the wards and outpatient clinics including history-taking, physical examinations, laboratory tests, elective surgery, fracture treatment, plaster techniques, and consultations. ORTHO SURG

Under faculty supervision, the chief resident organizes care and referral of staff patients; supervises a weekly follow-up clinic; administers the teaching-bed fund; independently performs operative procedures in selected cases; advises interns, residents, and fourth-year medical students; participates in paramedical teaching. ORTHO SURG

J. Glick and Staff

Clinical instruction in the care and management of orthopaedic problems in athletic injuries. Course consists of clinical practice under supervision as well as didactic lectures every third week. ORTHO SURG

SPGH L. Day

Residents rotate through orthopaedic wards and follow-up clinics. They are responsible for patient care under the direction of the attending staff, including history-taking, physical examinations, X-ray conferences, and consultations. ORTHO SURG

Otolaryngology

First-Year Coordinated Instruction—Medicine 131A B-C. Lecture-demonstrations and section work devoted to the supervised examination of patients.

Core Clerkship—Surgery 110 and 111 include lectures and case demonstrations on the examination and diagnosis of otolaryngological diseases, particularly those related to trauma and infection. Instruction is given
in the examination and diagnosis of ward and clinic patients with otorhinolaryngological surgical diseases.

140.01A. Adv Otolaryngology Clerkship. 
(1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. **Boles**
A practical course in general otorhinolaryngology including diagnosis and treatment of common ear, nose, and throat problems; both inpatient and outpatient experiences will be offered. OTOLARYN

140.02. Off-Campus Clerkship. 
(1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C and Surgery 110. **Boles**
Clinical clerkships in off-campus hospitals approved by the chairperson of the department and the dean. OTOLARYN

198. Supervised Study. 
(1-5) F, W, Sp. Prerequisite: Consent of instructor. **R. Schindler**
Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. OTOLARYN

199. Laboratory Project. 
(1-5) F, W, Sp. Prerequisite: Consent of instructor. **Merzenich**
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. OTOLARYN

400. Didactic Lectures. 
(2) F, W, Sp. **Sooy**
Lectures cover the anatomical, physiological, and clinical aspects of otorhinolaryngology. OTOLARYN

(1) W. **Crumley**
A formal course in the anatomy of the head and neck. OTOLARYN

403. History & Pathology. 
(2) F, W. **Dekelboon**
A review of ear, nose, and throat pathology from currently available gross and microscopic surgical pathological material from the operating rooms and pathology laboratories. OTOLARYN

404. Staff Rounds. 
(2) Su, F, W, Sp. **Boles**
Weekly seminars are held with discussion of current problems concerning diagnosis and management of patients with references to current literature, modern theory, and controversial aspects. OTOLARYN

405. Audiology & Speech Pathology. 
(1) F, W, Sp. **UC Owens**
Seminar includes psychophysical backgrounds in audiology, basic and advanced tests of hearing, functional hearing loss, hearing aids, testing of children, aural rehabilitation, and speech and hearing problems of children and adults. OTOLARYN

406. Tumor Conference. 
(1) Su, F, W, Sp. **UC Dedo**
Conference includes presentation of patients, study of histories, and discussion of the treatment of the patient in light of modern progress in the field. OTOLARYN

(1) F, W, Sp. Seminar 1 hour. **Crumley**
Basic science and clinical aspects of cosmetic facial surgery and reconstructive surgery of the head and neck are covered in a weekly one-hour seminar. Slide presentations, videotape movies, didactic lectures, and anatomic dissections constitute the curriculum. OTOLARYN

(½) F, W. **R. Schindler**
A laboratory course conducted in the ear, nose, and throat pathology laboratory. All resident staff members are required to familiarize themselves thoroughly with the microscopic anatomy of the temporal bone under formal staff instruction. OTOLARYN

412. Tumor Board. 
(1) Su, F, W, Sp. **VA Kaplan**
Tumor cases are presented for diagnosis and recommendations for treatment. OTOLARYN

413. Audiology Conference. 
(1) Su, F, W, Sp. **VA Kaplan**
Combined Audiology and Otolaryngology Staff Conference where all patients evaluated
for hearing problems are presented, and diagnosis and treatment recommendations are made. OTOLARYN

Residents, under supervision, are responsible for patient care in the wards and outpatient clinics including history-taking, physical examination, laboratory tests, preoperative and postoperative care, minor surgery, audiology, vestibular testing, and consultations. Senior resident has current administrative, teaching, and clinical responsibilities. OTOLARYN

A study of the techniques of endoscopy and some practical laboratory study including cadaver work. OTOLARYN

Interns, under supervision of the attending staff, are responsible for patient care on wards and in the follow-up clinic, including history-taking, examination, and consultation. This rotation is combined with patient-care assignments in the Ophthalmology Service. OTOLARYN

Pathology

101. General & Systemic Pathology. (4) F Prerequisite: Substantive courses in anatomy, biochemistry, physiology, histology, microbiology (or concurrent enrollment), concurrent enrollment in Medicine 132A. If in doubt as to adequacy of preparation, consult the instructor. Lecture 3 hours. Lab 2 hours. Friend, Margaretten and Staff
Mechanisms and language of disease are discussed, with emphasis on cell injury, inflammation, infectious agents, repair, regeneration, hemodynamic derangements, neoplasia. Recent advances and classical concepts of diseases as they affect the heart and blood vessels, lungs, gastrointestinal tract are presented. PATHOLOGY

102. Systemic Pathology. (3) W Prerequisite: Pathology 101. Lecture 3 hours. Lab 2 hours. Margaretten, M. Warnock and Staff
Recent advances and classical concepts of diseases as they affect the following organ systems are presented: pancreas, liver, central nervous system, kidney, endocrine system, skin. Emphasis will be on correlation of functional and morphologic characteristics of diseases of organ systems. PATHOLOGY

103. Systemic Pathology. (3) Sp. Prerequisite: Pathology 102. Lecture 3 hours. Lab 2 hours.
Margaretten, M. Warnock and Staff
Recent advances and clinical concepts of diseases as they affect the following organ systems are presented: reproductive systems, skeletal system, hematopoietic system, and lymph nodes. Emphasis will be on correlation of functional and morphologic characteristics of diseases of organ systems. PATHOLOGY

Biava and Staff

127. General Pathology. (1½) F Prerequisite: Courses in biochemistry, physiology, histology, microbiology, and an introduction to immunology. Lecture 3 hours for five weeks. Biava and Staff
Mechanisms of disease are discussed, with emphasis on the dynamic nature of fundamental disease processes: cell injury, immunopathology, inflammation, responses to infectious agents, repair, regeneration, hemodynamic derangements, disturbances of cell growth, and neoplasia. PATHOLOGY

135. General Pathology. (3) F Prerequisite: Substantive courses in biochemistry, physiology, histology, microbiology (first quarter, concurrent) or an introduction to immunology. If in doubt as to adequacy of preparation, consult the instructor. Lecture 3 hours. Biava.

This course is identical to the lecture portion of Pathology 126. PATHOLOGY

Performance of one to two autopsies. Emphasis will be on review of normal anatomy and histology and systematic observations and descriptions of pathologic material. Objective of the course is to provide a better understanding of clinical pathologic correlations. PATHOLOGY

Parasitology

135. Medical Parasitology. (3) W Lecture 2 hours. Lab demonstration 2 hours.
Heyneman and Staff
An introduction to the protozoa, helminths, and arthropods that parasitize man. Parasite ecology and disease epidemiology, clinical and diagnostic aspects of parasite diseases and their treatment are considered in lecture and laboratory. Emphasis in the laboratory is on demonstration. EPID INTL HLTH
150.02. Off-Campus Pathology Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Pathology 101 and 102. Smuckler

Clinical clerkships in off-campus hospitals approved by the chairperson of the department and the dean. PATHOLOGY

150.03. Pathology Clerkship—SPGH. (1½ per week) Su, F, W, Sp. Prerequisite: Pathology 102 and consent of instructor. Margaretten, Howes, Bottles

Students prepare surgical specimens, perform autopsies under supervision, and participate in teaching conferences. PATHOLOGY

150.04. Pathology Clerkship—UC & VA (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Surgery 110. Consent of instructor. Staff

Students work closely with the faculty and house staff in the performance of autopsies and in the diagnostic work-up of surgical specimens. They actively participate in departmental conferences and seminars. Opportunity provided for development of specific areas of investigation. PATHOLOGY

150.05. Research. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department. Staff

A research project under the direction of a member of the faculty. PATHOLOGY

150.06. Surgical Pathology—VAMC. (1½ per week) F, W, Sp. Prerequisite: Pathology 102 and consent of instructor. H. M. Price, Bezmalinovic

Clerkship is designed to acquaint students with available techniques of tissue analysis, from light microscopic to micromolecular levels, and their application in diagnosis and surgical care. Experience includes postmortem examination, review of surgical biopsies and frozen sections, electron microscopy. PATHOLOGY

170.01. Clinical Cytology. (3) Sp. Prerequisite: Anatomy 102, Pathology 101 and 102. E. King, E. Hill

Lectures on basic fundamentals of cytology, normal cells, malignant cells, abnormal non-malignant cells, collection, and preparation methods. Microscopic examination of specimen and correlation of cellular and tissue pathology with colposcopic and clinical findings on examination of the patient. PATHOLOGY

Presentation of selected current cases seen in the hospital pathology laboratory. Discussion of pathological findings, and correlation with clinical and radiologic findings and treatment. PATHOLOGY

170.05. Neuropathology. (2) W. Prerequisite: Pathology 102. Third- or fourth-year standing, Lecture and seminar 2 hours. D. Davis, DeArmond

Emphasis is placed on clinicopathological correlation of neurological diseases by means of study of gross and microscopic material and participation in conferences. PATHOLOGY

170.08. Studies in Pathology. (1-5) Su, F, W, Sp. Prerequisite: Consent of instructor and chairperson of the department. Staff

Studies in pathology at other institutions with the approval of the chairperson of the department. PATHOLOGY

180.01. General Pathology. (3) F. Prerequisite: Anatomy 118. Lecture 3 hours. Biava and Staff

This course is identical to the lecture portion of Pathology 126. Elective in the dental hygiene curriculum. PATHOLOGY

198. Supervised Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PATHOLOGY

199. Laboratory Project. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PATHOLOGY

209. Applied Pathology. (3) § W. Prerequisite: Microbiology 126A-B and Pathology 126 or equivalents. J. Greenspan

Weekly seminars are designed to provide students with an understanding of the basic principles of pathology. Emphasis is placed on research, students will critically review current literature in the field, under faculty supervision. PATHOLOGY

215. Laboratory Rotation. (3) § F, W, Sp. Prerequisite: Consent of instructor: Lab 9 hours. R. Stern

A laboratory rotation course, to familiarize students with various approaches to experimental pathology and research in the basic medical sciences, particularly in relationship to human disease processes. Intended primarily for new graduate students. PATHOLOGY

Students and faculty review literature and discuss current concepts and experiments in connective tissue research. Included are role of structural proteins, such as collagen and elastin in pathology, cell matrix, interactions in developmental biology and morphogenesis. PATHOLOGY

230. Experimental Pathology Seminar. (2) § F, W, Sp. Prerequisite: Permission of the graduate advisor of the department. Lecture 1 hour Seminar 1 hour. R. Stern

Presentation of current research by graduate students. Topics in pathology and disease mechanisms. Faculty from basic and clinical sciences will discuss current research in a disease process. Advanced reading in that
disease will be assigned before class. There will be formulation of test-hypothesis and discussion of an experimental design led by a student leader at each session. PATHOLOGY

PATHOLOGY

PATHOLOGY

The course covers experimental models for various human disease processes. A different organ system will be surveyed each year. Lectures from the basic and clinical sciences will discuss current research. The course will emphasize techniques of problem solving. The final examination will be a mock grant proposal. PATHOLOGY

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
PATHOLOGY

For graduate students engaged in writing the thesis for the master's degree. PATHOLOGY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
PATHOLOGY

For graduate students engaged in writing the dissertation for the Ph.D. degree. PATHOLOGY

301. Teaching Practicum. (3) F, W, Sp. Prerequisite: Consent of instructor. Lecture 3 hours. Lab 2 hours. Warnock, Margaretten
PATHOLOGY

Practice in teaching pathology under faculty supervision. Students supervise laboratory work, conduct conferences, and assist in preparing and grading examinations. Responsibilities are assigned according to the individual's stage of development. PATHOLOGY

400. Pathology & Lab Med Seminar. (1) F, W, Sp. Interns and residents. Prerequisite: Medicine 110 and Surgery 110 or consent of instructor. Seminar 1 hour. Staff
PATHOLOGY

Recent developments in diagnosis and research in pathology and laboratory medicine are discussed by faculty and guest speakers. PATHOLOGY

401. Special Topics Seminar. (Unis to be arranged) Su, F, W, Sp. Interns and residents. Staff

Seminars focusing upon the pathology of specific organ systems are conducted by specialists. Emphasis is on the correlation between clinical manifestations of the disease and pathologic findings. PATHOLOGY

402. Pathology Research. (1-8) Su, F, W, Sp. Interns and residents. Staff
PATHOLOGY

Students, under supervision, pursue original investigation in pathology and allied subjects. Investigators review the literature, make observations, and correlate physiological with pathological concepts. PATHOLOGY

405. Dermatopathology. (2) F, W, Sp. Prerequisite: Pathology 101 or equivalent by consent of instructor. Lab 2 hours. Seminar 1 hour. Saegebel
PATHOLOGY

Survey of inflammatory and neoplastic skin diseases by study of histopathological changes and discussion with emphasis on clinical-pathologic correlations. PATHOLOGY

450. Pathologic Anatomy. (5-10) Su, F, W, Sp. Required for interns; elective for residents. Staff
PATHOLOGY

Theory and methodology of pathologic anatomy; interpretation and correlation of data, and study of literature. PATHOLOGY

455. Electron Microscopy Seminar. (1) W. Prerequisite: Medicine 110 and Surgery 110 and consent of instructor. Lecture 1 hour. Elective for interns and residents. Staff
PATHOLOGY

Course covers basic electron microscopic techniques, indications for use of electron microscopy in pathologic diagnosis, and the specific ultrastructural features of normal and diseased tissue. Emphasis is placed on renal biopsy and tumor diagnosis. Documented attendance is required. PATHOLOGY

PATHOLOGY

Theory and methodology of pathologic anatomy; interpretation and correlation of data, and study of literature. PATHOLOGY

Pediatric Dentistry

109.01A-B-C. Clinical Rotation. (0-1) F, W, Sp. Prerequisite: Third-year standing. Clinic 30 hours. M. Morris and Staff

Clinical rotation will introduce students to examination of the child patient, treatment planning, prevention instruction, dietary analysis and counseling, and performing operative procedures. Proper management of the child patient will be stressed. GR DEVEL.

109.02A-B-C-D-E. Clinical Rotation. (0-2) F, W, Sp, SS1, SS2. Prerequisite: Fourth-year standing and satisfactory completion of Restorative Dentistry 139. Clinic 0-60 hours. M. Morris, Braham and Staff

Oral examination, treatment planning, treatment of children including behavioral management. Time will be spent at UCSF Pediatric Dental Clinics and Children's Hospital Medical Center, Oakland. Course will involve clinic, seminar, and treatment in hospital operating room with general anesthetic. GR DEVEL.

130B-C. Pedodontic Procedures. (1-2) W, Sp. Prerequisite: Satisfactory completion of Operative Dentistry 125 A-B-C. Lecture 1 hour; Sp. 2 hours Leggott

Lecture course presenting dental procedures unique to, or modified to meet, the needs of the child. Examination, diagnosis, treatment planning, pain control and management, restorative procedures, preventive
orthodontics, diet analysis, and carries control are stressed. GR DEVEL.

170D-E. Intro to Ped Dent. (2-2) SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Lecture 2 hours. Leggott and Staff

Course is offered to the incoming postdoctoral student as an introduction to the philosophies and techniques of rendering clinical treatment to patients in pediatric dentistry. GR DEVEL.

171A-B-C-D-E. Advanced Ped Dent Sem. (5-5-5-5-5) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry or orthodontic program or consent of instructor. Seminar 5 hours. Leggott and Staff

Will discuss the state of the art of all aspects of contemporary pedodontic diagnosis and treatment. The instruction embraces not only a review of historical perspectives but also research and clinical essays in current diagnostic activities and treatment modalities. GR DEVEL.

172D-E. Pediatric Physical Diagnosis. (1-1) SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Lecture 1 hour. Rothman

Course is designed to provide knowledge of clinical pedodontics. It will include didactic and clinical experiences in history-taking and physical diagnosis. GR DEVEL.

172.11A-B-C. Pediatric Medicine. (1-1-1) F, W, Sp. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Seminar 1 hour. M. Morris and Staff

Student teaches junior and senior dental students in the pediatric dentistry clinics. In addition, the student will teach selected topics in a seminar format. GR DEVEL.

173C. Clinical Uses of Fluorides. (2) Sp. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Lecture 1 hour. Seminar 1 hour. Leggott

Course gives a comprehensive update on the clinical uses of fluoride in pediatric dentistry. It is a combined lecture and seminar course. A term paper on an assigned topic is also required. GR DEVEL.

173.11B-C. Dentistry for the Disabled. (1-1) W, Sp. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Braham and Staff

Course provides knowledge of the congenital and acquired disabilities in children and adolescents. There is emphasis on the etiology, diagnosis, medical, and dental management, and prognosis of these conditions. GR DEVEL.

174A-B-C-D-E. Lit Survey in Ped Dent. (1-1-1-1-1) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry or orthodontic program or consent of instructor. Barkin and Staff

Course reviews the latest issues of pediatric dentistry and related journals and critically evaluates the philosophies, clinical treatment, and applications to the practice of dentistry for the child patient. GR DEVEL.

176A-B-C-D-E. Practice Teaching. (1½-1½-1½-1½-1½-1½) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Seminar 1 hour. Clinic 1½ hours. Morle and Staff

Student teaches junior and senior dental students in the pediatric dentistry clinics. In addition, the student will teach selected topics in a seminar format. GR DEVEL.

177A-B-C-D-E. Hospital Dentistry. (3-3-3-3-3) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Seminar 1 hour. Clinic 6 hours. Rothman and Staff

Course is specifically designed to provide the student with a working knowledge of dental rehabilitation procedures in a hospital operating room under general anesthesia and the associated hospital protocol. GR DEVEL.

177.11A-B-C-D-E. Conscious Sedation. (1½-1½-1½-1½-1½-1½) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Lecture 1 hour. Clinic 1½ hours. Rothman and Staff

A multiplicity of medications, routes of administration, and monitoring techniques will be employed under the direct supervision of a faculty person. The students will administer the medications and monitor the patients before, during, and after the procedure. GR DEVEL.

178A-B-C-D-E. Research Seminar. (2-2-2-2) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry or orthodontic program or consent of instructor. Lab 3 hours. Seminar 1 hour. Leggott and Staff

Course will cover how to critically review research literature and do a term paper on a selected subject. It will discuss research methodologies and the development of a protocol and completion of a research project. GR DEVEL.

179A-B-C-D-E. Advanced Clinical Ped Dent. (1-10) F, W, Sp, SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry program or consent of instructor. Clinic 3-30 hours. M. Morris and Staff

Course covers the clinical activities of the student and has the broad objective of providing a wide experience in all phases of contemporary pedodontic diagnosis and treatment. Students must demonstrate clinical competencies in care for the special child. GR DEVEL.
179.120-D. General Anesthesia Rotation. (4-4) SS1, SS2. Prerequisite: Enrollment in postdoctoral pediatric dentistry or orthodontic program or consent of instructor. Clinic 30 hours.

Rothman and Staff
A practical rotation in the operating room of the Children’s Hospital Medical Center of Northern California is provided under the supervision of senior staff anesthesiologist. GR DEVEL.

180.01C. Advanced Ped Dent Seminar. (½) Sp. Prerequisite: Completion of third-year pediatric dentistry lecture series. Approval of the Dean. Lecture ½ hour. B. Smith and Staff

Seminars on advanced pediatric dentistry involving anesthesiology, oncology and hematology, periodontology, diagnosis, practice management, future ideas, and ethics. Designed for students interested in advanced study and those considering pediatric dentistry as a specialty. Counseling is provided for postdoctoral education. GR DEVEL.

180.02A-B-G-D-E. Pediatric Hospital Dentistry. (0-3) S, F, W, Sp. Prerequisite: Satisfactory progress in all previous pediatric dental courses. Seminar 3-5 hours per week in Hospital C.O.R.

Braham
Experience is provided in history-taking, admissions procedures, hospital dental protocol, laboratory tests, and chart documentation. Opportunity to work with the instructor in the hospital operating room, providing care for the handicapped and other refractory management cases, using a general anesthetic. GR DEVEL.

Pediatrics

100. Medical Genetics. (2) F. Lecture 2 hours. C. Epstein

Basic aspects of human genetics are presented in a context relevant to the diagnosis, treatment, and counseling of genetic disorders and congenital malformations. Emphasis is placed on the application of genetic knowledge to actual counseling problems. PEDIATRICS

110. Ped Core Clerkship—UCSF/GH. (1½ per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences. Dallman
Practical experience in the ward, newborn nursery, and outpatient clinics with emphasis on case assignments. Teaching and supervision by attending and resident staffs. Required seminars cover aspects of pediatrics, infectious diseases, and child psychiatry. PEDIATRICS

140.01. Advanced Pediatric Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Grumbach

Advanced clerkship including: Normal newborn and IC Nursery; OPD Acute Care Unit, Inpatient at UC; OPD at SGH; Outpatient clinics at J; Inpatient and outpatient at K; Inpatient and outpatient at CHMC; Inpatient and outpatient at NRMG. PEDIATRICS

140.01A. Adv Outpt Pediatric Clerkship—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Pantell, Bergman, S. Rowe

Students are assigned general pediatric patients for assessment and treatment. Supervision will be given with respect to interviewing skills and clinical decision-making. Frequent use will be made of videotaped interviews and decision analysis techniques as teaching aids. PEDIATRICS

140.01B. Adv Outpt Pediatric Clerkship—SGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of Instructor. R. Brown, J. Wright

Students are assigned patients in the Children’s Health Center. They are supervised by attending and resident staff. Major part of the time is spent in the acute care clinic. Some subspecialty experience is available. Time is not assigned to ward patients. PEDIATRICS

140.01C. Adv Outpt Pediatric Clerkship—L. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Grumbach, Bruhn

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01D. Outpt Pediatric Clerkship—CHMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Gerdsen

Students are assigned patients. They are supervised by attending and resident staff. They attend conferences when their patients are being discussed. They rotate through a variety of specialty clinics as well as the General Medical Clinic and the Emergency Room. PEDIATRICS

140.01E. Adv Inpt Pediatric Clerkship—CHMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Gerdsen

Students are assigned patients. They are supervised by attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences when their patients are being discussed, as well as all daily formal teaching conferences. PEDIATRICS

140.01F. Outpt Pediatric Clerkship—KP. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Burnip

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS
140.01G. Inpatient Pediatric Clerkship—K. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Shinefield

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01H. Outpatient Pediatric Clerkship—NRMC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Koenig

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01I. Inpatient Pediatric Clerkship—NRMC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Koenig

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. PEDIATRICS

140.01J. Nursery Elective—UC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Phibbs

Students are assigned patients under supervision of attending and resident staff. They present patients on wards, assist with procedures, and attend specialty conferences for discussion of patients. Students are on call every third night. PEDIATRICS

140.01K. Neonatal Intensive Care—SPGH. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

D. F. Wong, Partridge

Care of the high-risk neonate in busy intermediate intensive care neonatal nursery.

Direct clinical responsibilities in a four-week sub-internship. PEDIATRICS

140.02. Off-Campus Clerkship. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Grumbach

Clinical clerkship in off-campus hospitals approved by the chairperson of the department and the dean. PEDIATRICS

140.03. Outpatient Pediatrics—VAMC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

McCann

Experience caring for sick and well children with 27,000 patient visits/year. Preventive medicine and anticipatory guidance along with principles of growth and development. All activities closely supervised by either senior residents or faculty. Daily morning conferences, chart rounds, assigned readings. PEDIATRICS

140.04. Pediatric Cardiology. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110 and Pediatrics 110. Open to UCSF students only.

S. J. Robinson

Experience in clinical evaluation of children with cardiac abnormalities is emphasized. Daily ward rounds on pediatric cardiology patients, attendance at designated cardiac surgical procedures, catheterization, weekly catheterization conference, extensive reading assignments, and daily attendance in private office setting are included. PEDIATRICS

140.05. Pediatric Private Practice. (1 1/2 per week) Su, F, W. Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Open to UCSF students only.

L. P. Smith

Working experience with a pediatrician on the clinical faculty as the pediatrician sees patients in the office and in the hospital. Student may select time in small group, large group or subspecialty practice, or a combination of these. PEDIATRICS

140.06. Adolescent Medicine. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

Garcis

Clinical clerkship in adolescent medicine with emphasis on outpatient clinical experience in a wide range of health problems of the adolescent. PEDIATRICS

140.07. Developmental Pediatrics in Fresno. (1 1/2 per week) W. Sp. Prerequisite: Pediatrics 110.

D. M. Snyder

Students learn to identify children with developmental disabilities and direct their remediation to allow for achievement of their greatest potential. Various settings are used in acquiring skills in developmental assessment. PEDIATRICS

140.08. Ambulatory Pediatrics. (1 1/2 per week) F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110.

J. E. Anderson

Clinical experience in teaching hospital's busy pediatric clinic, working as member of health care team. Supervision from attending physicians with emphasis on developmental/behavioral approach to pediatric practice. Continuity of care is encouraged and opportunity exists to follow patients admitted to ward. PEDIATRICS

Berg

Supervised participation in clinical activities, both inpatient and outpatient, and all regularly scheduled conferences of the Child Neurology Division. Study of the developing nervous system and diseases of the nervous system affecting infants, children, and adolescents. PEDIATRICS

140.10. Hematology & Oncology. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Consent of instructor. Open to UCSF students only.

Mentzer, P. Dallman, Koerper

Students participate in outpatient clinic, and laboratory evaluation of blood and bone marrow specimens at UC, SPGH, and CHMC. Pursuit of special interests in the clinic or laboratory is encouraged. PEDIATRICS
140.11. Cardiology—CHMC (1½ per week) Su, F. W. Sp. Prerequisite: Medicine 110 and Pediatrics 110. Higashino

Students participate in clinical experience including outpatient evaluation, instruction in the noninvasive methods of diagnosis, care of ward medical and surgical cardiac patients, cardiopulmonary laboratory, and cardiovascular conferences. Emphasis is on the physiological principles of diagnosis and management. PEDIATRICS

Advanced clerks on the general medical-surgical pediatric inpatient unit, with an emphasis on the behavioral/developmental approach to the hospitalized child. Family-centered care is emphasized through Care with Parent Program. Night call includes pediatric E.R. experience. PEDIATRICS

Participation in the clinical and investigative aspects of endocrine and metabolic problems in children. Students spend time in the laboratory, on the wards, and in the clinics. PEDIATRICS

Work under the direction of the instructor in Diabetic Camp, clinical and management aspects of diabetes. Students have an opportunity to participate in the operation of the camp program and treatment of many aspects of diabetes in children, adolescents, and young adults. PEDIATRICS

Participation in management of patients with solid tumors and leukemia; attendance at pediatric tumor board, ward rounds and outpatient clinic. Special emphasis on psychological problems; supervised reading and discussion with preceptor. PEDIATRICS

Introduction to general nephrology with children having nutritional problems, ESRD, and chronic renal failure. Post-transplant and dialysis consultations, new cases from the nursery, and cases requiring TPN. Research projects may be arranged with instructors. PEDIATRICS

Evaluation and management of children and adults with hereditary (including cyto genetic) diseases, with particular emphasis on genetic counseling, patterns of human malformation, and the biochemical and genetic mechanisms involved in the pathogenesis and transmission of these conditions. PEDIATRICS

Students participate in patient care in close association with the house staff and clinical fellows, both in wards caring for sick children and in the Newborn Intensive Care Unit, and in rounds and conferences conducted by senior staff. PEDIATRICS

Students participate in the comprehensive care of children. Experience with various illnesses is provided in appropriate specialty clinics. A wide variety of child care problems will be seen during visits to offices of senior pediatricians participating in the program. PEDIATRICS

Participation in the activities of allergy-immunology trainees, including basic clinical immunology course, journal club, and seminars. PEDIATRICS

Clinical experience in a busy community hospital Ambulatory Pediatric Clinic to prepare the student for daily patient encounters and responsibilities of pediatric or family practitioners. Teaching of patients in well and ill general pediatrics, well baby, preventive medicine, and pediatric subspecialties. PEDIATRICS

Students participate in the care of infants in the intensive care nursery in close association with the house staff, fellows, and senior staff and in conferences conducted by senior staff. PEDIATRICS

Experience in normal newborn and intensive care nurseries, according to student's interests and skills. Student participates in the care of transport infants, and on night call. PEDIATRICS
140.25. Devel & Behavioral Peds--MZ (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Gorski and Staff

Practical orientation and training for assessment and intervention of motor, cognitive, and social development of normal and high-risk children. Course includes didactic seminars in medical ethics, child psychiatry, neurodevelopmental and behavioral pediatrics.

Heyman, Thaler

Students participate with fellows and staff in the diagnosis and treatment of gastrointestinal and hepatic diseases, and nutritional deficiencies in infants and children. They present patients on wards and in the outpatient clinic, assist with procedures, and attend specialty conferences.

140.31. Inpatient Pediatric Clikshp--VMC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and Pediatrics 110. Schoen

Students perform histories and physical examinations on the pediatric ward under supervision of resident and attending physicians. They will attend resident conferences, see urgent clinic cases with resident and participate in outpatient clinic for discharged patients.

140.32. Infectious Diseases--FRESNO. (1½ per week) Su, F, W, Sp. Prerequisite: Pediatrics 110, Medicine 110.

McCarty

Experience with common and unusual infections such as meningitis, osteomyelitis, pneumonia, perinatal infections, and infections in immunocompromised hosts. Emphasis on discussion of consult patients, close interaction with the microbiology laboratory, assigned readings. Students will also review fundamentals of antimicrobial therapy.

140.33. Pediatric Immunology/Rheumatology. (1½ per week) S, F, W, Sp. Prerequisite: Pediatrics 110, Medicine 110, and consent of instructor. Wara, Cowan

Evaluation and care of children with primary immunodeficiency diseases and rheumatologic disorders. Emphasis on ontogeny of immune response as it relates to immunodeficiency; immunologic dysfunction involved in pathogenesis of the disorders, laboratory studies required for diagnosis, and care of children with chronic disease.

Grumbach, F. Conte

Participation in human cytogenetic studies in children. Emphasis is on laboratory work with exposure to clinical problems and patients.

Student research projects under guidance of faculty members. Programs must be approved by instructors. Students may initiate or continue research programs under supervision of faculty members.

160.01. Clinical Correlation in Peds--UC. (2) F, W.

Grumbach

Students prepare case presentations weekly from patients on the pediatrics wards. Course correlates patients' problems with work in the required curriculum. Experience on the ward in the clinical setting.

170.01. Peds Devel Resource Overview. (1½ per week) S, F, W, Sp. Prerequisite: Consent of instructor. L. Crain

Weekly seminar and reading assignments correlated with observation of the spectrum of community and institutional services; diagnostic, preventive and program services for individuals with developmental disabilities included.

170.02. Primary School Health Educ. (1-2) F, W. Sp. Prerequisite: Consent of instructor. Attendance of initial orientation by the curriculum department of the San Francisco Uni-
A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. Emphasis is on diagnosis and management of infection trauma, and pediatric emergencies. PEDIATRICS

Interns in the Primary Care Track of Pediatrics are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Pediatrics Internship Program as well as related clinical services such as Dermatology, Otolaryngology. PEDIATRICS

Residents in the Primary Care Track of Pediatrics are responsible for patient care in a multispecialty primary care clinic. Other rotations include those common to the regular Pediatrics Residency Program as well as related clinical services such as Dermatology, Otolaryngology. PEDIATRICS

Interns rotate through newborn nursery, pediatric wards and clinic, communicable diseases ward, and emergency room. They are responsible for the care of patients, under the direction of the attending staff, including history-taking, physical examination, laboratory tests, and consultation. PEDIATRICS

Interns, under supervision, are responsible for patient care in the wards and outpatient clinic including history-taking, physical examination, laboratory tests, and consultation. PEDIATRICS

Periodontology

109. Clinical Periodontics. (0.6) F, W, Sp. Prerequisite: Periodontology 110, 119, 121
and 129. Clinic variable. Taggart, S. R. Miller

TREATMENT OF PERIODONTAL DISEASES UNDER THE DIRECT SUPERVISION OF FACULTY. STOMATOLOGY

131A. Periodontal Therapy. (1) F. Prerequisite: Periodontology 121. Lecture 1 hour. Taggart

Introduction to the surgical management of periodontal lesions. Emphasis will be placed on the rationale for various treatment modalities. STOMATOLOGY

131B. Periodontal Therapy. (2) W. Prerequisite: Periodontology 131A. Lecture 2 hours. Armitage, P. Robertson, Taggart

Introduction to the surgical management of periodontal lesions. Emphasis will be placed on the rationale for various treatment modalities. STOMATOLOGY

131C. Periodontal Therapy. (1) Sp. Prerequisite: Periodontology 131B. Lecture 1 hour. Armitage, P. Robertson, Taggart

Introduction to the surgical management of periodontal lesions. Emphasis will be placed on the rationale for various treatment modalities. STOMATOLOGY

150. Oral Hygiene. (1) Sp. Lecture 1 hour. Taggart

Introduction to the oral hygiene problems of the periodontal patient and the means and methods available to the dentist and auxiliaries to motivate the patient to self-care. STOMATOLOGY

160B. Periodontal Diseases. (1) W. Prerequisite: Periodontology 150. Lecture 1 hour. Armitage, Taggart

Classification of periodontal diseases and methods of their prevention. Principles of pathology are correlated with therapeutic procedures. A faculty panel discusses the role of the hygienist in dental practice. STOMATOLOGY

160C. Periodontal Diseases. (2) Sp. Prerequisite: Periodontology 150. Lecture 2 hours. Armitage, Taggart

Classification of periodontal diseases and methods of their prevention. Principles of pathology are correlated with therapeutic procedures. A faculty panel discusses the role of the hygienist in dental practice. STOMATOLOGY

161. Advanced Periodontal Therapy. (1) W. Prerequisite: Periodontology 160. Lecture 1 hour. Taggart

The demonstration and rationale of surgical treatment of periodontal lesions. The role of the dental hygienist in dental practice, especially related to prevention, recognition, and aid in treatment of periodontal diseases. STOMATOLOGY

170A-B-C. Histopathology of Periodontium. (2-2-2) F, W, Sp. Lecture 1 hour. Lab 3 hours. Dienstein (F, W), Ryder (Sp)

Dynamics of inflammation and its role in the periodontal tissues. STOMATOLOGY

Clinical procedures in periodontal therapy. STOMATOLOGY

172. Examination & Treatment Planning. (1) F. Prerequisite: Enrollment in postgraduate specialty program or consent of instructor. Shibata

Lectures on examination and treatment planning. STOMATOLOGY

172.01. Hospital Anesthesiology. (6) SS. Prerequisite: Consent of instructor. Seminar 10 hours. Clinic 24 hours. Shibata

Practical course in operating room anesthesia. Instruction in hospital administration, physical and preanesthesia evaluation of the patient, monitoring of vital signs, administration of intravenous psychosedation, general anesthesia, and handling of resultant medical emergencies. Clinical instruction is supplemented by seminars. STOMATOLOGY

172.02. Hospital Periodontics. (2) F, W, SS1. Prerequisite: Periodontology 171A-B-C. Lecture 4 hours given in alternate weeks. Shibata

Clinical periodontics integrated into the regular medical and rehabilitative activities of MZ. Course provides patients with quality dental care; appreciation for preventive dentistry; and concept of total health care. Students are exposed to various medical conditions. STOMATOLOGY

173.01. Periodontal Therapy. (2) SS. Prerequisite: Periodontology 171A-B-C. Clinic 60 hours. Shibata

Clinical procedures in periodontal therapy. This course is an enlargement on earlier clinical experience. STOMATOLOGY

173.02. Periodontal Therapy. (4) F, W, Sp, SS1. Prerequisite: Enrollment in postgraduate periodontology program. Clinic 12 hours. Shibata

Advanced clinical procedures in periodontal therapy. STOMATOLOGY

173.03. Periodontal Therapy. (2) SS. Prerequisite: Periodontology 173.02C. Clinic and seminar 60 hours. Shibata, E. Green and Staff

Advanced surgical techniques in management of periodontal lesions. STOMATOLOGY

174. Orthodontic & Periodontic Probs. (1) SS. Prerequisite: D.D.S. degree. Seminar 1 hour. Parr

A seminar to discuss and evaluate the problems common to the specialties of orthodontics and periodontics. STOMATOLOGY

Students present and discuss management of their cases that are either planned for
treatment or currently under treatment. They are expected to defend their treatment plan and therapeutic procedure based on relevant literature and clinical experience. STOMATOLOGY

175.01. Adv Treatment Planning & Surgery. (1) F, W, S. Lab 1 hour.

STOMATOLOGY

Shibata

Students present and discuss management of their cases that are either planned for treatment or currently under treatment. They will be responsible for defending their treatment plan and therapeutic procedures based on relevant literature and clinical experience. STOMATOLOGY

STOMATOLOGY

Shibata

Research. STOMATOLOGY

177. Periodontal Surgery Seminar. (1) F, W, S. Prerequisite: D.D.S. degree and consent of instructor. Lecture 2 hours.

STOMATOLOGY

Rausch

Study in depth with literature review and seminar discussions on surgical techniques used to treat lesions involving the hard and soft tissue of the periodontium. STOMATOLOGY

180. Periodontics in General Practice. (1) F, W, S. Lab 1 hour.

Nathan

Implementation of the skills and knowledge of periodontics in the private practice environment. STOMATOLOGY

180.02A-B-C. Advanced Perio Lit. (1-1-1) F, W, S. Prerequisite: Periodontology 131 and consent of instructor. Seminar 1 hour.

STOMATOLOGY

Study in depth with literature review and seminar discussions of areas of periodontology having major clinical significance. STOMATOLOGY

180.03. Periodontal Surgical Techniques. (1) F. Prerequisite: Periodontology 131. Lecture 1 hour.

STOMATOLOGY

Shibata

Surgical techniques are presented which may be used to treat lesions occurring in the hard and soft tissues of the periodontium. STOMATOLOGY

Taggart

Continuation of clinical experience beyond the level of Periodontology 109. STOMATOLOGY

199. Laboratory Project. (1-5) F, W, S.

Taggart

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. STOMATOLOGY

201A-B-C. Experimental Design. (0-3, 0-3, 0-3) § F, W, S. Lecture 0-2 hours. Lab 0-3 hours.

Shibata (F), Chambers (W), Bhatnagar (Sp)

Elements of experimental design, statistical inference, and methods of laboratory and clinical research. STOMATOLOGY

202A-B. Molec & Biochem Basis of Disease. (2-2) § F, W, S. Prerequisite: Biochemistry 100A-B or equivalent introduction to biochemistry. Lecture 2 hours. Seminar 1 hour.

Bhatnagar

Course reintroduces students to the principles of biochemistry and molecular biology in relation to current concepts in the molecular basis of major disease entities including cancer, metabolic disorders, fibrotic and degenerative disorders of connective tissues, inflammation and wound healing. STOMATOLOGY

209. Literature Review. (2) § F, W, S. Seminar 2 hours.

STAFF

Seminars designed to correlate basic sciences with problems in periodontology and evaluate concepts in the direction of research, clinical application, and teaching. Selected papers in the literature are reviewed and evaluated. Other instructors are invited to participate. STOMATOLOGY

Pharmaceutical Chemistry

120. Principles of Pharm Chem. (3) § F, W, S. Prerequisite: Chemistry 113. Lecture 3 hours.

Ortiz de Montellano

A study of physicochemical and biological factors which contribute to drug action; in vivo and in vitro biotransformations of drugs and related organic compounds. PHARM CHEM

121. Chem & Biol Correlation. (2) W, S. Prerequisite: Pharmaceutical Chemistry 120 and concurrent enrollment in Pharmacology 121. Lecture 2 hours.

Kahl

A systematic survey of the chemical features of synthetic drugs, including correlations between chemical structure and biological activity. Emphasis on steroids, hormones, and drugs for metabolic disorders. PHARM CHEM

122. Autonomic & Cardiovasc Drugs. (3) W, S. Prerequisite: Pharmaceutical Chemistry 120. Lecture 3 hours.

C. C. Wang

A systematic survey of the chemical features of synthetic drugs, including correlations between chemical structure and biological activity. Emphasis on drugs affecting the autonomic nervous and cardiovascular systems as well as renal function. PHARM CHEM

132. Drugs Acting on CNS. (3) F, W, S. Prerequisite: Pharmaceutical Chemistry 120. Lecture 3 hours.

Wang

A systematic survey of the chemical features of synthetic drugs, including correlations between chemical structure and biological activity. Emphasis on drugs affecting the central nervous system. PHARM CHEM

134. Chemotherapeutic Drugs. (2) W, S. Prerequisite: Pharmaceutical Chemistry 120 and concurrent enrollment in Pharmacology 134. Lecture 2 hours.

Oppenheimer
A systematic survey of the chemical features of synthetic drugs, including correlations between chemical structure and biological activity. Emphasis on anti-infective and antineoplastic drugs. PHARM CHEM

200. Phys Chem Prop & Biolog Actvty. (1) § W. Prerequisite: Consent of instructor. Lecture 1 hour. 

Lectures and conferences dealing with the relationship between physical properties and biological activity, with special emphasis on the uses of molecular orbital calculations in this connection. PHARM CHEM

201. Adv Survey of Medicinal Chem. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. C. C. Wang

Basic principles of medicinal chemistry and a survey of the relationships between structure and biological action for major drug classes. PHARM CHEM

202. Macromolecular Structure. (2) § W. Prerequisite: Consent of instructor. Lecture 2 hours. Kunz, Langridge

A review of protein and nucleic acid structures. Emphasizes the general principles which govern secondary and tertiary structure, with an introduction to the current approaches to this problem for proteins and transfer RNA. PHARM CHEM

203. Drug Metabolism. (2-3) § Sp. Prerequisite: Consent of instructor. Lecture 2-3 hours. Sadee, Castagnoli

Study of the in vitro and in vivo biotransformation of foreign compounds with particular emphasis on drugs. When possible, detailed chemical and biochemical mechanisms are considered. PHARM CHEM

208. Advanced Survey of Pharmaceutics. (2) § F or W. Lecture 2 hours. Schwarz

Basic principles underlying the area of pharmaceutics directed at the needs of graduate students with limited familiarity with pharmaceutical sciences. PHARM CHEM

212A-B. Pharm Sci Computer Prog. (1, 2) § F, W. Prerequisite: PC 212A or equivalent is prerequisite to PC 212B. Lecture A, 1 hour; B, 2 hours. Lab B, 3 hours. Upton

A course in computer programming using examples from the pharmaceutical and biomedical sciences. PHARM CHEM

213. Kinetics of Drug Absorp & Disposn. (3) § F. Prerequisite: Chemistry 115. Calculus background is recommended. Lecture 2 hours. Lab 3 hours. Ole, Hoener, Giacomini

A basic study of the concentration-time course of drugs and their metabolites, methods of pharmacokinetic analysis, and the design of dosage regimen. Laboratory emphasizes the application of electronic calculators and analog computers. PHARM CHEM

214. Adv Kinetics of Absorp & Disposn. (3) § W. Prerequisite: Pharmaceutical Chemistry 213 and Biochemistry 202 or equivalents. Lecture 2 hours. Lab 3 hours. Tozer, Benet

Advanced consideration of pharmacokinetics including multicompartments models, assessment of intrinsic absorption and disposition parameters, and correlation of pharmacological response with the concentration-time course of a drug. Laboratory will include analog and digital computation methods. PHARM CHEM

216. Biomathematical Modeling. (2) § Sp. Prerequisite: Pharmaceutical Chemistry 212A, 212B or equivalent, or consent of instructor. Lecture 2 hours. Siegel

Mathematical techniques relevant to research in pharmacokinetics, pharmacodynamics, and drug delivery. PHARM CHEM

217A-B-C. Advanced Pharmaceutics. (2-3, 2-3, 2-3) § F, W, Sp. Prerequisite: Physical chemistry or consent of instructor. Lecture 2-3 hours. Guy, Szoka

Advanced topics in pharmaceutics. PHARM CHEM

218A-B. Advanced Pharmaceutics & Biotech. (2) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. PC 218A and 218B
to be offered in alternate years. PC 218A offered in 1986-87. Hoener, Scher
Survey course in applied chemical engineering unit operations and surface phenomena in physical and biological systems. PHARM CHEM

Selected topics on enzyme mechanisms. General survey of enzyme catalysis; general acid-base catalysis, propinquity effects, strain and conformational change. Covalent intermediates in enzyme catalysis. The role of cofactors in enzyme catalysis. Phosphate transfer reactions. PHARM CHEM

220. Research Conf in Pharmaceutics. (1) § F, W, Sp. Lecture 1 hour. Staff
A program involving the presentation of core material in pharmaceutical chemistry in the Pharmaceutics pathway. The presentations are made by graduate students and examination is by a series of cumulative examinations. PHARM CHEM

221. Research Conf in Pharm Chem. (1) § F, W, Sp. Prerequisite: Graduate standing in the Department of Pharmaceutical Chemistry. Lecture 1 hour. Kenyon
A series of weekly research conferences in medicinal chemistry given by visiting lecturers, faculty, and advanced graduate students. PHARM CHEM

222. Physical Chemistry Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Kuntz and Staff
Topics of current research interest in physical and biophysical chemistry. PHARM CHEM

230A. Spectroscopy. (3) § Sp. Prerequisite: Chemistry 162 or equivalent. Lecture 3 hours. Kollman
The theory and application of molecular electronic and vibrational spectroscopy; optical rotatory dispersion and circular dichroism. PHARM CHEM

230B. Spectroscopy. (3) § W or Sp. Prerequisite: Chemistry 162 recommended. Lecture 3 hours. T. James
Theory and application of nuclear magnetic resonance and electron-spin resonance; mass spectrometry. PHARM CHEM

230C. Spectroscopy. (1-4) § W. Lab 3 hours. Basus, Murphy-Boesch
Laboratory work in nuclear magnetic resonance and electron-spin resonance; mass spectrometry. PHARM CHEM

231. Spectroscopy. (1-4) § F. Prerequisite: Pharmaceutical Chemistry 230B. Lecture 1-4 hours. T. James
Selected topics in spectroscopy and related areas. PHARM CHEM

235. Mass Spectrometry in Life Sci. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Burlingame
Elucidation of molecular structure, characterizations of mixtures, and quantitative measurements. Presentation of basic tools, concepts, and strategies in the complementary usage of currently available techniques in present biochemical and biomedical research. PHARM CHEM

240. Radiochemical Synthesis. (1-2) § F, W. Sp. Prerequisite: Consent of instructor. Lab 3-6 hours. Peng
Theory and techniques related to the synthesis of isotopically labeled organic compounds. Course may be repeated for credit. PHARM CHEM

242. Radiotracer Methodology. (1) § W. Prerequisite: Pharmaceutical Chemistry 152 or 160, or consent of instructor. Lecture 1 hour. Peng, Benet
Discussions on the theory and principles in the use of radionuclides as tracers in biological systems. Emphasis is on the design of experiments and data evaluation. PHARM CHEM

PHARM CHEM

Application of interactive three-dimensional computer graphics to modeling complex biological systems, particularly large molecules and their interactions. Elements of hardware and a detailed discussion of software. Demonstration and self-scheduled projects using the computer graphics laboratory. PHARM CHEM

266. Research Planning Conference. (1) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1 hour. Staff
Discussion and practice in research problems formulation and design selection. Core classes and small group sessions are organized around students' interests by faculty within the area of specialization. PHARM CHEM

298. Thesis. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the thesis for the master's degree. PHARM CHEM

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. PHARM CHEM

Pharmacology

100A-B. Medical Pharmacology. (4-4) W, Sp. Prerequisite: Biochemistry 100A or 100B or equivalent; Physiology 120 and 125 or equivalent. Lecture 3 hours. Conference 2 hours. Katzung, Trevor
Systematic presentation of pharmacologic agents based on drug group classification.
Major emphasis is on mechanism of action of clinically important agents. PHARMACOL.

121. Pharmacology. (1) W. Prerequisite: Concurrent enrollment in Pharmaceutical Chemistry 121. Lecture 1 hour. Burkharter

Systematic survey of action and uses of drugs with emphasis on steroids, hormones, and drugs for metabolic disorders. PHARMACOL.

125. Pharmacology & Toxicology. (4) Sp. Prerequisite: Biochemistry 120A-B and Physiology 120 and 125. Lecture 3 hours. Conference 2 hours. Burkharter

Systematic survey of action and uses of drugs acting on central nervous and cardiovascular systems and the kidneys. PHARMACOL.

126B-C. Dental Pharmacology. (2, 4) § W, Sp. Prerequisite: Physiology 110. Lecture 2 hours W; 3 hours Sp. Lab 3 hours Sp.

Trevor

Objective of the course is to acquaint dental and hygiene students with the fundamentals of pharmacology. Various classes of drugs are examined in regard to actions, absorption, fate, excretion, and toxicity. Agents useful in dentistry are emphasized. PHARMACOL.

130. Clinical Toxicology. (2) Sp. Prerequisite: Pharmacology 125 and 136. Lecture 2 hours. Burkharter, Correia

The occurrence, mode of action, recognition, and treatment of poisoning by environmental chemicals and therapeutic agents. PHARMACOL.

134. Pharmacology. (2) W. Prerequisite: Concurrent enrollment in Pharmaceutical Chemistry 134. Lecture 2 hours. Burkharter, Armstrong

Systematic survey of action and uses of anti-infective and anti-neoplastic drugs. PHARMACOL.

136. Pharmacology & Toxicology. (4) E. Prerequisite: Pharmacology 125. Lecture 3 hours. Conference 2 hours. Burkharter

Systematic survey of action and use of drugs acting on the central nervous system. PHARMACOL.

150.01. Pharmacology Research. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor: Lecture and lab to be arranged. Staff

Students perform individual research in a field of their choice under the guidance and supervision of a member of the faculty. PHARMACOL.

170. Group Studies. (1-4) F, W, Sp. Prerequisite: Consent of instructor. Staff

Group studies of selected topics in pharmacology. PHARMACOL.

172. Toxicology. (1) W. Conference 2 hours. F. Meyers

Course provides information on the clinical and social problems associated with selected environmental agents. PHARMACOL.

An introductory course on the mechanisms of action of drugs and toxic compounds, emphasizing fundamental principles of chemistry relevant to the interactions of pharmacological agents and hormones with biomacromolecules. PHARMACOL.

198. Supervised Study. (1-5) § F, W, Sp. Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACOL.

199. Laboratory Project. (1-5) § F, W, Sp. Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARMACOL.

206A. Mechanisms of Drug Action. (3) § W. Prerequisite: Consent of instructor. Students must register for both Pharmacology 206A and 206B to receive full credit after completion of both quarters. Seminar 3 hours. Bourne and Staff

Lecture/seminar dealing with fundamental aspects of interactions between chemical compounds and components of biological systems. Mechanisms of drug action at molecular, biochemical and membrane levels are considered. PHARMACOL.

206B. Mechanisms of Drug Action. (3) § Sp. Prerequisite: Pharmacology 206A. Seminar 3 hours. Lansman

Second quarter of 2-quarter lecture/seminar dealing with fundamental aspects of interactions between chemical compounds and components of biological systems. Mechanisms of drug action at molecular, biochemical, and membrane levels are considered. PHARMACOL.

208. Oxidative Drug Metabolism. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Correia, Ortiz de Montellano

The biochemical, regulatory, and chemical aspects of mixed function oxygenases with particular emphasis on cytochrome P-450. PHARMACOL.

210A-B-C. Introductory Toxicology. (1-2, 1-2, 1-2) § F or W or Sp. Prerequisite: Consent of instructor. Lecture 1-2 hours. Sequence of course may be given in any quarter. Course must be taken in sequential order. E. Meyers, Correia, Hine

Introductory toxicology divided into the following three components: toxicity testing procedures; environmental toxicology, selected topics; and clinical toxicology, current developments. PHARMACOL.
220. Seminar. (0) § F W, Sp. Staff
Presentations by guests and staff on current research in pharmacology. PHARMACOL
250. Research. (1-8) § F W, Sp. Staff
PHARMACOL.
298. Thesis. (0) § F W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the thesis for the master’s degree. PHARMACOL.
299. Dissertation. (0) § F W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Staff
For graduate students engaged in writing the dissertation for the Ph.D. degree. PHARMACOL.
300A-B-C. Teaching Practicum. (1-5, 1-3, 1-3) F, W, Sp. Prerequisite: Advancement to candidacy for the Ph.D. degree. Staff
Opportunity is provided to participate in a formalized way in the teaching of pharmacology under the direction of the faculty. PHARMACOL.

Pharmacy

111. Non-Prescription Products. (1) W. Conference 2 hours. Yee
Evaluation and comparison of non-prescription medications and appliances. Discussion on their patterns of use in the community is included. Emphasis is on verbal communications. PHARMACY
112. Non-Prescription Products. (1) Sp. Prerequisite: Pharmacy 111. Conference 2 hours. Yee
Continuation of Pharmacy 111. PHARMACY
114. Biopharmaceutes & Phys Pharmacy. (3) F Prerequisite: Concurrent enrollment in Chemistry 115. Lecture 3 hours. Hoener, Guy, Siegel
A study of the physical, chemical, and biological factors which interact and dominate the design of dosage forms as drug delivery systems, including an introduction to the analysis of clinical data. PHARMACY

115. Biopharmaceutes & Phys Pharmacy. (4) W. Prerequisite: Pharmacy 114 and concurrent enrollment in Chemistry 116. Lecture 3 hours. Lab 3 hours. C. Hunt, Dill, R. Day
Continuation of Pharmacy 114 with the addition of laboratory preparation of basic drug delivery systems. PHARMACY

Continuation of Pharmacy 115. PHARMACY
123. Non-Prescription Drugs. (1) F Prerequisite: Pharmacy 112. Conference 2 hours. C. Yee
Continuation of Pharmacy 112. PHARMACY

127. Biopharmaceutes & Dispensing. (4) F Prerequisite: Pharmacy 116 and Pharmacy Administration 112. Lecture 2 hours. Lab 6 hours. R. Day, Benet, Siegel
Continuation of Pharmacy 116 with the addition of training in the professional and dispensing aspects of pharmacy. PHARMACY

128. Pharmacokinetics. (3½) W. Prerequisite: Pharmacy 116. Lecture 3 hours. Conference 1-2 hours. Oie, Giacomini
Course covers the pharmacokinetic basis of variability in the therapeutic, pharmacologic, and toxicologic effects of drugs. PHARMACY

Continuation of Pharmacy 128. PHARMACY
151. Community Health Education. (2) Sp. Lecture and discussion 2 hours. Participation in at least four community health education programs. R. Gibson
Course is designed to train students for participation in community health programs dealing with drug abuse education and other drug-health related areas, such as poison prevention, venereal disease, and birth control. Course may be repeated for credit. PHARMACY

152. Special Topics in Pharmaceutics. (2) Sp. Prerequisite: Pharmacy 116 or concurrent enrollment. Lecture 2 hours. Szoka
An intermediate course offering an opportunity to explore, in greater depth, special drug delivery systems and some fundamental relationships involved in their design or action. PHARMACY

153. Seminar Preparation Techniques. (1) W. Prerequisite: Consent of instructor. Seminar 1 hour. Conference 1 hour. Goyan, Hoener
Preparation, presentation, and evaluation of research seminars. PHARMACY

154. Percutaneous Absorption. (2) W. Prerequisite: First-year standing. Lecture 2 hours. Wester, Guy
Course presents material dealing with the penetration of drugs and other chemicals across the skin. PHARMACY

155. External Drug Products. (3-4) W. Sp. Prerequisite: Pharmacy 127. Lecture 2-3 hours. Lab 3-6 hours. Blake, Jackson, Hoener
Discussion and laboratory exercises on the formulation of products for external use, including drugs and cosmetics. The course deals with the properties and ingredients of such products. PHARMACY

156. Parenteral Products. (3) F, W. Sp. Prerequisite: Pharmacy 127. Lecture 2 hours. Lab 3 hours. Jackson, Blake
Introduction to the formulation and technology of parenteral preparations. Laboratory includes participation in hospital activities in
which parenterals are made and administered.

PHARMACY

164. Veterinary Products. (3) Sp. Prerequisite: Microbiology 120, 127, Pathology 135, Pharmacology 136 and Pharmacy 116. Lecture 3 hours. 

Spinelli

Course is designed to familiarize the student with common ailments of domestic animals and livestock, products used for the prevention and treatment of such diseases, the interrelationship of pharmacist, veterinarian and animal owner, and legal limitations on veterinary product dispensing. PHARMACY

165. Pharmaceutical Technology. (3) F. Prerequisite: Pharmacy 116. Lecture 1 hour. Lab 6 hours. 

Blake, Gibson, Cooper

An introduction to the technology of liquid and semisolid pharmaceuticals. Special emphasis is given to the problems encountered and the materials used in pharmaceutical manufacturing. PHARMACY

166. Pharmaceutical Technology. (3) W. Prerequisite: Pharmacy 165. Lecture 1 hour. Lab 6 hours. 

Blake, Gibson, Cooper

An introduction to the technology of solid dosage forms, especially tablets and capsules. Emphasis is placed on problems encountered in preparation of this type of medication. PHARMACY

167. Pharmaceutical Technology. (3) Sp. Prerequisite: Pharmacy 166. Lecture 1 hour. Lab 6 hours. 

Blake, Gibson, Cooper

An advanced study of the relationship of the art and science of pharmaceutical technology to solid dosage forms. PHARMACY

168. Clinical Pharmacokinetics—UC. (2) F, W. Sp. Prerequisite: Fourth-year standing or consent of instructor. Reports and conferences 6 hours. Enrollment limited.

Tozer, Winter

Discussion and review of the literature in the clinical application of pharmacokinetic principles in drug therapy. PHARMACY

168.02. Clinical Pharmacokinetics—UC. (2) F, W, Sp. Prerequisite: Fourth-year standing or consent of instructor. Reports and seminar 3 hours. Enrollment limited. Shinomura

Discussion and review of the literature on the clinical application of pharmacokinetic principles in drug therapy. PHARMACY

Staff

Group studies of selected topics in pharmacy. PHARMACY

Williams, Wester, Schwartz

A ten-week course, that will discuss methods for generating data about drug risk and efficacy in clinical investigations, with emphasis on the randomized clinical trial. Statistical methods used in modern clinical trials will be discussed. PHARMACY

170.06. Molec & Cell Biology in Drug Devel. (2) Sp. Prerequisite: Consent of instructor. Lecture 2 hours. 

Szoka

Introduction to the role of cellular and molecular biology in developing new drugs, hormones or therapeutic agents. PHARMACY

Lem

Aspects of communication which focus on skills pertinent to contemporary pharmacy settings. Discussion of principles of communication and practice of specific techniques in simulated practice situations. PHARMACY

170.08. CPR Education. (1½) F, W, Sp. Seminar 6 hours. 

Lem

Experience in preparing course materials and presenting coursework on CPR (cardiopulmonary resuscitation) to health professionals and/or lay audiences interested in obtaining CPR certification or re-certification. PHARMACY

198. Supervised Study. (1-5) F, W. 

Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACY

199. Laboratory Project. (1-5) F, W. 

Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHARMACY

Pharmacy Administration

111. Pharmacy Laws. (2) W. Lecture 2 hours. 

J. R. Nielsen

Introduction to court systems and administration boards and their relationship to the health professions. Discussion of basic principles of criminal law, negligence, and business law with particular emphasis on the legal relationship and responsibility of the practitioner to the patient. PHARMACY

112. Pharmacy Laws. (2) Sp. Lecture 2 hours. 

J. R. Nielsen

A detailed examination of federal and state drug, cosmetic, and narcotic laws, their promulgation, enforcement, and effect upon the practice of pharmacy. Course involves some administrative work. PHARMACY

150. Marketing. (4) W. Lecture 4 hours. 

Lucaccini

An analysis of the marketing functions that facilitate the flow of pharmaceutical products from production to consumption, and of the decision-making processes of marketing institutions. Emphasis is given to the environmental factors affecting marketing decisions. PHARMACY

154. Community Pharmacy Management. (4) Sp. Prerequisite: Basic economics
or consent of instructor. Lecture 4 hours.

Lucaccini

Principles of management, specially directed toward developing familiarity with current problems peculiar to community pharmacy operation. Emphasis is given to elements in locating, organizing, operating, and adapting a pharmacy. PHARMACY

155. Accounting. (3) F. Lecture 1 hour. Discussion 2 hours.

Lucaccini

Consideration of the fundamental concepts of accounting and its applied uses, with special emphasis on the accounting requirements of the community pharmacy. Problem cases and demonstrations are presented. PHARMACY

J. R. Nielsen

A survey of laws relating to landlord-tenant dissolution, property division, support payments, probate and decedent's estates, with particular emphasis on how pharmacists may expect their practice to be affected by these laws, and some practical preventive legal techniques. PHARMACY

Staff

Group studies of selected topics in pharmacy administration. PHARMACY

180A-B-C. Legal Problems in Health Care. (2-2-2) F, W, Sp. Prerequisite: Third-year standing and consent of instructor.

J. R. Nielsen

Selected problems with directed readings and library research on current legal (statutory and case law) issues affecting the delivery of pharmacy services. Discussion and paper. PHARMACY

Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHARMACY

Physical Therapy

100. Gross Anatomy. (6) Su. Prerequisite: Completion of course prerequisites for admission to the University and the Curriculum in Physical Therapy. Open only to students enrolled in the Curriculum; or consent of program director. Lecture 3 hours. Lab 9 hours.

DeWese

A fundamental building block of physical therapy; this course presents the gross structure of the human body studied through regional and systemic correlation by means of dissection, demonstration, surface and cross-sectional anatomy. PHYS THER

101. Pathology. (3) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum; or consent of program director. Lecture 3 hours.

Biava

Mechanisms and language of diseases are discussed with emphasis on the dynamic nature of fundamental disease processes such as cell injury, immunopathology, inflammation, response to infectious agents, repair and regeneration, hemodynamic arrangements, genetic disorders, disturbances of cell growth and neoplasia. This course is identical to Pathology 135. PHYS THER

102. Physiology. (3) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum; or consent of program director. Lecture 3 hours.

Staff

The physiological function of the endocrine, cardiovascular, respiratory, renal, and digestive system is presented in a lecture format. An overview of selected regulatory and interactive mechanisms is presented to facilitate the concept of homeostasis. PHYS THER

104A. Physical Therapy Procedures. (3) Su. Prerequisite: Completion of course prerequisites for admission to the University and the Curriculum in Physical Therapy. Open only to students enrolled in the Curriculum; or consent of program director. Lecture 2 hours. Lab 4 hours.

Asturias, Bly

This course begins a four-quarter series presenting theory, skills and application of physical therapy procedures in patient care. Course addresses surface anatomy, kinesiology, tests and measurements for evaluation of normal integrity of neuromusculoskeletal function. PHYS THER

104B. Physical Therapy Procedures. (5) F. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum; or consent of program director. Lecture 2 hours. Lab 8 hours.

Bly, Asturias

Continuation of Physical Therapy 104A. Theory, physics and indications and contraindications of physical therapy procedures. Electro-, hydro-, cryo- and thermotherapies, massage and exercise. Problem-solving approach to treatment planning and evaluation of neuromusculoskeletal pathologies. PHYS THER

104C. Physical Therapy Procedures. (5) W. Prerequisite: Completion of course work in summer term and fall quarter. Open only to students enrolled in the Curriculum; or consent of program director. Lecture 2 hours. Lab 8 hours.

Bly, Chape, Radika

Continuation of Physical Therapy 104B. Advanced neuromuscular, physiological, biomechanical principles related to musculoskeletal dysfunction. Theory, physiological and functional ramifications of pathology, patient evaluation and treatment of dysfunction of the cardiopulmonary, vascular and integumentary systems. PHYS THER

104D. Physical Therapy Procedures. (3) Sp. Prerequisite: Completion of course work in summer term, fall and winter quarters. Open only to students enrolled in the Curriculum; or consent of program director. Lecture 2 hours. Lab 8 hours.

Asturias
Continuation of Physical Therapy 104C. Basic neurophysiological and neuroanatomical principles of normal and pathological motor function. Various neurophysiological therapeutic concepts of evaluation and treatment planning, and implementation of treatment for the patient with neurological dysfunction. Projects and field work are included. PHYS THER

105. Physical Med & Rehabilitation. (3) E Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 3 hours. Berrol

Course presents the philosophy of rehabilitation and medical management of chronic diseases and the multiple handicapped person. Particular emphasis is on brain damage, spinal cord injuries and cerebrovascular accidents. PHYS THER

106A. Specialty Management of Disease: Orthopedics. (2) E Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 2 hours. Hoaglund

Course presents the diagnostic, medical, and surgical concerns and techniques which guide the decision making of the orthopedic surgeon. Contraindications, precautions, and prognosis are discussed to guide the decision making of the physical therapist. PHYS THER

106B. Specialty Management of Disease: Pediatrics. (1) Sp. Prerequisite: Completion of course work in summer term. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 1 hour. Kaufman

Course presents the diagnostic, developmental and medical concerns of the normal younger, as well as the child with acute/chronic disease. Establishing guidelines for normal children, provides a foundation for the physical therapist to understand neuromuscular development and the impact of impairment on normal function. PHYS THER

106C. Specialty Management of Disease: Neurology. (2) W Prerequisite: Completion of course work in fall quarter. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 2 hours. Schiller

Course presents the diagnostic and medical concerns which guide the decision making of the neurologist. Contraindications, precautions, and diagnosis of the different neurological disorders are discussed to provide a basis for decision making by the physical therapist. PHYS THER

106D. Specialty Management of Disease: Internal Medicine. (3) W Prerequisite: Completion of course work in fall quarter. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 3 hours. Roost

Course presents the diagnostic and medical concerns that guide the internist in decision making. Outlining the contraindications, precautions, and prognosis helps guide the physical therapist in designing management programs for patients with primary or secondary internal medical problems. The health care team and team relationships are also presented. PHYS THER

106E. Specialty Management of Disease: Psychiatry. (2) W Prerequisite: Completion of course work in fall quarter. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 2 hours. Staff

Course presents the psycho-social diagnostic and management concerns of patients with medical problems, those with common emotional and social problems, and those challenged with adjustment to physical disability. The physical therapist learns techniques of history taking and counseling appropriate to physical therapeutic management strategies. PHYS THER

108. Basic Medical Procedures. (2) Sp. Prerequisite: Completion of course work in summer term, fall and winter quarters. Lecture 1 hour. Lab 2 hours. Richards

Presentation of basic procedures for total and emergency care of the patient. Emphasis on interpreting vital signs, temporary emergency intervention, sterile techniques, wheelchair prescription, burn evaluation and treatment, as well as communication in various situations. PHYS THER

109A. Prof Practice & Administration. (4) W Prerequisite: Completion of course work in summer term and fall quarter. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 4 hours. Byl

Study of attitudes and obligations of the profession of physical therapy presented through lecture and seminars. Emphasis on ethics, medicolegal aspects of treatment and records, methods of communication and research. Students will participate in seminar presentations and begin a library research project. PHYS THER

109B. Prof Practice & Administration. (4) Sp. Prerequisite: Completion of course work in summer term and fall quarter. Open only to students enrolled in the Curriculum, or consent of program director. Lecture 4 hours. Radika

Study of attitudes and obligations of the profession of physical therapy presented through lecture and seminars. Emphasis on growth of the profession and organization and administration of a clinical physical therapy department. Students will complete library research project begun in Physical Therapy 109A. PHYS THER

410A. Clinical Clerkship. (7) Sp. Prerequisite: Completion of course work in summer term, fall and winter quarters. Radika
Students begin clinical clerkship in clinical facilities. Under close supervision, appropriate and indicated procedures of total patient treatment are performed. Gradually, full responsibility for a full patient load for particular facility is assumed. Students present in-services and write case reports. PHYS THER

410B. Clinical Clerkship. (15) Su. Prerequisite: Completion of course work in preceding summer term, fall, winter and spring quarters. Open only to students enrolled in the curriculum, or consent of program director. Radtka

Course is required for and permitted to graduate students only. Students provide patient care under decreasing supervision in associated clinics. Students also submit case reports, present in-services and attend scheduled campus seminars. PHYS THER

Physiology

100. Organ System Physiology. (6) § W. Prerequisite: Anatomy 100 and 102, and concurrent enrollment in Biochemistry 100A-B; or consent of instructor. Lecture 4 hours. Lab 4 hours. Conference 2 hours. Mines

Normal function of the cardiovascular, respiratory, renal, and gastrointestinal systems and the metabolic functions of the body as a whole are studied in lectures, conferences, laboratory exercises, demonstrations, and clinical illustrations. PHYSIOLOGY

101. Endocrinology & Gastroenterology. (5) § Sp. Prerequisite: Anatomy 100, Biochemistry 100A-B, Physiology 100, or consent of instructor. Lecture 5 hours. Lab 1 hour. Reid

The structure of the endocrine glands and the physiology of the endocrine and gastrointestinal systems, together with selected aspects of the pathology and pharmacology of these systems, are studied in lectures and laboratory. PHYSIOLOGY

110. Integrative & Nutritive Systems. (6) § Sp. Prerequisite: College-level biology, physics, and chemistry, or consent of instructor. Lecture 5 hours. Conference 3 hours. A. Miller

Introduction to organ systems with emphasis on nervous, endocrine, circulatory, respiratory, and alimentary function in vertebrates. Importance of organ systems for the success of multicellular forms serves as focus. Fundamental cell processes are also discussed, emphasizing differential function. PHYSIOLOGY

120. Mammalian Physiology. (2½) W. Prerequisite: Physiology 125 required for students in School of Pharmacy; may be taken separately by graduate students with consent of instructor only. Lecture 2 hours. J. A. Williams, Goldfine, Monroe

Study of the integrating systems of the mammalian organism, particularly the gastrointestinal and endocrine systems. PHYSIOLOGY

125. Mammalian Physiology. (6) F. Prerequisite: Consent of instructor. Lecture 4 hours. Lab 4 hours. Conference 2 hours. Mines, Goerke, Kellogg

Physiology of the human cardiovascular, respiratory and renal systems is stressed, with special attention to developing problem solving skills using the material. PHYSIOLOGY

126. Neuroscience for Pharmacy. (4) W. Prerequisite: Physiology 125 or consent of instructor. Lecture 3 hours. Lab 1½ hours. Conference 1 hour. Korenbrot, A. Kelly, Copenhagen, R. Snyder and Staff

Course is designed primarily for students in the School of Pharmacy. The course will present an integrated approach to the physiological operations of the nervous system and the morphological or anatomical substrates in which these occur. PHYSIOLOGY

150.01 Research in Physiology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Lecture and lab to be arranged. Staff

Individual research in endocrinology, respiratory physiology, neurophysiology, cardiovascular physiology, cell physiology, or other areas offered by individual staff members. PHYSIOLOGY

198. Supervised Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Ganong and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PHYSIOLOGY

199. Laboratory Project. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. Ganong and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. PHYSIOLOGY

200. Directed Reading Seminar. (0) § F, W, Sp. Prerequisite: Consent of instructor. Ganong and Staff

Directed reading organized in a seminar or tutorial fashion to review aspects of physiology under supervision of a member of the faculty. PHYSIOLOGY

204. Topics in Physiology. (1) § W. Prerequisite: Minimum of six units of introductory physiology. Seminar 1 hour. Rothman

This seminar discusses selected topics in cellular and integrative physiology. Readings are drawn from primary and secondary sources. PHYSIOLOGY

206. Adv Kidney & Electrolyte Physiol. (2-3) § Sp. Prerequisite: Physiology 100 or 125 and consent of instructor. Lecture 2-3 hours. Offered in alternate years. Not offered 1986-87. C. Berry
Current theories regarding renal hemodynamics and regulation of whole body acid-base, electrolyte and fluid balance will be discussed. Emphasis will be placed on the transport mechanisms operating across renal tubular membranes. PHYSIOLOGY

210. Hormone Secretion Mechanisms. (2) § F, Sp. Prerequisite: Physiology 101 and Biochemistry 245, or consent of instructor. Lecture 1 hour. Seminar 1 hour.

J. Williams, Lingappa

Discussion of current literature pertaining to the mechanism of synthesis, packaging, and release of secretory proteins including hormones and digestive enzymes. PHYSIOLOGY

211. Membrane Physiology. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours.

Widdicombe and Staff

Introduction to mechanisms by which ions and small molecules cross biological membranes in response to both physical forces and cellular metabolism. PHYSIOLOGY

221. Cardiovasc-Renal-Pulmonary Sys. (2) § F, W, Sp. Prerequisite: Physiology 100 or equivalent. Lecture 2 hours.

Course includes critical reviews of topics of current importance, presentation of unsolved problems of staff, and critical evaluation of published articles by the group. The total program is presented over six successive quarters. PHYSIOLOGY

222. Endocrinology Seminar. (1) § F, W, Sp. Seminar 1 hour. Course may be repeated for credit. Ganong

Guest lectures alternating with reports of research in progress by members of the graduate group in endocrinology. A different topic of endocrinological interest is the subject of guest presentations each quarter. PHYSIOLOGY

223. Physiology Research Seminar. (1) § F, W, Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Course may be repeated for credit. Ganong

Seminar presentations by guest lecturers, alternating with discussion by Physiology staff members of their current research. Each quarter a different topic of physiological interest is the subject of guest presentations. PHYSIOLOGY

Taylor, Fielding

The structure and regulation of the genes and proteins that control lipid metabolism, including plasma apolipoproteins, receptors, and enzymes. Molecular and cellular biology of mammalian lipid metabolism examined with respect to regulation of various proteins involved in transport, binding, and utilization of lipids. PHYSIOLOGY

Ganong and Staff

PHYSIOLOGY

298. Thesis. (0) § Su, F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Ganong and Staff

For graduate students engaged in writing the thesis for the master’s degree. PHYSIOLOGY

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. Ganong and Staff

For graduate students engaged in writing the dissertation for the Ph.D. degree. PHYSIOLOGY

300. Teaching Practicum. (0) § F, W, Sp. Prerequisite: Previous training in physiology and consent of instructor. Lecture and lab variable.

Ganong and Staff

Practice in teaching physiology under faculty supervision. Students supervise laboratory work, conduct conferences, deliver lectures, and assist in preparing and grading examinations. Responsibilities are assigned according to the individual’s stage of development. PHYSIOLOGY

301. Scientific Writing. (0) § Su, W. Prerequisite: Consent of instructor. Seminar 4 hours.

Coleridge, Zeiger

A seminar designed to teach postdoctoral fellows and graduate students how to best put into words, tables and figures work done in the laboratory, and how to do so clearly, simply, precisely, convincingly, and briefly, so that others may understand. PHYSIOLOGY

302. Teaching Techniques. (0) § F, W. Prerequisite: Consent of instructor. Lecture 1½ hours. Enrollment limited.

Staub

A course in teaching techniques. Students present short lectures, and videotapes of these presentations are analyzed by self- and group criticism. PHYSIOLOGY

Preventive Dentistry and Community Health

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Consent of instructor.

Wycoff, Silverstein

A laboratory research project under direction of a member of the faculty with the approval of the Chairperson of the department. DENT PUB HLTH

Psychiatry

First-Year Coordinated Instruction—This course provides a first opportunity to interview medical patients in small group settings, guided by experienced clinicians. Useful medical information is gathered in a comfortable, professional interchange, and one's identity as a physician also begins emerging in the process.
PGY 1 Courses—The Department of Psychiatry is currently developing new courses for PGY 1 residents. Please refer to the quarterly Schedule of Classes for a listing of those courses in the 400 series.

100A. Psychological Basis of Medicine. (2) F. Lecture 2 hours. Seminar 1 hour.  
Horowitz, Marmar

Introduction to the basic psychological principles underlying response to the stress of illness and its treatment with emphasis on mental mechanisms, development, death and dying, and various types of doctor-patient relationships. PSYCHIATRY

100B. Illness Behavior. (1) W. Seminar 2 hours.  
Brodsky, F. Cohen

Introduction to psychological principles influencing health behaviors and the physician-patient relationship. Presentation of the social and cultural factors that affect patients' health and illness behavior when well, when they fear illness, when ill, during rehabilitation and after recovery. PSYCHIATRY

110. Psychiatry Core Clerkship. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Medicine 131A/B-C, Psychiatry 100A, 100B and 131A-B. Open to UCSF students only.  
Zegans

Four-week assignment to a psychiatric service at UC, SFGH, VAMC, MZ, L, or VAF. Students, under supervision, are responsible for patient evaluation and participation in treatment planning. They attend seminars related to clinical work, and make field visits to other types of psychiatric facilities. PSYCHIATRY

J. Cohen

Introduction to clinical psychiatry with particular emphasis upon knowledge important in general medical practice. Course format includes lectures, small group teaching, interviewing patients, syllabus reading, and the use of clinical videotapes and film. PSYCHIATRY

135. Psychiatric Aspects of Med Pract. (0) Su, F, W, Sp. Prerequisite: Satisfactory completion of the first and second years in the School of Medicine as specified in the prerequisite for the 110 clerkships listed below.

Clinical seminar 2 hours.  
Kolman

A weekly two-hour clinical seminar, offered at all training sites, and a required part of the following clerkships: Family and Community Medicine 110, Medicine 110, Neurology 110, Obstetrics, Gynecology and Reproductive Sciences 110, Pediatrics 110, and Surgery 110. PSYCHIATRY

140.01. Advanced Psychiatry Clerkship. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry.  
Boatman and Staff

Participation, with supervision of attending and resident staff of the Department of Psychiatry, in psychiatric assessment, treatment and/or consultation-liaison with adult or child inpatients or outpatients. Seminars, assigned reading and case presentation may be required. PSYCHIATRY

140.02. Off-Campus Clerkship. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.  
Boatman

Clinical clerkship in off-campus hospitals, approved by the chairperson of the department and the dean. PSYCHIATRY

140.04. Adv Psychiatry Clerkship—VAF & VMC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry.  
Zil

Clinical clerkships based in a variety of community settings in Central California. Course includes working with patients and families and emphasizes preventive, rehabilitative, and consultative services, especially to underserved rural and minority populations. PSYCHIATRY

140.05. Clinical Psychiatry. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.  
Boatman and Staff

Participation, under close supervision in accordance with students' level of experience and special interests, in clinical psychiatric treatment of adult or child inpatients or adult outpatients. PSYCHIATRY

140.06. Consultation Clerkship—VMC. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry.  
Zil, Ahles

Supervised evaluation and treatment of patients on the Psychiatry Consultation Service, Liaison Units, and Psychosomatic Clinic. Learning opportunities include teaching rounds, consultation seminar, biopsychosocial rounds, and consultation syllabus. PSYCHIATRY

150.01. Psychiatric Research. (1 1/2 per week) Su, F, W, Sp. Prerequisite: Consent of Department of Psychiatry.  
Callaway and Staff

Participation according to students' level of experience in experimental work in areas such as neurophysiology, operant conditioning, psychophysiology, immunonchemistry, and nonlexical communication. All work is under the close supervision of members of the faculty. PSYCHIATRY

150.03. Medical Practice Sexual Issues. (1 1/2 per week) F, W, Sp. Prerequisite: Consent of instructor and Department of Psychiatry.  
Gendel

Effect of sex roles, self-esteem, attitudes, and values of clinician on treatment of sexual problems. Case studies, role playing, group discussion, film, and television are used to develop skills in introductory sex counseling. Special readings assigned; project is optional. PSYCHIATRY

160.01. Speech & Lang Psychopathology. (2) F, W, Sp. Prerequisite: Consent of De-
180. Human Sexuality & Medical Prac. (2) W. Seminar 2 hours. Gendel

Social, behavioral, and clinical aspects of human sexuality are covered in a series of lectures and seminar periods. Lectures present didactic material and seminars focus on clinical and ethical problems related to sex and medical practice. PSYCHIATRY

182. Transcultural Psychiatry. (1) § F, Sp. Prerequisite: Psychiatry 100A and 100B or equivalent psychiatry experience, and consent of Department of Psychiatry. Consent of Instructor for graduate students. Seminar 1½ hours. Hartog

Seminars explore the field of transcultural psychiatry, ranging from entering the alien community, culture shock, and epidemiology, to folk healing and cross-cultural psychotherapy. Relevance to American urban and ethnic issues discussed. Examples, problems, methodology, and possibilities of research also presented. PSYCHIATRY

198. Supervised Study. (1-5) § F, W, Sp. Prerequisite: Consent of Department of Psychiatry: L. J. Epstein and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PSYCHIATRY

199. Laboratory Project. (1-5) § F, W, Sp. Prerequisite: Consent of Department of Psychiatry: L. J. Epstein and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department.

PSYCHIATRY

200A-B-C-D-E-F-G-H-I. Mental Health-Outpatient. (3-8 per section) § F, W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1-3 hours. Lab 6-15 hours. Kaywin

Oswald

A clinical course focusing on speech and language pathology. Students' eligibility depends on previous experience with psychiatric patients and interest in specific problems of communication. Patients with characteristic syndromes will be interviewed and suitable treatment procedures performed under supervision. PSYCHIATRY

Practical experience in psychotherapeutic work with outpatients to increase students' understanding of psychopathology, psycho-dynamics, and psychotherapeutics. Students are assigned patients under supervision of a member of the faculty. Assigned reading, seminars, and chart writing. PSYCHIATRY

160.11. Psychotherapeutic Interview Tech. (4-5) F, W, Sp. Prerequisite: Consent of Department of Psychiatry. Lecture 4-5 hours. Oswald

Individual and group supervision of clinical work with patients. The focus is on developing rapport, obtaining relevant information, and establishing a satisfactory therapist-patient relationship. Supplementary reading may be assigned. PSYCHIATRY

170.01. Intro to Study of Suicide. (2) § F, W, Sp. Prerequisite: Consent of Department of Psychiatry. Lecture 2 hours. Motto

Suicide is surveyed from a multidisciplinary approach in seminars led by persons working in the field. PSYCHIATRY

170.03. Behavioral Specialist Pathway. (1-6) F, W, Sp. Prerequisite: Psychiatry 110 and consent of Department of Psychiatry. Lecture 1-6 hours. Zegans

Students in the Behavioral Specialist Pathway elect individual or group study of a topic not included in other formal courses. Supervised reading, research, field work, and clinical assignments are given in accordance with the students' level of interest and experience. PSYCHIATRY

170.06. Human Sexuality Research. (2) § F, W, Sp. Prerequisite: Psychiatry 180, consent of instructor and Department of Psychiatry. Lecture 1 hour. Lab 3 hours. Gendel

Participation in research activities related to psychological, physiological, and hormonal factors in sexual problems. PSYCHIATRY

170.07. Social-Physical Deprivation. (2) § W. Prerequisite: Consent of Department of Psychiatry. Lecture 2 hours. H. Schlesinger

Compares and contrasts influences of cultural, physical, social, and sensory deprivation on cognitive and emotional development. Emphasis on social stigma and family response to handicapped child: nature of problems and treatment of handicapped groups, development and utilization of community resources. PSYCHIATRY

Course is a seminar for exploring and surveying current issues in psychiatry. Each week an assigned paper will be discussed by students, seminar leaders and an occasional guest discussant. Topics will include current research, new theories, social issues and clinical innovations. PSYCHIATRY

170.18. Psychotherapy Research. (3) Sp. Prerequisite: Course in statistics and consent of Department of Psychiatry. M. Horowitz

Participation in research activities at the Center for the Study of Neuroses. Lectures, laboratory, individual guidance to readings, and patient observation are included. PSYCHIATRY
Supervised experience in diagnosis and treatment planning for psychiatric outpatients in community settings. Students are responsible for evaluations, psychotherapy, treatment planning, psychiatric and community consultation, and medical management. Instruction in all areas via outpatient meetings, rounds, case conferences and seminars. Psychiatry

201A-B-C-D-E-F-G-H-I. Mental Health - Children's Serv. (1-5 per section) § F; W; Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 0-2 hours. Lab 3-9 hours.

Kaywin

Supervised experience in provision of psychiatric services for children. Course includes case conferences and seminar, diagnostic evaluations, treatment planning, ongoing therapy of children and their families, and consultation to community agencies, schools and pediatricians. Psychiatry

202A-B-C. Mental Health - Inpatient. (5-5-5) § F; W; Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 11 hours.

Hewitt

Under supervision, students assume responsibility for psychiatric patients on community inpatient services. Course includes individual, group, family and milieu therapy, patient advocacy, community liaison and follow-up care, administrative and staff issues in patient management and related seminars. Psychiatry

203A-B-C. Mental Health - Emer Serv. (3-3-3) § F; W; Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 1½ hours. Lab 4½ hours.

Hewitt

Supervised experience in community mental health emergency services. Course includes crisis evaluation, disposition and treatment planning with community agencies, instruction in community mental health systems, health needs of minorities, crisis intervention, brief psychotherapy, use of psychotropic medications and related seminars. Psychiatry

204A-B-C. Mental & Psychological Issues. (3-5-3) § F; W; Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor. Seminar 3 hours.

B. Diamond

Theoretical exploration of psychiatric and psychological issues in medical care and biomedical issues in psychiatric care. Course includes lecture and discussion of selected readings in the field. To be taken concurrently with the 200 clinical series. Psychiatry

205. Mental Health Law & Social Policy. (2) § F. Prerequisite: Fifth-year standing in the Doctor of Mental Health Program. Lecture 2 hours.

B. Diamond

Legal aspects of mental health care reflecting social, political policies towards mentally ill. Discussion of controversial issues: confidentiality, responsibility of psychotherapist for patients' acts, dangerousness, involuntary hospitalization, right to treatment, informed consent, mental health ghettos, criminal responsibility, other selected topics. Psychiatry

206. Current Issues Mental Health Lit. (1) § W; Sp. Prerequisite: Enrollment in the Doctor of Mental Health Program. Other students may enroll with consent of instructor. Seminar 1 hour.

B. Diamond

Presentations of current articles of significant developments in mental health principles and practices. Emphasis will be on new and controversial issues. Psychiatry

211. Theory of Mental Health Practice. (1-5) § F; W, Sp. Prerequisite: Consent of instructor. Lecture 1½ hours.

L. J. Epstein, Weinshel

214. Practice of Clinical Social Work. (1½) § F; W, Sp. Prerequisite: 1 year of clinical social work. Restricted to interns in clinical social work. Lecture 1½ hours.

Ahern

This course aims at integrating developmental and clinical theories with clinical social work practice toward enhancing clinical, conceptual, and consultative knowledge and skills. Psychiatry

249. Special Studies. (1-5) § F; W, Sp. Prerequisite: Graduate standing in the Doctor of Mental Health Program. Other students may enroll with consent of instructor only. Lecture 0-2 hours. Lab 3-9 hours.

B. Diamond

Students, with faculty approval, select particular areas of mental health field for advanced or intensive study. Areas chosen may be primarily clinical or nonclinical, but in most instances will combine clinical and nonclinical issues. Psychiatry

400. Com Mental Health System. (1) Su, W. Required for first-year residents in Psychiatry. Seminar 1 hour.

Surber

Focus is on special treatment issues involved in the care of the chronically disabled patient and of patients of various ethnic and minority backgrounds. Psychiatry

401. Intro to Clinical Interviewing. (1) S, W. Prerequisite: Required for first-year residents in Psychiatry. Seminar 1 hour.

Jacobs, Goldfinger

Course teaches the rudiments of interviewing psychiatric inpatients. Psychiatry

Jacobs, Lu
414. Psychobiology. (1) F, W. Prerequisite: Required for second-year residents in Psychiatry. Seminar 1 hour. **J. Mueller**

Seminars explore biochemistry, physiology, and neuroanatomy related to mental function and behavior. Each course considers the understanding of etiology and biological treatment of psychoses. Neuropharmacology and psychopathology of disorders and rationale for various psychological interventions are studied. PSYCHIATRY

415. Intro to Clinical Research. (1) W. Prerequisite: Psychiatry Resident I standing. Seminar 1 hour. **Zegans, Temoshok**

Course introduces residents to clinical research as an essential body of knowledge and skills which can be integrated into present and future clinical work. Consideration of research within four broad paradigms: intrapsychic, sociocultural, behavioral psychological, and psychobiological. PSYCHIATRY

416. Psychoanalytic Theory. (1) F, W. Prerequisite: Required for second-year residents in Psychiatry. Seminar 1 hour. **Baumbacher**

Course offers instruction in the theoretical bases of psychoanalysis. PSYCHIATRY

417. Child Psychopath/Psychotherapy. (1) Su. F. Prerequisite: Required for second-year residents in Psychiatry. Seminar 1 hour. **Binger, I. Philips**

Course covers the theory and implementation of the technique of psychotherapy with children. Emphasis is placed on play therapy. The seminar will also cover psychopathology as manifested in children, including descriptions and possible ideologies. PSYCHIATRY

Course explores the application of psychoanalytic theory to psychotherapy. PSYCHIATRY

422. Social Psychiatry. (1½) F, W, Sp. Prerequisite: Required for third-year residents in Psychiatry, or consent of instructor. Seminar 1½ hours. **F. A. Johnson, Pearl**

Course introduces residents to various aspects of social and community psychiatry. Topics include social psychiatry prior to 1950, development of community mental health programs in the U.S., related social sciences, and current developments in the field. PSYCHIATRY

423. Group Therapy. (1) F, W. Required for third-year residents in Psychiatry. Seminar 1 hour. **Farrell**

Course provides a didactic introduction to the practice of outpatient group psychotherapy. PSYCHIATRY

431. Neurology. (1) W. Prerequisite: Required for fourth-year residents in Psychiatry. Lecture 1 hour. **Palatucci**

Review of clinical neurology with emphasis on neurological disorders that may be psychiatric implications. PSYCHIATRY

450. Psychopharmacology for Psych OP. (1) F, W. Sp. Prerequisite: Consent of instructor. Seminar 1 hour. **Lannon, Stoterau**

A seminar where participants read and present current psychopharmacological literature. Topics focus on 1) decision making regarding clinical syndromes in which medications would be helpful; 2) objective measures of treatment response; 3) practical drug management. PSYCHIATRY

Members of the Department of Psychiatry and distinguished guests make clinically centered presentations reflecting diverse areas of the field. PSYCHIATRY

452. Jungian Perspective Case Conf. (1) F, W, Sp. Prerequisite: Resident in Department of Psychiatry or consent of instructor. Conference 1 hour. **Irvine, Singer**
An elective continuous case conference focusing on transference and countertransference from a Jungian perspective. Major theoretical concepts will be discussed in context of the cases being presented. Psychiatry

453. Dreams from the Jungian Perspective. (1) F, W. Prerequisite: Resident in Department of Psychiatry or consent of instructor. Seminar 1 hour. Richman

Seminar presenting the theoretical aspects of dreams and clinical application within the Jungian framework. Psychiatry

Discussion of issues in clinical research, focusing on questions in clinical research design in the study of psychotherapy. Psychiatry

456. Brief Psychotherapy. (2) W. Sp. Prerequisite: Graduate clinical trainee standing at SFGH, or consent of instructor. Lab 3 hours. Seminar 1 hour. E. Burke, J. Cohen

Review of the literature on psychodynamically oriented brief psychotherapy and review of completed cases. Psychiatry

Course covers psychotherapy of selected cases with recordings of the process, supervision during treatment, and group seminars in which the therapy is reviewed in retrospect using microanalytic and macroanalytic levels of abstraction. Psychiatry

Guided research using an apprenticeship model involving recorded information from psychotherapy, research interviews, and experimental procedures using cognitive science methods. Systematic readings in the literature on meaning structures and defensive processes, including issues of motivation, attention, learning, and emotion. Psychiatry

459. Evaluation of Psychotherapies. (1½) F, W. Sp. Prerequisite: Resident in Department of Psychiatry or consent of instructor. Seminar 1½ hours. Marmar

Course provides framework for residents which will enable them to take a systematic and rational approach in evaluation of various psychotherapies, including a method of assessing the conceptual consistency and validity of a given approach. Psychiatry

460. Theories of Personality. (1) F, W. Prerequisite: Resident standing in Department of Psychiatry or consent of instructor. Seminar 1 hour. E. Burke

Focus is on personality theories other than Freudian, such as Piaget, Skinner, and Rogers. Course includes an examination, study, and discussion of contemporary personality theories, their concepts, systematic application to the behavioral sciences, and research potentials. Parallel reading is required. Psychiatry

461. Occupational Mental Health. (1) W. Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Larsen

Course provides an introduction into the interpersonal dynamics, organizational constructs, cultural underpinnings, and sociodemographics associated with occupation and mental health. Psychiatry

462. Psychol Aspects Medication Usage. (1) F, W. Prerequisite: Consent of instructor. Seminar 1 hour. Nevins

Course explores the psychological implications of prescribing medications. Psychiatry

The theory of an individual outpatient psychotherapy is presented. The case in treatment is followed on a weekly basis. Psychiatry

464. Adult Continuous Case Conference. (1½) F, W. Sp. Prerequisite: Consent of instructor. Seminar 1½ hours. Course given at San Francisco Psychoanalytic Institute Library. Oremland

Seminar reviewing the literature pertinent to psychotherapy of the severely disturbed, predominantly borderline patient. A case will be presented and discussed. Psychiatry

465. Psychobiography & Creativity. (2-5) F, W. Sp. Prerequisite: Consent of instructor. Lecture 2-5 hours. Ostwald

Course emphasizes the effects of mental illness on the lives of artists, scientists, statesmen, and other public figures. Biographical, autobiographical, and clinical studies of exceptional people will be compared. Students will be encouraged to select individual subjects for research. Psychiatry

466. Behavioral Sciences Research. (1½) Su, F, W. Sp. Prerequisite: Consent of instructor. Lab 4½ hours. Callaway, Halliday and Staff

Course consists of supervised clinical and basic research in behavioral abnormalities, psychopathology, and experimental psychiatry. Specific subjects for research are chosen in conjunction with members of the staff. Psychiatry

467. Group Therapy Videotape Demo. (1) F, W. Sp. Prerequisite: Resident in Department of Psychiatry or consent of instructor. Seminar 1 hour. D. Farrell

Demonstration of group therapy to be viewed on videotape. Material viewed will serve as a focus for the discussion of theory and technique in group therapy. Psychiatry
481. Child Care Observation. (1) Su. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor. Field work 1 1/4 hours. Reecce, Metcalf

Participate and observe activities at UCSF Child Care/Study Center. Experiences are discussed with supervisor. Experience to be enlarged to include observations at elementary and junior high school. PSYCHIATRY

482. Growth & Development Seminar. (1) F, W, Sp. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor. Seminar 1 hour. Metcalf

Provides theoretical understanding of normal growth and development. Format is primarily presentations and group discussions. PSYCHIATRY

483. Principles of Therapeutic Meth. (1) F, W, Sp. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor. Seminar 1 hour. I. Phillips

Discussion of philosophy and practice of clinical work with patients. Includes history, principles, and methods of child psychiatry as well as all stages of child development and modalities of treatment. PSYCHIATRY

484. Family Therapy Seminar. (1) Sp. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor. Seminar 1 hour. Ponton

Discussion of theoretical issues and literature as well as review of clinical experience assigned to each trainee. Various modes and styles of family therapy are included. PSYCHIATRY

485. Psychopathology Literature Sem. (1) Su, F, W, Sp. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor. Seminar 1 hour. Binger and Staff

Extensive review of pertinent readings in child psychiatry. PSYCHIATRY

486. Devel Disabilities Seminar. (2) Su. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor. Seminar 2 hours. Flohr

Lectures focus on mental retardation, deafness, blindness, and cerebral palsy, with emphasis on the development, family, and social aspects. PSYCHIATRY

487. Continuous Case Seminar. (½) F, W, Sp. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor. Seminar ½ hour. Gelber

Course includes two cases per week—one inpatient and one outpatient. Participation with senior staff member and collaborating therapists to discuss ongoing dynamics of psychotherapeutic work. PSYCHIATRY

488. Child Psychiatry Clinical Conf. (1½) F, W, Sp. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor for others to receive credit. Conference 1½ hours. Sikorski

The Child and Adolescent Service has developed a continuing education program of distinguished speakers in the field of child psychiatry and related disciplines. Clinical problems and mini-courses are presented. PSYCHIATRY

489. Social/Legal Issues & Systems. (1) F, W, Sp. Prerequisite: Required for first-year child psychiatry fellows, or consent of instructor. Seminar 1 hour. Reecce

Covers major social policy questions, legal and social systems which have impact on child psychiatric practice and services. Field visits to community resources for children and adolescents including schools, courts, family service agencies and residential treatment centers. PSYCHIATRY

490. Child Development & Personality. (½) Su. Prerequisite: Required for second-year child psychiatry fellows, or consent of instructor. Friedlander, D. Morrison

Seminar is focused on the most common and prevalently used methods of assessing intelligence, perceptual-motor integration, and personality in children. Actual testing materials as well as supporting research are covered. Participation is required. PSYCHIATRY

Review of basics of experimental design and methodology such as reliability and validity of measuring techniques, statistical inference, control group designs, and pre- and post-test designs. Clinical research with children provides a focus for discussion of relevant issues. PSYCHIATRY

492. Ped Consultation Orientation. (1½) Su. Prerequisite: Required for second-year child psychiatry fellows, or consent of instructor. Seminar 1½ hours. Shatkin

Discussion of goals, attitudes, and skills required in child psychiatry consultation/liaison work. PSYCHIATRY

493. Pediatric Consultation Seminar. (1½) F Prerequisite: Required for second-year child psychiatry fellows, or consent of instructor. Seminar 1½ hours. Shatkin

Discussion of formal consultations of cases requested by the Pediatric Inpatient Service, Child Study Center, Family Medicine Clinic, etc. PSYCHIATRY

494. Com Consultation Literature Sem. (1) Su. Prerequisite: Required for second-year child psychiatry fellows, or consent of instructor. Seminar 1 hour. Reecce, Sikorski

Review of literature and discussions on community consultation. PSYCHIATRY

495. Continuous Case Seminar. (½) F, W, Sp. Prerequisite: Required for second-year
child psychiatry fellows, or consent of instructor. Seminar 1 1/2 hours. **Amini**

Joins with senior staff member and collaborating therapists to discuss ongoing dynamics of psychotherapeutic work. PSYCHIATRY

**496. Teaching & Supervision Seminar.** (1) Su, F, W, Sp. Prerequisite: Required for second-year child psychiatry fellows, or consent of instructor. Seminar 1 hour. **Philips**

Discussion of supervision of general psychiatry residents and medical students. PSYCHIATRY

**497. Adolescent Psychiatry.** (1) F, W, Sp. Prerequisite: Required for second-year child psychiatry fellows, or consent of instructor. Seminar 1 hour. **Binger and Staff**

Discussion of clinical problems of adolescents. PSYCHIATRY

**498. Play Therapy Seminar.** (3/4) F, W, Sp. Prerequisite: Required for second-year child psychiatry fellows, or consent of instructor. Seminar 3/4 hour. **Friedlander, Fishleder**

Theory and implementation of techniques of play therapy. History, principles, and case demonstration through videotape. PSYCHIATRY

**Psychology**

**170. Patient Compliance.** (2) § F: Lecture 2 hours. **Stone**

Patients' cooperation with health regimens contributes significantly to outcomes of health care. This course reviews factors that affect degree of compliance achieved and examines results of attempts to improve compliance. Stress is placed on tailoring methods to specific clinical circumstances. PSYCHIATRY

**170.01. Communication in Health Transactions.** (2) W. Prerequisite: Consent of instructor. Lecture 1 hour. Lab 3 hours. Enrollment limited. **Stone**

Lectures, readings, role-playing, and video replay will be used to teach social psychological influences on patients in health care. Focus on role of communication as joint problem-solving; specific skills of listening and speaking, awareness of nonverbal aspects of communication. PSYCHIATRY

**180.01. Seminar in Psychology.** (1) W. Seminar 1 hour. **Plainfield**

Weekly discussions in which students' clinical cases are analyzed by dynamic application of behavioral therapy. DENT PUB HETH

**180.02. Psychol Aspects of Treatment Plan.** (1) Sp. Seminar 1 hour. **Plainfield**

This course integrates students' basic training in dentistry with knowledge of the psychological considerations necessary to individualize treatment. Appropriate treatment may then be planned to the practitioners' awareness of the unique needs of patients. DENT PUB HETH

**180.03. Adv Psychol for Dental Hygiene.** (1) Sp. Seminar 1 hour. **Plainfield**

Seminar discussions on the emotional aspects of interpersonal transactions among office personnel, therapists, and patients. DENT PUB HETH

**180.05. Stress among Hlth Professionals.** (2) § Sp. Seminar 2 hours. **Garfield**

Course will focus on a theoretical understanding of the origins of job stress and the nature of burnout, and on practical and programmatic methods of reducing the stress overload incurred by physicians, nurses, and other health care professionals. PSYCHIATRY

**180.06. Clin Health Psych Seminar.** (1/2) § F, W, Sp. Prerequisite: Experience and/or course work in either research methods or clinical theory and intervention. Consent of instructor. Seminar 1 1/2 hours. **Temoshok**

Participants and invited guests will present their in-progress research ideas and proposals, data analyses, and/or manuscript drafts for critique. Relevant literature reports will also be discussed. PSYCHIATRY

**180.08. Brain-Behavior Research Methods.** (3) § W. Prerequisite: Survey of physiological psychology, or equivalent. Lecture 2 hours. Seminar 1 hour. Offered in alternate years. Not offered 1986-87. **Galvin and Staff**

An extensive survey of techniques and strategies emphasizing critical appreciation of principles and range of appropriateness rather than how to do it. Topics include clinical lesion studies, microscopic anatomy, neuroradiology, neurochemistry, psychopharmacology, autonomic psychophysiology, scalp electrophysiology, behavioral genetics, neuropsychological assessment. PSYCHIATRY

**180.09. Risk Factor Programs.** (2) § W. Seminar 2 hours. **Rugg**

Course critically reviews the major health promotion and risk factor intervention programs of the past two decades from a health psychology perspective. Provides an in-depth look at theoretical bases of these programs, methodological issues involved, and an evaluation of outcomes. PSYCHIATRY

**181.02. Cerebral Hemispheric Specializ.** (2) § Sp. Prerequisite: Background in neurophysiology, anatomy, cognitive psychology; intended for advanced students. Consent of instructor. Seminar 2 hours. Offered in alternate years. Offered 1986-87. **Galvin**

Group discussion of readings in seminar format of neuropsychology of hemispheric specialization for cognitive function, and integration of the two hemispheres; developmental, psychiatric, and educational implications; evaluation of data from study of brain lesions, electrophysiological recordings, and behavioral testing. PSYCHIATRY

**181.05. Changing Health Behaviors.** (2) § Sp. Seminar 2 hours. **Henderson, Rugg**

An overview of learning theory and the principles of behavior change. Clinical and
research examples of treatment approaches to obesity, smoking cessation, eating disorders, adherence to medical instructions, and other health behaviors. PSYCHIATRY

Consideration of psychological processes utilized under stress and of alternative constructive methods for coping, with practice in using these techniques. Course is designed to help students handle stress and apply such principles to management of patients. PSYCHIATRY

Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. PSYCHIATRY

200. Learning & Cognition. (4) § W. Prerequisite: Graduate standing in Health Psychology Program, or upper division courses in learning and cognitive psychology, and consent of instructor. Seminar 4 hours. Offered in alternate years. Not offered 1986-87.

G. Stone, Halliday, Pecke

Course provides a basis for continued reading of current research and theory in learning and cognition, and for designing interventions in health transactions based on readings; identifies and traces history of major issues and viewpoints. PSYCHIATRY

202A-B. Comptr Simulation of Hum Interact. (5-3) § W, Sp. Prerequisite: Psychology 257 or equivalent. Not offered 1985-86. Lecture 1 hour. Lab 6 hours. Starkweather

The development and testing of theoretical models of personality are explored by means of computer programs. Students program the computer for simulation and symbol manipulation. PSYCHIATRY

203. History & Systems in Psychology. (3) § F Seminar 3 hours. Rossi

The history of psychology will be surveyed within the context of an examination of the development and unique contributions of six theoretical systems that have developed since the founding of modern psychology: Structuralism, Functionalism, Associationism, Behaviorism, Gestalt Psychology, and Psychoanalysis. PSYCHIATRY

205. Child Development. (3) § Sp. Prerequisite: Consent of instructor. Lecture 3 hours. C. Lewis

Course will focus on major issues, theories, and findings in child development. Topics covered will include attachment; Piagetian and other theories of cognitive development; language development; moral development and pro-social behavior; aggression, and self-esteem and competence. PSYCHIATRY

F. Cohen

General and systematic issues in the study of personality; theoretical and methodological issues in the assessment of personality and in research on personality. PSYCHIATRY

211A-B. Theories of Personality. (2-2) § W, Sp. Prerequisite: Graduate standing and consent of instructor. Psychology 211A is prerequisite to 211B, but may be taken independently of 211B. Seminar 2 hours. Enrollment limited. J. Fisher

Survey of major contemporary theories of personality, including some more recent, selected philosophic points of view, study of their structure, how they conceptualize personality development, how they relate to empirical phenomena, and what research is generated by them. PSYCHIATRY

212. Psychological Stress & Coping. (4) § W. Prerequisite: Consent of instructor. Seminar 4 hours. Offered in alternate years. Offered 1986-87. F. Cohen

Course examines stress and coping theory and research from clinical, field, and laboratory settings; measures of stress; issues in stress research, the nature of coping and coping processes. PSYCHIATRY

213. Emotion Seminar. (1) § F, W, Sp. Prerequisite: Knowledge in at least one or two substantive areas such as social psychology, cognition, psychopathology, cultural anthropology. Seminar 2 hours biweekly. Ekman

Seminars will cover discussions of a variety of theories and research concerned with emotion, such as definitions; expression and behavior; physiological concomitants; relationships with cognition, consciousness, and culture; philosophical implications; and biopsychosocial applications. Guest speakers included. PSYCHIATRY

221. Prog Eval in Hlth & Human Serv. (2) § Sp. Prerequisite: Intended for graduate and professional students. Consent of instructor. Seminar 2 hours. Offered in alternate years. Not offered 1986-87. Attkisson

A seminar course designed to provide a basic overview of the organizational context of program evaluation; design and implementation of information systems; assessment of community needs; evaluation of program quality and effectiveness, and training of evaluators. PSYCHIATRY

222. Practicum in Program Evaluation. (2-4) § F, W, Sp. Prerequisite: Graduate standing and some experience in interviewing. Lab 3 hours. Seminar 6 hours during first 4-6 weeks.

Blackwell

After an intensive seminar introduction to basic concepts of evaluation, students will carry out various evaluations on clinical clerkships in the School of Medicine. The length of the introductory period will depend on previous experience of students. PSYCHIATRY
225. Teaching Methods. (3) § W. Seminar 3 hours. Gerbert

Course will introduce students to educational theory and practice through didactic and experiential activities. Topics covered include developing objectives, instructional design, lecture and small group facilitation as well as other methods of teaching, and student and course evaluations. PSYCHIATRY

226. Practicum in Teaching Methods. (3) § Sp. Prerequisite: Consent of instructor. Lab 3 hours. Seminar 2 hours. Gerbert

Offers supervised practicum experience in teaching methods. PSYCHIATRY

230. Physl Aspects of Hlth Psychol. (4) § E. Prerequisite: Graduate standing in Health Psychology Program or consent of instructor. Lecture 4 hours. Offered in alternate years. Offered 1986-87. Naifeh, Yingling

An overview of major organ systems of the human body stressing psychological impacts on their functioning and psychological consequences of abnormality. Course will prepare student for reading medical literature and interacting effectively with health professionals in planning research. PSYCHIATRY

231. Introduction to Biopsychology. (3) § E. Prerequisite: Basic courses in experimental psychology and consent of instructor. Lecture 3 hours. VanPecke, Naylor

Central nervous system mechanisms involved in sensory information processing and in the regulation of behavior will be emphasized. Elementary neurophysiology: anatomy and neurochemistry will be discussed as background material. PSYCHIATRY

232. Topics in Biological Psychology. (2) § Sp. Prerequisite: Physiological psychology; neurophysiology and neuroanatomy. Seminar 2 hours. Salamy, Halliday

A seminar course focusing on issues of current interest in biological psychology. Topics may include those such as brain electrical events, human neurodevelopment, cognitive processes. Individual presentations and discussion will be required. PSYCHIATRY

233A-B-C. Physiol/Biolog Psychopathol Sem. (1-1-1) § E; W; Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Callaway

An ongoing seminar devoted primarily to the research interests of the group studying human event related potentials. Course includes visiting scientists, as well as presentations by staff and postdoctoral fellows. PSYCHIATRY

234. Neurochem Basis of Abnor Psychol. (2) § F. Prerequisite: Consent of instructor. Ellman

Seminar and readings on subjects related to the neurochemical, neuropharmacological basis of CNS functions; cell physiology of the nervous system. PSYCHIATRY

235. Psychophysiology. (2) § W. Lecture 2 hours. Lab 1 hour. Kamiya

Survey of relationships between psychological and physiological processes during continuous monitoring of autonomic activity, as seen in biofeedback training, medical settings, and in the laboratory. Lectures, readings, demonstrations. PSYCHIATRY

236A-B-C. Human Neurophysiology. (1-1-1) § F; W; Sp. Prerequisite: Consent of instructor. Seminar 1 hour. Yingling

A journal clubs format seminar course which will examine the current literature in human EEG and evoked potentials, with emphasis on identification of cerebral sources. Students will make oral class presentations. PSYCHIATRY

237. Neurophysiological Mech of EEG. (3) § W. Prerequisite: At least one course in physiological psychology or neurobiology, or consent of instructor. Lecture 1 hour. Seminar 2 hours. Yingling

Course will examine the neuroanatomical and neurophysiological mechanisms underlying the generation and regulation of EEG and Event-related Potentials, their measurement and clinical uses. Emphasis on the nature and limitations of inferences concerning brain activity obtainable from scalp recordings. PSYCHIATRY

240. Social Psychology. (4) § F. Prerequisite: Consent of instructor. Lecture 4 hours. Offered in alternate years. Not offered 1986-87. N. Adler

A critical review of social psychological theory and research. Topics include role theory, attribution theory, group dynamics, interpersonal relations, social influence, decision-making, attitude formation and change, and the application of social psychology to problems of health and health care. PSYCHIATRY

248. Independent Study. (1-6) § F; W; Sp. Prerequisite: Consent of instructor. Staff

Independent study under the supervision of a member of the faculty. PSYCHIATRY

250. Research. (1-8) § F; W; Sp. Staff

PSYCHIATRY

254A. Research Methods. (4) § W. Prerequisite: Consent of instructor. Lecture 4 hours. Offered in alternate years. Not offered 1986-87. N. Adler

An overview of research strategies and their associated strengths and weaknesses; experimental and quasi-experimental designs, correlational approaches, interview techniques, survey and questionnaire construction, uses
Examination of empirical research and theoretical perspectives in certain problem areas within the health system where psychological knowledge is of direct relevance, such as information-processing in patient and physician, compliance, coping with the stress of illness. PSYCHIATRY

Stone

Processes of giving and gaining health services are viewed as multi-person problem situations to be resolved through communication. Participation in searching relevant literature for descriptions and analyses from which a systematic analytic framework can be developed. PSYCHIATRY

265. Stress & Bodily Disease. (4) § F. Prerequisite: Consent of instructor. Seminar 4 hours. Offered in alternate years. Offered 1986-87.

F. Cohen

Examination of the psychological and physiological models and empirical research linking stress and other psychological factors to the development of bodily disease. PSYCHIATRY

266. Reproductive Behavior. (3) § F. Prerequisite: Consent of instructor. Seminar 3 hours. Offered in alternate years. Offered 1986-87.

N. Adler

Examination of the role that psychological and social factors can play in variety of reproductive behaviors: pregnancy, obstetrical complications, postpartum reactions, infertility, contraceptive use and nonuse, spontaneous and induced abortion. PSYCHIATRY

267. Psychology of Pain. (2) § F. Seminar 2 hours. Course will not be offered for fewer than 5 students. Offered in alternate years. Offered 1986-87.

Pecceone

Overview of the psychology of pain and a systematic review of the literature from both clinical and laboratory work, with primary emphasis on the behavioral, cognitive, and motivational influences on pain. PSYCHIATRY

268. Beliefs, Behavior & Health. (3) § F. Prerequisite: Graduate status in a social or behavioral science program or consent of instructor. Seminar 3 hours. Offered in alternate years. Offered 1986-87.

Stone

Investigates the relationships between beliefs, attitudes, and mental representations concerning health and illness, the behavior of the individual with regard to hazards, health precautions, health care utilization, and adherence to medical regimens, and the health status of the individual. PSYCHIATRY

270A-B. Commun Skills in Health Trans. (2-2) § W. Prerequisite: Graduate standing in Health Psychology Program, or consent of instructor. Lecture 1 hour. Lab 3 hours. Offered in alternate years. Offered 1986-87.

Stone, Gerbert

A two-part course that teaches a number of skills involved in face-to-face interactions and prepares the student to do research on communication, and to teach the skills to others. PSYCHIATRY

281A-B-C-D. Clinical Research Seminar. (1½-1½-1½-1½) § Su, F, W. Prerequisite: Consent of instructor. Seminar 1½ hours.

Attkisson
Radiation Oncology

140.01. Radiation Oncology Clerkship—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. J. Leibel

Participation in examination of cancer patients under treatment in radiation oncology. Students participate in rounds, conferences and clinics, and see demonstrations on the use of newer radiotherapeutic techniques. RADIOLOGY

140.03. Radiation Oncology Clerkship—UCB. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. J. Castro

Participation in examination of cancer patients under treatment in radiation oncology. Students participate in rounds, conferences, and clinics, and see demonstrations on the use of newer radiotherapeutic techniques. RADIOLOGY

140.06. Radiation Oncology Clerkship—MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. J. Castro

Participation in examination of cancer patients under treatment in the Claire Zellerbach Saroni Tumor Institute at MZ. Students participate in rounds, conferences, and clinics, and see demonstrations on the use of newer radiotherapeutic techniques. RADIOLOGY

150.01. Research Selective. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. L. Dewey

Individual research in radiation oncology by arrangement with the chairperson of the department. Students work under close supervision of a member of the staff. RADIOLOGY

Round presentations of problem cases with discussions of diagnosis and treatment as well as biologic implications. Frequent guest lectures are used to cover important aspects of oncology. RADIOLOGY

Seminars include discussion of the diagnosis, treatment, and results of specialty oncology problems, including head and neck, gynecologic, otolaryngologic, pediatric, dermatologic, lymphomatous, and general malignancies. RADIOLOGY

Study of principles of radiobiology and their application to radiotherapy. Seminars deal in depth with textbooks, selected readings and prepared seminars leading to understanding of mechanisms of action of radiation in clinical radiotherapy. Oriented to radiotherapy fellows and residents. RADIOLOGY

423. Therapeutic Treatment Planning. (10) Su, F, W, Sp. Prerequisite: Residents assigned to therapeutic radiology. One-month workshop course. L. Ling

A workshop course to provide residents in therapeutic radiology with the elements of treatment planning and dose calculations. RADIOLOGY

A lecture-seminar course with practical sessions to provide the resident with a basic knowledge of radiological physics with special reference to those aspects relating to therapeutic radiology. RADIOLOGY

Residents, under supervision, are responsible for diagnosis, treatment, and follow-up of patients referred to radiation therapy from the wards and outpatient clinics. Radiation therapy rounds include discussion of newly referred patients; chart rounds include the
discussion of patients under treatment. RADIOLOGY

Radiology

100. Intro to Clinical Radiology. (2) F, W, Sp. Prerequisite: Anatomy 100 and 103, Medicine 130, Pathology 102, and Psychiatry 130; concurrent enrollment in Medicine 131A-B-C. Lecture 1 hour. Lab 1 hour. S. Ross

Course provides instruction in basic aspects of therapeutic and diagnostic radiology and nuclear medicine. Illustration of diagnostic and therapeutic modalities in specific disease states provides instruction in use of radiologic resources. RADIOLOGY

140.01. Advanced Roentgen Diagnosis. (1½ per week) Su, F. Prerequisite: Radiology 140.15. Consent of instructor. Margulis, S. Ross

Advanced clinical clerkship for students interested in a career in academic radiology. Students observe clinical work, observe or participate in research, and write a term paper. RADIOLOGY

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. Margulis

Clinical clerkship in approved hospital by special arrangement and approval of the chairperson of the department and the dean. RADIOLOGY

140.04. Nuclear Medicine. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. Hattner

Observation of basic nuclear medicine procedures and participation in diagnostic tests employing radiisotopic tracers. RADIOLOGY

140.05. Diagnostic Radiology—MZ. (1½ per week) Su, F, W, Sp. Prerequisite: Third- or fourth-year standing. A. Davidson

Rotation through each service in the Department of Radiology on a scheduled basis; participation in film interpretation with residents and faculty, and attendance at daily conferences; tutorials available with members of the faculty; role of radiology in clinical management emphasized. RADIOLOGY

140.08. Cardiovascular Radiology. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. Carlson

Cardiovascular radiology provides an opportunity to become acquainted with the radiologic studies of the cardiovascular system through active participation in the examinations and their interpretation. RADIOLOGY

140.09. Diagnostic Radiology—SFCH. (1½ per week) Su, F, W, Sp. Prerequisite: Fourth-year standing or consent of instructor. Minagi

Students serve a clerkship in the Diagnostic Section of the Department of Radiology. They observe performance of radiologic procedures and interpretation of films, attend conferences, and learn basic philosophy of conducting radiologic examinations and the basic rules of interpretation. RADIOLOGY

140.13. Radiology & Medical Diagnosis. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 131A-B-C. S. Ross, Margulis

A clerkship for third-year students to help acquire knowledge and attitudes that ease transition from preclinical studies to clinical medicine. Radiographs with case presentations are used to help learn mechanisms of disease and clinical judgment. RADIOLOGY

Acquaints students with available techniques in diagnostic radiology, including nuclear medicine, ultrasound, computed tomographic scanning, angiography, other special procedures, conventional X-ray examination, fluoroscopy, and provides an introduction to "routine" film interpretation. Students have assignments at VAF, VMC, community hospitals. RADIOLOGY

Clerkship in radiology for fourth-year students. Observation of procedures, review of pathology, pathophysiology, diagnosis, and natural history of selected diseases through study of roentgenograms with case histories. Potential and limitations of radiologic method included. RADIOLOGY

Imaging techniques including nuclear cardiology, single photon emission tomography, and computerized processing at St. Agnes Medical Center, Fresno. RADIOLOGY

140.17. Clinical Radiology. (1½ per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Wall

Students may be involved in clinical diagnostic procedures such as body and neuro computed tomography, ultrasound, fluoroscopy, chest, bone, and interventional radiography, with concentration on any one of these areas. Clinical or research projects may be undertaken with permission of the instructor. RADIOLOGY

150.01. Research in Radiology. (1-1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 and approval of instructor. For students seriously interested in a career in academic medicine. Margulis, L. Kaufman, S. Ross

A research project under the direction of a member of the faculty. RADIOLOGY

Course demonstrates anatomy in the living through the use of radiographs. Objectives are to show the usefulness of knowing anatomy, to begin acquiring a medical vocabulary, the elements of clinical thinking, and useful habits in learning. For freshman "Blue" group.

A lecture course limited to small groups, with active participation on selected aspects of pathological anatomy and its usefulness in understanding disease, its origins, developments and clinical manifestations. For sophomores. RADIOLOGY

Course demonstrates anatomy in the living through the use of radiographs. Objectives are to show the usefulness of knowing anatomy, to begin acquiring a medical vocabulary, the elements of clinical thinking, and useful habits in learning. For freshman "Gold" group.

170.08. Nuclear Medicine Physics. (3½) Su. Prerequisite: Given concurrently with Radiology 170.09. Lecture 4 hours a week for 6 weeks. Independent study 10 hours. Perez-Mendez

Introduction to the physics of radioactivity, nuclear instrumentation and gamma-ray imaging techniques. RADIOLOGY

Introduction to basic nuclear medicine diagnostic procedures, both in vivo and in vitro, and therapy with radiopharmaceuticals.

Weekly seminar covering the radiologic studies of surgical cases emphasizing indications, risks, and information derived from procedures. Active participation in X-ray interpretation is included.

170.11. Emergency Radiology. (1) Su. Lecture 1 hour. Minagi

An elective course for fourth-year medical students. Consideration of the role of the radiologist as a consultant in the emergency room. Topics covered include head injuries, fractures, dislocations, chest, abdominal, and genito-urinary trauma, and management of contrast reactions.

Margulis and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department.

Margulis and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department.

220. Radiol Physics for Physicists. (2) § F, W, Sp. Prerequisite: Bachelor's or higher degree in the physical sciences.
Margulis and Staff

Seminars provide physicists with an indepth knowledge of radiological physics.

Faculty from radiology and other departments lecture and discuss various diseases of all systems of the body. Residents prepare case histories stressing roentgen findings and correlative surgical and laboratory work, special studies, library, and film research.

Margulis, Gooding

Films of interesting cases from the daily work are presented and reviewed. Roentgenograms of surgically and pathologically proved cases are correlated with the gross and microscopic pathologic findings.

Margulis

Seminars require preparation and presentation of roentgen findings on patients under discussion at medical, surgical, pediatric, obstetric and gynecologic departmental conferences and seminars on congenital heart disease, disease of the gastrointestinal tract, and orthopaedics.

403. Emergency Radiology. (1) F, W. Prerequisite: Required for first-year residents in radiology. Lecture 1 hour. Minagi

Role of radiologist as consultant in the emergency room; head injuries, fractures, dislocations, chest trauma, blunt and penetrating abdominal trauma, trauma to genito-urinary system; management of contrast reactions; indications for, conduction of, interpretation of special radiologic procedures.

Margulis

Numerous research projects are conducted in the department and facilities are available for new ones. Residents are encouraged to take advantage of these opportunities.

Coulson

Interdepartmental seminars in which the radiological picture of problem cases either of diagnostic or therapeutic nature is pre-
sented. This course includes surgical and medical radiological rounds, consultative tumor board, clinicopathological conferences, and other department grand rounds. RADIOLOGY

409. Radiology Specialty Seminar—VA (3)
Su, F, W, Sp. Seminar 3 hours. Akin

Interdepartmental seminars in which the radiological picture of problem cases either of diagnostic or therapeutic nature is presented. These include medical-surgical, clinicopathological, chest, medical X-ray, rheumatology, neurology, and neurological surgery conferences; consultative tumor board; and surgical and orthopaedic grand rounds. RADIOLOGY

(2) W. Prerequisite: Consent of instructor. Lecture 2 hours. S. Wolff

Concepts and mathematics of target theory related to damage of genetic apparatus. Biophysical and biochemical studies on induction of intragenic and intergenic mutations that give insight into the structure of chromosomes and interaction of radiation with biological material. RADIOLOGY

VA Hinchcliffe

Course includes review of surgical pathology material and attendance at autopsy rounds. RADIOLOGY

414. Physics of Diagnostic Radiology. (2)
W, Sp. Lecture 1½ hours. Lab 2 hours. R. Gould

Course is designed to acquaint residents with the physical principles of diagnostic radiology. Topics include generation and extraction of radiologic information, image conversion, recording methods, and special-purpose equipment. CT and ultrasound physics are discussed. RADIOLOGY

419. Growth Kinetics—Cells & Tumors.
(2) Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Cleaver, Patt

An analysis of cell population growth in tissues, tumors, and cultures. Emphasis is given to radioactive tracers such as thymidine and its biochemistry, and experimental methods for studying cell proliferation in vitro and in vitro. RADIOLOGY

Hattner and Staff

Rotating assignments of topics for discussion by residents in nuclear medicine training programs in all affiliated hospitals. Critical reviews of available information in limited areas are used to provide a broad view of nuclear medicine for all trainees. RADIOLOGY

Hattner and Staff

Clinical experience in diagnostic and therapeutic nuclear medicine to satisfy requirements of American Board of Radiology for certification in diagnostic radiology and radiation therapy. RADIOLOGY

Residents, under supervision, carry out radiological examination and interpretation of X rays of patients referred from wards and outpatient clinics. The chief resident has certain administrative duties relative to the resident training program. RADIOLOGY

Residents, under supervision, are responsible for the diagnostic activities of the department, including diagnostic consultations and reports, history-taking, and physical examinations. In addition, the chief resident has certain administrative duties relative to the resident training program. RADIOLOGY

Residents are responsible for the diagnostic activities of the department under the direction of staff radiologists including diagnostic consultations and reports, history-taking, and physical examinations. RADIOLOGY

Removable Prosthodontics

400. Approaches to Maxofac Prosthod.
(1) F, W, Sp. Lecture 1 hour. Zlotolow

Course is designed to acquaint residents with multidisciplinary aspects of maxillofacial prosthetics. Lectures will be given on maxillofacial prosthetic techniques, oncology, head and neck surgery, plastic surgery; oral surgery, therapeutic radiology, psychology and related oral biology. RESTOR DENT

489.01. Clinical Maxillofacial Prosthod.
(1-6) F, W, Sp. Lab variable. Zlotolow

Residents and advanced prosthodontic students will observe and perform maxillofacial prosthodontic services for patients in the Maxillofacial Clinic. A detailed case history will be required each quarter. Attendance at related tumor board conferences and field trips to other therapy centers. RESTOR DENT

Restorative Dentistry

110A. Intro to Restorative Dentistry. (1½)
F. Prerequisite: Concurrent enrollment in Restorative Dentistry 115A. Lecture 1½ hours. Jendresen, Tueller, D. Graham

An introductory lecture course including tooth morphology, development and form of primary and permanent dentition, and theory of cavity design and preparation. RESTOR DENT

110B. Intro to Restorative Dentistry. (3)
W. Prerequisite: Restorative Dentistry 110A. Concurrent enrollment in Restorative Dentistry 115B. Jendresen, Tueller, Lacy, Traweek
Continuation of Restorative Dentistry 110A, including application of individual tooth and arch forms to interarch relationships; physics, chemistry, metallurgy of dental materials; and clinical procedures in complete denture prosthodontics. RESTOR DENT

Continuation of Restorative Dentistry 115B, including physical and chemical responses to dental materials, principles involved in preparation, design, articulation, mounting, waxing, casting techniques for fixed prosthetics; and biological and clinical application of techniques used in complete denture prosthodontics. RESTOR DENT

116B-C. Primary Clinical Care. (0-3) W, Sp. Lecture 1 hour. Clinic 3 hours. Jendresen, Braly, Eakle

Introduction to clinical dentistry: studies perform a comprehensive baseline examination of the oral cavity and evaluation of the patient's health status. Students are exposed to local anesthesia, rubber dam application, making and mounting diagnostic casts, and chairside assisting. RESTOR DENT

120A. Restorative Dentistry Theory. (4) F. Prerequisite: Restorative Dentistry 110C and 115C. Concurrent enrollment in Restorative Dentistry 120A. Lab 18 hours. Jendresen, Kahl, Holmes, Graham

Laboratory instruction in the discipline of fixed prosthodontics, operative dentistry, and removable prosthodontics. Topics include instruction in basic bridge construction, ceramic-metal restorations, cast gold restorations, and partial denture construction. RESTOR DENT

125B. Restorative Dental Techniques. (0-1) W. Prerequisite: Restorative Dentistry 125A. Concurrent enrollment in Restorative Dentistry 125B. Lab 15 hours. Jendresen, Rosenberg, Lacy, T. Wood

Continuation of laboratory instruction in the discipline of endodontics, fixed and removable prosthodontics. Techniques include laboratory procedures involved in root canal therapy, instruction in ceramic-metal restoration, and fabrication of immediate dentures. RESTOR DENT
125C. Restorative Dental Techniques. (4)
Sp. Prerequisite: Restorative Dentistry 125B.
Concurrent enrollment in Restorative Dentistry 120C. Lab 12 hours. **Jendresen, Muncheryan, D. Graham**

Continuation of laboratory instruction in the disciplines of operative dentistry and removable prosthodontics. Techniques include restoration with condensed gold foil and fabrication of a complete denture. RESTOR DENT

126A-B-C. Comprehensive Clinical Care. (0-3) F, W, Sp. Clinic 3 hours. **Jendresen, Braly, E. Maxwell**

Thirty hours per quarter of clinic in comprehensive case workup of dental patients. Includes case history, clinical examination, diagnosis, and treatment planning to meet the patient's total dental needs. RESTOR DENT

130.01. Clin Application of Techniques. (1) SS. Prerequisite: Restorative Dentistry 120C and 125C. Lecture 2 hours. **Jendresen, Braly**

Introduction to work in the clinic. Emphasis is on application of techniques taught in the laboratories. Topics include diagnosis, occlusion, tooth preparation, and temporization. RESTOR DENT

130.02. Clin Application of Techniques. (5) F. Prerequisite: Restorative Dentistry 130.01. Concurrent enrollment in Restorative Dentistry 120. Lecture 5 hours. **Jendresen, Rosenberg, Tueller, Braly, A. Green, Lacy**

Continuation of Restorative Dentistry 130.01, with emphasis on clinical application of restorative techniques. Topics include diagnosis and treatment of pulp disease, tooth preparation and impression materials, diagnosis and treatment of dental emergencies, and treatment planning for the edentulous patient. RESTOR DENT

130.03. Clin Application of Techniques. (3) W. Prerequisite: Restorative Dentistry

Concurrent enrollment in Restorative Dentistry 109. Lecture 3 hours. **Jendresen, Tueller, Braly, Finzen**

Continuation of Restorative Dentistry 130.02, with emphasis on clinical application of restorative techniques. Topics include temporary restorations and occlusal therapies, rationale of cutting techniques and pulp response to restorative treatment, and treatment planning for removable partial dentures. RESTOR DENT

Concluding lectures on clinical application of restorative techniques. Topics include understanding why clinical failures occur with selected materials; biological responses to dental materials; pulp necrosis; pulpal response to treatment; and prosthetic treatment of patients with congenital or acquired malformations. RESTOR DENT

136. Clinical Oral Diagnosis. (2) S, F, W. Sp. Prerequisite: Completion of all second-year requirements in Restorative Dentistry. Must be taken concurrently with Restorative 139. Clinic variable **Braly**

Individual clinical instruction in primary care, and oral diagnosis and treatment planning. Student must present a clinical case in seminar. RESTOR DENT

139. Clinical Restorative Dentistry. (0-18½) F, W, Sp. Prerequisite: Successful completion of Restorative Dentistry 139 and all third-year qualifying examinations. **Jendresen, Braly, Holmes, Rosenberg, Tueller**

Clinical instruction and practice in the disciplines of Endodontics, Fixed Prosthodontics, Operative & Primary Care, and Removable Prosthetics for fourth-year students at the UCSF Community Dental Clinics at SF General Hospital and Buchanan Street. Students will prepare written documentation of their most challenging case during their Community Clinic service. RESTOR DENT

149. Clinical Restorative Dentistry. (0-18½) F, W, Sp. Prerequisite: Second-year qualifying examinations in the Department of Restorative Dentistry and be third-year student in good standing. Concurrent enrollment in Restorative Dentistry 130.01, 130.02, 130.03 and 130.04. Clinic variable. **Jendresen, Braly, Holmes, Rosenberg, Tueller**

Clinical instruction and practice in the disciplines of endodontics, fixed prosthodontics, operative and primary care, and removable prosthodontics. Course is graded after student passes qualifying examinations at the end of Spring quarter, fourth year. RESTOR DENT

Current and past prosthodontic literature will be studied and discussed. Students will learn to distinguish between appropriate, controversial, and inappropriate prosthodontics literature. RESTOR DENT

**T. Curtis, Radke**

A treatment plan will be discussed and developed for each patient after all diagnostic aids have been gathered. Students will be responsible for establishing an initial treatment plan prior to the seminar and for justifying it before the group. RESTOR DENT

**T. Curtis, Radke**

Staff and program consultants will present lectures on various aspects of fixed and removable prosthodontics and related subjects on a graduate level. RESTOR DENT

**173. Temporomandibular Joint Disease.** (1) F. Prerequisite: D.D.S. degree. With consent of instructor, fourth-year students may take this course as an elective. Seminar 1 hour.

**McNeill**

Seminar series covering differential diagnostic techniques and treatment approach to temporomandibular joint disease. RESTOR DENT

**M. Wilkins**

Course will emphasize the dietary requirements for the geriatric prosthodontic patient. A dietary analysis of the student and a prosthodontic patient currently under treatment will be required. RESTOR DENT

**175. Biomaterials Science.** (2) W. Sp. Prerequisite: D.D.S. degree. Open to dental residents, postdoctoral and postgraduate students only.

**Jendresen**

Course covers biomaterials science as applied to clinical restorative dentistry with emphasis on restorative material selection and use, based on acceptable physical and biological properties. Current research and new restorative materials will be discussed. RESTOR DENT

**McNeill**

Allows residents to finish their training with a basic ability to recognize, diagnose, and treat craniofacial pain and TMJ dysfunction in an interdisciplinary environment. The treatment team will include medical and dental specialties. RESTOR DENT

**T. Curtis**

Various types of removable prostheses will be fabricated using different techniques and treatment philosophies. RESTOR DENT

**Noble**

Fixed prosthodontics clinical procedures will be performed using a variety of treatment philosophies and articulating instruments. RESTOR DENT

**179.03. Temporomandibular Joint Clinic.** (0-2) S, F, W, Sp. Prerequisite: D.D.S. degree. With consent of instructor, fourth-year students may take this course as an elective. Due to patient commitments in the clinic, students, once selected, may not withdraw. Clinic 10-20 weeks.

**McNeill**

Participation in the Temporomandibular Joint Clinic applying knowledge of history-taking and differential diagnosis and utilizing such diagnostic techniques. RESTOR DENT

**Lacy and Staff**

Students will observe, assist, and deliver restorative dental care under the preceptorship of full-time faculty within the Faculty Dental Service. Participation includes diagnosis, treatment planning, emergency, routine and advanced restorative procedures. RESTOR DENT

**180.01. Survey of Dental Materials.** (1) Sp. Lecture 1 hour.

**Jendresen**

A survey of current research in the dental materials field, including evaluation of recently introduced materials and a review of the limitations and indications for all basic materials commonly used. RESTOR DENT

**180.03. Oral Rehabilitation.** (1) W. Seminar 1 hour.

**Radke**

The field of fixed prosthodontics and its relationship to other dental disciplines will be explored by means of case presentations to provide the student with a broad base of experience in oral rehabilitation techniques. RESTOR DENT

**180.04. Advanced Operative Theory.** (1) F. Prerequisite: Completion of Restorative Dentistry 150.04. Lecture 1 hour.

**Birtill**

Lectures and televised demonstrations covering quadrant dentistry, washed field techniques, complex restorations, analysis of
related research, and clinical applications of the various restorative procedures. RESTOR DENT

180.05. Prosthodontic Procedures. (1) W. Sp. Lecture 1 hour. Brigante
An elective course offering instruction in procedures and materials other than those normally used in the clinic. RESTOR DENT.

181.01. Cosmetic Dentistry. (1) F. W. Prerequisite: Consent of instructor. Lecture 1 hour. Lacy
Review of a variety of materials and techniques related to the delivery of cosmetic or esthetic dentistry. New materials and procedures in both operative dentistry and fixed prosthodontics are emphasized. RESTOR DENT

181.02. Advanced Endodontics Concepts. (1) W. Lecture 1 hour. Rosenberg
Diagnosis, case selection, and management of pain and infection in endodontically-involved teeth; advanced techniques for treating difficult root canal system anatomy; refinements in obturation of the root canal system. RESTOR DENT

181.03. Fixed Pros Selected Topics. (1) Sp. Enrollment limited. Seminar 1 hour. Lum
Individual staff members will offer seminar-type instruction on selected topics related to fixed prosthodontics. RESTOR DENT

181.04. Advanced Operative Theory. (1) W. Prerequisite: Restorative Dentistry 180.04 (formerly Operative Dentistry 180). Lecture 1 hour. Birtcil
Continuation of Restorative Dentistry 180.04. Organization of the material is planned in relationship to progress of students enrolling in the 180 series. RESTOR DENT

182.05. Advanced Partial Denture Design. (1) Sp. Prerequisite: Completion of three removable partial dentures. Lecture 1 hour. Seminar 1 hour. Krol
Seminar to discuss and determine the reasons clinical cases failed and to recommend new treatment or designs for removable partial dentures. Emphasis will be on understanding design principles of routine situations, but unusual cases may be used to depict specific problems. RESTOR DENT

183.03. Special Occlusion Problems. (1) W. Prerequisite: Consent of instructor. Lecture 1 hour. Pavone
Course covers the diagnosis and treatment of occlusal disorders of the adult dentition. The etiology of functional disturbances, analysis of occlusal relationships of the opposing arches, and a rationale for therapy will be presented and discussed. RESTOR DENT

183.05. Advanced Complete Prosthodontics. (1) F. Prerequisite: Fourth-year standing. Limited to 10 students. Seminar 1 hour. Finzen, Meyer
Seminar to discuss concepts of complete denture fabrication and maintenance reviewing the rationale for procedures normally used in the clinic, and the selection of the appropriate alternate procedures where indicated. RESTOR DENT

186.04. Restorative Materials Procedures. (1) F. W. Sp. Prerequisite: Open to fourth-year students with the approval of the chairman of the division. Enrollment limited. Clinic 3 hours. Birtcil
Techniques and procedures for Class III restorations, using the conservative approach, as well as wedge and matrix. Work will also be done on Class V direct gold restorations. Students learn to use various materials such as fibrous gold, gold and electroloy. RESTOR DENT

Advanced instruction in the field of clinical operative dentistry, utilizing procedures such as quadrants and plastics. RESTOR DENT

188.02. Advanced Clinical Endodontics. (0-4) Sp. Prerequisite: Fourth-year standing. Clinic variable. Rosenberg
Advanced instruction in the field of clinical endodontics. RESTOR DENT

189. Clinical Restorative Dentistry. (0-50) F. W. Sp. Prerequisite: All previous courses in Restorative Dentistry curriculum sequence. Clinic variable. Jendresen, Rosenberg, Tueller, Braly, Holmes
Continuation of clinical experience at the level of Restorative Dentistry 149. RESTOR DENT

189.02. Undergrad Clinical Endodontics. (0-16/2) F. W. Sp. Prerequisite: Fourth-year standing and completion of majority of graduation requirements. Clinic 5½ hours for 5 weeks. Rosenberg
An endodontic clerkship offering advanced senior students the opportunity to gain an in-depth experience in diagnosis, emergency care, and all phases of non-surgical and surgical endodontics, as well as the related endodontic-pedodontic-periodontic problems. RESTOR DENT

189.04. Clinical Operative Dentistry. (1-4) Su. F. W. Sp. Prerequisite: Fourth-year standing and approval of the Clinic Review
Committee. Clinic 30 hours. Minimum 1 week, maximum 4 weeks. 

**Braly**

Students participate in the delivery of restorative dental care in various extramural sites under the direct supervision of members of the faculty. RESTOR DENT

**199.01. Biomaterials Laboratory Project.**
(1-5) F, W, Sp. Prerequisite: Consent of instructor and approval of the chairperson of the department. Lab 3-15 hours. **Lacy**

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

**199.02. Endodontics Laboratory Project.**
(1-5) SS1, F, W, Sp. Prerequisite: Consent of instructor and approval of the chairperson of the department. Lab 3-15 hours. **Rosenberg**

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

**199.03. Fixed Pros Laboratory Project.**
(1-5) F, W, Sp. Prerequisite: Consent of instructor and approval of the chairperson of the department. Lab 3-15 hours. **Teuller**

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

**199.04. Oper Dent Laboratory Project.**
(1-5) F, W, Sp. Prerequisite: Consent of instructor and approval of the chairperson of the department. Lab 3-15 hours. **Adams**

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

**199.05. Remov Pros Laboratory Project.**
(1-5) F, W, Sp. Prerequisite: Consent of instructor and approval of the chairperson of the department. Lab 3-15 hours. **Holmes**

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. RESTOR DENT

**Sociology**

**126. Families of the Third World.**
(3) § F, W, Sp. Lecture 2 hours. Lab 3 hours. **Staples**

Course provides examination of family structures and dynamics among Third World peoples. Families to be discussed include Africans and Afro-Americans, Asians, Native Americans and Latinos. Emphasis on continuities in the family life of these groups in their native land and in the United States. SOC BEH SC

**130. Sociocultural Variations in Hlth.**
(3) § W. Lecture 3 hours. **Hazan**

Course addresses socio-cultural variations in health with implications for nursing practice. SOC BEH SC

**134. Women’s Roles in Health Care.**
(3) § F, W or Sp. Lecture 3 hours. **Olesen**

Course analyzes sex roles in general and women’s roles in particular in health care receipt and delivery, with special emphasis on recruitment problems to health professions, images of women in therapeutic situations, and cross-cultural features of health care. SOC BEH SC

**136. Aspects of Pain.**
(3) § Sp. Lecture 2 hours. Lab 3 hours. **Eggerhaugh**

Course provides for discussion of pain experiences as expressed and managed in a variety of settings by patients, staff, and family. Sociological and organizational perspectives on assessing, legitimizing, and controlling pain are also discussed. SOC BEH SC

**138. Soc of Change in Hlth Care Systems.**
(3) § W. Prerequisite: Open to upper division and graduate students. Lecture 3 hours. **Staff**

Course reviews social change in health care systems with particular attention to implications of change at all system levels such as patients, alternative curing practices, policies, new occupations, types of future care. SOC BEH SC

**140. Introduction to Sex Roles.**
(3) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. **Lewin**

Course examines of current theories about biological and evolutionary bases of gender stratification systems; their universal features and range of variation they exhibit. Interfaces between gender roles and economic, political, religious, and social organizational aspects of U.S. and other cultures are explored. SOC BEH SC

**160. Policy & Politics of Health.**
(3) § F. Lecture 3 hours. **Estes**

Course addresses the organization of health care and its politics, with emphasis on both United States and international health issues. SOC BEH SC

**198. Supervised Study.**
(1-5) § F, W, Sp. **Staff**

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. SOC BEH SC

**203. Chronic Illness.**
(3) § F, W. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. **Strauss**

Course provides discussion of problems faced by chronically ill persons and their families including crisis management, handling symptoms, managing regimens, social isolation, phases of the disease, temporal difficulties, normalization, dying. Some policy issues, including those concerning health care personnel as well as the general public. SOC BEH SC
204. Sociology of Psychiatry. (3) § W. Sp. Lecture 3 hours. Schatzman

Course covers psychiatric practices, professional careers, and institutions conceptualized sociologically as historic, symbolic systems and interactional processes. SOC BEH SC

205. Soc of Hlth Profess & Occup. (4) § F. Seminar 4 hours. Strauss

Course examines the nature of occupations and profession; their constellation in hospitals and clinics, the medical division of labor, specialties and specialization, professional and occupational ideologies, the sociology of work relationships, careers. Seminar engages in preliminary research into these topics. SOC BEH SC

207. Sociology of Health & Medicine. (4) § Sp. Prerequisite: Doctoral standing in the graduate program in Sociology: Seminar 4 hours. Estes

Course introduces the student to classical perspectives in medical sociology and development of a critical perspective in the field to serve as a foundation for independent and advanced study in medical sociology. SOC BEH SC

208. Social Psychol of Hlth & Illness. (3) § F. Prerequisite: Required for graduate students in sociology. Lecture 2 hours. Lab 3 hours. Olesen

Course covers the relationship of social class, ethnic identification, group membership, family structure, occupation and lifestyle to health and illness, and therapeutic interaction of laymen and health professionals. SOC BEH SC

209. Sociology of Power. (2-4) § F. W. Sp. Prerequisite: Advanced standing and consent of instructor. Lecture 2-4 hours. Estes

Course surveys the classical and contemporary sociological issues in theoretical and empirical work on power; exploration of underlying assumptions and paradigms emerging and reflecting a sociopolitical milieu; students become familiar with literature and debates on power structure research and theory. SOC BEH SC

212A. Sociological Theory. (4) § F. W. Lecture 2 hours. Lab 6 hours. Strauss

Course provides an examination and evaluation of classical and recent contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SC

212B. Sociology Theory. (4) § Sp. Lecture 4 hours. Staff

Course examines and evaluates classical and recent contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SC

213. Participant Observation Studies. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. Schatzman

A basic course in the logic and operations of social research in the field. Lectures, readings, and discussion on research strategies; entry, watching, listening, data recording, and analyzing. SOC BEH SC

214A. Field Research. (3) § F. Sp. Prerequisite: Doctoral level. Lecture 2 hours. Lab 3 hours. Staff

Course offers sociological perspectives on the dimensions and properties of research in natural social settings. Focus upon developing skills in negotiating entry, in watching, listening, and in recording of data; emphasis upon developing conceptual schemata in preparation for analysis. SOC BEH SC

214B. Quantitative Analysis. (3) § W. Prerequisite: Doctoral level. Sociology 214A. Lecture 2 hours. Lab 3 hours. Schatzman

Course examines modes of analysis applicable to qualitative data; emphasis on dimensions and properties exhibited in student-presented data. SOC BEH SC

214C. Qualitative Analysis. (3) § F. W. Sp. Prerequisite: Doctoral level. Sociology 214A and 214B. Lecture 2 hours. Lab 3 hours. Strauss

Course provides qualitative analysis and the development of substantive and formal sociological theory. Emphasis is on student-presented data and their conceptualization. SOC BEH SC

215. Organizational Research. (2-4) § F. W. Sp. Prerequisite: Sociology 216 or concurrently. Lab 3-9 hours. Conference 1 hour. Lurie

Course will place students in organizations to provide opportunities to conduct research; apply and develop organizational theory; develop applied sociological, practical, and administrative skills and experience for students. SOC BEH SC

216. Comparative Organizations. (3) § F. Prerequisite: Consent of instructor. Lecture 3 hours. Staff

A critical review of classical and recent contributions to the sociology of formal organizations. A variety of types of organizations will be considered, with special emphasis on service organizations. SOC BEH SC

217. Future of the Family Seminar. (3) § F. W. Sp. Lecture 3 hours. Lab 3 hours. Staples

Course explores changing dating, sexual, sex-role, marital, and familial patterns in the United States. Discussion of futuristic models of family life as affected by sociocultural forces. Special emphasis given to changing sex-role behavior as affecting male-female relationships. SOC BEH SC

218. Advanced Topics in Socio Analysis Aging. (2-4) § F. W. Sp. Prerequisite: Consent of instructor. Lecture 2-4 hours. Estes
The topics to be analyzed will vary each year with the instructor, but will be focused upon a specific area. SOC BEH SC.

219. Social Policy & Aging. (2-4) § W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. 

Estes  
Course will provide a critical analysis of major social, economic and political issues of growing old in America; will examine social policy in the public and private sectors including health, income, and social services; and consider prospects for social change and political movements. SOC BEH SC.

220. Sociology Seminar. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Required for graduate students in Sociology. Seminar 2 hours. Lab 0-6 hours. Estes  
Doctoral students discuss methods and problems in current research. Course may be repeated for credit. SOC BEH SC.

Qualifying examinations for graduate students in sociology are given in three areas: sociological theory, medical sociology, and special interest. The course will provide for preparation in each area. SOC BEH SC.

222. Politics of Planning in Human Services. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. Harrington, Benjamin  
Course examines trends in planning for the human services, including the role of government organizations, professionals and consumers in generating and benefiting from major human services planning reforms. Planning in the fields of health and aging is emphasized. SOC BEH SC.

223. Perspectives on Public Policy. (2) § F. Prerequisite: Consent of instructor. Lecture 2 hours. Benjamin  
Course offers systematic overview of health policy in American government—its scope, dynamics, and conceptual and practical dilemmas. Students will become acquainted with major issues involved in formulating, financing, implementing, and assessing patterns of decision (i.e., policy) established by government. SOC BEH SC.

225. Policy & Hlth Care Institutions. (3) § W. Prerequisite: Nursing 287A or consent of instructor. Seminar 3 hours. Benjamin, Hughes  
Course describes and analyzes approaches to understanding the development of health policy and relationships between health policy and decision making within health care institutions. SOC BEH SCI.

232. Adv Problems in Social Psychol. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Staff  
An advanced seminar dealing with theoretical and conceptual problems in various areas of social psychology. Recent developments in theory and concept will be reviewed. SOC BEH SC.

234. Health & Aging. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2-4 hours. Lipton  
Course examines the health status of the aged in the United States in light of relevant biological, behavioral, sociocultural, environmental factors. Social, cultural, economic factors affecting organization, financing, and delivery of health care to the aging population will be examined. SOC BEH SC.

235. Health Factors in Marriage & Family Behavior. (3) § F, W, Sp. Prerequisite: Consent of instructor. Graduate standing. Lecture 2 hours. Lab 3 hours. Staples  
Course will explore how marital and family behavior generates mental and physical health problems. Topics are family violence, child abuse, sexually transmitted diseases, suicide, psychological problems, and the relationship of marital status to morbidity and mortality. SOC BEH SC.

236. Race/Class Factors in Hlth Care. (3) § W. Prerequisite: Consent of instructor. Graduate standing. Lecture 2 hours. Lab 3 hours. Staples  
Course examines racial and class membership impact on access to health care services, variations in the quality of those services, and how professional and subprofessional roles in the health care system are organized along racial and class lines. SOC BEH SC.

Course is graduate introduction to history of sociological thought. Objective of the course is to provide perspective and vocabulary for examining major schools of thought which constitute sociological tradition. Discussion of conceptual frameworks and their relationship to theory will provide understanding of sociological work. SOC BEH SC.

Opportunity to work with both theoretical and research questions on the subject of women's participation in health and healing systems. Critical questions on appropriate method, relationship to theory, and articulation of questions will be considered. SOC BEH SC.

239. Field Research as Eval Method. (3) § F, W, Sp. Prerequisite: Sociology 214A and 214B. Non-doctoral students may enroll upon approval of instructor. Lecture 3 hours. Newcomer  
Course analyzes field work as evaluation method, as applied to health care settings and programs, contrasting this approach with quantitative methods predicated on analysis of outcomes. Conduct of such evaluative re-
search, and relationship with audiences, such as policymakers, analyzed. SOC BEH SC

240. Older Women and Their Health. (2-4) § F. Offered in alternate years. Not offered 1986-87. Seminar 2 hours. Optional project for additional units. Olesen

Analyzes postmenopausal women’s changing social roles and the interaction of actual and perceived role with health. Topics include demographic issues, economic trends, individual social and health status, policy implications for individuals and society. SOC BEH SC

241. Women, Work & Health. (2-4) § E. Offered in alternate years. Offered 1986-87. Seminar 2 hours. Optional project for additional units. Olesen

How sociocultural systems place women in work roles, the implications for their health, their part in illness prevention and care of the sick. Analyzes “hidden careers,” work and health in developing societies, relationship between work and morbidity-mortality patterns. SOC BEH SC

242. Women’s Health: Adv Quant Res. (2-4) § E. Prerequisite: One or more women’s health courses and one survey course in social research methods or social epidemiology. Offered in alternate years. Offered 1986-87. Seminar 2 hours. Optional project for additional units. Olesen

An advanced survey of quantitative research methods in analysis of women’s health issues. Will focus on data sources, design types, evaluation methods, data analysis, and proposal and report writing. Exploration of current research controversies. SOC BEH SC

249. Special Studies. (1-8) § F, W, Sp. Prerequisite: Consent of instructor. Staff

Students select special problems to investigate on an individual or collaborative basis. These studies may be conducted through readings, the collection or analysis of empirical data, or the development of conceptual analysis or of methodologies. SOC BEH SC

250. Research. (1-8) § F, W, Sp. Prerequisite: Admission to doctoral study and consent of instructor. Staff

SOC BEH SC

251. Women’s Health: Socio-Cultural. (2-4) § W. Prerequisite: Consent of instructor. Lab 0-6 hours. Seminar 2 hours. Olesen

Exploration of relationship between culture and health for women in non-Western societies. Effects of modernization and migration on utilization of traditional and cosmopolitan health care and on women’s roles as providers will be discussed, and contemporary controversies will be analyzed. SOC BEH SC

252. Women’s Health: Socio-Historical. (2-4) § W. Prerequisite: Consent of instructor. Lab 0-6 hours. Seminar 2 hours. Offered in alternate years. Not offered 1986-87. Clarke

Sociological analysis of women’s health status, roles as providers and patients, and the development of medical ideas about women from a historical perspective. Emphasis on 19th and 20th century developments in industrialized societies. SOC BEH SC

253. Women’s Health: Socio-Anthro. (2-4) § W. Prerequisite: Consent of instructor. Lab 0-6 hours. Seminar 2 hours. Offered in alternate years. Offered 1986-87. Olesen

Issues in women’s reproduction and sexuality, occupational health, and mental health over the life cycle examined from epideimological, developmental, interactional and political economy perspectives. Emphasis on applicability to policy, clinical practice, program evaluation and scientific theory building. SOC BEH SC

254. Women’s Health: Policy Issues. (2-4) § W, Sp. Prerequisite: Consent of instructor. Lab 0-6 hours. Seminar 2 hours. Offered in alternate years. Offered 1986-87. Olesen

Consideration of factors in the emergence of issues in women’s health and related policy. Perspectives on women as policymakers and the implementation of policy on women’s health, participation in care and healing systems and access to training. SOC BEH SC

255. Environmental Sociology. (2-4) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 0-6 hours. Olesen

Sociological analysis of health-related issues emerging from considerations of housing, occupation, urban contexts. Review of concepts of territoriality, privacy and ecology. Perspectives on social construction of environmental and energy issues and policies. SOC BEH SC

256. Introduction to Survey Research. (3) § F Prerequisite: Doctoral level. Non-doctoral students may enroll with permission of instructor. Biostatistics 181 or equivalent. Lecture 3 hours. Newcomer

An introductory course in sample theory, sample development, and methods of survey research. Course will include analysis of appropriateness, cost, and limitations of various methods. The course will provide rudimentary skills for those conducting research and large field surveys. SOC BEH SC

257. Aging & Racial Minorities. (3) § W. Lecture 2 hours. Field work 3 hours. Staples

Emphasis is on aging process among minorities (Blacks, Asians, Hispanics, Native Americans): how different socioeconomic conditions and cultural values affect the social role of the elderly and their health status, and the effects of public policy on aging minorities. SOC BEH SC

258. Race, Ethnicity & Gender Roles. (3) § W, Sp. Lecture 2 hours. Field work 3 hours. Staples

Exploration of sociocultural forces and how they have shaped gender roles among different racial and ethnic groups. SOC BEH SC
298. Thesis or Comprehensive Exam. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. **Staff**

For graduate students engaged in writing the thesis for the master's degree or taking a comprehensive examination required for the master's degree. SOC BEH SC

299. Dissertation. (0) § F, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser. **Staff**

For graduate students engaged in writing the dissertation for the Ph.D. degree. SOC BEH SC

Speech and Hearing Science

Reading and critical discussion of selected original research papers on the anatomy and physiology of the auditory system. Each level of the auditory nervous system from the periphery to the cortex will be considered in turn. OTOLARYN

211. Instrumentation for Research. (4) § Sp. Prerequisite: Knowledge of one higher-level computer programming language, and consent of instructor. Lecture 2 hours. Lab 6 hours. Offered in alternate years. Offered 1986-87. **Staff**

Review of major instrumental approaches to study of speech and hearing, including design and operation of acoustic research equipment, use of specific computer software, preparation of tissue for histological research, and other approaches to research in speech and auditory physiology. OTOLARYN

212. Speech and Hearing Sciences Sem. (1) § F, W, Sp. Seminar 1 hour. **Flower**

This seminar series will consist of weekly presentations by the faculty, students, and research personnel of the department, as well as occasional visiting scientists. Topics will cover the range of speech and hearing sciences, including anatomy; physiology; psychophysics; speech, clinical diagnosis, and rehabilitation.

220. Inner Ear Anatomy. (3) § Sp. Prerequisite: Consent of instructor. Lecture 2 hours. Lab 3 hours. **Leake**

This course will consider the gross anatomy; histology; and fine structure of the mammalian cochlea and vestibular sense organs. Lectures, demonstrations, dissections, and student presentations. OTOLARYN

221. Electrophysiology & Audiology. (4) § F, Prerequisite: Consent of instructor. Lecture 3 hours. Lab 3 hours. **Gardi and Staff**

Review of the development of electrophysiological approaches to studying auditory functions with particular emphasis on auditory evoked response measurement. Lectures and laboratory exercises will stress equipment design and calibration, data collection, analysis, and interpretation. OTOLARYN

222. Auditory Psychophys & Physiol. (3) § Sp. Lecture 3 hours. **Staff**

A coordinated coverage of basic auditory function. The physiology of the peripheral auditory system and basic perceptual correlates. Physics of sound, cochlear mechanics and microphonics, VIII nerve physiology, thresholds, masking, pitch, loudness, temporal adaptation, frequency analysis, binaural perception, and processing are included. OTOLARYN

224. Animal Psychophysics. (3) § Sp. Seminar 3 hours. **Jenkins**

Reading and discussion of selected papers on modern behavioral methods for obtaining information on the sensory capacities of animals. Students will have access to equipment and a microcomputer so that one or more behavioral methods can be implemented. OTOLARYN

230. Speech Reception Research Sem. (3) § F. Prerequisite: Consent of instructor. Seminar 3 hours. **M. White**

Consideration of the significant features of the acoustic speech signal; transaction characteristics of the normal and pathological cochlea; and the neural encoding of important features of the speech signal at the eighth nerve and cochlear nucleus. OTOLARYN

231. Speech Production Research Sem. (3) § Sp. Prerequisite: Consent of instructor. Seminar 3 hours. **Izdebski**

Review of research on respiratory function in speech, phonation physiology, and articulation processes. Measurements and recording techniques of these functions with application to normal and pathological aspects of speech production are considered. OTOLARYN

234. Auditory Psychophysics. (3) § W. Prerequisite: Consent of instructor. Lecture 3 hours. **M. W. White**

Review of the current literature in psychoacoustics and its relationship to current auditory coding theories. Study of peripheral auditory processing of the speech signal is also included. OTOLARYN

247. Special Studies. (1-3) § F, W, Sp. Prerequisite: Consent of instructor. Lecture 1-2 hours. Lab 0-3 hours. **Owens**

Directed reading and laboratory work in the auditory process and its disorders. OTOLARYN

249. Independent Study. (1-5) § F, W, Sp. Prerequisite: Consent of instructor. **Staff**

Students and instructor develop jointly a study plan involving tutorials, reading, and laboratory work. Students engage in intensive exploration of specific topics related to the anatomic, physiologic, psychophysical, and behavioral aspects of the speech and hearing sciences. OTOLARYN

Flower, Owens, Merzenich
Research for the Ph.D. dissertation. OTO-LARYN

299. Dissertation. (0) § E, W, Sp. Prerequisite: Advancement to candidacy and permission of the graduate adviser.

For graduate students engaged in writing the dissertation for the Ph.D. degree. OTO-LARYN

Surgery

Elbert, Trunkey, L. Way, V. Richards
Core general clerkship in surgery. Students assigned to wards and clinics at UC, SFGH, VA and C. The application of basic sciences, pathology, radiology, and psychiatry to surgery is emphasized in ward rounds and seminars. SURGERY

Hohn
Students are senior clerks on wards, in operating rooms at UC, SFGH and VA. Rounds, seminars focus on physiological approach to surgery. Clinical clerkships in surgical specialties may be taken with prior approval of specialty department and Department of Surgery. SURGERY

140.02. Off-Campus Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111.

Ebert
Clinical clerkship in approved hospitals in other universities by special arrangement and approval of the chairperson of the department and the dean. SURGERY

140.03. General Surgery—PMC. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110.

Russell
Students serve as acting interns on general surgical service; participate in preoperative assessment, interoperative management and postoperative care of patients; participate in outpatient clinics as well as selected physicians' offices; participate in daily ward rounds and teaching conferences. SURGERY

Effeney
Students serve as acting interns on the vascular surgery team, participating in preoperative, intraoperative, and postoperative management of patients, as well as in clinics, rounds, and conferences. SURGERY

140.05. Operable Heart Disease. (1½ per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111.

UC B. Roe, VA Ellis
Ward rounds and conferences on patients with operable, congenital or acquired heart disease. Details of selection, differential diagnosis, and results of surgery are discussed. SURGERY

140.01. Advanced Surgery Clerkship. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111.

Hohn, Trunkey, L. Way, V. Richards, Heer, Peter, P. Smith
Senior clinical clerks participate in clinic, ward and operating room with direct involvement in postoperative and preoperative care at UC, SFGH, VA, C, RBMC, VMC and K.

140.06. Emergency Medicine—SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or Surgery 110 & 111.

Gelb
Students care for patients in the Emergency Department at SFGH as acting interns, and care for all medical and surgical problems. The rotation focuses on wound-care techniques (including suturing), didactic conferences, and bedside one-to-one instruction by senior residents and faculty. SURGERY

140.07. Shock & Trauma Research. (1½ per week) Su, F, W, Sp. Prerequisite: Core curriculum in basic sciences and Medicine 110 or Surgery 110 and 111.

Crass
Course involves clinical and laboratory investigation and a detailed study of specific patients with trauma and shock. SURGERY

V. Richards
Students work as interns on Surgical Service; they evaluate general surgical patients preoperatively; work with patients in operating room; assume graduated, increasing responsibility in postoperative management. Rounds and conferences enhance clinical experience; interaction with staff in patient care emphasized. SURGERY

140.09. Trauma Surgery—SFGRH. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111 and consent of instructor.

Crass
Clinical clerkship in the Trauma Service of the Department of Surgery at SFGRH. The student will work at intern-ward level as an integral part of the service. SURGERY

140.10. Cardiothoracic Surgery. (1½ per week) Su, F, W, Sp. Prerequisite: Medicine 110 or Surgery 110 or 111.

Roe
As an integral member of the cardiothoracic team, the student directly and actively shares in preoperative evaluation, operative procedures, and postoperative care. Cardiac and thoracic conferences and daily ward rounds provide the didactic teaching. SURGERY

140.11. Burn Care—SFGRH. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110.

Meyer
Clinical rotation on a large Burn Center Service. Pathophysiology of thermal injury
including pulmonary aspects will be stressed. Students act as integral members of the team and participate directly in patient care. SURGERY

Vasquez, Mathes, Walton

Participation in clinical activities of plastic surgery. Students work on patients and take part in operative procedures, as well as manage the postoperative patient. Exposure to general reconstructive problems; trauma to head and neck, hand surgery, and congenital anomalies. SURGERY

O'Hara

Students receive broad clinical experience in general surgery at VAF and with practicing surgeons in selected community settings in the central San Joaquin Valley. Balance between VAF and community assignments is individually arranged according to students' interests. SURGERY

Parks, Selivanov

Clerkship offers an "organ systems" approach to critical surgical illness with experience in invasive and noninvasive monitoring and appropriate therapeutic interventions. Course is aimed at providing patient management experience and familiarity with basic science concepts and literature upon which surgical intensive care is based. SURGERY

140.15. Burn Center Clerkship—VAF (1 1/2 per week) Su, F, W, Sp. Prerequisite: Surgery 110 and 111. Fourth-year students only.

Parks, Selivanov

Presents a clinical spectrum in critical-care medicine: burn wound infection control, respiratory management, hemodynamic monitoring, with emphasis on appropriate nutritional and metabolic support. Also stressed are psychological and emotional needs of patients. Students participate as full members of the Burn Team. SURGERY

150.01. Research in Surgery (1 1/2 per week) Su, F, W, Sp. Prerequisite: Consent of instructor. Way

Opportunities for research in one of the departmental laboratories by arrangement with the instructor. SURGERY

160.03. Cardiopulmonary Surgery. (2) Sp. Prerequisite: Third- or fourth-year standing. Lecture 2 hours.

Ebert, B. Roe, J. Hutchinson

Seminars are conducted on a series of subjects relating to cardiopulmonary surgery, which may be attended separately or in conjunction with weekly rounds on cardiopulmonary patients. SURGERY

160.05. Advanced Surgery Reading. (2) F, Sp.

Trunkey

A weekly seminar where previously assigned papers are discussed and critiqued. Papers representing the classical and current concepts in general surgery are covered. SURGERY

160.06. Total Parenteral Nutrition. (5) Su, F, W, Sp. Prerequisite: Surgery 110 and consent of instructor. Lecture 3 hours. Lab 6 hours.

Crass

Course emphasizes nutritional and metabolic requirements of injured, ill, and malnourished patients. Clinical rotation involves methods of preparation, administration, and assessment of patients receiving caloric protein or amino acid support as part of specific therapy. SURGERY

198. Supervised Study. (1-5) F, W, Sp. Prerequisite: Consent of instructor.

Ebert and Staff

Library research and directed reading under supervision of a member of the faculty with the approval of the chairperson of the department. SURGERY

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Consent of instructor.

Ebert and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. SURGERY

400. General Surgery Staff Conf. (1 1/2) F, W, Sp.

UC Ebert, SFGH Trunkey, VA L. Way

Conferences include presentation of case studies with reference to the literature, case records, laboratory tests, and special studies. Faculty and occasional guest lecturers discuss surgical problems. Death and complications are reviewed weekly. SURGERY

Seminars include case reports and demonstrations of the currently available gross and microscopic surgical pathological material from the operating rooms and pathology laboratories. SURGERY

Seminars held in the surgical wards with discussion of current problems concerning the diagnosis and management of general surgical patients. SURGERY

450. Clinical Surgery. (1 1/2 per week) Su, F, W, Sp. UC Ebert, SFGH Trunkey, VA L. Way, RDMC Heer, C. V. Richards, PAC Russell

Residents, under supervision, are responsible for the preparation of case records, laboratory work, preoperative patient preparation, assistance at operations, postoperative care, and attendance at follow-up clinic. Senior
residents have certain additional administrative, teaching, and clinical responsibilities. SURGERY

452. Experimental Surgery Laboratory. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 450 and 452 may not be taken concurrently. UC Ebert, SFGH Trunkey, VA L. Way

Course includes experimental investigations of general surgical problems and the development of technical and laboratory methods to be applied in general surgery. SURGERY

Ebert

Assistant residents in off-campus hospitals approved by the chairperson of the department and the dean. Course includes clinical and experimental investigations of general surgical problems and the development of technical and laboratory methods to be applied in surgery. SURGERY

SFGH Trunkey

Interns rotate through the general surgical service, including the intensive care unit. Under the direction of the attending staff, experience is provided in vascular, chest, hand and plastic surgery, and surgery of maxillofacial injuries. SURGERY

UC Ebert

Interns, under supervision, are responsible for the preparation of case records, laboratory work, preoperative patient preparation, assistance at operations, postoperative care, and attendance at follow-up clinic. SURGERY

Urology

Core Clerkship—Surgery 110 includes clinical clerkships in the outpatient clinics and hospitals, assistance at operations, and participation in residents’ seminars. SURGERY

140.01. Advanced Urology Clerkship—UC. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110. Tanagho

Students work as interns on the Urology Service at UC. They also attend rounds and scheduled seminars with residents and visiting staff. UROLOGY

140.04. Advanced Urology Clerkship—SFGH. (1½ per week) Su, F, W, Sp. Prerequisite: Surgery 110. McAninch

Students work as interns on the Urology Service at SFGH. They also attend rounds and scheduled seminars with residents and visiting staff. UROLOGY

170.01. Fundamentals of Urology. (2) F, W, Sp. Prerequisite: Consent of instructor. Tanagho and Staff

Seminar and library research. UROLOGY

199. Laboratory Project. (1-5) F, W, Sp. Prerequisite: Consent of instructor. Tanagho and Staff

A laboratory research project under direction of a member of the faculty with the approval of the chairperson of the department. UROLOGY

Seminar includes study of the basic sciences and urologic roentgenology with members of the attending staff. UROLOGY

401. Experimental Laboratory. (2) Su, F, W, Sp. Tanagho

Course includes experimental investigation in urologic problems. UROLOGY

Seminar includes discussion of diagnosis and treatment of patients in the urology wards with the attending staff. UROLOGY

403. General Urologic Staff Conf. (½) Su, F, W, Sp. Tanagho

Conference includes presentation and discussion of urologic problems by the house staff and faculty. UROLOGY

First-year residents care for patients in the wards and outpatient clinics. Second- and third-year residents, under supervision, perform instrumental examinations on clinic patients. Senior residents, under supervision, perform instrumental and surgical procedures and have administrative, clinical, and teaching responsibilities. UROLOGY

490. Clinical Urology—SFH (1 1/2 per week)
Su, F. W. Sp.  SFH/ McAninch

Interns rotate through urological wards. Under the direction of the attending staff they are responsible for the care of patients, including history-taking, physical examination, laboratory tests, and consultation. UROLOGY
