Courses

The symbol § following the units designates a course approved for credit toward a graduate academic degree. Sessions: Su = summer term, SS = summer session, F = fall quarter, W = winter quarter, Sp = spring quarter.

Nursing

140. Integrated Sciences. (3) Su. Lecture 3 hours.
M. Engler
Course focuses on microbiological concepts and chemical principles essential to nursing practice. PHYSIOL NURS

141. Pharmacology and Nursing Care. (3) Su. Lecture 5 hours.
B. Peterson
This introductory course integrates human anatomy and physiology of the major organ systems and emphasizes the intimate relationship between structure and function. The course provides the foundation needed to understand human responses to wellness and illness. PHYSIOL NURS

142. Introduction to Professional Nursing. (11) Su. Lecture 3 hours. Patient contact 24 hours.
V. Carrieri-Kohlman
Course explores the concepts of health and illness and role of the professional nurse. Focuses on using the nursing process in care of persons across the adaptation and developmental continua. Concurrent laboratory designed to develop skills and knowledge common to the nursing care of adults. PHYSIOL NURS

143. Effective Communication. (3) F. Lecture 3 hours.
S. Ziehm
Course reviews selected theories of human interaction and presents principles and techniques of effective communication as they relate to establishing and maintaining a helping relationship. Students use laboratory experience to develop skills in communication and interaction. COMM HLTH SYST

144. Nursing Care of Med-Surg Patients. (12.5) F,W. Prerequisites: N141, N142. Lecture 3 hours. Patient contact 28.5 hours.
Staff
Course focuses on nursing assessment, diagnosis and care of adults with common medical-surgical conditions including problems common to the elderly. Clinical experiences are provided for development and application of pertinent knowledge and skills. PHYSIOL NURS

145. Pathophysiology. (4) Su. Prerequisites: N141, N142. Lecture 4 hours.
C. Miaskowski
Course provides understanding of disease and its treatment as the basis for nursing assessment and intervention. Major disease entities will be explored, utilizing a conceptual organization of the content. PHYSIOL NURS

146. Parent-Child Nursing. (7.5).W. Prerequisites: N140, N141, N142, N144, N145. Lecture 4 hours. Patient contact 10.5 hours.
E. Hedenkamp
This clinical course in the nursing care of children and families integrates theoretical concepts related to the management of
pediatric patients in acute and ambulatory settings. Application of concepts of growth and development of the child and family is included. FAM HLTH

147. Childbearing Families. (7.5) Sp. Prerequisites: N140, N141, N142, N144, N145. Lecture 4 hours. Patient contact 10.5 hours.

N. Murrell
Course focuses on biopsychological concepts forming the basis for normal childbearing events and application to clinical situations. Emphasis is on nursing assessment and management of the woman and fetus during antepartum and intrapartum periods, and new mother and infant during the first postpartum month. FAM HLTH

148. Sociocultural Issues in Health and Illness. (2) W. Prerequisites: N140, N141, N142, N144, N145. Lecture 2 hours.

S. Kaufman
Course focuses on significant sociocultural aspects of health and illness that make particular impacts on nursing practice in a variety of settings. Attention will be given to cultural diversity associated with ethnicity and social class. SOC BEH SC

149. Psych/Mental Health Nursing. (5.5) W. Prerequisites: N140, N141, N142, N143, N144, N145, N146, N147, N148. Lecture 3 hours. Patient contact 7.5 hours.

S. Ziehm
Course presents theories of human behavior as they relate to function, alteration, and/or disruption of mental processes; reviews current knowledge related to nursing care, psychiatric treatment, and psychosocial rehabilitation of the identified mentally ill individual and his/her family. COMM HLTH SYST

150. Community Health Nursing. (8.5) Sp. Prerequisites: N140, N141, N142, N143, N144, N145, N146, N147, N148. Lecture 4 hours. Patient contact 13.5 hours.

C. Portillo
Course explores application of nursing, family, and community health theory in community health settings, focusing on assessing, diagnosing, planning, implementing, and evaluating community health nursing care with families, groups, and communities. General principles will be applied to specific vulnerable populations. COMM HLTH SYST

151. Issues in Nursing. (3) Sp. Prerequisites: N140, N141, N142, N143, N144, N145, N146, N147, N148. Lecture 3 hours.

B. Roberts
Course explores major issues and trends in contemporary nursing and health care delivery as they relate to nursing practice, education, and research. FAM HLTH

181. Law and the Practice of Nursing. (2) § Sp. Lecture 2 hours.

D. Tennenhouse
Survey of fundamental and critical current issues in law with respect to the theory and practice of nursing. Emphasis on legal contingencies encountered in the everyday practice of nursing in both hospital and community settings. PHYSIOL NURS

187. Scientific Writing. (1) § FW Sp. Prerequisites: Consent of instructor. Lecture 1 hour. Enrollment limited.

J. Grout
Course reviews bibliographic search methodology, the style of scientific writing, American Psychological Association (APA) editorial format, and composition of the introductory paragraph. PHYSIOL NURS

197. Group Independent Study. (1-5) SS1, SS2, FW, Sp. Lab 3-15 hours.

Staff
Students collaborate in clinical investigation and study special problems related to nursing and health sciences under the direction of faculty. Students may select topics for study related to their area of interest.

198. Supervised Study in Nursing. (1-5) § SS1, SS2, FW, Sp. Prerequisites: Consent of instructor. Lab 3-15 hours.

Staff
Student conducts library research and does directed reading under supervision of a faculty member with approval of the chairperson of the department.
199. Laboratory Project in Nursing. (1-5) § SS1, SS2, F,W,Sp. Prerequisites: Consent of instructor. Lab 3-15 hours.

Staff
Student conducts a laboratory research project under direction of a faculty member with the approval of the chairperson of the department.

201. Curriculum & Program Development. (3) § W. Prerequisites: None. Lecture 3 hours.

H. Wilson
Course reviews educational principles, theory, conceptual frameworks and pragmatic strategies for nursing curriculum/educational program development. Students analyze, critique, and develop curricula and programs for schools of nursing/health delivery systems including continuing education, staff development, and patient teaching programs. COMM HLTH SYST

202A. Theory Development in Nursing. (3) § W. Prerequisites: Doctoral standing or consent of instructor. Lecture 1 hour. Seminar 2 hours.

A. Meleis
Critical analyses of contemporary strategies for the development of nursing theory building, particularly as they relate to selected nursing phenomena and an in-depth analysis of selected theoretical schools of thought. COMM HLTH SYST

202C. Theories & Conceptual Frameworks. (3-4) § Sp. Prerequisites: Doctoral standing. Lecture 3 hours.

A. Meleis
Comparative study and critical analysis of major conceptual models and theories in nursing. Considers relationship congruency of models to prototype theories; system, interaction, developmental, adaptation level theories. Examines the implication of nursing theories and models for practice and research. COMM HLTH SYST

D. Oda
Course provides a study of theories and concepts of consultation as a facilitating process relevant to nurses working in primary, secondary, and tertiary prevention services. Emphasis will be on consultation strategies. Optional laboratory for theory testing. COMM HLTH SYST

E. Scarr
Course is a self-paced module that provides specialty content in the areas of contraception and family planning for the advanced nursing student. FAM HLTH

205. Issues in Family Research. (2) § W, Sp. Prerequisites: N290 or concurrent enrollment in N290, or permission of instructor. Seminar 2 hours.

J. DeJoseph
Seminar is designed for doctoral students prior to their qualifying examination. Through discussion, presentations, and scholarly papers, students' knowledge and skills in managing issues that arise in research on women, children, and families will be advanced. FAM HLTH

206A. Nursing Management of Psychiatric Conditions in Adults. (3) § F. Prerequisites: N227 and N219 or equivalent, and consent of instructor. Lab 3 hours. Seminar 2 hours.

P. Underwood
Seminar is designed for graduate psychiatric nursing students to examine and discuss various theories and practice approaches to the nursing management of psychiatric conditions in adults. COMM HLTH SYST

206B. Environmental Issues in Psychiatric Rehabilitation. (3) § Sp. Prerequisites: None. Lecture 2 hours. Lab 3 hours.

L. Chafetz
Course provides an overview of rehabilitative, residential, and interpersonal environments for the chronically or severely mentally ill. It considers properties of mental health programs, housing, and personal networks which appear to promote rehabilitation goals and overall quality of life. COMM HLTH SYST

207. HIV Complex Case Management. (2) § W. Prerequisites: N233B (Pathophysiology of AIDS) or equivalent and/or consent of instructor. Lecture 2 hours.
G. Galzagorry
HIV-related case studies are analyzed to delineate clinical decision-making variables which include the relevant pathophysiological, research, psychological/soziological factors that impact disease expression, patient management, and outcomes. In the context of case analyses, theoretical perspectives will be discussed. COMM HLTH SYST

208A. Human Pathophysiology and Aging. (3) § F. Prerequisites: None. Lecture 3 hours.
M. Engel
Course integrates and applies knowledge of aging and pathophysiological concepts/alterations in selected organs and systems as a basis for advanced practice. Content areas to be addressed include: altered cellular, neurological, and hormonal regulation.
PHYSIOL NURS

208B. Human Pathophysiology and Aging. (3) § W. Prerequisites: None. Lecture 3 hours.
M. Engel
Course integrates and applies knowledge of aging and pathophysiological concepts/alterations in selected organs and systems as a basis for advanced practice. Content areas to be addressed include: altered cardiovascular, pulmonary, and renal function.
PHYSIOL NURS

209. Comparative Research Designs. (3) § F. Prerequisites: Doctoral standing or by consent of instructor. Lecture 3 hours.
M. Dodd
Course critically analyzes the elements of qualitative and quantitative research designs set within the context of the research question to be asked and the existing knowledge in the area.

210A. Introduction to Health Care Informatics. (3) § F. Lecture 3 hours.
S. Henry
Introduction and overview of health care informatics, focused on the building blocks for computer-based systems with specific application examples (e.g., clinical information systems, educational technologies, telemedicine, digital libraries, simulation and modeling. COMM HLTH SYST

210B. Decision Support Systems. (3) § W. Prerequisites: N210A (Introduction to Health Care Informatics). Lecture 3 hours.
S. Henry
Introduction and overview of decision making and decision support systems in health care, including theoretical approaches, model-based decision support (decision analysis and multiple criteria models), and knowledge-based support systems. COMM HLTH SYST

211A. Research Methods and Critique. (4) § F.W. Prerequisites: None. Restriction: To be taken during the first or second quarter of the first year of the master's program. Lecture 4 hours.
L. Reif
Course introduces research terminology and methods. Emphasis will be placed on the development of research critique skills, and on research approaches used to evaluate health problems, risk factors, and the impact of nursing interventions on service recipients and delivery systems. PHYSIOL NURS

212. Data Collection and Measurement. (3) § W. Prerequisites: N209. Lecture 3 hours.
J. Norbeck, R. Slaughter
Course critically evaluates concepts underlying the validity, reliability, and appropriateness of data collection methods as a basis for their construction and use in qualitative and quantitative research.
213A. Common Problems of Cancer Care. (3) § F. Prerequisites: None. Seminar 3 hours.

M. Dodd
Course addresses the theoretical and scientifically based clinical perspectives essential to managing common problems of the person with cancer and HIV/AIDS related malignancies. This includes nursing interventions, self-care, and ambulatory/home measures across the illness continuum of these disease states. PHYSIOL NURS

213B. Complex Cancer/AIDS Care. (3) § W. Prerequisites: None. Lecture 3 hours.

C. Miaskowski
Course addresses the theoretical and scientific basis for management of complex clinical conditions experienced by patients with cancer and HIV/AIDS. Emphasis is on nursing management of conditions such as: spinal cord compression, sepsis, superior vena cava syndrome, and pneumocystis carinii pneumonia. PHYSIOL NURS

213C. Innovations in Cancer. (2) § Sp. Prerequisites: None. Seminar 2 hours.

C. Miaskowski
Course reviews the theoretical rationale for diagnostic and therapeutic innovations of cancer and HIV/AIDS. Research findings will be analyzed in terms of their implications for nursing practice and patient care. PHYSIOL NURS

214A. Community-Based Long-Term Care. (1-2) § Sp. Prerequisites: S222 (taken prior to or concurrent with course). Seminar 1 hour. Optional field work 3 hours.

L. Reif
Course analyzes empirical research and theory dealing with noninstitutional approaches to long-term care. Examination of patient characteristics and needs, models of service delivery, factors affecting service utilization, and nurses’ roles in provision and management of community-based long-term care. PHYSIOL NURS

214B. Institutional Care of the Aged. (1-2) § W. Prerequisites: None. Seminar 1 hour. Optional field work 3 hours.

J. Kayser-Jones
Course uses a theoretical, historical, and cross-cultural approach to focus on issues, problems, and trends in institutional care of the elderly. Research studies will be discussed and analyzed, and the health professionals’ role in providing care will be explored. PHYSIOL NURS

215A. Community/Health Sys Assessment. (3) § F. Prerequisites: Consent of instructor. Lecture 3 hours.

M. White
Course emphasizes concepts and skills in the assessment of population aggregates and the health systems that serve communities. COMM HLTH SYST

215B. Community/Health Sys Interventions. (3) § W. Lecture 3 hours.

C. Portillo
Course includes analysis of theory and research-based interventions appropriate for identified health risks and available resources for clients, communities, environments, and health systems. Application issues will be explored. COMM HLTH SYST

216A. Cardiovascular Disease I. (3) § F. Prerequisites: None. Seminar 3 hours.

M. Engler
Course correlates pathophysiology, clinical diagnosis, and current management of cardiovascular disorders across the illness continuum and across settings. Content areas include: cardiac diagnostics, hypertension, hyperlipidemia, atherosclerosis, and myocardial ischemia. PHYSIOL NURS

216B. Cardiovascular Disease II. (3) § W. Prerequisites: N216A or consent of instructor. Seminar 3 hours.

B. Drew
Course correlates pathophysiology, clinical diagnosis, and current management of cardiovascular disorders across the illness continuum and across settings. Content areas include: revascularization procedures, valvular heart disease, cardiomyopathy, and heart failure. PHYSIOL NURS
217. Neonatal/Ped Pharmacology. (2) § F. Prerequisites: None. Lecture 2 hours. 
M. Lynch, P. Jackson, A. Wong
Course presents the clinical application of pharmacologic interventions commonly prescribed for healthy and sick infants and children in varied health care environments. Emphasis is placed on the integration of pharmacologic interventions as a component of advanced nursing practice. FAM HLTH

H. Wilson
Course uses clinical material in the critical examination of standard psychiatric diagnoses. Emphasis will be on the utility of assessment tools such as the mental status examination and the psychiatric history across diverse clinical specialties and the life span. COMM HLTH SYST

220.01. Adv Sem in Nursing Research. (3) § F.W. Sp. Prerequisites: Successful completion of the qualifying examination and/or consent of instructor. Seminar 3 hours.
Staff
This seminar guides doctoral students in the design and conduct of research in specialty areas in cross-cultural and international nursing and mental health and community nursing. COMM HLTH SYST

220.02. Adv Sem in Nursing Research. (3) § F. Prerequisites: Graduate nursing standing and completion of at least one research methods course. Restriction: Second-year graduate standing. Seminar 3 hours.
J. DeJoseph
A seminar which guides students in the design and conduct of research in specialty areas in family health care nursing. FAM HLTH

221. Theory in Advanced Practice Nursing. (2) § F. Sp. Prerequisites: None. Lecture 2 hours.
P. Benner, A. Meleis
Course provides an introduction to critical thinking about the discipline of nursing. Comparative analyses of frameworks to critique competing theoretical approaches to nursing practice are presented. Methods for the development, testing, and implementation of practice theories are discussed. PHYSIOL NURS

222A. Principles of Nurse Midwifery. (4) § F.W. Prerequisites: Enrollment in Nurse-Midwifery specialty. Lecture 3 hours. Lab 3 hours.
L. Ennis, D. Anderson
Course critically analyzes scientific principles underlying selected obstetric and gynecologic diagnostic and therapeutic procedures in the management of health care of women throughout the childbearing cycle. FAM HLTH–UCSD

S. Leibel, V. Lops
Course expands the theoretical knowledge base of the normal physiology of pregnancy. Emphasis is placed on the intrapartal period with facilitation of normal processes and patient teaching. FAM HLTH–UCSD

222C. Complex Probs in Nurse Midwifery. (4) § Sp. Prerequisites: Enrollment in Nurse-Midwifery specialty. Lecture 4 hours.
V. Lops, L. Ennis
Course explores the theoretical concepts and principles applied to the management of pathophysiologic and psychosocial issues complicating the birthing process. Issues of professional practice, adjustment to primary care role, and medical collaboration and consultation are considered. FAM HLTH–UCSD

223A. Symptom Research Pro-seminar. (2) § F. Prerequisites: Symptom Management Trainee. Seminar 2 hours.
S. Janson, M. Savedra
Course focuses on theories and research related to symptom perception and evaluation. INTERDEPART
223B. Symptom Research Pro-
seminar. (2) § W. Prerequisites: Symptom
Management Trainee. Lecture 2 hours.
M. Dodd, D. Taylor
Course focuses on theories and research
pertinent to symptom management strat-
gegies and therapeutics. Research on salient
interventions are critiqued across symp-
toms and research design, methods, imple-
mentation and analysis. INTER DEPART

223C. Symptom Research Pro-
seminar. (2) § Sp. Prerequisites: Symptom
Management Trainee. Lecture 2 hours.
J. Faucett, V. Carriere-Kohlman
Course focuses on symptom outcomes.
Biopsychosocial and economic outcomes
related to the symptom experience/mana-
gement strategies are discussed, measure-
ment issues are presented with discussion of
validity and reliability issues, and re-
search studies related to these variables are
criticized. INTER DEPART

224. Neonatal/Ped Ethical Issues. (2) §
W. Prerequisites: None. Lecture 2 hours.
M. Lynch, I. Martinson
Course uses ethical theories and principles
to explore conflict resolution in chronic,
acute, and primary health care for infants,
children, and adolescents. FAM HLTH

225. Cardiac Rhythm: Theory &
Analysis. (3) § Sp. Prerequisites: Consent
of instructor. Lecture 3 hours.
B. Drew
Cardiac electrophysiology in normal and
pathological states and the scientific base
for nursing's response to cardiac arrhyth-
miias. Content includes: theory and re-
search on the mechanisms, diagnosis, elec-
trocardiographic monitoring, treatment of
cardiac arrhythmias, and use of the electro-
cardiogram for nursing research.
PHYSIOL NURS

226. Managed Care: Clinical Implica-
tions. (1) § Sp. Prerequisites: Concurrent
enrollment in S222 (Health Care Eco-
nomics & Policy). Seminar 1 hour.
N. Stotts
Course examines the impact of managed
care systems on patient care services across
health care settings. Emphasis will be
placed on the roles and functions of clin-
cal nurse specialists working with aggre-
gates of patients/clients in managed care
systems. PHYSIOL NURS

227A. Theories of Major Psych Con-
ditions. (4) § F/W. Prerequisites: Consent
of instructor. Seminar 4 hours.
L. Chafetz
Course reviews major psychiatric condi-
tions, outlined by the DSM-III-R, ex-
plorers sociocultural, psychological, and
biological theories as dimensions in un-
derstanding the etiology, onset, course,
treatment, nursing care, and outcome of
selected conditions. COMM HLTH
SYST

227B. Theories of Major Psych Con-
ditions. (4) § Sp. Prerequisites: Consent of
instructor (N227A). Seminar 4 hours.
L. Chafetz
Course reviews major psychiatric condi-
tions, outlined by the DSM-III-R, ex-
plorers sociocultural, psychological, and
biological theories as dimensions in un-
derstanding the etiology, onset, course,
treatment, nursing care, and outcome of
selected conditions. COMM HLTH
SYST

228. Concepts in Nursing Practice. (2)
§ W. Prerequisites: None. Lecture 2 hours.
V. Carriere-Kohlman
Course examines selected clinical con-
cepts from their scientific and theoretical
basis. Theoretical issues related to the
application of the concepts across settings
and life span will be addressed. Students
will be introduced to a process of concepts
analysis. PHYSIOL NURS

229. Philosophy of Nursing Science.
(3) § F. Prerequisites: Doctoral standing or
consent of the instructor. Lecture 2 hours.
Seminar 1 hour.
P. Benner
Contemporary philosophic viewpoints on
the nature of nursing science, addressing
natural science, integrative science, and
human science traditions and scientific
integrity. PHYSIOL NURS
230. Measuring Outcomes of Health Care. (3) § Sp. Prerequisites: None. Lecture 3 hours.
W. Holzemer
Course presents current approaches and methods for clinical effectiveness and outcomes evaluation. The influence of patient, provider, and organizational factors on clinical effectiveness and outcomes evaluation are critically analyzed. COMM HLTH SYST

231. Issues in Nurse-Midwifery Practice. (3) § Sp. Prerequisites: Enrollment in the midwifery program at UCSF School of Nursing. Seminar 3 hours.
J. DeJoseph, L. Ennis
Seminar focuses on a critical analysis of current issues in midwifery, including the context of practice, health policy, and patient education. FAM HLTH

S. Echaves
Course focuses on clinical application of pharmacology in the management of patients, including frequently prescribed drugs for the treatment of chronic diseases and minor acute illnesses across the life span. COMM HLTH SYST

233A. AIDS Overview and Prev Strategies. (3) § F. Prerequisites: None. Lecture 3 hours.
C. Portillo
Course provides an overview of the AIDS epidemic and prevention of AIDS—prevention theories and ethical dilemmas are discussed. Emphasis is on prevention issues for different target populations, such as health care worker, injection drug users (IDUs), women, and children. COMM HLTH SYST

233B. Pathophysiology of HIV/AIDS. (3) § W. Prerequisites: None. Lecture 3 hours.
M. Dodd, A. Hughes
Course prepares nurses to provide scientific and empirically based care to HIV patients. Concepts related to HIV, virology, immunology, infectious diseases, oncology, and symptomatology are presented. Case studies used to provide exemplars and models of nursing care of persons with HIV/AIDS. PHYSIOLOG NURS

233C. Issues in Hospice Care. (3) § Sp. Prerequisites: Consent of instructor. Lecture 3 hours.
I. Martinson
Course explores history, function, and models of hospice care. Supportive physical/psychosocial nursing interventions to promote symptom control and family coping during end-stage of life are covered with emphasis on AIDS. Research, legal, ethical issues and nursing implications are discussed. FAM HLTH

234. Program Development and Management. (3) § W. Prerequisites: None. Lecture 3 hours.
C. Waters
Course provides content on program planning and financial analysis. Consideration is given to translating this knowledge and skills for clinical nurse specialists to utilize in a changing health care environment. COMM HLTH SYST

235A. Child Mental Health Assessment. (2) § F. Lecture 2 hours.
S. Weiss
Course discusses assessment approach and diagnostic criteria for mental health problems occurring from infancy through adolescence. Child mental health status will be assessed across a spectrum of disorders through case studies. COMM HLTH SYST

235B. Child Mental Health Counseling II. (2) § W. Prerequisites: N235A. Seminar 2 hours.
S. Weiss
Course covers cognitive, behavioral, and gestalt theories of child mental health counseling. Theories of group counseling will also be examined, including methods based on play, activity, and interview. COMM HLTH SYST
237. Health Assessment through Life. (3-4) § F. Sp. Prerequisites: Department of Family Health Care Nursing students. Approval by F.O.R. Concurrent practicum required. Lecture 2-3 hours. Lab 3 hours.

L. Ennis
Course presents theoretical principles of health assessment throughout the life cycle. Areas to be covered include methodologies of data gathering and data analysis essential to comprehensive health assessment of all groups. Laboratory experience provides application and integration of theory. FAM HLTH

238A. Infant & Child Development. (3) § F. Prerequisites: Consent of instructor. Lecture 3 hours.

C. Kennedy
Course covers major theories and research findings dealing with social, emotional, and cognitive development of the child from birth through school age. FAM HLTH

238B. Adolescent Development. (2) § W. Lecture 2 hours.

S. Kools
Course explores relevant theory, literature, and research findings dealing with normal development during the adolescent period. FAM HLTH

240A. Family Primary Care I. (5) § Sp. Prerequisites: Enrollment in Family Nurse Practitioner Program and N237. Lecture 5 hours.

Staff
Theories, concepts and knowledge for comprehensive assessment and management of common health and illness conditions throughout the life cycle will be presented. Emphasis will be on primary care of the family unit. FAM HLTH

240B. Family Primary Care II. (4-5) § F. Prerequisites: N240A. Lecture 4-5 hours.

Staff
Course presents theories, concepts, and knowledge for comprehensive assessment and management of selected episodic, stable chronic illness, and related health conditions throughout the life cycle. Emphasis will be on primary care of the family unit. FAM HLTH

240C. Family Primary Care III. (4-5) § Sp. Prerequisites: N240AB. Lecture 4-5 hours.

S. Pickwell
Course presents theories, concepts, and knowledge for comprehensive assessment and management of special problems in family primary care. Emphasis will be on care of the family unit. FAM HLTH

241. Leadership in Advanced Practice. (2) § W. Prerequisites: None. Lecture 2 hours.

D. Taylor
Course provides students the opportunity to define the social, political, legal, legislative, regulatory, and organizational factors that influence advanced nursing practice across practice settings. FAM HLTH

241A. Role Development in Primary Care. (2) § W. Prerequisites: Concurrent primary care clinical residency or consent of the instructor. Lecture 2 hours.

J. Saxe
Course offers the student nurse practitioner the opportunity to discover strategies for promoting role development and advancing the nursing profession in the primary care arena. COMM HLTH SYST

241B. Role Development in Primary Care. (2) § F. Prerequisites: Consent of instructor and concurrent enrollment in primary care clinical residency. Lecture 2 hours

J. Saxe
Course offers the student nurse practitioner the opportunity to discover strategies for promoting role development and advancing the nursing profession in the primary health care arena. INTERDEPART

241C. Collaborative Role Development. (1) § W. Prerequisites: Successful completion of N241B (Role Development in Primary Care) and concurrent primary care clinical residency. Lecture 2 hours every other week.

J. Saxe
Bi-weekly seminars deal with critical analyses of issues and research related to collaboration in primary care. Emphasis is on joint practice frameworks and practice management, marketing the nurse practitioner role, and legal/professional issues. COMM HLTH SYST

243.01. Family Therapies (3) § F.W. Sp. Lecture 3 hours.
S. Weiss
Course offers a critical examination of theories guiding therapeutic work to enhance family mental health. Diverse theoretical perspectives for assessment and intervention with troubled families will be analyzed, including structural, strategic, and communication frameworks as well as psychoeducation. COMM HLTH SYST

243.02. Trends in Group Psychotherapy Modalities. (2) § W.Sp. Prerequisites: Psychiatric/Mental Health students or consent of instructor. Seminar 2 hours.
S. Weiss
Students will examine and discuss theories and practice of various group modalities in current use. COMM HLTH SYST

245. Health Protection & Promotion. (2) § W. Prerequisites: None. Lecture 2 hours.
J. Saxe
Course emphasizes principles of individual health protection and promotion across the life span in advanced nursing practice. The examination of models of disease prevention, and health promotion for individual wellness in the context of the family, community, and culture is emphasized. COMM HLTH SYST

245.01. Seminar in Adult Primary Care. (1) § W. Seminar 1 hour.
C. Cutter
Seminar is taken concurrently with N245 PHC 1 and provides the specialty content necessary for adult primary care nurse practitioners. Application from PHC 1 lectures will be made to the specialty area using case presentations and other relevant learning strategies. COMM HLTH SYST

245.02 Seminar: Family/Women's Primary Care. (1) § W. Prerequisites: N270, N245, or concurrent enrollment in N245, or consent of instructor. Seminar 1 hour.
L. Lommel, B. Hollinger, A. Burns
Seminar is taken concurrently with N245 to analyze and incorporate interventions in health protection and promotion particular to women and families. Application from N245 will be made using case presentations and other relevant learning strategies. FAM HLTH

245.04 Seminar: Pediatric Primary Care. (2) § Sp. Prerequisites: N270, N245, or concurrent enrollment in N245, or consent of instructor. Lecture 2 hours.
A. Hanson
Seminar is taken concurrently with N245 to analyze and incorporate theories, concepts, and knowledge for infant/child/adolescent health supervision, encompassing interventions in health promotion and prevention. FAM HLTH

246. Symptom Assessment & Management. (3) § Sp. Prerequisites: N270, N245. Lecture 3 hours.
L. Lommel
Course introduces students to signs and symptoms of illness across the life span that are commonly encountered in ambulatory care. Symptoms and signs will be analyzed using a clinical decision-making model. FAM HLTH

246.01. Seminar in Adult Primary Care. (1) § Sp. Seminar 1 hour.
G. Collins–Bride, B. Burgel, D. Guyot, C. Kelber, K. O’Mara
Seminar is taken concurrently with N246 and provides the specialty content necessary for adult primary care nurse practitioners. Application from N246 lectures will be made to the specialty area using case presentations and other relevant learning strategies. COMM HLTH SYST

246.02. Seminar: Family/Women's Primary Care. (1) § Sp. Prerequisites: N270, N245, N245.02, and concurrent
enrollment in N245, or consent of instructor. Seminar 1 hour.

S. Faust, S. Shea, A. Burns
Seminar is taken concurrently with N246 and provides specialty content necessary for family and women's primary care nurse practitioners. Application from N246 lectures will be made using case presentations and other relevant learning strategies. FAM HLTH

246.03 Seminar in Gerontological Primary Care. (1) § F. Seminar 1 hour.
M. Wallhagen, C. Franzni
Seminar is taken concurrently with N246 and provides the specialty content necessary for gerontological primary care nurse practitioners. Application from N246 lectures will be made to the specialty area using case presentations and other relevant learning strategies. PHYSIOL NURS

246.04 Seminar in Pediatric Primary Care. (1) § F. Seminar 1 hour.
P. Jackson
Seminar is taken concurrently with N246 and provides the specialty content necessary for pediatric primary care nurse practitioners. Application from N246 lectures will be made to the specialty area using case presentations and other relevant learning strategies. FAM HLTH

247. Complex Health Problems and Management. (3) § F. Prerequisites: N270, N245, N246, and enrollment in Family Nurse Practitioner, Adult Nurse Practitioner or Geriatric Nurse Practitioner Program, or consent of instructor. Lecture 3 hours.

D. Null
Course introduces the more complex health problems encountered in primary care. Client's clinical presentation, underlying causes and appropriate treatment are discussed. Separate specialty track seminars permit elaboration of problems as they occur in the specialty. COMM HLTH SYST

247.01 Seminar in Adult Primary Care. (1) § F. Seminar 1 hour.
S. Janson
Seminar is taken concurrently with N247 and provides the specialty content necessary for adult primary care nurse practitioners. Application from N247 lectures will be made to the specialty area using case presentations and other relevant learning strategies. COMM HLTH SYST

247.02A Seminar: Family/Women's Primary Care. (1) § F. Prerequisites: N270, N245, N245.02, N246, N246.02, concurrent enrollment in N247, or consent of instructor. Seminar 1 hour.
S. Shea, E. Scarr, A. Burns
Seminar is taken concurrently with N247 and provides specialty content necessary for family and women's primary care nurse practitioners. Application from N247 lectures will be made to the specialty areas using case presentations and other relevant learning strategies. FAM HLTH

247.03 Seminar in Gerontological Primary Care. (1) § F. Seminar 1 hour.
C. Deitrich
Seminar is taken concurrently with N247 and provides the specialty content necessary for gerontological primary care nurse practitioners. Application from N247 lectures will be made to the specialty area using case presentations and other relevant learning strategies. PHYSIOL NURS

248. Group Independent Study. (1-6) § F, W, Sp. Prerequisites: Consent of instructor. Lecture 1-6 hours.

Staff
Students collaborate in clinical investigations and other studies of special problems in nursing and health sciences under the direction of faculty. Students may select areas related to their long-term interests and future research or clinical program. INTERDEPART

249. Independent Study. (1-5) § F, W, Sp. Prerequisites: Consent of instructor. Lecture 1-5 hours.

Staff
Student undertakes an individual study with emphasis on special problems in nursing. Students may select an area of study which is related to his/her area of interest or future goals. INTERDEPART
250. Research. (1-8) § F,W,Sp. Prerequisites: Admission to doctoral study and consent of instructor.

Staff
Course offers students an opportunity to engage in research with selected faculty.

INTER DEPART

251. Advances in Vascular Nursing. (3) § SS1, SS2, Su, F, W, Sp. Prerequisites: Consent of instructor. Learning modules 10 hours.

C. Hubner
Course examines the theoretical basis of prevention, intervention, adaptation, and rehabilitation in peripheral vascular insufficiency utilizing relevant research. Computer simulations facilitate synthesis and application of content. PHYSIOL NURS

252. Current Concepts in Home Care. (3) § F. Prerequisites: None. Lecture 3 hours.

C. Portillo
Course provides historical perspective on home care and introduces the current home care environment. Current concepts related to the care of the individual are introduced using the Georgetown Home Health Care Classification System.

COMM HLTH SYST

253. Innovative Subsystems of Nursing Care. (3) § W. Restriction: Doctoral level—suggested DNS. Seminar 3 hours.

I. Martinson
Course provides instruction in the development of a nurse-directed subsystem of care, including the capability to develop a feasible, functioning system for plan design for collection and analysis of data needed for evaluation. FAM HLTH

254. Fetal-Newborn Development. (2) § F. Lecture 2 hours.

M. Lynch
Course is a study of body system development during embryonic, fetal, and postnatal growth. Emphasis is on normal anatomical and physiologic development, critical periods of developmental alterations, and transitions for extra-uterine adaptation. Implications for nursing practice are explored. FAM HLTH

255.03A. Common Pediatric Illness Management. (2) § F. Prerequisites: Consent of instructor. Lecture 2 hours.

P. Jackson
Course presents theories, concepts, and knowledge for comprehensive assessment and management of common pediatric illnesses. Emphasizes the most common acute conditions managed by a PNP in collaboration with a pediatrician. Integrates history taking, physical findings, diagnosis, and management. FAM HLTH

255.03B. Common Pediatric Illness Management. (3) § W. Lecture 3 hours.

K. Duderstadt
Course presents theories, concepts, and knowledge for comprehensive care of children with common pediatric illness. It emphasizes common acute conditions managed by a clinical nurse specialist in Pediatric Primary Care in collaboration with a physician. FAM HLTH

256. Transitions & Health. (3) § W, Sp. Lecture 3 hours. Course may be repeated for credit.

A. Meleis
Critical and analytical review of theories and research that links health of the individual and families to relocations and transitions. Focuses on responses and coping with situational, developmental, health-in illness, and sociocultural transitions. Nursing therapeutic theories will also be explored. COMM HLTH SYST

257. Assessment/Management of Common Psychiatric Symptoms. (2) § F, W, Sp. Prerequisites: None. Lecture 2 hours.

L. Chafetz
Course analyzes common signs and symptoms of psychiatric illness from a biopsychosocial perspective. The diagnostic process will be highlighted and symptom management will be discussed. COMM HLTH SYST
258A. Feminist Perspectives on Women's Health. (3) § F. Prerequisites: None. Lecture 2 hours. Library research 3 hours.

J. Dejoseph
Course introduces feminist theories to assist the student to critically analyze selected topics in contemporary literature about women's health across the life span. Women's issues are considered in both local and global environments. FAM HLTH

258B. Family/Childbearing Phenomena. (3) § W. Seminar 2 hours. Project 3 hours.

K. Lee
Course studies perinatal phenomena identified in national reports for their theoretical, practice, and research implications. Phenomena include prevention of low birthweight infants, contemporary stressors for childbearing families, cognitive model to assess cultural diversity in perinatal health care, and related legislation. FAM HLTH

258C. Family/Childbearing Theory. (3) § Sp. Prerequisites: N 258A and N258B. Seminar 3 hours.

V. Lops
Clinical seminar addresses psychosocial and pathophysiologic issues of pregnancy, childbirth, parenting, and family/marital relationships during childbearing; focus on self-care practices for family; emphasis on midwife as facilitator of adaptation. FAM HLTH

259.01. Women's Reproductive Health. (1-5) § F. Lecture 1-5 hours.

L. Lommel
Course provides exploration of theories, concepts, and knowledge necessary to maintain and promote women's health. Emphasis is on application of current research: decision making and management of pregnancy, the interconceptional period, and the climacteric, including collaboration with health team members. FAM HLTH

259.02. Special Problems in Women's Health. (1-4) § W. Prerequisites: Consent of instructor. Lecture 1-4 hours. Seminar optional 1 hour.

Staff
Emphasis is on theory and management of bio-psychosocial deviations from normal in women before and during pregnancy, interconceptional period, and climacteric. Emphasis placed on critical analysis of research in metabolic, infectious, and functional disorders including collaborative management of women manifesting these disorders. FAM HLTH

259.03. Advanced Women's Health Seminar. (2) § Sp. Prerequisites: Consent of instructor. Lecture 2 hours.

P. Bernal de Pheils
Course explores theoretical and management aspects of selected phenomena in women's health applicable to the nurse practitioner role. FAM HLTH

J. Lipson
Course covers basic concepts and issues in medical anthropology and cross-cultural nursing, focusing both on the research literature and clinical implications for nurses and other health care providers. COMM HLTH SYST

260B. Culture and Child/Family Health. (2) § Sp. Lecture 2 hours.

R. Rehm
Course will focus on sociocultural factors such as race, ethnicity, gender, and class that impact children's health and family well-being. Implications for advanced practice nursing and health policy for children and families will be considered. FAM HLTH

260C. Global Health Issues. (3) § Sp. Lecture 3 hours.

J. Lipson, A. Meleis
Course examines selected world health issues in a framework of community-oriented primary health care. Focus is on global issues such as development, environment, nutrition, population, international organizations, and nursing roles in international health. COMM HLTH SYST

261. Mental Health Nursing and the Law. (2) § W, Sp. Prerequisites: Enrollment
in MS program in Psychiatric Nursing or consent of instructor. Lecture 2 hours.

G. Gresham
Course reviews history and development of mental health legislation and decisional law in the U.S. and California. Explores current mental health laws as they relate to and influence the practice of psychiatric nursing in the public and private sectors. COMM HLTH SYST

262A. Women’s Health Roles/Issues I. (1) § F,W, Prerequisites: Enrollment in Women’s Health Nurse Practitioner Program or consent of instructor. Seminar 2 hours (every other week).

Seminar focuses on critical analysis of issues influencing role transition, role enactment, scope and control of practice, and professional growth of the women’s health care provider. FAM HLTH

262B. Women’s Health Roles/Issues II. (1) § W,Sp. Prerequisites: N262A. Seminar 1 hour.

J. DeJoseph
Seminar focuses on critical analysis of issues influencing restraints and enhancements of contemporary practice for women’s health care providers. Impact of current legal, legislative, technological, and health care delivery trends are examined. FAM HLTH

263. Bereavement. (2-3) § Sp. Lecture 2 hours. Lab 0-3 hours.

I. Martinson
Course analyzes empirical research and theory dealing with bereavement. Underlying physiological and psychological mechanisms and responses related to death will be explored across the life span. FAM HLTH

264. Foundations of Nursing Knowledge. (3) § F. Prerequisites: Doctoral student or consent of instructor. Seminar 3 hours.

A. Meleis
Course analyzes historical trends in theoretical nursing in the U.S. and in selected other countries, and a critique of the dominant epistemological approaches that influenced the development and testing of theoretical knowledge in nursing. COMM HLTH SYST

265. Cancer Prevention/Early Detection. (2) § W. Prerequisites: None. Seminar 2 hours.

N. Facione
Course provides in-depth examination of the cultural and economic issues surrounding cancer prevention and early detection, including: Equity of access to services, the criteria for evaluating community programs, populations at risk, and behavioral models to guide outreach. PHYSIOL NURS

267. Ethical Dilemmas & Nursing Prac. (3) § W. Lecture 2 hours. Library research 3 hours.

P. Benner
Course explores selected ethical theories, ethical dilemmas in health care and nursing practice. Focus is on selected case studies depicting ethical dilemmas in nursing practice, nursing research, and health policy. PHYSIOL NURS

268. Psychiatric Liaison Nursing. (2) § F,W,Sp. Prerequisites: N211A and enrollment in the child or adult psychiatric nursing specialty tracks, Department of Community Health Systems, or consent of instructor. Lecture 2 hours.

L. Chaftetz
Course reviews the emerging literature on psychiatric liaison nursing. Reports on roles of psychiatric nurses in medical settings will be critically analyzed, as well as clinical studies from the area of general hospital psychiatry. Comparative models of practice are discussed. COMM HLTH SYST

269A. Human Health & Nursing Systems. (3) § W. Prerequisites: N209, N229 and N264 or consent of instructor. Restriction: PhD students or consent of instructor. Seminar 3 hours.

K. Lee
Course analyzes theoretical foundations and research issues underlying specific content areas in nursing science. Research in each specific content area is analyzed from the perspectives of the dimensions of nursing knowledge (health, illness, environment, therapeutics) and various units of analysis. FAM HLTH

269B. Human Health & Nursing Systems. (3) § Sp. Prerequisites: N269A. Seminar 3 hours.
K. Lee
Course continues analysis of theoretical foundations underlying specific content areas in nursing science. In addition, specific issues related to conducting interdisciplinary research, working with vulnerable groups, the use of technology in research and dissemination of research will be addressed. FAM HLTH

270. Advanced Health Assessment. (2) § F,W. Lecture 2 hours.
C. Deitrich
Course introduces assessment concepts and skills to determine the health status of clients across the life span. Focuses on the collection and interpretation of clinical data derived from the history and physical exam. PHYSIOL NURS

271.01. Decision Making in Adult Primary Care. (3) § Sp. Prerequisites: N246, N247, N247.01 or consent of instructor. Lecture 3 hours.
C. Kelber
Case studies of complex chronic illnesses are analyzed to delineate critical decision-making variables, which include the relevant pathophysiology, epidemiologic principles, and psychological/sociological variables that impact symptom disease expression, clinical management, and methods of coping. COMM HLTH SYST

271.02. Problems in Family Primary Care. (3) § W. Prerequisites: N245, N246, N247, N270, N279 or consent of instructor. Seminar 3 hours.
C. Chesla, S. Shea
Course explores complex health/illness problems as they occur in families. Complex assessment and management of patients and their families, across the life span, are discussed. FAM HLTH

271.04. School Health & Nursing. (3) § F. Prerequisites: School health focus or consent of instructor. Seminar 3 hours.
A. Hanson
Course explores contemporary school health issues, the interdisciplinary approach to the provision of school health services, including special education, the role of the Advanced Practice Nurse in the school setting, comprehensive school health program, and school health education. FAM HLTH

271.06. Management of Clinical Occupational Health Problems. (2) § W. Prerequisites: Consent of instructor. Lecture 2 hours.
B. Burgel
Multidisciplinary course exploring the evaluation and clinical management of acute and chronic occupational and environmental health problems. Clinical diagnostic strategies and epidemiologic methods are used in evaluation of occupational health problems, including health hazards evaluations, surveillance and disability evaluation. COMM HLTH SYST

272. Children with Special Health Needs. (2) § W. Prerequisites: N283ABC or consent of instructor. Lecture 2 hours.
I. Martinson
Course explores the unique health care demands of vulnerable children with need for prolonged health support. The impact of the care giving environment, community, and care providers will be addressed in relation to the well-being of the child and family. FAM HLTH

273A. Curr Concepts in Occup HLth Nsg. (2) § F. Prerequisites: Consent of instructor. Lecture 2 hours.
B. Burgel
Course analyzes the role of the Occupational Health Nurse in managing an Occupational Health Service within a changing regulatory and fiscal environment. Emphasis is on planning, development, and evaluation of occupational health programs.

COMM HLTH SYST

273B. Issues in Occupational Health. (1) § F. Prerequisites: Consent of instructor. Seminar 1 hour.

J. Faucett, B. Burgel

Course focuses on the process and outcomes of developing federal and state policies and regulations for occupational health and safety. COMM HLTH SYST

274A. Hlth and Safety Hazards/Workplace. (3) § Sp. Prerequisites: Consent of instructor. Lecture 2 hours. Lab 3 hours.

P. Quinlan

Course introduces principles of industrial hygiene and safety for identification of chemical, biological, physical, ergonomic, and safety hazards at work. Student will identify environmental monitoring methods, select health surveillance and safety measures, and discuss methods of control exposures and injuries. COMM HLTH SYST

274B. Factors in Injury Control. (2) § F. Prerequisites: Enrollment in Occupational Health Program or permission of instructor. Seminar 2 hours.

J. Faucett

Course describes and discusses political, sociocultural, organizational, interpersonal, and individual factors affecting injuries, injury control, and work re-entry. Students will learn how the principles of risk communication and adult learning may be applied in occupational health programs. COMM HLTH SYST

274C. Occupational Safety. (2) § F. Prerequisites: Consent of instructor. Lecture 2 hours.

B. Plog

Course emphasizes identification of safety hazards of work; components of an injury/illness prevention program; principles of hazard control and accident investigation; essentials of safety inspections and audits; application of safety inspection methods and ergonomic job analysis. COMM HLTH SYST

274D. Farmworker Primary Health Care. (2) § W. Prerequisites: N 270. Lecture 2 hours.

B. Hollinger

Course is an introduction to the diverse Western farmworker population and includes common health problems and the influence of sociocultural factors and public policy on health systems. FAM HLTH

275. Sociocultural & Community Health. (3) § F.W. Prerequisites: None. Lecture 3 hours.

C. Portillo

Course examines health in a cultural context and assessment strategies for community and clinical settings. Course examines medical systems, health beliefs and behavior, social class and ethnicity, community assessment models, and communication. COMM HLTH SYST

275C. Neonatal Pathophysiology. (2) § F. Lecture 2 hours.

Lynch

Course is a study of the major disease processes encountered in the neonate and their relevance to nursing practice. The course will address etiology, manifestations and treatment during the acute phase of illness. FAM HLTH

276. Research Rotation. (1-6) § F.W, Sp. Su. Prerequisites: Completion of first year of doctoral study and consent of advisor. Lab 3-18 hours.

Staff

The student will participate in ongoing faculty research. This experience will contribute to the student's methodological or substantive expertise. INTER DEPART

277. Assessment/Management of Psychosocial Problems. (3) § Sp. Prerequisites: N270 or consent of instructor. Lecture 3 hours.

J. Faucett
Course focuses on assessment and management of psychosocial problems and psychiatric conditions. Course is designed to assist students in determining patients for management and for referral and to develop beginning skills in managing selected patients. COMM HLTH SYS

**278. Nursing Science History & Philos.** (4) §W. Prerequisites: Doctoral-level standing or consent of instructor. Lecture 2 hours. Seminar 2 hours.

**S. Gortner**

Course is an analysis of history and philosophy of nursing science in the United States and abroad, addressing origins of scientific questions and activity, contemporary philosophic viewpoints, and debates currently ongoing regarding design, conduct, and outcomes of nursing research. FAM HLTH

**279. Family Nursing Theory and Practice.** (3) §F. Prerequisites: None. Lecture 3 hours.

**C. Chesla**

Course integrates empirical evidence of reciprocal family and health interactions with family theoretical and therapeutic concepts applicable to advanced nursing practice. FAM HLTH

**279C. Cultural Issues in Family Health.** (2) §Sp. Prerequisites: N 279B and consent of instructor. Lecture 1 hour. Seminar 1 hour.

**Staff**

Course involves analysis of family, cultural, and behavioral theories and issues leading to clinical intervention in family primary care. FAM HLTH

**283A. Pediatric Physiologic Development.** (3) §W. Prerequisites: None. Lecture 3 hours.

**M. Lynch**

Course studies major organ system function as modified by developmental needs and system immaturity in the infant, child, and adolescent. Implications for advanced practice pediatric nursing interventions will be addressed in relation to health promotion and illness prevention. FAM HLTH

**283B. Common Pediatric Pathophysiology & Clinical Management.** (3) §Sp. Prerequisites: N283A. Lecture 3 hours.

**M. Lynch, K. Duderstadt**

Course will provide a conceptual approach to examine common pediatric pathophysologic phenomena observed in varied caregiving environments and across the illness continuum. The interrelationships of human responses, clinical manifestations, and therapeutic interventions will be discussed. FAM HLTH

**283C. Complex Pediatric Pathophysiology & Clinical Management.** (3) §F. Prerequisites: N283AB. Lecture 3 hours.

**M. Lynch, K. Duderstadt**

Course will provide a conceptual approach to examine complex acute and chronic pediatric pathophysiological phenomena observed in varied caregiving environments in infants, children, and adolescents. The interrelationships of human responses, clinical manifestations, and therapeutic interventions will be discussed. FAM HLTH

**284. Adolescent Health Care.** (2) §Sp. Prerequisites: Consent of instructor. Seminar 2 hours.

**M. Savedra, J. Broering**

Examination and analysis of theory and research related to health care of adolescents and their families in a variety of settings. Emphasis will be on adaptation to selected stresses including trauma, chronicity, hospitalization, terminal illness and disability. FAM HLTH

**285A. Qualitative Methods I.** (5) §F. Prerequisites: Second-year doctoral student. Seminar 3 hours. Field work 6 hours.

**J. DeJoseph, J. Kayser-Jones, A. Clarke, H. Pinderhughes**

Course reviews many of the types of qualitative research methods, emphasizing assumptions, approaches. Focus on design, entry, ethics, data-gathering techniques (interviewing, observing) data recording and management. Introduction to data analysis. INTERDEPART
285B. Qualitative Methods II. (5) § W. Prerequisites: N285A and second-year doctoral student. Seminar 3 hours. Field work 6 hours.

J. DeJoseph, J. Kayser-Jones, A. Clarke, H. Pinderhughes
Course compares and contrasts modes of qualitative analysis. Examines issues in establishing plausibility, credibility, adequacy. Intensive data analysis and examination of the problems of presentation of findings with focus on questions of authority and preparation of text. INTERDEPART

285C. Interpretive Phenomenology. (2) § Sp. Prerequisites: Philosophy courses in phenomenology (may be acquired outside UCSF and also with the consent of the instructor) and N285A&B (Qualitative Methods I&II). Seminar 2 hours.

P. Benner
Course describes, explains, and demonstrates interpretive phenomenological research. Students generate, present, and critique interpretive commentaries of shared texts. Readings in interpretive methods and exemplary interpretive research are assigned weekly. INTERDEPART

286A. Research in Stress & Coping. (3-4) § W. Prerequisites: Consent of instructor or doctoral-level theory development. Lecture 3 hours. Contract for 1 unit for proposal development (optional).

P. Benner
Course critically analyzes the relationship of stress and coping to health and illness. Examines theoretical and empirical links between coping strategies and therapeutic interventions. Emphasis is on research programs. PHYSIOL NURS

287A. Organizational Redesign. (3) § F. Prerequisites: None. Lecture 3 hours.

S. Henry
Course applies theory and research from management science and nursing science to redesign of the healthcare system. Topics include organizational restructuring, redesign, and improvement of work processes through the strategies and techniques of re-engineering and continuous quality improvement (CQI). COMM HLTH SYST

287B. Behavior in Organizations. (3) § W. Prerequisites: N287A and consent of instructor. Lecture 3 hours.

M. Flood
Course examines the characteristics, causes, and consequences of behavior and experiences of individuals as they function in organizations. Emphasis is on personnel management and other managerial functions. COMM HLTH SYST

287D. Financial Management for Nurse Administrators. (3) § W. Lecture 3 hours.

J. Seago
Course offers introduction to financial accounting principles as they relate to financial management in health care settings. Emphasis is on the manager’s role and responsibilities in budgeting, monitoring, controlling, and in costing nursing care. COMM HLTH SYST

288A. Management of Critically Ill/Injured Patients I. (3) § Sp. Prerequisites: Prior or concurrent enrollment in Pathophysiology course and/or consent of instructor. Seminar 3 hours.

K. Punttillo
Seminar provides theoretical basis for monitoring and managing complex problems in critically ill adults with acute conditions or injuries. Students analyze clinical data, make management decisions, and evaluate treatment outcomes based on knowledge of high-risk conditions and research. PHYSIOL NURS

288B. Management of Critically Ill Patients II. (3) § F. Prerequisites: Prior or concurrent enrollment in Pathophysiology course. Completion of N288A. Lecture 2 hours. Seminar 1 hour.

K. Punttillo
Course provides theoretical basis for monitoring and managing selected complex problems in critically ill adults with chronic conditions. Students analyze clini-
cal data from multiple sources, make management decisions, and evaluate treatment outcomes based on knowledge of high-risk conditions and research findings. PHYSIOL NURS

288C. Issues in Critical Care/Trauma. (1–3) §W. Prerequisites: None. Seminar 1 hour. Project 1–2 hours.

K. Puntillo
Course provides critical analysis of issues and population-specific problems that confront advanced practice nurses. Emphasis is on evaluation of factors that affect the knowledge and attitudes of nurses who manage the care of critically ill patients and their families. PHYSIOL NURS

288D. Critical Care/Trauma Pro-seminar. (1) §W. Prerequisites: Enrollment in the Critical Care/Trauma Specialty. Seminar 1 hour.

C. West
Course introduces advanced practice roles in critical care and trauma settings overviewing the economic, political, legal, and professional influences on practice outcomes. PHYSIOL NURS

289A. Advanced Quantitative Research Methods I. (3) §F. Prerequisites: N209 and N212 or equivalent, B187 and doctoral student only. Lecture 2 hours. Lab 3 hours.

E. Froelicher, R. Newcomer
Course addresses theoretical basis of advanced quantitative methods. Fundamental issues of causality, and design issues pertinent to causality, are addressed using randomized clinical trials as models for experimental designs. Methods of sampling and issues in data collection and measurement are explored. PHYSIOL NURS

N289B. Advanced Quantitative Research Methods II. (3) §W. Prerequisites: N289A and doctoral student only. Lecture 2 hours. Lab 3 hours.

E. Froelicher, R. Newcomer
Course covers continuing analysis of quantitative research methods including selected survey, longitudinal study designs. Focus compares and contrasts research designs, proposes strategies for maximizing strengths of various designs. Explores fit of research questions, methods, and statistical approaches. Examples of methods include questions answered by time series analysis, life table and survival analysis. PHYSIOL NURS

290. Family Theory/Research in Health. (3) §W. Prerequisites: None. Restrictions: Doctoral student or consent of instructor. Seminar 3 hours.

C. Chesla, C. Gilliss
Course presents and critiques theoretical perspectives and research approaches dominant in the study of family and health. Compatibility of theories and research approaches is examined. FAM HLTH

291. Acute Psych Care in the Community. (2) §F. Seminar 2 hours.

L. Chafetz
Course reviews clinical problems encountered in acute psychiatric services in community settings. In addition to direct care issues, students have the opportunity to discuss the sociocultural, legal, ethical, and economic factors which influence provision of services. COMM HLTH SYST

292A. Physiology of Pregnancy. (2) §F. W. Prerequisites: Consent of instructor. Lecture 2 hours.

K. Lee, L. Ennis
Course reviews and analyzes advanced physiology and pathophysiology of pregnancy and their impact on the maternal-fetal unit as a basis for nursing practice and research. Emphasis is on reproductive and endocrine systems affecting adaptation and development during pregnancy. FAM HLTH

292B. Physiology of Pregnancy. (2) §W. Sp. Prerequisites: Consent of instructor. Lecture 2 hours.

N. Murrell
Course reviews and analyzes advanced physiology and pathophysiology of pregnancy as a basis for practice and research. Emphasis is on cardiovascular, hematologic, neuroendocrine, and renal systems affecting adaptation and development during pregnancy. FAM HLTH
292C. Biopsychosocial Alterations—Pregnancy. (2-3) § W. Prerequisites: N292A. Lecture 2 hours, Seminar 1 hour (optional).

P. Bernal de Pheils
Course analyzes the biopsychosocial alterations of women during the childbearing year. Clinical conditioning and related therapies will be examined in relation to policy issues and risk assessment. FAM HLTH

293. Complex Pediatric Health Problems. (4) § F. Prerequisites: N270, N245, N245.04, N246, N246.04, or consent of instructor. Lecture 4 hours.

K. Duderstadt, M. Lynch
Course introduces the more complex health problems encountered in pediatric primary care. Clinical presentation, underlying causes and appropriate family centered treatment are discussed. FAM HLTH

L. Ennis
Course focuses on theory supporting midwifery management of the low- to high-risk fetus and newborn. Content traces human development from conception through adaptation to neonatal life. Course articulates with clinical lab which covers newborn health assessment and management skills. FAM HLTH

295A. Care of Older Adults. (2) § F. Prerequisites: Completion of N208AB or consent of instructor. Lecture 2 hours.

M. Wallhagen
Course focuses on advanced practice nursing of older clients across care settings. Case studies, lectures, and discussions allow students to integrate pathophysiologic, pharmacologic, psychosocial, and ethical concepts and to analyze critical approaches to assessment and care. PHYSIOL NURS

295B. Care of Older Adults. (3) § W. Prerequisites: Completion of N295A, N208AB or consent of instructor. Lecture 3 hours.

J. Janz
Course focuses on advanced practice nursing of older clients across care settings. Case studies, lectures, and discussions allow students to integrate pathophysiologic, pharmacologic, psychosocial, and ethical concepts and to
analyze critical approaches to assessment and care. PHYSIOL NURS

295C. Case Studies in Geriatrics. (2) § W.
Prerequisites: N270, N245, N246, N247. Restrictions: Must be concurrent with clinical residency in gerontological primary care. Lecture 1 hour. Seminar 1 hour.

C. Deitrich, T. Berta
Case studies of complex illness in older adults across settings are analyzed to refine critical decision-making skills in clinical and case management while utilizing the theory and practice of geriatrics and gerontology. PHYSIOL NURS

296. Teaching-Learning Processes. (4) § F.
Sp. Prerequisites: None. Lecture 4 hours.

H. Wilson
Course reviews and discusses principles and theories that enlighten the transactions and interactions that take place between students and teachers and among students and examines teaching-learning practices in nursing education and development and client teaching programs. COMM HLTH SYST

297. Human Responses to Pain. (2) § F.
Lecture 2 hours.

C. Miaskowski
Course explores research related to physiological, psychological, and social responses to human pain; nursing implications for pain assessment; and management of acute and chronic painful conditions across the life span. PHYSIOL NURS

298. Thesis or Comprehensive Exam. (0) § F.
W, Sp. Prerequisites: Advancement to candidacy and permission of the graduate adviser.

Staff
For graduate students engaged in writing the thesis for the master's degree or taking a comprehensive examination required for the master's degree.

299. Dissertation. (0) § F, W, Sp. Prerequisites: Advancement to candidacy and permission of the graduate adviser.

Staff
For graduate students engaged in writing the dissertation for the Doctor of Nursing Science (DNS) or Doctor of Philosophy in Nursing degree.

Prerequisites: Consent of instructor. Lab 12-36 hours.

Staff
Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor.

Prerequisites: Completion of N287AB and N287D, each with a grade of B or higher, and consent of instructor. Lab 6-36 hours.

Staff
Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. COMM HLTH SYST

Prerequisites: Consent of instructor. Lab 12-36 hours.

Staff
Opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. INTERDEPART

Prerequisites: Consent of instructor. Lab 12-36 hours.

Staff
Student has opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. INTERDEPART

404.01. Adult Primary Care Nursing—Clinical Preceptorship. (4-12) § F, W, Sp.
Prerequisites: Consent of instructor. Lab 12-36 hours.

Staff
Course provides an opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. COMM HLTH SYST

Prerequisites: Consent of instructor. Patient contact 6-36 hours.

Staff
Course provides student with the opportunity to apply and evaluate theories, concepts
and skills under the supervision of a preceptor in one or more clinical practice settings. FAM HLTH

404.06. Pediatric Nursing Residency. (4-12) § Su, F,W,Sp. Prerequisites: Consent of instructor. Lab 12-36 hours.

A. Hanson
Course offers opportunity to apply and evaluate theories, concepts, and skills in the work setting under supervision of a preceptor. Focus is on development of the pediatric clinical specialist role in ambulatory and chronic illness care. FAM HLTH

405. Practicum in Mental Hlth & Com Nurs. (1-8) § F,W,Sp. Prerequisites: Consent of instructor. Lab 3-24 hours.

Staff
Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of mental health and community nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. COMM HLTH SYST

406. Practicum in Family Hlth Care Nurs. (1-8) § F,W,Sp. Prerequisites: Consent of instructor. Lab 3-24 hours.

Staff
Course provides student opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of family health care nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. FAM HLTH

Staff
Opportunity to apply theory in clinical practice to further develop skills and to extend clinical expertise in selected aspects of physiological nursing. Guided clinical laboratory experience is designed to develop mastery of advanced skills. PHYSIOL NURS

407.01. Clin Mgmt of Older Adults. (2) § F Prerequisites: N208A&B (Human Pathophysiology & Aging) and N295A or B (Care of Older Adults [concurrently]), or consent of instructor. Lab 6 hours.

J. Janz
Course provides opportunity for skill development in comprehensive assessment of older adults. It emphasizes problem identification as a basis for planning scientifically based care from a multidisciplinary perspective and within the context of the life continuum. PHYSIOL NURS

408. Clinical Residency. (4-12) § Su, F,W, Sp. Prerequisites: Consent of instructor. Lab 12-36 hours.

Staff
Course provides the student an opportunity to apply and evaluate theories, concepts, and skills in the work setting under the supervision of a preceptor. INTERDEPART

409. Teaching Residency. (1-3) § Su, F,W, Sp. Prerequisites: Admission to doctoral study and consent of instructor. Lab 1-3 hours.

Staff
Course offers students an opportunity to engage in teaching with selected faculty. INTERDEPART

410. Teaching Practicum. (1-8) § F,W,Sp. Prerequisites: Consent of instructor. Lab 3-24 hours.

Staff
Supervised practice in selected components of the teaching role in nursing. COMM HLTH SYST

411C. Computers in Administration. (2) § Sp. Prerequisites: N411AB. Lecture 2 hours.

R. Slaughter
Course provides an introduction to administrative information systems and their impact upon patient care. Emphasis will be on data base management systems in a nursing administration environment. PHYSIOL NURS

411E. Data Management. (2) § SS1, F,W, Sp. Prerequisites: None. Biostatistics 187 or 185AB are recommended. Lecture 1 hour. Lab 3 hours.

S. Paul
Course offers a hands-on experience with computers and programs that can be used for data management and statistical analysis. The benefits of considering options for data collection, entry, analysis, and preparing research strategy before data are collected is emphasized. PHYSIOL NURS

Nutrition

120. Nutrition and Health. (1) W. Lecture 10 hours.

S. Silverstein
An introduction to the basic principles of human nutrition. Emphasis is on the maintenance of normal nutrition throughout the life span and its preventive role in maintaining general health, specifically oral health. DENT PUB HLTH

Y. Gutierrez
Application of current maternal nutrition research to train students in working with other health professionals to offer interdisciplinary maternal nutrition counseling in the prevention of low birth weight. Emphasis will be on cross-cultural factors in assessment and counseling. FAM HLTH

202. Family Nutrition Counseling. (3) § W. Prerequisites: Consent of instructor. Lecture 3 hours.

Y. Gutierrez
Theory and practice in the interpretation of current concepts, principles, and research in nutrition for family counseling. Emphasis on cultural dietary patterns. FAM HLTH

208. Childhood Nutrition. (2-3) § W. Lecture 2 hours, Module 1 hour.

Y. Gutierrez
Course provides study of nutritional principles, concepts, and knowledge related to infants and children, both healthy and ill. Emphasis is on growth processes, feeding practices, disease-induced nutritional deficiencies, common problems, and intervention approaches. Cross-cultural aspects included. FAM HLTH

249. Independent Study in Nutrition. (1-4) § FW, Sp. Prerequisites: Completion of or concurrent enrollment in Nu200, or Nu202, or Nu208. Lecture 1-4 hours.

Staff
Course is designed to focus on the exploration of selected nutritional issues in clinical nursing practice. Guided study will include analyses of scientific and popular nutrition literature, and identification and delineation of therapeutic approaches. FAM HLTH

Sociology

201. Violence as a Health Problem in the United States. (2-4) § W. Prerequisites: None. Lecture 2 hours. Lab 0-6 hours.

H. Pinderhughes
Course explores scope and etiology of violence in the United States. Discussion includes the links between different types of violence, examination of competing theoretical approaches to explain the courses of violence and different policy approaches to resolve and prevent violence. SOC BEH SC

G. Becker
Course provides discussion of problems faced by chronically ill persons and their families including crisis management, handling symptoms, managing regimens, social isolation, phases of disease, temporal difficulties, normalization, dying, as well as policy issues confronting health care personnel and the general public. SOC BEH SC

205. Health Professions, Occupations, and Work. (3) § W. Lecture 2 hours. Lab 3 hours.

C. Harrington
Course examines the nature of occupations and professions; their constellation in hospitals and clinics, the medical division
of labor, specialties and specialization, professional and occupational ideologies, the sociology of work relationships, careers. SOC BEH SC

C. Estes
Course introduces the student to classical perspectives in medical sociology and development of a critical perspective in the field to serve as a foundation for independent and advanced study in medical sociology. SOC BEH SC

208. Social Psychol of Hlth & Illness. (3) § F. Prerequisites: Required for doctoral students in sociology. Restriction: Doctoral-level students in nursing or sociology. Lecture 2 hours. Lab 3 hours.

Staff
Course examines the relationship of social class, ethnic identification, group membership, family structure, occupation, and lifestyle to health and illness, and therapeutic interaction of lay persons and health professionals. SOC BEH SC

C. Estes
Course surveys the classical and contemporary sociological issues in theoretical and empirical work on power; explores underlying assumptions and paradigms emerging and reflecting a sociopolitical milieu. The student will analyze literature and debates on power structure research and theory. SOC BEH SC

212A. Sociological Theory: Classical. (5) § F. Prerequisites: Doctoral students only. Lecture 2 hours. Lab 9 hours.

B. Powers
Course examines and evaluates classical and recent contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SC

212B. Sociological Theory: Contemporary. (5) § W. Prerequisites: S212A and must be a doctoral student. Lecture 2 hours. Research 9 hours.

C. Estes
Course examines and evaluates contemporary contributions to sociological theory. The main objective is the generation of a critical capacity with respect to received theory in both its formal and substantive varieties. SOC BEH SC

212C. Sociological Theory: Symbolic Interactionism. (5) § Sp. Prerequisites: S212AB or permission of instructor. Doctoral students only. Lecture 2 hours. Research 9 hours.

A. Clarke
Course consists of readings and discussions on interactionist theory in sociology, with emphasis on the origins and development of the Chicago School of Sociology, as well as an examination of the link between philosophy of pragmatism and interactionism. SOC BEH SC

214A. Field Research. (5) § F, Sp. Prerequisites: Doctoral level. Lecture 2 hours. Field work 9 hours.

V. Olesen, J. Kayser-Jones
Course offers sociological perspectives on the dimensions and properties of research in a natural, social setting. Focus is upon developing skills in negotiating entree, watching, listening, and recording of data. Emphasis is upon developing conceptual schemata in preparation for analysis. SOC BEH SC

214B. Qualitative Analysis. (5) § W. Prerequisites: Doctoral level; Sociology 214A. Lecture 2 hours. Field work 9 hours.

V. Olesen, J. Kayser-Jones
Course examines modes of analysis applicable to qualitative data; emphasis on dimensions and properties exhibited in student-presented data. SOC BEH SC

214C. Qualitative Analysis. (3) § F,W, Sp. Prerequisites: Doctoral level; Sociology 214A and 214B. Lecture 2 hours. Lab 3 hours.

A. Strauss
Course provides qualitative analysis and the development of substantive and formal sociological theory. Emphasis is on student-presented data and their conceptualization. SOC BEH SC

E. Lurie
Course will place students in organizations to provide opportunities to conduct research; apply and develop organizational theory; develop applied sociological, practical, and administrative skills and experience for students; and make sociologists attractive and salient to organizations outside academic settings. SOC BEH SC

216. Comparative Organizations: Intl Perspec. (3) § Sp. Prerequisites: S225. Seminar 2 hours. Independent study 3 hours.

R. Newcomer
Course is a comparative review of contributions to the sociology of formal organizations of health care. A variety of organizational forms will be considered with special emphasis on international health care comparisons. SOC BEH SC

R. Staples
Course explores changing dating, sexual, sex-role, marital, and familial patterns in the United States. Discussion of futuristic models of family life as affected by sociocultural forces. Special emphasis given to changing sex-role behavior as affecting male-female relationships. SOC BEH SC

218. Adv Topics in the Socio-Analysis of Aging. (2-4) § W. Prerequisites: Consent of instructor. Lecture 2 hours. Lab 0-6 hours.

C. Estes
Course is designed for doctoral students investigating advanced research issues preparatory to qualifying examinations. Topics to be analyzed will vary each year but will be focused upon a specific area. Laboratory assignments are for research activities on special topics in the area of aging. SOC BEH SC

219. Social Policy & Aging. (2-4) § W, Sp. Prerequisites: Consent of instructor. Lecture 2 hours. Lab 0-6 hours.

C. Estes
Course will provide a critical analysis of major social, economic and political issues of growing old in America; will examine social policy in the public and private sectors including health, income, and social services; and consider prospects for social change and political movements. SOC BEH SC

220. Seminar in Sociology. (1-3) § F, W, Sp. Prerequisites: None. Restrictions: Doctoral students only. Lecture 1 hour. Lab 0-6 hours.

P. Fox, P. Webber
Doctoral student seminar to discuss methods and problems in current research. Course may be repeated for credit. SOC BEH SC

221. Qualifying Examination. (1-8) § F, W, Sp. Prerequisites: Completion of preliminary examinations. Open to Sociology students only.

C. Harrington, C. Estes, A. Clarke, R. Newcomer, V. Olesen
Course will offer preparation for the specialty area qualifying examination. SOC BEH SC

222. Health Care Economics and Policy. (3) § F, Sp. Prerequisites: None. Lecture 3 hours.

C. Estes, C. Harrington
Course provides a critical analysis of economic, sociological, and political factors that affect health care. Examines U.S. health policies that impact on access, quality, costs, delivery systems, professional practices, and reform. SOC BEH SC

223. Perspectives on Public Policy. (3) § W, Sp. Prerequisites: Consent of instructor. Lecture 2 hours. Lab 3 hours.

R. Newcomer
Course offers systematic overview of health policy in American government—its scope, dynamics, and conceptual and practical dilemmas. Students will become acquainted with major issues involved in formulating, financing, implementing, and assessing patterns of decision (i.e., policy) established by government. SOC BEH SC

R. Newcomer
Course examines formal organizational theory, structure, and processes for health care organizations. The focus is on how organizations function within the socioeconomic and political environment in the United States. SOC BEH SC

C. Harrington
Course examines the history and social psychology of AIDS in relation to health, illness, disease, and death. Includes demographic trends, the cost burden, and special problems of minorities, women, and caregivers, along with policy issues. SOC BEH SC

P. Fox, S. Kaufman
Course reviews theories of aging including a review of theories of aging, current and historical trends in aging, factors related to aging, effects of aging on individuals and families, and formal and informal service systems for an aging population. SOC BEH SC

G. Becker, S. Kaufman
Course examines health status of the aged in the United States in light of relevant biological, behavioral, sociocultural, and political factors. Topics relevant to health care professionals working with the elderly will be discussed. SOC BEH SC

236. Race/Class Factors in Hlth Care Delivery. (3) § W. Prerequisites: Consent of instructor. Graduate standing. Lecture 2 hours. Lab 3 hours.

H. Pinderhughes
Course examines racial and class membership impact on access to health care services, variations in the quality of those services, and how professional and subprofessional roles in the health care system are organized along racial and class lines. SOC BEH SC

238. Feminist Theory. (2–4) § F, W, Sp. Prerequisites: Some background in social theory. Doctoral students only. Lecture 2 hours. Field work 0–6 hours.

Staff
Course provides in-depth overview and examination of 20th-century feminist theories from sociology, anthropology, and interdisciplinary perspectives. Emphasis is on current contributions and debates, with attention to relations between feminist theories and issues for research in women's health and healing. SOC BEH SC

239. Evaluation Research Methods. (3) § F, W, Sp. Prerequisites: Sociology 214A and 214B. Non-doctoral students may enroll upon approval of instructor. Lecture 2 hours. Lab 3 hours.

R. Newcomer
Course analyzes field work as evaluation method, as applied to health care settings and programs, contrasting this approach with quantitative methods predicated on analysis of outcomes. Conduct of such evaluative research, and relationship with audiences, such as policymakers, analyzed. SOC BEH SC

240. Older Women's Issues. (2–4) § F, W. Lab 0–6 hours. Seminar 2 hours.

C. Estes
Course analyzes postmenopausal women's socioeconomic status and changing social roles. Topics include demographic issues, economic trends, individual and health status, policy implications for individuals and society. SOC BEH SC

241. Women, Work & Health. (2–4) § F. Seminar 2 hours. Optional project for additional units.

J. Weinberg
How sociocultural systems place women in work roles, the implications for their health, their part in illness prevention and care of the sick. Analyzes "hidden careers," work and health in developing societies, relationship between work and morbidity-mortality patterns. SOC BEH SC

242. Women's Health: Res. (2-4) § Sp. Prerequisites: One or more women's health courses and one survey course in social research methods or social epidemiology. Seminar 2 hours. Optional project for additional units.

Staff
An advanced survey of quantitative research methods in analysis of women's health issues. Will focus on data sources, design types, evaluation methods, data analysis, and proposal and report writing. Exploration of current research controversies. SOC BEH SC

243. Qualitative Research in Women's Health. (2-4) § W. Prerequisites: One or more women's health courses and one course in qualitative methods. Doctoral students only. Seminar 2 hours. Optional project for additional units.

V. Olesen
An advanced survey of qualitative research methods in analysis of women's participation in health and healing systems. Will review epistemological assumptions, analytic strategies, design and modes to assure credibility, plausibility. Will focus on data sources and analysis of data. SOC BEH SC

244. Advanced Methods for Survey Analysis. (3) § Sp. Prerequisites: Introductory statistics through multivariate analysis. Lecture 2 hours. Lab 3 hours.

M. Laplante
Course teaches analytical methods to analyze large, complex, multi-stage stratified cluster sample surveys, i.e., National Health Interview Survey, Current Population Survey, health/demographic surveys. Covers sampling theory for multi-stage stratified cluster samples and applied instruction in using appropriate software (SUDAAN). SOC BEH SC

245. Gender and Science. (3) § Sp. Seminar 3 hours.

A. Clarke
Course is a study of historical and contemporary issues in the social construction of biological and medical sciences, epistemological problems, and feminist perspectives. Focus is on impact of gender on scientific work and includes scientific constructions of gender and women's careers in science. SOC BEH SC

247. Policy Issues & Political Processes. (3) § Sp. Prerequisites: S219, or S260, or equivalent and/or consent of instructor. Lecture 2 hours. Field work 3 hours.

C. Harrington, C. Estes
Course analyzes issues and trends in legislation and politics of health and examines health professionals' roles in developing strategies to influence legislative and political processes that affect planning and delivery of care. SOC BEH SC

Staff
Groups of two or more students select special problems to investigate on a collaborative basis. These studies may be conducted through readings, the collection or analysis of empirical data, or the development of conceptual analysis or of methodologies. SOC BEH SC

249. Special Studies. (1-8) § F, W, Sp. Prerequisites: Consent of instructor.

Staff
Students select special problems to investigate on an individual or collaborative basis. These studies may be conducted through readings, the collection or analysis of empirical data, or the development of conceptual analysis or of methodologies. SOC BEH SC

251. Women's Health: Sociocultural. (2-4) § Sp. Prerequisites: Consent of instructor. Lab 0-6 hours. Seminar 2 hours.

Staff
Exploration of relationship between culture and health for women in non-Western societies. Effects of modernization and migration
on utilization of traditional and cosmopolitan health care and on women's roles as providers will be discussed, and contemporary controversies will be analyzed. SOC BEH SC

252. Women's Health: Socio-Historical. (2-4) § W. Prerequisites: Consent of instructor. Lab 0-6 hours. Seminar 2 hours.

A. Clarke
Sociological analysis of women's health status, roles as providers and patients, and the development of medical ideas about women from a historical perspective. Emphasis on 19th- and 20th-century developments in industrialized societies. SOC BEH SC

A. Clarke
Course focuses on recent theoretical and substantive developments concerning female sexuality, birth control, population control, abortion, reproductive technologies, and pregnancy/childbirth. Examines race and class relations and concerns of the state, science, and medicine. SOC BEH SC

254. Women's Health: Policy Issues. (2-4) § W. Prerequisites: Consent of instructor. Lab 0-6 hours. Seminar 2 hours.

Staff
Consideration of factors in the emergence of issues in women's health and related policy. Perspectives on women as policymakers and the implementation of policy on women's health, participation in care and healing systems and access to training. SOC BEH SC

256. Introduction to Survey Research. (3) § Sp. Prerequisites: Biostatistics 183 and 185AB or equivalent. Restriction: Doctoral level; non-doctoral students may enroll upon consent of instructor. Lecture 2 hours. Lab 3 hours.

R. Newcomer
Course introduces sample theory, sample development, and methods of survey research. Course provides rudimentary skills for those conducting their own research and large field surveys. SOC BEH SC

G. Becker
Course explores the diversity of racial and ethnic variation and examines the health and aging experience of minority elderly within the context of families, communities, and the nation. SOC BEH SC

C. Harrington
Course examines health care policy and politics in terms of historical and contemporary issues related to access, quality, and cost. Organizational, financing, and labor market issues are included, along with strategies for social change. SOC BEH SC

262. Health Care Economics. (3) § F Lecture 2 hours. Lab 3 hours.

C. Harrington
Course is a critical analysis of economic theories and public and private financing of health care. Focuses on the effects of financing and reimbursement on health care delivery systems, professional practice, and individuals and families. SOC BEH SC

270A. Quantitative Methods I. (3) § F Restriction: Doctoral students in Sociology or consent of instructor. Lecture 2 hours. Lab 3 hours.

R. Newcomer, E. Froelicher
Course examines quantitative research methods used in sociological inquiry. The focus is on scientific models, problem formulation, use of theoretical frameworks, levels of analysis, settings and strategies, specification of constructs, and selection of indices. SOC BEH SC

270B. Quantitative Methods II. (3) § W. Prerequisites: 270A (Quantitative Methods I). Restriction: Doctoral students in Sociology or consent of instructor. Lecture 2 hours. Lab 3 hours.
R. Newcomer, E. Froelicher
Course examines quantitative research methods including issues of sampling, reliability and validity, data collection, analysis, and inference. The course examines experimental, quasi-experimental, ex-post-facto, and correlational research, as well as survey and evaluation methods. SOC BEH SC

270C. Advanced Quantitative Methods. (3) § F.W. Sp. Prerequisites: S270A and S270B or equivalent course in quantitative methods. Restriction: Doctoral students. Seminar 2 hours. Lab 3 hours.

Staff
Advanced seminar in research methods. Students will be able to appreciate the complexity of issues and challenges of advanced quantitative research in measurement models, complex survey analysis, longitudinal design and analysis, and meta-analysis. SOC BEH SC

R. Newcomer
Seminar addresses professional and career issues for sociologists, including teaching, research, writing for publication, and presentation of papers at professional meetings. Focuses on career and educational planning, résumé development, internships, mentorships, and job interviews. SOC BEH SC

272. Dissertation Research Seminar. (1-3) § F.W. Sp. Restriction: Doctoral students in Sociology or consent of instructor. Seminar 1 hour. Lab 0-6 hours.

C. Harrington
Course addresses logic of research design and execution for students. Clarification of research question, delineation of work plan, and orientation to relevant theoretical literature or empirical data available. SOC BEH SC

273. Demography of Health and Aging. (3) § W, Sp. Prerequisites: Consent of instructor. Lecture 2 hours. Lab 3 hours.

M. LaPlante
Course provides an overview of demographic studies of morbidity, disability, and mortality. Sociodemographic variations and changes over time in health and mortality profiles of populations and the relationship of morbidity, disability, and mortality trends will be covered. SOC BEH SC

274. Soc of Human Sexual Behavior. (3) § F.W. Sp. Prerequisites: None. Restriction: Doctoral program in Sociology or consent of instructor. Seminar 2 hours. Lab 3 hours.

R. Staples
Course examines contemporary sexual problems from a sociological perspective focusing on issues and their relationship to social structure. Topics will include sexually transmitted diseases, teenage pregnancy, sexual violence, sexual harassment, and incest. SOC BEH SC

E. Lurie
Course considers current research, policy, and funding issues with regard to the mentally ill aged, within the context of the epidemiology, treatment options, utilization patterns, formal and informal treatment systems, and special issues of the mentally ill elderly. SOC BEH SC

276. Multidisciplinary Geriatric Assessment. (1-3) § F.W. Sp. Lab 3-9 hours.

G. Becker, S. Kaufman
Course provides clinical experience in multidisciplinary assessment for sociologists, nurses, physicians, and other clinicians. Course involves application of social, psychological, economic, and other factors in assessment. SOC BEH SC

277. Seminar on Disability. (1-3) § F.W. Sp. Prerequisites: Doctoral students. Lab 3 hours. Seminar 1-2 hours.

M. LaPlante
Course covers social and medical models and theories of disability and handicap. Areas covered include definitions, utility of role theory, models of identification and causation, and social perspectives on disability policy. SOC BEH SC
278. Sociology of Alcohol and Drugs. (2-3) § F. Lab 0-3 hours. Seminar 2 hours. Offered in alternate years. Not offered 1997-98.

K. Fillmore
Course examines alcohol and drug use from multiple theoretical perspectives in various historical and cultural contexts. Examines the distribution of alcohol and drug use across and within societies and various policies and their consequences for the control and management. SOC BEH SC

280. Meta-Analysis in Health Research. (3) § F. Prerequisites: Basic research statistics and Research Methods (S270AB or N295). Lab 3 hours. Seminar 2 hours. Offered in alternate years. Not offered 1997-98.

K. Fillmore
Course introduces meta-analysis techniques and applications in health research, including research design, sampling and data collection, and analytical techniques and software. Uses examples from drug and alcohol studies, and other health care evaluation studies. SOC BEH SC

281. Ethics and Law in Health Care. (2-3) § W. Project 0-3 hours. Seminar 2 hours.

J. Weinberg
Course provides an understanding of legal policy issues relating to health care in the U.S. Health care provision is profoundly affected by issues involving ethics/law/social policy. Students gain insights into ways ethical principles/legal decision/policy perspectives affect health care. SOC BEH SC

A. Clarke
Course examines early functionalist and Marxist theories, Kuhn's work, social constructionist, ethnomet hodological, interactionist, neo-functionalism, critical, and neo-Marxist perspectives. Focuses on laboratory, controversy, technological, and representational studies and organization and funding. Links history and philosophy. SOC BEH SC

283. Selected Topics/Health Economics. (2-3) § W. Prerequisites: S262 (Health Care Economics). Lab 0-3 hours. Seminar 2 hours.

R. Miller
Course examines selected topics in health care economics, with attention to basic economic theory of supply and demand for health care services and health insurance. Includes national health insurance proposals and the Canadian health care system. SOC BEH SC

285. Sociocultural Variations in Health. (3) § F. Lecture 2 hours. Field work 3 hours.

R. Staples
Course addresses variations in health attitudes and practices among diverse groups in the United States, with implications for nursing practice. SOC BEH SC

285A. Qualitative Methods I. (5) § F. Prerequisites: Second-year doctoral students. Seminar 3 hours. Field work 6 hours.

A. Clarke, J. DeJoseph, J. Kayser-Jones, H. Pinderhughes
Course reviews many of the types of qualitative research methods, emphasizing assumptions, approaches. Focus on design, entree, ethics, data-gathering techniques (interviewing, observing), data recording and management. Introduction to data analysis. SOC BEH SC

285B. Qualitative Methods II. (5) § W. Prerequisites: N285A/S285A and second-year doctoral students. Seminar 3 hours. Field work 6 hours.

J. Kayser-Jones, H. Pinderhughes
Course compares and contrasts modes of qualitative analysis. Examines issues in establishing plausibility, credibility, adequacy. Intensive data analysis and examination of the problems of presentation of findings, with focus on questions of authority and preparation of text. SOC BEH SC
A. Strauss, A. Clarke, V. Olesen
In-depth experience with specific type of qualitative research guided by instructor trained and experienced in that approach. Styles of work offered by various instructors will include advanced grounded theory analysis, ethnography, hermeneutic analysis, narrative analysis. SOC BEH SC

286. Introduction to Women’s Health. (2-4) § F.W, Sp. Prerequisites: None. Lecture 2 hours. Field work 0-6 hours.
A. Clarke
Course examines women’s participation in formal/informal health and healing systems, emphasizing health problems, recruitment to health professions, images of women in health and illness, and women as providers. Health issues of women of color in the U.S. are highlighted. SOC BEH SC

R. Staples
Course provides a sociological interpretation of the black family institution in the United States of America. It examines black family culture, values, roles, socialization processes and class and gender variations. Emphasis is on changes in the last thirty years. SOC BEH SC

C. Harrington, R. Stall, W. Holzemer
Doctoral seminar for presentations and critiques of student work in progress on HIV/AIDS. SOC BEH SC

289A. Advanced Quantitative Research Methods I. (3) § F. Prerequisites: N209 and N212 or equivalent, B187 and Doctoral students only. Lecture 2 hours. Lab 3 hours.
R. Newcomer, E. Froelicher
Course addresses theoretical basis of advanced quantitative methods. Fundamental issues of causality, and design issues pertinent to causality, are addressed using randomized clinical trials as models for experimental designs. Methods of sampling and issues in data collection and measurement are explored. SOC BEH SC

289B. Advanced Quantitative Research Methods II. (3) § W. Prerequisites: S289A and doctoral students only. Lecture 2 hours. Lab 3 hours.
E. Froelicher, R. Newcomer
Course covers continuing analysis of quantitative research methods including selected survey, longitudinal study designs. Focus compares and contrasts research designs, proposes strategies for maximizing strengths of various designs. Explores fit of research questions, methods, and statistical approaches. Examples of methods include questions answered by time series analysis, lifetable and survival analysis. SOC BEH SC

289C. Advanced Measurement Methods. (3) § Sp. Prerequisites: S289AB or equivalent course(s) in quantitative methods and doctoral students only. Lecture 2 hours. Lab 3 hours.
A. Stewart
Overview of current standard approaches to conceptualizing and measuring self-reported health, review of psychometric properties of self-reported measures of health, adequacy of measurement in diverse populations, development of health status surveys, and selection of appropriate measures for research purposes. SOC BEH SC

299. Dissertation. (0) § F.W, Sp. Prerequisites: Advancement to candidacy and permission of the graduate adviser.
Staff
For graduate students engaged in writing the dissertation for the PhD degree. SOC BEH SC
